

WAC 296-811-50005 Brigade members in interior structural fires.

IMPORTANT:

Nothing in this section is meant to prevent fire brigade members assigned to respond to fires from rescue activities in an immediately dangerous to life and health (IDLH) atmosphere before the whole team assigned to respond to fires has arrived.

(1) You must make sure at least two qualified fire brigade members go together into an IDLH atmosphere and remain in visual or voice contact with each other at all times.

(2) You must maintain standby assistance, with two people, as required by another section, Standby requirements for immediately dangerous to life or health (IDLH) conditions, WAC 296-842-19005.

Note: One of the two brigade members providing standby assistance can be assigned another role, such as safety officer, as long as the safety or health of any firefighter working the incident will not be jeopardized if the brigade member becomes unavailable through giving assistance or rescue.

Reference: More information on interior structural fires is located in another section, WAC 296-305-05001, Emergency fireground operations—Structural.
