

WAC 16-301-400 Additional requirements for planting bean seed grown in the regulated area. (1) Bean seed must be entered into the Washington state bean phyto-sanitary certificate inspection program or the Washington state seed certification inspection program as provided in WAC 16-302-045 and 16-301-235.

(2) When the director determines that an emergency condition exists because of a shortage of seed for planting purposes, beans grown for processing as edible beans may be accepted for planting purposes if the lot has been tested by means recommended by the university and approved by the director and found to be apparently free of regulated diseases.
