

(Effective August 1, 2023)

WAC 246-366A-140 Water quality monitoring—Other drinking water contaminants. The local health officer may require:

(1) Sampling of drinking water when public health concerns exist about drinking water contaminants other than lead or copper;

(2) Corrective actions in response to sampling results for other contaminants; and

(3) School officials to notify school facility staff, students and parents, and the local health officer about test results.
