CITATION

Cite all material in the Washington State Register by its issue number and sequence within that issue, preceded by the acronym WSR. Example: the 37th item in the August 5, 1981, Register would be cited as WSR 81-15-037.

PUBLIC INSPECTION OF DOCUMENTS

A copy of each document filed with the code reviser's office, pursuant to chapter 34.05 RCW, is available for public inspection during normal office hours. The code reviser's office is located on the ground floor of the Legislative Building in Olympia. Office hours are from 8 a.m. to 5 p.m., Monday through Friday, except legal holidays. Telephone inquiries concerning material in the Register or the Washington Administrative Code (WAC) may be made by calling (360) 786-6697.

REPUBLICATION OF OFFICIAL DOCUMENTS

All documents appearing in the Washington State Register are prepared and printed at public expense. There are no restrictions on the republication of official documents appearing in the Washington State Register. All news services are especially encouraged to give wide publicity to all documents printed in the Washington State Register.

CERTIFICATE

Pursuant to RCW 34.08.040, the publication of rules or other information in this issue of the Washington State Register is hereby certified to be a true and correct copy of such rules or other information, except that headings of public meeting notices have been edited for uniformity of style.

DENNIS W. COOPER
Code Reviser

STATE MAXIMUM INTEREST RATE

(Computed and filed by the State Treasurer under RCW 19.52.025)

The maximum allowable interest rate applicable for the month of June 2001 pursuant to RCW 19.52.020 is twelve point zero percent (12.00%).

NOTICE: FEDERAL LAW PERMITS FEDERALLY INSURED FINANCIAL INSTITUTIONS IN THE STATE TO CHARGE THE HIGHEST RATE OF INTEREST THAT MAY BE CHARGED BY ANY FINANCIAL INSTITUTION IN THE STATE. THE MAXIMUM ALLOWABLE RATE OF INTEREST SET FORTH ABOVE MAY NOT APPLY TO A PARTICULAR TRANSACTION.

WASHINGTON STATE REGISTER

(ISSN 0164-6389) is published twice each month by the Statute Law Committee, Office of the Code Reviser, Olympia, WA 98504-0552, pursuant to RCW 34.08.020. Subscription rate is \$210.60 per year, sales tax included, postpaid to points in the United States. Periodical postage paid at Olympia, Washington.

STYLE AND FORMAT OF THE WASHINGTON STATE REGISTER

1. ARRANGEMENT OF THE REGISTER

The Register is arranged in the following eight sections:

- (a) **PREPROPOSAL**-includes the Preproposal Statement of Inquiry that will be used to solicit public comments on a general area of proposed rule making before the agency files a formal notice.
- (b) **EXPEDITED REPEAL**-includes the Preproposal Statement of Inquiry that lists rules being repealed using the expedited repeal process. Expedited repeals are not consistently filed and may not appear in every issue of the Register.
- (c) **PROPOSED**-includes the full text of formal proposals, continuances, supplemental notices, and withdrawals.
- (d) **PERMANENT**-includes the full text of permanently adopted rules.
- (e) **EMERGENCY**-includes the full text of emergency rules and rescissions.
- (f) **MISCELLANEOUS**-includes notice of public meetings of state agencies, rules coordinator notifications, summaries of attorney general opinions, executive orders and emergency declarations of the governor, rules of the state Supreme Court, and other miscellaneous documents filed with the code reviser's office under RCW 34.08.020 and 42.30.075.
- (g) **TABLE**-includes a cumulative table of the WAC sections that are affected in the current year.
- (h) **INDEX**-includes a cumulative index of Register Issues 01 through 24.

Documents are arranged within each section of the Register according to the order in which they are filed in the code reviser's office during the pertinent filing period. Each filing is listed under the agency name and then describes the subject matter, type of filing and the WSR number. The three part number in the heading distinctively identifies each document, and the last part of the number indicates the filing sequence with a section's material.

2. PRINTING STYLE—INDICATION OF NEW OR DELETED MATERIAL

RCW 34.05.395 requires the use of certain marks to indicate amendments to existing agency rules. This style quickly and graphically portrays the current changes to existing rules as follows:

- (a) In amendatory sections—
 - (i) underlined material is new material;
 - (ii) ~~deleted material is ((lined out between double parentheses))~~;
- (b) Complete new sections are prefaced by the heading **NEW SECTION**;
- (c) The repeal of an entire section is shown by listing its WAC section number and caption under the heading **REPEALER**.

3. MISCELLANEOUS MATERIAL NOT FILED UNDER THE ADMINISTRATIVE PROCEDURE ACT

Material contained in the Register other than rule-making actions taken under the APA (chapter 34.05 RCW) does not necessarily conform to the style and format conventions described above. The headings of these other types of material have been edited for uniformity of style; otherwise the items are shown as nearly as possible in the form submitted to the code reviser's office.

4. EFFECTIVE DATE OF RULES

- (a) Permanently adopted agency rules normally take effect thirty-one days after the rules and the agency order adopting them are filed with the code reviser's office. This effective date may be delayed or advanced and such an effective date will be noted in the promulgation statement preceding the text of the rule.
- (b) Emergency rules take effect upon filing with the code reviser's office unless a later date is provided by the agency. They remain effective for a maximum of one hundred twenty days from the date of filing.
- (c) Rules of the state Supreme Court generally contain an effective date clause in the order adopting the rules.

5. EDITORIAL CORRECTIONS

Material inserted by the code reviser's office for purposes of clarification or correction or to show the source or history of a document is enclosed in [brackets].

¹ All documents are due at the code reviser's office by 12:00 noon on or before the applicable closing date for inclusion in a particular issue of the Register; see WAC 1-21-040.

² A filing of any length will be accepted on the closing dates of this column if it has been prepared and completed by the order typing service (OTS) of the code reviser's office; see WAC 1-21-040. Agency-typed material is subject to a ten page limit for these dates; longer agency-typed material is subject to the earlier non-OTS dates.

³ At least twenty days before the rule-making hearing, the agency shall cause notice of the hearing to be published in the Register; see RCW 34.05.320(1). These dates represent the twentieth day after the distribution date of the applicable Register.

⁴ A minimum of forty-five days is required between the distribution date of the Register giving notice of the expedited adoption and the agency adoption date. No hearing is required, but the public may file written objections. See RCW 34.05.230 and 1.12.040.

REGULATORY FAIRNESS ACT

The Regulatory Fairness Act, chapter 19.85 RCW, was enacted in 1982 to minimize the impact of state regulations on small business. Amended in 1994, the act requires a small business economic impact analysis of proposed rules that impose more than a minor cost on twenty percent of the businesses in all industries, or ten percent of the businesses in any one industry. The Regulatory Fairness Act defines industry as businesses within a four digit SIC classification, and for the purpose of this act, small business is defined by RCW 19.85.020 as "any business entity, including a sole proprietorship, corporation, partnership, or other legal entity, that is owned and operated independently from all other businesses, that has the purpose of making a profit, and that has fifty or fewer employees."

Small Business Economic Impact Statements (SBEIS)

A small business economic impact statement (SBEIS) must be prepared by state agencies when a proposed rule meets the above criteria. Chapter 19.85 RCW requires the Washington State Business Assistance Center (BAC) to develop guidelines for agencies to use in determining whether the impact of a rule is more than minor and to provide technical assistance to agencies in developing a SBEIS. All permanent rules adopted under the Administrative Procedure Act, chapter 34.05 RCW, must be reviewed to determine if the requirements of the Regulatory Fairness Act apply; if an SBEIS is required it must be completed before permanent rules are filed with the Office of the Code Reviser.

Mitigation

In addition to completing the economic impact analysis for proposed rules, state agencies must take reasonable, legal, and feasible steps to reduce or mitigate the impact of rules on small businesses when there is a disproportionate impact on small versus large business. State agencies are encouraged to reduce the economic impact of rules on small businesses when possible and when such steps are in keeping with the stated intent of the statute(s) being implemented by proposed rules. Since 1994, small business economic impact statements must contain a list of the mitigation steps taken, or reasonable justification for not taking steps to reduce the impact of rules on small businesses.

When is an SBEIS Required?

When:

The proposed rule has more than a minor (as defined by the BAC) economic impact on businesses in more than twenty percent of all industries or more than ten percent of any one industry.

When is an SBEIS Not Required?

When:

The rule is proposed only to comply or conform with a federal law or regulation, and the state has no discretion in how the rule is implemented;

There is less than minor economic impact on business;

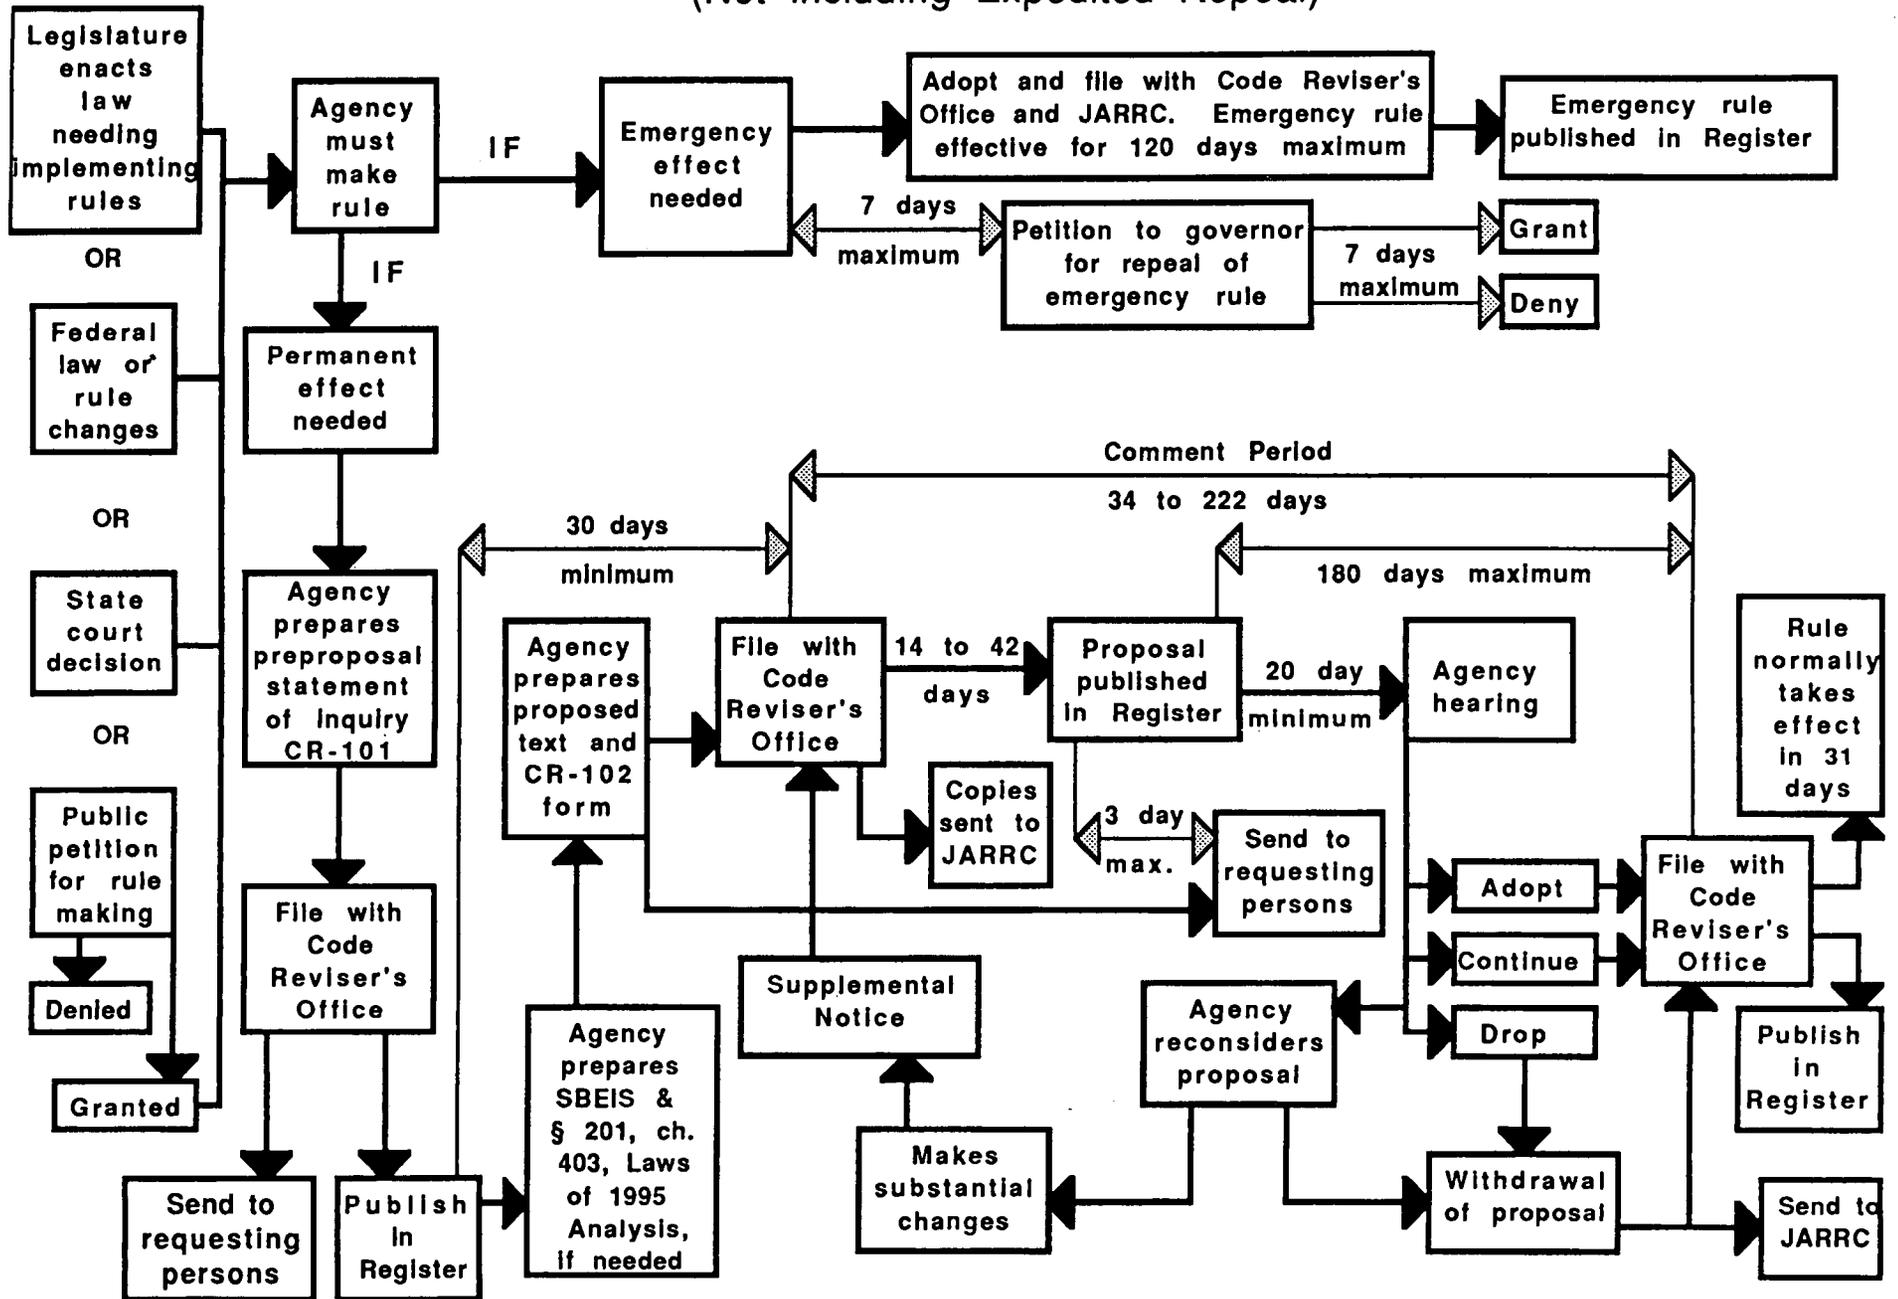

The rule REDUCES costs to business (although an SBEIS may be a useful tool for demonstrating this reduced impact);

The rule is adopted as an emergency rule, although an SBEIS may be required when an emergency rule is proposed for adoption as a permanent rule; or

The rule is pure restatement of state statute.

RULE-MAKING PROCESS

(Not including Expedited Repeal)

WSR 01-12-012**PREPROPOSAL STATEMENT OF INQUIRY
DEPARTMENT OF
FINANCIAL INSTITUTIONS**

(Securities Division)

[Filed May 25, 2001, 9:37 a.m.]

Subject of Possible Rule Making: Amend chapter 460-33A WAC to require mortgage broker-dealers to review investor suitability on an annual basis and in relation to the investor's other mortgage paper security holdings; require certain disclosures to investors in the sale of property acquired by investors through the foreclosure process; raise the face amount of the surety bond required by WAC 460-33A-040 (1)(b) from the amount established in 1986; make technical corrections to update references in WAC 460-33A-090(3) regarding dishonest and unethical practices; articulate the fiduciary duty of mortgage broker-dealers; and to require disclosure of loan to value ratios based on the tax assessed valuation of the property, as well as the "as is" appraised value if an appraisal was obtained.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 21.20.450.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: The proposed revisions to chapter 460-33A WAC have been drafted to ensure mortgage broker-dealers review investor suitability on a periodic basis; to address concerns raised by investors in mortgage paper securities sold by mortgage broker-dealers registered in the state of Washington in connection with sales of property acquired by the investors through the foreclosure process; raise the face amount of the required surety bond from the amount established in 1986 (\$50,000) to \$100,000 in order to ensure the proceeds would be sufficient to aid investors in the event of failure of the mortgage broker-dealer; correct references to repealed provisions; ensure mortgage broker-dealers are aware of their fiduciary duty to investors; and to ensure adequate disclosure is provided to investors regarding loan to value ratios.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: The Securities Division is the sole securities regulator for these offerings.

Process for Developing New Rule: Negotiated rule making; and a draft of the proposed revisions to chapter 460-33A WAC is available from the Securities Division.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting Faith L. Anderson, Securities Division, Department of Financial Institutions, P.O. Box 9033, Olympia, WA 98507-9033, (360) 902-8760, fax (360) 704-6946, fanderson@dfi.wa.gov, Securities Division Web Site: <http://www.wa.gov/dfi/securities>.

May 23, 2001

Deborah Bortner
Director of Securities**WSR 01-12-020****PREPROPOSAL STATEMENT OF INQUIRY
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES**

(Economic Services Administration)

(Division of Employment and Assistance Programs)

[Filed May 25, 2001, 11:33 a.m.]

Subject of Possible Rule Making: Chapter 388-444 WAC, Food stamp employment and training.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 74.04.510, 74.04.057, 74.04.050, 74.04.055, 74.08.090.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: The revision will simplify the language and make it easier for clients to understand the rules.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: None.

Process for Developing New Rule: The Department of Social and Health Services (DSHS) welcomes the public to take part in developing the rules. Anyone interested in participating should contact the person listed below. After the rule is drafted, DSHS will file a copy with the Office of the Code Reviser with a notice of proposed rule making, and send a copy to everyone currently on the mailing list and anyone else who requests a copy. The Economic Services Administration's regulatory improvement team will also review these rules before adoption.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting Wendy Forslin, Program Manager, Division of Employment and Assistance Programs, P.O. Box 45480, Olympia, WA 98504-5470, (360) 413-3233, fax (360) 413-3494, TTY (360) 413-3001, e-mail forswc@dshs.wa.gov.

May 22, 2001

Brian H. Lindgren, Manager
Rules and Policies Assistance Unit**WSR 01-12-033****PREPROPOSAL STATEMENT OF INQUIRY
DEPARTMENT OF CORRECTIONS**

[Filed May 29, 2001, 11:12 a.m.]

Subject of Possible Rule Making: Visitation of offenders housed in correctional facilities.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 72.01.090.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: The rules will contain procedures on the visitation of offenders in correctional institutions. These rules are essential to maintaining safety and security within the correctional institutions.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: None.

Process for Developing New Rule: The department invites interested parties to review and provide input on the proposed rules. The contemplated rules will be substantially identical to chapter 275-80 WAC, which was repealed. Comments may be sent to John Nispel, rules coordinator at the address shown below.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting John Nispel, Rules Coordinator, Department of Corrections, Rules, Contracts and Public Disclosure, P.O. Box 41114, Olympia, WA 98504-1114, phone (360) 586-2160, fax (360) 664-2009, e-mail jrnispel@doc1.wa.gov.

May 24, 2001
Joseph D. Lehman
Secretary

WSR 01-12-053
PREPROPOSAL STATEMENT OF INQUIRY
UTILITIES AND TRANSPORTATION
COMMISSION

[Docket No. A-010648—Filed June 1, 2001, 3:38 p.m.]

Subject of Possible Rule Making: Examine the need to reorganize, revise, repeal, and adopt rules governing the conduct of business before the commission, including rules governing formal proceedings, such as the rules presently codified in chapter 480-09 WAC, Procedure.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 80.01.040(4) and 34.05.020.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: It is important that there be clearly stated methods and opportunities to interact with the commission in adjudications, rule makings, and in the conduct of other business. The commission's experience since it last revised rules governing the conduct of business before the commission demonstrate the need to inquire into existing procedures and consider whether new or amended rules are required. New or amended rules may be needed to improve the handling of confidential documents, discovery in adjudicative proceedings, and other processes routinely undertaken in the conduct of commission business.

Process for Developing New Rule: Agency study; and the commission will schedule one or more workshops with representatives of affected constituencies in a manner designed to develop consensus among affected interests regarding any rule proposal. The first workshop is scheduled for June 22, 2001, at 1:30 p.m., at the commission's office in Olympia, Washington. The commission will ask for initial written comments by July 13, 2001, and will provide the opportunity for additional comments.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting the Secretary, Washington Utilities and Transportation Commission, P.O. Box 47250, 1300 South Evergreen Park Drive S.W., Olympia, WA 98504-7250, phone (360) 664-1174, fax (360) 586-1150.

For specific information regarding opportunities for written comment, opportunities for participation in workshops, and to ensure receipt of further information concerning this rule making, please see below.

Interested persons may submit comments, as specified below, or may ask to be included in the commission's list of interested persons for the proceeding.

NOTICE OF WORKSHOP: An initial workshop will be held on June 22, 2001, beginning at 1:30 p.m., in Commission Room 108, First Floor, Chandler Plaza, 1300 South Evergreen Park Drive S.W., Olympia, WA. Although interested persons are strongly encouraged to participate in person, the commission's teleconference bridge line will be available for this workshop. A limited number of teleconference ports are available and will be assigned one to an organization, first come first served. Persons wishing to attend via the teleconference bridge line must contact Kippi Walker at (360) 664-1139 no later than 5:00 p.m., June 20, 2001. Questions may be addressed to Dennis Moss at (360) 664-1164 or via e-mail at dmoss@wutc.wa.gov. The commission will provide written notice of any additional preproposal workshops to all commenters and to any other persons who specifically ask to receive future notices in this rule-making proceeding.

WRITTEN COMMENTS: Written comments in response to the CR-101 from persons interested in the subject matter of this proposed rule making may be filed with the commission secretary, referencing Docket No. A-010648, not later than July 13, 2001. All commenters are asked, but not required, to file their comments electronically. The commission prefers to receive comments either via e-mail attachment (addressed to records@wutc.wa.gov) or on a 3 1/2 inch IBM formatted high-density disk, in .pdf format and either MSWord 97 or later, or WordPerfect version 5.1 or later, labeled with the docket number of this proceeding and the commenter's name and type of software used. If you are unable to file your comments electronically, please file the original and sixteen copies of your comments with the commission secretary at the address indicated above. The commission may offer additional opportunities to provide written comments. Interested persons may file additional written comments in response to any such invitation. Interested persons may also attend and participate in the workshop described above and in any other workshop that may be scheduled.

NOTICE

TO CONTINUE RECEIVING NOTICES AND INFORMATION ABOUT THIS RULEMAKING — The commission wants to ensure its mailings are sent to persons who are interested in the topic and want to receive that information. **Any person who submits comments will automatically continue to receive notices and information. If you do not submit comments but wish to be on the mailing list for this rule-making, please advise the records center by one of the following methods:** (1) Send a note with your name, address (or a copy of your mailing label), and telephone and fax numbers referencing Docket No. A-010648, and the words "Please include me on the mailing list"; or (2) e-mail your name, address, telephone and fax numbers, referencing

Docket No. A-010648, and the words "Please include me on the mailing list" to records@wutc.wa.gov. Please note that all information in the mailings will be accessible through the Commission's Internet web site at <http://www.wutc.wa.gov/>. **IF YOU DO NOT SUBMIT COMMENTS OR ADVISE THE RECORDS CENTER OF YOUR INTEREST, YOU MAY NOT RECEIVE FURTHER MAILINGS OR INFORMATION ON THE RULE MAKING.**

PREPROPOSAL STATEMENT OF INQUIRY HORSE RACING COMMISSION

[Filed June 4, 2001, 9:23 a.m.]

Subject of Possible Rule Making: WAC 260-75-010
Satellite locations daily fee.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 67.16.040.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: Strike this rule in its entirety. Unnecessarily harmful to the industry.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: None.

Process for Developing New Rule: Agency study.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting Bruce Batson, Executive Secretary, Washington Horse Racing Commission, 7912 Martin Way, Suite D, Olympia, WA 98516-5703, (360) 459-6462, fax (360) 459-6461, e-mail whrc@whrc.state.wa.us.

PREPROPOSAL STATEMENT OF INQUIRY HORSE RACING COMMISSION

[Filed June 4, 2001, 9:25 a.m.]

Subject of Possible Rule Making: New rule relating to rebating practices by associations.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 67.16.040.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: Adding a new rule relating to the practice of rebating by association to lure certain individuals to their establishments. Rules would aid in the regulation and possible enforcement.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: None.

WSR 01-12-077

PREPROPOSAL STATEMENT OF INQUIRY PARKS AND RECREATION COMMISSION

[Filed June 5, 2001, 11:25 a.m.]

Subject of Possible Rule Making: The commission is considering the adoption of new administrative rules under Title 352 WAC, Parks and Recreation Commission, to establish the requirements and the administrative authority for issuing permits to parties interested in making improvements to any state park or parkway as provided for in RCW 79A.05.140. The commission is also considering the appropriate methods for providing public access to any interpretive or administrative policy governing such permits.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 79A.05.030, 79A.05.070, 79A.05.075, 79A.05.140, 79A.05.145, 79A.05.150, and 79A.05.155.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: RCW 79A.05.140 establishes the commission's authority to grant permits to parties interested in making improvements to any state park or parkway. The commission is considering rule-making action to implement this statute and is considering delegating the authority for issuing permits for park improvements to the agency director or designee. The commission believes this action will provide interested parties with the appropriate means to donate funds, materials and labor to create safe, cost effective park improvements and to increase outdoor recreation opportunities for the benefit of state park visitors and resources in the state park system.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: The Washington State Parks and Recreation Commission has final authority and overall responsibility for granting permits for improvement of state park properties. State park staff have reviewed risk management issues regarding volunteer labor with the state Department of Labor and Industries, and prevailing wage regulations and public works contracts with the Washington State Department of Labor and Industries and Washington State Department of General Administration.

Process for Developing New Rule: Agency study; and quality improvement charter team.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting Kathy Randall at Washington State Parks and Recreation, P.O. Box 42650, Olympia, WA 98504-2650, fax (360) 586-5875, phone (360) 902-8528 or e-mail Kathy.Randall@parks.wa.gov.

WSR 01-12-078

**PREPROPOSAL STATEMENT OF INQUIRY
DEPARTMENT OF AGRICULTURE**

[Filed June 5, 2001, 11:31 a.m.]

Subject of Possible Rule Making: Chapter 16-750 WAC, State noxious weed list and schedule of monetary penalties.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 17.10.080, 17.10.070, and 17.10.010(5).

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: The State Noxious Weed Control Board is charged with updating the state noxious weed list on an annual basis to ensure it accurately reflects noxious weed control priorities and noxious weed distribution.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: No other state agencies regulate this subject. Federal agencies are subject to federal noxious weed laws that require them to coordinate with state regulations. Federal agencies in Washington are invited to participate in all stages of noxious weed rule making.

Process for Developing New Rule: The State Noxious Weed Control Board (board) annually solicits suggestions from county programs, state and federal agencies, interest groups, and the general public by a series of extensive mailings. The Noxious Weed Committee of the board, which includes representation from the Washington Native Plant Society, county weed boards, the nursery industry, and several scientific advisors, meets at least twice to review and research the suggestions. These draft suggestions are sent out again for public comment before the Noxious Weed Committee drafts its final recommendation to the board. The board will then consider these recommendations and draft a final rule-making proposal. Public comment is welcome at all committee and board meetings. A press release and information mailing is prepared on the recommended changes and a public hearing is scheduled. The board makes its final decision after considering the public input received at the hearing.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting Lisa Lantz, Washington State Noxious

Weed Control Board, 7611 Pioneer Way East, Puyallup, WA 98371, phone (253) 445-4593, fax (253) 445-4533.

**PREPROPOSAL STATEMENT OF INQUIRY
DEPARTMENT OF
FISH AND WILDLIFE**

[Filed June 5, 2001, 1:37 p.m.]

Subject of Possible Rule Making: Definition of extenuating circumstances in the coastal crab fishery.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 77.12.047.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: The legislature has passed a bill that requires the department to consider extenuating circumstances in the assigning of crab pot limits to individual fishers. The department will review the circumstances particular to this fishery and determine what factors are extenuating.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: None.

Process for Developing New Rule: Agency study.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting Phil Anderson, Special Assistant Director for Intergovernmental Programs, 600 Capitol Way, Olympia, WA 98501-1091, phone (360) 902-2720. Contact by July 31, 2001, expected proposal filing August 1, 2001.

**PREPROPOSAL STATEMENT OF INQUIRY
DEPARTMENT OF
FISH AND WILDLIFE**

[Filed June 5, 2001, 1:58 p.m.]

Subject of Possible Rule Making: Commercial licensing application deadlines.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 77.12.047.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: The legislature passed SB 5443, which allows an heir or estate a reasonable period of time to make an application to renew a license that expired after a decedent failed to renew during the year of the demise. The department will adopt a rule that incorporates a "reasonable period."

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: None.

Process for Developing New Rule: Agency study.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting Jim Lux, Management Services Program, Assistant Director, 600 Capitol Way, Olympia, WA 98501-1091, phone (360) 902-2444. Contact by July 31, 2001, expected proposal filing August 1, 2001.

June 5, 2001
Evan Jacoby
Rules Coordinator

WSR 01-12-093

PREPROPOSAL STATEMENT OF INQUIRY DEPARTMENT OF HEALTH

[Filed June 6, 2001, 9:09 a.m.]

Subject of Possible Rule Making: Physician and physician assistant fees.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 18.71.017, 18.71A.020, and 43.70.280.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: (1) Creating a new fee for those transitioning from a limited license to a full license; (2) revising the description of the "impaired physicians program" fee which is confusing, not to change the fee; (3) removing language of the "one year renewal that is no longer necessary; and (4) correcting typographic error for the expired license reissuance fee that is set by WAC.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: None.

Process for Developing New Rule: Collaborative rule making.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting Beverly A. Teeter, Medical Quality Assurance Commission, P.O. Box 47866, Olympia, WA 98504-7866, phone (360) 236-4788, fax (360) 586-4573.

M. C. Selecky
Secretary

WSR 01-12-094

PREPROPOSAL STATEMENT OF INQUIRY DEPARTMENT OF HEALTH

[Filed June 6, 2001, 9:11 a.m.]

Subject of Possible Rule Making: To establish an endorsement for dental assistants and dental hygienists to apply sealants and fluoride varnishes to low income, rural and at risk populations in coordination with local public health jurisdictions and local oral health coalitions through school based programs. Also, to establish an endorsement fee.

Statutes Authorizing the Agency to Adopt Rules on this Subject: Chapter 93, Laws of 2001 (SSB 6020).

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: To establish the Washington state endorsement education program requirements; to define "in coordination with local health jurisdictions and local oral health coalitions"; to define "low income, rural and at risk populations"; to establish an endorsement fee for dental assistants and dental hygienists. The legislature has required the department to develop rules to address the problem of poor access to oral health care. Establishing an endorsement program will encourage the promotion of dental health.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: None.

Process for Developing New Rule: Collaborative rule making.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication. A questionnaire will be mailed to all interested parties - provide in writing to Carol Lewis, Health Administrator, (360) 236-4857, or Lisa Anderson, Program Manager, (360) 236-4863, P.O. Box 47867, Olympia, WA 98504-7867, fax (360) 664-9077.

M. C. Selecky
Secretary

WSR 01-12-102

PREPROPOSAL STATEMENT OF INQUIRY UTILITIES AND TRANSPORTATION COMMISSION

[Docket No. UT-010558—Filed June 6, 2001, 11:42 a.m.]

Subject of Possible Rule Making: Examine the need to adopt rules relating to cessation of telecommunications services including but not limited to notice requirements, services covered, and responsibilities of remaining companies, WAC 480-120-083.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 80.01.040(4) and 80.04.160.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: Rules may be needed because changing conditions in the telecommunications industry may, without warning, cause business failures and decisions to exit the market. Rules may assist in the orderly transition of service to protect public health, safety, and economic vitality.

Process for Developing New Rule: Agency study; and the commission will ask for initial written comments, and will provide the opportunity for additional comments. The commission has scheduled a workshop for representative of affected constituencies in a manner designed to develop consensus amount affected interests regarding any rule proposal. The time and place of the workshop is set out below.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting the Secretary, Washington Utilities and Transportation Commission, P.O. Box 47250, 1300 South

Evergreen Park Drive S.W., Olympia, WA 98504-7250, phone (360) 664-1174, fax (360) 586-1150.

Interested persons may submit comments, as specified below, or may ask to be included in the commission's list of interested persons for the proceeding.

NOTICE OF WORKSHOP: A workshop will be held on June 28, 2001, beginning at 9:00 a.m., Attorney General's Office, 24th Floor Training Room, Bank of California, 900 4th Avenue, Seattle, WA. Questions may be addressed to Tom Wilson at (360) 664-1293 or via e-mail at tomw@wutc.wa.gov. The commission will provide written notice of any additional preproposal workshops to all commenters and to any other persons who specifically ask to receive future notices in this rule-making proceeding.

WRITTEN COMMENTS: Written comments in response to the CR-101 from persons interested in the subject matter of this proposed rule making may be filed with the commission secretary, referencing Docket No. UT-010558, not later than July 13, 2001. All commenters are asked, but not required, to file their comments electronically. The commission prefers to receive comments either via e-mail attachment (addressed to records@wutc.wa.gov) or on a 3 1/2 inch IBM formatted high-density disk, in .pdf format and either MSWord 97 or later, or WordPerfect version 5.1 or later, labeled with the docket number of this proceeding and the commenter's name and type of software used. If you are unable to file your comments electronically, please file the original and eleven copies of your comments with the commission secretary at the address indicated above. The commission may offer additional opportunities to provide written comments. Interested persons may file additional written comments in response to any such invitation. Interested persons may also attend and participate in the workshop described above and in any other workshop that may be scheduled.

NOTICE

TO CONTINUE RECEIVING NOTICES AND INFORMATION ABOUT THIS RULEMAKING — The commission wants to ensure its mailings are sent to persons who are interested in the topic and want to receive that information. **Any person who submits comments will automatically continue to receive notices and information. If you do not submit comments but wish to be on the mailing list for this rule-making, please advise the records center by one of the following methods:** (1) Send a note with your name, address (or a copy of your mailing label), and telephone and fax numbers referencing Docket No. UT-010558, and the words "Please include me on the mailing list"; or (2) e-mail your name, address, telephone and fax numbers, referencing Docket No. UT-010558, and the words "Please include me on the mailing list" to records@wutc.wa.gov. Please note that all information in the mailings will be accessible through the commission's Internet web site at <http://www.wutc.wa.gov/>. **IF YOU DO NOT SUBMIT COMMENTS OR ADVISE THE RECORDS CENTER OF YOUR INTEREST, YOU MAY NOT**

RECEIVE FURTHER MAILINGS OR INFORMATION ON THE RULE MAKING.

EXPEDITED REPEAL

WSR 01-12-036
WITHDRAWAL OF PROPOSED RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES

[Filed May 29, 2001, 3:33 p.m.]

In WSR 01-06-057, Aging and Adult Services, Office of Rates Management (ORM), proposed a change to WAC 388-96-310(1). At this time, ORM would like to withdraw this proposed amendment for further analysis.

Brian Lindgren, Manager
 Rules and Policies Assistance Unit

WSR 01-12-048
PROPOSED RULES
SUPERINTENDENT OF
PUBLIC INSTRUCTION

[Filed May 31, 2001, 4:32 p.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-16-001.

Title of Rule: Chapter 392-138 WAC, Finance—Associated student body moneys.

Purpose: Amend rules to reflect changes in law made by the legislature during the 2000 session. Subject to appropriate district policies, student groups, in their private capacities, may conduct fundraising activities for the purpose of generating nonassociated student body (i.e. not public funds).

Other Identifying Information: Student groups—Charitable fundraising.

Statutory Authority for Adoption: RCW 28A.325.020.

Statute Being Implemented: Chapter 157, Laws of 2000.

Summary: Legislative changes now permit students to conduct fundraising activities generating private (not public) funds and broadening the purposes for which they may be used. Current rules are inconsistent with those changes.

Reasons Supporting Proposal: The new legislation was, in part, the result of a grassroots effort by students and districts and supported by OSPI. No financial impact to the school districts should result.

Name of Agency Personnel Responsible for Drafting: Linda Harrison, Office of Superintendent of Public Instruction, (360) 753-2298; Implementation: Allen Jones, Office of Superintendent of Public Instruction, (360) 753-6708; and Enforcement: Mike Bigelow, Office of Superintendent of Public Instruction, (360) 753-1718.

Name of Proponent: Office of Superintendent of Public Instruction, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: In part as the result of grassroots efforts, the 2000 legislature revised the associated student body statute to permit fund raising by student groups for private purposes. District policy is needed to define the types of activities permitted and insure appropriate accountability, including holding the private funds in trust. Such moneys are nonassociated

student body private (not public) funds. Notice of this and the intended use must be given prior to collection of such funds.

There is no anticipated financial impact on the school districts.

Proposal Changes the Following Existing Rules: See above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Not applicable.

RCW 34.05.328 does not apply to this rule adoption.

Hearing Location: Wanamaker Conference Room, Old Capitol Building, P.O. Box 47200, Olympia, WA 98504-7200, on July 17, 2001, at 9:00 a.m.

Assistance for Persons with Disabilities: Contact Sheila Emery by July 16, 2001, TDD (360) 664-3631.

Submit Written Comments to: Legal Services, Office of Superintendent of Public Instruction, P.O. Box 47200, 600 South Washington Street, Olympia, WA 98504-7200, fax (360) 753-4201, by July 16, 2001.

Date of Intended Adoption: July 18, 2001.

May 29, 2001

Dr. Terry Bergeson
 Superintendent of
 Public Instruction

AMENDATORY SECTION (Amending Order 18, filed 7/19/90, effective 8/19/90)

WAC 392-138-003 Authority. The authority for this chapter is RCW 28A.325.020 which authorizes the superintendent of public instruction to (~~promulgate~~) adopt rules and regulations regarding the administration and control of associated student body moneys.

AMENDATORY SECTION (Amending Order 18, filed 7/19/90, effective 8/19/90)

WAC 392-138-005 Purposes. The purposes of this chapter are to:

- (1) Implement RCW 28A.325.020(~~;~~);
- (2) Designate the powers and responsibilities of the board of directors of each school district regarding the efficient administration, management, and control of moneys, records, and reports of associated student body funds(~~;~~ ~~and~~);
- (3) Encourage the supervised self-government of associated student bodies; and
- (4) Permit fund-raising activities by students in their private capacities for the purpose of generating nonassociated student body private moneys.

AMENDATORY SECTION (Amending Order 84-15, filed 6/13/84)

WAC 392-138-010 Definitions. (1) "Associated student body organization" means a formal organization of students, including subcomponents or affiliated student groups such as student clubs, which is formed with the approval, and operated subject to the control, of the board of directors of a school district in compliance with this chapter.

PROPOSED

(2) "Associated student body program" means any activity which (a) is conducted in whole or part by or in behalf of an associated student body during or outside regular school hours and within or outside school grounds and facilities, and (b) is conducted with the approval, and at the direction or under the supervision, of the school district.

(3) "Central district office" means the board of directors and/or their official designee to whom authority has been delegated to act in their behalf.

(4) "Associated student body public moneys" means fees collected from students and nonstudents as a condition to their attendance at any optional noncredit extracurricular event of the school district which is of a cultural, social, recreational or athletic nature, revenues derived from "associated student body programs" as defined in subsection (2) of this section, and any other moneys received by an associated student body, not specified in subsection (5) of this section and WAC 392-138-100, for the support of an associated student body program.

(5) ~~"((Associated)) Nonassociated student body private moneys" means ((bona fide voluntary donations that are identified as donations at the time of collection)) moneys generated by fund-raising activities or solicitation of donations by student groups in their private capacities for private purposes and/or private gifts and contributions.~~

(6) "Associated student body governing body" means the student council, student activities board, or other officially recognized group of students appointed or elected to represent the entire associated student body within a school in accordance with procedures established by the board of directors of the school district.

(7) ~~"((Bona fide voluntary donations" means collections of money freely given without commensurate goods or services being received directly or indirectly by the donor. Bona fide voluntary donations must be intentional, real, actual, genuine, and not feigned.)) "Trust fund" means a fund used to account for assets held by the district in a trustee capacity for the specific purpose designated by the fund-raising group and described in the notice provided to donors prior to the fund-raising event. Such moneys must be accounted for separately from associated student body public moneys.~~

(8) "Held in trust" means held as private moneys either within a separate account within the associated student body fund or in a trust fund to be disbursed exclusively for an intended purpose.

NEW SECTION

WAC 392-138-011 Formation of associated student bodies required. The formation of an associated student body shall be mandatory and a prerequisite whenever one or more students of a school district engage in money-raising activities with the approval and at the direction or under the supervision of the district: Provided, That the board of directors of a school district may act, or delegate the authority to an employee(s) of the district to act, as the associated student body governing body for any school facility within the district containing no grade higher than the sixth grade.

NEW SECTION

WAC 392-138-013 Powers—Authority and policy of board of directors. (1) The board of directors of each school district shall:

(a) Retain and exercise the general powers, authority, and duties expressed and implied in law with respect to the administration of a school district and regulation of actions and activities of the associated student bodies of the district including, but not limited to RCW 28A.320.010 (Corporate powers), RCW 28A.150.070 (General public school system administration), RCW 28A.320.030 (Gifts, conveyances, etc., for scholarship and student aid purposes, receipts and administration), RCW 28A.600.010 (Government of schools, pupils, and employees), RCW 28A.320.040 (Bylaws of board and school government), RCW 28A.400.030 (2) and (3) (Superintendent's duties), RCW 28A.600.040 (Pupils to comply with rules and regulations), RCW 43.09.200 (Local government accounting—Uniform system of accounting), RCW 36.22.090 (Warrants of political subdivisions), and chapter 28A.505 RCW (School district budgets);

(b) Approve the constitution and bylaws of each district associated student body and establish policies and guidelines relative to:

(i) The identification of those activities which shall constitute the associated student body program;

(ii) The establishment of an official governing body representing the associated student body;

(iii) The methods and means by which students shall be permitted to raise and otherwise acquire associated student body moneys; and

(iv) The designation of the primary advisor to each associated student body and the authority of the primary advisor to designate advisors to the various student subgroup organizations affiliated with an associated student body;

(c) Assign accounting functions, or portions thereof, to the school building level to be performed by a designated representative of an associated student body or centralize the accounting functions at the district central administrative office level;

(d) Provide for the participation of the associated student body or bodies of the school district in the determination of the purposes for which associated student body public moneys and nonassociated student body private moneys if held as private moneys within the associated student body fund shall be budgeted and disbursed; and

(2) If the district permits students to conduct fund-raising activities and solicitation of donations in their private capacities, they shall establish policies to permit such activities and the allowable uses of such moneys. The board policy and/or procedures must include the approval process for such activities as well as provisions to ensure appropriate accountability for these funds, which are required to be held in trust.

NEW SECTION

WAC 392-138-014 Accounting procedures and records. Associated student body public and nonassociated student body private moneys shall be accounted for as follows:

(1) Accounting methods and procedures shall comply with such rules and regulations and/or guidelines as are developed by the state auditor and the superintendent of public instruction and published in the *Accounting Manual for Public Schools in the State of Washington* and/or other publications;

(2) Whenever two or more associated student bodies exist within a school district, the accounting records shall be maintained in such a manner as to provide a separate accounting for the transactions of each associated student body in the associated student body program fund;

(3) The fiscal and accounting records of associated student body program moneys shall constitute public records of the school district, shall be available for examination by the state auditor, and shall be preserved in accordance with statutory provisions governing the retention of public records; and

(4) Nonassociated student body private moneys shall be held in trust by the school within the associated student body fund or within a trust fund and be disbursed exclusively for such purposes as the student group conducting the fund-raising activity shall determine, subject to applicable school board policies. The district shall either withhold or otherwise be compensated an amount from such moneys to pay its direct costs in providing the service. Such funds are private moneys, not public moneys under section 7, Article VIII of the state Constitution.

NEW SECTION

WAC 392-138-017 Segregation of public and private moneys. When a school district has associated student body organizations that receive both public and private moneys as defined in WAC 392-138-010 (4) and (5), two separate sets of accounts shall be maintained. In addition, separate accounting records should be maintained by organization or purpose including clubs, classes, athletic activities, private purpose fund-raising events and general associated student body.

NEW SECTION

WAC 392-138-018 Petty cash funds. The board of directors of a school district may authorize the establishment and maintenance of associated student body petty cash funds for use in instances when it is impractical to make disbursement by warrant or check, subject to the following conditions:

- (1) A petty cash fund shall be initiated by warrant or check;
- (2) Paid-out receipts shall constitute invoices for the purpose of vouchering; and
- (3) An upper limit of the amount of the petty cash fund shall be established by the board of directors.

NEW SECTION

WAC 392-138-019 Compliance with bid law required. The statutory provisions of RCW 28A.335.190, the so-called "bid law" governing school district purchasing

procedures, shall govern purchases payable from the associated student body funds.

NEW SECTION

WAC 392-138-021 Title to property—Dissolution of associated student body or affiliated group. Title to all such property acquired through the expenditure of associated student body public moneys shall be vested in the school district.

In the event a member organization affiliated with an associated student body elects to disband or ceases to exist for any reason, then:

(1) The school district and parent associated student body shall cease carrying any money or account on behalf of or to the credit of the organization; and

(2) The records of the organization shall be retained and disposed of in accordance with applicable state law regarding the retention and destruction of public records.

NEW SECTION

WAC 392-138-105 Fees optional noncredit extracurricular events. The board of directors of any common school district may establish and collect a fee from students and non-students as a condition to their attendance at any optional noncredit extracurricular event of the district which is of a cultural, social, recreational, or athletic nature: Provided, That in so establishing such fee or fees, the district shall adopt policies for waiving and reducing such fees in the cases of those students whose families, by reason of their low income, would have difficulty in paying the entire amount of such fees and may likewise waive or reduce such fees for nonstudents of the age of sixty-five or over who, by reason of their low income, would have difficulty in paying the entire amount of such fees. An optional comprehensive fee may be established and collected for any combination or all of such events or, in the alternative, a fee may be established and collected as a condition to attendance at any single event. The board of directors shall adopt policies which state that:

- (1) Attendance and the fee are optional; and
- (2) The district will waive and reduce fees for students whose families, by reason of their low income, would have difficulty in paying the entire amount of such fees.

Fees collected pursuant to this section shall be designated as associated student body public moneys and shall be deposited in the associated student body program fund of the school district. Such funds may be expended to defray the costs of optional noncredit extracurricular events of such a cultural, social, recreational, or athletic nature, or to otherwise support the public activities and programs of associated student bodies.

NEW SECTION

WAC 392-138-110 Associated student body public moneys—Associated student body program budget. Each associated student body of a school district, with the guidance of the primary advisor, and at such time as is designated by the central district office, annually shall prepare and submit a

financial plan (budget) for support of the associated student body program to the district superintendent or his/her designee for consolidation into a district associated student body program fund budget and then present such budget to the board of directors of the district for its review, revision, and approval: Provided, That revisions of the budget submitted by an associated student body and revisions of the budget approved by the board of directors shall first be reviewed by the associated student body and, in the case of an approved budget, shall be subject to the requirements of chapter 28A.505 RCW regarding emergency expenditures or budget extensions. The budget as approved shall constitute an appropriation and authorization for the disbursement of funds for the purposes established in the budget.

NEW SECTION

WAC 392-138-115 Associated student body public moneys—Deposit and investment. All associated student body public moneys, upon receipt, shall be transmitted intact to the district depository bank and then to the county treasurer or directly to the county treasurer for deposit to the credit of the "associated student body program fund" of the school district and shall be accounted for, expended, and invested subject to the practices and procedures governing other moneys of the district except as such practices and procedures are modified by or pursuant to this chapter.

NEW SECTION

WAC 392-138-120 Associated student body public moneys—Imprest bank checking account. The board of directors of a school district may authorize the establishment and maintenance of an associated student body imprest bank checking account for convenience and efficiency in expediting disbursements, subject to the following conditions:

- (1) The maximum amount of such an account shall be no more than is necessary to provide for disbursements at the level of the month of highest estimated demand for disbursements;
- (2) An imprest bank checking account shall be initiated by deposit of, and replenished by, a warrant drawn on the associated student body program fund;
- (3) Disbursements from an imprest bank checking account shall be by check and shall be restricted to payments of invoices bearing evidence of student approval in accordance with associated student body bylaws;
- (4) An imprest bank checking account shall be replenished at least once each month by a warrant drawn on the associated student body program fund in payment of an approved voucher in an amount equal to the sum total of the disbursements made by check from the imprest bank checking account during the preceding interval; and
- (5) The replenishment voucher shall reflect such information as the central district office shall prescribe relative to identification of invoices, invoice approvals, codification of expenditures, cancelled checks, and other information deemed pertinent.

NEW SECTION

WAC 392-138-125 Associated student body public moneys—Disbursement approval—Total disbursements. Associated student body public moneys shall be disbursed subject to the following conditions:

- (1) No disbursements shall be made except as provided for in the budget approved pursuant to WAC 392-138-040;
- (2) Disbursements shall occur only upon presentation of properly prepared vouchers in such format and design as the central district office shall prescribe;
- (3) All disbursements from the associated student body program fund or any imprest bank account established thereunder shall have the prior approval of the appropriate governing body representing the associated student body. Supporting documentation of the vouchers shall bear evidence of approval by the associated student body governing body in accordance with associated student body bylaws;
- (4) When an account within the fund balance of an associated student body organization does not contain a sufficient balance to meet a proposed disbursement, such disbursement shall be limited to the fund balance: Provided, That a transfer of fund balance between associated student body organizations may be made pursuant to the associated student body bylaws and as approved by the associated student body governing body;
- (5) Warrants shall not be issued in excess of the moneys on deposit with the county treasurer in the associated student body program fund; and
- (6) All disbursements shall be made by warrant except for disbursements from imprest bank accounts and petty cash funds provided for in this chapter.

NEW SECTION

WAC 392-138-130 Associated student body public moneys—League and other joint activities. Athletic league and other forms of joint inter and intra school district associated student body programs are not precluded by this chapter. In the case of such joint programs, a single school district or associated student body or a board representing the participating associated student bodies shall manage associated student body moneys made available to it for the support of the joint program and received as a result of the conduct of such program, in compliance with this chapter and a written cooperative agreement authorized by the board(s) of directors of the district(s).

NEW SECTION

WAC 392-138-200 Nonassociated student body private moneys. The board of directors of a school district may permit student groups to raise moneys through fund-raising or solicitation in their private capacities when the following conditions are met:

- (1) Prior to solicitation of such funds, the school board approves policies defining the scope and nature of fund-raising permitted. School board policy includes provisions to ensure appropriate accountability, including prompt deposit,

holding the moneys in trust, and disbursement only for the intended purpose of the fund-raiser;

(2) Such funds are used for scholarship, student exchange, and/or charitable purposes. Charitable purposes do not include any activity related to assisting a campaign for election of a person to an office or promotion or opposition to a ballot proposition;

(3) Prior to solicitation of such funds notice is given. Such notice identifies the intended purpose of the fund-raiser, further it states the proceeds are nonassociated student body funds to be held in trust by the school district exclusively for the intended purposes;

(4) The school district withholds or otherwise is compensated an amount adequate to reimburse the district for its direct costs in handling these private moneys; and

(5) WAC 392-138-205 applies to moneys received, deposited, invested, and accounted for under this section.

Nonassociated student body private moneys shall not be deemed public moneys under section 7, Article VIII of the state Constitution.

WAC 392-138-035 shall apply to moneys received, deposited, invested, expended, and accounted for under this section.

NEW SECTION

WAC 392-138-205 Nonassociated student body private moneys—Deposit and investment. All nonassociated student body private moneys, upon receipt, shall be transmitted intact to the district depository bank and then to the county treasurer or directly to the county treasurer for deposit to the credit of the school district's trust fund or the associated student body fund, if held in trust within that fund within accounts as defined in WAC 392-138-010 and shall be accounted for, expended, and invested subject to applicable school board policy and/or procedures pursuant to WAC 392-138-200.

NEW SECTION

WAC 392-138-210 Nonassociated student body private moneys—Disbursement approval—Total disbursements. Nonassociated student body private moneys shall be disbursed subject to the following conditions:

(1) If such funds are held in trust within the associated student body fund, they shall be budgeted pursuant to WAC 392-138-013 (1)(d). No disbursements shall be made except as provided for in the budget approved pursuant to WAC 392-138-110. All disbursements shall have the prior written approval of the associated student body or such other authority designated in school district policy or procedures;

(2) If such funds are held in a trust fund, they are not budgeted. Disbursements shall occur only upon presentation of properly prepared vouchers in such format and design as the central district office shall prescribe, and as provided for in subsection (3) of this section;

(3) Vouchers authorizing disbursements shall be accompanied by written evidence of approval of disbursement by

the associated student body or other authority designated in the school district's policies and procedures;

(4) Disbursements shall be made only for the intended purposes pursuant to WAC 392-138-200.

REPEALER

The following sections of the Washington Administrative Code are repealed:

WAC 392-138-012	Fees optional noncredit extracurricular events.
WAC 392-138-016	Scholarships, student exchange and charitable purposes—ASB private moneys.
WAC 392-138-025	Formation of associated student bodies required.
WAC 392-138-030	Powers—Authority and policy of board of directors.
WAC 392-138-035	Deposit and investment of associated student body moneys.
WAC 392-138-040	Associated student body program budget.
WAC 392-138-045	Accounting procedures and records.
WAC 392-138-047	Segregation of accounts—Public and private moneys.
WAC 392-138-050	Disbursement approval—Total disbursements.
WAC 392-138-055	Imprest bank checking account.
WAC 392-138-060	Petty cash funds.
WAC 392-138-065	Compliance with bid law required.
WAC 392-138-070	District assumption of existing indebtedness permitted.
WAC 392-138-071	Public moneys—Previous law.
WAC 392-138-075	Title to property—Dissolution of associated student body or affiliated group.
WAC 392-138-080	Disposition of preexisting associated student body cash and investment.
WAC 392-138-085	League and other joint activities.
WAC 392-138-100	Student aid donations and other nonassociated student body moneys.

