ORDER NO. 1242  
(Supersedes Order No. 1190)

EFFECTIVE MAY 14, 1972

REGULATIONS PERTAINING TO THE USE OF HERBICIDES IN ADAMS COUNTY

I, Cameron S. Adams, Acting Director of Agriculture of the State of Washington, by virtue of the authority vested in me under Chapters 17.21 and 15.58 RCW, after due notice as provided under Chapters 34.04 and 42.32 RCW, and a public hearing held in Ritzville, Washington, on April 5, 1972, do hereby promulgate the following regulations relating to the use of growth regulating herbicides.

REGULATION 1. AREA UNDER ORDER, RESTRICTED USE HERBICIDES, AND PROHIBITED FORMULATIONS.

AREA UNDER ORDER: All lands lying within the borders of Adams County.

RESTRICTED USE HERBICIDES: All formulations of phenoxy hormone type herbicides, including 2,4-D, 2,4,5-T and MCPA are by this Order declared to be restricted use herbicides.

PROHIBITED FORMULATIONS: The use of dust formulations of restricted use herbicides are prohibited in the entire area under Order. The use of all oil type carriers, emulsifiers and spreader stickers is also prohibited: PROVIDED, That oil type emulsifiers and spreader stickers may be used when not in excess of one pint per acre; and from October 1 to May 15 of the following year, oil type carriers may be used for brush control.

REGULATION 2. AREA 1. All lands lying within the borders of Adams County.

AREA 1. Restrictions. From May 15 to October 1 of each year the application of high volatile formulations of restricted use herbicides shall be prohibited and aerial applications of low volatile formulations shall be made with a minimum of two gallons of water per acre and aircraft shall be equipped with nozzles having a minimum orifice diameter of 0.078 inches, directed downward or backward more than 90 degrees from the direction of flight.

REGULATION 3. WIND AND WEATHER CONDITIONS. The application of restricted use herbicides by ground or aerial equipment shall be prohibited from May 15 to October 1 of each year when the mean sustained wind velocity is over seven miles per hour from any direction. Even though wind velocity is within the limits allowable for spraying, restricted use herbicides shall not be applied if other weather conditions (examples - temperature inversion, high temperature, etc.) are such that damage could result to adjacent and nearby towns, susceptible crops, and plantings through physical drift or volatilization.

REGULATION 4. 85 DEGREE TEMPERATURE CUTOFF. From May 1 to October 1, the application of all volatile formulations of restricted use herbicides shall be prohibited when the temperature is above 85 degrees.

REGULATION 5. AIRCRAFT RESTRICTION. Aircraft carrying restricted use herbicides are prohibited from turning and/or low flying during spraying operations over cities and towns unless authorized by the city or town in question pursuant to an agreement for pesticide application; or residences, windbreaks, orchards or susceptible crops belonging to any person other than the owner of the property being treated, except by permission of the person whose residence, windbreak, orchard, or susceptible crop is involved.

I hereby certify that the foregoing is a true and correct copy of the regulations promulgated.