PROPOSED

WSR 01-12-051
PROPOSED RULES
COUNTY ROAD
ADMINISTRATION BOARD

[Filed June 1, 2001, 10:02 a.m.]

Original Notice.

Title of Rule: Title 136 WAC.

Purpose: Amends WAC 136-210-020 Applicable design standards, 136-150-020 Implementing the eligibility requirement, 136-150-022 Ascertaining the expenditures for traffic law enforcement, 136-150-023 Identifying eligible counties, 136-150-030 Certification required, and 136-150-040 Post audit penalty.

Statutory Authority for Adoption: Chapter 36.79 RCW.

Name of Agency Personnel Responsible for Drafting and Implementation: Karen Pendleton, Olympia, (360) 753-5989; and Enforcement: Jay P. Weber, Olympia, (360) 753-5989.

Name of Proponent: County Road Administration Board, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Amendments are grammatical and clean up.

Proposal Changes the Following Existing Rules: Amends WAC 136-210-020, 136-150-020, 136-150-022, 136-150-023, 136-150-024, 136-150-030, and 136-150-040, the rural arterial program.

No small business economic impact statement has been prepared under chapter 19.85 RCW.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption.

Hearing Location: 2404 Chandler Court S.W., Suite 240, Olympia, WA 98504-0913, on July 19, 2001, at 2:00 p.m.

Assistance for Persons with Disabilities: Contact Karen Pendleton by July 13, 2001, TDD (800) 833-6384, or (360) 753-5989.

Submit Written Comments to: Karen Pendleton, 2404 Chandler Court S.W., Suite 240, Olympia, WA 98504-0913, fax (360) 586-0386, by July 13, 2001.

Date of Intended Adoption: July 19, 2001.

May 31, 2001

Jay P. Weber

Executive Director

AMENDATORY SECTION (Amending WSR 96-17-013, filed 8/12/96, effective 9/12/96)

WAC 136-210-020 Applicable design standards. Geometric design of all RAP projects including all bridges shall, unless otherwise approved by the CRABoard, be in accordance with the city and county design standards for the construction of urban and rural arterials and collectors as ~~((adopted November 30, 1994,))~~ they may be revised from time to time in accordance with RCW 35.78.030 and 43.32.020.

AMENDATORY SECTION (Amending WSR 99-01-021, filed 12/7/98, effective 1/7/99)

WAC 136-150-020 Implementing the eligibility requirement. The county road administration board will ascertain the amount of the total road levy fixed in each county and the amount diverted, if any, for any services to be provided in the unincorporated area of the county in accordance with RCW 36.33.220. ~~((The amount actually spent each year for traffic law enforcement will be compared with the amount diverted to determine whether or not the county is eligible to receive RATA funds.))~~

AMENDATORY SECTION (Amending WSR 00-18-021, filed 8/28/00, effective 9/28/00)

WAC 136-150-022 Ascertaining the expenditures for traffic law enforcement. In those counties in which ~~((road fund dollars or))~~ diverted road levy or transfer of road funds has been budgeted for traffic law enforcement, the county sheriff shall submit a certification showing the actual expenditure for traffic law enforcement in the previous budget year, provided that counties with a population of less than eight thousand shall be exempt from this requirement. Such certification shall be submitted to the county road administration board no later than March 15 of each year.

AMENDATORY SECTION (Amending WSR 99-01-021, filed 12/7/98, effective 1/7/99)

WAC 136-150-023 Identifying eligible counties. Counties eligible to receive RATA funds shall be:

- (1) Those in which there has been no diversion of the county road levy;
- (2) Those in which the actual expenditures for traffic law enforcement have been equal to ~~((;))~~ or greater than ~~((;))~~ either the amount of diverted road levy budgeted for traffic law enforcement or the amount of road funds transferred to current expense to fund traffic law enforcement;
- (3) Those in which road funds being transferred to other funds are being used for legitimate road purposes;
- (4) Those with a population of less than eight thousand; and
- ~~((4))~~ (5) Those expending revenues collected for road purposes only on other governmental services after authorization from the voters of that county under RCW 84.55.050.

AMENDATORY SECTION (Amending WSR 99-01-021, filed 12/7/98, effective 1/7/99)

WAC 136-150-024 Constraint of contract execution. The county road administration board shall not execute a contract with any county for any RAP project unless the appropriate certifications have been submitted and unless the county has been identified as being eligible to receive RATA funds.

PROPOSED

AMENDATORY SECTION (Amending WSR 99-01-021, filed 12/7/98, effective 1/7/99)

WAC 136-150-030 Certification required. The contract between the county road administration board and a county relative to a RAP project shall contain a certification, signed by the county executive or chair of the board of county commissioners, as appropriate, that the county is in compliance with the provisions of this chapter.

AMENDATORY SECTION (Amending WSR 99-01-021, filed 12/7/98, effective 1/7/99)

WAC 136-150-040 Post audit penalty. Every RAP project shall be subject to final examination and audit by the state auditor. In the event such an examination reveals an improper certification on the part of a county relative to compliance with provisions of this chapter, the matter shall be placed on the agenda of the next meeting of the county road administration board (~~((meeting))~~) and may be cause for the ~~((county road administration))~~ board to withdraw or deny the certificate of good practice of that county(~~((and/or to))~~). The board may also require that all(~~((;))~~) or part of(~~((;))~~) the RATA funds received by the county be returned to the county road administration board.

WSR 01-12-055
PROPOSED RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
 (Economic Services Administration)
 [Filed June 1, 2001, 3:41 p.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-17-002.

Title of Rule: Chapter 388-458 WAC, Notices and letters.

Purpose: This WAC chapter advises clients about the letters they may receive from the department. It explains when the department sends letters; what information is included on the letters; the timeframes for sending the letters; and the clients' rights regarding notification from the department.

Statutory Authority for Adoption: RCW 74.08.090 and 74.04.510.

Statute Being Implemented: RCW 74.08.090 and 74.04.510.

Summary: This chapter is being amended to clarify the department's policy regarding client notification requirements.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Veronica Barnes, Division of Employment and Assistance Programs, Lacey, Washington, (360) 413-3071.

Name of Proponent: Department of Social and Health Services, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: See Summary above.

Proposal Changes the Following Existing Rules:

WAC #/Title	What Has Changed:
388-458-0001 How the department requests information or action needed when a client applies for assistance or reports a change.	Repealed.
388-458-0002 The Department of Social and Health Services (DSHS) sends you letters to tell you about your case.	<ul style="list-style-type: none"> Identifies the types of letters clients may get. Requires the department to send letters in the client's primary language.
388-458-0005 Adequate notice of denial or withdrawal.	Repealed.
388-458-0006 [DSHS sends you a letter when you withdraw your application.]	New WAC: Describes when the department sends withdrawal letters and what is included on the letter.
388-458-0010 Adequate notice of adverse action to recipients.	Repealed.
388-458-0011 DSHS sends you a denial letter when you can't get benefits.	New WAC: Describes when the department sends denial letters and what is included on the letter.
388-458-0015 Translation of written communications with limited English proficient clients.	Repealed.
388-458-0016 DSHS sends you an approval letter when you can get benefits.	New WAC: Describes when the department sends approval letters and what is included on the letter.
388-458-0020 You get a request letter when we need more information.	New WAC: Describes when the department sends request letters and what is included on the letter.
388-458-0025 We send you a change letter if the amount of benefits you are getting is changing.	New WAC: Describes when the department sends change letters and what is included on the letter.
388-458-0030 We send you a termination letter when your benefits stop.	New WAC: Describes when the department sends termination letters and what is included on the letter.

PROPOSED

388-458-0035 Why do you give me ten days notice before you reduce or stop my benefits?	New WAC: Explains why we give advance notice to clients before reducing or stopping benefits.
388-458-0040 What happens if I ask for a fair hearing before the change happens?	New WAC: Explains what happens when a client requests a fair hearing before the department's action becomes effective.
388-458-0045 Will I get other kinds of letters?	New WAC: Gives examples of other letters the department may send to clients.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This proposed rule does not have an economic impact on small businesses. It only affects DSHS clients.

RCW 34.05.328 does not apply to this rule adoption. This rule does not fit the definition of a significant legislative rule.

Hearing Location: Blake Office Park (behind Goodyear Courtesy Tire), 4500 10th Avenue S.E., Rose Room, Lacey, WA 98503, on July 10, 2001, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact DSHS Rules Coordinator by July 2, 2001, phone (360) 664-6094, TTY (360) 664-6178, e-mail coopeKD@dshs.wa.gov.

Submit Written Comments to: Identify WAC Numbers, DSHS Rules Coordinator, Rules and Policies Assistance Unit, P.O. Box 45850, Olympia, WA 98504-5850, fax (360) 664-6185, by July 10, 2001.

Date of Intended Adoption: No sooner than July 11, 2001.

May 30, 2001

Brian H. Lindgren, Manager
Rules and Policies Assistance Unit

NEW SECTION

WAC 388-458-0002 The department of social and health services (DSHS) sends you letters to tell you about your case. (1) When you apply for or get benefits, we send you letters to tell you about your case.

(2) If you speak another language and cannot read English, we will send letters to you in your primary language.

(3) There are seven basic types of letters that we send to you:

- (a) Withdrawals;
- (b) Denials;
- (c) Approvals;
- (d) Requests;
- (e) Changes;
- (f) Terminations; and
- (g) Other.

NEW SECTION

WAC 388-458-0006 DSHS sends you a letter when you withdraw your application. (1) We send you a with-

drawal letter when you tell us that you no longer want to apply for benefits.

(2) On this letter, we tell you:

- (a) The date we stopped processing your application; and
- (b) Your right to have your case reviewed or ask for a fair hearing.

(3) We send this letter to you according to the rules in chapter 388-406 WAC.

NEW SECTION

WAC 388-458-0011 DSHS sends you a denial letter when you can't get benefits. (1) When we finish processing your application, we send you a denial letter if you cannot get benefits.

(2) On this letter, we tell you:

- (a) Why you cannot get benefits;
- (b) The rules that support our decision;
- (c) The date we stopped processing your application; and
- (d) Your right to have your case reviewed or ask for a fair hearing.

(3) If we are denying your application because you did not give us some information that we needed and we can't figure out if you are eligible without it, we also tell you on the letter:

- (a) What information you didn't give to us;
- (b) The date we asked for the information and the date it was due;
- (c) That we cannot figure out if you can get benefits without this information; and
- (d) That we will review your eligibility if:
 - (i) For cash and medical, you give us the information within thirty days of the date of the notice;
 - (ii) For food assistance, you give us the information within sixty days of the date you applied; and
 - (iii) Your circumstances have not changed.

(4) We send denial letters to you according to the rules in chapter 388-406 WAC.

NEW SECTION

WAC 388-458-0016 DSHS sends you an approval letter when you can get benefits. (1) When we finish processing your application, we send you an approval letter if you can get benefits.

(2) On this letter, we tell you:

- (a) What kind of benefits you get;
- (b) If you applied for cash or food assistance, the amount of benefits you get;
- (c) If you applied for medical, what type of medical;
- (d) How long you will get the benefits; and
- (e) Your right to have your case reviewed or ask for a fair hearing.

(3) We send approval letters to you according to the rules in chapter 388-406 WAC.

NEW SECTION

WAC 388-458-0020 You get a request letter when we need more information. (1) We send a request letter to you

PROPOSED

when we need some information from you or you have to do something in order to get benefits.

(2) On the letter, we tell you:

- (a) What is needed;
- (b) The date it is due; and
- (c) What will happen to your benefits if you don't do what we ask.

(3) You get at least ten days to give us the information or do the activity. You can ask for more time if you need it.

(4) If the tenth day is on a weekend or holiday, you have until the next business day to do what we need.

(5) If we don't get what we need by the due date, we may deny, reduce, or stop your benefits. We will send you another letter if this happens.

NEW SECTION

WAC 388-458-0025 We send you a change letter if the amount of benefits you are getting is changing. (1) We send you a change letter if the amount of benefits you are getting is changing.

(2) On the letter, we tell you:

- (a) What your benefits are changing to;
- (b) When the change is going to happen;
- (c) The reason for the change;
- (d) The rules that support our decision; and
- (e) Your right to have your case reviewed or ask for a fair hearing.

(3) We send the letter to you before the change happens. If your benefits are going down, we give you at least ten days notice unless:

- (a) You ask us to reduce your benefits;
- (b) We have to change benefits for a lot of people at once because of a law change;
- (c) For cash and food assistance:
 - (i) We told you on your approval letter that your benefits might change every month; or
 - (ii) We already told you that the supplement would end.
- (d) For cash assistance, we told you that the AREN payment described in WAC 388-436-0002 was for one month only.

(4) The ten-day count starts on the day we mail or give you the letter and ends on the tenth day.

(5) If we don't have to give you ten days notice, we send the letter to you:

- (a) For cash and medical, by the date of the action.
- (b) For food assistance, by the date you normally get your benefits.

NEW SECTION

WAC 388-458-0030 We send you a termination letter when your benefits stop. (1) We send you a termination letter when your benefits stop.

(2) On the letter, we tell you:

- (a) When your benefits are going to end;
- (b) The reason they are ending;
- (c) The rules that support our decision; and
- (d) Your right to have your case reviewed or ask for a fair hearing.

(3) We tell you at least ten days before your benefits end unless;

- (a) You asked us to stop your benefits;
- (b) We have proof that everyone in your assistance unit has moved to another state or will move to another state before the next benefits are issued;
- (c) We have proof that everyone in your assistance unit has died;
- (d) We have to change benefits for a lot of people at once because of a law change; or
- (e) For food assistance, your certification period is ending.

(4) The ten-day count starts on the day we mail or give you the letter and ends on the tenth day.

(5) If we don't have to give you ten days notice, we send the letter to you:

- (a) For cash and medical, by the date of the action.
- (b) For food assistance, by the date you normally get your benefits.

NEW SECTION

WAC 388-458-0035 Why do you give me ten days notice before you reduce or stop my benefits? (1) We give you ten days notice before reducing or stopping your benefits so that you have some time to either:

- (a) Get the needed information to us; or
 - (b) Prepare yourself and your family for the change.
- (2) You can also use this time to request a fair hearing.

NEW SECTION

WAC 388-458-0040 What happens if I ask for a fair hearing before the change happens? (1) If you ask for a fair hearing within the ten-day notice period, you may keep getting the amount of benefits you were getting before the change. This is called continued benefits.

(2) If the tenth day falls on a weekend or holiday, you have until the next business day to ask for a fair hearing and still be able to get continued benefits.

(3) If the tenth day happens before the end of the month, you have until the end of the month to ask for a fair hearing and still be able to get continued benefits.

(4) For food assistance, you cannot get continued benefits if your certification period is ending.

(5) If you get continued benefits, you keep getting them through the end of the month the fair hearing decision is mailed unless:

- (a) You:
 - (i) Tell us in writing that you do not want continued benefits;
 - (ii) Withdraw your fair hearing request in writing; or
 - (iii) Do not follow through with the fair hearing process.
- (b) An administrative law judge (ALJ) tells us in writing to stop your continued benefits before the hearing.
- (c) For food assistance, your certification period ends.
- (6) After the fair hearing, you have to pay back any continued benefits you get if the ALJ agrees with our decision.

NEW SECTION**WAC 388-458-0045 Will I get other kinds of letters?**

Yes. We also send you letters in special circumstances. These letters are specific to your situation. Here are some examples:

- (1) Appointment letters;
- (2) Overpayment letters; and
- (3) Fair Hearing letters.

REPEALER

The following sections of the Washington Administrative Code are repealed:

WAC 388-458-0001	How the department requests information or action needed when a client applies for assistance or reports a change.
WAC 388-458-0005	Adequate notice of denial or withdrawal.
WAC 388-458-0010	Adequate notice of adverse action to recipients.
WAC 388-458-0015	Translation of written communications with limited English proficient clients.

WSR 01-12-056**PROPOSED RULES****DEPARTMENT OF****SOCIAL AND HEALTH SERVICES**

[Filed June 1, 2001, 3:43 p.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-20-020.

Title of Rule: WAC 388-310-0800 WorkFirst support services.

Purpose: Tighten up the support services program to be as efficient as possible while maintaining program integrity.

Statutory Authority for Adoption: RCW 74.08.090, 74.04.050, and 78.08A.340.

Statute Being Implemented: RCW 74.08.090, 74.04.050, 78.08A.340, and WSR 99-14-043.

Summary: We are amending this rule to added new supports service limits and adding new eligibility requirements. We are also modifying the WorkFirst early exit bonus.

Reasons Supporting Proposal: Tighten up the support services program to be as efficient as possible while maintaining program integrity.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Ian Horlor, Lacey Government Center, (360) 413-3247 or Elise Rowe, ESD Woodland Square, (360) 438-4066.

Name of Proponent: Department of Social and Health Services, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: We are amending this rule to add new supports service limits and adding new eligibility requirements. we are also modifying the early exit bonus.

Proposal Changes the Following Existing Rules: Creates new limitations based on the activity of the client.

Changes the amount the client can receive for each support service.

Adds new requirements to the early exit bonus for clients to meet before it can be issued.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This rule has no effect on small businesses therefore an impact statement is not needed.

RCW 34.05.328 does not apply to this rule adoption. The rule does not meet the definition of a significant legislative rule.

Hearing Location: Blake Office Park (behind Goodyear Courtesy Tire), 4500 10th Avenue S.E., Rose Room, Lacey, WA 98503, on July 10, 2001, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Kelly Cooper, DSHS Rules Coordinator, by July 2, 2001, phone (360) 664-6094, TTY (360) 664-6178, e-mail coo-pKD@dshs.wa.gov.

Submit Written Comments to: Identify WAC Numbers, DSHS Rules Coordinator, Rules and Policies Assistance Unit, P.O. Box 45850, Olympia, WA 98504-5850, fax (360) 664-6185, by July 10, 2001.

Date of Intended Adoption: No sooner than July 11, 2001.

May 30, 2001

Brian H. Lindgren, Manager
Rules and Policies Assistance Unit

AMENDATORY SECTION (Amending WSR 00-13-106, filed 6/21/00, effective 7/1/00)

WAC 388-310-0800 WorkFirst—Support services.**(1) Who can get support services?**

~~((a) WorkFirst participants;~~

~~(b) Sanctioned WorkFirst participants during the two-week participation before the sanction is lifted;~~

~~(c) Unmarried or pregnant minors who are income eligible to receive TANF and are:~~

~~(i) Living in a department approved living arrangement (WAC 388-486-0005) and are meeting the school requirements (WAC 388-486-0010); or~~

~~(ii) Actively working with a social worker to remove the barriers that are preventing the minor from living in a department approved living arrangement and/or meeting the school requirements.~~

~~(d) Former WorkFirst recipients who are looking for work, preparing for work, or working.~~

(2) Why do I receive support services?

~~(a) Support services help you participate in work and WorkFirst activities that lead to independence. You can also get help in paying your child care expenses through the work-~~

ing connections child care assistance program. (Chapter 388-290 WAC describes the rules for this child care assistance program.)

(b) Support services help you to keep working, accept a job, participate in job search, advance in your job and/or increase your wages.

(3) What support services may I receive?

You may receive support services, including but not limited to any of the following:

- (a) Employment-related needs such as work clothing or uniforms, tools, equipment, relocation expenses, or fees;
- (b) Transportation costs such as mileage reimbursement, public transportation vouchers, and car repair;
- (c) Professional services;
- (d) Personal needs such as clothing appropriate for job search or other work activities;
- (e) Special needs such as accommodations for employment;
- (f) Identified specific needs due to location or employment if you are an American Indian;
- (g) Job skills training, vocational education and/or basic education if:
 - (i) It is an approved activity in your individual responsibility plan; and
 - (ii) You do not qualify for sufficient student financial aid to meet the cost.
- (h) Transitional work expense of one thousand dollars if:
 - (i) You are in unsubsidized employment; or
 - (ii) You are in subsidized employment that does not use TANF funds or does not end with your grant; and
 - (iii) You are in the assistance unit and receiving a TANF/SFA grant of one hundred dollars or less a month; and
 - (iv) You or anyone in your assistance unit is not in sanction status; and
 - (v) You voluntarily stop receiving your TANF/SFA grant; and
 - (vi) You are an adult and have never received a transitional work expense.

(4) What are the requirements to get support services?

The department or its agents will decide what support services you will receive, as follows:

- (a) You need the support services to do the activities in your individual responsibility plan, do job search, accept employment, do paid work, continue to work, to advance in your job and/or increase your wages; or
- (b) You are a pregnant or parenting minor who is income eligible to receive TANF and you need support services to remove barriers that prevent you from living in a department approved living arrangement and/or meet the school requirements; or
- (c) Your request is within twenty-four months after your TANF/SFA case closed; and
- (d) It is within available funds; and
- (e) It does not assist, promote, or deter religious activity.

(5) How much support services can I get?

The chart below shows the guidelines for the amount and type of support services you can get. There is a suggested limit of three thousand dollars per person per program year

(July 1st to June 30th) for support services you can receive from the department and/or employment security.

Type of Support Service	Suggested Limit
Accommodation (reasonable)	\$1,000 for each request
Car repair	\$750 per program year
Clothing - General	Participant - \$250 for each request Each child - \$100 for each request
Clothing/uniforms - Employment	Participant - \$200 per program year
Counseling	No limit
Diapers	\$50 per child per month
Educational expenses	\$300 for each request
Employer reimbursement	No limit
Haircut	\$40 for each request
License/fees/liability insurance	\$600 per each license, fee or liability insurance request per program year
Lunch	Same rate as established by OFM for state employees
Medical exams (not covered by Medicaid)	\$150 per exam
Mileage	Same rate as established by OFM for state employees
Personal hygiene	\$50 for each request (up to three-times per program year)
Professional, trade, association, union and bonds	\$300 for each fee
Public transportation	\$150 per month
Relocation	\$1,000 per program year
Rent, housing, deposits	\$500 per program year
Short term lodging and meals	Same rate as established by OFM for state employees
Testing - Diagnostic	\$200 each
Tools/equipment	\$500 for each request

(6) What if I request more support services than the suggested maximum amounts, or ask for services not specifically covered in the guidelines?

If you request support services from your case manager, you can:

- (a) Ask to see a copy of these guidelines;
- (b) Ask for additional services, if you are requesting more than the guidelines allow or asking for services or goods not mentioned in the guidelines; and/or
- (c) Request a fair hearing, if your request for support services is denied.

(7) What happens to my support services if I do not participate as required?

The department will give you ten days notice, following the rules in WAC 388-310-1600, then discontinue your support services until you participate as required)) People who can get support services include:

- (a) WorkFirst participants who receive a TANF cash grant;
- (b) Sanctioned WorkFirst participants during the two-week participation before the sanction is lifted;
- (c) Unmarried or pregnant minors who are income eligible to receive TANF and are:

PROPOSED

PROPOSED

(i) Living in a department approved living arrangement (WAC 388-486-0005) and are meeting the school requirements (WAC 388-486-0010); or

(ii) Are actively working with a social worker and need support services to remove the barriers that are preventing them from living in a department approved living arrangements and/or meeting the school requirements.

(d) Former WorkFirst recipients who are working at least twenty hours or more per week for up to one year after leaving TANF if they need support services to meet a temporary emergency. This can include up to four weeks of support services if they lose a job and are looking for another one (see also WAC 388-310-1800); or

(v) American Indians who receive a TANF cash grant and have identified specific needs due to location or employment.

(2) Why do I receive support services?

Although not an entitlement, you may receive support services for the following reasons:

(a) To help you participate in work and WorkFirst activities that lead to independence.

(b) To help you to participate in job search, accept a job, keep working, advance in your job and/or increase your wages.

(c) You can also get help in paying your child care expenses through the working connections child care assistance program. (Chapter 388-290 WAC describes the rules for this child care assistance program.)

(3) What type of support services may I receive and what limits apply?

There is a limit of three thousand dollars per person per program year (July 1st to June 30th) for WorkFirst support services you may receive. Most types of support services have dollar limits.

The chart below shows the types of support services that are available for the different activities (as indicated by an "x") and the limits that apply.

Definitions:

• Work-related activities include looking for work or participating in workplace activities, such as community jobs or a work experience position.

•• Safety-related activities include meeting significant or emergency family safety needs, such as dealing with family violence.

••• Some support services are available if you need them for other required activities in your IRP.

Type of support service	Limit	• Work	•• Safety	••• Other
Reasonable accommodation for employment	\$1,000 for each request	x		
Clothing/uniforms	\$200 per adult per program year	x		
Diapers	\$50 per child per month	x		
Employer reimbursement	Reimburse 50 percent of employer costs during on-the-job training	x		
Haircut	\$40 per each request	x		
Lunch	Same rate as established by OFM for state employees	x		
Personal hygiene	\$50 per adult per program year	x		
Professional, trade, association, union and bonds	\$300 for each fee	x		
Relocation related to employment (can include rent, housing, and deposits)	\$1,000 per program year	x		
Short-term lodging and meals in connection with job interviews/tests	Same rate as established by OFM for state employees	x		
Tools/equipment	\$500 for each request	x		
care repair needed to restore care to operable condition	\$500 per program year	x	x	
License/fees/liability insurance	\$600 per each license, fee or liability insurance request per program year	x	x	
Mileage, transportation, and/or public transportation	Same rate as established by OFM for state employees	x	x	
Counseling	No limit	x	x	x
Educational expenses	\$300 for each request if it is an approved activity in your IRP and you do not qualify for sufficient student financial aid to meet the cost	x		x
Medical exams (not covered by Medicaid)	\$150 per exam	x	x	x
Public transportation	\$150 per month	x	x	x
Testing-diagnostic	\$200 each	x	x	x

(4) What are the other requirements to receive support services?

Other restrictions on receiving support services are determined by the department or its agents. They will decide what support services you receive, as follows:

(a) It is within available funds; and

(b) It does not assist, promote, or deter religious activity; and

(c) There is no other way to meet the cost.

(5) What is a transitional work expense?

(a) A transitional work expense is a special type of support services that is only paid once in a lifetime. It is authorized in two payments of five hundred dollars to cover your work expenses and help you exit TANF sooner and stay off of assistance longer. The first payment is made in the month after your TANF grant closes if you can show you have a plan for staying employed and off of TANF. The second pay-

ment is paid if you are still employed and off of TANF three months later.

(b) To qualify for the first transitional work expense payment of five hundred dollars, you must also meet the following conditions:

- (i) You are in unsubsidized employment; or
 - (ii) You are in subsidized employment that does not use TANF funds or does not end with your TANF grant; and
 - (iii) You are in the assistance unit and getting a TANF/SFA grant of one hundred dollars or less a month; and
 - (iv) Neither you or anyone else in your assistance unit is in sanction status; and
 - (v) You voluntarily stop getting your TANF/SFA grant.
- (6) What happens to my support services if I do not participate as required?**

The department will give you ten days notice, following the rules in WAC 388-310-1600, then discontinue your support services until you participate as required.

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

WSR 01-12-058

PROPOSED RULES

DAIRY PRODUCTS COMMISSION

[Filed June 4, 2001, 9:20 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 01-03-090.

Title of Rule: WAC 142-30-010.

Purpose: Increase the current level of assessment on milk produced in Washington state by .00625 (5/8 cent).

Statutory Authority for Adoption: RCW 15.44.060(1), 15.44.130, 15.44.080.

Statute Being Implemented: RCW 15.44.080.

Summary: The rule change, if approved by the commission, will increase the current assessment rate by .00625 (5/8 cent) per hundredweight.

Reasons Supporting Proposal: The assessment rate increase is necessary to implement powers and duties vested to the Washington Dairy Products Commission in RCW 15.44.060(10), such as the participation in federal and state agency hearings, meetings, and other proceedings in relation to the regulation of the production, manufacture, distribution, sale or use of dairy products, to provide educational meetings and seminars for the dairy industry on such matters, and to expend commission funds for such activities. The current assessment level falls within the Federal Dairy and Tobacco Adjustment Act of 1983, Title I, Subtitle B-Dairy Promotion Program, Section 113. Section 113(j) prohibits funding for the above-specified activities from assessments collected under the federal program. By increasing the current assessment level beyond the level mandated by the federal program the Washington Dairy Products Commission will be able to implement those activities prohibited under the federal program.

Name of Agency Personnel Responsible for Drafting and Implementation: Steve Matzen, 4201 198th Street S.W., Suite 101, Lynnwood, WA 98036, (425) 672-0687; and Enforcement: Celeste Piette, 4201 198th Street S.W., Suite 101, Lynnwood, WA 98036, (425) 672-0687.

Name of Proponent: Washington Dairy Products Commission, governmental.

Agency Comments or Recommendations, if any, as to Statutory Language, Implementation, Enforcement, and Fiscal Matters: Adoption of the rule is subject to approval by the commission following hearings conducted in accordance with the Administrative Procedure Act, chapter 34.05 RCW. The increase in the current assessment level will not exceed the maximum authorized assessment rate as established by producers at the most recent referendum (1.0% of the Class I price for 3.5% butterfat milk conducted March 24, 1983).

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The Washington Dairy Products Commission collects assessments on milk produced to fund programs, which positively affect the demand for dairy products through marketing, promotion, and educational endeavors. The increase in the assessment level will allow for implementation of powers and duties vested to the Washington Dairy Products Commission in RCW 15.44.060(10), such as the participation in federal and state agency hearings, meetings, and other proceedings in relation to the regulation of the production, manufacture, distribution, sale or use of dairy products, to provide educational meetings and seminars for the dairy industry on such matters, and to expend commission funds for such activities. The current assessment level falls within the Federal Dairy and Tobacco Adjustment Act of 1983, Title I, Subtitle B-Dairy Promotion Program, Section 113. Section 113(j) prohibits funding for the above-specified activities from assessments collected under the federal program. By increasing the current assessment level beyond the level mandated by the federal program the Washington Dairy Products Commission will be able to implement those activities prohibited under the federal program with these additional funds. Funding of legislative, regulatory and image-enhancement activities will ensure the industry's viability and create a more positive environment for dairy farming.

Proposal Changes the Following Existing Rules: The rule will increase the current assessment rate on milk produced in Washington state by .00625 (5/8 cent).

A small business economic impact statement has been prepared under chapter 19.85 RCW.

Small Business Economic Impact Statement

Executive Summary

Overview of Analysis: This study analyzes the compliance costs associated with a proposed rule that will increase the current assessment rate on milk. The purpose of this analysis is to comply with state legislative requirements that each prospective rule be evaluated to minimize potential disproportionate impacts on small business.

PROPOSED

Analysis Results: As shown in Table 2 of the report, the compliance cost for a representative small business over the analysis period is estimated to be approximately \$.04 per \$100.00 of sales. The compliance cost for a large business over the same time period is estimated to be \$.04 per \$100.00 of sales. Therefore, the compliance cost burden, from rule revisions, is equal for both large and small business, and no disproportionate compliance burden exists for small businesses. In addition, the compliance cost burden for producers, based on farm production, is in proportion to the level of production of each producer as shown in Table 3. The large producers/businesses will pay more based on their higher production levels while the small producers/businesses will pay proportionally less. There will be no additional equipment, supplies, labor, or administrative costs imposed on dairy producers as well as indirectly affected businesses. Presently assessments are being collected and staff are in place to compute and satisfy all reporting requirements. Affected parties are currently in compliance with the existing requirements.

Mitigation: As indicated above, the proposed rule revisions are not anticipated to result in a disproportionate compliance cost burden for small Washington businesses required to pay the assessment. As a result, mitigating measures are not required to reduce impacts on small businesses affected by the rule revisions.

I. Proposed Rule Revisions: This study analyzes the compliance costs associated with a proposed assessment increase and estimates whether the revised rule would place a disproportionate economic burden on Washington small businesses. The purpose of this analysis is to comply with state legislative requirements that each prospective rule be evaluated to minimize potential disproportionate impacts on small business.

A. Regulatory Context: Regulatory Fairness Act: The purpose of this study is to ensure that the proposed revisions to WAC 142-30-010 comply with the Regulatory Fairness Act (chapter 19.85 RCW). The Regulatory Fairness Act (RFA) requires that rules promulgated by state agencies under the Administrative Procedure Act be examined for their impact on small businesses (fifty or fewer employees). The purpose of the RFA is to ensure that proposed rules do not place a disproportionate burden on small businesses relative to the burden they place on large businesses. RFA compliance analysis must be documented in a small business economic impact statement (SBEIS). This SBEIS documents the analysis and results for proposed revisions to WAC 142-30-010. Appendix A contains additional discussion of RFA requirements.

B. Summary of Rule Revisions: Chapter 15.44 RCW grants the Washington State Dairy Products Commission (WDPC) the authority to increase or decrease the current assessment on milk provided that the current level of assessment established does not exceed the maximum authorized assessment rate established by producers in the most recent referendum. The maximum assessment rate was established by producer referendum on March 24, 1983 (1% of the Class I price for 3.5% butterfat milk). The rule revision will increase the existing assessment by .00625 (5/8 of a cent) and

allow the WDPC to implement RCW 15.44.060(10), which gives the WDPC the authority to participate in federal and state agency hearings, meetings, and other proceedings in relation to the regulation of the production, manufacture, distribution, sale or use of dairy products, to provide educational meetings and seminars for the dairy industry on such matters, and to expend commission funds for such activities.

C. Potentially Affected Industries: Compliance costs will be incurred by businesses operating within the agricultural production of livestock. Primary impacts would be borne by dairy producers/farms. These businesses are involved in the production of milk.

Dairy producers are categorized in the standard industrial classification (SIC) code 0241. According to Washington State Employment Security Department data, there are approximately five hundred sixty-nine business establishments in this SIC classification within Washington.¹ Of these establishments five hundred sixty-three are classified as small businesses with fifty or fewer employees. One percent would be classified as large businesses. In addition to dairy farms that bear the primary impact of the rule revision, a few related businesses may be indirectly affected (see Appendix B for full industry list). These businesses include producer handlers, processors/manufacturers, cooperatives or dealer/handlers of dairy products (only those businesses purchasing milk directly from the dairy producer).

II. Approach to Estimating Differential Economic Impacts on Small vs. Large Businesses: The WDPC determined that an analysis of compliance costs should be conducted for the proposed rule revisions and documented in an SBEIS, consistent with chapter 19.85 RCW. An SBEIS analysis was performed for the rule revisions and is described below.

A. Likely Industry Response to Proposed Rule: The first step was to anticipate how the industry would respond to the rule revisions. The Washington Dairy Products Commission coordinated a series of informational meetings to provide dairy farmers an opportunity to provide input and voice their opinions on the proposed assessment increase. Dairy Products Commission representatives and board members provided background information on the proposal and answered producer questions. There were some opposing views presented at the informational meetings, however, many producers sought clarification on how the funds would be utilized and monitored.

B. Data from Small and Large Businesses in Affected Industries: Once affected industries were identified data was computed to estimate impacts. Data was provided through the following sources: WDPC, Washington State Employment Security Department, National Agricultural Statistics Service (NASS), and the United States Department of Agriculture AMS, Dairy Division. WDPC provided a variety of information, including related background information on the proposed rule, current requirements for assessment reporting and calculation and stakeholder information. Employment Security provided employment information by business within the designated SIC codes. NASS provided average milk production per cow for Washington and percent of production by group size. United States Department of

Agriculture AMS, Dairy Division provided milk-pricing information.

C. Differential Compliance Cost for Small Versus Large Businesses: To differentiate between impacts on small versus large businesses, compliance costs were evaluated per one hundred dollars of sales. In addition, costs were evaluated for various levels of farm production within the affected industry. These costs were based on the average cow production for Washington state as well as various herd sizes. Comparison of compliance costs for various levels of farm production as well as per hundred dollars of sales were used to determine whether a disproportionate economic burden would exist for small businesses and to estimate the magnitude of any disproportionate burden.

III. Analysis Results:

A. Overview: Over the analysis period, the proposed rule revisions are not anticipated to have a disproportionate economic impact on small businesses in the affected industry. As Table 2 shows, cost impacts of proposed rule revisions are equal for both small and large businesses. The cost burden to businesses both small and large is the amount of the proposed assessment increase .00625 (5/8 of one cent) per hundred-weight. In addition, the compliance cost burden for businesses/producers, based on farm production, is in proportion to the level of production of each business/producer. The large businesses/producers will pay more based on their higher production levels while the small businesses/producers will pay proportionally less. For those businesses purchasing milk from the dairy producer (indirectly affected establishments) there will be no additional equipment, supplies, labor, or administrative costs. Presently assessments are being collected and staff are in place to compute and satisfy all reporting requirements. These indirectly affected businesses are currently in compliance with the existing requirements. A discussion of analysis methodology and assumptions is contained in Appendix A.

The analysis period for the study was chosen to be one year. Estimates for the uniform statistical milk price are forecasted out through December 2001. All businesses bear the same cost burden for the study. Compliance with the proposed rule is not likely to cause a substantive loss of sales revenues for large or small businesses.

B. Disproportionate Economic Burden Evaluation: As shown in Table 2, the compliance cost for a representative small business over the analysis period is estimated to be approximately \$.04 per \$100 of sales. The compliance cost for a large business over the same time period is estimated to be \$.04 per \$100 of sales. Therefore, the compliance cost burden is equal for both small and large businesses, and no disproportionate compliance burden exists for small businesses. One percent of the farms would be classified as large businesses in Washington. All dairy farmers regardless of business size receive the same minimum uniform price for deliveries of milk to the federal order market. All Washington businesses/producers are part of the Pacific Northwest Order No. 124. The statistical uniform price is the Class III price, plus the producer price differential. This reflects a weighted average reflecting not only class prices, but the proportion of milk under the order in each class. These prices

are announced on the 14th of each month. The only cost to businesses/producers is the amount of the proposed assessment increase itself (\$.00625). The amended rule will impose no additional equipment, supplies, labor, or administrative costs on small or large dairy businesses/producers to comply with the rule. The assessment is collected from the first handler of the milk. In addition, the compliance cost burden for businesses/producers, based on farm production, is in proportion to the level of production of each business/producer as shown in Table 3. The large producers/businesses will pay more based on their higher production levels while the small producers/businesses will pay proportionally less.

Those businesses purchasing milk from dairy producers (indirectly affected establishments) will realize no additional equipment, supplies, labor, or administrative costs. Presently assessments are being collected and staff are in place to compute and satisfy all reporting requirements. These indirectly affected businesses are currently in compliance with the existing requirements.

IV. Mitigation: As the above analysis demonstrates, the proposed rule amendment will not result in a disproportionate impact on small Washington businesses. As a result, mitigating measures are not required to reduce impacts on small businesses affected by the proposed rule.

¹These businesses include those with employment covered by unemployment compensation programs. Consistent with intent of RFA, only Washington businesses are reported and analyzed in this study.

Appendix A: Background Information and Assumptions:

Regulatory Fairness Act: The Regulatory Fairness Act (RFA) (chapter 19.85 RCW) requires that rules promulgated by state agencies under the Administrative Procedure Act be examined for their impact on small businesses. The purpose of the Regulatory Fairness Act is to ensure that proposed rules do not place a disproportionately high burden on small businesses, relative to the burden they place on large businesses. A small business is defined by the RFA as an independent, for-profit Washington business entity with fifty or fewer employees, RCW 19.85.020(1).

The RFA requires all rules that impose "more than minor costs" on industry businesses be evaluated and, if necessary, altered to minimize their impact on small business. An analysis of compliance costs must be completed and documented in a small business economic impact statement (SBEIS) if: (1) A proposed rule meets or exceeds this "more than minor" criterion, or if (2) the Joint Administrative Rules Review Committee (JARRC) requests an SBEIS for a proposed rule. A state agency may independently decide to complete an SBEIS.

The RFA establishes specific analyses and necessary elements for inclusion in an SBEIS. Among other requirements, the SBEIS must include a brief description of the compliance requirements of the rule, a description of the professional services needed by small businesses to comply with the rule, an analysis of the compliance cost for small business, and a comparison of the compliance cost for small and large businesses. A basis of comparison must be chosen

PROPOSED

from: Cost per employee, cost per hour of labor, cost per \$100 of sales, or any combination of these three measures.

Based upon the extent any disproportionate impact is anticipated to occur for small businesses from the proposed rule, the agency must reduce the costs on small businesses (where legal and feasible in meeting the stated objective of the statutes upon which the rule is based). Mitigation can be accomplished in a number of ways, such as establishing differing compliance or reporting requirements for small businesses, clarifying or simplifying the compliance requirements for small businesses, delaying compliance timetables, exempting small businesses from any or all of the rule requirements, or similar measures.

Conservative Approach: The analysis undertaken to estimate compliance cost impacts was generally "conservative" in its approach. Specific assumptions implementing this conservative approach included (but were not limited to):

- **Timing:** Affected industries will be required to comply with the assessment increase January 1, 2002, when the rule takes effect.
- **Public and Industry Involvement:** Potentially affected businesses, including small businesses, were involved throughout the rule-making process. A number of informational meetings provided opportunities for businesses of all sizes to provide input, as described below.

Affected businesses will have the opportunity to testify at the legislative hearings to be held July 11 and 18, 2001.

Dairy producers were given the opportunity to attend informational meetings where WDPC explained the proposed assessment increase. Background information was given regarding the proposed assessment increase and producer input was gathered and questions addressed. Additional informational letters were sent to dairy producers and affected businesses. The proposed assessment increase was initiated by an industry driven task force made up of producers representing all facets of the industry including representatives from the Washington State Dairy Federation, Washington Dairy Products Commission, and the Northwest Dairy Association.

- **Data Characteristics:** As noted in the body of the SBEIS, data used to estimate compliance costs for affected businesses came from the following sources: WDPC, Washington State Employment Security Department (ESD), National Agricultural Statistics Service (NASS), and the United States Department of Agriculture AMS, Dairy Division.

Appendix B: SIC Codes for Dairy-Related Industries
List of Potentially Affected Industries

SIC	Industry/SIC Category
	<u>Direct Impacts</u>
0241	Dairy Farms
	<u>Indirect Impacts</u>
2021	Creamery butter
2022	Cheese, natural and processed
2023	Dry, condensed, evaporated products

2024	Ice cream and frozen desserts
2026	Fluid milk

BOLD = Actual Announced Federal Order Prices.

Federal Order: Classifies milk according to its use, establishes minimum class prices monthly, determines a uniform price monthly, conducts impartial audits, verifies weights and tests milk, and provides market information.

Class III Milk: Milk used in storable, hard manufactured products-cheese and evaporated milk.

Class III Price: The Class III price is based on the NASS surveys for cheese, butter and whey. The price is announced on or before the 5th day of the following month.

Producer Price and Statistical Uniform Price: The statistical uniform price is the Class III price, plus the producer price differential. This value represents the minimum price received by producers and cooperative associations for deliveries to a federal order market. This reflects a weighted average reflecting not only class prices, but the proportion of milk under the order in each class. These prices are announced on or before the 14th of each month.

*Estimated statistical uniform price based on futures market-data obtained from USDA AMS, Dairy Division Federal Orders 124 and 135. Data only forecasted out through December 2001.

abilities Education Act, 20 U.S.C. §§ 1400 et seq., and the corresponding state regulatory changes adopted by the State Educational Agency, Office of the Superintendent of Public Instruction, on January 1, 2000.

Reasons Supporting Proposal: Required by federal and state law.

Name of Agency Personnel Responsible for Drafting: Bonnie Y. Terada, Attorney General's Office, 1220 Main Street, Suite 510, Vancouver, WA 98660, (360) 759-2100; Implementation and Enforcement: Len Aron, Washington School for the Deaf, 611 Grand Boulevard, Vancouver, WA 98661-4918, (360) 414-0400.

Name of Proponent: Washington State School for the Deaf, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The new and revised rules implement the 1997 amendments to the Individuals with Disabilities Education Act ("IDEA '97") and the regulations of the United States Department of Education adopted as a result of IDEA '97. The rules also provide policies and procedures which are consistent with corresponding regulations of the Office of the Superintendent of Public Instruction, the state educational agency responsible for ensuring compliance by public agencies involved in the delivery of special education.

Proposal Changes the Following Existing Rules: As described above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. No small business impacts have been identified.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. RCW 34.05.328 does not apply to this rule adoption. The rules are not considered significant legislative rules by the Washington School for the Deaf.

Hearing Location: Washington State School for the Deaf, Administrative Conference Room, 611 Grand Boulevard, Vancouver, WA 98661, on July 10, 2001, at 9:00 a.m.

Assistance for Persons with Disabilities: Contact Judy Smith by July 3, 2001, TTY (360) 414-0401.

Submit Written Comments to: Len Aron, Superintendent, Washington School for the Deaf, 611 Grand Boulevard, Vancouver, WA 98661-4918, fax (360) 696-6291, by July 6, 2001.

Date of Intended Adoption: July 10, 2001.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-001 Purposes. The purposes of this chapter are:

(1) To implement chapter 72.40 RCW in a manner that is compatible with chapter ~~((28A-13))~~ 28A.155 RCW and in compliance with the ~~((Education for All Handicapped Children))~~ Individuals with Disabilities Education Act, 20 U.S.C. Sec. ~~((1401))~~ 1400 et seq.; and

PROPOSED

AMENDATORY SECTION (Amending Order 85-4, filed 7/5/85)

WAC 142-30-010 Declaration of purpose—Effective date. To effectuate the purposes of chapter 15.44 RCW there is hereby levied upon all milk produced in this state an assessment of:

(1) 0.75 percent of the Class I price for 3.5% butterfat milk, as established in any market area by a market order in effect in that area or by the state department of agriculture in case there is no market order for that area ~~((-or))~~; or

(2) While the Federal Dairy and Tobacco Adjustment Act of 1983, Title I, Subtitle B—Dairy Promotion Program, is in effect:

(a) An assessment rate not to exceed the rate approved at the most recent referendum that would achieve a ten cent per hundredweight credit to local, state or regional promotion organizations provided by Title I, Subtitle B of the Federal Dairy and Tobacco Adjustment Act of 1983 ~~((The effective date of WAC 14-30-010 [142-30-010] shall be August 4, 1985))~~; and

(b) An additional assessment of .00625 (five-eighths of one cent) per hundredweight.

**WSR 01-12-061
 PROPOSED RULES
 WASHINGTON STATE
 SCHOOL FOR THE DEAF**
 [Filed June 4, 2001, 9:27 a.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: Chapter 148-171 WAC, Special education programs.

Purpose: To implement federal regulatory changes enacted March 12, 1999, resulting from the 1997 amendments to the Individuals with Disabilities Education Act and conform procedures to state law.

Statutory Authority for Adoption: RCW 72.40.022.

Statute Being Implemented: 20 U.S.C. §§ 1400 et seq.

Summary: Changes are needed to comply with the federal regulatory changes adopted on March 12, 1999, as a result of the 1997 amendments to the Individuals with Dis-

~~(2) ((To assure that all handicapped children have an opportunity for a free appropriate public education which emphasizes special education and related services designed to meet their unique needs;~~

~~(3) To assure that the rights of handicapped children and their parents are protected; and~~

~~(4) To assess and assure the effectiveness of efforts to educate the handicapped students)) To meet the obligations of additional federal and state civil rights laws (e.g., 29 U.S.C. Sec. 794, 42 U.S.C. Sec. 12132, RCW 49.60.030) that apply to students who have a disability regardless of the student's eligibility for special education and related services.~~

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-010 Definitions. ((As used in this chapter:

(1) "Adult student" means a student or handicapped student not otherwise incompetent, who has reached eighteen years of age.

(2) "Handicapped student" and "student" (depending upon the context in which the term is used) means:

(a) A person under the age of twenty one, who has been determined pursuant to this chapter to have one or more of the disabilities set forth in WAC 148-171-015 and to be in need of special education and related services: Provided, That a student enrolled at the Washington state school for the deaf may continue past the age of twenty one at the superintendent's discretion; or

(b) A person under the age of twenty one who has become a focus of concern and who may have one or more of the disabilities set forth in WAC 148-171-015 in the judgment of the school superintendent or his or her designee, or the parent(s), or the adult student; or

(c) The foregoing categories of persons notwithstanding the fact the person(s) may not be enrolled in or attending school in the normal sense of the term "student."

(3) "Parent" means a natural parent, a legal guardian, an adult person acting as a parent, or a surrogate parent who has been appointed in accordance with WAC 148-171-650, who represents a nonadult student. The term does not include the state if the child is a dependent of the state.

(4) "School" means Washington state school for the deaf.

(5) "Assessment" means procedures used in accordance with WAC 148-171-110 through 148-171-130 to determine whether a student is deaf or hard of hearing and/or the nature and extent of the special education and related services that the student needs. The term means procedures used selectively with an individual student and does not include basic tests administered to or procedures used with all students in a school, grade, or class.

The purposes of assessment are to:

(a) Measure the student's present level of educational performance to identify the student's unique needs, abilities, and limitations;

(b) Draw conclusions regarding the significance of the findings as related to the student's instructional program;

~~(e) Provide appropriate personnel with information for determining appropriate placement and developing the individualized education program in accordance with WAC 148-171-240;~~

~~(d) Assure appropriate identification of the handicapping condition; and~~

~~(e) Determine the student's eligibility for funding for special education and related services.~~

~~(6) "Current assessment" means:~~

~~(a) Intellectual assessment data shall be considered current if obtained during a one calendar year period prior to the formal assessment or if obtained during the formal assessment period.~~

~~(b) Academic assessment data, including perceptual assessment data, shall be considered "current" if obtained during a ninety calendar day period prior to formal assessment or if obtained during the formal assessment period.~~

~~(c) Psychological and social assessment data shall be considered "current" if obtained during a thirty calendar day period prior to formal assessment or if obtained during the formal assessment period.~~

~~(d) Adaptive behavior assessment data, including vocational and career assessment data, shall be considered "current" if obtained during a ninety calendar day period prior to formal assessment or if obtained during the formal assessment period.~~

~~(e) Speech/language/sign language (communication skills) assessment data shall be considered "current" if obtained during a ninety calendar day period prior to formal assessment or if obtained during the formal assessment period.~~

~~(f) Vision screening and audiological assessment data shall be considered "current" if obtained during a one calendar year period prior to formal assessment or if obtained during the formal assessment period.~~

~~(g) Medical assessment data shall be considered "current" if obtained during a one hundred eighty calendar day period prior to formal assessment or if obtained during the formal assessment period.~~

~~(7) "Reassessment" means procedures used in accordance with WAC 148-171-110 through 148-171-130 to determine the student's eligibility for and need for continuing special education and related services pursuant to WAC 148-171-430(2).~~

~~(8) "Consent" means that:~~

~~(a) The parent (or adult student) has been fully informed of all information relevant to the activity for which consent is sought, in his or her native language or other mode of communication, including being informed of existing assessment data to be used within the definitions of current assessment;~~

~~(b) The parent (or adult student) understands and agrees in writing to the carrying out of the activity for which his or her consent is sought, and the consent describes that activity and lists the records (if any) which will be released and to whom; and~~

~~(c) The parent (or adult student) understands that the granting of consent is voluntary on the part of the parent (or adult student) and may be revoked at any time.~~

~~(9) "Special education" has the meaning given that term by WAC 392-171-315.~~

PROPOSED

(10) "Related services" has the meaning given that term by WAC 392-171-320.

(11) "Superintendent" means the superintendent of the Washington state school for the deaf.)) The definitions set forth in WAC 392-172-035, 392-172-040, 392-172-045, 392-172-055, 392-172-065, 392-172-070, 392-172-073, and 392-172-075 are hereby incorporated by reference into this chapter and should be referred to if necessary. The Washington school for the deaf, a "public agency" as defined in WAC 392-172-035 (6)(c), is a "state operated program."

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-015 Definition and eligibility criteria for ((deaf and hard of hearing)) deafness and hearing impairment. ((1) WAC 392-171-436 and 392-171-441 shall be applicable to all students provided for by this chapter.

(2) Assessments and evaluations conducted according to this section shall be performed by professionals qualified in the area of assessment who are specially trained and experienced in the area of deafness or deaf education.)) The definitions and eligibility criteria in WAC 392-172-138 and 392-172-140 are adopted by reference.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-110 General areas of ((assessment)) evaluation. ((The assessment of a student shall be in all areas related to the suspected disability. The assessment procedures outlined in this chapter are to be considered minimal, required procedures. Where concerns are indicated as judged by the multidisciplinary team, additional or more in-depth assessment in each of the following areas shall be conducted:

(1) Scholastic assessment. This area may include assessment of the intellectual, language and communication, academic and cognitive development of the student and any other scholastic area as deemed appropriate by the multidisciplinary team.

(2) Physical assessment. This area may include a review of the general health status of the student, vision screening and complete audiological examination, oral peripheral examination, evaluation of musculo-skeletal, neurological, and developmental modalities, and any other physical area as deemed necessary by the multidisciplinary team.

(3) Adjustment assessment. This area may include assessment of the social skills and emotional status of the student, career and vocational assessment, and assessment of adaptive behaviors (e.g., self-help, interpersonal communication, survival skills, and practical application of academic skills.)) WAC 392-172-106 is adopted by reference.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-120 ((General assessment safeguards—Personnel, materials, and)) Evaluation procedures. ((Every student who is assessed or reassessed shall be

assessed according to the procedures established in this chapter.

(1) The initial assessment of a student shall be made by a multidisciplinary team (i.e., a group of professionals) including at least one qualified teacher of the deaf and at least one person qualified to conduct individual diagnostic assessment in the area of suspected disability. In a reassessment of a student, the multidisciplinary team also shall include a representative from each service area involved in the student's individualized education program and such other professional service providers as recommended by any professional involved in the reassessment. Each member of the team shall be licensed, registered, credentialed, or certificated according to his or her professional standards in accordance with state statutes and rules, and experienced in the area of deafness.

(2) No single test instrument or single procedure shall be the sole criterion for determining a student's eligibility and/or for determining the appropriate educational program for a student.

(3) Assessment materials, procedures, and instruments used for the purpose of assessment and placement shall be selected and administered so as not to be racially or culturally or educationally discriminatory.

(4) All tests and other evaluation materials shall have been validated for the specific purpose for which they are used and shall accurately reflect whatever factors the tests purport to measure. If properly validated tests are unavailable, the professional judgment of each member of the multidisciplinary team may determine eligibility for special education based on other evidence of the existence of a specific handicap and need. This professional judgment shall be documented in a written narrative.

(5) All tests and other evaluation materials shall be administered by qualified personnel in conformance with the instructions of their producer. Tests designed to measure intellectual functioning shall be administered and interpreted by a qualified psychologist experienced in deafness. Provided, That cognitive tests for developmentally delayed students other than an intelligence quotient test shall be administered by a qualified psychologist or by professionals with other titles who have considerable training and experience in individual psychological or psychoeducational assessment and deafness.

(6) Assessment materials, procedures, or instruments shall be provided and administered in a student's native language or mode of communication, unless it is clearly not feasible to do so. Tests shall be selected and administered so as to ensure that the test results accurately reflect the student's aptitude or achievement level or whatever other factors the test purports to measure, rather than reflecting the student's impaired sensory, manual, or speaking skills (except where those skills are the factors the test purports to measure).

(7) In interpreting assessment data and in making placement recommendations, the assessment team shall:

(a) Collect and review information from a variety of sources, including but not limited to all available existing academic, medical, and other records pertinent to the area of deafness, aptitude and achievement tests, teacher recommendations or recommendations of related service providers,

physical condition, social or cultural background, and adaptive behavior;

(b) Ensure that information obtained from all of these sources is documented and carefully considered.

(8) Assessment data shall be summarized in writing, dated, and signed by each person conducting an assessment. Information used to support the assessment, but which is not incorporated into the file, (e.g., review of health record), shall be referenced as to date of record, location, and source person. The summaries shall specify the procedures and instruments used, the results obtained, and the apparent significance of findings as related to the student's instructional program, including a description of the specific factors which are interfering with the student's educational performance and the special education and related services needed to assist the student in benefiting from his or her educational placement.) The evaluation or reevaluation of any student shall be performed using the procedures established in chapter 392-172 WAC except as specifically provided otherwise in this chapter.

Evaluations may include assessments to identify students who present a moderate or high risk of sexually aggressive behavior or who may be vulnerable to victimization by such students, as required by RCW 72.40.270. Evaluations will be conducted by a group of qualified professionals selected by the Washington school for the deaf who are knowledgeable about the student, the suspected area of disability, and in cases where assessment is required by RCW 72.40.270, sexual abuse and assault.

NEW SECTION

WAC 148-171-131 Evaluation report and documentation of determination of eligibility. WAC 392-172-10905 is adopted by reference.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-140 Independent educational ((assessment)) evaluation. ((1)(a) The parent(s) of a student (or an adult student) assessed or any student reassessed has the right to obtain an independent educational assessment, subject to subsections (3) and (4) of this section:

(b) The school shall provide to parent(s), on request, information about where an independent educational assessment may be obtained.

(c) For the purposes of this section:

(i) "Independent educational assessment" means an assessment conducted by a qualified examiner who is not employed by the school responsible for the education of the student in question; and

(ii) "Public expense" means that the school either pays for the full cost of the assessment or assures that the assessment is otherwise provided at no cost to the parent.

(2) A parent (or adult student) has the right to an independent educational assessment at public expense if the parent (or adult student) disagrees with the assessment results obtained by the school, as follows:

(a) The parent(s) (or adult student) shall provide a written notice to the superintendent which:

(i) Specifies the portion(s) of the assessment results with which the parent(s) (or adult student) disagrees; and

(ii) Requests an independent educational assessment at public expense;

(b) The school shall have the prior opportunity to initiate mediation or an adjudicative proceeding pursuant to WAC 148-171-600 et seq., to show that its assessment is appropriate. Provided, That the school shall provide the parent(s) (or adult student) written notice of the election to initiate mediation or an adjudicative proceeding no later than the tenth day after the date of receipt of the parent's (or adult student's) written notice of disagreement;

(c) If the final decision is that the school assessment is appropriate, the parent (or adult student) still has the right to an independent educational assessment, but not at public expense; and

(d) If the school elects not to initiate an adjudicative proceeding or is not upheld by the final decision, the independent assessment requested by the parent (or adult student) shall be provided at public expense in accordance with the same criteria which the school uses when it initiates an assessment including, but not limited to, the location of the assessment and the qualifications of the examiner.

(3) If the parent (or adult student) obtains an independent educational assessment at private expense, the results of the assessment:

(a) Shall be considered by the school in any decision made with respect to the provision of special education and related services to the student; and

(b) May be presented as evidence at the adjudicative proceeding regarding that student.

(4) If the administrative law judge requests an independent educational assessment as part of the adjudicative proceeding, such assessment shall be at public expense.) WAC 392-172-150 is adopted by reference.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-150 Admission and placement—Annual review. ((In accordance with the least restrictive environment mandate of Public Law 94-142: A student may be admitted and enrolled at the Washington state school for the deaf when:

(1) The school district of that student's residence refers the student or agrees that the student can be served at the Washington state school for the deaf;

(2) The student's parents request that their child be served through the educational program available at the Washington state school for the deaf;

(3) Assessment pursuant to the procedures in this chapter has been completed and is documented;

(4) Upon completion of assessment pursuant to this chapter, the multidisciplinary team described in WAC 148-171-120(1), the parents and a representative of the school district of the student's residence shall meet and consider the following to determine the most appropriate placement for the student:

PROPOSED

~~(a) The summaries of assessment data pursuant to WAC 148-171-130;~~

~~(b) The nature and extent of the specific special education and related services needed by the student, if any;~~

~~(c) Any inconsistent or contradictory information and/or opinions evidenced in the assessment data, if any;~~

~~(d) The availability and identity of current educational programs appropriate to the student's needs; and~~

~~(e) The parent(s) and school district's commitment to work in cooperation to meet the student's needs; and~~

~~(5) The multidisciplinary team described in WAC 148-171-120(1) recommends placement at the Washington state school for the deaf;))~~

(1) Upon a referral for admission and placement from a parent, legal guardian, emancipated minor, adult student, or local educational agency (LEA), a Washington school for the deaf admissions team will assess the appropriateness of placement of a visually impaired student residing in the state of Washington as provided for under this chapter.

(2) Applications for placement shall be in writing and shall include the reason for referral. Reasons for referral to the school for the deaf may include, but are not limited to: Vision specific services not readily available in the local school district, need for more intensive vision specific services, adaptive aids and appliances, greater array of vision support services, social skill development, leisure time skill development, and organization skill development.

(3) The LEA will be notified if the referral is from a parent and the student's records will be requested. The following records must be received prior to review by the school's admissions team: Complete application materials, most recent IEP, most recent three-year summary assessment or evaluation, psychological records, transcripts (for high school students), all records subject to disclosure under RCW 28A.225.330, including, but not limited to: History of disciplinary actions, criminal or violent behavior, or other behavior that indicates the student could be a threat to the safety of educational staff or other students.

(4) The admissions team shall review the records and if the information is complete, determine whether to proceed with or terminate the application.

(5) Placement of a student at the school for the deaf shall be determined at a meeting conducted pursuant to WAC 148-171-210.

(6) The determination of the appropriate placement for a student shall be based upon:

(a) The student's individualized education program (IEP);

(b) The least restrictive environment requirements of WAC 392-172-172;

(c) The placement option(s) that provides a reasonably high probability of assisting the student to attain his or her annual goals;

(d) A consideration of any potential harmful effect on the student or on the quality of services which he or she needs; and

(e) The status of the student as an adjudicated sex offender classified as risk Level II or III in the state of Washington or the equivalent under the laws of the state in which the student resides.

(7) The decision on the educational placement shall be made by a group of persons, including the parents, the LEA, and other persons knowledgeable about the student, the evaluation data, and the placement options.

(8) Pursuant to RCW 72.40.040(4) and 72.40.050(2), admission and retention at the Washington school for the deaf may be denied for a student who is an adjudicated sex offender.

(9) The educational placement of each student shall be determined at least annually at a meeting conducted pursuant to WAC 148-171-210.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-210 IEP meetings. ((1) The school shall hold a meeting for the purpose of developing a student's individualized education program within thirty calendar days of the determination that the student is in need of special education and related services currently available at the school.

(2) Meetings consistent with this section shall be held by the school at least once a year for the purpose of reviewing and revising as necessary each student's IEP.)) WAC 392-172-156 is adopted by reference.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-220 Participants in IEP meetings. ((1) Each IEP meeting shall include the following participants:

(a) A representative of the school other than the student's teacher who is qualified to provide or supervise the provision of special education and related services;

(b) The student's teacher;

(c) One or both parents, subject to WAC 148-171-230;

(d) The student, if appropriate or the adult student; and

(e) Other individuals at the discretion of the school, parent(s), or adult student. Either the teacher or school representative should be qualified in the area of the student's disability.

(2) IEP meetings involving a student who has been assessed for the first time shall include the following participant in addition to those enumerated as follows: A member of the student's assessment team who is knowledgeable about the assessment procedures used and is familiar with the results of the evaluation.)) WAC 392-172-153 is adopted by reference.

Involvement and participation of the LEA at meetings in which a decision is to be made relating to the educational placement of the student is considered essential for meaningful discussion to occur. A representative of the student's LEA will be invited to meetings involving an IEP, transition services, or placement. The LEA representative should be an individual who is knowledgeable about the availability of resources of the LEA, authorized to allocate resources, or develop collaborative requests for funding to establish programs to meet a student's extraordinary program needs. If the LEA representative is unable to attend the meeting, Washington school for the deaf staff shall keep the LEA representative

informed of the proceedings and obtain information that will assist in the provision of services.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-230 Parent participation and involvement. ((1) The school shall take steps to ensure (in the case of nonadult students) that one or both parents of the handicapped student are present at each meeting or are afforded the opportunity to participate, including:

(a) Notifying the parent(s) of the meeting early enough to ensure his or her participation; and

(b) Scheduling the meeting at a mutually agreed upon place and time.

(2) The notice to the parent(s) shall include the purpose, time, and location of the meeting and who will be in attendance.

(3) If a parent cannot attend, the school shall use other methods to ensure participation, including individual or conference telephone calls.

(4) A meeting may be conducted (in the case of a nonadult student) without a parent in attendance if the school is unable to convince the parents they should attend. In such a case the school shall make a record of its attempts to arrange a mutually agreed upon time and place. The record shall contain such information as:

(a) Detailed records of telephone calls made or attempted and the results of those calls;

(b) Copies of correspondence sent to the parent(s) and any responses received; and

(c) Detailed records of visits made to the parent's home or place of employment and the results of those visits.

(5) The school shall take whatever action is necessary to ensure that the parent (or adult student) understands the proceedings at a meeting, including arranging for an interpreter for parents (or adult students) who are deaf or whose native language is other than English.

(6) The school shall document the parent(s)' and other IEP participants' presence at the IEP meeting.

(7) The school shall provide the parent(s) a copy of the IEP upon request.)) WAC 392-172-15700 and 392-172-15705 are adopted by reference.

Inclusion of an LEA representative in meetings with the parent(s) will be encouraged and appropriate notice to the parent(s) will be provided.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-240 ((Content of the IEP)) Individualized education program. ((The individualized education program shall be developed on the basis of assessment analysis and parent input, where it is provided, and shall include:

(1) A statement of the student's present levels of educational performance;

(2) A statement of specific annual goals including short-term instructional objectives which are stated in terms that provide for measurement of progress, expected levels of performance, and the schedules for their accomplishments;

(3) A statement of the specific special education and related services needed by the student, and the extent to which the student will be able to participate in the regular educational program, including physical education;

(4) The IEP developed for a handicapped student whose chronological age is fourteen or above shall also include career development and/or vocational education goals and short-term instructional objectives, where appropriate. Provided, That if the career development and/or vocational education is specially designed instruction, goals and short-term instructional objectives shall be included;

(5) The projected dates for the initiation of services and the anticipated duration of the services, including the number of school days, and the number of hours per day; and

(6) Appropriate objectives criteria and evaluation procedures and schedules for determining, on at least an annual basis, whether the short-term instructional objectives are being met.

Nothing in this chapter may be construed as promising or guaranteeing that a handicapped student will in fact achieve the growth projected in his or her annual goals and short-term objectives.)) WAC 392-172-160 is adopted by reference.

NEW SECTION

WAC 148-171-242 Individualized education program—Implementation. WAC 392-172-158 is adopted by reference.

NEW SECTION

WAC 148-171-244 Individualized education program—Development, review, revision—Consideration of special factors. WAC 392-172-159 is adopted by reference.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-410 ((Reassessment)) Reevaluation. ((1) Each student shall be reassessed in accordance with the procedures specified in WAC 148-171-110 through 148-171-130:

(a) At a minimum, once every three years unless conditions warrant earlier reassessment; or

(b) Upon the request of the parents, an adult student, teacher, or IEP team.

(2) If reassessment is the result of the three-year reassessment requirement, the multidisciplinary team, based on the professional judgment of the members, to a reasonable degree of professional certainty, shall determine and document the following:

(a) Whether the student is appropriately classified;

(b) Whether the student meets the continuing eligibility criteria of WAC 392-171-325(3) or 392-171-331. The basis for this determination shall be documented in a written narrative including any relevant data or assessment process used;

(c) Whether the current program is appropriate to the student's unique needs, abilities, and limitations;

(d) Whether assessment procedures should be replicated or conducted by members of the multidisciplinary team or

PROPOSED

PROPOSED

other professionals not represented on the multidisciplinary team to provide reasonable professional certainty that the reassessment results are accurate. In making such determination, members of the multidisciplinary team shall be governed by the generally recognized professional practice standards of their respective disciplines. Members of the multidisciplinary team shall defer to the professional judgment of a team member who requests the replication or conduction of a particular assessment procedure.)) WAC 392-172-182 through 392-172-190 are adopted by reference.

The student's LEA should continue to be involved in the planning for any student who is enrolled at the Washington school for the deaf; therefore, the group of individuals referred to in the reevaluation procedures adopted by reference should include a representative of the LEA.

((NOTICE REQUIREMENTS)) PROCEDURAL SAFEGUARDS

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-500 When prior notice must be given. ~~((Written notice in accordance with WAC 148-171-510 shall be given to the parent(s) (or the adult student) a reasonable time before the school:~~

~~(1) Proposes to initiate or change the identification, evaluation, or educational placement of the student or the provision of special education and related services to the student pursuant to this chapter; or~~

~~(2) Refuses to initiate or change the identification, evaluation, or educational placement of the student or the provision of special education and related services to the student pursuant to this chapter.)) WAC 392-172-302 is adopted by reference. Where the adopted rule refers to WAC 392-172-306, refer to WAC 148-171-510.~~

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-510 Contents of ((the)) prior written notice. ~~((1) The notice required by WAC 148-171-500 shall include:~~

~~(a) A full explanation of all of the procedural safeguards available to the parent(s) (or adult student) under this chapter;~~

~~(b) A description of the action proposed or refused by the school, and explanation of why the school proposes or refuses to take the action, and a description of any options the school considered and the reasons why those options were rejected;~~

~~(c) A description of each evaluation procedure, test, record, or report used as a basis for the proposal or refusal; and~~

~~(d) A description of any other factors which are relevant to the school's proposal or refusal.~~

~~(2) The notice shall be:~~

~~(a) Written in language understandable to the general public; and~~

~~(b) Provided in the native language of the parent (or adult student) or other mode of communication used by the parent (or adult student), unless it is clearly not feasible to do so.~~

~~(3) If the native language or other mode of communication of the parent (or adult student) is not a written language, the school shall take steps to ensure that:~~

~~(a) The notice is translated orally or by other means to the parent (or adult student) in his or her native language or other mode of communication;~~

~~(b) The parent (or adult student) understands the content of the notice; and~~

~~(c) There is written evidence that the requirements in (a) and (b) of this subsection have been met.)) WAC 392-172-306 is adopted by reference. Where the adopted rule refers to WAC 392-172-302, refer to WAC 148-171-500.~~

NEW SECTION

WAC 148-171-512 Parent consent. WAC 392-172-304 is adopted by reference. Where the adopted rule refers to WAC 392-172-185 (reevaluation), refer to WAC 148-171-120.

NEW SECTION

WAC 148-171-514 Transfer of parental rights at age of majority. WAC 392-172-309 is adopted by reference.

NEW SECTION

WAC 148-171-550 Mediation. In order to ensure that mediation is available to resolve disagreements concerning the identification, evaluation, educational placement of the student or provision of FAPE to the student, and disputes involving any matter where a hearing is requested under this chapter, WAC 392-172-310 through 392-172-317 are adopted and incorporated by reference.

((HEARINGS))

NEW SECTION

WAC 148-171-601 Due process rights and procedures. (1) Hearing rights and procedures shall be consistent with the requirements applicable to public agencies in WAC 392-172-350 through 392-172-364, which are adopted by reference.

(2) A parent, adult student, or the superintendent (or designee) may initiate a hearing in any of the matters and for the purposes stated in WAC 392-172-350(1).

(3) Where the adopted rule refers to WAC 392-172-150 (independent educational evaluation), refer to WAC 148-171-140.

NEW SECTION

WAC 148-171-605 Request for hearing, notice by parent. In addition to the information required in WAC 392-172-350(2), the parent, adult student, or the attorney representing the student must provide notice (which must remain confidential) to the Washington school for the deaf in a request for a hearing to the office of the superintendent of public instruction. The notice must include:

- (1) The name of the student;
- (2) The address of the residence of the student;
- (3) The name of the school the student is attending;
- (4) A description of the nature of the problem of the student relating to the proposed initiation or change, including facts relating to the problem; and
- (5) A proposed resolution of the problem to the extent known and available to the parents at the time.

AMENDATORY SECTION (Amending WSR 90-16-016, filed 7/19/90, effective 8/19/90)

WAC 148-171-650 Surrogate parents. ~~((1) The school shall ensure that the rights of the nonadult student are protected when:~~

- ~~(a) No parent (as defined in WAC 148-171-010(3)) can be identified;~~
- ~~(b) The school, after reasonable efforts, cannot discover the whereabouts of a parent; or~~
- ~~(c) The student is a dependent of the state.~~
- ~~(2) Duty of school. The duty of the school under this section includes the assignment of a person to act as a surrogate for the parents. This duty includes the establishment of a method:~~

- ~~(a) For determining whether a nonadult student needs a surrogate parent; and~~
 - ~~(b) For assigning a surrogate parent to the student.~~
 - ~~(3) Criteria for selection of surrogates. The school shall ensure that a person selected as a surrogate:~~
 - ~~(a) Has no interest that conflicts with the interests of the student he or she represents; and~~
 - ~~(b) Has knowledge and skills that assure adequate representation of the student.~~
 - ~~(4) Nonemployee requirement—Compensation:~~
 - ~~(a) A person assigned as a surrogate may not be an employee of the school and/or other agency which is involved in the education or care of the student; and~~
 - ~~(b) A person who otherwise qualifies as a surrogate parent pursuant to this section is not an "employee" of the school and/or other agency solely because he or she is paid by the school and/or agency to serve as a surrogate parent.~~
 - ~~(5) Responsibilities. A surrogate parent may represent the student in all matters relating to:~~
 - ~~(a) The identification, assessment, and educational placement of the student; and~~
 - ~~(b) The provision of free appropriate public education to the student.)~~
- WAC 392-172-308 is adopted by reference. The definition of "parent" in WAC 392-172-035(5) is adopted by reference in WAC 148-171-010.

REPEALER

The following sections of the Washington Administrative Code are repealed:

WAC 148-171-130	Summary analysis of assessment data.
WAC 148-171-200	Definition.
WAC 148-171-400	Annual review of placement and student progress—Program evaluation.
WAC 148-171-420	Reassessment purposes.
WAC 148-171-430	Reassessment notice.
WAC 148-171-600	Right to initiate.
WAC 148-171-610	Hearing rights.
WAC 148-171-620	Timeline for decision.
WAC 148-171-630	Petition for review.
WAC 148-171-640	Student's status during proceedings.
WAC 148-171-700	Administration of medication.

**WSR 01-12-062
PROPOSED RULES
WASHINGTON STATE
SCHOOL FOR THE DEAF**
[Filed June 4, 2001, 9:29 a.m.]

Original Notice.
Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: Chapter 148-120 WAC, Student conduct code.

Purpose: To implement federal regulatory changes regarding discipline enacted March 12, 1999, resulting from the 1997 amendments to the Individuals with Disabilities Education Act and conform procedures to state law.

Statutory Authority for Adoption: RCW 72.40.022.

Statute Being Implemented: 20 U.S.C. §§ 1400 et seq.

Summary: Changes are needed to comply with the federal regulatory changes regarding discipline for children with disabilities adopted on March 12, 1999, as a result of the 1997 amendments to the Individuals with Disabilities Education Act, 20 U.S.C. §§ 1400 et seq., and the corresponding state regulatory changes related to disciplinary exclusion adopted by the State Educational Agency, Office of the Superintendent of Public Instruction, on January 1, 2000.

Reasons Supporting Proposal: Required by federal and state law.

Name of Agency Personnel Responsible for Drafting: Bonnie Y. Terada, Attorney General's Office, 1220 Main Street, Suite 510, Vancouver, WA 98660, (360) 759-2100; Implementation and Enforcement: Len Aron, Washington

PROPOSED

School for the Deaf, 611 Grand Boulevard, Vancouver, WA 98661-4918, (360) 414-0400.

Name of Proponent: Washington State School for the Deaf, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The new and revised rules implement the 1997 amendments to the Individuals with Disabilities Education Act ("IDEA '97") and the regulations of the United States Department of Education related to discipline and disciplinary exclusion of children with disabilities adopted as a result of IDEA '97. The rules also provide policies and procedures which are consistent with corresponding regulations of the Office of the Superintendent of Public Instruction, the state educational agency responsible for ensuring compliance by public agencies involved in the delivery of special education.

Proposal Changes the Following Existing Rules: As described above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. No small business impacts have been identified.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. RCW 34.05.328 does not apply to this rule adoption. The rules are not considered significant legislative rules by the Washington School for the Deaf.

Hearing Location: Washington State School for the Deaf, Administrative Conference Room, 611 Grand Boulevard, Vancouver, WA 98661, on July 10, 2001, at 9:00 a.m.

Assistance for Persons with Disabilities: Contact Judy Smith by July 3, 2001, TTY (360) 414-0401.

Submit Written Comments to: Len Aron, Superintendent, Washington School for the Deaf, 611 Grand Boulevard, Vancouver, WA 98661-4918, fax (360) 696-6291, by July 6, 2001.

Date of Intended Adoption: July 10, 2001.

May 29, 2001

Len Aron

Superintendent

AMENDATORY SECTION (Amending WSR 94-13-058, filed 6/8/94, effective 7/9/94)

WAC 148-120-100 Conduct violations. A student who, either as actor, aider, abettor, or accomplice (~~as defined in RCW 9A.08.020~~), violates any provision of this chapter shall be subject to the disciplinary actions herein adopted. A student may be an accomplice, or found to have aided and abetted in the commission of a violation of the student conduct code if he or she knowingly associates with the wrongful purpose, undertaking, or activity; encourages, promotes, or counsels another student in the commission of an offense, or participates in it as in something he or she desires to bring about, and seeks by his or her action to make it succeed.

The following offenses are prohibited:

(1) Physical abuse. Actual, attempted, or threatened physical abuse of any person or conduct which threatens or endangers the health and safety of any person or which inten-

tionally causes a reasonable apprehension of harm to any person.

(2) Destroying or damaging property. Destroying, defacing, or damaging school property or the property of others on school premises or at school-sponsored activities.

(3) Sexual harassment. Engaging in unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature where such behavior offends the recipient, causes discomfort or humiliation, or interferes with job or school performance.

(4) Disruption. Disorderly, intimidating or abusive behavior which interferes with the rights of others, school, or school-sponsored activities; obstructing the free movement of people or vehicles; inciting others to engage in prohibited conduct; or threatening disruption.

(5) Insubordination. Refusal or failure to follow instructions and proper orders of school officials, while on school property, during transportation to and from school, or at school-sponsored activities, thereby infringing upon the rights and privileges of others, and/or refusal to desist from prohibited conduct.

(6) False alarms. Falsely setting off, improper use or disabling of any safety equipment, alarm, exit sign, or other device.

(7) False information. Filing a formal complaint which falsely accuses another with violation of this chapter, falsifying information to school officials, or forging or tendering any forged instrument to the school.

(8) Theft. Actual or attempted theft of property or services belonging to the school, any student, school employee, or school visitor, including knowing possession of stolen property.

(9) Academic dishonesty. All forms of cheating, plagiarism and fabrication, including submitting any work product that the student misrepresents as his or her work product for the purpose of fulfilling any assignment or task required as part of the student's course of studies.

(10) Conversion. Unauthorized use or possession of school equipment or services.

(11) Unlawful entry and trespassing. Entering and/or remaining in any administrative or other employee office or any locked or otherwise closed school facility, in any manner, at any time, without permission.

(12) Smoking. Students are not allowed to smoke or use tobacco products on school property or during school-sponsored activities.

(13) Alcohol. Use, possession, distribution of, or visible intoxication from alcoholic beverages is prohibited on school property or at school-sponsored activities.

(14) Drugs and controlled substances. Use, possession, distribution, or being visibly under the influence of any (~~narco-~~ ~~otic or~~) controlled substance or illegal drug as defined in (~~the Uniform Controlled Substances Act, chapter 69.50 RCW, as amended~~) WAC 148-120-300, except when the use or possession of a drug is specifically prescribed as medication by an authorized medical doctor or dentist.

(15) Weapons and dangerous chemicals. Unauthorized use, possession or storage of any weapon, explosives, dangerous chemicals, substances or instruments, which may be used

to inflict bodily harm on another or damage upon school property or personal property.

(16) Other conduct. Any other conduct or action, the terms and violations of which are published annually in the student/parent handbook, in which the school can demonstrate a clear and distinct interest and which substantially threatens the educational process or other legitimate function of the school or the health or safety of any member of the school community is prohibited.

~~((DISCIPLINARY PROCESS AND PROCEDURES))~~
DISCIPLINE

AMENDATORY SECTION (Amending WSR 94-13-058, filed 6/8/94, effective 7/9/94)

WAC 148-120-200 Policy. The Washington school for the deaf has established standards of conduct for students and the disciplinary process to protect members of the school community, maintain and advance its educational mission, and provide for the orderly conduct of the school's activities. Disciplinary procedures used by the school are considered part of its educational process. School policy and rules of conduct shall be applicable to all students in any program or activity conducted by the Washington school for the deaf. In every case of misconduct, the nature and circumstances of the violation will be considered and appropriate disciplinary actions will be administered on a less restrictive alternative basis, including but not limited to time out, detention, behavior contracts, restriction of privileges, reprimand, restitution, suspension or expulsion.

AMENDATORY SECTION (Amending WSR 94-13-058, filed 6/8/94, effective 7/9/94)

WAC 148-120-220 Short-term suspension. (1) As used in this chapter, "short-term suspension" shall mean a denial of attendance at any class or admission to or entry upon school property for up to and not exceeding ten consecutive school days.

(2) ~~((Unless otherwise prohibited,))~~ Short-term suspension may be imposed upon a student for violation(s) of student conduct code rules.

(3) A student may be suspended for a short-term after another less restrictive form of disciplinary action, reasonably calculated to modify his or her conduct, has been imposed as a consequence of misconduct of the same nature: Provided, That the school may resort to immediate short-term suspension in cases involving exceptional misconduct notwithstanding the fact that prior alternative corrective action or discipline has not been imposed. For the purposes of this section, "exceptional misconduct" means misconduct, other than absenteeism, (a) of such frequent occurrence, notwithstanding prior attempts by the school to control such misconduct through the use of other forms of disciplinary action, as to warrant immediate resort to short-term suspension, and/or (b) so serious in nature and/or in terms of the disruptive effect upon the operation of the school, as to warrant immediate resort to short-term suspension.

(4) Any student subject to short-term suspension shall be provided the opportunity upon return to make up assignments and tests missed by reason of the suspension if such assignments or tests have a substantial effect upon academic standing.

AMENDATORY SECTION (Amending WSR 94-13-058, filed 6/8/94, effective 7/9/94)

WAC 148-120-225 Short-term suspension—Notice and conference—Grievance procedure. (1) Prior to the short-term suspension of any student pursuant to WAC 148-120-220, a conference shall be conducted with the student as follows:

(a) Notice of the alleged misconduct and violation(s) of school rules shall be provided to the student in writing or the mode of communication of the student;

(b) An explanation of the evidence in support of the allegation(s) shall be provided to the student in writing or the mode of communication of the student;

(c) An explanation of the ~~((disciplinary))~~ corrective action or discipline which may be imposed shall be provided to the student in writing or the mode of communication of the student; and

(d) The student shall have the opportunity to present his/her explanation.

(2) In the event a suspension is to exceed one calendar day the parent(s) or guardian(s) of the student shall be notified of the reason for the student's suspension and the duration of the suspension orally and/or by letter deposited in the United States mail as soon as reasonably possible. The notice shall also inform the parent or guardian of the right to ~~((a brief adjudicative proceeding))~~ an informal conference pursuant to subsection (3) of this section and that the suspension may possibly be reduced as a result of such ~~((proceeding))~~ conference.

(3) Any student, parent, or guardian aggrieved by the imposition of a short-term suspension ~~((pursuant to WAC 148-120-220,))~~ shall have the right to ~~((a brief adjudicative proceeding under WAC 148-108-100 as soon as reasonably possible))~~ an informal conference with the principal or his or her designee for the purpose of resolving the grievance. During the conference, the student, parent, or guardian shall be subject to questioning by the principal or his or her designee and shall be entitled to question school personnel involved in the matter being grieved. If the grievance is not resolved, the student, parent, or guardian, upon two school business days' prior notice, shall have the right to present a written and/or oral grievance to the superintendent who shall notify the student, parent, or guardian of his or her response to the grievance within ten school business days after receipt of the written or oral grievance. The disciplinary action may continue notwithstanding the implementation of the ~~((brief adjudicative proceeding))~~ grievance procedure set forth in this section.

~~((4))~~ The presiding officer shall give a written decision including a brief statement of the reasons for the decision within ten days of the brief adjudicative proceeding.)

PROPOSED

AMENDATORY SECTION (Amending WSR 94-13-058, filed 6/8/94, effective 7/9/94)

WAC 148-120-230 Long-term suspension. (1) As used in this chapter, "long-term suspension" shall mean a denial of attendance at any class or admission to or entry upon school property in excess of ten consecutive school days.

(2) ~~((Unless otherwise prohibited,))~~ Long-term suspensions may be imposed on a student for violation(s) of student conduct code rules.

(3) When a student engages in conduct that would warrant long-term suspension, the ~~((student, parent(s) or guardian(s) shall be notified immediately of the misconduct, the disciplinary action proposed, and the time and location of any individualized education program (IEP) team meeting review.~~

(4) ~~If long-term suspension is recommended, the school shall convene a meeting to review the student's IEP pursuant to WAC 148-171-210. The IEP team shall determine whether the misconduct is a manifestation of or is substantially related to the student's handicapping condition(s).~~

(5) ~~If the IEP team concludes that the misconduct is not a manifestation of the student's handicapping condition(s), the student may be disciplined under the procedures set forth in WAC 148-120-234 through 148-120-236.~~

(6) ~~If the IEP team concludes that the misconduct is a manifestation of the student's handicapping condition(s), suspension for more than ten days shall not be imposed unless:~~

(a) ~~The school and parent(s) or guardian(s) agree otherwise; or~~

(b) ~~The IEP team recommends a change of placement.~~

(7) ~~A student involved in the complaint shall remain at the school during the pendency of any administrative or judicial proceeding, unless:~~

(a) ~~The student's misconduct poses an immediate threat to the safety of others or where maintaining the student in his/her current placement at the school has a substantial likelihood of resulting in injury either to the student or to others; or~~

(b) ~~The school, student, and parent(s) agree otherwise.~~

(8) ~~A party may request a hearing pursuant to WAC 148-171-600, on any manner described in this section.~~

(9) ~~Nothing in this section shall be construed to limit the superintendent's ability to seek injunctive relief in appropriate cases from a court of competent jurisdiction.)~~ requirements and procedures for disciplinary exclusion, found in WAC 148-120-300 through 148-120-313 shall be followed.

AMENDATORY SECTION (Amending WSR 94-13-058, filed 6/8/94, effective 7/9/94)

WAC 148-120-234 Long-term suspension—Misconduct ~~((unrelated to handicapping condition(s)))~~ not a manifestation of disability—Notice. (1) Following a determination that behavior which warrants a long-term suspension was not a manifestation of the student's disability, a student may be suspended for a long term after another less restrictive form of disciplinary action, reasonably calculated to modify his or her conduct, has been imposed as a conse-

quence of misconduct of the same nature: Provided, That the school may resort to immediate long-term suspension in cases involving exceptional misconduct notwithstanding the fact that prior alternative corrective action or discipline has not been imposed. For the purposes of this section, "exceptional misconduct" means misconduct, other than absenteeism, (a) of such frequent occurrence, notwithstanding prior attempts by the school to control such misconduct through the use of other forms of disciplinary action, as to warrant immediate resort to long-term suspension, and/or (b) so serious in nature and/or in terms of the disruptive effect upon the operation of the school, as to warrant immediate resort to long-term suspension.

(2) Prior to the long-term suspension of any student for misconduct ~~((unrelated to his/her handicapping condition(s)))~~ which was not a manifestation of the student's disability, written notice of an opportunity for a hearing shall be delivered in person or by certified mail to the student and parent(s) or guardian(s). The notice shall:

(a) Be provided in the predominant language of a student and/or a parent(s) or guardian(s) who predominantly speak a language other than English, to the extent feasible;

(b) Specify the alleged misconduct and the rule(s) alleged to have been violated;

(c) Set forth the disciplinary action proposed;

(d) Set forth the right of the student and/or his or her parent(s) or guardian(s) to a hearing for the purpose of contesting the allegation(s).

(e) State that a written request for a hearing must be received by the school employee designated, or by his or her office within three school business days after receipt of the notice of opportunity for a hearing; and

(f) State that if such a request is not received within the prescribed period of time, then the right to a hearing may be deemed to have been waived and the proposed long-term suspension may be imposed. A schedule of school business days should be included with the notice.

(3) If a request for a hearing is not received within the required three school business day period, the school may deem the student and his or her parent(s) or guardian(s) to have waived the right to a hearing and the proposed long-term suspension may be imposed.

AMENDATORY SECTION (Amending WSR 94-13-058, filed 6/8/94, effective 7/9/94)

WAC 148-120-236 Long-term suspension—Misconduct ~~((unrelated to handicapping condition(s)))~~ not a manifestation of disability—Hearing ~~((—Appeal))~~. (1) If a request for a hearing is received pursuant to WAC 148-120-234 within the required time period, the school shall schedule a hearing to commence within seven school days after the date upon which the request for a hearing was received.

(2) ~~((The student and parent(s) or guardian(s) has the right to:~~

(a) ~~Inspect in advance of the hearing any documentary and other physical evidence which the school intends to introduce at the hearing;~~

(b) ~~Be advised or represented by an attorney;~~

~~(e) Present relevant evidence, confront and compel the attendance of witnesses.~~

~~(3) The designee of the school assigned to present the school's case shall have the right to inspect in advance of the hearing any documentary and other physical evidence which the student and parent(s) or guardian(s) intends to introduce at the hearing;~~

~~(4) The person(s) hearing the case shall not be a witness and the decision on the suspension shall be based solely on the evidence presented at the hearing.~~

~~(5) A written or electronic verbatim record of the hearing shall be made.~~

~~(6) A written decision setting forth findings of fact, conclusions, and the nature and duration of the long-term suspension or lesser form of disciplinary action to be imposed, if any, shall be provided to the student, parent(s) or guardian(s), and attorney.~~

~~(7) If a request for hearing is not received within the prescribed period of time, then the right to a hearing may be deemed to have been waived and the proposed long-term suspension may be imposed without any further opportunity for the student or his or her parent(s) to contest the matter.~~

~~(8) A decision which imposes a long-term suspension upon a student shall be final and no further appeal within the school is provided.~~

~~(9)) The hearing shall be a brief adjudicative proceeding in accordance with WAC 148-108-100. The hearing process described in WAC 180-40-270, applicable to long-term suspensions involving students without disabilities, should apply as guidelines for the conduct of the brief adjudicative proceeding.~~

(3) During the pendency of any administrative or judicial proceeding involving suspension under this section, unless the school and the parent(s) of the student (or the ~~((adult))~~ eligible student as defined in WAC 148-171-010(1)) agree otherwise, the student shall remain in the educational placement he or she was in when the request for hearing was made: Provided, That nothing in this section shall be construed to limit the superintendent's ability to seek injunctive relief in appropriate cases from a court of competent jurisdiction.

DISCIPLINARY EXCLUSION

NEW SECTION

WAC 148-120-300 Disciplinary exclusion—Definitions. The following definitions apply to this section only:

(1) "Controlled substance" means a drug or other substance identified under Schedules I, II, III, IV, or V in section 202(c) of the Controlled Substances Act (21 U.S.C. Sec. 812(c)).

(2) "Illegal drug" means a controlled substance, but does not include, a substance that is legally possessed or used under the supervision of a licensed health care professional or that is legally possessed or used under any other authority under the Controlled Substances Act or under any other provision of federal law.

(3) "Weapon" has the meaning given the term "dangerous weapon" under section 930(g)(2) of Title 18 U.S.C.:

"Dangerous weapon" means a weapon, device, instrument, material, or substance, animate or inanimate, that is used for, or is readily capable of, causing death or serious bodily injury, except that such term does not include a pocket knife with a blade of less than two and one-half inches in length.

(4) "Substantial evidence" means beyond a preponderance of the evidence.

NEW SECTION

WAC 148-120-301 Change of placement for disciplinary removals. For purposes of removals of a student from the student's current educational placement under this section, a change of placement occurs if:

(1) The removal is for more than ten consecutive school days; or

(2) The student is subjected to a series of removals that constitute a pattern because they cumulate to more than ten school days in a school year, and because of factors such as the length of each removal, the total amount of time the student is removed, and the proximity of the removals to one another.

NEW SECTION

WAC 148-120-302 Removals—Ten school days or less. School personnel may order the removal of a student from the student's current placement for not more than ten consecutive school days for any violation of school rules, including the student conduct code, and additional removals of not more than ten consecutive school days in that same school year for separate incidents of misconduct as long as those removals do not constitute a change of placement under WAC 148-120-202.

NEW SECTION

WAC 148-120-303 Required services. (1) In the case of a student who has been removed from his or her current placement for more than ten cumulative school days in the same school year, the school, for the remainder of the removals, shall provide services to the extent necessary to enable the student to appropriately progress in the general curriculum and advance toward achieving the goals set out in the student's individualized education program.

(2) When there is no change of placement, school personnel, in consultation with the student's special education teacher, determine the extent to which services are necessary to enable the student to appropriately progress in the general curriculum and appropriately advance toward achieving the goals set out in the student's IEP.

NEW SECTION

WAC 148-120-304 Change of placement—Removals for weapons or drugs. School personnel may order a change in placement of a student to an appropriate interim alternative educational setting for not more than forty-five calendar days, if the student:

PROPOSED

(1) Possesses a weapon, or carries a weapon to school or to a school function under the jurisdiction of the school for the deaf; or

(2) Knowingly possesses or uses illegal drugs or sells or solicits the sale of a controlled substance while at school or a school function under the jurisdiction of the school for the deaf.

NEW SECTION

WAC 148-120-305 Functional behavioral assessment and intervention plan. Within ten business days after first removing a student for more than ten consecutive school days in a school year or placing the student in an interim alternative educational setting, the following actions shall be taken by the school:

(1) If the school did not conduct a functional behavioral assessment and implement a behavioral intervention plan for the student before the behavior that resulted in the removal occurred, an individualized education program meeting will be convened to develop an assessment plan.

(2) If the student already has a behavioral intervention plan, the individualized education program team shall meet to review the plan and its implementation to determine whether modifications are necessary.

(3) As soon as practicable after developing the assessment plan described in subsection (1) of this section, and completing the assessments required by the plan, an IEP meeting will be convened to develop appropriate behavioral interventions to address the behavior that resulted in removal and to implement those interventions.

(4) If a student has a behavioral intervention plan and has been removed from the current educational placement for more than ten cumulative school days in a school year, and is subsequently subjected to a removal that does not constitute a change of placement under WAC 148-120-301, the IEP team may review the behavioral intervention plan and its implementation to determine if modifications are necessary.

(5) If one or more of the IEP team members believe that modifications to an existing behavioral intervention plan are needed, the team shall meet to modify the plan and its implementation, to the extent the team determines necessary.

NEW SECTION

WAC 148-120-306 Dangerous behavior—Authority of hearing officer. A hearing officer, described in WAC 392-172-352 (adopted by reference in WAC 148-171-601), may order a change in the placement of a student to an appropriate interim alternative educational setting for not more than forty-five days if the hearing officer, in an expedited due process hearing:

(1) Determines that the school has demonstrated by substantial evidence that maintaining the current placement of the student is substantially likely to result in injury to the student or to others;

(2)(a) Considers the appropriateness of the student's current placement;

(b) Including, when necessary, the requirements and limitations imposed by RCW 72.40.040(4), 72.40.050(2), 72.40.250(2), and 72.40.270;

(3) Considers whether the school has made reasonable efforts to minimize the risk of harm in the student's current placement, including the use of supplementary aids and services; and

(4) Determines that the interim alternative educational setting that is proposed by school personnel who have consulted with the student's special education teacher meets the requirements of WAC 148-120-307.

NEW SECTION

WAC 148-120-307 Determination of interim alternative educational setting. The individualized education program team shall determine an interim alternative educational setting. Any interim alternative educational setting in which a student is placed under WAC 148-120-304 and 148-120-306 shall:

(1) Be selected so as to enable the student to continue to progress in the general curriculum, although in another setting, and to continue to receive those services and modifications, including those described in the student's current individualized education program, that will enable the student to meet the goals set out in that individualized education program; and

(2) Include services and modifications designed to address and prevent the recurrence of the behavior described in WAC 148-120-304 or 148-120-306.

NEW SECTION

WAC 148-120-308 Manifestation determination review requirements. If school personnel or a hearing officer contemplates action that involves removing a student for behavior described in WAC 148-120-304 or behavior that is substantially likely to result in injury to the student or to others, or other behavior that violates any rule or code of conduct which results in a change of placement under WAC 148-120-301, the school shall:

(1) Not later than the date on which the decision to take action is made, notify the parents of the school's decision and provide the procedural safeguards notice described under WAC 392-172-307; and

(2) Immediately, if possible, but in no case later than ten school days after the date on which the decision to remove the student is made, conduct a review of the relationship between the student's disability and the behavior subject to the disciplinary action.

NEW SECTION

WAC 148-120-309 Procedures for conducting a manifestation determination. The individualized education program team and other qualified personnel in a meeting shall conduct a manifestation determination review. In carrying out the review, the team may determine that the behavior of the student was not a manifestation of the student's disability only if the team:

(1) First considers, in terms of the behavior subject to disciplinary action, all relevant information, including:

(a) Evaluation and diagnostic results, including the results of other relevant information supplied by the parents of the student;

(b) Observations of the student; and

(c) The student's individualized education program and placement.

(2) Then determines that:

(a) In relationship to the behavior subject to disciplinary action, the student's individualized education program and placement were appropriate and the special education services, supplementary aids and services, and behavior intervention strategies were provided consistent with the student's individualized education program and placement;

(b) The student's disability did not impair the ability of the student to understand the impact and consequences of the behavior subject to disciplinary action; and

(c) The student's disability did not impair the ability of the student to control the behavior subject to disciplinary action.

(3) If the team determines that any of the above standards in this section were not met, the behavior must be considered a manifestation of the student's disability.

(4) The manifestation determination review described in this section may be conducted at the same individualized education program meeting that is convened to address a functional behavioral assessment and behavioral intervention plan.

(5) If the review identifies deficiencies in the student's IEP or placement or in their implementation, the school will take immediate steps to remedy those deficiencies.

NEW SECTION

WAC 148-120-310 Determination that behavior was not manifestation of disability. (1) If the results of the manifestation determination review indicate that the behavior of the student was not a manifestation of the student's disability, the student may be subject to the same disciplinary measures applicable to students without disabilities, including long-term suspensions and expulsions, except that a free appropriate public education shall continue to be made available to those students consistent with 34 CFR Sec. 300.121(d).

(2) The student's IEP team determines the extent to which services are necessary to enable the student to appropriately progress in the general curriculum and appropriately advance toward achieving the goals set out in the student's IEP if the student is removed because of behavior that has been determined not to be a manifestation of the student's disability.

(3) If a parent requests a hearing to challenge the determination that the behavior of the student was not a manifestation of the student's disability, then the student shall remain in the current educational placement or interim alternative educational setting consistent with WAC 148-120-312, whichever applies.

NEW SECTION

WAC 148-120-311 Expedited due process hearings.

(1) "Expedited due process hearing" means a hearing that is conducted by a due process hearing officer, in accordance with WAC 148-171-601 (impartial due process hearing rights) and this section, and may be requested in any of the following situations:

(a) The parent disagrees with a determination that the student's behavior was not a manifestation of the student's disability.

(b) The parent disagrees with the school's decision regarding the student's disciplinary change of placement under WAC 148-120-304.

(c) The school maintains that it is dangerous for the student to return to the current placement (placement prior to removal to the interim alternative educational setting) after the expiration of the student's placement in an interim alternative educational setting or to be in the current placement (placement prior to removal to the interim alternative educational setting) during the pendency of the due process proceedings.

(2) Pursuant to WAC 392-172-350 (adopted by reference in WAC 148-171-601) the office of superintendent of public instruction shall arrange for an expedited hearing in any case described in subsection (1) of this section if requested by the parent.

(3) In reviewing a decision with respect to the manifestation determination, the hearing officer shall determine whether the school has demonstrated that the student's behavior was not a manifestation of the student's disability consistent with the requirements of WAC 148-120-309.

(4) In reviewing a decision to place the student in an interim alternative educational setting, the hearing officer shall apply the standards under WAC 148-120-306.

(5) An expedited due process hearing shall:

(a) Result in a written decision being mailed to the parties within forty-five days of the office of superintendent of public instruction's receipt of the request for the hearing without exceptions or extensions. The timeline established in this subsection shall be the same for hearings requested by parents or the school;

(b) Meet the requirements of WAC 392-172-354 (adopted by reference in WAC 148-171-601) except that the time periods identified for the disclosure of records and evaluations for purposes of expedited due process hearings are not less than two business days prior to the hearing; and

(c) Be conducted by a due process hearing officer who satisfies the impartiality requirements of WAC 392-172-352 (adopted by reference in WAC 148-171-601).

(6) The decisions on expedited due process hearings are appealable under the state's due process appeal procedures (see WAC 148-171-601 and 392-172-360).

NEW SECTION

WAC 148-120-312 Placement during appeals. (1) If a parent requests a hearing regarding a disciplinary action described in WAC 148-120-304 or 148-120-306 to challenge the interim alternative educational setting or the manifesta-

PROPOSED

tion determination, the student must remain in the interim alternative educational setting pending the decision of the hearing officer or until the expiration of the forty-five day time period provided for, whichever occurs first, unless the parent and the school agree otherwise.

(2) If a student is placed in an interim alternative educational setting pursuant to this section and school personnel propose to change the student's placement after expiration of the interim alternative placement, during the pendency of any proceeding to challenge the proposed change in placement, the student must remain in the current placement (the student's placement prior to the interim alternative educational setting), except as provided for below.

(3) In determining whether the student may be placed in the alternative educational setting or in another appropriate placement ordered by the hearing officer, the hearing officer shall apply the standards under WAC 148-120-211.

(4) A placement ordered pursuant to this section may not be longer than forty-five days.

(5) The procedure in this section may be repeated as necessary.

NEW SECTION

WAC 148-120-313 Referral to and action by law enforcement and judicial authorities. (1) Nothing in Part B of the Individuals with Disabilities Education Act, or this chapter prohibits the Washington school for the deaf from reporting a crime committed by a student to appropriate authorities, or prevents state law enforcement and judicial authorities from exercising their responsibilities with regard to the application of federal and state law to crimes committed by a student.

(2) When reporting a crime committed by a student, the school shall ensure that copies of the special education and disciplinary records of the student are transmitted for consideration by the appropriate authorities to whom it reports the crime.

(3) When reporting a crime under this section, the school may transmit copies of the student's special education and disciplinary records only to the extent that the transmission is permitted by the Family Educational Rights and Privacy Act.

NEW SECTION

WAC 148-120-314 Aversive interventions. WAC 392-172-388 through 392-172-396 are adopted by reference.

WSR 01-12-063

PROPOSED RULES

DEPARTMENT OF LICENSING

[Filed June 4, 2001, 10:32 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 01-09-026.

Title of Rule: WAC 308-130-150 Landscape architect fees.

Purpose: This rule is needed to increase the charge that candidates pay for the landscape architect registration examination and the department collects on the vendor's behalf.

Statutory Authority for Adoption: RCW 18.96.080 Fees and 43.24.086 Fee policy for professions, occupations and businesses; requires fees to be at a sufficient level to defray the costs of administering the program.

Statute Being Implemented: RCW 43.24.086 Fee policy for professions, occupations and businesses; requires fees to be at a sufficient level to defray the costs of administering the program.

Summary: This is a national driven fee increase and not the request of the department.

Reasons Supporting Proposal: The cost of the examinations are charged directly to the candidates for registration.

Name of Agency Personnel Responsible for Drafting: Joan Y. Robinson, 405 Black Lake Boulevard, Olympia, (360) 664-1386; **Implementation and Enforcement:** Margaret Epting, 405 Black Lake Boulevard, Olympia, (360) 664-1386.

Name of Proponent: Landscape Architect Registration Board, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The examination vendor has increased the examination charges. This rule is needed to increase the examination charges that candidates pay for the examination, to a sufficient level to meet the cost of purchasing the examinations for the candidates.

Proposal Changes the Following Existing Rules: It increases the charges that are collected from candidates for the examinations ordered from the test vendor. The charges recovered by the department shall be refunded to the vendor for the cost of the examinations.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This increase in charges is to individual applicants, not business enterprises. The vendor will provide the tests only at these prices. The costs are not negotiable.

Without these increases in examination charges the refund account would be a deficit with the first examination session.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. This section of regulations is not a "significant legislative rule" as defined by RCW 34.05.328 (5)(c)(iii) and is exempt under the provisions of RCW 34.05.38 [34.05.328] (5)(b)(vi).

Hearing Location: Department of Licensing, 405 Black Lake Boulevard, Conference Room 1, Olympia, WA 98502, on July 12, 2001, at 11:00 a.m.

Assistance for Persons with Disabilities: Contact Joan Y. Robinson by July 10, 2001, TDD (360) 586-2788, or (360) 664-1387.

Submit Written Comments to: Margaret Epting, Landscape Architect Registration Board, P.O. Box 9045, Olympia, WA 98507-9045, fax (360) 664-2551, by July 10, 2001.

PROPOSED

Date of Intended Adoption: July 12, 2001.

PROPOSED RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
 (Economic Services Administration)

(Division of Employment and Assistance Programs)
 [Filed June 4, 2001, 4:16 p.m.]

AMENDATORY SECTION (Amending WSR 01-04-002, filed 1/25/01, effective 2/25/01)

WAC 308-13-150 Landscape architect fees and charges. The following fees will be collected from the candidates for examination:

Title of Fee	Fee
Application fee	\$150.00
Reexamination administration fee	50.00
Exam proctor	100.00
Renewal (2 years)	300.00
Late renewal penalty	100.00
Duplicate license	
Initial registration (2 years)	300.00
Reciprocity application fee	200.00
Certification	45.00
Replacement certificate	20.00

Those charges collected from candidates shall be paid to CLARB for the costs of the examinations.

Examination and Sections	Charges
Entire examination	\$ (570.00) <u>660.00</u>
Examination sections:	
Section A: Legal and administrative aspects of practice	((45.00)) <u>50.00</u>
Section B: Analytical aspects of practice	((85.00)) <u>90.00</u>
Section C:	
Planning and site design	((175.00)) <u>185.00</u>
Section D:	
Structural considerations and materials and methods of construction	((140.00)) <u>150.00</u>
Section E:	
Grading, drainage and stormwater management	((175.00)) <u>185.00</u>

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: WAC 388-470-0075 How is my vehicle counted for food assistance?

Purpose: Treats licensed vehicles as inaccessible resources by excluding those with an equity value less than \$1500. If a vehicle is not excluded, then we count the fair market value greater than \$4650 toward the resource limit for:

(a) One vehicle for each adult household member no matter how the vehicle is used; and

(b) Any vehicle a household member under age eighteen uses to drive to work, school, training, or to look for work.

Statutory Authority for Adoption: RCW 74.08.090 and 74.04.510.

Statute Being Implemented: RCW 74.08.090 and 74.04.510.

Summary: Amending rule to exclude licensed vehicles as inaccessible resources if their equity value is less than \$1500.

Reasons Supporting Proposal: Many working families formerly ineligible for benefits will now be eligible to receive food assistance and will no longer have to sacrifice nutritional needs in order to own a reliable vehicle that is helping them achieve self-sufficiency.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Vicky T. Robinson, Division of Employment and Assistance Programs, (360) 413-3031.

Name of Proponent: Department of Social and Health Services, governmental.

Rule is necessary because of federal law, 7 C.F.R. 273.8.

Explanation of Rule, its Purpose, and Anticipated Effects: Excludes the value of those vehicles with an equity value less than \$1500. If a vehicle is not excluded, then we count the fair market value greater than \$4650 toward the resource limit for:

(a) One vehicle for each adult household member no matter how the vehicle is used; and

(b) Any vehicle a household member under age eighteen uses to drive to work, school, training, or to look for work.

Proposal Changes the Following Existing Rules: Treats those vehicles that have an equity value less than \$1500 as inaccessible resources. Also changes how the department counts fair market value greater than \$4650 depending on who uses the vehicle and how the vehicle is used.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This rule does not impact small businesses.

PROPOSED

RCW 34.05.328 does not apply to this rule adoption. This rule change does not meet the definition of a significant legislative rule.

Hearing Location: Blake Office Park (behind Goodyear Courtesy Tire), 4500 10th Avenue S.E., Rose Room, Lacey, WA 98503, on July 10, 2001, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Kelly Cooper, DSHS Rules Coordinator, by July 2, 2001, phone (360) 664-6094, TTY (360) 664-6178, e-mail coopeKD@dshs.wa.gov.

Submit Written Comments to: Identify WAC Numbers, Kelly Cooper, DSHS Rules Coordinator, Rules and Policies Assistance Unit, P.O. Box 45850, Olympia, WA 98504-5850, fax (360) 664-6185, by July 10, 2001.

Date of Intended Adoption: No sooner than July 11, 2001.

June 1, 2001

Brian H. Lindgren, Manager
Rules and Policies Assistance Unit

AMENDATORY SECTION (Amending WSR 99-16-024, filed 7/26/99, effective 9/1/99)

WAC 388-470-0075 How is my vehicle ~~(s-are)~~ counted for food assistance ~~((:))~~? ~~(1) ((The entire value of) If you own a licensed vehicle ((even during periods of temporary unemployment is excluded if the vehicle is)) we (the department) exclude its entire value, even when you are temporarily unemployed, if the vehicle is:~~

(a) ~~Used over fifty percent of the time for income-producing purposes such as a taxi, truck, or fishing boat. ((A excluded vehicle used by)) If you are a self-employed farmer or fisher ((retains its exclusion)) and your self-employment ends, we continue to exclude your vehicle for one year from the date ((the household member ends this)) you end your self-employment.~~

(b) ~~Used to produce income ((annually)) each year that is consistent with its fair market value (FMV), even if used on a seasonal basis.~~

(c) ~~Necessary for long-distance travel ((that is essential to)), other than daily commuting, for the employment of a ((an assistance unit)) household member whose resources are considered available to the assistance unit ((-Vehicles needed for daily commuting are not excluded under this provision)) (AU), such as an ineligible alien or disqualified person.~~

(d) ~~((Necessary)) Needed for hunting or fishing to support the household.~~

(e) ~~Used as the ((assistance unit's)) AU's home.~~

(f) ~~Used to carry fuel for heating or water for home use when this is the primary source of fuel or water for the ((assistance unit)) AU.~~

(g) ~~Needed to transport a physically disabled ((household)) AU member, no matter if the disability is permanent or temporary.~~

~~(((2)) The FMV in excess of four thousand six hundred fifty dollars is counted toward the assistance unit's resource limit for the following licensed vehicles if not excluded in subsection (1) above:~~

~~(a) One per assistance unit regardless of use;~~

~~(b) Used for transportation to and from work, training, or education; or~~

~~(c) Used for seeking employment))~~

~~(h) Likely to produce an equity value (FMV less what is owed on the vehicle) of no more than one thousand five hundred dollars.~~

~~(2) If your licensed vehicle is not excluded in subsection (1) above and the FMV is:~~

~~(a) Less than four thousand six hundred fifty dollars, we exclude each vehicle less than four thousand six hundred fifty dollars no matter how it is used;~~

~~(b) Greater than four thousand six hundred fifty dollars, we count the amount in excess of four thousand six hundred fifty dollars toward the resource limit for:~~

~~(i) One vehicle for each adult household member no matter how it is used; and~~

~~(ii) Any vehicle a household member under age eighteen uses to drive to work, school, training, or to look for work.~~

~~(3) ((For all)) If you have other licensed vehicles, we count the larger value of the following ((is counted)) toward the ((assistance unit's)) AU's resource limit:~~

~~(a) FMV ((in excess of four thousand six hundred fifty dollars)) greater than four thousand six hundred fifty dollars; or~~

~~(b) Equity value (FMV less what is owed on the vehicle).~~

~~(4) ((Unlicensed vehicles driven by tribal members on the reservation are treated like a licensed vehicle)) If you are a tribal member and drive an unlicensed vehicle on those reservations that don't require vehicle licensing, your vehicle will be treated like a licensed vehicle.~~

~~(5) For all other unlicensed vehicles we count the equity value ((is counted)) towards the ((assistance unit's)) AU's resource limit unless the vehicle is:~~

~~(a) Used to produce income ((annually)) each year that is consistent with its FMV, even if used on a seasonal basis; or~~

~~(b) Work-related equipment necessary for employment or self-employment of ((an assistance unit)) a household member.~~

~~(6) When excluding vehicles due to their equity value, we do not add up the values of multiple vehicles together. Each vehicle is evaluated separately and compared to your resource limit. For vehicles evaluated using the FMV test, we add the values of multiple vehicles together and compare the result to your resource limit.~~

WSR 01-12-074

PROPOSED RULES

PERSONNEL RESOURCES BOARD

[Filed June 5, 2001, 11:17 a.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: WAC 356-22-160 Examination ratings—Computation and 356-22-170 Examination results—Notice requirements.

Purpose: These rules pertain to Examination ratings—Computation and notice requirements.

PROPOSED

Statutory Authority for Adoption: Chapter 41.06 RCW.
 Statute Being Implemented: RCW 41.06.150.

Summary: These modifications reflect current practice by the Department of Personnel. Department of Personnel no longer provides breakdowns on examinations due to budgetary constraints and changes to exams. WAC 356-22-170 is being repealed.

Name of Agency Personnel Responsible for Drafting: Sharon Whitehead, 521 Capitol Way South, Olympia, WA, (360) 664-6348; Implementation and Enforcement: Department of Personnel.

Name of Proponent: Department of Personnel, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The purpose of WAC 356-22-160 is to address examination ratings and the current practice used to notify applicants of his/her final rating within a reasonable period after it is finalized. WAC 356-22-170 reflects the former practice of giving breakdowns on the examinations. WAC 356-22-170 is being repealed.

Proposal Changes the Following Existing Rules: See above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Not required.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. These rules relate to internal government operations that are not subject to violation by a nongovernmental party. Therefore, pursuant to RCW 34.05.328 [(5)](b)(ii), section 201 does not apply.

Hearing Location: Department of Personnel, 521 Capitol Way South, Olympia, WA, on July 12, 2001, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Department of Personnel by July 5, 2001, TDD (360) 753-4107, or (360) 586-8260.

Submit Written Comments to: Sharon Whitehead, Department of Personnel, P.O. Box 47500, fax (360) 586-4694, by July 9, 2001.

Date of Intended Adoption: July 12, 2001.

June 4, 2001
 Gene Matt
 Secretary

AMENDATORY SECTION (Amending Order 49, filed 8/17/72)

WAC 356-22-160 Examination ratings—Computation. All applicants for the same register for a class shall be accorded uniform and equal treatment in all phases of the examination procedure. All scores shall be based on a uniform rating or scoring procedure. In establishing passing points, the director may take into consideration the number of candidates and anticipated openings within limits established by the relevant job standards. Each applicant shall be sent written notice of his/her final rating within a reasonable period after it is finalized.

REPEALER

WAC 356-22-170

Examination results—Notice requirements.

**WSR 01-12-075
 PROPOSED RULES
 PERSONNEL RESOURCES BOARD**

[Filed June 5, 2001, 11:19 a.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: WAC 356-26-040 Registers—Name removal for cause—Grounds enumerated—Requirements.

Purpose: This rule pertains to removal of the name of an eligible from a register and/or certification.

Statutory Authority for Adoption: Chapter 41.06 RCW.
 Statute Being Implemented: RCW 41.06.150.

Summary: This modification will reasonably limit a candidate from reapplying for one year after removal from a register.

Name of Agency Personnel Responsible for Drafting: Sharon Whitehead, 521 Capitol Way South, Olympia, WA, (360) 664-6348; Implementation and Enforcement: Department of Personnel.

Name of Proponent: Department of Personnel, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This rule sets forth the reason a candidate may be removed from a register and/or certification. Given the extensive number of continuously open recruitment bulletins, this change will limit the ability of the candidate to reapply for one year following removal.

Proposal Changes the Following Existing Rules: See above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Not required.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. These rules relate to internal government operations that are not subject to violation by a nongovernmental party. Therefore, pursuant to RCW 34.05.328 [(5)](b)(ii), section 201 does not apply.

Hearing Location: Department of Personnel, 521 Capitol Way South, Olympia, WA, on July 12, 2001, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Department of Personnel by July 5, 2001, TDD (360) 753-4107, or (360) 586-8260.

Submit Written Comments to: Sharon Whitehead, Department of Personnel, P.O. Box 47500, fax (360) 586-4694, by July 9, 2001.

Date of Intended Adoption: July 12, 2001.

PROPOSED

AMENDATORY SECTION (Amending WSR 00-10-026, filed 4/24/00, effective 6/1/00)

WAC 356-26-040 Registers—Name removal for cause—Grounds enumerated—Requirements. (1) The director of personnel or designee may remove the name of an eligible from a register and/or certification for any of the following reasons:

(a) For any of the causes stipulated in the chapter on appeals (WAC 356-34-010).

(b) On evidence that the eligible cannot be located by the postal authorities.

(c) On receipt of a statement from the eligible declining an appointment and/or future interest in positions in that class.

(d) If a candidate from a reduction in force register or a dual agency reversion register has waived three offers of employment for a position in the class for which the register was established.

(e) If a candidate from a promotional or open competitive register has waived consideration three times for a position in the class for which the register was established.

(f) If an eligible fails to reply to a written inquiry as to availability after five days in addition to the time required to receive and return the inquiry.

(g) If an eligible accepts an appointment and fails to report for duty at the time and place specified without giving satisfactory reasons for the delay to the appointing authority.

(h) If an eligible was certified and reported "not satisfactory" on three occasions or if the eligible was certified and the appointing authority reported the eligible "considered but not appointed" on four separate occasions, or if the appointing authority reports either "not satisfactory" or "considered but not appointed" for a total of four times. The director of personnel or designee will monitor all name removals for adverse effect and/or disparate treatment of affected group members. If a candidate is removed from a register for this reason, that candidate is not eligible to reapply for that same job class for one year.

(i) If an open competitive eligible indicates availability in a specific geographic area and subsequently refuses referral or appointment to a position in that area.

(j) If the appointing authority reports that the eligible was offered employment but could not comply with the personal identification and work authorization requirements of the federal Immigration Reform and Control Act (I.R.C.A.).

(2) The director of personnel or designee shall notify the eligible of this action and the reasons therefore by mail to the last known address, except in those cases in subsection (1)(b) or (c) of this section. The director of personnel or designee will advise the eligible of the right to appeal.

(3) An eligible's name shall be reinstated on the register upon showing of cause satisfactory to the director of personnel or in accordance with the decision of the board upon appeal.

WSR 01-12-076

PROPOSED RULES

PERSONNEL RESOURCES BOARD

[Filed June 5, 2001, 11:21 a.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: WAC 356-30-305 Trial service period—Provision and 356-30-260 Probationary period—Provisions—Status of employee.

Purpose: These rules pertain to trial service periods and probationary periods.

Statutory Authority for Adoption: Chapter 41.06 RCW.

Statute Being Implemented: RCW 41.06.150.

Summary: These modifications are needed to address when employees are hired off a promotional or open competitive register prior to completing their probationary period. These employees will start a new probationary period rather than a trial service period.

Name of Agency Personnel Responsible for Drafting: Sharon Whitehead, 521 Capitol Way South, Olympia, WA, (360) 664-6348; Implementation and Enforcement: Department of Personnel.

Name of Proponent: Department of Personnel, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: These rules deal with the trial service period and the probationary period. An employee can be hired off of a promotional or open competitive register during their probationary period. These changes clarify that the employee would then start a new probationary period rather than a trial service period.

Proposal Changes the Following Existing Rules: See above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Not required.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. These rules relate to internal government operations that are not subject to violation by a nongovernmental party. Therefore, pursuant to RCW 34.05.328 [(5)](b)(ii), section 201 does not apply.

Hearing Location: Department of Personnel, 521 Capitol Way South, Olympia, WA, on July 12, 2001, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Department of Personnel by July 5, 2001, TDD (360) 753-4107, or (360) 586-8260.

Submit Written Comments to: Sharon Whitehead, Department of Personnel, P.O. Box 47500, fax (360) 586-4694, by July 9, 2001.

PROPOSED

AMENDATORY SECTION (Amending WSR 99-01-052, filed 12/10/98, effective 1/11/99)

WAC 356-30-305 Trial service period—Provision.

(1) Permanent ((E)) employees appointed from a voluntary demotion register to a class not previously held, a promotional register, or from the inter-system employment register shall serve a trial service period of six months. The trial service period will provide the appointing authority with the opportunity to observe the employee's work and to train and aid the employee in adjustment to the position, and to revert such an employee whose work performance fails to meet required standards. Reversions shall be under the provisions of WAC 356-30-320.

(2) Employees who during their trial service period go on leave without pay or shared leave shall have their trial service period extended by the number of calendar days they are on leave without pay or shared leave, including any intervening nonworking days.

(3) Employees shall have their trial service period extended by the number of calendar days in excess of 30 in which the employee is not at work, including any intervening nonwork days, if:

(a) Work is missed due to sick leave, vacation leave, military training leave, or miscellaneous leave; or

(b) Work is missed by employees of the departments of social and health services, corrections or veterans affairs due to an assault that occurred on the job and who are receiving compensation in an amount equal to full pay, as provided in chapters 72.01 and 72.09 RCW; or

(c) Work is missed due to any combination of leave identified in (3)(a) and (b) of this section which when added together exceed 30 calendar days.

(4) Work missed during the trial service period due to holidays shall be counted as part of the required trial service period.

(5) When an employee accepts a temporary appointment to a higher class in the same series in the same work unit while serving in a trial service period, the trial service period shall continue for the lower class.

(6) When an employee is appointed to a higher class while serving in a trial service period, the trial service period for the lower class and the new trial service period for the higher class shall overlap provided that the higher and lower classes are in the same or a closely related field. The employee shall complete the terms of the original trial service period and be given permanent status in the lower class. Such employees will also be granted the rights normally accruing to trial service for the remainder of the trial service period in the higher class.

AMENDATORY SECTION (Amending WSR 99-01-052, filed 12/10/98, effective 1/11/99)

WAC 356-30-260 Probationary period—Provisions

—Status of employee. (1) Employees who receive appointments to permanent positions from the open competitive register and the reemployment register shall serve a probationary period of six to twelve months as determined by the board. Employees appointed from the open competitive or promo-

tional register prior to completing their probationary period shall start a new probationary period, except as provided in 356-30-280(2). The board shall designate a probationary period of six months for all positions in a class unless they determine that job requirements of the class require a longer period (up to twelve months) to provide adequate training and/or evaluation. The board shall apply the following criteria for approving probationary periods of longer than six months:

(a) The work of the majority of the positions in the class is of such a nature that performance of the full range of duties cannot be properly evaluated within six months after an appointment.

or

(b) Work of the class is cyclical in nature and the workload cycle cannot be completed within six months after an appointment.

or

(c) Work is of such a nature that extended formalized training is required prior to the full assumption of duties.

All positions in a class shall have the same probationary period.

(2) All persons at time of appointment shall be notified in writing by the agency of the length of their probationary period. When the probationary period for a class is increased beyond six months, the increased probationary period shall apply only to persons appointed after the effective date of the change.

(3) The probationary period will provide the appointing authority with the opportunity to observe a new employee's work, to train and aid the new employee in adjustment to the position, and to terminate any employee whose work performance fails to meet the required standards.

(4) Employees who, during their probationary period, go on leave without pay or shared leave shall have their probationary period extended by the number of calendar days they are on leave without pay or shared leave including any intervening nonworking days.

(5) Employees shall have their probationary period extended by the number of calendar days in excess of 30 in which the employee is not at work including any intervening nonwork days if:

(a) Work is missed due to sick leave, vacation leave, military training leave, or miscellaneous leave; or

(b) Work is missed by employees of the departments of social and health services, corrections or veterans affairs due to an assault that occurred on the job and who are receiving compensation in an amount equal to full pay, as provided in chapters 72.01 and 72.09 RCW; or

(c) Work is missed due to any combination of leave identified in (5)(a) and (b) of this section which when added together exceeds 30 calendar days.

(6) Work missed during the probationary period due to holidays shall be counted as part of the required probationary period.

(7) When an employee accepts a temporary appointment to a higher class in the same series in the same work unit

PROPOSED

while serving in a probationary period, the probationary period shall continue for the lower class.

(8) Permanent appointment of a probationary employee shall be automatic unless the person is dismissed under provision of WAC 356-30-270.

(9) Veterans and their widows who have not remarried and are in probationary status will be granted seniority preference only within ranks of probationary employees and will not be granted preference within the ranks of the permanent employees until they acquire permanent status.

**PROPOSED RULES
DEPARTMENT OF
FINANCIAL INSTITUTIONS**

[Filed June 6, 2001, 8:19 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-17-019.

Title of Rule: Registration of investment advisers and investment adviser representatives—Investment adviser registration depository (IARD).

Purpose: Revisions to chapter 460-24A WAC to implement mandatory electronic filing for investment advisers and investment adviser representatives using IARD, to make technical corrections, and to make other amendments to the chapter to promote uniformity.

Other Identifying Information: Chapter 460-24A WAC.

Statutory Authority for Adoption: RCW 21.20.450, [21.20].050, [21.20].100.

Statute Being Implemented: Chapter 21.20 RCW.

Summary: Proposed revisions to chapter 460-24A WAC would implement mandatory electronic filing for investment advisers and investment adviser representatives using IARD, make technical corrections to various sections, and to make other amendments to the chapter to promote uniformity.

Reasons Supporting Proposal: In 1996, congress passed the National Securities Markets Improvement Act (NSMIA). NSMIA bifurcated jurisdiction over investment advisers between the states and the federal Securities and Exchange Commission with larger advisers generally subject to federal jurisdiction and smaller firms under state jurisdiction. In addition, Section 306 of NSMIA directed the Securities and Exchange Commission (SEC) to establish and maintain "a

readily accessible telephonic or other electronic process to receive inquiries regarding disciplinary actions and proceedings involving investment advisers and persons associated with investment advisers."

In response, the SEC and the North American Securities Administrators Association (NASAA), in an effort to more efficiently and effectively regulate investment advisers and investment adviser representatives, developed the Investment Adviser Registration Depository (IARD). IARD will be operated by the NASD Regulation, Inc. (NASDR), the same firm that administers the Central Registration Depository (CRD) by which securities broker-dealers and their representatives have electronically registered with the SEC and the states for many years. In conjunction with the development of IARD, the SEC amended its rules to require all federal investment advisers to register electronically by April 30, 2001. It also amended Forms ADV and ADV-W, which are also used by state-registered advisers.

NASAA has developed model rules for the state adoption of IARD. As discussed below the IARD rules that are being proposed are designed to adopt these model rules. The anticipated benefits of IARD include the following:

1. The IARD will be an Internet-based system that advisers will access through computers in their offices without the need for specialized hardware or software. An adviser will be able to use the system to apply, amend and/or withdraw its registration.

2. The IARD will contain a number of features designed to make it easy for persons to complete Form ADV, even if they are unfamiliar with the form. The form will be completed on-line and will include a glossary and a help function. The system will not allow the submission of an incomplete form and will check for inconsistent information. The system, however, will allow the user to save a draft version of the form to allow the user to fill out the form over several sessions.

3. For firms registered as both broker-dealers and investment advisers, the IARD and CRD systems will be linked so that responses common to both IARD and CRD need be entered only once.

4. Current information submitted to the IARD by advisers will be available to the public through the IARD web site without charge. Interested persons will be able to search the database to retrieve information, including disciplinary records, about advisory firms and their representatives. Similar features are offered by CRD with respect to broker-dealers and securities salespersons, which allow investors to investigate these financial professionals before investing. IARD will bring these investor protection tools to investment adviser clients.

Filing Fees. NASDR is permitted to charge reasonable fees to cover system costs for IARD. The current IARD fee schedule for state registered advisers and their representatives is as follows:

1. Investment Adviser:
 - (a) Initial Filing — \$150
 - (b) Annual Renewal — \$100

2. Investment Adviser Representative (It is anticipated that IARD will not accommodate Investment Adviser Representatives until sometime in 2001):

- (a) Initial Filing — \$45
- (b) Annual Renewal — \$45
- (c) Transfer — \$45

These fees would be paid directly to IARD and would not be remitted to the Securities Division. The licensing fees required by the Securities Act would also be paid through IARD for the benefit of the state. Thus, an adviser filing its annual renewal would owe \$175 — \$75 for the licensing renewal fee due the Washington State Treasurer and \$100 for the IARD filing fee. All fees would be automatically calculated by IARD.

NASDR has agreed to waive the 2002 renewal fee of \$100 for state advisers that transition to IARD during 2001. Thus an IA transitioning to IARD in 2001 will pay the initial filing fee \$150, but will not have to pay further IARD fees until it renews for calendar year 2003 in late 2002.

Name of Agency Personnel Responsible for Drafting: William M. Beatty, 210 11th Avenue S.W., Olympia, WA 98504, (360) 902-8760; Implementation: John L. Bley, 210 11th Avenue S.W., Olympia, WA 98504, (360) 902-8760; and Enforcement: Deborah R. Bortner, 210 11th Avenue S.W., Olympia, WA 98504, (360) 902-8760.

Name of Proponent: Department of Financial Institutions, Securities Division, governmental.

Rule is necessary because of federal law, Section 306, National Securities Markets Improvement Act of 1996 (NSMIA).

Explanation of Rule, its Purpose, and Anticipated Effects: WAC 460-24A-020 Investment adviser representatives employed by federal covered advisers: This new section, which is based on NASAA Model Rule 401g2-1, would serve to clarify that a solicitor associated with a federal covered adviser and having a place of business in Washington must register as an investment adviser representative in Washington unless the solicitor is "supervised person" under the Investment Advisers Act of 1940. RCW 21.20.005(14) already defines "investment adviser representative" to include solicitors. This section merely emphasizes that solicitors that are not supervised persons of federal covered advisers, and therefore not preempted from state investment adviser representative (IAR) registration, must register as IARs if they have places of business in Washington.

WAC 460-24A-047 Electronic filing with designated entity: This new section would designate IARD as the entity to receive and store filings made by investments advisers (IAs) and investment adviser representatives (IARs). Subsection (2) mandates electronic filing through IARD except as otherwise provided (see the hardship exemptions in subsection (4)). Subsection (3) addresses the evolving nature of IARD. IARD currently accepts filings from IAs only. The system is expected to accommodate IAR filing beginning sometime in 2002. Similarly, currently only Part 1 of Form ADV is filed electronically. Part 2 must be manually filed with the division until such time as IARD accepts Part 2. Subsection (3) establishes the notice that the division must provide to registrants before mandating electronic filing of documents or fees that are not currently accepted by IARD.

PROPOSED

Subsection (4) provides temporary and continuing hardship exemptions from the electronic filing requirements. A temporary exemption will be granted to an IA that experiences unexpected technical difficulties that prevent the submission of an electronic filing to IARD. A paper filing is made, followed by the appropriate electronic filing within seven days. A continuing hardship exemption may be granted if the IA is able to demonstrate that electronic filing is prohibitively burdensome.

WAC 460-24A-050 Investment adviser and investment adviser representative registration and examinations: Consistent with proposed WAC 460-24A-047, subsection (5) would be amended to direct that filings be made with IARD as opposed to the division.

WAC 460-24A-055 Effective date of license: This section would be amended to replace the term "salesperson" with "representative." In addition, the discussion of delinquent renewals is stricken from this section and moved to WAC 460-24A-057.

WAC 460-24A-057 Renewal of investment adviser and investment adviser representative registration—Delinquency fees: Subsection (1) of this new section would set forth the renewal requirements, which would be identical to the current requirements, except for the requirement to file electronically. Subsections (2) and (3) contain the discussion of delinquent renewals formerly found in WAC 460-24A-055.

WAC 460-24A-058 Completion of filing: This new section would provide that an application is not considered "filed" until the required fee and submissions have been received by IARD.

WAC 460-24A-060 Financial statements required on investment advisers: This section would be amended to use the term "balance sheet" as opposed to the more open-ended language that currently appears in this section. The amendment further specifies that the balance sheet be prepared according to generally accepted accounting principles (GAAP). The current language results in uncertainty concerning the type of financial statements to be filed.

WAC 460-24A-070 Notice filings for federal covered advisers: This new section would set forth the electronic notice filing requirements for federal covered advisers.

WAC 460-24A-080 Termination of investment adviser and investment adviser representative registration and federal covered adviser notice filing status: This new section would set forth the requirements for terminating a filing through IARD.

WAC 460-24A-105 Custody or possession of funds or securities of clients: Subsection (5) would be amended to substitute the term "director" for "administrator" consistent with the Securities Act, other sections in this chapter, and other chapters in Title 460 WAC.

WAC 460-24A-145 Investment adviser brochure rule: This section would be amended to better conform to the NASAA model brochure rule and the SEC's brochure rule found at 17 C.F.R. 275.204-3. Subsections (1) through (3) contain primarily technical amendments. Subsection (4) discusses an IA's duty to limited partners, LLC members and trust beneficiaries. Subsection (5) contains the requirements for wrap fee program brochures and is based on the SEC brochure rule. Subsection (6) clarifies the IA's duty to deliver

updated disclosure materials. Subsection (7) provides further elaboration on the omission of inapplicable information. Subsection (8) reinforces that compliance with the brochure rule does not relieve the adviser any other disclosure obligations that might be required under state and federal law. Subsection (9) deletes the definition of "investment company contact" since IAs to investment companies are federal covered advisers and not subject to this rule. Definitions of "sponsor" and "wrap fee program" are added.

WAC 460-24A-170 Minimum financial requirements for investment advisers: This section would be amended to adopt the provisions of NASAA Model Rule 202(d)-1. Subsection (1) of the new rule substitutes a simple net worth test for the more complicated net capital test used in the current rule. As before, only IAs with custody or discretion are subject to this subsection. An IA that has custody of client funds or securities would be required to maintain a minimum net worth of \$35,000, while an IA with discretionary authority, but not custody, would be required to maintain a minimum net worth of \$10,000. Under Subsection (2), a bond may be used to make up for deficiencies in the net worth requirement.

WAC 460-24A-200 Books and records maintained by investment advisers: This section, which has not been amended in over twenty-five years, would be amended to adopt the provisions of the NASAA model books and records rule (Model Rule 203(a)-1), which is in turn based on the SEC books and records rule (17 C.F.R. 275.204-2). Prior to the passage of NSMIA, the division relied on the SEC books and records rule since all investment advisers were subject to both state and federal jurisdiction. With the advent of divided jurisdiction under NSMIA, it is necessary to update this section.

WAC 460-24A-205 Notice of changes by investment advisers and investment adviser representatives: This section would be amended to reflect that filings would be made through IARD as opposed to directly with the division.

WAC 460-24A-210 Notice of complaint: This section would be amended to substitute the term "director" for "administrator" consistent with the Securities Act, other sections in this chapter, and other chapters in Title 460 WAC.

Proposal Changes the Following Existing Rules: See above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Since the proposal imposes no more than minor costs on investment advisers, a small business economic impact statement is not required pursuant to RCW 19.85.030(1). During the last quarter of 2000, resident state-registered investment advisers (IAs) were surveyed to determine whether they had the computer hardware and software required by the IARD system and the impact of the additional costs that would be imposed by IARD. One hundred ninety-five responses were received from the approximately 300 resident state-registered investment advisers. All respondents are small businesses as defined by RCW 19.85.020(1). Of the one hundred eighty-nine IAs responding to the question concerning the required computer hardware and software, over 95% stated that they already had the hardware and software required by IARD. When asked to rate that impact of the additional costs

imposed by IARD, approximately 66% of the one hundred seventy-six IAs responding characterized the additional costs as "insignificant" or "minor." Subsequent to the survey, the states participating in IARD negotiated with the NASD, the administrator of the IARD system, to reduce the impact on IAs by eliminating IARD renewal fees for 2002 for IA's transitioning onto IARD during 2001. Thus, an IA transitioning to IARD in 2001 will pay the \$150 initial filing fee, but will pay no further IARD fees until it renews for calendar year 2003.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. The Department of Financial Institutions is not one of the agencies listed in section 201.

Hearing Location: Department of Financial Institutions, Securities Division, Executive Conference Room, 210 11th Avenue S.W., Suite 300, Olympia, WA 98504, on July 11, 2001, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Darlene Christianson by July 6, 2001, TDD (360) 664-8126, or (360) 902-8760.

Submit Written Comments to: William M. Beatty, Securities Division, P.O. Box 9033, Olympia, WA 98507-9033, fax (360) 704-6923, e-mail bbeatty@dfi.wa.gov, by July 10, 2001.

Date of Intended Adoption: July 12, 2001.

May 29, 2001

John L. Bley
Director

NEW SECTION

WAC 460-24A-020 Investment adviser representatives employed by federal covered advisers. An individual employed by or associated with a federal covered adviser is an "investment adviser representative," pursuant to RCW 21.20.005(14), if the representative has a "place of business" in this state, as that term is defined under section 203A of the Investment Advisers Act of 1940, and:

(1) Is an "investment adviser representative" pursuant to the Investment Advisers Act of 1940; or

(2) Solicits, offers, or negotiates for the sale of or sells investment advisory services on behalf of a federal covered adviser, but is not a "supervised person" as that term is defined under the Investment Advisers Act of 1940.

NEW SECTION

WAC 460-24A-047 Electronic filing with designated entity. (1) Designation. Pursuant to RCW 21.20.050, the director designates the Investment Adviser Registration Depository operated by the National Association of Securities Dealers (IARD) to receive and store filings and collect related fees from investment advisers and investment adviser representatives on behalf of the director.

(2) Use of IARD. Unless otherwise provided, all investment adviser and investment adviser representative applications, amendments, reports, notices, related filings, and fees required to be filed with the director pursuant to the rules promulgated under this chapter, shall be filed electronically with

and transmitted to IARD. The following additional conditions relate to such electronic filings:

(a) Electronic signature. When a signature or signatures are required by the particular instructions of any filing to be made through IARD, a duly authorized officer of the applicant or the applicant him or herself, as required, shall affix his or her electronic signature to the filing by typing his or her name in the appropriate fields and submitting the filing to Web IARD. Submission of a filing in this manner shall constitute irrefutable evidence of legal signature by any individuals whose names are typed on the filing.

(b) When filed. Solely for purposes of a filing made through IARD, a document is considered filed with the director when all fees are received and the filing is accepted by IARD on behalf of the state.

(3) Electronic filing. Notwithstanding subsection (2) of this section, the electronic filing of any particular document and the collection of related processing fees shall not be required until such time as IARD provides for receipt of such filings and fees and thirty days' notice is provided by the director. Any documents required to be filed with the director that are not permitted to be filed with or cannot be accepted by IARD shall be filed in paper directly with the director.

(4) Hardship exemptions. Notwithstanding subsection (2) of this section, electronic filing is not required under the following circumstances:

(a) Temporary hardship exemption.

(i) Investment advisers registered or required to be registered under RCW 21.20.040, who experience unanticipated technical difficulties that prevent submission of an electronic filing to IARD, may request a temporary hardship exemption from the requirements to file electronically.

(ii) To request a temporary hardship exemption, the investment adviser must:

(A) File Form ADV-H in paper format with the appropriate regulatory authority in the state where the investment adviser's principal place of business is located, no later than one business day after the filing, that is the subject of the Form ADV-H, was due. If the state where the investment adviser's principal place of business is located has not mandated the use of IARD, the investment adviser should file the Form ADV-H with appropriate regulatory authority in the first state that mandates the use of IARD by the investment adviser; and

(B) Submit the filing that is the subject of the Form ADV-H in electronic format to IARD no later than seven business days after the filing was due.

(iii) Effective date—Upon filing. The temporary hardship exemption will be deemed effective by the director upon receipt of the complete Form ADV-H by appropriate regulatory authority noted in (a)(ii)(A) of this subsection. Multiple temporary hardship exemption requests within the same calendar year may be disallowed by the director.

(b) Continuing hardship exemption.

(i) Criteria for exemption. A continuing hardship exemption will be granted only if the investment adviser is able to demonstrate that the electronic filing requirements of this section are prohibitively burdensome.

PROPOSED

(ii) To apply for a continuing hardship exemption, the investment adviser must:

(A) File Form ADV-H in paper format with the director at least twenty business days before a filing is due; and

(B) If a filing is due to more than one state, the Form ADV-H must be filed with the appropriate regulatory authority in the state where the investment adviser's principal place of business is located. If the state where the investment adviser's principal place of business is located has not mandated the use of IARD, the investment adviser should file the Form ADV-H with appropriate regulatory authority in the first state that mandates the use of IARD by the investment adviser. Any applications received by the director will be granted or denied within ten business days after the filing of Form ADV-H.

(iii) Effective date—Upon approval. The exemption is effective upon approval by the director. The time period of the exemption may be no longer than one year after the date on which the Form ADV-H is filed. If the director approves the application, the investment adviser must, no later than five business days after the exemption approval date, submit filings in paper format (along with the appropriate processing fees) for the period of time for which the exemption is granted.

(c) Recognition of exemption. The decision to grant or deny a request for a hardship exemption will be made by the appropriate regulatory authority in the state where the investment adviser's principal place of business is located. If the state where the investment adviser's principal place of business is located has not mandated the use of IARD, the decision to grant or deny a request for a hardship exemption will be made by appropriate regulatory authority in the first state that mandates the use of IARD by the investment adviser. The decision will be followed by the director if the investment adviser is registered in this state.

AMENDATORY SECTION (Amending WSR 00-01-001, filed 12/1/99, effective 1/1/00)

WAC 460-24A-050 Investment adviser and investment adviser representative registration and examinations.

(1) Examination requirements. A person applying to be registered as an investment adviser or investment adviser representative under RCW 21.20.040 shall provide the director with proof that he or she has obtained a passing score on one of the following examinations:

(a) The Uniform Investment Adviser Law Examination (Series 65 examination); or

(b) The General Securities Representative Examination (Series 7 examination) and the Uniform Combined State Law Examination (Series 66 examination).

(2) Grandfathering. (a) Any individual who is registered as an investment adviser or investment adviser representative in any jurisdiction in the United States on the effective date of this amended rule shall not be required to satisfy the examination requirements for initial or continued registration, provided that the director may require additional examinations for any individual found to have violated the Securities Act of

Washington, Chapter 21.20 RCW, or the Uniform Securities Act. (b) An individual who has not been registered in any jurisdiction for a period of two (2) years shall be required to comply with the examination requirements of subsection (1).

(3) Waivers. The examination requirements shall not apply to an individual who currently holds one of the following professional designations:

(a) Certified Financial Planner (CFP) issued by the Certified Financial Planner Board of Standards, Inc.;

(b) Chartered Financial Consultant (ChFC) awarded by The American College, Bryn Mawr, Pennsylvania;

(c) Personal Financial Specialist (PFS) administered by the American Institute of Certified Public Accountants;

(d) Chartered Financial Analyst (CFA) granted by the Association for Investment Management and Research;

(e) Chartered Investment Counselor (CIC) granted by the Investment Counsel Association of America; or

(f) Such other professional designation as the director may by order recognize.

(4) If the person applying for registration as an investment adviser is any entity other than a sole proprietor, an officer, general partner, managing member, or other equivalent person of authority in the entity may take the examination on behalf of the entity. If the person taking the examination ceases to be a person of authority in the entity, then the investment adviser must notify the director of a substitute person of authority who has passed the examinations required in subsection (1) of this section within two months in order to maintain the investment adviser license.

(5) Registration requirements.

(a) A person applying (~~(to be registered)~~) for initial registration as an investment adviser shall (~~(submit)~~) file a completed Form ADV with IARD along with the following:

(i) Proof of complying with the examination or waiver requirements specified in subsections (1) through ~~((5))~~ (4) above;

(ii) (~~(a completed Form ADV; (iii))~~) A financial statement demonstrating compliance with the requirements of WAC 460-24A-170, if necessary;

~~((iv))~~ (iii) The application fee specified in RCW 21.20.340; and

~~((v))~~ (iv) Such other documents as the director may require.

(b) A person applying (~~(to be registered)~~) for initial registration as an investment adviser representative shall (~~(submit)~~) file a completed Form U-4 with IARD along with the following:

(i) Proof of complying with the examination or waiver requirements specified in subsections (1) through ~~((5))~~ (4) above;

(ii) (~~(a completed Form U-4; (iii))~~) The application fee specified in RCW 21.20.340; and

~~((iv))~~ (iii) Such other documents as the director may require.

AMENDATORY SECTION (Amending WSR 95-16-026, filed 7/21/95, effective 8/21/95)

WAC 460-24A-055 Effective date of license. All investment adviser and investment adviser (~~(salesperson)~~)

~~representative licenses shall be effective until December 31 of the year of issuance at which time the license shall be renewed, or if not renewed, shall be deemed delinquent. ((For any renewal application postmarked after the expiration date but received by the director on or before March 1, the licensee shall pay a delinquency fee in addition to the renewal fee. No renewal applications will be accepted after that time. The delinquency fee for investment advisers shall be one hundred dollars. The delinquency fee for investment adviser salespersons shall be fifty dollars.))~~

NEW SECTION

WAC 460-24A-057 Renewal of investment adviser and investment adviser representative registration—Delinquency fees. (1) Registration as an investment adviser or investment adviser representative may be renewed by filing the following with IARD:

- (a) Any renewal application required by IARD;
- (b) The renewal fee required by RCW 21.20.340; and
- (c) An electronically submitted Form U-4, unless:

(i) The Form U-4 has been previously submitted to IARD electronically; or

(ii) The investment adviser, filing on behalf of the investment adviser representative, has been granted a hardship exemption under WAC 460-24A-047(4).

(2) For any renewal application received by IARD after the expiration date set forth in WAC 460-24A-055, but on or before March 1 of the following year, the licensee shall pay a delinquency fee in addition to the renewal fee. The delinquency fee for investment advisers shall be one hundred dollars. The delinquency fee for investment adviser representatives shall be fifty dollars.

(3) No renewal applications will be accepted after March 1. An investment adviser or investment adviser representative may apply for reregistration by complying with WAC 460-24A-050.

NEW SECTION

WAC 460-24A-058 Completion of filing. An application for registration or renewal by an investment adviser or investment adviser representative is not considered filed for purposes of RCW 21.20.050 until the required fee and all required submissions have been received by IARD.

AMENDATORY SECTION (Amending Order SDO-128-85, filed 8/1/85)

WAC 460-24A-060 Financial statements required on investment advisers. Every investment adviser shall file with the director a ~~((statement of financial condition in such detail as will disclose generally the nature and amount of assets and liabilities and the net worth of such investment adviser as of a date within ninety days prior to the date on which it is filed. Such reports))~~ balance sheet as of the end of the investment adviser's fiscal year. The balance sheet shall be prepared in accordance with generally accepted accounting principles (GAAP) unless the director, on a case-by-case basis, allows another basis of presentation. The balance sheet

shall be filed annually with the director not more than ninety days after the end of the investment adviser's fiscal year-end (unless extension of time is granted by the director).

NEW SECTION

WAC 460-24A-070 Notice filings for federal covered advisers. (1) Notice filing. The notice filing required of a federal covered adviser pursuant to RCW 21.20.050 shall be filed with IARD on a completed Form ADV. A notice filing of a federal covered adviser shall be deemed filed when the fee required by RCW 21.20.340 and the Form ADV are filed with and accepted by IARD on behalf of the state.

(2) Portions of Form ADV not yet accepted by IARD. Until IARD provides for the filing of Part 2 of Form ADV, Part 2 will be deemed filed if it is provided to the director within five days of the director's request. The federal covered adviser is not required to submit Part 2 of the Form ADV to the director unless requested.

(3) Renewal. The annual renewal of the notice filing for a federal covered adviser shall be filed with IARD. The renewal of the notice filing for a federal covered adviser shall be deemed filed when the fee required by RCW 21.20.340 is filed with and accepted by IARD on behalf of the state.

(4) Updates and amendments. A federal covered adviser must file any amendments to its Form ADV with IARD in accordance with the instructions in the Form ADV.

NEW SECTION

WAC 460-24A-080 Termination of investment adviser and investment adviser representative registration and federal covered adviser notice filing status. (1) Investment advisers and federal covered advisers. An investment adviser or federal covered adviser may terminate its registration or notice filing status by complying with the instructions to Form ADV-W and filing a completed Form ADV-W with IARD.

(2) Investment adviser representative. The termination of registration as an investment adviser representative pursuant to RCW 21.20.080 shall be reported by complying with the instructions to Form U-5 and filing a completed Form U-5 with IARD.

AMENDATORY SECTION (Amending Order 304, filed 2/28/75, effective 4/1/75)

WAC 460-24A-105 Custody or possession of funds or securities of clients. It shall constitute an "act, practice, or course of business" which operates or would operate as a fraud within the meaning of RCW 21.20.020 for any investment adviser who has custody or possession of any funds or securities in which any client has any beneficial interest to do any act or take any action, directly or indirectly, with respect to any such funds or securities, unless:

(1) All such securities of each such client are segregated, marked to identify the particular client who has the beneficial interest therein, and held in safekeeping in someplace reasonably free from risk of destruction or other loss; and

PROPOSED

(2)(a) All such funds of such clients are deposited in one or more bank accounts which contain only clients' funds,

(b) Such account or accounts are maintained in the name of the investment adviser as agent or trustee for such clients, and

(c) The investment adviser maintains a separate record for each such account which shows the name and address of the bank where such account is maintained, the dates and amounts of deposits in and withdrawals from such account, and the exact amount of each client's beneficial interest in such account; and

(3) Such investment adviser, immediately after accepting custody or possession of such funds or securities from any client, notifies such client in writing of the place and manner in which such funds and securities will be maintained, and thereafter, if and when there is any change in the place or manner in which such funds or securities are being maintained, gives each such client written notice thereof; and

(4) Such investment adviser sends to each client, not less frequently than once every three months, an itemized statement showing the funds and securities in the custody or possession of the investment adviser at the end of such period and all debits, credits and transactions in such client's account during such period; and

(5) All such funds and securities of clients are verified by actual examination at least once during each calendar year by an independent certified public accountant or public accountant at a time which shall be chosen by such accountant without prior notice to the investment adviser. A certificate of such accountant stating that he has made an examination of such funds and securities, and describing the nature and extent of such examination shall be filed with the ((~~adminis-~~trator)) director promptly after each such examination.

AMENDATORY SECTION (Amending WSR 99-03-052, filed 1/15/99, effective 2/15/99)

WAC 460-24A-145 Investment adviser brochure rule. (1) General requirements. Unless otherwise provided in this rule, an investment adviser, registered or required to be registered pursuant to RCW 21.20.040 shall, in accordance with the provisions of this section, ((~~furnish~~)) offer and deliver to each advisory client and prospective advisory client ((~~with a~~) written disclosure ((~~statement which may be a copy of Part II of its Form ADV or written documents~~)) materials containing at least the information then so required by Part II of Form ADV ((~~or~~)) and such other information as the ((~~administrator~~)) director may require. If a federal covered adviser may utilize a copy of Part II of its Form ADV to provide the disclosures required pursuant to 17 CFR 275.204-3, then an investment adviser may use a copy of Part II of its ADV to provide the disclosures required by this section.

(2) Delivery.

(a) An investment adviser, except as provided in ((~~sub-~~paragraph)) (b) of this ((~~paragraph~~)) subsection, shall deliver the ((~~statement~~)) materials required by this section to an advisory client or prospective advisory client (i) not less than 48 hours prior to entering into any investment advisory contract with such client or prospective client, or (ii) at the time of entering into any such contract, if the advisory client has a

right to terminate the contract without penalty within five business days after entering into the contract.

(b) Delivery of the ((~~statement~~)) materials required by ((~~subparagraph~~)) (a) of this subsection need not be made in connection with entering into ((~~an investment company contract or (ii)~~)) a contract for impersonal advisory services.

(3) Offer to deliver.

(a) An investment adviser, except as provided in ((~~subdi-~~vision)) (b) of this subsection, annually shall, without charge, deliver or offer in writing to deliver upon written request to each of its advisory clients the ((~~statement~~)) materials required by this section.

(b) The delivery or offer required by ((~~subparagraph~~)) (a) of this subsection need not be made to advisory clients receiving advisory services solely pursuant to ((~~an invest-~~ment company contract or (ii))) a contract for impersonal advisory services requiring a payment of less than \$200.00.

(c) With respect to an advisory client entering into a contract or receiving advisory services pursuant to a contract for impersonal advisory services which requires a payment of \$200.00 or more, an offer of the type specified in ((~~subpara-~~graph)) (a) of this subsection shall also be made at the time of entering into an advisory contract.

(d) Any ((~~statement~~)) materials requested in writing by an advisory client pursuant to an offer required by this subsection must be mailed or delivered within seven days of the receipt of the request.

(4) Delivery to limited partners. If the investment adviser is the general partner of a limited partnership, the manager of a limited liability company, or the trustee of a trust, then, for purposes of this section, the investment adviser must treat each of the partnership's limited partners, the company's members, or the trust's beneficial owners, as a client. For purposes of this section, a limited liability partnership or limited liability limited partnership is a "limited partnership."

(5) Wrap fee program brochures.

(a) If the investment adviser is a sponsor or a wrap fee program, then the materials required to be delivered, by subsection (2) of this section, to a client or prospective client of the wrap fee program, must contain all information required by Form ADV. Any additional information must be limited to information applicable to wrap fee programs that the investment adviser sponsors.

(b) The investment adviser does not have to offer or deliver wrap fee information if another sponsor of the wrap fee program offers or delivers to the client or prospective client of the wrap fee program wrap fee program information containing all the information the investment adviser's wrap fee program brochure must contain.

(6) Delivery of updates and amendments. When the disclosure materials required to be delivered pursuant to subsection (2) of this section become materially inaccurate, the investment adviser must amend and promptly deliver to its clients amendments to such disclosure materials. The instructions to Part 2 of Form ADV contain updating and delivery instructions that the investment adviser must follow. An amendment will be considered to be delivered promptly if the amendment is delivered within thirty days of the event that requires the filing of the amendment.

(7) Omission of inapplicable information. If an investment adviser renders substantially different types of investment advisory services to different advisory clients, the investment adviser may provide them with different disclosure materials, provided that each client receives all applicable information about services and fees. The disclosure delivered to a client may omit any information required by Part II of Form ADV ((may be omitted from the statement furnished to an advisory client or prospective advisory client)) if such information is applicable only to a type of investment advisory service or fee which is not rendered or charged, or proposed to be rendered or charged, to that client or prospective client.

~~((5))~~ (8) Other disclosure((s)) obligations. Nothing in this ~~((rule))~~ section shall relieve any investment adviser from any obligation ~~((pursuant to any provision of))~~ to disclose any information to its advisory clients or prospective advisory clients not specifically required by this rule under chapter 21.20 RCW ~~((or))~~, the rules and regulations thereunder, or any other federal or state law ~~((to disclose any information to its advisory clients or prospective advisory clients not specifically required by this rule))~~.

~~((6))~~ (9) Definitions. For the purposes of this rule:

(a) "Contract for impersonal advisory services" means any contract relating solely to the provision of investment advisory services (i) by means of written material or oral statements which do not purport to meet the objectives or needs of specific individuals or accounts; (ii) through the issuance of statistical information containing no expression of opinion as to the investment merits of a particular security; or (iii) any combination of the foregoing services.

(b) "Entering into," in reference to an investment advisory contract, does not include an extension or renewal without material change of any such contract which is in effect immediately prior to such extension or renewal.

(c) ~~((("Investment company contract" means a contract with an investment company registered under the Investment Company Act of 1940 which meets the requirements of section 15(c) of that act))~~ "Sponsor" of a wrap fee program means an investment adviser that is compensated under a wrap fee program for sponsoring, organizing, or administering the program, or for selecting, or providing advice to clients regarding the selection of other investment advisers in the program.

(d) "Wrap fee program" means an advisory program under which a specified fee or fees, not based directly upon transactions in a client's account, is charged for investment advisory services (which may include portfolio management or advice concerning the selection of other investment advisers) and the execution of client transactions.

AMENDATORY SECTION (Amending WSR 97-16-050, filed 7/31/97, effective 8/31/97)

WAC 460-24A-170 ((Capital)) Minimum financial requirements for investment advisers. (1) ~~((Any investment adviser who takes any power of attorney from any investment advisory client to execute transactions or has custody of any or [of] his investment advisory clients' securities or funds is subject to the minimum capital requirement and~~

~~the requirement regarding the ratio of net capital to aggregate indebtedness, in accordance with WAC 460-21B-030 of these rules.~~

~~((2) The administrator may, upon written application, exempt from the provisions of this section, either unconditionally or on specified terms and conditions, any investment adviser who satisfies the administrator that, because of the special nature of his business, his financial position, and the safeguards he has established for the protection of customers' funds and securities, it is not necessary in the public interest or for the protection of investors to subject the particular investment adviser to the provisions of this section))~~ An investment adviser registered or required to be registered under RCW 21.20.040, who has custody of client funds or securities, shall maintain at all times a minimum net worth of \$35,000. An investment adviser registered or required to be registered under RCW 21.20.040, who has discretionary authority over client funds or securities, shall maintain at all times a minimum net worth of \$10,000.

(2) An investment adviser registered or required to be registered under RCW 21.20.040 who has custody or discretion of client funds or securities, but does not meet the minimum net worth requirements in subsection (1) of this section shall be bonded in the amount of the net worth deficiency rounded up to the nearest \$5,000. Any bond required by this section shall be in the form determined by the director, issued by a company qualified to do business in this state, and shall be subject to the claim of all clients of the investment adviser regardless of the client's state of residence.

(3) An investment adviser registered or required to be registered under RCW 21.20.040, who accepts prepayment of more than \$500 per client and six or more months in advance, shall maintain at all times a positive net worth.

(4) Unless otherwise exempted, as a condition of the right to transact business in this state, every investment adviser registered or required to be registered under RCW 21.20.040 shall, by the close of business on the next business day, notify the director if the investment adviser's net worth is less than the minimum required. After transmitting such notice, each investment adviser shall file, by the close of business on the next business day, a report with the director of its financial condition, including the following:

(a) A trial balance of all ledger accounts;

(b) A statement of all client funds or securities which are not segregated;

(c) A computation of the aggregate amount of client ledger debit balances; and

(d) A statement as to the number of client accounts.

(5) For purposes of this section, the term "net worth" shall mean an excess of assets over liabilities, as determined by generally accepted accounting principles, but shall not include as assets: Prepaid expenses (except as to items properly classified as assets under generally accepted accounting principles), deferred charges, goodwill, franchise rights, organizational expenses, patents, copyrights, marketing rights, unamortized debt discount and expense, all other assets of intangible nature, home furnishings, automobile(s), and any other personal items not readily marketable in the case of an individual; advances or loans to stockholders and

PROPOSED

officers in the case of a corporation; and advances or loans to partners in the case of a partnership.

(6) For purposes of this section, a person will be deemed to have custody if said person directly or indirectly holds client funds or securities, has any authority to obtain possession of them, or has the ability to appropriate them. An adviser shall not be deemed to have constructive custody of a client's cash or securities, if such possession is for the sole purpose of immediately forwarding such cash or securities to a third party at the request of the client.

(7) The director may require that a current appraisal be submitted in order to establish the worth of any asset.

(8) Every investment adviser that has its principal place of business in a state other than this state shall maintain only such minimum net worth as required by the state in which the investment adviser maintains its principal place of business, provided the investment adviser is licensed in that state and is in compliance with that state's minimum capital requirements.

AMENDATORY SECTION (Amending Order 304, filed 2/28/75, effective 4/1/75)

WAC 460-24A-200 Books and records to be maintained by investment advisers. (1) Every ~~((licensed))~~ investment adviser registered or required to be registered pursuant to RCW 21.20.040 shall make and keep true, accurate, and current the following books, ledgers, and records ~~((relating to his investment advisory business))~~:

(a) A journal or journals, including cash receipts and disbursements records, and any other records of original entry forming the basis of entries in any ledger.

(b) General and auxiliary ledgers (or other comparable records) reflecting asset, liability, reserve, capital, income and expense accounts.

(c) A memorandum of each order given by the investment adviser for the purchase or sale of any security, of any instruction received by the investment adviser from a client concerning the purchase, sale, receipt or delivery of a particular security, and of any modification or cancellation of any such order or instruction. ~~((Such))~~ The memoranda shall show the terms and conditions of the order, instruction, modification or cancellation; shall identify the person connected with the investment adviser who recommended the transaction to the client and the person who placed ~~((such))~~ the order; and shall show the account for which entered, the date of entry, and the bank or broker-dealer by or through whom executed where appropriate. Orders entered pursuant to the exercise of a power of attorney shall be so designated.

(d) All check books, bank statements, ~~((cancelled))~~ canceled checks and cash reconciliations of the investment adviser.

(e) All bills or statements (or copies thereof), paid or unpaid, relating to the business of the investment adviser ~~((as such))~~.

(f) All trial balances, financial statements, and internal audit working papers relating to the investment adviser's business ~~((of such))~~ as an investment adviser. For purposes of this subsection, "financial statements" shall mean a balance sheet prepared in accordance with generally accepted

accounting principles, and income statement, a cash flow statement, and a net worth computation, if applicable, as required by WAC 460-24A-170.

(g) Originals of all written communications received and copies of all written communications sent by ~~((such))~~ the investment adviser relating to (i) any recommendation made or proposed to be made and any advice given or proposed to be given, (ii) any receipt, disbursement or delivery of funds or securities, or (iii) the placing or execution of any order to purchase or sell any security: Provided, however, That the investment adviser shall not be required to keep any unsolicited market letters and other similar communications of general public distribution not prepared by or for the investment adviser: And provided, That if the investment adviser sends any notice, circular or other advertisement offering any report, analysis, publication or other investment advisory service to more than 10 persons, the investment adviser shall not be required to keep a record of the names and addresses of the persons to whom it was sent, except that if such notice, circular or advertisement is distributed to persons named on any list, the investment adviser shall retain with the copy of such notice, circular or advertisement a memorandum describing the list and the source thereof.

(h) A list or other record of all accounts in which the investment adviser is vested with any discretionary power ~~((of attorney))~~ with respect to the funds, securities or transactions of any client.

(i) A copy of all powers of attorney and other evidences of the granting of any discretionary authority by any client to the investment adviser ~~((, or copies thereof))~~.

(j) ~~((A))~~ A written copy of each agreement ~~((s or copies thereof))~~ entered into by the investment adviser with any client ~~((or))~~ and all other written agreements otherwise relating to the investment adviser's business ~~((of such))~~ as an investment adviser ~~((as such))~~.

(k) A file containing a copy of each notice, circular, advertisement, newspaper article, investment letter, bulletin or other communication ~~((recommending))~~, including by electronic media, that the investment advisers circulates or distributes, directly or indirectly, to two or more persons (other than persons connected with the investment adviser), and if such communication recommends the purchase or sale of a specific security ~~((, which the investment adviser circulates or distributed, directly or indirectly, to 10 or more persons (other than investment supervisory clients or persons connected with such investment adviser), and if such notice, circular, advertisement, newspaper article, investment letter, bulletin or other communication))~~ and does not state the reasons for ~~((such))~~ the recommendation, a memorandum of the investment adviser indicating the reasons ~~((therefor))~~ for the recommendation.

~~((2))~~ (1)(i) A record of every transaction in a security in which the investment adviser or any ~~((investment adviser salesman))~~ advisory representative (as hereinafter defined) of ~~((such))~~ the investment adviser has, or by reason of such transaction acquires, any direct or indirect beneficial ownership, except:

~~((+))~~ (A) Transactions effected in any account over which neither the investment adviser nor any ~~((investment~~

~~adviser-salesman~~) advisory representative of the investment adviser has any direct or indirect influence or control; and
 ((~~ii~~)) (B) Transactions in securities which are direct obligations of the United States.

((~~Such~~)) The record shall state the title and amount of the security involved; the date and nature of the transaction (i.e., purchase, sale or other acquisition or disposition); the price at which it was effected; and the name of the broker-dealer or bank with or through whom the transaction was effected.
 ((~~Such~~)) The record may also contain a statement declaring that the reporting or recording of any such transaction shall not be construed as an admission that the investment adviser or ((investment adviser-salesman)) advisory representative has any direct or indirect beneficial ownership in the security. A transaction shall be recorded not later than 10 days after the end of the calendar quarter in which the transaction was effected.

((ii)) For the purposes of this ((~~clause (2), the term "investment adviser-salesman"~~)) subsection (1), the following definitions will apply:

(A) "Advisory representative" shall mean any partner, officer or director of the investment adviser; any employee who ((~~makes any recommendation, who~~)) participates in any way in the determination of which recommendations shall be made, or whose functions or duties relate to the determination of which recommendation shall be made((;)); any employee who, in connection with his or her duties, obtains any information concerning which securities are being recommended prior to the effective dissemination of the recommendations; and any of the following persons ((~~in a control relationship to the investment adviser~~)) who obtain((s)) information concerning securities recommendations being made by ((~~such~~)) the investment adviser ((~~other than a regular client of such investment adviser~~)) prior to the effective dissemination of the recommendations:

(I) Any person in a control relationship to the investment adviser;

(II) Any affiliated person of a controlling person; and

(III) Any affiliated person of an affiliated person.

(B) "Control" shall mean the power to exercise a controlling influence over the management or policies of a company, unless such power is solely the result of an official position with such company. Any person who owns beneficially, either directly or through one or more controlled companies, more than 25 percent of the voting securities of a company shall be presumed to control such company.

((iii)) An investment adviser ((~~does not violate~~)) shall not be deemed to have violated the provisions of this ((~~clause (2))~~)) subsection (1) because of ((his)) the failure to record securities transactions of any ((investment adviser-salesman)) advisory representative if ((he)) the investment adviser establishes that ((he)) it instituted adequate procedures, and used reasonable diligence to obtain promptly, reports of all transactions required to be recorded.

((~~3~~)) (m)(i) Notwithstanding the provisions of (l) of this subsection, where the investment adviser is primarily engaged in a business or businesses other than advising investment advisory clients, a record must be maintained of every transaction in a security in which the investment adviser or any advisory representative (as hereinafter

defined) of the investment adviser has, or by reason of any transaction acquires, any direct or indirect beneficial ownership, except:

(A) Transactions effected in any account over which neither the investment adviser nor any advisory representative of the investment adviser has any direct or indirect influence or control; and

(B) Transactions in securities which are direct obligations of the United States.

The record shall state the title and amount of the security involved; the date and nature of the transaction (i.e., purchase, sale, or other acquisition or disposition); the price at which it was effected; and the name of the broker-dealer or bank with or through whom the transaction was effected. The record may also contain a statement declaring that the reporting or recording of any transaction shall not be construed as an admission that the investment adviser or advisory representative has any direct or indirect beneficial ownership in the security. A transaction shall be recorded not later than ten days after the end of the calendar quarter in which the transaction was effected.

((ii)) An investment adviser is "primarily engaged in a business or businesses other than advising investment advisory clients" when, for each of its most recent three fiscal years or for the period of time since organization, whichever is lesser, the investment adviser derived, on an unconsolidated basis, more than fifty percent of:

(A) Its total sales and revenues; and

(B) Its income (or loss) before income taxes and extraordinary items,

from such other business or businesses.

((iii)) For purposes of this subsection (1)(m) the following definitions will apply:

(A) "Advisory representative," when used in connection with a company primarily engaged in a business or businesses other than advising investment advisory clients, shall mean any partner, officer, director, or employee of the investment adviser who participates in any way in the determination of which recommendation shall be made, or whose functions or duties relate to the determination of which securities are being recommended prior to the effective dissemination of the recommendations; and any of the following persons who obtain information concerning securities recommendations being made by the investment adviser prior to the effective dissemination of the recommendations or of the information concerning the recommendations:

(I) Any person in a control relationship to the investment adviser;

(II) Any affiliated person of a controlling person; and

(III) Any affiliated person of an affiliated person.

(B) "Control" shall mean the power to exercise a controlling influence over the management or policies of a company, unless such power is solely the result of an official position with such company. Any person who owns beneficially, either directly or through one or more controlled companies, more than twenty-five percent of the voting securities of a company shall be presumed to control such company.

((iv)) An investment adviser shall not be deemed to have violated the provisions of this subsection (1)(m) because of the failure to record securities transactions of any advisory

representative if the investment adviser establishes that it instituted adequate procedures, and used reasonable diligence to obtain promptly, reports of all transactions required to be recorded.

(n) The following items related to WAC 460-24A-145 and Part II of Form ADV:

(i) A copy of each written statement, and each amendment or revision, given or sent to any client or prospective client of the investment adviser as required by WAC 460-24A-145;

(ii) Any summary of material changes that is required by Part II of Form ADV that is not included in the written statement; and

(iii) A record of the dates that each written statement, each amendment or revision thereto, and each summary of material changes was given or offered to any client or prospective client who subsequently becomes a client.

(o) For each client that was obtained by the adviser by means of a solicitor to whom a cash fee was paid by the adviser:

(i) Evidence of a written agreement to which the adviser is a party related to the payment of such fee;

(ii) A signed and dated acknowledgment of receipt from the client evidencing the client's receipt of the investment adviser's disclosure statement and a written disclosure statement of the solicitor; and

(iii) A copy of the solicitor's written disclosure statement. The written agreement, acknowledgment, and solicitor disclosure statement will be considered to be in compliance if such documents are in compliance with Rule 275.206(4)-3 of the Investment Advisers Act of 1940.

For purposes of this subsection, the term "solicitor" shall mean any person or entity who, for compensation, acts as an agent of an investment adviser in referring potential clients.

(p) All accounts, books, internal working papers, and any other records or documents that are necessary to form the basis for or demonstrate the calculation of the performance or rate of return of all managed accounts or securities recommendations in any notice, circular, advertisement, newspaper article, investment letter, bulletin, or other communication including, but not limited to, electronic media that the investment adviser circulates or distributes, directly or indirectly, to two or more persons (other than persons connected with the investment adviser); provided however, that, with respect to the performance of managed accounts, the retention of all account statements, if they reflect all debits, credits, and other transactions in a client's account for the period of the statement, and all worksheets necessary to demonstrate the calculation of the performance or rate of return of all managed accounts shall be deemed to satisfy the requirements of this subsection.

(q) A file containing a copy of all written communications received or sent regarding any litigation involving the investment adviser or any investment adviser representative or employee, and regarding any written customer or client complaint.

(r) Written information about each investment advisory client that is the basis for making any recommendation or providing any investment advice to such client.

(s) Written procedures to supervise the activities of employees and investment adviser representatives that are reasonably designed to achieve compliance with applicable securities laws and regulations.

(t) A file containing a copy of each document (other than any notices of general dissemination) that was filed with or received from any state or federal agency or self regulatory organization and that pertains to the registrant or its advisory representatives as that term is defined in (m)(iii)(A) of this subsection, which file should contain, but is not limited to, all applications, amendments, renewal filings, and correspondence.

(u) Copies, with original signatures of the investment adviser's appropriate signatory and the investment adviser representative, of each initial Form U-4 and each amendment to Disclosure Reporting Pages (DRPs U-4) must be retained by the investment adviser (filing on behalf of the investment adviser representative) and must be made available for inspection upon regulatory request.

(2) If ((a-licensed)) an investment adviser subject to subsection (1) of this section has custody or possession of securities or funds of any client, the records required to be made and kept under subsection (1) ((above)) of this section shall include:

(a) A journal or other record((s)) showing all purchases, sales, receipts and deliveries of securities (including certificate numbers) for ((such)) all accounts and all other debits and credits to ((such)) the accounts.

(b) A separate ledger account for each such client showing all purchases, sales, receipts and deliveries of securities, the date and price of each ((such)) purchase or sale, and all debits and credits.

(c) Copies of confirmations of all transactions effected by or for the account of any ((such)) client.

(d) A record for each security in which any ((such)) client has a position, which record shall show the name of each ((such)) client having any interest in ((such)) each security, the amount of interest of each ((such)) client, and the location of each ((such)) security.

((4)) (3) Every ((licensed)) investment adviser subject to subsection (1) of this section who renders any investment supervisory or management service to any client shall, with respect to the portfolio being supervised or managed and to the extent that the information is reasonably available to or obtainable by the investment adviser, make and keep true, accurate and current:

(a) Records showing separately for each ((such)) client the securities purchased and sold, and the date, amount and price of each ((such)) purchase or sale.

(b) For each security in which any ((such)) client has a current position, information from which the investment adviser can promptly furnish the name of each ((such)) client, and the current amount of the interest of ((such)) the client.

((5)) (4) Any books or records required by this section may be maintained by the investment adviser in such manner that the identity of any client to whom such investment adviser renders investment supervisory services is indicated by numerical or alphabetical code or some similar designation.

~~((6))~~ (5) Every investment adviser subject to subsection (1) of this section shall preserve the following records in the manner prescribed:

(a) All books and records required to be made under the provisions of subsections (1) to ~~((4))~~ (3)(a), inclusive, of this section except for books and records required to be made pursuant to subsection (1)(k) and (p) of this section shall be maintained and preserved in an easily accessible place for a period of not less than ~~((three))~~ five years from the end of the fiscal year during which the last entry was made on ~~((such))~~ the record, the first two years in ~~((an appropriate))~~ the principal office of the investment adviser.

(b) Partnership articles and any amendments, articles of incorporation, charter documents, minute books and stock certificate books of the investment adviser and of any predecessor, shall be maintained in the principal office of the investment adviser and preserved until at least three years after termination of the enterprise.

~~((7-A licensed))~~ (c) Books and records required to be made pursuant to subsection (1)(k) and (p) of this section shall be maintained and preserved in an easily accessible place for a period of not less than five years, the first two years in the principal office of the investment adviser, from the end of the fiscal year during which the investment adviser last published or otherwise disseminated, directly or indirectly, including by electronic media, the notice, circular, advertisement, newspaper article, investment letter, bulletin, or other communication.

(d) Notwithstanding other record preservation requirements of this section, the following records or copies shall be maintained at the business location of the investment adviser from which the customer or client is being provided or has been provided with investment advisory services:

(i) Records required to be preserved under subsections (1)(c), (g) through (j), (n), (o), and (q) through (s), (2), and (3) of this section shall be maintained for the period prescribed in (a) of this subsection; and

(ii) Records or copies required pursuant to subsection (1)(k) and (p) of this section which records or related records identify the name of the investment adviser representative providing investment advice from that business location, or which identify the business locations' physical address, mailing address, electronic mailing address, or telephone number shall be maintained for the period prescribed in (c) of this subsection.

(6) An investment adviser subject to subsection (1) of this section, before ceasing to conduct or discontinuing business as an investment adviser, shall arrange for and be responsible for the preservation of the books and records required to be maintained and preserved under this section for the remainder of the period specified in this section, and shall notify the ~~((administrator))~~ director in writing of the exact address where ~~((such))~~ the books and records will be maintained during ~~((such))~~ the period.

(7)(a) The records required to be maintained and preserved pursuant to this section may be immediately produced or reproduced by photograph on film or, as provided in (b) of this subsection, on magnetic disk, tape, or other computer storage medium, and be maintained and preserved for the required time in that form. If records are produced or repro-

duced by photographic film or computer storage medium, the investment adviser shall:

(i) Arrange the records and index the films or computer storage medium so as to permit the immediate location of any particular record;

(ii) Be ready at all times to promptly provide any facsimile enlargement of film or computer printout or copy of the computer storage medium that the director, by its examiners or other representatives, may request;

(iii) Store, separately from the original, one copy of the film or computer storage medium for the time required;

(iv) With respect to records stored on computer storage medium, maintain procedures for maintenance and preservation of, and access to, records so as to reasonably safeguard records from loss, alteration, or destruction; and

(v) With respect to records stored on photographic film, at all times have available for the director's examination of its records pursuant to RCW 21.20.100, facilities for immediate, easily readable projection of the film and for producing easily readable facsimile enlargements.

(b) Pursuant to (a) of this subsection, an investment adviser may maintain and preserve on computer tape, disk, or other computer storage medium records which, in the ordinary course of the adviser's business, are created by the adviser on electronic media or received by the adviser solely on electronic media or by electronic data transmission.

(8) ~~((After a record or other document has been preserved for two years, a photograph on film may be substituted for the balance of the required time.~~

(9)) As used in this section, ~~((the terms "power of attorney" and "discretionary authority" do))~~ "investment supervisory services" means the giving of continuous advice as to the investment of funds on the basis of the individual needs of each client; and not include discretion as to the price at which, or the time when, a transaction is or is to be effected, if, before the order is given by the investment adviser, the client has directed or approved the purchase or sale of a definite amount of the particular security.

(9) Any book or other record made, kept, maintained, and preserved in compliance with Rules 17a-3 and 17a-4 under the Securities Exchange Act of 1934, which is substantially the same as the book or other record required to be made, kept, maintained, and preserved under this section, shall be deemed to be made, kept, maintained, and preserved in compliance with this section.

(10) Every investment adviser registered or required to be registered in this state and that has its principal place of business in a state other than this state shall be exempt from the requirements of this section, provided the investment adviser is licensed in the state where it has its principal place of business and is in compliance with that state's recordkeeping requirements.

AMENDATORY SECTION (Amending WSR 90-13-029, filed 6/12/90, effective 7/13/90)

WAC 460-24A-205 Notice of changes by investment advisers and investment adviser representatives. (1) Each licensed investment adviser ~~((shall, upon any change in the~~

PROPOSED

~~information contained in its application for a certificate (other than financial information contained therein))) must:~~

~~(a) Promptly file ((an)) with IARD, in accordance with the instructions to Form ADV, any amendments ((to such application setting forth the changed information (and in any event)) to its Form ADV. An amendment will be considered promptly filed if it is filed within ((30)) thirty days ((after the change occurs):~~

~~(2) With respect to any investment adviser registered under the Investment Advisers Act of 1940, it shall be a sufficient compliance with subsection (1) of this section if a copy of an amendment to Form ADV, of the Securities and Exchange Commission containing the required information, or transmitted for filing to, the administrator not later than the date on which such amendment is required to be filed with the Securities and Exchange Commission:~~

~~(3) Each licensed investment adviser shall notify the administrator of the employment of any new representative in Washington by submitting a completed NASD Form U-4 to the administrator or the administrator's designee, within 10 days after the event occurs.~~

~~(4) Each licensed investment adviser shall notify the administrator of the termination of employment of any representative in Washington, by submitting a complete NASD Form U-5 to the administrator or the administrator's designee, within 30 days after the event occurs.)) of the event that requires the filing of the amendment; and~~

~~(b) File an updated Form ADV with IARD within ninety days of the end of the investment adviser's fiscal year.~~

~~(2) Each investment adviser representative has a continuing obligation to update the information required by Form U-4 as changes occur and must promptly file with IARD any amendments to the representative's Form U-4. An amendment will be considered promptly filed if it is filed within thirty days of the event that requires the filing of the amendment.~~

AMENDATORY SECTION (Amending Order 304, filed 2/28/75, effective 4/1/75)

WAC 460-24A-210 Notice of complaint. Each licensed investment adviser who has filed a complaint against any of its partners, officers, directors, agents licensed in Washington or associated persons with any law enforcement agency, any other regulatory agency having jurisdiction over the securities industry, or with any bonding company regarding any loss arising from alleged acts of such person, shall send a copy of such complaint to the ((administrator)) director, within ((10)) ten days following its filing with such other agency or bonding company.

WSR 01-12-091

PROPOSED RULES

HEALTH CARE AUTHORITY

[Order 01-00—Filed June 6, 2001, 8:24 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 01-09-084.

Title of Rule: WAC 182-12-200 Retirees may change enrollment in approved PEBB health plans.

Purpose: Amend WAC 182-12-200, to include changes already made to WAC 182-12-132, which added the option for retirees to waive PEBB insurance while enrolled in other employer sponsored health coverage.

Statutory Authority for Adoption: Chapter 41.05 RCW.

Statute Being Implemented: RCW 41.05.160.

Summary: Proposed changes to WAC 182-12-200 will remove current inconsistency with WAC 182-12-132 which allows retirees to waive PEBB medical and dental coverage for themselves and dependents if they are covered under a comprehensive employer sponsored medical plan and reenroll in PEBB coverage within sixty days of loss of other coverage.

Reasons Supporting Proposal: Remove current inconsistency with WAC 182-12-132.

Name of Agency Personnel Responsible for Drafting and Implementation: Barbara Scott, Health Care Authority, 923-2642; and Enforcement: MaryAnne Lindeblad, Health Care Authority, 923-2640.

Name of Proponent: Health Care Authority, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: WAC 182-12-200 outlines when a retiree may reenroll them and their eligible dependents in PEBB retiree medical and dental plan. Changes to WAC 182-12-132 adopted in October 2000 created inconsistency with this rule. Proposed language will remove that inconsistency and confusion it may have created for eligible members.

Proposal Changes the Following Existing Rules: Changes the timeframe for application from thirty-one days to sixty days. Removes requirement for other coverage to be PEBB or K-12 school district sponsored.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Not required. The Joint Administrative Rules Review Committee has not requested the filing of a small business economic impact statement, and there will be no costs to small businesses.

RCW 34.05.328 does not apply to this rule adoption.

Hearing Location: Lacey Community Center, 6729 Pacific Avenue S.E., Lacey, WA, on July 24, 2001, at 1:00 p.m.

Assistance for Persons with Disabilities: Contact Nikki Johnson by July 17, 2001, TDD (888) 923-5622, or (360) 923-2805.

Submit Written Comments to: Barbara Scott, PEBB Program, 676 Woodland Square Loop S.E., Building B, Olympia, WA 98504, fax (360) 923-2602, by July 24, 2001.

Date of Intended Adoption: July 25, 2001.

June 6, 2001

Melodie H. Bankers

Rules Coordinator

AMENDATORY SECTION (Amending WSR 97-21-127, filed 10/21/97, effective 11/21/97)

WAC 182-12-200 Retirees may change enrollment in approved PEBB health plans. A retiree, whose spouse is enrolled as an eligible employee in a PEBB or Washington state school district-sponsored health plan, may defer enrollment in PEBB retiree medical and dental plans and enroll in the spouse's PEBB or school district-sponsored health plan. If a retiree defers enrollment in a PEBB retiree medical plan, enrollment must also be deferred for dental coverage. The retiree and eligible dependents may subsequently enroll in a PEBB retiree medical, or medical and dental, plan(s) if the retiree was continuously enrolled under the spouse's PEBB or school district-sponsored health coverage from the date the retiree was initially eligible for retiree coverage:

- (1) During any open enrollment period determined by the HCA; or
- (2) Within ~~((34))~~ sixty days of the date the spouse ceases to be enrolled in a PEBB or school district-sponsored health plan as an eligible employee; or
- (3) Within ~~((34))~~ sixty days of the date of the retiree's loss of eligibility as a dependent under the spouse's PEBB or school district-sponsored health plan.

WSR 01-12-092

PROPOSED RULES

HEALTH CARE AUTHORITY

[Order 01-01—Filed June 6, 2001, 8:25 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 01-09-083.

Title of Rule: WAC 182-12-117 Eligible retirees.

Purpose: Amend WAC 182-12-117 to include Washington school employees retirement system plan 2, plan 3 and Washington public employees retirement system plan 3. Include greater detail that adds clarification to existing eligibility; modify participation by employees retiring under a state of Washington higher education retirement plan.

Statutory Authority for Adoption: Chapter 41.05 RCW.
Statute Being Implemented: RCW 41.05.160.

Summary: Clarify eligibility criteria for participation in PEBB sponsored retiree medical, dental and life coverage; include eligibility for the new Washington school employees retirement system plan 2, plan 3 and the new public employees retirement system plan 3; and fine-tune eligibility criteria for members of higher education retirement plans. Additional edits/rearrangement of text to better clarify language.

Name of Agency Personnel Responsible for Drafting and Implementation: Barbara Scott, Health Care Authority, 923-2642; and Enforcement: MaryAnne Lindeblad, Health Care Authority, 923-2640.

Name of Proponent: Health Care Authority, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Outlines eligibility criteria for participation in PEBB sponsored retiree medical, dental and life coverage.

Proposal Changes the Following Existing Rules: Includes eligibility for the new Washington school employees retirement system plan 2, plan 3 and the new public employees retirement system plan 3 and modifies eligibility criteria for members of higher education retirement plans.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Not required. The Joint Administrative Rules Review Committee has not requested the filing of a small business economic impact statement, and there will be no cost to small businesses.

RCW 34.05.328 does not apply to this rule adoption.

Hearing Location: Lacey Community Center, 6729 Pacific Avenue S.E., Lacey, WA, on July 24, 2001, at 1:00 p.m.

Assistance for Persons with Disabilities: Contact Nikki Johnson by July 17, 2001, TDD (888) 923-5622, or (360) 923-2805.

Submit Written Comments to: Barbara Scott, PEBB Program, 676 Woodland Square Loop S.E., Building B, Olympia, WA 98504, fax (360) 923-2602, by July 24, 2001.

Date of Intended Adoption: July 25, 2001.

June 6, 2001

Rules Coordinator

AMENDATORY SECTION (Amending WSR 97-21-127, filed 10/21/97, effective 11/21/97)

WAC 182-12-117 Eligible retirees. (1) "Retirees and disabled employees." Eligible employees who terminate state service after becoming vested in a Washington state sponsored retirement system are eligible for retiree medical ~~((;))~~ and dental ~~((and life))~~ coverages provided the person:

(a) Elects Medicare Parts A and B if the retiree, or covered dependents of a retiree, retired after July 1, 1991 and is eligible for Medicare; and

(b) Immediately begins receiving a monthly retirement income benefit from ~~((such))~~ one or more of the following retirement system ~~((;or))~~s:

(i) Law enforcement officers and fire fighters retirement system plan 1 or 2;

(ii) Public employees retirement system plan 1 or 2;

(iii) School employees retirement system plan 2;

(iv) State judges/judicial retirement system;

(v) Teachers retirement system plan 1 or 2; and

(vi) Washington state patrol retirement system; or

(c) Is at least fifty-five with at least ten years service credit and a member of one of the following retirement systems:

(i) Public employees retirement system plan 3;

(ii) School employees retirement system plan 3; and

(iii) Teachers retirement system plan 3.

(d) Is a member of state of Washington higher education retirement plan, and is

(i) at least age fifty-five with at least ten years service; or

(ii) age sixty-two; or

PROPOSED

(iii) immediately begins receiving a monthly retirement income benefit.

~~((e))~~ (e) If not retiring under the public employees retirement system (~~((PERS))~~), would have been eligible for a monthly retirement income benefit because of age and years of service had the person been employed under the provisions of ~~((PERS))~~ public employees retirement system ((F)) 1 or ~~((PERS))~~ ((H)) 2 for the same period of employment; or

~~((d))~~ (f) Is an elected official as defined under WAC 182-12-115(6) who has voluntarily or involuntarily left a public office, whether or not they receive a benefit from a state retirement system; or

~~((e))~~ (g) Must have taken a lump-sum retirement benefit payment because their monthly benefit would have been under fifty dollars~~((:))~~; and

(h) Submits an application form to enroll or waive PEBB medical and dental coverage within sixty days after active employer or continuous Consolidated Omnibus Budget Reconciliation Act (COBRA) coverage ends.

~~((Employees who are permanently and totally disabled and eligible for a deferred monthly retirement income benefit are likewise eligible, provided they apply for retiree coverage before their PEBB active employee coverage ends. Persons retiring who do not have waiver of premium coverage from any PEBB life insurance plan are eligible for retiree life insurance, subject to the same qualifications as for retiree medical coverage. With the exception of the Washington State Patrol, retirees and disabled employees are not eligible for an employer premium contribution. The Federal Civil Service Retirement System shall be considered a Washington state sponsored retirement system for Washington State University cooperative extension service employees who hold a federal civil service appointment and who are covered under the PEBB program at the time of retirement or disability.))~~

(2)(a) Eligible employees who participated in Public Employees Benefits Board (PEBB) sponsored life insurance are eligible for PEBB sponsored retiree life insurance if they apply to the health care authority within sixty days of the date their active PEBB life insurance terminates.

(b) Persons retiring who do not have waiver of premium coverage from any PEBB life insurance plan are eligible for retiree life insurance, subject to the same qualifications as for retiree medical coverage.

~~((2))~~ (3) ~~((Retired and disabled school district and educational service district employees.))~~ The following retired and disabled school district and educational service district employees ~~((persons))~~ are eligible to participate in PEBB medical and dental plans only, provided they meet the enrollment criteria stated below and if eligible for Medicare, ~~((be))~~ are enrolled in Medicare Parts A and B:

(a) Persons receiving a retirement allowance under chapter 41.32 or 41.40 RCW as of September 30, 1993, and who enroll in PEBB plans not later than the end of the open enrollment period established by the authority for the plan year beginning January 1, 1995;

~~((b) Persons who separate from employment with a school district or educational service district on or after October 1, 1993, and immediately upon separation begin to receive a retirement allowance or have taken a lump-sum payment because their benefit would be less than fifty dollars~~

~~under chapter 41.32 or 41.40 RCW. Individuals in teachers' retirement system, TRS III, not receiving a monthly retirement allowance (defined benefit) must be at least age fifty-five with at least ten years of service at the time of separation. Such persons who retire on or after October 1, 1993, must elect PEBB coverage not later than the end of the open enrollment period established by the authority for the plan year beginning January 1, 1995, or sixty days following retirement whichever is later.))~~

~~((e))~~ (b) Persons who separate from employment with a school district or educational service district due to a total and permanent disability, and are eligible to receive a deferred retirement allowance under chapter 41.32 or 41.40 RCW. Such persons must enroll in PEBB plans not later than the end of the open enrollment period established by the authority for the plan year beginning January 1, 1995, or sixty days following retirement, whichever is later.

(4) Employees who are permanently and totally disabled and eligible for a deferred monthly retirement income benefit are likewise eligible, provided they apply for retiree coverage before their PEBB active employee coverage ends.

(5) With the exception of the Washington State Patrol, retirees and disabled employees are not eligible for an employer premium contribution.

(6) The Federal Civil Service Retirement System shall be considered a Washington state sponsored retirement system for Washington State University cooperative extension service employees who hold a federal civil service appointment and who are covered under the PEBB program at the time of retirement or disability.

WSR 01-12-095

PROPOSED RULES

DEPARTMENT OF HEALTH

(Medical Quality Assurance Commission)

[Filed June 6, 2001, 9:13 a.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: WAC 246-918-005 Definitions, 246-918-007 Application withdrawals, 246-918-050 Physician assistant qualifications effective July 1, 1999, and 246-918-080 Physician assistant—Licensure.

Purpose: These rules detail the qualification required by statute for obtaining a license to practice as a physician assistant.

Statutory Authority for Adoption: RCW 18.71A.020.

Statute Being Implemented: Chapter 18.71A RCW.

Summary: During the 1999 legislative session (chapter 127, Laws of 1999) the legislature determined the requirements for physician assistant licensure should be consistent with the national standard. This proposal updates the rules to reflect the statutory changes. This proposal also will be for general housekeeping for clear and concise language.

Reasons Supporting Proposal: The proposed rules will move the physician assistants to the federal standard which will make it easier to move state to state.

PROPOSED

Name of Agency Personnel Responsible for Drafting and Implementation: Beverly A. Teeter, Health Administrator, 1300 S.E. Quince Street, Olympia, WA, (360) 236-4788; and Enforcement: Maryella Jansen, Acting Executive Director, 1300 S.E. Quince Street, Olympia, WA, (360) 236-4789.

Name of Proponent: Medical Quality Assurance Commission and Department of Health, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: These rules implement statutory changes that revised the qualifications for licensure as a physician assistant in order to be consistent with national standards. The changes to rules update language to correspond with the statutory change, as well as outlining the process for issuance of an interim permit and general housekeeping for clear and concise language.

Proposal Changes the Following Existing Rules: The changes update the rules language in accordance with the statute changes.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This proposed language is exempt under RCW 19.85.025(3) and 34.05.310(4) because the rule implements recent statutory changes on qualifications and updates language to correspond with accrediting programs.

RCW 34.05.328 does not apply to this rule adoption. These are procedural rules relating to revising language to conform to statutory changes and to the process for making application for an interim permit.

Hearing Location: Phoenix Inn, 415 Capitol Way North, Olympia Room, Olympia, WA 98501, on July 11, 2001, at 7:00 p.m.

Assistance for Persons with Disabilities: Contact Beverly A. Teeter by June 30, 2001, TDD (800) 833-6388, or (360) 236-4788.

Submit Written Comments to: Beverly A. Teeter, fax (360) 586-4573, by July 6, 2001.

Date of Intended Adoption: July 11, 2001.

May 25, 2001

Maryella E. Jansen
Acting Executive Director

AMENDATORY SECTION (Amending WSR 96-03-073, filed 1/17/96, effective 2/17/96)

WAC 246-918-005 Definitions. The following terms used in this chapter shall have the meanings set forth in this section unless the context clearly indicates otherwise:

(1) "Certified physician assistant" means an individual who has successfully completed an (~~(American Medical Association)~~) accredited and commission approved physician assistant program and has passed the initial national boards examination administered by the National Commission on Certification of Physician Assistants (NCCPA).

(2) "Physician assistant" means an individual who (~~has~~) either:

(a) Successfully completed an (~~(American Medical Association)~~) accredited and commission approved physician

assistant program (~~(and)~~), is eligible for the NCCPA examination and was licensed in Washington state prior to July 1, 1999;

(b) Qualified based on work experience and education and was licensed prior to July 1, 1989; (~~(or)~~)

(c) Graduated from an international medical school and was licensed prior to July 1, 1989; or

(d) Holds an interim permit issued pursuant to RCW 18.71A.020(1).

(3) "Physician assistant-surgical assistant" means an individual who was licensed as a physician assistant between September 30, 1989, and December 31, 1989, to function in a limited extent as authorized in WAC 246-918-230.

(4) "Licensee" means an individual (~~(licensed)~~) credentialed as a certified physician assistant, physician assistant, or physician assistant-surgical assistant.

(5) "Commission approved program" means a physician assistant program (~~(that maintains Committee on Allied Health Education and Accreditation standards as defined in the "essentials" of the council of medical education of the American Medical Association)~~) accredited by the Committee on Allied Health Education and Accreditation (CAHEA); the Commission on Accreditation of Allied Health Education Programs (CAAHEP); the Accreditation Review Committee on Education for the Physician Assistant (ARC-PA); or any successive accrediting organizations.

(6) "Sponsoring physician" means the physician who is responsible for consulting with a certified physician assistant. An appropriate degree of supervision is involved.

(7) "Supervising physician" means the physician who is responsible for closely supervising, consulting, and reviewing the work of a physician assistant.

AMENDATORY SECTION (Amending WSR 96-03-073, filed 1/17/96, effective 2/17/96)

WAC 246-918-007 Application withdrawals. An application for a license or interim permit may not be withdrawn (~~(after the commission or the reviewing commission member determines that grounds for denial of the license or the issuance of a conditional license may be appropriate. Applications which are subject to investigation for unprofessional conduct or impaired practice may not be withdrawn)~~) if grounds for denial exist.

AMENDATORY SECTION (Amending WSR 96-03-073, filed 1/17/96, effective 2/17/96)

WAC 246-918-050 Physician assistant qualifications effective (~~(January 1, 1990)~~) July 1, 1999. Individuals applying to the commission under chapter 18.71A RCW after (~~(December 31, 1989, shall be required to)~~) July 1, 1999, must have graduated from (~~(a commission approved)~~) an accredited physician assistant program approved by the commission and be certified by successful completion of the NCCPA examination (~~(eligible)~~): EXCEPT those applying for an interim permit under RCW 18.71A.020(1) who will have one year from issuance of the interim permit to successfully complete the examination.

PROPOSED

AMENDATORY SECTION (Amending WSR 98-05-060, filed 2/13/98, effective 3/16/98)

WAC 246-918-080 Physician assistant—Licensure.

(1) Application procedure. Applications may be made jointly by the physician and the physician assistant on forms supplied by the commission. Applications and supporting documents must be on file in the commission office prior to consideration for ~~((licensure))~~ a license or interim permit.

(2) No physician assistant or physician assistant-surgical assistant shall begin practice without commission approval of the practice plan of that working relationship. Practice plans must be submitted on forms provided by the commission.

(3) Changes or additions in supervision. In the event that a physician assistant or physician assistant-surgical assistant who is currently ~~((licensed))~~ credentialed desires to become associated with another physician, he or she must submit a new practice plan. See WAC 246-918-110 regarding termination of working relationship.

WSR 01-12-096

PROPOSED RULES

DEPARTMENT OF HEALTH

(Medical Quality Assurance Commission)

[Filed June 6, 2001, 9:15 a.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: WAC 246-919-340 International medical school graduates.

Purpose: This rule outlines additional requirements for applicants who have graduated from a medical school outside of the United States or Canada.

Other Identifying Information: This rule was a result of a rule review completed by staff as a result of Executive Order 97-02.

Statutory Authority for Adoption: RCW 18.71.017 and 18.71.050.

Statute Being Implemented: Chapter 18.71 RCW.

Summary: The proposal will simplify and improve existing language by eliminating unnecessary words and legalese. The proposed language does not add new requirements for licensure.

Reasons Supporting Proposal: This rule needs to be amended to clearly outline the requirements for international graduates. Improving the clarity of the rule will reduce the staff time required to respond to applicant inquiries.

Name of Agency Personnel Responsible for Drafting and Implementation: Beverly A. Teeter, Health Administrator, 1300 S.E. Quince Street, Olympia, WA, (360) 236-4788; and Enforcement: Maryella Jansen, Acting Executive Director, 1300 S.E. Quince Street, Olympia, WA, (360) 236-4789.

Name of Proponent: Medical Quality Assurance Commission and Department of Health, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The proposal is in response to the many calls the staff receives from international graduates who ask what the existing rules mean. The proposed amendment is to clarify the additional requirements for international graduates to be licensed in the state of Washington. The anticipated effects will be to reduce the many calls for explanation from international graduates.

Proposal Changes the Following Existing Rules: Existing rules pertaining to international graduates additional requirements were written with too much legalese and extremely confusing for those international graduates. This will be a clear and concise rule.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This proposed language is exempt under RCW 19.85.025(3) and 34.05.310(4) because the change is merely clarification and does not make new requirements.

RCW 34.05.328 does not apply to this rule adoption. This rule does not change requirements for licensure, just rewritten to be clear and concise.

Hearing Location: Phoenix Inn, 415 Capitol Way North, Olympia Room, Olympia, WA 98501, on July 11, 2001, at 7:00 p.m.

Assistance for Persons with Disabilities: Contact Beverly A. Teeter by June 30, 2001, TDD (800) 833-6388, or (360) 236-4788.

Submit Written Comments to: Beverly A. Teeter, fax (360) 586-4573, by July 6, 2001.

Date of Intended Adoption: July 11, 2001.

May 22, 2001

M. C. Selecky

Secretary

Maryella E. Jansen

Acting Executive Director

AMENDATORY SECTION (Amending WSR 96-03-073, filed 1/17/96, effective 2/17/96)

WAC 246-919-340 Additional requirements for international medical school graduates. All graduates of medical schools outside the United States, Canada, or Puerto Rico must have either:

(1) ~~((Except in unusual circumstances, which shall be considered individually by the commission, all graduates of international medical schools who were not))~~ Been licensed in another state prior to 1958 ~~((must have obtained the certificate granted by the Educational Commission for Foreign Medical Graduates (ECFMG) or must qualify for exemption as provided for in other sections of these rules and regulations.));~~

(2) ~~((A United States citizen or resident alien who has obtained his medical education in a medical school outside the United States, Canada, or Puerto Rico shall be eligible for licensure in the state of Washington if he or she has satisfied the following requirements:~~

~~((a) Has completed all of the formal academic requirements for graduation from a medical school outside the United States, provided that such medical school provides a~~

resident course of professional instruction equivalent to that required under RCW 18.71.055 for approval of United States and Canadian schools. An internship and/or social service in an international country shall not be considered to be a part of the formal academic requirements;

~~(b) Has successfully completed one academic year of supervised clinical training in a program approved by the commission. Approval of such program shall be based on the following requirements:~~

~~(i) The program shall be sponsored by a United States medical school approved by the commission;~~

~~(ii) The school must provide supervision equivalent to that given undergraduate medical students;~~

~~(iii) Admission to such a program shall be contingent upon review of the applicant's academic achievement, completion of the formal academic curriculum of the international medical school, and the attainment of a score satisfactory to the medical school in a qualifying examination acceptable to the commission such as Part 1 of the National Board examination, or day 1 of FLEX examination, or the ECFMG examination;~~

~~(iv) The program must include experience in each of the major clinical disciplines;~~

~~(e) Has completed the postgraduate clinical hospital training required by the commission of all applicants for licensure; and~~

~~(d) Has passed the examination required by the commission of all applicants for licensure.~~

~~(3) Satisfaction of the requirements of subsection (2) of this section shall substitute for the completion of any international internship and/or social service required by the international medical school or government as a condition to the awarding of a medical degree or licensure, and no such requirements shall be a condition of licensure as a physician in this state.~~

~~(4) Certification by the ECFMG shall not be a condition of licensure as a physician in this state for candidates who have successfully completed the requirements of subsection (2) of this section.~~

~~(5) All persons issued a license to practice medicine and surgery by the medical quality assurance commission shall possess all the rights and privileges thereof, including the use of the title "doctor of medicine" and the initials "M.D."~~

~~(6) Graduates of international medical schools who do not qualify for licensure under these rules and regulations will be required to meet the rules previously adopted by the commission)) Obtained a certificate with an indefinite status granted by the Educational Commission for Foreign Medical Graduates (ECFMG); or~~

(3) Successfully completed one year of supervised academic clinical training in the United States, commonly referred to as a Fifth Pathway program.

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: WAC 246-08-400 Allowable fees for searching and duplicating medical records.

Purpose: The proposed changes adjust the fee that medical providers may charge for searching and duplicating medical records.

Other Identifying Information: The adjustment is based on the change in the consumer price index based on all consumers for the Seattle/Tacoma area for fiscal years 1998 and 1999.

Statutory Authority for Adoption: RCW 70.02.010(12) and 43.70.040.

Statute Being Implemented: RCW 70.02.101(12).

Summary: The fees that providers can charge for searching and duplicating medical records cannot exceed .83 [eighty-three] cents per page for the first thirty pages and .63 [sixty-three] cents per page for all others. The clerical fee may not exceed nineteen dollars.

Reasons Supporting Proposal: The proposed rule allows providers to recoup the inflationary costs of providing this service. This adjustment is mandated to occur biennially, and the last update was July 1999.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Yvette Lenz, 1112 S.E. Quince Street, Olympia, WA 98504, (360) 236-4606.

Name of Proponent: [Department of Health], governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The rule increases the fees that medical providers may charge for searching and duplicating medical records. The fees are not to exceed .83 [eighty-three] cents per page for the first thirty pages, .63 [sixty-three] cents per page for all other pages, and clerical fees may not exceed nineteen dollars. The increase is designed to assist providers in recouping the cost for maintaining, searching, and duplicating medical records.

Proposal Changes the Following Existing Rules: [NISBA].

No small business economic impact statement has been prepared under chapter 19.85 RCW. This rule is exempt under RCW 34.05.310(4), and therefore does not require a small business economic impact statement.

RCW 34.05.328 does not apply to this rule adoption. This rule is not a legislatively significant rule. It does not subject individuals to penalties or sanctions, does not establish, alter or revoke a qualification or standard for licensure, and does not make significant amendment to a policy or regulatory program.

Hearing Location: Washington State Department of Health, 1101 Eastside Street, Olympia, WA 98504, on July 10, 2001, at 10:30 a.m.

PROPOSED

Assistance for Persons with Disabilities: Contact Yvette Lenz by July 1, 2001, TDD (800) 833-6388.

Submit Written Comments to: Yvette Lenz, fax (360) 236-4626, by July 10, 2001.

Date of Intended Adoption: July 11, 2001.

M. C. Selecky
Secretary

AMENDATORY SECTION (Amending WSR 99-13-083, filed 6/14/99, effective 7/15/99)

WAC 246-08-400 How much can a medical provider charge for searching and duplicating medical records? RCW 70.02.010(12) allows medical providers to charge fees for searching and duplicating medical records. The fees a provider may charge cannot exceed the fees listed below:

- (1) Copying charge per page:
 - (a) No more than ~~((seventy-nine))~~ eighty-three cents per page for the first thirty pages;
 - (b) No more than ~~((sixty))~~ sixty-three cents per page for all other pages.
- (2) Additional charges:
 - (a) The provider can charge ~~((an eighteen))~~ a nineteen dollar clerical fee for searching and handling records;
 - (b) If the provider personally edits confidential information from the record, as required by statute, the provider can charge the usual fee for a basic office visit.
- (3) This section is effective July 1, ~~((1999))~~ 2001, through June 30, ~~((2001))~~ 2003.

PROPOSED

WSR 01-12-098
PROPOSED RULES
DEPARTMENT OF HEALTH
 (Medical Quality Assurance Commission)
 [Filed June 6, 2001, 9:18 a.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: WAC 246-919-330 Postgraduate medical training defined.

Purpose: This rule will change the name of the accrediting organization for the Canadian postgraduate program to meet one of the licensure requirement options for the state of Washington.

Other Identifying Information: WAC 246-919-330.

Statutory Authority for Adoption: RCW 18.71.017 and 18.71.050.

Statute Being Implemented: Chapter 18.71 RCW.

Summary: The accrediting organization for Canadian postgraduate medical training has changed to the Royal College of Physicians and Surgeons of Canada (RCPSC) and the College of Family Physicians of Canada (CFPC). The rule needs to be amended to reflect this change.

Reasons Supporting Proposal: The reason to amend the language of the existing rule is to ensure we properly identify the Canadian accrediting organization.

Name of Agency Personnel Responsible for Drafting and Implementation: Beverly A. Teeter, Health Administrator, 1300 S.E. Quince Street, Olympia, WA, (360) 236-4788; and Enforcement: Maryella Jansen, Acting Executive Director, 1300 S.E. Quince Street, Olympia, WA, (360) 236-4789.

Name of Proponent: Medical Quality Assurance Commission and Department of Health, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This rule has been developed in response to the change in the Canadian accrediting organization. This will allow Washington state to appropriately license individuals who have attended the recognized accredited postgraduate training programs of Canada.

Proposal Changes the Following Existing Rules: Existing rules pertaining to postgraduate training do not reflect the current accrediting programs of Canada.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This proposed language is exempt under RCW 19.85.025(3) and 34.05.310(4) because the rules are merely updating accreditation names and do not change requirements.

RCW 34.05.328 does not apply to this rule adoption. This rule does not change requirements for licensure, just the name of the accrediting programs for postgraduate training programs in Canada.

Hearing Location: Phoenix Inn, 415 Capitol Way North, Olympia Room, Olympia, WA 98501, on July 11, 2001, at 7:00 p.m.

Assistance for Persons with Disabilities: Contact Beverly A. Teeter by June 30, 2001, TDD (800) 833-6388, or (360) 236-4788.

Submit Written Comments to: Beverly A. Teeter, fax (360) 586-4573, by July 6, 2001.

Date of Intended Adoption: July 11, 2001.

May 22, 2001

Maryella E. Jansen

Acting Executive Director

AMENDATORY SECTION (Amending WSR 96-03-073, filed 1/17/96, effective 2/17/96)

WAC 246-919-330 Postgraduate medical training defined. (1) For the purposes of this chapter, postgraduate medical training ~~((shall be considered to))~~ means clinical training approved by the commission in general medicine or surgery, or a recognized specialty or subspecialty in the field of medicine or surgery. The training must be acquired after completion of a formal course of undergraduate medical instruction outlined in RCW 18.71.055. Only satisfactory clinical performance ~~((deemed unsatisfactory by the program performance))~~ evaluations will ~~((not))~~ be accepted. This definition ~~((shall be considered to))~~ includes, but is not be limited to, internships, residencies and fellowships in medical or surgical subjects.

(2) The commission approves only the following postgraduate clinical training courses:

(a) Programs accredited by the (~~American Medical Association~~) Accreditation Council for Graduate Medical Education (ACGME) which are listed in the 1984-85 directory of residency programs, or programs approved by the (~~American Medical Association~~) Accreditation Council at the time of residency.

(b) (~~Preregistration training~~) Programs (~~approved as of July 1, 1982;~~) accredited by the (~~Canadian National Joint Committee on Accreditation of Preregistration Physician Training Programs~~) Royal College of Physicians and Surgeons of Canada (RCPC) or the College of Family Physicians of Canada (CFPC), or programs (~~approved~~) accredited by the (~~Canadian National Joint Committee on Accreditation of Preregistration Physician Training Programs~~) RCPC or CFPC at the time of residency.

PROPOSED RULES

DEPARTMENT OF AGRICULTURE

[Filed June 6, 2001, 10:43 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-23-047.

Title of Rule: Organic producer and transitional producer certification.

Purpose: Chapter 16-156 WAC are the rules for the certification of organic farmers. The rules provide the application, inspection, sampling, fee schedule and certification criteria for obtaining organic and transition to organic certification.

Statutory Authority for Adoption: Chapter 15.86 RCW.
Statute Being Implemented: Chapter 15.86 RCW.

Summary: The Department of Agriculture is proposing to require that prior to obtaining organic certification producers will need to be certified as transition to organic producers. The department is proposing new fees for new sites and export certificates to recover the cost of administering the organic certification program.

Reasons Supporting Proposal: The Department of Agriculture has developed the proposal in coordination with the state's Organic Advisory Board. The proposed changes are needed to improve the integrity of the organic certification process.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Miles McEvoy, Olympia, (360) 902-1924.

Name of Proponent: Organic Food Program, Washington State Department of Agriculture, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Organic producer and transitional producer certification, chapter 16-156 WAC, provides the certification procedures and requirements for producers of organic food products. The standards specify application, inspection, sampling, certification and decertification procedures as well as the requirements for recordkeeping and use of the Washing-

ton State Department of Agriculture (WSDA) organic food producer logo. The rule includes the fee structure for fees charged to applicants for the application and certification services.

The purpose for the proposed amendments to organic producer and transitional producer certification, chapter 16-156 WAC, is to require producers to obtain certification during the transitional time period when their farm is being converted to organic crop production. These changes will improve the integrity and validity of the organic certification process by requiring inspection and sampling during the transitional years. The rules also modify the fee schedule for new sites, transition to organic certification, and export certificates.

Proposal Changes the Following Existing Rules: **Introduction:** The organic producer and transitional producer certification, chapter 16-156 WAC, are designed to protect the integrity of organic food products. The rules include the organic certification requirements for producers of organic and transition to organic food products. The requirements include the sampling and inspection requirements; certification and decertification criteria; record-keeping requirements; application criteria and procedures; and fees for certification.

The WSDA Organic Advisory Board has been working with organic food program staff to develop the proposed amendments. The amendments are being proposed to increase the integrity of the organic certification process.

Notes on Amendments:

WAC 16-156-004 Definition, adds definitions of crop and pasture.

WAC 16-156-030 Certification, this section is amended to improve the verification criteria for obtaining organic certification. New certification criteria include requiring the completion of the organic farm plan and verification that the plan has been implemented. The section is amended to clarify the process for issuing organic certification to a producer for a site in organic food production.

The amendments require certification during the transition from conventional farming to organic farming. In 2002, in order for a site to be granted organic certification; it would need to be previously certified as organic; certified in the past year as second year transition; documented to not have been in farm production in the previous year; or verified that the producer was exempt from certification under the small farm exemption criteria (direct sales under \$5,000 per year).

In 2003, in order for a site to be granted second year transitional certification, it would need to be previously certified as first year transitional, or documented to not have been in farm production in the previous year.

WAC 16-156-035 Decertification, this section is amended to specify that failure to allow inspection to take place is a condition for revoking organic certification.

WAC 16-156-050 Application for certification, this section is amended to clarify that producers must be certified unless they sell direct to consumers less than \$5,000 in agricultural products. It also specifies that applications must be received at least sixty days prior to the harvest of organic

PROPOSED

food products. It also specifies March 31 as the expiration date for organic food producer certificates.

WAC 16-156-060 Fee schedule, the fee schedule is amended to base organic certification fees solely on the sales of organic food products. Certification of transitional sites is proposed to be based on a per acre fee of five dollars per acre. The fee schedule is also amended to require a fifty dollar fee for adding an additional site to a certificate.

WAC 16-156-070 Export and transaction certificates, this is a new section that would charge a thirty dollar fee for each export and transaction certificate that is issued by the agency. Export and transaction certificates are issued to verify that a specific shipment of organic food products complies with organic standards. This new section would allow the agency to recover the cost of providing this service.

A small business economic impact statement has been prepared under chapter 19.85 RCW.

Small Business Economic Impact Statement

Introduction: Organic producer and transitional producer certification, chapter 16-156 WAC, provides the certification procedures and requirements for producers of organic and transitional food products. The standards specify application, inspection, sampling, certification and decertification procedures as well as the requirements for recordkeeping and use of the WSDA organic food producer logo. The rule includes the fee structure for fees charged to applicants for the application and certification services.

Purpose for the Rule Amendment: The purpose for the proposed amendments to organic producer and transitional producer certification, chapter 16-156 WAC, is to require producers to obtain certification during the transitional time period when their farm is being converted to organic crop production. These changes will improve the integrity and validity of the organic certification process by requiring inspection and sampling during the transitional years. The rules also modify the fee schedule for new sites, transitional certification, and export certificates.

Businesses Affected by the Rule Amendment: Organic producer and transitional producer certification, chapter 16-156 WAC, affects all individuals and businesses that produce or are planning on producing organic food in Washington state. Producers are defined as any person or organization who or which grows, raises or produces an agricultural product. Last year, the department certified 518 producers of organic food. All organic producers are small businesses with less than fifty full-time, year round employees.

Reporting Requirements: No new reporting requirements are being proposed.

Record-keeping Requirements: No new record-keeping requirements for organic and transitional producers are being proposed.

Compliance Requirements: There will be no additional costs for transitional producers currently certified. The proposed changes will impose additional compliance costs to those transitional producers that are not certified. The additional costs will include direct certification costs and administrative costs for the time it takes to complete application forms and to be inspected by a state inspector.

Cost of Compliance: Requiring Transition to Organic Certification: Under the current organic certification rules, producers must not apply any prohibited substances for at least three years prior to the harvest of organic food. In order to verify that the organic crop production standards have been followed the department conducts inspection of organic producers and producers that are in transition to organic food production. Under the organic food products statute, chapter 15.86 RCW, organic producers are required to obtain certification prior to selling organic food products. Transitional producers are not required to obtain certification during the three years that they are converting their farm to organic food production.

The majority of producers choose to obtain certification during the transitional time period in order to ensure that they are meeting the requirements for certification. Some producers do not obtain certification during this transitional time period and maintain records that document that they have complied with the organic standards. Requiring certification during the transitional period will affect only the producers that choose not to obtain certification during the transitional period.

Additional New Site Fee: The proposed amendments include a new fee for adding new sites to the organic certification program. Sites are defined as a defined field, orchard, block, pasture, paddock, garden, circle, plot or other designated area. Many organic producers have more than one site in the organic certification program. The organic certification process requires that each site is inspected on an annual basis. In order to add an additional site to their certification, producers must submit a site information form and maps for the new site. The department conducts a separate inspection and review of the new site. The department is proposing to recover some of the additional costs involved in inspecting and certifying additional sites through the additional new site fee. The fee for adding additional sites is a one time fee of \$50 per site.

Changes to the Assessment of Fees for Transitional Certification: Under the current fee schedule producers pay fees based on the value of crops grown on acres certified under the program. For many producers it has been difficult to determine the value of transitional crops. We are proposing that the certification fees for transitional certification be based on the acres certified rather than the value of the crop. The fees for transitional certification under the proposed new schedule will be comparable to the old fee schedule and will make calculation of the appropriate fee easier to determine for most producers.

Export and Transaction Certificate Fee: Over the last few years the number of export and transaction certificates issued by the organic food program has increased dramatically. In order to recover the costs involved in preparing and issuing these export and transaction certificates the agency is proposing to charge a thirty dollar fee to process each certificate.

Professional Services: The reporting, record-keeping and compliance requirements would not necessitate the need for professional services. No professional service expenses

would be incurred by the small businesses affected by the amendments to chapter 16-156 WAC.

Industries Impacted by the Rule Amendment: All producers of organic and transitional food products in Washington state within the following SIC codes are impacted by chapter 16-156 WAC: 019 general farms, primarily crop; 0241 dairy farms; 029 general farms, primarily livestock and animal specialties; 201 meat products; 202 dairy products; 203 canned, frozen, preserved fruits, vegetables and food specialties; 205 bakery products; 515 farm product—raw materials; 542 meat and fish (seafood) markets; and 545 dairy product stores. All producers of organic food in Washington state are impacted by chapter 16-156 WAC. All organic producers are small businesses with less than fifty full-time, year round employees.

Impact On Small Businesses: The proposed amendments to chapter 16-156 WAC would not impose a disproportionate economic impact on small businesses because all producers of organic and transitional food in Washington state are considered small businesses (less than fifty full-time, year-round employees). The proposed amendments to organic producer and transitional producer certification, chapter 16-156 WAC, would not impose a disproportionate economic impact on small businesses because all producers of organic food are required to submit application fees based on their gross organic sales and pay additional fees for adding new sites to their certification. All producers of transitional food would pay fees based on the acres that they enrolled into the program. No new record-keeping requirements would be imposed.

Producers converting their farms to organic food production will be required to obtain certification during the transitional time period. Many producers already choose to obtain certification during this transitional time period.

Mitigation: The organic food program provides information and technical assistance for complying with the organic and transitional certification standards. Information and technical assistance is available through the telephone, United States mail, e-mail, and the organic food program's web page.

Industry Outreach: The WSDA has worked with the Organic Advisory Board (OAB) on the proposed amendments to chapter 16-156 WAC. The OAB is comprised of organic industry members including farmers, packers, processors, consumers and farm input suppliers. The proposed amendments are being sent to all organic producers, processors and handlers. The proposal will include a comment form in order to facilitate the affected industry's ability to comment on the proposal.

A copy of the statement may be obtained by writing to Miles McEvoy, Organic Food Program, P.O. Box 42560, Olympia, WA 98504-2560, phone (360) 902-1924, fax (360) 902-2087.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. The Washington State Department of Agriculture is not a listed agency in section 201.

Hearing Location: Natural Resources Building, Room 259, 1111 Washington Street, Olympia, WA 98504-2560, on July 11, 2001, at 11 a.m.

Assistance for Persons with Disabilities: Contact Julie Carlson by July 5, 2001, TDD (360) 902-1996, or (360) 902-1880.

Submit Written Comments to: Miles McEvoy, Organic Food Program, P.O. Box 42560, Olympia, WA 98504-2560, fax (360) 902-2087, by 5 p.m., July 11, 2001.

Date of Intended Adoption: July 20, 2001.

June 5, 2001

John Daly

Assistant Director

Chapter 16-156 WAC

ORGANIC PRODUCER AND (~~TRANSITION TO ORGANIC~~) TRANSITIONAL PRODUCER CERTIFICATION

AMENDATORY SECTION (Amending Order 6011, filed 12/20/96, effective 1/20/97)

WAC 16-156-004 Definitions. As used in this chapter:

(1) "Crop" means a plant or part of a plant intended to be marketed as an agricultural product or fed to livestock.

(2) "Department" means the department of agriculture of the state of Washington.

~~((2))~~ (3) "Director" means the director of the department of agriculture or his or her duly authorized representative.

~~((3))~~ (4) "Drift" is defined as the movement of prohibited substances by air, water or soil from the intended target and results in residues of prohibited substances on organic or transition to organic food in excess of five percent of the EPA tolerance level.

~~((4))~~ (5) "Gross sales" means the sales of organic (~~and transition to organic~~) food sold during the calendar year.

~~((5))~~ (6) "Labeling" means all written, printed, or graphic matter upon any article or any of its containers or wrappers, or accompanying such article, or used in the advertisement of such article.

~~((6))~~ (7) "New applicant" means any person or organization who or which applies for organic or (~~transition to organic~~) transitional certification for the first time, or when previous certification status has expired for at least one year.

~~((7))~~ (8) "Organic food" means any agricultural product, including meat, dairy, and beverage, that:

(a) Is marketed using the term organic or any derivative of organic in its labeling or advertising; and

(b) That has had no applications of prohibited substances within three years prior to the harvest of the crop; and

(c) That is produced in compliance with standards defined in chapter 15.86 RCW and rules adopted thereunder.

~~((8))~~ (9) "Pasture" means ground covered with vegetation that is used by animals for grazing purposes.

(10) "Producer" means any person or organization who or which grows, raises or produces an agricultural product.

~~((9))~~ (11) "Prohibited substance" means a material which is disallowed in organic food production, handling, or processing.

PROPOSED

~~((10))~~ (12) "Renewal applicant" means any person or organization who or which has applied for organic or ~~((transition to organic))~~ transitional certification in the previous year.

~~((11))~~ (13) "Site" means a ~~((defined))~~ designated farm field, orchard, block, pasture, paddock, garden, circle, plot or other ~~((designed area))~~ contiguous area under the same management (e.g., organic or transitional). A site may contain multiple crops.

~~((12))~~ ~~"Transition to organic")~~ (14) "Transitional food" means any agricultural product that:

(a) Is marketed using the term ~~((transition to organic or))~~ transitional in its labeling and advertising; and

(b) Satisfies all of the requirements of organic food except that it has had no applications of prohibited substances within one year prior to the harvest of the crop.

AMENDATORY SECTION (Amending Order 6011, filed 12/20/96, effective 1/20/97)

WAC 16-156-030 Certification. (1) ~~((Washington state department of agriculture certification means that:))~~ The conditions for obtaining organic and transitional food producer certification are as follows:

(a) Inspection of the producer by the department of agriculture showed no use of prohibited practices as defined in chapter 15.86 RCW or unless adopted thereunder; and

(b) Recordkeeping practices meet the requirements specified in WAC 16-156-040 or rules adopted under chapter 15.86 RCW; and

(c) Soil building programs, organic pest control programs, and buffer zones required under chapter 16-154 WAC were established on each site; and

(d) Completion of the organic farm plan and verification that it has been implemented; and

(e) Analysis of samples taken by the department of agriculture showed no prohibited substance usage or drift from other contaminants; and

~~((e))~~ (f) No application of prohibited substances, as defined in chapter 16-154 WAC, have been used for:

- At least three years prior to the harvest of organic food; or
- At least one year prior to the harvest of ~~((transition to organic))~~ transitional food.

(2) For each site, the director must review the application, inspection report and results of any samples collected to determine that the producer has complied with the conditions for certification on that site.

(3) For each site, a certificate will be issued when the director determines that the producer has complied with the conditions for organic or transitional food producer certification on that site.

(4) Beginning in the year 2002, prior to the issuance of an organic food producer certificate:

(a) The site must have been previously certified as organic; or

(b) The site must have been certified as second year transitional in the previous year; or

(c) The producer has documentation that verifies that the site was in pasture or not being farmed during the previous two years.

(5) Beginning in the year 2003, prior to the issuance of a second year transitional food producer certificate:

(a) The site must have been certified as first year transitional in the previous year; or

(b) The producer has documentation that verifies that the site was in pasture or not being farmed during the previous year.

(6) Producers of organic food who ~~((apply))~~ are certified under this program will be able to use the words, "produced in accordance with the Washington state department of agriculture organic food certification program" in their labeling as long as their practices comply with chapter 15.86 RCW or any rules adopted thereunder.

Food produced under this organic food certification program may be identified by the use of one of the attached logos (WAC 16-156-060, Illus. 1~~((,-1A))~~). These logos shall only be used for food produced by producers who have been certified organic by the Washington state department of agriculture ~~((organic food certification program))~~.

~~((3))~~ (7) Producers of ~~((transition to organic))~~ transitional food who ~~((apply))~~ are certified under this program will be able to use the words "produced in accordance with the Washington department of agriculture ~~((transition to organic))~~ transitional food certification program" in their labeling as long as their practices comply with this chapter and chapter 15.86 RCW and rules adopted thereunder.

Food produced under this ~~((transition to organic))~~ transitional food certification program may be identified by use of one of the attached logos (WAC 16-156-060, Illus. 2~~((,-2A))~~). These logos shall only be used for ~~((transition to organic))~~ transitional food produced by producers who have been certified transitional by the Washington state department of agriculture ~~((s organic food certification program))~~.

~~((4))~~ (8) In no event shall food be sold as Washington certified organic or Washington certified ~~((transition to organic))~~ transitional prior to the issuing of an organic or ~~((transition to organic))~~ transitional food producer certificate by the department of agriculture for that crop year. First year applicants and new sites shall be inspected by the department before an organic or ~~((transition to organic))~~ transitional food producer certificate is issued.

~~((5))~~ (9) The logos to identify organic food and ~~((transition to organic))~~ transitional food shall not be changed except for increases or decreases in size, as appropriate.

AMENDATORY SECTION (Amending Order 6011, filed 12/20/96, effective 1/20/97)

WAC 16-156-035 Decertification. Whenever the director finds that a producer who has been certified under this program has:

(1) Violated the standards for certification which are set forth in RCW 15.86.030 or any rules adopted under chapter 15.86 RCW;

(2) Filed an application for certification which is false or misleading in any particular;

(3) Violated any of the provisions of this chapter; ~~((or))~~

(4) Failed to provide records as required by this chapter, WAC 16-154-060 or 16-162-100; or

(5) Failed to allow inspection to take place.

The director may issue an order revoking that producer's certification under this program or he may issue an order directing the producer to take other appropriate action to correct the violation. If appropriate action is taken, the producer will be returned to its previous status under the program.

Any producer who has received notice that its certification may be revoked under this section may apply for a hearing under the Washington Administrative Procedure Act, chapter 34.05 RCW.

AMENDATORY SECTION (Amending Order 6011, filed 12/20/96, effective 1/20/97)

WAC 16-156-050 Application for certification. ~~((Producers who wish to apply for the organic food certification program must apply to the department by March 1 of each year. The application, accompanied by the appropriate fee shall be submitted to the department on forms furnished by the department. This application must include a sworn statement that they fully comply with the statute and rules for production of organic food and/or transition to organic food. Organic food producer and transition to organic food producer certificates shall expire on March 31st of the year following their issuance.~~

~~Applications made after the set deadline may be processed as the department can schedule the initial inspections. Except for producers who sell no more than five thousand dollars annually in value of agricultural products directly to consumers, all producers of organic or transition to organic food must be certified by the department.)~~ (1) All producers of organic food products must be certified by the department or through a recognized organic certification agency, except for producers that sell less than five thousand dollars annually in value of agricultural products directly to consumers.

(2) Applications to the department for organic food certification must be made on an annual basis at least sixty days prior to the harvest of organic food products. The application, accompanied by the appropriate fee, must be submitted to the department on forms furnished by the department.

(3) Organic food producer and transitional food producer certificates shall expire on March 31st of the year following their issuance.

AMENDATORY SECTION (Amending WSR 97-24-006, filed 11/21/97, effective 12/22/97)

WAC 16-156-060 Fee schedule. (1) The cost per application shall be based on the following fee schedule.

~~((For))~~ Renewal applicants -

Application fees shall be based on the previous calendar year's gross sales of organic ~~((and transition to organic))~~ food. In the event that the current calendar year's gross sales exceed the previous year's gross sales, the department may bill the producer for the additional fee. In the event that the current calendar year's gross sales is less than the previous year's gross sales, the producer may request a refund for the reduced fee. In addition, renewal applications postmarked

after March 1, shall pay a late fee of fifty dollars. Renewal applicants that are adding additional sites to their organic certification must pay a new site fee of fifty dollars for each additional site.

~~((For))~~ New applicants -

Application fees shall be based on an estimate of the current year's gross sales of organic ~~((and transition to organic))~~ food. In the event that the current calendar year's gross sales exceed the estimate, the department may bill the producer for the additional fee. In the event that the current calendar year's gross sales is less than the estimate, the producer may request a refund for the reduced fee. In addition, new applicants pay a seventy-five dollar new applicant fee. New applicants that are seeking organic certification for more than one site must pay a site fee of fifty dollars for each additional site. The fee shall accompany the application.

Gross Sales	Annual Fee
\$ 0 - \$ 12,000	\$ 165
\$ 12,001 - \$ 15,000	\$ 200
\$ 15,001 - \$ 20,000	\$ 220
\$ 20,001 - \$ 25,000	\$ 275
\$ 25,001 - \$ 30,000	\$ 330
\$ 30,001 - \$ 35,000	\$ 385
\$ 35,001 - \$ 42,500	\$ 465
\$ 42,501 - \$ 50,000	\$ 550
\$ 50,001 - \$ 65,000	\$ 660
\$ 65,001 - \$ 80,000	\$ 825
\$ 80,001 - \$ 100,000	\$ 990
\$ 100,001 - \$ 125,000	\$ 1,100
\$ 125,001 - \$ 150,000	\$ 1,150
\$ 150,001 - \$ 175,000	\$ 1,320
\$ 175,001 - \$ 200,000	\$ 1,375
\$ 200,001 - \$ 240,000	\$ 1,540
\$ 240,001 - \$ 280,000	\$ 1,595
\$ 280,001 - \$ 325,000	\$ 1,650
\$ 325,001 - \$ 375,000	\$ 1,720
\$ 375,001 - \$ 425,000	\$ 2,200
\$ 425,001 - \$ 500,000	\$ 2,300
\$ 500,001 - \$ 750,000	\$ 2,750
\$ 750,001 and up	\$ 2,000

plus one-tenth of one percent (0.10%) of gross organic sales

(2) Transitional acreage fee - Each applicant shall pay a fee of five dollars per acre for the land for which they are requesting transition to organic certification.

(3) Two inspections per year within the state of Washington are provided for under the above fee schedule. Additional inspections (in addition to two inspections provided for), if required for certification or maintenance of certification by the director, or requested by the producer, shall be at \$30/hr. plus mileage set at the rate established by the state office of financial management.

PROPOSED

Out-of-state inspections, if necessary or requested, shall be at the rate of \$30/hr. plus transportation costs.

((3)) (4) One sample per year is provided for under the above fee schedule. Additional samples (in addition to one sample provided for), if required for certification or maintenance of certification by the director, or requested by the organic producer, shall cost an additional lab fee of one hundred ten dollars. If an additional visit must be arranged to obtain a sample, it shall be at \$30/hr. plus mileage set at the rate established by the state office of financial management.

PROPOSED

NEW SECTION

WAC 16-156-070 Export and transaction certificates. (1) Organic export and transaction certificates are issued to verify that a specific shipment of organic food products has been produced, processed, and handled in accordance with chapter 15.86 RCW and rules adopted thereunder.

(2) Applications for export and transaction certificates must be submitted on forms furnished by the department. The applicant must furnish all information requested on the application. A separate application must be made for each export and transaction certificate.

(3) The fee for export and transaction certificates shall be thirty dollars per application.

WSR 01-12-101
PROPOSED RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES

[Filed June 6, 2001, 11:36 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 98-08-084.

Title of Rule: Chapter 388-148 WAC, Licensing requirements for child foster homes, group care programs/facilities and agencies.

Purpose: Clarify the language of the licensing requirements for foster homes, group care programs/facilities and child-placing agencies licensed by Children's Administration, DSHS. The chapter incorporates changes in state and federal law, Children's Administration policy and current legislation.

Statutory Authority for Adoption: RCW 74.15.030.

Statute Being Implemented: RCW 74.15.030.

Summary: Change in the format and organization adds to clarity. The major changes have to do with strengthening health and safety requirements regarding exposure to second-hand smoke, water hazards, psychotropic medications, securing a child's belongings; increasing staffing during sleeping hours in group care facilities, raising the age of child care staff; changing language to comply with changes in federal legislation.

Reasons Supporting Proposal: Overall clarity, elimination of duplicative and out-of-date regulations, and effectiveness of the rules affecting foster homes, group care facilities and child-placing agencies will be achieved.

Name of Agency Personnel Responsible for Drafting and Implementation: Jean L. Croisant, P.O. Box 45710, Olympia, WA 98504-5710, (360) 902-7992; and Enforcement: Division of Licensed Resources, Office of Foster Care Licensing, Children's Administration, Department of Social and Health Services.

Name of Proponent: Department of Social and Health Services, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The purpose of the chapter is to define the minimum general and specific licensing requirements for foster homes, staffed residential homes, group facilities and child-placing agencies. Foster homes and group care facilities must be regulated to ensure that children experience safe and healthy care while in out-of-home placement.

The anticipated effect will be the overall clarification of the requirements licensing foster homes, group care facilities and child-placing agencies. The more clearly written question and answer format will improve understanding of the rules and consistency of interpretation of the WAC chapter. It is anticipated there will be greater compliance with the rules, more effective monitoring, and fewer corrective action plans needed as a result of the changes.

Proposal Changes the Following Existing Rules: Some of the changes are as follows:

- Clarifying the use of psychotropic drugs.

- Aligning the chapter with federal laws under the Multi-ethnic Placement Act of 1994 and the Interethnic Adoption Provisions Act of 1996.
- Clarifying the difference between licensing and certification.
- Requiring a child's belongings to be secured for up to thirty days when a child leaves a home or facility, which allows time for the child's personal belongings to be moved to the new placement.
- Addition of the "awake staff" in group care settings where there are more than six children in care; or the focus of the program is behavioral in nature rather than transitional living or when the child's behavior is a risk.
- Expansion of the behavior management policy to include requiring training prior to the use of any physical restraint.
- Prohibiting smoking in any home or facility caring for children and in motor vehicles while transporting children.
- Clarification of capacity for foster homes allowing licensing for up to six foster children with the approval of the department.
- Have the same qualifications for the director, on-site program manager, and child care staff for all group care programs.
- Raising the minimum age of the licensee from eighteen to twenty-one years old.
- Raising the age of child care staff from eighteen to twenty-one years old, unless the person is nineteen or twenty and participation in an internship program with an accredited college or university.
- Reducing the capacity for respite care to comply with the general foster home licensed capacity.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Children's Administration gathered information in the small businesses in each region. A telephone survey was completed on those identified regarding changes in the rules. It was determined from the survey results that their costs would be minor. Therefore, only minor costs will be imposed on small businesses affected by these changes.

The preparation of a comprehensive small business economic impact statement is not required.

RCW 34.05.328 applies to this rule adoption. The proposed rule changes for chapter 388-148 WAC, Licensing requirements for foster homes, group care programs/facilities and agencies, are "significant legislative rules" as defined in RCW 34.05.325 and therefore require a cost benefit analysis (CBA). A copy of the CBA may be requested by contacting Jean L. Croisant, at the Division of Program and Policy Development, Children's Administration, P.O. Box 45710, Olympia, WA 98504-5710, (360) 902-7992, or loje300@dshs.wa.gov.

Hearing Location: The public hearing will be conducted through Department of Information Services videoconference, on August 9, 2001, at 10:00 a.m.; DIS - Interactive Technologies, Yesterday's Village, The 15 West Yakima Avenue Building, 15 West Yakima Avenue, Suite 220, Yakima, WA 98902, (509) 454-7878; at Educational Service District (ESD) 112, 2500 N.E. 65th Avenue, Vancouver, WA

PROPOSED

98661, (360) 750-7500; at 1107 S.W. Grady Way, Suite 112, Renton, WA 98055, (425) 277-7290; at DIS Interactive Technologies, 710 Sleater Kinney Road S.E., Suite Q, Lacey, WA 98504-2445, (360) 407-9487; at 8551 West Gage Boulevard, Suite H, Kennewick, WA 99336, (509) 734-7180; and at 1101 North Argonne, Suite 109, Spokane, WA 99201, (509) 921-2371.

Assistance for Persons with Disabilities: Contact Kelly Cooper, DSHS Rules Coordinator, by August 2, 2001, phone (360) 664-6094, TTY (360) 664-6178, e-mail myercme@dshs.wa.gov.

Submit Written Comments to: Identify WAC Numbers, DSHS Rules Coordinator, Rules and Policies Assistance Unit, P.O. Box 45850, Olympia, WA 98504-5850, fax (360) 664-6185, by August 9, 2001.

Date of Intended Adoption: No sooner than August 10, 2001.

May 30, 2001

Brian H. Lindgren, Manager
Rules and Policies Assistance Unit

Reviser's note: The material contained in this filing exceeded the page-count limitations of WAC 1-21-040 for appearance in this issue of the Register. It will appear in the 01-14 issue of the Register.

**WSR 01-12-103
PROPOSED RULES
DEPARTMENT OF
LABOR AND INDUSTRIES**

[Filed June 6, 2001, 11:58 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 01-09-093 on April 18, 2001.

Title of Rule: Chapter 296-307 WAC, Safety standards for agriculture and chapter 296-24 WAC, General safety and health standards. Minor housekeeping changes throughout chapters 296-32, 296-36, 296-45, 296-54, 296-56, 296-62, 296-78, 296-155, and 296-350 WAC, WISHA administrative rules.

Purpose: As a result of the new safety and health core rules, chapter 296-800 WAC, which were adopted on May 9, 2001, additional clarifying and housekeeping changes are needed. The majority of the changes are references that need to be updated throughout WISHA's other rules. Also, the agricultural industry voiced their concern at the public hearings for the safety and health core rules that some of the core rules would apply to them. We subsequently met with stakeholders in the agricultural industry to address their concerns. It was agreed that some of the rules in the safety and health core rule book, which were taken from chapter 296-62 WAC, General occupational health standards, should be included in chapter 296-307 WAC, Safety standards for agriculture. They are:

- Employer chemical hazard communication.
- Lighting.
- Environmental tobacco smoke.

We would like your comments on whether you think this meets the requirements and intent of RCW 49.17.041 (2) and

(3), which states in part that "...rules for agricultural safety adopted under this chapter must exempt agricultural employers from the general industry safety standard adopted under chapter 49.17 RCW for all rules not specifically referenced in the agriculture safety standard." And "The department shall publish in one volume all of the occupational safety rules that apply to agricultural employers..."

Also, the first-aid requirements in chapter 296-307 WAC are being updated, which is actually more current, allowing two options for employers to ensure that there will be first-aid trained staff.

A summary of the proposed rules follows:

WAC 296-24-23505 Cabs.

- Add a reference to subsection (3) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-24-260 Helicopters.

- Add a reference to subsection (21) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-24-33009 Container and portable tank storage.

- Add a reference to subsection (7) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-24-33015 Service stations.

- Add a reference to subsection (8) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-24-47509 Systems utilizing containers other than DOT containers.

- Add a reference to subsection (14) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-24-47513 Storage of containers awaiting use or resale.

- Add a reference to subsection (7) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-24-47517 Liquefied petroleum gas service stations.

- Add a reference to subsection (14) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-24-55001 Definitions.

- Delete the following definitions: "Means of egress," "exit access," "exit," "exit discharge," "low hazard contents," "high hazard contents" and "ordinary hazard contents."

WAC 296-24-59203 Exemptions.

- These requirements are located in WAC 296-800-300.
- Repeal this section.

WAC 296-24-631 Employee alarm systems.

- Requirements relating to employee alarm systems are located in WAC 296-800-300.

PROPOSED

- Repeal this section.

WAC 296-24-63101 Scope and application.

- Repeal this section.

WAC 296-24-63103 General requirements.

- Repeal this section.

WAC 296-24-63105 Installation and restoration.

- Repeal this section.

WAC 296-24-63107 Maintenance and testing.

- Repeal this section.

WAC 296-24-63109 Manual operation.

- Repeal this section.

WAC 296-24-63199 Appendix A—Employee alarm systems.

- Repeal this section.

WAC 296-24-68215 Public exhibitions and demonstrations.

- Add a reference to subsection (2) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-24-75003 Protection for floor openings.

- Requirements relating to guarding of stairway floor openings are located in WAC 296-800-250 and 296-800-260.
- Requirements relating to guarding of temporary floor openings are located in WAC 296-800-250 and 296-800-260.
- Requirements relating to guarding of floor holes are located in WAC 296-800-250 and 296-800-260.
- Requirements relating to floor hole covers are located in WAC 296-800-250 and 296-800-260.
- Requirements relating to doors or gates opening directly on a stairway are located in WAC 296-800-250.

WAC 296-24-75007 Protection of open-sided floors, platforms and runways.

- Requirements relating to the guarding of open-sided floors or platforms four feet or more above adjacent floor or ground level are located in WAC 296-800-250.
- Deleted the words "floors" and "platforms" from the title of this section.

WAC 296-24-75009 Stairway railings and guards.

- Requirements relating to stairway railings and guards are located in WAC 296-800-250.
- Repeal this section.

WAC 296-24-78003 Application of requirements.

- Deleted the words "care and use" from this section. Requirements relating to the care and use of ladders are located in WAC 296-800-290.

WAC 296-24-78005 Materials.

- Moved the table from WAC 296-24-78009, relating to the classification of various species of wood acceptable

for use in a ladder, to this section for better organization of information.

WAC 296-24-78009 Care and use of ladders.

- Requirements relating to the care and use of ladders are located in WAC 296-800-290.
- Moved the table relating to the classification of various species of wood acceptable for use in a ladder to WAC 296-24-78005 for better organization of information.
- Remaining requirements left in this section relate to ladder tests.
- Changed the title of this section to "Ladder tests."

WAC 296-36-190 Fire prevention and fire fighting.

- Add a reference to subsection (7) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-45-67545 Refueling operations.

- Add a reference to subsection (2) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-54-521 Motor vehicles.

- Add a reference to subsection (9) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-54-59330 Log unloading, booms, and rafting grounds—Boats and mechanical devices on waters.

- Add a reference to subsection (7) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-56-60083 Cranes and derricks.

- Add a reference to subsection (6) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-56-60171 General requirements.

- Add a reference to subsection (3) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-56-60207 General requirements.

- Add a reference to subsection (4) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-59-105 Handcharge makeup methods.

- Add a reference to subsection (3) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-62-05209 Access to records.

- Update a reference.

WAC 296-62-07619 Hygiene facilities and practices.

- Update a reference.

WAC 296-62-07719 Hygiene facilities and practices.

- Update references.

WAC 296-62-09001 Definitions.

- Delete the definition of "illumination." This definition is located in the safety and health core rules, chapter 296-800 WAC.
- Renumber section.

WAC 296-62-31335 Showers and change rooms.

- Update a reference.

WAC 296-62-40025 Appendix A—National Research Council recommendations concerning chemical hygiene in laboratories (nonmandatory).

- Add a reference to subsection (3) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-78-56505 Boats and mechanical devices on water.

- Add a reference to subsection (7) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-78-795 Crane cages.

- Add a reference to subsection (3) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-155-270 Flammable and combustible liquids.

- Add a reference to subsection (4) and (7) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-155-275 Liquefied petroleum gas (LP-gas).

- Add a reference to subsection (12) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-155-525 Cranes and derricks.

- Add a reference to subsection (3) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-155-575 Helicopters and helicopter cranes.

- Add a reference to subsection (20) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-155-730 Tunnels and shafts.

- Add a reference to subsection (22) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-155-745 Compressed air.

- Add a reference to subsection (12) referencing the portable fire extinguisher requirements located in WAC 296-800-300.

WAC 296-307-018 What are the employer's responsibilities?

- Update a reference in subsection (4).

WAC 296-307-039 How many people at the worksite must be first-aid trained?

- Change the title of this section to "first-aid summary."

WAC 296-307-03905 Make sure that first-aid trained personnel are available to provide quick and effective first-aid.

- Create this section to include requirements relating to first-aid trained personnel being available.

WAC 296-307-03910 Make sure first-aid training contains required subjects.

- Create this section to include requirements relating to first-aid training.

WAC 296-307-03915 Document your first-aid training.

- Create this section to include requirements relating to documenting first-aid training.

WAC 296-307-03920 Make sure appropriate first-aid supplies are readily available.

- Create this section to include requirements relating to appropriate first-aid supplies.

WAC 296-307-03925 Provide a first-aid station when required.

- Create this section to include requirements relating to first-aid stations.

WAC 296-307-042 Must an employer provide first-aid kits?

- Repeal this section. Requirements are located in WAC 296-307-03920.

WAC 296-307-07013 What rules apply to vehicles used to transport employees?

- Add a reference relating to first-aid in subsection (12).

WAC 296-307-12040 Pesticide safety training—Standards for workers—40 C.F.R., § 170.130.

- Update a reference in the note.

WAC 296-307-13025 Pesticide safety training—Standards for pesticide handlers—40 C.F.R., § 170.230.

- Update a reference in the note.

WAC 296-307-14505 What records must an employer keep for pesticide applications?

- Delete a reference in subsection (17).

Chapter 296-307 WAC, Part Y, Occupational health standards.

- Create this part to incorporate related health standards currently located in chapter 296-800 WAC that are applicable to the agriculture industry.

WAC 296-307-550 Employer chemical hazard communication—Introduction.

- Create this section to include an introduction and summary relating to an employer's chemical hazard communication program.

WAC 296-307-55005 Develop, implement, maintain, and make available a written chemical hazard communication program.

- Create this section to include requirements relating to developing, implementing, maintaining, and making

available a written chemical hazard communication program.

WAC 296-307-55010 Identify and list all the hazardous chemicals present in your workplace.

- Create this section to include requirements relating to identifying and listing all the hazardous chemicals in your workplace.

WAC 296-307-55015 Obtain and maintain material safety data sheets (MSDSs) for each hazardous chemical used.

- Create this section to include requirements relating to obtaining and maintaining material safety data sheets for each hazardous chemical used.

WAC 296-307-55020 Make sure material safety data sheets are readily accessible to your employees.

- Create this section to include requirements relating to making sure that material safety data sheets are readily accessible to your employees.

WAC 296-307-55025 Label containers holding hazardous chemicals.

- Create this section to include requirements relating to labeling containers that hold hazardous chemicals.

WAC 296-307-55030 Inform and train your employees about hazardous chemicals in your workplace.

- Create this section to include requirements relating to informing and training your employees about hazardous chemicals in your workplace.

WAC 296-307-55035 Follow these rules for laboratories using hazardous chemicals.

- Create this section to include requirements relating to laboratories using hazardous chemicals.

WAC 296-307-55040 Follow these rules for handling chemicals in factory-sealed containers.

- Create this section to include requirements relating to handling chemicals in factory-sealed containers.

WAC 296-307-55045 Translate certain chemical hazard communication documents upon request.

- Create this section to include requirements relating to the department translating chemical hazard communication documents upon request.

WAC 296-307-55050 Attempt to obtain a material safety data sheet (MSDS) upon request.

- Create this section to include requirements relating to the department attempt to obtain a material safety data sheet upon request.

WAC 296-307-55055 Items or chemicals exempt from the rule, and exemptions from labeling.

- Create this section to include items or chemicals exempt from this rule, and exemptions from labeling.

WAC 296-307-55060 Definitions.

- Create this section to include applicable definitions.

WAC 296-307-570 Lighting.

- Create this section to include lighting requirements.

WAC 296-307-57005 Provide and maintain adequate lighting.

- Create this section to include requirements relating to providing and maintaining adequate lighting.

WAC 296-307-590 Environmental tobacco smoke in the office.

- Create this section to include requirements relating to environmental tobacco smoke requirements.

WAC 296-307-59005 Control tobacco smoke in your building.

- Create this section to include requirements relating to controlling tobacco smoke in your building.

WAC 296-307-59010 Control tobacco smoke that comes in from the outside.

- Create this section to include requirements relating to controlling tobacco smoke that comes in from the outside.

WAC 296-350-60025 Reassuming jurisdiction or forwarding an appeal to the board.

- These requirements are located in WAC 296-800-350.
- Repeal this section.

Statutory Authority for Adoption: RCW 49.17.010, [49.17].040, and [49.17].050.

Statute Being Implemented: Chapter 49.17 RCW.

Summary: See Purpose above.

Reasons Supporting Proposal: See Purpose above.

Name of Agency Personnel Responsible for Drafting: Tracy Spencer, Tumwater, (360) 902-5530; Implementation and Enforcement: Michael A. Silverstein, Tumwater, (360) 902-5495.

Name of Proponent: Department of Labor and Industries, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: See Purpose above.

Proposal does not change existing rules. See Purpose above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. A number of criteria and exemptions were established for the small business economic impact statement (SBEIS) analysis. One key exemption from preparation of an SBEIS is presented in RCW 34.05.310 (4)(d); "rules that only correct typographical errors, make address or name changes, or clarify language of a rule without changing its effect" are not subject to the SBEIS requirements. Because the transfer of certain health rules from chapter 296-800 WAC, to chapter 296-307 WAC represents an industry requested organizational change and does not alter the content or intent of the original rules, there will not be an economic impact on Washington state business.

The analysis of the proposed rule change reveals that in addition to not imposing new costs on businesses, the pro-

PROPOSED

posed changes will actually make WISHA rules easier for agriculture employers and employees to understand and use, and thus actually save them time. In conclusion, an SBEIS is not required for these rule changes.

RCW 34.05.328 does not apply to this rule adoption. Significant rule-making criteria does not apply to these rule amendments because they do meet the exempt criteria outlined in RCW 34.05.328(5).

Hearing Location: Department of Labor and Industries Building, Room S119, 7273 Linderson Way S.W., Tumwater, WA, on July 11, 2001, at 9:00 a.m.; and at the Best Inn, 901 Berry Road, Ellensburg, WA, on July 12, 2001, at 1:30 p.m.

Assistance for Persons with Disabilities: Contact Sally Elliott by June 27, 2001, at (360) 902-5484.

Submit Written Comments to: Cindy Ireland, Project Manager, WISHA Services Division, P.O. Box 44620, Olympia, WA 98507-4620, by 5:00 p.m. on July 16, 2001.

In addition to written comments, the department will accept comments submitted to fax (360) 902-5529 and via e-mail mooc235@lni.wa.gov. Comments submitted by fax must be ten pages or less.

Date of Intended Adoption: August 1, 2001.

June 6, 2001

Gary Moore

Director

AMENDATORY SECTION (Amending WSR 98-24-096, filed 12/1/98, effective 3/1/99)

WAC 296-307-018 What are the employer's responsibilities? You must:

- (1) Provide a safe and healthful working environment.
- (2) Ensure that employees do not use defective or unsafe tools and equipment, including tools and equipment that may be furnished by the employee.
- (3) Implement a written accident prevention program as required by these standards.
- (4) Implement a hazard communication program as required by ~~((chapter 296-62 WAC, Part C))~~ WAC 296-307-550.
- (5) Establish a system for reporting and recording accidents on the OSHA 200 log. (See chapter 296-27 WAC.)
- (6) Provide safety education and training programs.
- (7) Implement the requirements of WAC 296-62-074 through 296-62-07451 to ensure the safety of employees who are exposed to cadmium in the workplace.
- (8) Implement the requirements of WAC 296-62-145 through 296-62-14529 to ensure the safety of employees who are exposed to confined spaces in the workplace.

AMENDATORY SECTION (Amending WSR 97-09-013, filed 4/7/97, effective 4/7/97)

WAC 296-307-039 ~~((How many people at the work site must be first-aid trained?))~~ **Rule summary.** ~~((1) During working hours, each farm or crew must have at least one person qualified to give first-aid.~~

~~"Qualified" means that the person holds a current certificate of first-aid training from the American Red Cross or another course with equivalent content and hours.~~

~~"Current certificate" means a first-aid training certificate that has not expired.~~

~~Note: The local department of labor and industries service location has a list of first-aid courses.~~

~~(2) The above requirement is met if the farm operator or spouse holds a current first-aid certificate and is available during working hours.~~

~~(3) Exception: The above requirements do not apply to employees whose duties require them to work alone at isolated work stations. However, employees working alone must be checked at intervals by some method agreed upon by you and the employee.)~~ Your responsibility: Make sure first-aid trained personnel are available to provide quick and effective first aid.

You must:

Make sure that first-aid trained personnel are available to provide quick and effective first aid.

WAC 246-307-03905.

Make sure first-aid training contains required subjects.

WAC 296-307-03910.

Keep current and document your first-aid training.

WAC 296-307-03915.

Make sure appropriate first-aid supplies are readily available.

WAC 296-307-03920.

Provide a first-aid station when required.

WAC 296-307-03925.

Note: Additional requirements relating to first-aid are also located in the following sections:

- = WAC 296-307-07013(12), What rules apply to vehicles used to transport employees?
- = WAC 296-307-16175, First-aid requirements for operators of temporary worker housing.
- = WAC 296-307-16380, First-aid requirements for operators of cherry harvest camps.

Definitions:

First aid: The extent of treatment you would expect from a person trained in basic first aid, using supplies from a first-aid kit. Tests, such as X rays, must not be confused with treatment. For example, an employee thought he broke his arm and went to the hospital to get X rays. If the X rays show no broken bones, they are not considered first aid. On the other hand, if they do show a broken bone, they would be considered medical treatment.

First-aid station: A well marked location where first-aid kits and supplies are stored and telephone numbers of emergency medical services are posted.

Emergency medical service: Medical treatment and care given at the scene of any medical emergency or while transporting any victim to a medical facility.

You can get copies of these rules by calling 1-800-4BE SAFE (1-800-423-7233), or by going to <http://www.lni.wa.gov>.

NEW SECTION

WAC 296-307-03905 Make sure that first-aid trained personnel are available to provide quick and effective first aid. You must:

PROPOSED

• Choose one of the following two options to make sure that your employees have access to personnel who are trained in first aid.

Option 1:

Make sure first-aid trained persons are in your workplace to help your employees if they become hurt or ill on the job by doing the following:

- Make sure that:

◆ Each person in charge of employees has first-aid training; or

◆ Another person with first-aid training is present or available to your employees, whenever you have 2 or more employees present.

Note: This rule is met if persons other than an employee, such as the farm operator or spouse, hold a current first-aid certificate and are available during working hours.

EXCEPTION: This rule does not apply to individual employees whose duties require them to work alone at isolated workstations. However, employees working alone must be checked at intervals by some method agreed upon by you and the employee.

- Adequately post emergency telephone numbers in your workplace.

Option 2:

Develop and maintain a written first-aid response plan for your workplace. If you choose this option, you must do all of the following:

- Determine how many, if any, employees should be trained in first aid, based on the following factors:

◆ What type(s) of occupational hazards are present in your workplace?

◆ How likely is it that a workplace injury or illness will occur?

◆ How serious are the occupational hazards in your workplace?

◆ How remote is your workplace?

◆ How complex is your worksite in terms of size, design, etc.?

◆ What medical emergencies have occurred at your workplace in the past?

◆ How far away and how long does it take to get to emergency medical services?

Note: Employers who require their employees to provide first aid must comply with the bloodborne pathogen rule, WAC 296-62-080.

You must:

• Make sure your first-aid response plan:

- Fits your work location, type of work, and environmental conditions.

- Identifies the available emergency medical services and access numbers and where they are posted.

- Describes the type of first-aid training employees receive, if applicable.

- Identifies the location(s) of first-aid supplies and/or first-aid stations.

- Identifies the contents of first-aid kits.

- Describes how first-aid supplies or kits will be inspected and maintained.

- Describes how injured or ill employees will have access to first-aid trained employees.

NEW SECTION

WAC 296-307-03910 Make sure first-aid training contains required subjects.

Note: Assess your workplace to determine if there are certain job hazards, if the time and distance from emergency medical services indicate a need for training beyond the items listed below.

You must:

• Make sure that every two years, employees are trained in and able to demonstrate their skill and knowledge of the following subject areas:

- Role and responsibilities of the first-aid provider.

- Assessing a scene.

- Performing an initial and ongoing assessment of an injured or ill person.

- Scene safety.

- Body substance isolation/bloodborne pathogens.

- Performing an emergency move.

- Placing an ill person in the recovery position.

- Opening and maintaining an airway.

- Providing rescue breathing.

- Managing an obstructed airway.

- Performing adult/one-rescuer CPR.

- Recognizing the warning signs and symptoms of medical problems.

- Recognizing and caring for an injured or ill person with decreased levels of responsiveness.

- Controlling external bleeding and recognizing internal bleeding.

- Recognizing and caring for victims of shock.

- Recognizing and stabilizing spinal injury.

- Recognizing and manually stabilizing suspected skeletal injuries.

- Knowledge of voluntary provisions of first aid, consent and confidentiality.

NEW SECTION

WAC 296-307-03915 Document your first-aid training. You must:

• Keep a written record of your employees' first-aid training by keeping rosters, first-aid cards, or certificates. You may store your documentation on a computer, as long as the information is readily available when requested by personnel of the department of labor and industries.

NEW SECTION

WAC 296-307-03920 Make sure appropriate first-aid supplies are readily available. You must:

• Make sure first-aid supplies are readily available. (See first-aid kit table.)

• Make sure first-aid supplies at your workplace are appropriate to:

- Your occupational setting.

- The response time of your emergency medical services.

PROPOSED

First-Aid Kit Table

Number of employees normally assigned to worksite	Minimum first-aid supplies required at worksite
1 - 15 Employees	1 Ten-package kit
16 - 30 Employees	2 Ten-package kits or 1 24-package kit
31 - 50 Employees	3 Ten-package kit or 1 36-package kit
Over 50 Employees (within 1/2 mile radius of supplies)	First-aid station or 1 36-package kit plus stretcher and two blankets

- Note:
- First-aid kits from your local retailer or safety supplier should be adequate for most nonindustrial employers.
 - The following is a list of suggested items for your first-aid kit:
 - 1 absorbent compress, 4 x 8 inches
 - 16 adhesive bandages, 1 x 3 inches
 - 1 adhesive tape, 5 yards long
 - 10 antiseptic single-use packages, 0.5 g application
 - 6 burn treatment single-use packages, 0.5 g application
 - 1 eye covering (for two eyes)
 - 1 eye wash, 1 fluid ounce
 - 4 sterile pads, 3 x 3 inches
 - 2 pair of medical exam gloves
 - 1 triangular bandage, 39 x 39 x 55 inches
 - Optional first-aid kit contents
 - Bandage compresses, 2 x 2 inches, 3 x 3 inches and 5 x 5 inches
 - Self-activating cold packs, 4 x 5 inches
 - Roller bandages, 6 yards long
 - Mouth-to-mouth barrier for CPR

You must:

- Make sure that first-aid supplies are:
 - Easily accessible to all your employees.
 - Stored in containers that protect them from damage, deterioration, or contamination. Containers must be clearly marked, not locked, and may be sealed.
 - Able to be moved to the location of an injured or acutely ill worker.

NEW SECTION

WAC 296-307-03925 Provide a first-aid station when required. You must:

- Provide a first-aid station with at least one first-aid trained employee available if there are fifty or more employees per shift at one location.
- Make sure the first-aid station:
 - Is well marked.
 - Is available to employees during all working hours.
 - Is equipped with first-aid supplies that are appropriate for your number of employees, occupational setting, and working conditions.
 - Has at least one portable first-aid kit.

Note: Kits may be carried in any motor vehicle that is used near the crew. The vehicle may be considered a first-aid station when it is identified as one and when the driver is trained in first-aid.

AMENDATORY SECTION (Amending WSR 98-24-096, filed 12/1/98, effective 3/1/99)

WAC 296-307-07013 What rules apply to vehicles used to transport employees? You must ensure that motor vehicles used regularly to transport employees meet the following requirements:

- (1) The vehicles are well equipped, covered against the weather, and maintained in good mechanical condition at all times.
- (2) A sufficient number of properly secured seats are provided in each vehicle to accommodate the number of employees transported. When emergency conditions make it necessary to transport more employees than the seating capacity can accommodate, all employees must ride within the vehicle. No employee may ride on fenders or running boards of the vehicle.
- (3) No employees may ride in or on any vehicle with their legs hanging over the end or sides. All trucks without tail gates should have safety bars.
- (4) The vehicles have storage strong enough to retain sharp tools that could present a hazard to employees being transported.
- (5) All dump-trucks used to transport employees have an adequate safety chain or locking device to ensure that the body of the truck is not raised while employees are riding in it.

(6) Explosives or highly inflammable materials are not carried in or on the vehicle while it is used to transport employees.

(7) Exhaust systems are installed and maintained in proper condition, and are designed to eliminate the employee exposure to exhaust gases and fumes.

(8) Within the cab, crew trucks must carry only the number of passengers for which they are designed. In any seating arrangement, the driver must be able to maintain full freedom of motion. The driver's normal vision must be free from obstruction by passengers or the seating arrangement.

(9) All enclosed crew trucks have an emergency exit in addition to the regular entrance.

(10) Trucks used for hauling gravel may be used as crew trucks if they meet the following requirements:

- (a) Steps in proper places;
- (b) Wooden floors;
- (c) Securely fastened seats;
- (d) Truck is properly covered; and
- (e) Compliance with all other general regulations covering crew trucks.

(11) Half-ton vehicles must haul no more than six persons including driver. Three-quarter-ton vehicles must haul no more than eight persons including driver.

(12) The vehicle is equipped with the first-aid supplies required by WAC 296-307-042, two blankets, and a fire extinguisher.

Note: Additional requirements relating to first aid are located in WAC 296-307-039.

(13) Heating units with open fires are not used in vehicles transporting crews.

PROPOSED

AMENDATORY SECTION (Amending WSR 98-24-096, filed 12/1/98, effective 3/1/99)

WAC 296-307-12040 Pesticide safety training—Standards for workers—40 CFR, § 170.130. (1) General requirement.

(a) Agricultural employer assurance. The agricultural employer shall assure that each worker, required by this section to be trained, has been trained according to this section during the last five years, counting from the end of the month in which the training was completed.

Note: In addition to the training required by this section, the agricultural employer shall assure without exception, that all employees are trained in accordance with WAC ((296-62-054 through 296-62-05427;)) 296-307-550, *Employer chemical-hazard communication.*

(b) Requirement for workers performing early entry activities. Before a worker enters a treated area on the agricultural establishment during a restricted-entry interval to perform early entry activities permitted by WAC 296-307-12020 and contacts anything that has been treated with the pesticide to which the restricted-entry interval applies, including but not limited to, soil, water, or surfaces of plants, the agricultural employer shall assure that the worker has been trained.

(c) Requirements for other agricultural workers.

(i) Information before entry. Except as provided in (b) of this subsection, before a worker enters any areas on the agricultural establishment where, within the last thirty days a pesticide to which this part applies has been applied or the restricted-entry interval for such pesticide has been in effect, the agricultural employer shall assure that the worker has been provided the pesticide safety information specified in subsection (3) of this section, in a manner that agricultural workers can understand, such as by providing written materials or oral communication or by other means. The agricultural employer must be able to verify compliance with this requirement.

(ii) Training before the start of a work period. The agricultural employer shall assure that a worker has been trained before the worker enters any areas on the agricultural establishment where, within the last thirty days a pesticide to which this chapter applies has been applied or a restricted-entry interval for such pesticide has been in effect, the agricultural employer shall assure that the worker has been trained.

(2) Exceptions. The following persons need not be trained under this section:

(a) A worker who is currently certified as an applicator of restricted-use pesticides under chapter 17.21 RCW.

(b) A worker who satisfies the training requirements of chapter 17.21 RCW.

(c) A worker who satisfies the handler training requirements of WAC 296-307-13025(3).

(d) A worker who is certified or licensed as a crop advisor by the Washington state department of agriculture under RCW 15.58.230: Provided, That a requirement for such certification or licensing is pesticide safety training that includes all the information set out in WAC 296-307-13025 (3)(d).

(3) Training programs.

(a) General pesticide safety information shall be presented to workers either orally from written materials or audiovisually. The information must be presented in a manner that the workers can understand (such as through a translator) using nontechnical terms. The presenter also shall respond to workers' questions.

(b) The person who conducts the training shall meet at least one of the following criteria:

(i) Be currently certified as an applicator of restricted-use pesticides under chapter 17.21 RCW; or

(ii) Be currently designated as a trainer of certified applicators or pesticide handlers by the Washington state department of agriculture in accordance with chapters 15.58 and 17.21 RCW; or

(iii) Have completed a pesticide safety train-the-trainer program approved by the Washington state department of agriculture in accordance with chapters 15.58 and 17.21 RCW; or

(iv) Satisfy the training requirements in WAC 296-307-13025(3).

(c) Any person who issues a Washington state department of agriculture-approved Worker Protection Standard worker training card must assure that the worker who receives the training card has been trained in accordance with subsection (4)(d) of this section.

(d) The training materials shall convey, at a minimum, the following information:

(i) Where and in what form pesticides may be encountered during work activities.

(ii) Hazards of pesticides resulting from toxicity and exposure, including acute and chronic effects, delayed effects, and sensitization.

(iii) Routes through which pesticides can enter the body, including information on wearing work clothing that protects the body from pesticide residues.

(iv) Signs and symptoms of common types of pesticide poisoning.

(v) Emergency first aid for pesticide injuries or poisonings.

(vi) How to obtain emergency medical care.

(vii) Routine and emergency decontamination procedures, including preventing pesticides from entering the body by:

■ Emergency eyeflushing techniques;

■ Washing work clothes separately from other clothes before wearing them again;

■ Washing before eating, drinking, using chewing gum or tobacco, or using the toilet;

■ Washing/showering with soap and water, shampooing hair, and putting on clean clothes after work; and

■ Washing immediately in the nearest clean water if pesticides are spilled on the body. As soon as possible shower, shampoo, and change into clean clothes.

(viii) Hazards from chemigation and drift.

(ix) Hazards from pesticide residues on clothing.

(x) Warnings about taking pesticides or pesticide containers home.

(xi) Requirements of this part designed to reduce the risks of illness or injury resulting from workers' occupational exposure to pesticides, including application and entry

PROPOSED

restrictions, the design of the warning sign, posting of warning signs, oral warnings, the availability of specific information about applications, and the protection against retaliatory acts.

(4) Verification of training.

(a) Except as provided in subsection (4)(b) of this section, if the agricultural employer assures that a worker possesses a Washington state department of agriculture-approved Worker Protection Standard worker training card, then the requirements of subsection (1) of this section will have been met.

(b) If the agricultural employer is aware or has reason to know that a Washington state department of agriculture-approved Worker Protection Standard worker training card has not been issued in accordance with this section, or has not been issued to the worker bearing the card, or the training was completed more than five years before the beginning of the current month, a worker's possession of that certificate does not meet the requirements of subsection (1) of this section.

AMENDATORY SECTION (Amending WSR 98-24-096, filed 12/1/98, effective 3/1/99)

WAC 296-307-13025 Pesticide safety training—Standards for pesticide handlers—40 CFR, § 170.230. (1) Requirement. Before any handler performs any handling task, the handler employer shall assure that the handler has been trained in accordance with this section during the last five years, counting from the end of the month in which the training was completed.

Note: In addition to the training required by this section, the agricultural employer shall assure, without exception, that all employees are trained in accordance with WAC ((296-62-054 through 296-62-05427-)) 296-307-550. Employer chemical hazard communication.

(2) Exceptions. The following persons need not be trained under this section:

(a) A handler who is currently certified as an applicator of restricted-use pesticides under chapter 17.21 RCW.

(b) A handler who is certified or licensed as a crop advisor by the Washington state department of agriculture under RCW 15.58.230: Provided, That a requirement for such certification or licensing is pesticide safety training that includes all the information set out in WAC 296-307-13025 (3)(d).

(3) Training programs.

(a) General pesticide safety information shall be presented to handlers either orally from written materials or audiovisually. The information must be presented in a manner that the handlers can understand (such as through a translator). The presenter also shall respond to handlers' questions.

(b) The person who conducts the training shall meet at least one of the following criteria:

(i) Be currently certified as an applicator of restricted-use pesticides under chapter 17.21 RCW; or

(ii) Be currently designated as a trainer of certified applicators or pesticide handlers by the Washington state department of agriculture under chapters 15.58 or 17.21 RCW; or

(iii) Have completed a pesticide safety train-the-trainer program approved by a state, federal, or tribal agency having jurisdiction.

(c) Any person who issues a Washington state department of agriculture-approved Worker Protection Standard handler training card must assure that the handler who receives the training card has been trained in accordance with (d) of this subsection.

(d) The pesticide safety training materials must convey, at a minimum, the following information:

(i) Format and meaning of information contained on pesticide labels and in labeling, including safety information such as precautionary statements about human health hazards.

(ii) Hazards of pesticides resulting from toxicity and exposure, including acute and chronic effects, delayed effects, and sensitization.

(iii) Routes by which pesticides can enter the body.

(iv) Signs and symptoms of common types of pesticide poisoning.

(v) Emergency first aid for pesticide injuries or poisonings.

(vi) How to obtain emergency medical care.

(vii) Routine and emergency decontamination procedures.

(viii) Need for and appropriate use of personal protective equipment.

(ix) Prevention, recognition, and first-aid treatment of heat-related illness.

(x) Safety requirements for handling, transporting, storing, and disposing of pesticides, including general procedures for spill cleanup.

(xi) Environmental concerns such as drift, runoff, and wildlife hazards.

(xii) Warnings about taking pesticides or pesticide containers home.

(xiii) Requirements of this part that must be followed by handler employers for the protection of handlers and other persons, including the prohibition against applying pesticides in a manner that will cause contact with workers or other persons, the requirement to use personal protective equipment, the provisions for training and decontamination, and the protection against retaliatory acts.

(4) Verification of training.

(a) Except as provided in (b) of this subsection, if the handler employer assures that a handler possesses a Washington state department of agriculture-approved Worker Protection Standard handler training card, then the requirements of subsection (1) of this section will have been met.

(b) If the handler employer is aware or has reason to know that a Washington state department of agriculture-approved Worker Protection Standard handler training card has not been issued in accordance with this section, or has not been issued to the handler bearing the card, or the handler training was completed more than five years before the beginning of the current month, a handler's possession of that card does not meet the requirements of subsection (1) of this section.

AMENDATORY SECTION (Amending WSR 97-09-013, filed 4/7/97, effective 4/7/97)

WAC 296-307-14505 What records must an employer keep for pesticide applications? (1) If you apply pesticides, or have pesticides applied for you, related to the production of an agricultural crop, you must keep records for each application. The records must include the following:

(a) The address or exact location where the pesticide was applied or stored;

Note: If you apply pesticides to one acre or more, the location must be shown on the map on the required form for at least the first application.

(b) The year, month, day, and time the pesticide was applied or stored;

(c) The product name on the registered label and the United States Environmental Protection Agency registration number, if applicable, of the pesticide that was applied or stored;

(d) The crop or site to which the pesticide was applied (application crop or site);

(e) The amount of pesticide applied per acre, or other appropriate measure;

(f) The concentration of pesticide applied;

(g) The total area to which pesticide was applied;

(h) If applicable, the licensed applicator's name, address, and telephone number and the name of the individual(s) making the application;

(i) The direction and estimated velocity of the wind at the time the pesticide was applied;

Exception: Wind information does not have to be recorded for applications of baits in bait stations and pesticide applications within structures.

(j) Any other reasonable information required by the department.

(2) A commercial pesticide applicator must provide a copy of the pesticide application records to the owner or lessee of the lands to which the pesticide is applied. Pesticide application records may be provided on any form that includes all required information.

(3) You must update records on the same day that a pesticide is applied. You may use a copy as the record of the pesticide application. You must maintain the records for at least seven years after the date of the application.

(4) You must ensure that pesticide application records are readily accessible to employees and their designated representatives in a central location in the workplace. The records must be available beginning on the day the application is made and for at least thirty days after. You may view the pesticide application records and make your own record from that information.

(5) New or newly assigned employees must be made aware of the accessibility of the application records before working with pesticides or in an area containing pesticides.

(6) When storing pesticides, you must, at least once a year, perform an inventory of the pesticides stored in any work area.

(7) The pesticide inventory records must include the following information:

(a) The location where the pesticide is stored;

(b) The year, month, day, and time the pesticide was first stored;

(c) The product name used on the registered label and the United States Environmental Protection Agency Registration Number, if applicable, of the pesticide that is stored; and

(d) The amount of pesticide in storage at the time of the inventory.

(8) You must maintain a record of pesticide purchases made between the annual inventory dates.

(a) Instead of this purchase record, you may obtain from distributors from whom you buy pesticides, a statement obligating the distributor to maintain the purchase records on your behalf to meet the requirements of this section.

(b) We may require you to submit all purchase records covering the purchases during a specified period of time or in a specified geographical area.

(9) When you end all pesticide activities, you must file the records with us. Anyone who succeeds or replaces you must retain the records required by this section, but that person is not liable for any violations you commit.

(10) You must ensure that the records required under this section are readily accessible to us for inspection. You must also provide copies of the records on request, to:

(a) An employee or the employee's designated representative in the case of an industrial insurance claim filed under Title 51 RCW with the department of labor and industries;

(b) Treating health care personnel; or

(c) The pesticide incident reporting and tracking review panel.

(11) The designated representative or treating health care personnel are not required to identify the employee represented or treated.

(12) We will keep the name of any affected employee confidential according to RCW 49.17.080(1).

(13) When treating health care personnel request records under this section, and the record is required to determine treatment, you must provide copies of the record immediately. Information for treating health care personnel must be made immediately available by telephone, if requested, with a copy of the records provided within twenty-four hours. For all other requests, you must provide copies of the records within seventy-two hours.

(14) If requested, you must provide copies of records on a form provided by the department.

(15) If you suspect that an employee is ill or injured because of an exposure to one or more pesticides, you must immediately provide the employee with a copy of the relevant pesticide application records.

(16) If you refuse to provide a copy of a requested record, the requester may notify the department of the request and your refusal.

(a) Within seven working days, we will request that you provide us with all pertinent copies of the records, except that in a medical emergency we will request within two working days.

(b) You must provide copies of the records to us within twenty-four hours after we request.

(17) We inspect for the records required under this section as part of any on-site inspection of a workplace con-

PROPOSED

ducted under this chapter or chapter 49.17 RCW. We will determine, during the inspection, whether the records are readily transferable to a form adopted by the department, and readily accessible to employees. However, your records will not be inspected more than once in any calendar year, unless a previous inspection has found recordkeeping violations. If recordkeeping violations are found, we may conduct reasonable multiple inspections, according to department rules. ((See WAC 296-27-16018, Compliance inspections, and WAC 296-27-16026, Programmed inspections.)) Nothing in this section limits our inspection of records pertaining to pesticide-related injuries, illnesses, fatalities, accidents, or complaints.

(18) If you fail to maintain the records, or provide access to or copies of the records required under this section, you will be subject to penalties authorized under RCW 49.17.180.

(19) The department of labor and industries and the department of agriculture will jointly adopt by rule, forms that satisfy the information requirements of this section and RCW 17.21.100.

PART Y - OCCUPATIONAL HEALTH STANDARDS

NEW SECTION

WAC 296-307-550 Employer chemical hazard communication—Introduction. Important:

Thousands of chemicals can be found in today's workplaces. These chemicals may have the capacity to cause health problems, from minor skin irritations to serious injuries or diseases like cancer.

The employer chemical hazard communication rule was developed to make sure employers and employees are informed about chemical hazards in the workplace.

This rule applies to:

- Employers engaged in businesses where chemicals are used, distributed, or produced for use or distribution.
- Contractors or subcontractors that work for employers engaged in businesses where chemicals are used, distributed, or produced for use or distribution.

Note:

- If you produce, import, distribute and/or repackage chemicals, or choose not to rely on labels or material safety data sheets provided by the manufacturer or importer, you must comply with Chemical hazard communication for manufacturers, importers and distributors, WAC 296-62-054.
- You may withhold trade secret information under certain circumstances, see Trade secrets, WAC 296-62-053, to find out what information may be withheld as a trade secret and what information must be released.

EXEMPTIONS:

- For the purposes of this employer hazard communication rule, if you are engaged in agricultural production of crops or livestock, "employee" does not mean:
 - Immediate family members of the officers of any corporation, partnership, sole proprietorship or other business entity or officers of any closely held corporation.
- Certain products, chemicals, or items are exempt from this rule. Below is a summarized list of these exemptions. See WAC 296-307-55055 at the end of this rule to get complete information about these exemptions:
 - Any hazardous waste or substance
 - Tobacco or tobacco products

- Wood or wood products that are not chemically treated and will not be processed, for example, by sawing and sanding
- Food or alcoholic beverages
- Some drugs, such as retail or prescription medications
- Retail cosmetics
- Ionizing and nonionizing radiation
- Biological hazards
- Any consumer product or hazardous substance when workplace exposure is the same as that of a consumer

◆ Retail products used in offices in the same manner and frequency used by consumers can be termed "consumer products." Consumer products include things such as: Correction fluid, glass cleaner, and dishwashing liquid.

Example:

If you use a household cleaner in your workplace in the same way that a consumer would use it when cleaning their house, the exposure should be the same as the consumer's. ("In the same way" means using the household cleaner in the same manner and frequency.) A janitor using a household cleaner, such as bleach, throughout the day, is not considered to be consumer use.

– Manufactured items that remain intact are exempt for this rule.

The following are examples:

Item	Covered by this rule	Not covered by this rule
Brick	sawed or cut in half	used whole or intact
Pipe	cut by a torch	bent with a tube bender
Nylon rope	burning the ends	tying a knot

– Manufactured items that are fluids or in the form of particles are not exempt for this rule.

Your responsibility:

To inform and train your employees about the hazards of chemicals they may be exposed to during normal working conditions, or in foreseeable emergencies by:

- Making a list of the hazardous chemicals present in your workplace
- Preparing a written Chemical Hazard Communication Program for your workplace
- Informing your employees about this rule and your program
- Providing training to your employees about working in the presence of hazardous chemicals
- Getting and keeping the material safety data sheets (MSDSs) for the hazardous chemicals
- Making sure that labels on containers of hazardous chemicals are in place and easy to read

You must:

Develop, implement, maintain, and make available a written Chemical Hazard Communication Program

WAC 296-307-55005

Identify and list all the hazardous chemicals present in your workplace

WAC 296-307-55010

Obtain and maintain material safety data sheets (MSDSs) for each hazardous chemical used

WAC 296-307-55015

Make sure that material safety data sheets (MSDSs) are readily accessible to your employees

WAC 296-307-55020

Label containers holding hazardous chemicals

WAC 296-307-55025

PROPOSED

Inform and train your employees about hazardous chemicals in your workplace

WAC 296-307-55030

Follow these rules for laboratories using hazardous chemicals

WAC 296-307-55035

Follow these rules for handling chemicals in factory sealed containers

WAC 296-307-55040

The department must:

Translate certain chemical hazard communication documents upon request

WAC 296-307-55045

Attempt to obtain a material safety data sheet (MSDS) upon request

WAC 296-307-55050

Exemption: Items or chemicals exempt from the rule, and exemptions from labeling

WAC 296-307-55055

Definitions

WAC 296-307-55060

NEW SECTION

WAC 296-307-55005 Develop, implement, maintain, and make available a written Chemical Hazard Communication Program. You must:

- Develop, implement, maintain, and make available a written Chemical Hazard Communication Program specifically for your workplace. The Chemical Hazard Communication Program must, at a minimum, include:

- A list of hazardous chemicals known to be present in your workplace

- Procedures for making sure all containers are properly labeled

- A description of how you are going to obtain and maintain your material safety data sheets (MSDSs)

- A description of how you are going to train and inform your employees about hazardous chemicals in their workplace

- A description of how you are going to inform your employees about:

- ◆ Chemical hazards used during nonroutine tasks

- ◆ The hazards associated with chemicals contained in unlabeled pipes in their work areas

You must:

- Make sure your written Chemical Hazard Communication Program includes the following communication methods you will apply if you produce, use, or store hazardous chemicals at your workplace(s) in such a way that the employees of other employer(s) may be exposed:

- Provide the other employer(s) with a copy of the relevant material safety data sheets (MSDSs), or provide access to the MSDSs in a central location at the workplace

- Inform the other employer(s) of any precautionary measures that need to be taken to protect employees during normal operating conditions and in foreseeable emergencies

- Describe how to inform the other employer(s) of the labeling system used in the workplace

Note:

- Examples of employees of other employers who could be exposed to chemical hazards that you produce, use, or store in your workplace include employees of construction companies, cleaning services, or maintenance contractors visiting or working on-site.
- Your employees have the right to get chemical hazard communication information from other employers at workplaces where they are working; and employees of other employers have the right to get the information from you when they are working at your workplace.
- Include in your written Chemical Hazard Communication Program the methods that you will use to share information with other employers and their employees at your workplace(s) regarding:
 - Access to MSDSs
 - Precautionary measures such as personal protective equipment (PPE) and emergency plans
 - Any labeling systems used at the workplace.

If you rely on another employer's chemical hazard communication program to share the information required and the program meets the requirements of this rule, document in your own written Chemical Hazard Communication Program.

You must:

- Make your Chemical Hazard Communication Program available to your employees.

Note: Where employees must travel between workplaces during a workshift, that is, if their work is carried out at more than one geographical location, the written Chemical Hazard Communication Program may be kept at the primary workplace facility.

NEW SECTION

WAC 296-307-55010 Identify and list all the hazardous chemicals present in your workplace. You must:

- Identify all hazardous chemicals in your workplace. This includes any chemical that is known to be present in your workplace in such a way that employees may be exposed to it under normal conditions of use or in a foreseeable emergency.

- Create a list of these chemicals using the chemical or common name on the material safety data sheet (MSDS). This list:

- Must be compiled for the workplace as a whole, or for individual work areas.

- Is necessary to make sure that all hazardous chemicals are identified and that MSDS, and labeling rules are met.

- Must be current.

Note: The following are some ways to determine whether a product is hazardous:

- Look for words on the label, such as "CAUTION," "WARNING," or "DANGER."
- Look for words or "hazard coding" that indicate that the chemical is flammable, an irritant, corrosive, carcinogenic, etc. "Hazard coding" refers to words, numbers, or colors that tell you a chemical is dangerous.
- Check the product's MSDS for hazard information.

Examples of hazardous chemicals are: Acids, adhesives, caustics, fuels, paints, varnishes, shellacs and pesticides. Too many other classes of hazardous chemicals exist to list them all here. If you have any questions about a chemical you have at your workplace, contact your local L&I office.

PROPOSED

NEW SECTION**WAC 296-370-55015 Obtain and maintain material safety data sheets (MSDSs) for each hazardous chemical used. You must:**

- Obtain a MSDS for each hazardous chemical used as soon as possible if the MSDS is not provided with the shipment of a hazardous chemical from the chemical manufacturer or importer.

Note:

- To obtain a MSDS, you may try calling the manufacturer or checking their website.
- If you have a commercial account with a retailer or wholesaler, you have the right to request and receive a MSDS about hazardous chemicals you purchase.
- If a chemical is purchased from a retailer with no commercial accounts, you have the right to request and receive the manufacturer's name and address so that you can contact them and request a MSDS for the chemical.
- Whoever prepares the MSDS is required to mark all blocks on the form, even if there is no relevant information for that section.
- If you have problems getting a MSDS within 30 calendar days after making a written request to the chemical manufacturer, importer, or distributor, you can get help from WISHA. You may contact your local regional office for assistance or make a written request for assistance to the: Department of Labor and Industries
Right-to-Know Program
P.O. Box 44610
Olympia, Washington 98504-4610
- Include in your request:
 - A copy of the purchaser's written request to the chemical manufacturer, importer, or distributor
 - The name of the product suspected of containing a hazardous chemical
 - The identification number of the product, if available
 - A copy of the product label, if available
 - The name and address of the chemical manufacturer, importer, or distributor from whom the product was obtained

You must:

- Maintain a MSDS for each hazardous chemical:
 - Keep copies of the required MSDSs for each hazardous chemical present in your workplace. These may be kept in any form, including as a part of operating procedures.
 - Each MSDS must be in English. You may also keep copies in other languages.

Note:

- If you choose not to rely on MSDSs or labels provided by the manufacturer or importer, you must comply with the chemical hazard communication standard for manufacturers, importers, and distributors, WAC 296-62-054.
- It may be more appropriate to address the hazards of a process rather than individual hazardous chemicals. MSDSs can be designed to cover groups of hazardous chemicals in a work area.

NEW SECTION**WAC 296-307-55020 Make sure material safety data sheets are readily accessible to your employees. You must:**

- Make sure that MSDSs are readily accessible, easily obtained without delay during each work shift to employees when they are in their work area(s).
- Make sure that employees can immediately obtain the required MSDS information in an emergency.

- Where employees must travel between workplaces during a work shift, such as when their work is carried out at more than one geographical location, the MSDSs may be kept at a central location at the primary workplace facility.

- This can be done by means such as voice communication or laptop computer.

Note:

- Electronic access (such as computer or fax), microfiche, and other alternatives to maintaining paper copies of the MSDSs are permitted as long as they do not create barriers to immediate employee access in each workplace.
 - Barriers to immediate access of electronic MSDSs may include:
 - Power outages
 - Equipment failure
 - System delays
 - Deficient user knowledge to operate equipment
 - Location of equipment outside the work area
- Solutions to eliminating these and other possible barriers to access may require the availability of back-up systems, employee training, and providing access equipment in the work areas.

NEW SECTION**WAC 296-307-55025 Label containers holding hazardous chemicals.**

EXEMPTIONS: The following is a summary of items that are exempt from this rule. For complete information about each of these, see WAC 296-307-55055.

- Pesticides, when labeled as required by the Environmental Protection Agency (EPA)
- Food, food additives, color additives, drugs, cosmetics, or medical/veterinary devices or products
- Alcoholic beverages not intended for industrial use
- Consumer products labeled, as required, by the Consumer Product Safety Commission
- Agriculture or vegetable seeds treated and labeled as required by the Federal Seed Act

Note:

You are not required to label portable containers into which hazardous chemicals are transferred from labeled containers, if the chemical is used and controlled by the employee who performed the transfer within the same shift.

You must:

- Make sure that each container of hazardous chemicals in the workplace is labeled, tagged, or marked with the following information:

- The identity of the hazardous chemical(s) using either the chemical or common name

Note:

You are not required to list each component in a hazardous mixture on the label. If a mixture is referred to on a material safety data sheet (MSDS) by a product name, then the product name should be used as the identifier.

- Appropriate hazard warnings which give general information about the relevant health and physical hazards of the chemicals. This includes health effects information, such as information about organs most likely to be affected by the chemicals.

EXAMPLES OF LABEL:

Name of Chemical
Physical Hazards
Health Hazards;
• Health effects information
• Affected Target Organs

– For individual stationary process containers, you may use alternate labeling methods such as:

- ◆ Signs
- ◆ Placards
- ◆ Process sheets
- ◆ Batch tickets
- ◆ Operating procedures or
- ◆ Other such written materials, as long as the alternate method identifies the containers and conveys the required label information.

Note:

- You may use words, pictures, symbols or any combination to communicate the hazards of the chemical. Be sure to train your employees so they can demonstrate a knowledge of the labeling system you use.

- Some alternative labeling systems do not communicate target organ information, so the employee will have to rely on training provided by the employer to obtain this information.

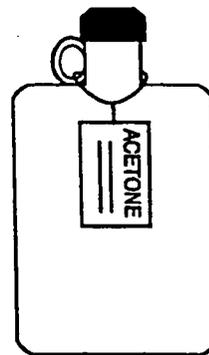

You must:

• Not remove or deface existing labels on incoming containers of hazardous chemicals (such as those marked with United States Department of Transportation (USDOT) markings, placards, and labels), unless the container is immediately labeled with the required information. You do not need to put on new labels if existing labels already provide the required information. If the package or container is sufficiently cleaned of residue and purged of vapors to remove any potential health or physical hazard, existing labels can be removed.

• Make sure that labels or other forms of warning are legible, in English, and prominently displayed on the container, or readily available in the work area throughout each work shift.

Note:

- Employers with non-English speaking employees may use other languages in the warning information in addition to the English language.

- Above is an example of a labeled container. You may use a laminated or coated label, affixed to the container with a wire, to avoid deterioration of labels due to a solvent, such as acetone.

You must:

• Make sure if the hazardous chemical is regulated by WISHA or OSHA in a substance-specific health rule, that the labels or other warnings are used according to those rules.

NEW SECTION

WAC 296-307-55030 Inform and train your employees about hazardous chemicals in your workplace. You must:

• Provide employees with effective information on hazardous chemicals in their work area at the time of their initial job assignment. Whenever a new physical or health hazard related to chemical exposure is introduced into their employees' work areas, information must be provided.

– Inform employees of:

- ◆ The requirements of this rule.
- ◆ Any operations in their work area where hazardous chemicals are present.
- ◆ The location and availability of your written Chemical Hazard Communication Program, including the list(s) of hazardous chemicals and material safety data sheets (MSDSs) required by this rule.

• Provide employees with effective training about hazardous chemicals in their work area at the time of their initial job assignment. Whenever a new physical or health hazard related to chemical exposure is introduced, the employees must be trained. Make sure that employee training includes:

– Methods and observations that may be used to detect the presence or release of a hazardous chemical in the work area. Examples of these methods and observations may include:

- ◆ Monitoring conducted by you
- ◆ Continuous monitoring devices
- ◆ Visual appearance or odor of hazardous chemicals when being released
- ◆ Physical and health hazards of the chemicals in the work area, including the likely physical symptoms or effects of overexposure
- ◆ Steps employees can take to protect themselves from the chemical hazards in your workplace, including specific

PROPOSED

procedures implemented by you to protect employees from exposure to hazardous chemicals. Specific procedures may include:

- Appropriate work practices
- Engineering controls
- Emergency procedures
- Personal protective equipment to be used
- Details of the Chemical Hazard Communication Program developed by you, including an explanation of the labeling system and the MSDS, and how employees can obtain and use the appropriate hazard information.
- Tailor information and training to the types of hazards to which employees will be exposed. The information and training may be designed to cover categories of hazards, such as flammability or cancer-causing potential, or it may address specific chemicals. Chemical-specific information must always be available through labels and MSDSs.
- Make reasonable efforts to post notices in your employees' native languages (as provided by the department) if those employees have trouble communicating in English.

Note:

- Interactive computer-based training or training videos can be used provided they are effective.
- Your MSDSs may not have WISHA permissible exposure limits (PELs) listed. In some cases, WISHA PELs are stricter than the OSHA PELs and other exposure limits listed on the MSDSs you receive. If this is the case, you must refer to the WISHA PEL table, WAC 296-62-075, for the appropriate exposure limits to be covered during training.

NEW SECTION

WAC 296-307-55035 Follow these rules for laboratories using hazardous chemicals.

Note: Laboratories are required to have a written Chemical Hygiene Plan under WAC 296-62-400, if applicable. They are not required to have a written Chemical Hazard Communication Program.

You may combine your Accident Prevention Program and Chemical Hazard Communication Program to assist you in developing a Chemical Hygiene Plan for your laboratory.

You must:

- (1) Make sure that labels on incoming containers of hazardous chemicals are in place and readable.
- (2) Maintain material safety data sheets (MSDSs) received with incoming shipments of hazardous chemicals and make them available to laboratory employees when they are in their work areas.
- (3) Provide laboratory employees with information and training as described in: "Inform and train your employees about hazardous chemicals in your workplace," WAC 296-307-55030, except for the part about the location and availability of the written Chemical Hazard Communication Program.

Note: Laboratory employers that ship hazardous chemicals are considered to be either chemical manufacturers or distributors. When laboratory employers ship hazardous chemicals they must comply with the rule, "Hazard communication standards for chemical manufacturers, importers and distributors," WAC 296-62-054.

NEW SECTION

WAC 296-307-55040 Follow these rules for handling chemicals in factory-sealed containers. You must:

This applies to situations where employees only handle chemicals in factory-sealed containers that are not opened under normal use (such as those found in marine cargo handling, trucking, warehousing, or retail sales). **You must:**

- (1) Make sure that labels on incoming containers of hazardous chemicals are in place and readable.
- (2) Keep or obtain material safety data sheets.
 - Keep any MSDSs that are received with incoming shipments of the sealed containers of hazardous chemicals
 - If a factory-sealed container of hazardous chemicals comes without a MSDS, obtain one as soon as possible, if an employee requests it
- (3) Make sure that the MSDSs are readily accessible during each work shift to employees when they are in their work area(s).
- (4) Inform and train your employees about hazardous chemicals in your workplace, to protect them in case of a hazardous chemical spill or leak from a factory-sealed container. You do not have to cover the location and availability of the written Chemical Hazard Communication Program.

NEW SECTION

WAC 296-307-55045 Translate certain chemical hazard communication documents upon request. The department must:

- Upon receipt of a written or verbal request, prepare and make available (within available resources) to employers or the public, a translation into Cambodian, Chinese, Korean, Spanish, or Vietnamese of any of the following:
 - An employer's written Chemical Hazard Communication Program
 - A material safety data sheet or
 - Written materials prepared by the department to inform employees of their rights described in this rule, regarding chemical hazard communication

Note: Written requests for translations should be directed to:
 Department of Labor and Industries
 Right-to-Know Program
 P.O. Box 44610
 Olympia, Washington 98504-4610

NEW SECTION

WAC 296-307-55050 Attempt to obtain a material safety data sheet (MSDS) upon request. The department must:

- Upon receipt of an employer's written request for a material safety data sheet, attempt to obtain the MSDS from the chemical manufacturer, importer, or distributor. When the department receives the MSDS, the department must forward a copy of it to the purchaser at no cost. Small business employees will be given priority for this service.

NEW SECTION**WAC 296-307-55055 Items or chemicals exempt from the rule, and exemptions from labeling.**

• Listed below are the full descriptions of the items or chemicals that are exempt, or not covered, by this rule:

– Any consumer product or hazardous substance, defined in the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) and Federal Hazardous Substance Act (15 U.S.C. 1261 et seq.) respectively, where you can show that it is used in the workplace for the purpose intended by the chemical manufacturer or importer of the product, and the use results in a duration and frequency of exposure that is not greater than the range of exposures that could reasonably be experienced by consumers when used for the purpose intended.

– Any hazardous waste, defined by the Hazardous Waste Management Act chapter 70.105 RCW, when subject to regulations issued under that act by the department of ecology, that describes specific safety, labeling, personnel training, and other rules for the accumulation, handling, and management of hazardous waste.

– Any hazardous waste, defined by the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6901 et seq.), when subject to regulations issued under that act by the Environmental Protection Agency.

– Any hazardous substance, defined by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601 et seq.), when the hazardous substance is the focus of remedial or removal action being conducted under CERCLA in accordance with Environmental Protection Agency regulations.

– Tobacco or tobacco products.

– Wood or wood products, including lumber that will not be processed, where the chemical manufacturer or importer can establish that the only hazard they pose to the employees is the potential for flammability or combustibility. Wood or wood products that have been treated with hazardous chemicals covered by this rule, and wood that may be subsequently sawed or cut, generating dust, are not exempt.

– Articles, meaning manufactured items other than a fluid or particle that:

◆ Are formed to a specific shape or design during manufacture;

◆ Have end use function(s) dependent in whole or in part upon their shape or design during end use; and

◆ Under normal conditions of use, do not release more than very small quantities, for example minute or trace amounts of a hazardous chemical such as emissions from a marking pen or a newly varnished wood chair, and do not pose a physical hazard or health risk to employees.

– Food or alcoholic beverages that are sold, used, or prepared in a retail establishment such as a grocery store, restaurant, or drinking place, and foods intended for personal consumption by employees while in the workplace.

– Any drug, defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), when it is in solid, final form for direct administration to the patient (for example, tablets or pills); drugs that are packaged by the chemical manufacturer for sale to consumers in a retail establishment

(for example over-the-counter drugs); and drugs intended for personal consumption by employees while in the workplace (for example, first-aid supplies). Aerosolized or cytotoxic drugs administered by a health care worker are not excluded.

– Cosmetics packaged for sale to consumers in a retail establishment, and cosmetics intended for personal consumption by employees while in the *workplace*.

– Ionizing and nonionizing radiation.

– Biological hazards.

• This rule does not require labeling of the following chemicals:

– Any pesticide, defined in the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.), when subject to the labeling requirements of that act and labeling regulations issued under that act by the Environmental Protection Agency.

– Any chemical substance or mixture, in the Toxic Substance Control Act (15 U.S.C. 2601 et seq.), when subject to the labeling requirements of that act, and labeling requirements issued under that act by the Environmental Protection Agency.

– Any food, food additive, color additive, drug, cosmetic, or medical/veterinary device or product, including materials intended for use as ingredients in such products (for example, flavors and fragrances), as such terms are defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) or the Virus-Serum Toxin Act of 1913 (21 U.S.C. 151 et seq.) and regulations issued under those acts, when they are subject to the labeling requirements under those acts by either the Food and Drug Administration or the Department of Agriculture.

– Any distilled spirits (beverage alcohols), wine, or malt beverage intended for nonindustrial use, defined in the Federal Alcohol Administration Act (27 U.S.C. 201 et seq.) and regulations issued under that act, when subject to the labeling requirements of that act and labeling regulations issued under that act by the Bureau of Alcohol, Tobacco, and Firearms.

– Any consumer product or hazardous substance, as defined in the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) and Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) respectively, when subject to a consumer product safety rule or labeling requirement of those acts, or regulations issued under those acts by the Consumer Product Safety Commission.

– Agricultural or vegetable seed treated with pesticides and labeled in accordance with the Federal Seed Act (7 U.S.C. 1551 et seq.), and the labeling requirements issued under that act by the Department of Agriculture.

NEW SECTION**WAC 296-307-55060 Definitions.****Chemical**

Any element, chemical compound, or mixture of elements and/or compounds.

Chemical manufacturer

An employer with a workplace where one or more chemicals are produced for use or distribution.

Chemical name

PROPOSED

The scientific designation of a chemical in accordance with one of the following:

- The nomenclature system developed by the International Union of Pure and Applied Chemistry (IUPAC)
- The chemical abstracts service (CAS) rules of nomenclature

OR

- A name which will clearly identify the chemical for the purpose of conducting a hazard evaluation.

Combustible liquid

A combustible liquid has a flashpoint of at least 100°F (37.8°C) and below 200°F (93.3°C). Mixtures with at least 99% of their components having flashpoints of 200°F (93.3°C) or higher are not considered combustible liquids.

Commercial account

An arrangement in which a retail distributor sells hazardous chemical(s) to an employer, generally in large quantities over time, and/or at costs that are below the regular retail price.

Common name

Any designation or identification such as:

- Code name
- Code number
- Trade name
- Brand name
- Generic name used to identify a chemical other than by its chemical name.

Compressed gas

A gas or mixture of gases that, when in a container, has an absolute pressure exceeding:

- 40 psi at 70°F (21.1°C)

OR

- 104 psi at 130°F (54.4°C) regardless of the pressure at 70°F (21.1°C)

Compressed gas can also mean a liquid with a vapor pressure that exceeds 40 psi at 100°F (37.8°C).

Container

Any container, except for pipes or piping systems, that contains a hazardous chemical. It can be any of the following:

- Bag
- Barrel
- Bottle
- Box
- Can
- Cylinder
- Drum
- Reaction vessel
- Storage tank.

Designated representative

- Any individual or organization to which an employee gives written authorization.
- A recognized or certified collective bargaining agent without regard to written employee authorization.
- The legal representative of a deceased or legally incapacitated employee.

Director

The director means the director of the department of labor and industries or their designee.

Distributor

A business, other than a chemical manufacturer or importer, that supplies hazardous chemicals to other distributors or to employers. See WAC 296-62-054 for requirements dealing with manufacturers, distributors and importers - hazard communication.

Employee

The term employee and other terms of like meaning, unless the context of the provision containing such term indicates otherwise, means an employee of an employer who is employed in the business of his or her employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is personal labor for an employer under this standard whether by way of manual labor or otherwise.

Employer

An employer is any person, firm, corporation, partnership, business trust, legal representative, or other business entity which engages in any business, industry, profession, or activity in this state and employs one or more employees or who contracts with one or more persons, the essence of which is the personal labor of such person or persons and includes the state, counties, cities, and all municipal corporations, public corporations, political subdivisions of the state, and charitable organizations: Provided, That any persons, partnership, or business entity not having employees, and who is covered by the Industrial Insurance Act must be considered both an employer and an employee.

Explosive

A chemical that causes a sudden, almost instant release of pressure, gas, and heat when exposed to a sudden shock, pressure, or high temperature.

Exposure or exposed

An employee has been, or may have possibly been, subjected to a hazardous chemical, toxic substance or harmful physical agent while working. An employee could have been exposed to hazardous chemicals, toxic substances, or harmful physical agents in any of the following ways:

- Inhalation
- Ingestion
- Skin contact
- Absorption
- Related means.

The terms exposure and exposed only cover workplace exposure involving a toxic substance or harmful physical agent in the workplace different from typical nonoccupational situations in the way it is:

- Used
- Handled
- Stored
- Generated

OR

- Present.

Flammable

A chemical covered by one of the following categories:

- Aerosol flammable means an aerosol that, when tested by the method described in 16 CFR 1500.45 yields either a flame projection more than 18 inches at full valve opening or

a flashback (a flame extending back to the valve) at any degree of valve opening;

- Gas, flammable means:
 - A gas that, at temperature and pressure of the surrounding area, forms a flammable mixture with air at a concentration of 13% by volume or less; or
 - A gas that, at temperature and pressure of the surrounding area, forms a range of flammable mixtures with air wider than 12% by volume, regardless of the lower limit;
- Liquid, flammable means any liquid having a flashpoint below 100°F (37.8°C), except any mixture having components with flashpoints of 100°F (37.8°C) or higher, the total of which make up 99% or more of the total volume of the mixture.
- Solid, flammable means a solid, other than a blasting agent or explosive as defined in WAC 296-52-417 or 29 CFR 1910.109(a), that is likely to cause fire through friction, moisture absorption, spontaneous chemical change, or retained heat from manufacturing or processing, or which can be ignited readily. Solid, inflammable also means that when the substance is ignited, it burns so powerfully and persistently that it creates a serious hazard. A chemical must be considered to be a flammable solid if, when tested by the method described in 16 CFR 1500.44, it ignites and burns with a self-sustained flame at a rate greater than one-tenth of an inch per second along its major axis.

Flashpoint

- The minimum temperature at which a liquid gives off a vapor in sufficient concentration to ignite when tested by any of the following measurement methods:
 - Tagliabue closed tester: (See American National Standard Method of Test for Flash Point by Tag Closed Tester, Z11.24-1979 (ASTM D 56-79)) for liquids with a viscosity of less than 45 Saybolt Universal Seconds (SUS) at 100°F (37.8°C), that do not contain suspended solids and do not have a tendency to form a surface film under test; or
 - Pensky-Martens closed tester: (See American National Standard Method of Test for Flash Point by Pensky-Martens Closed Tester, Z11.7-1979 (ASTM D 93-79)) for liquids with a viscosity equal to or greater than 45 SUS at 100°F (37.8°C), or that contain suspended solids, or that have a tendency to form a surface film under test; or
 - Setaflash closed tester: (See American National Standard Method of Test for Flash Point by Setaflash Closed Tester (ASTM D 3278-78).)

Note: Organic peroxides, which undergo auto accelerating thermal decomposition, are excluded from any of the flashpoint measurement methods specified above.

Foreseeable emergency

Any potential event that could result in an uncontrolled release of a hazardous chemical into the workplace. Examples of foreseeable emergencies include equipment failure, rupture of containers, or failure of control equipment.

Hazardous chemical

Any chemical that is a physical or health hazard.

Hazard warning

Can be a combination of words, pictures, symbols, or combination appearing on a label or other appropriate form of warning which shows the specific physical and health haz-

ard(s), including target organ effects, of the chemical(s) in the container(s).

Note: See definition for physical hazard and health hazard to determine which hazards must be covered.

Health hazard

Any chemical with the potential to cause acute or chronic health effects in exposed employees. The potential must be statistically significant based on evidence from at least one study conducted under established scientific principles. Health hazards include:

- Chemicals which are carcinogens
- Toxic or highly toxic agents
- Reproductive toxins
- Irritants
- Corrosives
- Sensitizers
- Hepatotoxins
- Nephrotoxins
- Neurotoxins
- Agents which act on the hematopoietic system
- Agents which damage the lungs, skin, eyes, or mucous membranes.

See WAC 296-62-054 for more definitions and explanations about the scope of health hazards covered by this part.

See WAC 296-62-054 for the criteria used for determining whether or not a chemical is considered hazardous for purposes of this rule.

Identity

Any chemical or common name listed on the material safety data sheet (MSDS) for the specific chemical. Each identity used must allow cross-references among the:

- Required list of hazardous chemicals
- Chemical label
- MSDSs.

Importer

The first business within the customs territory of the USA that:

- Receives hazardous chemicals produced in other countries

AND

- Supplies them to distributors or employers within the USA.

See WAC 296-62-054 for requirements dealing with manufacturers, importers and distributors - hazard communication.

Material safety data sheet (MSDS)

Written or printed material that tells you about the chemical(s), what it can do to and how to protect yourself, others, or the environment.

For requirements for developing MSDSs see WAC 296-62-054—manufacturers, importers, and distributors - hazard communication.

Mixture

Any combination of 2 or more chemicals (if that combination did not result from a chemical reaction).

Organic peroxide

This is an organic compound containing the bivalent-O-O-structure. It may be considered a structural derivative of

hydrogen peroxide if one or both of the hydrogen atoms has been replaced by an organic radical.

Oxidizer

A chemical other than a blasting agent or explosive as defined in WAC 296-52-417 or CFR 1910.109(a), that starts or promotes combustion in other materials, causing fire either of itself or through the release of oxygen or other gases.

Permissible exposure limits (PELs)

PELs are airborne concentrations of substances measured by their concentration in the air no matter what amount is breathed by the employee. The permissible exposure limits (PELs) must include the following four categories:

- Permissible exposure limits - Time-weighted average (PEL-TWA) is the time-weighted average airborne exposure to any 8-hour work shift of a 40-hour work week and must not be exceeded.

- Permissible exposure limits - Short-term exposure limit (PEL-STEL) is the employee's 15-minute time-weighted average exposure which must not be exceeded at any time during a work day unless another time limit is specified in a parenthetical notation below the limit. If another time period is specified, the time-weighted average exposure over that time period must not be exceeded at any time during the working day.

- Permissible exposure limits - Ceiling (PEL-C) is the employee's exposure which must not be exceeded during any part of the work day. If instantaneous monitoring is not feasible, then the ceiling must be assessed as a 15-minute time-weighted average exposure which must not be exceeded at any time over a working day.

- Skin notation is the potential contribution to the overall employee exposure by the cutaneous route including mucous membranes and eye, either by airborne, or more particularly, by direct contact with the substance. These substances are identified as having a skin notation in the OSHA and WISHA PEL tables (29 CFR Part 1910 Subpart Z and WAC 296-62-075, respectively).

Physical hazard

A chemical that has scientifically valid evidence to show it is one of the following:

- Combustible liquid
- Compressed gas
- Explosive
- Flammable
- Organic peroxide
- Oxidizer
- Pyrophoric
- Unstable (reactive)
- Water reactive.

Produce

Any one of the following:

- Manufacture
- Process
- Formulate
- Blend
- Extract
- Generate
- Emit
- Repackage.

Purchaser

An employer who buys one or more hazardous chemicals to use in their workplace.

Pyrophoric

A chemical is pyrophoric if it will ignite spontaneously in the air when the temperature is 130°F (54.4°C) or below.

Responsible party

Someone who can provide appropriate information about the hazardous chemical and emergency procedures.

Specific chemical identity

This term applies to chemical substances. It can mean the:

- Chemical name
- Chemical abstracts service (CAS) registry number
- Any other information that reveals the precise chemical designation of the substance.

Trade secret

Any confidential:

- Formula
- Pattern
- Process
- Device
- Information
- Collection of information.

The trade secret is used in an employer's business and gives an opportunity to gain an advantage over competitors who do not know or use it.

See WAC 296-62-053 for requirements dealing with trade secrets.

Unstable (reactive)

An unstable or reactive chemical is one that in its pure state, or as produced or transported, will vigorously polymerize, decompose, condense, or will become self-reactive under conditions of shocks, pressure or temperature.

Use

Means to:

- Package
- Handle
- React
- Emit
- Extract
- Generate as a by-product
- Transfer.

Water-reactive

A water-reactive chemical reacts with water to release a gas that is either flammable or presents a health hazard.

Work area

A room or defined space in a workplace where hazardous chemicals are produced or used, and where employees are present.

Workplace

The term workplace means an establishment, job site, or project, at one geographical location containing one or more work areas.

NEW SECTION

WAC 296-307-570 Lighting rule. Your responsibility: To provide an maintain adequate lighting in your workplace.

NEW SECTION

WAC 296-307-57005 Provide and maintain adequate lighting.

Note: This section establishes minimal levels of lighting for safety purposes only. Guidelines pertaining to optimal levels of lighting and illumination may be found in Practice for Industrial Lighting, ANSI/IES RP7-1979.

You must:

- Provide and maintain adequate lighting for all work activities in your workplace. See the following table.

Lighting Table		
Activity	Minimum Acceptable average lighting level in an area:	Any one single measurement used to determine the average lighting level*cannot be less than:
	(Foot-candles)	(Foot-candles)
Indoor task	10	5
Outdoor task	5	2.5
Nontask activities for both indoor and outdoor	3	1.5

- Lighting levels must be measured at thirty inches above the floor/working surface or at the task.

You must:

- Have adequate light for employees to see nearby objects that might be potential hazards or to see to operate emergency controls or other equipment, if general lighting is not available.

Note: • Lighting levels can be measured with a light meter.
• Conversion information: 1 foot candle = 1 lumen incident per square foot = 10.76 lux.

NEW SECTION

WAC 296-307-590 Environmental tobacco smoke in the office. Your responsibility:

To control exposure to environmental tobacco smoke in your office work environment

You must:

Control tobacco smoke in your building

WAC 296-307-59005

Control tobacco smoke that comes in from the outside

WAC 296-307-59010

Note: This rule does not preempt any federal, state, municipal, or other local authority's regulation of indoor smoking that is more protective than this section.

Definitions: *Office work environment* is an indoor or enclosed occupied space where clerical work, administration, or business is carried out.

In addition, it includes:

- Other workplace spaces controlled by the employer and used by office workers, such as cafeterias, meeting rooms, and washrooms.
- Office areas of manufacturing and production facilities, not including process areas.

• Office areas of businesses such as food and beverage establishments, agricultural operations, construction, commercial trade, services, etc.

Smoking

A person is smoking if they are:

- Lighting up
- Inhaling
- Exhaling
- Carrying a pipe, cigar or cigarette of any kind that is burning.

NEW SECTION

WAC 296-307-59005 Control tobacco smoke in your building.

EXEMPTION: The minimum criteria specified in this rule do not apply to outdoor structures provided for smokers such as gazebos or lean-tos.

You must:

- Prohibit smoking in your office work environment

OR

• Restrict smoking inside your office work environment to designated enclosed smoking rooms that meet the following minimum criteria:

– Identify smoking rooms clearly with signs.

– Make sure the designated smoking rooms are not in common areas, such as:

◆ Places where nonsmoking employees are required to work or visit

◆ Restrooms

◆ Washrooms

◆ Hallways

◆ Stairways

◆ Cafeterias/lunchrooms

◆ Meeting rooms

– Make sure that no employee is required to enter a designated smoking room while someone is smoking there.

– Conduct cleaning and maintenance work in designated smoking rooms when smokers are not present.

You must:

• Ventilate designated smoking rooms at a rate of at least 60 cubic feet per minute per smoker (calculated on the basis of the maximum number of smokers expected during the course of a normal working day), which can be supplied by transfer air from adjacent areas.

– Maintain enough negative air pressure in designated smoking areas to prevent smoke from migrating into non-smoking areas, at all times.

– Operate a separate mechanical exhaust system in designated smoking rooms, to make sure exhausted air moves directly outside, and does not recirculate into nonsmoking areas.

– Prohibit use of the designated smoking room if the mechanical exhaust system is not working properly, until repairs are completed.

Note: This ventilation rate is recommended for occupancies of no more than 7 people for every 100 square feet of net occupied space in the designated smoking room.

NEW SECTION

WAC 296-307-59010 Control tobacco smoke that comes in from the outside. You must:

PROPOSED

• Use engineering or administrative controls to minimize the amount of tobacco smoke that comes into your office(s) from outside the building.

– Make sure that outside smoking areas used by your employees are not close to doorways, air intakes, and other openings that may allow airflow directly into an office.

Note: By changing the way workers do their job, you can reduce work exposure to potential hazards. These changes are called administrative controls and include such things as:

- Job rotation
- Wetting down dusty areas
- Having employees shower after exposure to potentially harmful substances
- Maintaining equipment properly
- Cleaning up work areas to control the effect of potential hazards

Engineering controls let you plan or physically change the machinery or work environment to prevent employee exposure to potential hazards. This includes any modification of plant equipment, processes, or materials to reduce employees' exposure to toxic materials or harmful physical agents.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 296-307-042 Must an employer provide first-aid kits?

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 296-350-60025 Reassuming jurisdiction or forwarding an appeal to the board.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-23505 Cabs. (1) Cab location.

(a) The general arrangement of the cab and the location of control and protective equipment shall be such that all operating handles are within convenient reach of the operator when facing the area to be served by the load hook, or while facing the direction of travel of the cab. The arrangement shall allow the operator a full view of the load hook in all positions.

(b) The cab shall be located to afford a minimum of 3 inches clearance from all fixed structures within its area of possible movement.

(c) The clearance of the cab above the working floor or passageway should be not less than seven feet.

(2) Access to crane. Access to the cab and/or bridge walkway shall be by a conveniently placed fixed ladder, stairs, or platform, requiring no step over any gap exceeding 12 inches. Fixed ladders shall be in conformance with the American National Standards Institute, Safety Code for Fixed Ladders, ANSI A14.3-1956.

(3) Fire extinguisher. A carbon dioxide, dry-chemical, or equivalent hand fire extinguisher should be kept in the cab. Carbon tetrachloride extinguishers shall not be used.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(4) Lighting. Light in the cab shall be sufficient to enable the operator to see clearly enough to perform the work.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-260 Helicopters. (1) Helicopter regulations. Helicopter cranes shall be expected to comply with any applicable regulations of the Federal Aviation Administration.

(2) Briefing. Prior to each day's operation, a briefing shall be conducted. This briefing shall set forth the plan of operation for the pilot and ground personnel.

(3) Slings and tag lines. Load shall be properly slung. Tag lines shall be of a length that will not permit their being drawn up into rotors. Pressed sleeve, swedged eyes, or equivalent means shall be used for all freely suspended loads to prevent hand splices from spinning open or cable clamps from loosening.

(4) Cargo hooks. All electrically operated cargo hooks shall have the electrical activating device so designed and installed as to prevent inadvertent operation. In addition, these cargo hooks shall be equipped with an emergency mechanical control for releasing the load. The hooks shall be tested prior to each day's operation to determine that the release functions properly, both electrically and mechanically.

(5) Personal protective equipment.

(a) Personal protective equipment for employees receiving the load shall consist of complete eye protection and hard hats secured by chin straps.

(b) Loose-fitting clothing likely to flap in the downwash and thus be snagged on hoist line shall not be worn.

(6) Loose gear and objects. Every practical precaution shall be taken to provide for the protection of the employees from flying objects in the rotor downwash. All loose gear within one hundred feet of the place of lifting the load, depositing the load, and all other areas susceptible to rotor downwash shall be secured or removed.

(7) Housekeeping. Good housekeeping shall be maintained in all helicopter loading and unloading areas.

(8) Operator responsibility. The helicopter operator shall be responsible for size, weight, and manner in which loads are connected to the helicopter. If, for any reason, the helicopter operator believes the lift cannot be made safely, the lift shall not be made.

(9) Hooking and unhooking loads. Employees shall not perform work under hovering craft except for that limited period of time necessary to guide, secure and unhook loads, or to hook loads. Regardless of whether the hooking or unhooking of a load takes place on the ground or a flat roof, or other location in an elevated work position in structural members, a safe means of access and egress, to include an unprogrammed emergency escape route or routes, shall be

provided for the employees who are hooking or unhooking loads.

(10) Static charge. Static charge on the suspended load shall be dissipated with a grounding device before ground personnel touch the suspended load, or protective rubber gloves shall be worn by all ground personnel touching the suspended load.

(11) Weight limitation. The weight of an external load shall not exceed the manufacturer's rating.

(12) Ground lines. Hoist wires or other gear, except for pulling lines or conductors that are allowed to "pay out" from a container or roll off a reel, shall not be attached to any fixed ground structure, or allowed to foul on any fixed structure.

(13) Visibility. When visibility is reduced by dust or other conditions, ground personnel shall exercise special caution to keep clear of main and stabilizing rotors. Precautions shall also be taken by the employer to eliminate as far as practical reduced visibility.

(14) Signal systems. Signal systems between aircrew and ground personnel shall be understood and checked in advance of hoisting the load. This applies to either radio or hand signal systems. Handsignals shall be as shown in Figure L-1.

(15) Approach distance. No unauthorized person shall be allowed to approach within fifty feet of the helicopter when the rotor blades are turning.

(16) Approaching helicopter. Whenever approaching or leaving a helicopter with blades rotating, all employees shall remain in full view of the pilot and keep in a crouched position. Employees shall avoid the area from the cockpit or cabin rearward unless authorized by the helicopter operator to work there.

(17) Personnel. Sufficient ground personnel shall be provided when required for safe helicopter loading and unloading operations.

(18) Communications. There shall be constant reliable communication between the pilot, and a designated employee of the ground crew who acts as a signalperson during the period of loading and unloading. This signalperson shall be distinctly recognizable from other ground personnel.

(19) Fires. Open fires shall not be permitted in an area that could result in such fires being spread by the rotor downwash.

(20) Under no circumstances shall the refueling of any type helicopter with either aviation gasoline or Jet B (Turbine) type fuel be permitted while the engines are running.

(21) Helicopters using Jet A (Turbine-Kerosene) type fuel may be refueled with engines running provided the following criteria is met:

(a) No unauthorized persons shall be allowed within fifty feet of the refueling operation or fueling equipment.

(b) A minimum of one thirty-pound fire extinguisher, or a combination of same, good for Class A, B and C fires, shall be provided within one hundred feet on the upwind side of the refueling operation.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(c) All fueling personnel shall be thoroughly trained in the refueling operation and in the use of the available fire extinguishing equipment they may be expected to utilize.

(d) There shall be no smoking, open flames, exposed flame heaters, flare pots, or open flame lights within fifty feet of the refueling area or fueling equipment. All entrances to the refueling area shall be posted with "NO SMOKING" signs.

(e) Due to the numerous causes of static electricity, it shall be considered present at all times. Prior to starting refueling operations, the fueling equipment and the helicopter shall be grounded and the fueling nozzle shall be electrically bonded to the helicopter. The use of conductive hose shall not be accepted to accomplish this bonding. All grounding and bonding connections shall be electrically and mechanically firm, to clean unpainted metal parts.

(f) To control spills, fuel shall be pumped either by hand or power. Pouring or gravity flow shall not be permitted. Self-closing nozzles or deadman controls shall be used and shall not be blocked open. Nozzles shall not be dragged along the ground.

(g) In case of a spill, the fueling operation shall be immediately stopped until such time as the person-in-charge determines that it is safe to resume the refueling operation.

(h) When ambient temperatures have been in the one hundred degrees Fahrenheit range for an extended period of time, all refueling of helicopters with the engines running shall be suspended until such time as conditions become suitable to resume refueling with the engines running.

(22) Helicopters with their engines stopped being refueled with aviation gasoline or Jet B (Turbine) type fuel, shall also comply with subsection (21)(a) through (g) of this section.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-33009 Container and portable tank storage. (1) Scope.

(a) General. This section shall apply only to the storage of flammable or combustible liquids in drums or other containers (including flammable aerosols) not exceeding 60 gallons individual capacity and those portable tanks not exceeding 660 gallons individual capacity.

(b) Exceptions. This section shall not apply to the following:

(i) Storage of containers in bulk plants, service stations, refineries, chemical plants, and distilleries;

(ii) Class I or Class II liquids in the fuel tanks of a motor vehicle, aircraft, boat, or portable or stationary engine;

(iii) Flammable or combustible paints, oils, varnishes, and similar mixtures used for painting or maintenance when not kept for a period in excess of 30 days;

(iv) Beverages when packaged in individual containers not exceeding 1 gallon in size.

(2) Design, construction, and capacity of containers.

(a) General. Only approved containers and portable tanks shall be used. Metal containers and portable tanks meeting the requirements of and containing products authorized by Chapter I, Title 49 of the Code of Federal Regulations - October 1, 1972, (regulations issued by the hazardous materials regulations board, department of transportation), shall be deemed to be acceptable.

PROPOSED

(b) Emergency venting. Each portable tank shall be provided with one or more devices installed in the top with sufficient emergency venting capacity to limit internal pressure under fire exposure conditions to 10 p.s.i.g., or 30 percent of the bursting pressure of the tank, whichever is greater. The total venting capacity shall be not less than that specified in WAC 296-24-33005 (2)(e)(iii) or (v). At least one pressure-actuated vent having a minimum capacity of 6,000 cubic feet of free air (14.7 p.s.i.a. and 60°F) shall be used. It shall be set to open at not less than 5 p.s.i.g. If fusible vents are used, they shall be actuated by elements that operate at a temperature not exceeding 300°F.

TABLE H-12
MAXIMUM ALLOWABLE SIZE OF
CONTAINERS AND PORTABLE TANKS

Container Type	Flammable liquids			Combustible Liquids	
	Class IA	Class IB	Class IC	Class II	Class III
	Glass or approved plastic _____	1 pt.	1 qu.	1 gal.	1 gal.
Metal (other than DOT drums) _____	1 gal.	5 gal.	5 gal.	5 gal.	5 gal.
Safety cans _____	2 gal.	5 gal.	5 gal.	5 gal.	5 gal.
Metal drums (DOT spec.) _____	60 gal.	60 gal.	60 gal.	60 gal.	60 gal.
Approved portable tanks _____	660 gal.	660 gal.	660 gal.	660 gal.	660 gal.

Container exemptions:

(i) Medicines, beverages, foodstuffs, cosmetics and other common consumer items, when packaged according to commonly accepted practices, shall be exempt from the requirements of (4)(a) and (b) of this section.

(c) Size. Flammable and combustible liquid containers shall be in accordance with Table H-12, except that glass or plastic containers of no more than 1-gallon capacity may be used for a Class IA or IB flammable liquid if:

(i) Such liquid either would be rendered unfit for its intended use by contact with metal or would excessively corrode a metal container so as to create a leakage hazard; and

(ii) The user's process either would require more than 1 pint of Class IA liquid or more than 1 quart of a Class IB liquid of a single assay lot to be used at one time, or would require the maintenance of an analytical standard liquid of a quality which is not met by the specified standards of liquids available, and the quantity of the analytical standard liquid required to be used in any one control process exceeds one-sixteenth the capacity of the container allowed under Table H-12 for the class of liquid; or

(iii) The containers are intended for direct export outside the United States.

(3) Design, construction, and capacity of storage cabinets.

(a) Maximum capacity. Not more than 60 gallons of Class I or Class II liquids, nor more than 120 gallons of Class III liquids may be stored in a storage cabinet.

(b) Fire resistance. Storage cabinets shall be designed and constructed to limit the internal temperature to not more

than 325°F when subjected to a 10-minute fire test using the standard time-temperature curve as set forth in Standard Methods of Fire Tests of Building Construction and Materials, NFPA 251-1969. All joints and seams shall remain tight and the door shall remain securely closed during the fire test. Cabinets shall be labeled "Flammable—Keep fire away," to meet specifications set forth in WAC 296-24-140.

(i) Metal cabinets constructed in the following manner shall be deemed to be in compliance. The bottom, top, door, and sides of cabinet shall be at least No. 18 gage sheet iron and double walled with 1 1/2-inch air space. Joints shall be riveted, welded or made tight by some equally effective means. The door shall be provided with a three-point lock, and the door sill shall be raised at least 2 inches above the bottom of the cabinet.

(ii) Wooden cabinets constructed in the following manner shall be deemed in compliance. The bottom, sides, and top shall be constructed of an approved grade of plywood at least 1 inch in thickness, which shall not break down or delaminate under fire conditions. All joints shall be rabbetted and shall be fastened in two directions with flathead wood-screws. When more than one door is used, there shall be a rabbetted overlap of not less than 1 inch. Hinges shall be mounted in such a manner as not to lose their holding capacity due to loosening or burning out of the screws when subjected to the fire test.

(4) Design and construction of inside storage rooms.

(a) Construction. Inside storage rooms shall be constructed to meet the required fire-resistive rating for their use. Such construction shall comply with the test specifications set forth in Standard Methods of Fire Tests of Building Construction and Materials, NFPA 251-1969. Where an automatic sprinkler system is provided, the system shall be designed and installed in an acceptable manner. Openings to other rooms or buildings shall be provided with noncombustible liquid-tight raised sills or ramps at least 4 inches in height, or the floor in the storage area shall be at least 4 inches below the surrounding floor. Openings shall be provided with approved self-closing fire doors. The room shall be liquid tight where the walls join the floor. A permissible alternate to the sill or ramp is an open-grated trench inside of the room which drains to a safe location. Where other portions of the building or other properties are exposed, windows shall be protected as set forth in the Standard for Fire Doors and Windows, NFPA No. 80-1968, for Class E or F openings. Wood at least 1 inch nominal thickness may be used for shelving, racks, dunnage, scuffboards, floor overlay, and similar installations.

(b) Rating and capacity. Storage in inside storage rooms shall comply with Table H-13.

PROPOSED

TABLE H-13

STORAGE IN INSIDE ROOMS

Fire protection* provided	Fire resistance	Maximum size	Total allowable quantities (gals./sq. Ft./floor area)
Yes	2 hours	500 sq.ft.	10
No	2 hours	500 sq.ft.	4
Yes	1 hour	150 sq.ft.	5
No	1 hour	150 sq.ft.	2

*Fire protection system shall be sprinkler, water spray, carbon dioxide, or other system.

(c) Wiring. Electrical wiring and equipment within inside storage rooms used to store Class I liquids shall comply with the provisions of chapter 296-24 WAC Part L for Class I, Division 2 locations. For inside storage rooms used to store Class II and III liquids the pertinent provisions chapter 296-24 WAC Part L apply.

(d) Ventilation. Every inside storage room shall be provided with either a gravity or a mechanical exhaust ventilation system. Such system shall be designed to provide for a complete change of air within the room at least six times per hour. If a mechanical exhaust system is used, it shall be controlled by a switch located outside of the door. The ventilating equipment and any lighting fixtures shall be operated by the same switch. A pilot light shall be installed adjacent to the switch if Class I flammable liquids are dispensed within the room. Where gravity ventilation is provided, the fresh air intake, as well as the exhaust outlet from the room, shall be on the exterior of the building in which the room is located.

(e) Storage in inside storage rooms. In every inside storage room there shall be maintained one clear aisle at least 3 feet wide. Containers over 30 gallons capacity shall not be stacked one upon the other. Dispensing shall be by approved pump or self-closing faucet only.

(5) Storage inside building.

(a) Egress. Flammable or combustible liquids, including stock for sale, shall not be stored so as to limit use of exits, stairways, or areas normally used for the safe egress of people.

(b) Containers. The storage of flammable or combustible liquids in containers or portable tanks shall comply with (4)(c) through (e) of this section.

(c) Office occupancies. Storage shall be prohibited except that which is required for maintenance and operation of building and operation of equipment. Such storage shall be kept in closed metal containers stored in a storage cabinet or in safety cans or in an inside storage room not having a door that opens into that portion of the building used by the public.

(d) Mercantile occupancies and other retail stores.

(i) In rooms or areas accessible to the public, storage shall be limited to quantities needed for display and normal merchandising purposes but shall not exceed 2 gallons per square foot of gross floor area. The gross floor area used for

computing the maximum quantity permitted shall be considered as that portion of the store actually being used for merchandising flammable and combustible liquids.

(ii) Where the aggregate quantity of additional stock exceeds 60 gallons of Class IA, or 120 gallons of Class IB, or 180 gallons of Class IC, or 240 gallons of Class II, or 500 gallons of Class III liquids, or any combination of Class I and Class II liquids exceeding 240 gallons, it shall be stored in a room or portion of the building that complies with the construction provisions for an inside storage room as prescribed in (4) of this section. For water miscible liquids, these quantities may be doubled.

(iii) Containers in a display area shall not be stacked more than 3 feet or two containers high, whichever is the greater, unless the stacking is done on fixed shelving or is otherwise satisfactorily secured.

(iv) Shelving shall be of stable construction, of sufficient depth and arrangement such that containers displayed thereon shall not be easily displaced.

(v) Leaking containers shall be removed to a storage room or taken to a safe location outside the building and the contents transferred to an undamaged container.

(e) General purpose public warehouses. Storage shall be in accordance with Table H-14 or H-15 and in buildings or in portions of such buildings cut off by standard firewalls. Material creating no fire exposure hazard to the flammable or combustible liquids may be stored in the same area.

TABLE H-14

INDOOR CONTAINER STORAGE

Class liquid	Storage level	Protected storage maximum per pile		Unprotected storage maximum per pile	
		Gal.	Ht.	Gal.	Ht.
IA	Ground and upper floors	2,750 (50)	3 ft. (1)	660 (12)	3 ft. (1)
	Basement	Not permitted		Not permitted	
IB	Ground and upper floors	5,500 (100)	6 ft. (2)	1,375 (25)	3 ft. (1)
	Basement	Not permitted		Not permitted	
IC	Ground and upper floors	16,500 (300)	6 ft. (2)	4,125 (75)	3 ft. (1)
	Basement	Not permitted		Not permitted	
II	Ground and upper floors	16,500 (300)	9 ft. (3)	4,125 (75)	9 ft. (3)
	Basement	5,500 (100)	9 ft. (3)	Not permitted	
III	Ground and upper floors	55,000 (1,000)	15 ft. (5)	13,750 (250)	12 ft. (4)
	Basement	8,250 (450)	9 ft. (3)	Not permitted	

PROPOSED

- Note 1: When 2 or more classes of materials are stored in a single pile, the maximum gallonage permitted in that pile shall be the smallest of the 2 or more separate maximum gallonages.
- Note 2: Aisles shall be provided so that no container is more than 12 ft. from an aisle. Main aisles shall be at least 8 ft. wide and side aisles at least 4 ft. wide.
(Numbers in parentheses indicate corresponding number of 55-gal. drums.)
- Note 3: Each pile shall be separated from each other by at least 4 ft.

TABLE H-15

INDOOR PORTABLE TANK STORAGE

Class liquid	Storage level	Protected storage maximum per pile		Unprotected storage maximum per pile	
		Gal.	Ht.	Gal.	Ht.
IA	Ground and upper floors	Not permitted		Not permitted	
	Basement	Not permitted		Not permitted	
IB	Ground and upper floors	20,000	7ft.	2,000	7 ft.
	Basement	Not permitted		Not permitted	
IC	Ground and upper floors	40,000	14 ft	5,500	7 ft.
	Basement	Not permitted		Not permitted	
II	Ground and upper floors	40,000	14 ft.	5,500	7 ft.
	Basement	20,000	7 ft.	Not permitted	
III	Ground and upper floors	60,000	14 ft.	22,000	7 ft.
	Basement	20,000	7 ft.	Not permitted	

- Note 1: When 2 or more classes of materials are stored in a single pile, the maximum gallonage permitted in that pile shall be the smallest of the 2 or more separate maximum gallonages.
- Note 2: Aisles shall be provided so that no portable tank is more than 12 ft. from an aisle. Main aisles shall be at least 8 ft. wide and side aisles at least 4 ft. wide.
- Note 3: Each pile shall be separated from each other by at least 4 ft.

(f) Flammable and combustible liquid warehouses or storage buildings.

(i) If the storage building is located 50 feet or less from a building or line of adjoining property that may be built upon, the exposing wall shall be a blank wall having a fire-resistance rating of at least 2 hours.

(ii) The total quantity of liquids within a building shall not be restricted, but the arrangement of storage shall comply with Table H-14 or H-15.

(iii) Containers in piles shall be separated by pallets or dunnage where necessary to provide stability and to prevent excessive stress on container walls.

(iv) Portable tanks stored over one tier high shall be designed to nest securely, without dunnage and adequate materials handling equipment shall be available to handle tanks safely at the upper tier level.

(v) No pile shall be closer than 3 feet to the nearest beam, chord, girder, or other obstruction, and shall be 3 feet below

sprinkler deflectors or discharge orifices of water spray, or other overhead fire protection systems.

(vi) Aisles of at least 3 feet wide shall be provided where necessary for reasons of access to doors, windows or stand-pipe connections.

(6) Storage outside buildings.

(a) General. Storage outside buildings shall be in accordance with Table H-16 or H-17, and (6)(b) and (d) of this section.

TABLE H-16

OUTDOOR CONTAINER STORAGE

1 Class	2 Maximum per pile (see note 1)	3 Distance between piles (see note 2)	4 Distance to property line that can be built upon (see notes 3 & 4)	5 Distance to street, alley, public way (see note 4)
	gal.	ft.	ft.	ft.
IA	1,100	5	20	10
IB	2,200	5	20	10
IC	4,400	5	20	10
II	8,800	5	10	5
III	22,000	5	10	5

- Note 1: When 2 or more classes of materials are stored in a single pile, the maximum gallonage in that pile shall be the smallest of the 2 or more separate gallonages.
- Note 2: Within 200 ft. of each container, there shall be 12-ft. wide access way to permit approach of fire control apparatus.
- Note 3: The distances listed apply to properties that have protection for exposures as defined. If there are exposures, and such protection for exposures does not exist, the distances in column 4 shall be doubled.
- Note 4: When total quantity stored does not exceed 50 percent of maximum per pile, the distances in columns 4 and 5 may be reduced 50 percent, but not less than 3 ft.

(b) Maximum storage. A maximum of 1,100 gallons of flammable or combustible liquids may be located adjacent to buildings located on the same premises and under the same management provided the provisions of (6)(b)(i) and (ii) are complied with.

(i) The building shall be a one-story building devoted principally to the handling and storing of flammable or combustible liquids or the building shall have 2 hour fire-resistive exterior walls having no opening within 10 feet of such storage.

(ii) Where quantity stored exceeds 1,100 gallons, or provisions of (6)(b)(i) cannot be met, a minimum distance of 10 feet between buildings and nearest container of flammable or combustible liquid shall be maintained.

PROPOSED

TABLE H-17

OUTDOOR PORTABLE TANK STORAGE

I Class	2 Maximum per pile gal.	3 Distance between piles ft.	4 Distance to property line that can be built upon ft.	5 Distance to street, alley, public way ft.
IA _____	2,200	5	20	10
IB _____	4,400	5	20	10
IC _____	8,800	5	20	10
II _____	17,600	5	10	5
III _____	44,000	5	10	5

- Note 1: When 2 or more classes of materials are stored in a single pile, the maximum gallonage in that pile shall be the smallest of the 2 or more separate gallonages.
- Note 2: Within 200 ft. of each portable tank, there shall be a 12-ft. wide access way to permit approach of fire control apparatus.
- Note 3: The distances listed apply to properties that have protection for exposures as defined. If there are exposures, and such protection for exposures does not exist, the distances in column 4 shall be doubled.
- Note 4: When total quantity stored does not exceed 50 percent of maximum per pile, the distances in columns 4 and 5 may be reduced 50 percent, but not less than 3 ft.

(c) Spill containment. The storage area shall be graded in a manner to divert possible spills away from buildings or other exposures or shall be surrounded by a curb at least 6 inches high. When curbs are used, provisions shall be made for draining of accumulations of ground or rain water or spills of flammable or combustible liquids. Drains shall terminate at a safe location and shall be accessible to operation under fire conditions.

(d) Security. The storage area shall be protected against tampering or trespassers where necessary and shall be kept free of weeds, debris and other combustible material not necessary to the storage.

(7) Fire control.

(a) Extinguishers. Suitable fire control devices, such as small hose or portable fire extinguishers, shall be available at locations where flammable or combustible liquids are stored.

(i) At least one portable fire extinguisher having a rating of not less than 12-B units shall be located outside of, but not more than 10 feet from, the door opening into any room used for storage.

(ii) At least one portable fire extinguisher having a rating of not less than 12-B units must be located not less than 10 feet, nor more than 25 feet, from any Class I or Class II liquid storage area located outside of a storage room but inside a building.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(b) Sprinklers. When sprinklers are provided, they shall be installed in accordance with chapter 296-24 WAC, Part G-3.

(c) Open flames and smoking. Open flames and smoking shall not be permitted in flammable or combustible liquid storage areas.

(d) Water reactive materials. Materials which will react with water shall not be stored in the same room with flammable or combustible liquids.

AMENDATORY SECTION (Amending Order 91-07, filed 11/22/91, effective 12/24/91)

WAC 296-24-33015 Service stations. (1) Storage and handling.

(a) General provisions.

(i) Liquids shall be stored in approved closed containers not exceeding 60 gallons capacity, in tanks located underground, in tanks in special enclosures as described in (b) of this subsection, or in aboveground tanks as provided for in (3)(b)(i), (ii), (iii) and (iv) of this section.

(ii) Aboveground tanks, located in an adjoining bulk plant, may be connected by piping to service station underground tanks if, in addition to valves at aboveground tanks, a valve is also installed within control of service station personnel.

(iii) Apparatus dispensing Class I liquids into the fuel tanks of motor vehicles of the public shall not be located at a bulk plant unless separated by a fence or similar barrier from the area in which bulk operations are conducted.

(iv) The provisions of subsection (1) of this section shall not prohibit the dispensing of flammable liquids in the open from a tank vehicle to a motor vehicle. Such dispensing shall be permitted provided:

(A) The tank vehicle complies with the requirements covered in the Standard on Tank Vehicles for Flammable Liquids, NFPA 385-1966.

(B) The dispensing is done on premises not open to the public.

(C) The dispensing hose does not exceed 50 feet in length.

(D) The dispensing nozzle is a listed automatic-closing type without a latch-open device.

(vi) Class I liquids shall not be stored or handled within a building having a basement or pit into which flammable vapors may travel, unless such area is provided with ventilation designed to prevent the accumulation of flammable vapors therein.

(vii) Accurate inventory records shall be maintained and reconciled on all Class I liquid storage tanks for possible indication of leakage from tanks or piping.

(b) Special enclosures.

(i) When installation of tanks in accordance with WAC 296-24-33005(3) is impractical because of property or building limitations, tanks for flammable or combustible liquids may be installed in buildings if properly enclosed.

(ii) The enclosure shall be substantially liquid and vapor-tight without backfill. Sides, top, and bottom of the enclosure shall be of reinforced concrete at least 6 inches thick, with openings for inspection through the top only. Tank connections shall be so piped or closed that neither vapors nor liquid can escape into the enclosed space. Means shall be provided whereby portable equipment may be employed to discharge

PROPOSED

to the outside any liquid or vapors which might accumulate should leakage occur.

(iii) At automotive service stations provided in connection with tenant or customer parking facilities at or below grade level in large buildings of commercial, mercantile, or residential occupancy, tanks containing Class I liquids, installed of necessity in accordance with subsection (1)(b)(ii) of this section, shall not exceed 6,000 gallons individual or 18,000 gallons aggregate capacity.

(c) Inside buildings.

(i) Except where stored in tanks as provided in subsection (1)(b) of this section, no Class I liquids shall be stored within any service station building except in closed containers of aggregate capacity not exceeding 60 gallons. One container not exceeding 60 gallons capacity equipped with an approved pump is permitted.

(ii) Class I liquids may be transferred from one container to another in lubrication or service rooms of a service station building provided the electrical installation complies with Table H-19 and provided that any heating equipment complies with subsection (5) of this section.

(iii) Class II and Class III liquids may be stored and dispensed inside service station buildings from tanks of not more than 120 gallons capacity each.

(d) Labeling. No sale or purchase of any Class I, II, or III liquids shall be made in containers unless such containers are clearly marked with the name of the product contained therein.

(e) Dispensing into portable containers. No delivery of any Class I liquids shall be made into portable containers unless the container is constructed of metal, has a tight closure with screwed or spring cover, and is fitted with a spout or so designed that the contents can be poured without spilling.

(2) Dispensing systems.

(a) Location. Dispensing devices at automotive service stations shall be so located that all parts of the vehicle being served will be on the premises of the service station.

(b) Inside location. Approved dispensing units may be located inside of buildings. The dispensing area shall be separated from other areas in an approved manner. The dispensing unit and its piping shall be mounted either on a concrete island or protected against collision damage by suitable means and shall be located in a position where it cannot be struck by a vehicle descending a ramp or other slope out of control. The dispensing area shall be provided with an approved mechanical or gravity ventilation system. When dispensing units are located below grade, only approved mechanical ventilation shall be used and the entire dispensing area shall be protected by an approved automatic sprinkler system. Ventilating systems shall be electrically interlocked with gasoline dispensing units so that the dispensing units cannot be operated unless the ventilating fan motors are energized.

(c) Emergency power cutoff. A clearly identified and easily accessible switch(es) or a circuit breaker(s) shall be provided at a location remote from dispensing devices, including remote pumping systems, to shut off the power to all dispensing devices in the event of an emergency.

(d) Dispensing units.

(i) Class I liquids shall be transferred from tanks by means of fixed pumps so designed and equipped as to allow control of the flow and to prevent leakage or accidental discharge.

(ii) Only listed devices may be used for dispensing Class I liquids. No such device may be used if it shows evidence of having been dismantled.

(iii) Every dispensing device for Class I liquids installed after December 31, 1978, shall contain evidence of listing so placed that any attempt to dismantle the device will result in damage to such evidence, visible without disassembly or dismounting of the nozzle.

(iv) Class I liquids shall not be dispensed by pressure from drums, barrels, and similar containers. Approved pumps taking suction through the top of the container or approved self-closing faucets shall be used.

(v) The dispensing units, except those attached to containers, shall be mounted either on a concrete island or protected against collision damage by suitable means.

(e) Remote pumping systems.

(i) This subdivision shall apply to systems for dispensing Class I liquids where such liquids are transferred from storage to individual or multiple dispensing units by pumps located elsewhere than at the dispensing units.

(ii) Pumps shall be designed or equipped so that no part of the system will be subjected to pressures above its allowable working pressure. Pumps installed above grade, outside of buildings, shall be located not less than 10 feet from lines of adjoining property which is/ or may be built upon, and not less than 5 feet from any building opening. When an outside pump location is impractical, pumps may be installed inside of buildings, as provided for dispensers in (b) of this subsection, or in pits as provided in (e)(iii) of this subsection. Pumps shall be substantially anchored and protected against physical damage by vehicles.

(iii) Pits for subsurface pumps or piping manifolds of submersible pumps shall withstand the external forces to which they may be subjected without damage to the pump, tank, or piping. The pit shall be no larger than necessary for inspection and maintenance and shall be provided with a fitted cover.

(iv) A control shall be provided that will permit the pump to operate only when a dispensing nozzle is removed from its bracket on the dispensing unit and the switch on this dispensing unit is manually actuated. This control shall also stop the pump when all nozzles have been returned to their brackets.

(v) An approved impact valve, incorporating a fusible link, designed to close automatically in the event of severe impact or fire exposure shall be properly installed in the dispensing supply line at the base of each individual dispensing device.

(vi) Testing. After the completion of the installation, including any paving, that section of the pressure piping system between the pump discharge and the connection for the dispensing facility shall be tested for at least 30 minutes at the maximum operating pressure of the system. Such tests shall be repeated at 5-year intervals thereafter.

(f) Delivery nozzles.

(i) A listed manual or automatic-closing type hose nozzle valve shall be provided on dispensers used for the dispensing of Class I liquids.

(ii) Manual-closing type valves shall be held open manually during dispensing. Automatic-closing type valves may be used in conjunction with an approved latch-open device.

(g) Special type dispensers.

(i) Emergency controls shall be installed at an acceptable location, but controls shall not be more than 100 feet from dispensers.

(ii) Instructions for the operation of dispensers shall be conspicuously posted.

(3) Marine service stations.

(a) Dispensing.

(i) The dispensing area shall be located away from other structures so as to provide room for safe ingress and egress of craft to be fueled. Dispensing units shall in all cases be at least 20 feet from any activity involving fixed sources of ignition.

(ii) Dispensing shall be by approved dispensing units with or without integral pumps and may be located on open piers, wharves, or floating docks or on shore or on piers of the solid fill type.

(iii) Dispensing nozzles shall be automatic-closing without a hold-open latch.

(b) Tanks and pumps.

(i) Tanks, and pumps not integral with the dispensing unit, shall be on shore or on a pier of the solid fill type, except as provided below.

(ii) Where shore location would require excessively long supply lines to dispensers, tanks may be installed on a pier provided that applicable portions of WAC 296-24-33005 relative to spacing, diking, and piping are complied with and the quantity so stored does not exceed 1,100 gallons aggregate capacity.

(iii) Shore tanks supplying marine service stations may be located above ground, where rock ledges or high water table make underground tanks impractical.

(iv) Where tanks are at an elevation which would produce gravity head on the dispensing unit, the tank outlet shall be equipped with a pressure control valve positioned adjacent to and outside the tank block valve specified in WAC 296-24-33005 (2)(h)(ii), so adjusted that liquid cannot flow by gravity from the tank in case of piping or hose failure.

(c) Piping.

(i) Piping between shore tanks and dispensing units shall be as described in WAC 296-24-33007, except that, where dispensing is from a floating structure, suitable lengths of oil-resistant flexible hose may be employed between the shore piping and the piping on the floating structure as made necessary by change in water level or shoreline.

(ii) A readily accessible valve to shut off the supply from shore shall be provided in each pipeline at or near the approach to the pier and at the shore end of each pipeline adjacent to the point where flexible hose is attached.

(iii) Piping shall be located so as to be protected from physical damage.

(iv) Piping handling Class I liquids shall be grounded to control stray currents.

(4) Electrical equipment.

(a) Application. This subsection shall apply to areas where Class I liquids are stored or handled. For areas where Class II or Class III liquids are stored or handled the electrical equipment may be installed according to the provisions of chapter 296-24 WAC Part L for ordinary locations.

(b) All electrical equipment and wiring shall be of a type specified by and shall be installed according to chapter 296-24 WAC Part L.

(c) So far as it applies, Table H-19 shall be used to delineate and classify hazardous areas for the purpose of installation of electrical equipment under normal circumstances. A classified area shall not extend beyond an unpierced wall, roof, or other solid partition.

(d) The area classifications listed shall be based on the assumption that the installation meets the applicable requirements of this section in all respects.

TABLE H-19
ELECTRICAL EQUIPMENT HAZARDOUS
AREAS—SERVICE STATIONS

Location	Class I, Group D division	Extent of classified area
Underground tank: Fill opening _____	1	Any pit, box or space below grade level, any part of which is within the Division 1 or 2 classified area.
	2	Up to 18 inches above grade level within a horizontal radius of 10 feet from a loose fill connection and within a horizontal radius of 5 feet from a tight fill connection.
Vent—Discharging upward _____	1	Within 3 feet of open end of vent, extending in all directions.
	2	Area between 3 feet and 5 feet of open end of vent, extending in all directions.
Dispenser: Pits _____	1	Any pit, box or space below grade level, any part of which is within the Division 1 or 2 classified area.
Dispenser enclosure _____	1	The area 4 feet vertically above base within the enclosure and 18 inches horizontally in all directions.

PROPOSED

TABLE H-19
ELECTRICAL EQUIPMENT HAZARDOUS
AREAS—SERVICE STATIONS

Location	Class I, Group D division	Extent of classified area
Outdoor	2	Up to 18 inches above grade level within 20 feet horizontally of any edge of enclosure.
Indoor:		
With mechanical ventilation	2	Up to 18 inches above grade or floor level within 20 feet horizontally of any edge of enclosure.
With gravity ventilation	2	Up to 18 inches above grade or floor level within 25 feet horizontally of any edge of enclosure.
Remote pump—Outdoor	1	Any pit, box or space below grade level if any part is within a horizontal distance of 10 feet from any edge of pump.
	2	Within 3 feet of any edge of pump, extending in all directions. Also up to 18 inches above grade level within 10 feet horizontally from any edge of pump.
Remote pump—Indoor	1	Entire area within any pit.
	2	Within 5 feet of any edge of pump, extending in all directions. Also up to 3 feet above floor or grade level within 25 feet horizontally from any edge of pump.
Lubrication or service room	1	Entire area within any pit.
	2	Area up to 18 inches above floor or grade level within entire lubrication room.
Dispenser for Class I liquids	2	Within 3 feet of any fill or dispensing point, extending in all directions.

TABLE H-19
ELECTRICAL EQUIPMENT HAZARDOUS
AREAS—SERVICE STATIONS

Location	Class I, Group D division	Extent of classified area
Special enclosure inside building per WAC 296-24-33013 (1)(b)	1	Entire enclosure.
Sales, storage and rest rooms	Ordinary	If there is any opening to these rooms within the extent of a Division 1 area, the entire room shall be classified as Division 1.

(5) Heating equipment.

(a) Conformance. Heating equipment shall be installed as provided in (b) through (e) of this subsection.

(b) Application. Heating equipment may be installed in the conventional manner in an area except as provided in (c), (d) or (e) of this subsection.

(c) Special room. Heating equipment may be installed in a special room separated from an area classified by Table H-19 by walls having a fire resistance rating of at least 1 hour and without any openings in the walls within 8 feet of the floor into an area classified in Table H-19. This room shall not be used for combustible storage and all air for combustion purposes shall come from outside the building.

(d) Work areas. Heating equipment using gas or oil fuel may be installed in the lubrication, sales, or service room where there is no dispensing or transferring of Class I liquids provided the bottom of the combustion chamber is at least 18 inches above the floor and the heating equipment is protected from physical damage by vehicles. Heating equipment using gas or oil fuel listed for use in garages may be installed in the lubrication or service room where Class I liquids are dispensed provided the equipment is installed at least 8 feet above the floor.

(e) Electric heat. Electrical heating equipment shall conform to subsection (4) of this section.

(6) Drainage and waste disposal. Provision shall be made in the area where Class I liquids are dispensed to prevent spilled liquids from flowing into the interior of service station buildings. Such provision may be by grading driveways, raising door sills, or other equally effective means. Crankcase drainings and flammable or combustible liquids shall not be dumped into sewers but shall be stored in tanks or drums outside of any building until removed from the premises.

(7) Sources of ignition. In addition to the previous restrictions of this section, the following shall apply: There shall be no smoking or open flames in the areas used for fueling, servicing fuel systems for internal combustion engines, receiving or dispensing of flammable or combustible liquids. Conspicuous and legible signs prohibiting smoking shall be posted within sight of the customer being served. The motors

PROPOSED

of all equipment being fueled shall be shut off during the fueling operation.

(8) Fire control. Each service station shall be provided with at least one fire extinguisher having a minimum approved classification of 6 B, C located so that an extinguisher will be within 75 feet of each pump, dispenser, underground fill pipe opening, and lubrication or service room.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

AMENDATORY SECTION (Amending Order 73-5, filed 5/9/73 and Order 73-4, filed 5/7/73)

WAC 296-24-47509 Systems utilizing containers other than DOT containers. (1) Application. This section applies specifically to systems utilizing storage containers other than those constructed in accordance with DOT specifications. WAC 296-24-47505 of this section applies to this section unless otherwise noted in WAC 296-24-47505.

(2) Design pressure and classification of storage containers. Storage containers shall be designed and classified in accordance with Table H-31.

(3) Container valves and accessories, filler pipes, and discharge pipes.

(a) The filling pipe inlet terminal shall not be located inside a building. For containers with a water capacity of 125 gallons or more, such terminals shall be located not less than 10 feet from any building (see WAC 296-24-47505 (6)(b)), and preferably not less than 5 feet from any driveway, and shall be located in a protective housing built for the purpose.

TABLE H-31

Container type	For gases with vapor press. Not to exceed lb. per sq. in. gage at 100°F (37.8°C.)	Minimum design pressures of container lb. per sq. in. gage	
		1949 and earlier editions of ASME Code (Par. U-68 U-69)	1949 edition of Code (Par. U-200, U-201); 1950, 1952, 1956, 1959, 1962, 1965, and 1968 (Division I) editions of ASME Code; All editions of API-ASME Code ³
80 ¹	80 ¹	80 ¹	100 ¹
100	100	100	125
125	125	125	156
150	150	150	187
175	175	175	219
200 ²	215	200	250

¹New storage containers of the 80 type have not been authorized since Dec. 31, 1947.

²Container type may be increased by increments of 25. The minimum design pressure of containers shall be 100% of the container type designations when constructed under 1949 or earlier editions of the ASME Code (Par. U-68 and U-69). The minimum design pressure of containers shall be 125% of the container type designation when constructed under: (1) The 1949 ASME Code (Par. U-200 and U-201), (2) 1950, 1952, 1956, 1959, 1962, 1965, and 1968 (Division I) editions of the ASME Code, and (3) all editions of the API-ASME Code.

³Construction of containers under the API-ASME Code is not authorized after July 1, 1961.

(b) The filling connection shall be fitted with one of the following:

(i) Combination back-pressure check valve and excess flow valve.

(ii) One double or two single back-pressure check valves.

(iii) A positive shut-off valve in conjunction with either:

(A) An internal back pressure valve, or

(B) An internal excess flow valve.

(c) All openings in a container shall be equipped with approved automatic excess flow valves except in the following: Filling connections as provided in (3)(b) of this section; safety relief connections, liquid-level gaging devices as provided in WAC 296-24-47505 (7)(d), (19)(c) and (19)(h); pressure gage connections as provided in WAC 296-24-47505 (7)(e), as provided in (3)(d), (f) and (g) of this section.

(d) An excess flow valve is not required in the withdrawal service line providing the following are complied with:

(i) Such systems' total water capacity does not exceed 2,000 U.S. gallons.

(ii) The discharge from the service outlet is controlled by a suitable manually operated shut-off valve which is:

(A) Threaded directly into the service outlet of the container; or

(B) Is an integral part of a substantial fitting threaded into or on the service outlet of the container; or

(C) Threaded directly into a substantial fitting threaded into or on the service outlet of the container.

(iii) The shut-off valve is equipped with an attached handwheel or the equivalent.

(iv) The controlling orifice between the contents of the container and the outlet of the shut-off valve does not exceed five-sixteenths inch in diameter for vapor withdrawal systems and one-eighth inch in diameter for liquid withdrawal systems.

(v) An approved pressure-reducing regulator is directly attached to the outlet of the shut-off valve and is rigidly supported, or that an approved pressure-reducing regulator is attached to the outlet of the shut-off valve by means of a suitable flexible connection, provided the regulator is adequately supported and properly protected on or at the tank.

(e) All inlet and outlet connections except safety relief valves, liquid level gaging devices and pressure gages on containers of 2,000 gallons water capacity, or more, and on any container used to supply fuel directly to an internal combustion engine, shall be labeled to designate whether they communicate with vapor or liquid space. Labels may be on valves.

(f) In lieu of an excess flow valve openings may be fitted with a quick-closing internal valve which, except during operating periods shall remain closed. The internal mechanism for such valves may be provided with a secondary control which shall be equipped with a fusible plug (not over 220°F melting point) which will cause the internal valve to close automatically in case of fire.

PROPOSED

(g) Not more than two plugged openings shall be permitted on a container of 2,000 gallons or less water capacity.

(h) Containers of 125 gallons water capacity or more manufactured after July 1, 1961, shall be provided with an approved device for liquid evacuation, the size of which shall be three-fourths inch national pipe thread minimum. A plugged opening will not satisfy this requirements.

(4) Safety devices.

(a) All safety devices shall comply with the following:

(i) All container safety relief devices shall be located on the containers and shall have direct communication with the vapor space of the container.

(ii) In industrial and gas manufacturing plants, discharge pipe from safety relief valves on pipe lines within a building shall discharge vertically upward and shall be piped to a point outside a building.

(iii) Safety relief device discharge terminals shall be so located as to provide protection against physical damage and such discharge pipes shall be fitted with loose raincaps. Return bends and restrictive pipefittings shall not be permitted.

(iv) If desired, discharge lines from two or more safety relief devices located on the same unit, or similar lines from two or more different units, may be run into a common discharge header, provided that the cross-sectional area of such header be at least equal to the sum of the cross-sectional area of the individual discharge lines, and that the setting of safety relief valves are the same.

(v) Each storage container of over 2,000 gallons water capacity shall be provided with a suitable pressure gage.

(vi) A final stage regulator of an LP-gas system (excluding any appliance regulator) shall be equipped on the low-pressure side with a relief valve which is set to start to discharge within the limits specified in Table H-30.

(vii) When a regulator or pressure relief valve is installed inside a building, the relief valve and the space above the regulator and relief valve diaphragms shall be vented to the outside air with the discharge outlet located not less than 3 feet horizontally away from any opening into the building which is below such discharge. (These provisions do not apply to individual appliance regulators when protection is otherwise provided. In buildings devoted exclusively to gas distribution purposes, the space above the diaphragm need not be vented to the outside.)

(b) Safety devices for aboveground containers shall be provided as follows:

(i) Containers of 1,200 gallons water capacity or less which may contain liquid fuel when installed above ground shall have the rate of discharge required by WAC 296-24-47505 (10)(b) provided by a spring-loaded relief valve or valves. In addition to the required spring-loaded relief valve(s) suitable fuse plug(s) may be used provided the total discharge area of the fuse plug(s) for each container does not exceed 0.25 square inch.

(ii) The fusible metal of the fuse plugs shall have a yield temperature of 208°F minimum and 220°F maximum. Relief valves and fuse plugs shall have direct communication with the vapor space of the container.

(iii) On a container having a water capacity greater than 125 gallons, but not over 2,000 gallons, the discharge from the safety relief valves shall be vented away from the container vertically upwards and unobstructed to the open air in such a manner as to prevent any impingement of escaping gas upon the container; loose-fitting rain caps shall be used. Suitable provision shall be made for draining condensate which may accumulate in the relief valve or its discharge pipe.

(iv) On containers of 125 gallons water capacity or less, the discharge from safety relief devices shall be located not less than 5 feet horizontally away from any opening into the building below the level of such discharge.

(v) On a container having a water capacity greater than 2,000 gallons, the discharge from the safety relief valves shall be vented away from the container vertically upwards to a point at least 7 feet above the container, and unobstructed to the open air in such a manner as to prevent any impingement of escaping gas upon the container; loose-fitting rain caps shall be used. Suitable provision shall be made so that any liquid or condensate that may accumulate inside of the safety relief valve or its discharge pipe will not render the valve inoperative. If a drain is used, a means shall be provided to protect the container, adjacent containers, piping, or equipment against impingement of flame resulting from ignition of product escaping from the drain.

(c) On all containers which are installed underground and which contain no liquid fuel until buried and covered, the rate of discharge of the spring-loaded relief valve installed thereon may be reduced to a minimum of 30 percent of the rate of discharge specified in WAC 296-24-47505 (10)(b). Containers so protected shall not be uncovered after installation until the liquid fuel has been removed therefrom. Containers which may contain liquid fuel before being installed under ground and before being completely covered with earth are to be considered aboveground containers when determining the rate of discharge requirement of the relief valves.

(d) On underground containers of more than 2,000 gallons water capacity, the discharge from safety relief devices shall be piped vertically and directly upward to a point at least 7 feet above the ground.

Where there is a probability of the manhole or housing becoming flooded, the discharge from regulator vent lines shall be above the highest probable water level. All manholes or housings shall be provided with ventilated louvers or their equivalent, the area of such openings equaling or exceeding the combined discharge areas of the safety relief valves and other vent lines which discharge their content into the manhole housing.

(e) Safety devices for vaporizers shall be provided as follows:

(i) Vaporizers of less than 1 quart total capacity, heated by the ground or the surrounding air, need not be equipped with safety relief valves provided that adequate tests certified by any of the authorities referred to in WAC 296-24-47505 (2), demonstrate that the assembly is safe without safety relief valves.

(ii) No vaporizer shall be equipped with fusible plugs.

(iii) In industrial and gas manufacturing plants, safety relief valves on vaporizers within a building shall be piped to a point outside the building and be discharged upward.

(5) Reinstallation of containers. Containers may be reinstalled if they do not show any evidence of harmful external corrosion or other damage. Where containers are reinstalled underground, the corrosion resistant coating shall be put in good condition (see (7)(f) of this section). Where containers are reinstalled above ground, the safety devices and gaging devices shall comply with (4) of this section and WAC 296-24-47505(19) respectively for aboveground containers.

(6) Capacity of containers. A storage container shall not exceed 90,000 gallons water capacity.

(7) Installation of storage containers.

(a) Containers installed above ground, except as provided in (7)(g) of this section, shall be provided with substantial masonry or noncombustible structural supports on firm masonry foundation.

(b) Aboveground containers shall be supported as follows:

(i) Horizontal containers shall be mounted on saddles in such a manner as to permit expansion and contraction. Structural metal supports may be employed when they are protected against fire in an approved manner. Suitable means of preventing corrosion shall be provided on that portion of the container in contact with the foundations or saddles.

(ii) Containers of 2,000 gallons water capacity or less may be installed with nonfireproofed ferrous metal supports if mounted on concrete pads or footings, and if the distance from the outside bottom of the container shell to the concrete pad, footing, or the ground does not exceed 24 inches.

(c) Any container may be installed with nonfireproofed ferrous metal supports if mounted on concrete pads or footings, and if the distance from the outside bottom of the container to the ground does not exceed 5 feet, provided the container is in an isolated location.

(d) Containers may be partially buried providing the following requirements are met:

(i) The portion of the container below the surface and for a vertical distance not less than 3 inches above the surface of the ground is protected to resist corrosion, and the container is protected against settling and corrosion as required for fully buried containers.

(ii) Spacing requirements shall be as specified for underground tanks in WAC 296-24-47505 (6)(b).

(iii) Relief valve capacity shall be as required for aboveground containers.

(iv) Container is located so as not to be subject to vehicular damage, or is adequately protected against such damage.

(v) Filling densities shall be as required for aboveground containers as specified in Table H-27. See WAC 296-24-47505.

(e) Containers buried underground shall be placed so that the top of the container is not less than 6 inches below grade. Where an underground container might be subject to abrasive action or physical damage due to vehicular traffic or other causes, then it shall be:

(i) Placed not less than 2 feet below grade, or

(ii) Otherwise protected against such physical damage.

It will not be necessary to cover the portion of the container to which manhole and other connections are affixed; however, where necessary, protection shall be provided

against vehicular damage. When necessary to prevent floating, containers shall be securely anchored or weighted.

(f) Containers shall be given a protective coating before being placed underground. This coating shall be equivalent to hot-dip galvanizing or to two coatings of red lead followed by a heavy coating of coal tar or asphalt. In lowering the container into place, care shall be exercised to prevent damage to the coating. Any damage to the coating shall be repaired before backfilling.

(i) Containers shall be set on a firm foundation (firm earth may be used) and surrounded with earth or sand firmly tamped in place. Backfill should be free of rocks or other abrasive materials.

(g) Containers with foundations attached (portable or semiportable containers with suitable steel "runners" or "skids" and popularly known in the industry as "skid tanks") shall be designed, installed, and used in accordance with these rules subject to the following provisions:

(i) If they are to be used at a given general location for a temporary period not to exceed 6 months they need not have fire-resisting foundations or saddles but shall have adequate ferrous metal supports.

(ii) They shall not be located with the outside bottom of the container shell more than 5 feet above the surface of the ground unless fire-resisting supports are provided.

(iii) The bottom of the skids shall not be less than 2 inches or more than 12 inches below the outside bottom of the container shell.

(iv) Flanges, nozzles, valves, fittings, and the like, having communication with the interior of the container, shall be protected against physical damage.

(v) When not permanently located on fire-resisting foundations, piping connections shall be sufficiently flexible to minimize the possibility of breakage or leakage of connections if the container settles, moves, or is otherwise displaced.

(vi) Skids, or lugs for attachment of skids, shall be secured to the container in accordance with the code or rules under which the container is designed and built (with a minimum factor of safety of four) to withstand loading in any direction equal to four times the weight of the container and attachments when filled to the maximum permissible loaded weight.

(h) Field welding where necessary shall be made only on saddle plates or brackets which were applied by the manufacturer of the tank.

(i) For aboveground containers, secure anchorage or adequate pier height shall be provided against possible container flotation wherever sufficiently high floodwater might occur.

(j) When permanently installed containers are interconnected, provision shall be made to compensate for expansion, contraction, vibration, and settling of containers, and interconnecting piping. Where flexible connections are used, they shall be of an approved type and shall be designed for a bursting pressure of not less than five times the vapor pressure of the product at 100°F. The use of nonmetallic hose is prohibited for permanently interconnecting such containers.

(k) Container assemblies listed for interchangeable installation above ground or under ground shall conform to the requirements for aboveground installations with respect

to safety relief capacity and filling density. For installation above ground all other requirements for aboveground installations shall apply. For installation under ground all other requirements for underground installations shall apply.

(8) Protection of container accessories.

(a) Valves, regulating, gaging, and other container accessory equipment shall be protected against tampering and physical damage. Such accessories shall also be so protected during the transit of containers intended for installation underground.

(b) On underground or combination aboveground-underground containers, the service valve handwheel, the terminal for connecting the hose, and the opening through which there can be a flow from safety relief valves shall be at least 4 inches above the container and this opening shall be located in the dome or housing. Underground systems shall be so installed that all the above openings, including the regulator vent, are located above the normal maximum water table.

(c) All connections to the underground containers shall be located within a substantial dome, housing, or manhole and with access thereto protected by a substantial cover.

(9) Drips for condensed gas. Where vaporized gas on the low-pressure side of the system may condense to a liquid at normal operating temperatures and pressures, suitable means shall be provided for revaporization of the condensate.

(10) Damage from vehicles. When damage to LP-gas systems from vehicular traffic is a possibility, precautions against such damage shall be taken.

(11) Pits and drains. Every effort should be made to avoid the use of pits, except pits fitted with automatic flammable vapor detecting devices. No drains or blowoff lines shall be directed into or in proximity to sewer systems used for other purposes.

(12) General provisions applicable to systems in industrial plants (of 2,000 gallons water capacity and more) and to bulk filling plants.

(a) When standard watch service is provided, it shall be extended to the LP-gas installation and personnel properly trained.

(b) If loading and unloading are normally done during other than daylight hours, adequate lights shall be provided to illuminate storage containers, control valves, and other equipment.

(c) Suitable roadways or means of access for extinguishing equipment such as wheeled extinguishers or fire department apparatus shall be provided.

(d) To minimize trespassing or tampering, the area which includes container appurtenances, pumping equipment, loading and unloading facilities, and cylinder-filling facilities shall be enclosed with at least a 6-foot-high industrial type fence unless otherwise adequately protected. There shall be at least two means of emergency access.

(13) Container-charging plants.

(a) The container-charging room shall be located not less than:

(i) Ten feet from bulk storage containers.

(ii) Twenty-five feet from line of adjoining property which may be built upon.

(b) Tank truck filling station outlets shall be located not less than:

(i) Twenty-five feet from line of adjoining property which may be built upon.

(ii) Ten feet from pumps and compressors if housed in one or more separate buildings.

(c) The pumps or compressors may be located in the container-charging room or building, in a separate building, or outside of buildings. When housed in separate building, such building (a small noncombustible weather cover is not to be construed as a building) shall be located not less than:

(i) Ten feet from bulk storage tanks.

(ii) Twenty-five feet from line of adjoining property which may be built upon.

(iii) Twenty-five feet from sources of ignition.

(d) When a part of the container-charging building is to be used for a boiler room or where open flames or similar sources of ignition exist or are employed, the space to be so occupied shall be separated from container charging room by a partition wall or walls of fire-resistant construction continuous from floor to roof or ceiling. Such separation walls shall be without openings and shall be joined to the floor, other walls, and ceiling or roof in a manner to effect a permanent gas-tight joint.

(e) Electrical equipment and installations shall conform with WAC 296-24-47505 (17) and (18).

(14) Fire protection.

(a) Each bulk plant shall be provided with at least one approved portable fire extinguisher having a minimum rating of 12-B, C.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(b) In industrial installations involving containers of 150,000 gallons aggregate water capacity or more, provision shall be made for an adequate supply of water at the container site for fire protection in the container area, unless other adequate means for fire control are provided. Water hydrants shall be readily accessible and so spaced as to provide water protection for all containers. Sufficient lengths of firehose shall be provided at each hydrant location on a hose cart, or other means provided to facilitate easy movement of the hose in the container area. It is desirable to equip the outlet of each hose line with a combination fog nozzle. A shelter shall be provided to protect the hose and its conveyor from the weather.

(15) Painting. Aboveground containers shall be kept properly painted.

(16) Lighting. Electrical equipment and installations shall conform to WAC 296-24-47505 (17) and (18).

(17) Vaporizers for internal combustion engines. The provisions of WAC 296-24-47511(8) shall apply.

(18) Gas regulating and mixing equipment for internal combustion engines. The provisions of WAC 296-24-47511(9) shall apply.

AMENDATORY SECTION (Amending Order 88-25, filed 11/14/88)

WAC 296-24-47513 Storage of containers awaiting use or resale. (1) Application. This section shall apply to the storage of portable containers not in excess of one thousand pounds water capacity, filled or partially filled, at user loca-

tion but not connected for use, or in storage for resale by dealers or resellers. This section shall not apply to containers stored at charging plants or at plants devoted primarily to the storage and distribution of LP-gas or other petroleum products.

(2) General.

(a) Containers in storage shall be located so as to minimize exposure to excessive temperature rise, physical damage, or tampering by unauthorized persons.

(b) Containers when stored inside shall not be located near exits, stairways, or in areas normally used or intended for the safe exit of people.

(c) Container valves shall be protected while in storage as follows:

(i) By setting into recess of container to prevent the possibility of their being struck if the container is dropped upon a flat surface, or

(ii) By ventilated cap or collar, fastened to container capable of withstanding blow from any direction equivalent to that of a thirty-pound weight dropped four feet. Construction must be such that a blow will not be transmitted to a valve or other connection.

(d) The outlet valves of containers in storage shall be closed.

(e) Empty containers which have been in LP-gas service should preferably be stored in the open. When stored inside, they shall be considered as full containers for the purpose of determining the maximum quantity of LP-gas permitted by this section.

(3) Storage within buildings frequented by the public.

(a) DOT specification containers having a maximum individual water capacity of two and one-half pounds, used with completely self-contained hand torches and similar applications, are permitted to be stored or displayed in a building frequented by the public. The display of such containers shall be limited to a total of twenty-four units of each brand and size. The total quantity on display and in storage shall not exceed two hundred pounds LP-gas.

(b) Storage as provided in subsection (5) of this section shall not be permitted within or attached to such a building.

(4) Storage within buildings not frequented by the public (such as industrial buildings).

(a) The quantity of LP-gas stored shall not exceed three hundred pounds (approximately two thousand five hundred fifty cubic feet in vapor form) except as provided in subsection (5) of this section.

(b) Containers carried as a part of service equipment on highway mobile vehicles are not to be considered in the total storage capacity in (a) of this subsection provided such vehicles are stored in private garages, and are limited to one container per vehicle with an LP-gas capacity of not more than one hundred pounds. All container valves shall be closed.

(5) Storage within special buildings or rooms.

(a) The quantity of LP-gas stored in special buildings or rooms shall not exceed ten thousand pounds.

(b) The walls, floors, and ceilings of container storage rooms that are within or adjacent to other parts of the building shall be constructed of material having at least a two-hour fire resistance rating.

(c) A portion of the exterior walls or roof having an area not less than ten percent of that of the combined area of the enclosing walls and roof shall be of explosion relieving construction.

(d) Each opening from such storage rooms to other parts of the building shall be protected by a one and one-half-hour "(B)" fire door listed by a nationally recognized testing laboratory. Refer to federal regulation 29 CFR 1910.7 for definition of nationally recognized testing laboratory.

(e) Such rooms shall have no open flames for heating or lighting.

(f) Such rooms shall be adequately ventilated both top and bottom to the outside only. The openings from such vents shall be at least five feet away from any other opening into any building.

(g) The floors of such rooms shall not be below ground level. Any space below the floor shall be of solid fill or properly ventilated to the open air.

(h) Such storage rooms shall not be located adjoining the line of property occupied by schools, churches, hospitals, athletic fields or other points of public gathering.

(i) Fixed electrical equipment shall be installed in accordance with WAC 296-24-47505(18).

(6) Storage outside of buildings.

(a) Storage outside of buildings, for containers awaiting use or resale, shall be located in accordance with Table H-33 with respect to:

(i) The nearest important building or group of buildings;

(ii) The line of adjoining property which may be built upon;

(iii) Busy thoroughfares;

(vi) The line of adjoining property occupied by schools, churches, hospitals, athletic fields, or other points of public gathering.

TABLE H-33

Quantity of LP-Gas Stored:	Distance
500 pounds or less _____	0
501 to 2,500 pounds _____	0*
2,501 to 6,000 pounds _____	10 feet
6,001 to 10,000 pounds _____	20 feet
Over 10,000 pounds _____	25 feet

*Container or containers shall be at least ten feet from any building on adjoining property, any sidewalk, or any of the exposures described in (a)(iii) or (iv) of this subsection.

(b) Containers shall be in a suitable enclosure or otherwise protected against tampering.

(7) Fire protection. Storage locations other than supply depots separated and located apart from dealer, reseller, or user establishments shall be provided with at least one approved portable fire extinguisher having a minimum rating of 8-B, C.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

PROPOSED

AMENDATORY SECTION (Amending Order 73-5, filed 5/9/73 and Order 73-4, filed 5/7/73)

WAC 296-24-47517 Liquefied petroleum gas service stations. (1) Application. This section applies to storage containers, and dispensing devices, and pertinent equipment in service stations where LP-gas is stored and is dispensed into fuel tanks of motor vehicles. See WAC 296-24-47511 for requirements covering use of LP-gas as a motor fuel. All requirements of WAC 296-24-47505 apply to this section unless otherwise noted.

(2) Design pressure and classification of storage containers. Storage containers shall be designed and classified in accordance with Table H-34.

(3) Container valves and accessories.

(a) A filling connection on the container shall be fitted with one of the following:

(i) A combination back-pressure check and excess flow valve.

(ii) One double or two single back-pressure valves.

(iii) A positive shutoff valve, in conjunction with either:

(A) An internal back-pressure valve, or

(B) An internal excess flow valve.

In lieu of an excess flow valve, filling connections may be fitted with a quick-closing internal valve, which shall remain closed except during operating periods. The mechanism for such valves may be provided with a secondary control which will cause it to close automatically in case of fire. When a fusible plug is used its melting point shall not exceed 220°F.

TABLE H-34

Container type	For gases with vapor press. not to exceed lb. per sq. in. gage at 100°F. (37.8°C.)	Minimum design pressure of container, lb. per sq. in gage	
		1949 and earlier editions of ASME Code (Par. U-68, U-69)	1949 edition of ASME Code (Par. U-200, U-201); 1950, 1952, 1956, 1959, 1962, 1965, and 1968 (Division I) editions of ASME Code; All editions of API-ASME Code ²
200 ¹	215	200	250

¹Container type may be increased by increments of 25. The minimum design pressure of containers shall be 100% of the container type designation when constructed under 1949 or earlier editions of ASME Code (Par. U-68 and U-69). The minimum design pressure of containers shall be 125% of the container type designation when constructed under: (1) The 1949 ASME Code (Par. U-200 and U-201), (2) 1950, 1952, 1956, 1959, 1962, 1965, and 1968 (Division I) editions of the ASME Code, and (3) all editions of the API-ASME Code.

²Construction of containers under the API-ASME Code is not authorized after July 1, 1961.

(b) A filling pipe inlet terminal not on the container shall be fitted with a positive shutoff valve in conjunction with either:

(i) A back pressure check valve, or

(ii) An excess flow check valve.

(c) All openings in the container except those listed below shall be equipped with approved excess flow check valves:

(i) Filling connections as provided in (3)(a) of this section.

(ii) Safety relief connections as provided in WAC 296-24-47505 (7)(b).

(iii) Liquid-level gaging devices as provided in WAC 296-24-47505 (7)(d) and (19)(d).

(iv) Pressure gage connections as provided in WAC 296-24-47505 (7)(e).

(d) All container inlets and outlets except those listed below shall be labeled to designate whether they connect with vapor or liquid (labels may be on valves):

(i) Safety relief valves.

(ii) Liquid-level gaging devices.

(iii) Pressure gages.

(e) Each storage container shall be provided with a suitable pressure gage.

(4) Safety-relief valves.

(a) All safety-relief devices shall be installed as follows:

(i) On the container and directly connected with the vapor space.

(ii) Safety-relief valves and discharge piping shall be protected against physical damage. The outlet shall be provided with loose-fitting rain caps. There shall be no return bends or restrictions in the discharge piping.

(iii) The discharge from two or more safety relief valves having the same pressure settings may be run into a common discharge header. The cross-sectional area of such header shall be at least equal to the sum of the individual discharges.

(iv) Discharge from any safety relief device shall not terminate in any building nor beneath any building.

(b) Aboveground containers shall be provided with safety relief valves as follows:

(i) The rate of discharge, which may be provided by one or more valves, shall be not less than that specified in WAC 296-24-47505 (10)(b).

(ii) The discharge from safety relief valves shall be vented to the open air unobstructed and vertically upwards in such a manner as to prevent any impingement of escaping gas upon the container; loose-fitting rain caps shall be used. On a container having a water capacity greater than 2,000 gallons, the discharge from the safety relief valves shall be vented away from the container vertically upwards to a point at least 7 feet above the container. Suitable provisions shall be made so that any liquid or condensate that may accumulate inside of the relief valve or its discharge pipe will not render the valve inoperative. If a drain is used, a means shall be provided to protect the container, adjacent containers, piping, or equipment against impingement of flame resulting from ignition of the product escaping from the drain.

(c) Underground containers shall be provided with safety relief valves as follows:

(i) The discharge from safety-relief valves shall be piped vertically upward to a point at least 10 feet above the ground. The discharge lines or pipes shall be adequately supported and protected against physical damage.

PROPOSED

(ii) Where there is a probability of the manhole or housing becoming flooded, the discharge from regulator vent lines should be above the highest probable water level.

(iii) If no liquid is put into a container until after it is buried and covered, the rate of discharge of the relief valves may be reduced to not less than 30 percent of the rate shown in WAC 296-24-47505 (10)(b). If liquid fuel is present during installation of containers, the rate of discharge shall be the same as for aboveground containers. Such containers shall not be uncovered until emptied of liquid fuel.

(5) Capacity of liquid containers. Individual storage containers shall not exceed 30,000 gallons water capacity.

(6) Installation of storage containers.

(a) Each storage container used exclusively in service station operation shall comply with the following table which specifies minimum distances to a building, groups of buildings, and adjoining property lines which may be built upon.

Water capacity per container (gallons)	Minimum distances	
	Aboveground and underground (feet)	Between aboveground containers (feet)
Up to 2,000	25	3
Over 2,000	50	5

Note: The above distances may be reduced to not less than 10 feet for service station buildings of other than wood frame construction.

(i) Readily ignitable material including weeds and long dry grass, shall be removed within 10 feet of containers.

(ii) The minimum separation between LP-gas containers and flammable liquid tanks shall be 20 feet and the minimum separation between a container and the centerline of the dike shall be 10 feet.

(iii) LP-gas containers located near flammable liquid containers shall be protected against the flow or accumulation of flammable liquids by diking, diversion curbs, or grading.

(iv) LP-gas containers shall not be located within diked areas for flammable liquid containers.

(v) Field welding is permitted only on saddle plates or brackets which were applied by the container manufacturer.

(vi) When permanently installed containers are interconnected, provision shall be made to compensate for expansion, contraction, vibration, and settling of containers and interconnecting piping. Where flexible connections are used, they shall be of an approved type and shall be designed for a bursting pressure of not less than five times the vapor pressure of the product at 100°F. The use of nonmetallic hose is prohibited for interconnecting such containers.

(vii) Where high water table or flood conditions may be encountered protection against container flotation shall be provided.

(b) Aboveground containers shall be installed in accordance with this section.

(i) Containers may be installed horizontally or vertically.

(ii) Containers shall be protected by crash rails or guards to prevent physical damage unless they are so protected by virtue of their location. Vehicles shall not be serviced within 10 feet of containers.

(iii) Container foundations shall be of substantial masonry or other noncombustible material. Containers shall be mounted on saddles which shall permit expansion and contraction, and shall provide against the excessive concentration of stresses. Corrosion protection shall be provided for tank-mounting areas. Structural metal container supports shall be protected against fire. This protection is not required on prefabricated storage and pump assemblies, mounted on a common base, with container bottom not more than 24 inches above ground and whose water capacity is 2,000 gallons or less if the piping connected to the storage and pump assembly is sufficiently flexible to minimize the possibility of breakage or leakage in the event of failure of the container supports.

(c) Underground containers shall be installed in accordance with this section.

(i) Containers shall be given a protective coating before being placed under ground. This coating shall be equivalent to hot-dip galvanizing or to two coatings of red lead followed by a heavy coating of coal tar or asphalt. In lowering the container into place, care shall be exercised to minimize abrasion or other damage to the coating. Damage to the coating shall be repaired before back-filling.

(ii) Containers shall be set on a firm foundation (firm earth may be used) and surrounded with earth or sand firmly tamped in place. Backfill should be free of rocks or other abrasive materials.

(iii) A minimum of 2 feet of earth cover shall be provided. Where ground conditions make compliance with this requirement impractical, equivalent protection against physical damage shall be provided. The portion of the container to which manhole and other connections are attached need not be covered. If the location is subjected to vehicular traffic, containers shall be protected by a concrete slab or other cover adequate to prevent the weight of a loaded vehicle imposing concentrated direct loads on the container shell.

(7) Protection of container fittings. Valves, regulators, gages, and other container fittings shall be protected against tampering and physical damage.

(8) Transport truck unloading point.

(a) During unloading, the transport truck shall not be parked on public thoroughfares and shall be at least 5 feet from storage containers and shall be positioned so that shut-off valves are readily accessible.

(b) The filling pipe inlet terminal shall not be located within a building nor within 10 feet of any building or driveway. It shall be protected against physical damage.

(9) Piping, valves, and fittings.

(a) Piping may be underground, above ground, or a combination of both. It shall be well supported and protected against physical damage and corrosion.

(b) Piping laid beneath driveways shall be installed to prevent physical damage by vehicles.

(c) Piping shall be wrought iron or steel (black or galvanized), brass or copper pipe; or seamless copper, brass, or steel tubing and shall be suitable for a minimum pressure of 250 p.s.i.g. Pipe joints may be screwed, flanged, brazed, or

PROPOSED

welded. The use of aluminum alloy piping or tubing is prohibited.

(d) All shutoff valves (liquid or gas) shall be suitable for liquefied petroleum gas service and designed for not less than the maximum pressure to which they may be subjected. Valves which may be subjected to container pressure shall have a rated working pressure of at least 250 p.s.i.g.

(e) All materials used for valve seats, packing, gaskets, diaphragms, etc., shall be resistant to the action of LP-gas.

(f) Fittings shall be steel, malleable iron, or brass having a minimum working pressure of 250 p.s.i.g. Cast iron pipe fittings, such as ells, tees and unions shall not be used.

(g) All piping shall be tested after assembly and proved free from leaks at not less than normal operating pressures.

(h) Provision shall be made for expansion, contraction, jarring, and vibration, and for settling. This may be accomplished by flexible connections.

(10) Pumps and accessories. All pumps and accessory equipment shall be suitable for LP-gas service, and designed for not less than the maximum pressure to which they may be subjected. Accessories shall have a minimum rated working pressure of 250 p.s.i.g. Positive displacement pumps shall be equipped with suitable pressure actuated bypass valves permitting flow from pump discharge to storage container or pump suction.

(11) Dispensing devices.

(a) Meters, vapor separators, valves, and fittings in the dispenser shall be suitable for LP-gas service and shall be designed for a minimum working pressure of 250 p.s.i.g.

(b) Provisions shall be made for venting LP-gas contained in a dispensing device to a safe location.

(c) Pumps used to transfer LP-gas shall be equipped to allow control of the flow and to prevent leakage or accidental discharge. Means shall be provided outside the dispensing device to readily shut off the power in the event of fire or accident.

(d) A manual shutoff valve and an excess flow check valve shall be installed downstream of the pump and ahead of the dispenser inlet.

(i) Dispensing hose shall be resistant to the action of LP-gas in the liquid phase and designed for a minimum bursting pressure of 1,250 p.s.i.g.

(ii) An excess flow check valve or automatic shutoff valve shall be installed at the terminus of the liquid line at the point of attachment of the dispensing hose.

(e) LP-gas dispensing devices shall be located not less than 10 feet from aboveground storage containers greater than 2,000 gallons water capacity. The dispensing devices shall not be less than 20 feet from any building (not including canopies), basement, cellar, pit, or line of adjoining property which may be built upon and not less than 10 feet from sidewalks, streets, or thoroughfares. No drains or blowoff lines shall be directed into or in proximity to the sewer systems used for other purposes.

(i) LP-gas dispensing devices shall be installed on a concrete foundation or as part of a complete storage and dispensing assembly mounted on a common base, and shall be adequately protected from physical damage.

(ii) LP-gas dispensing devices shall not be installed within a building except that they may be located under a

weather shelter or canopy provided this area is not enclosed on more than two sides. If the enclosing sides are adjacent to each other, the area shall be properly ventilated.

(f) The dispensing of LP-gas into the fuel container of a vehicle shall be performed by a competent attendant who shall remain at the LP-gas dispenser during the entire transfer operation.

(12) Additional standards. There shall be no smoking on the driveway of service stations in the dispensing areas or transport truck unloading areas. Conspicuous signs prohibiting smoking shall be posted within sight of the customer being served. Letters on such signs shall be not less than 4 inches high. The motors of all vehicles being fueled shall be shut off during the fueling operations.

(13) Electrical. Electrical equipment and installations shall conform to WAC 296-24-47505 (17) and (18).

(14) Fire protection. Each service station shall be provided with at least one approved portable fire extinguisher having at least an 8-B, C, rating.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-55001 Definitions. ~~((1) Means of egress. A means of egress is a continuous and unobstructed way of exit travel from any point in a building or structure to a public way and consists of three separate and distinct parts: The way of exit access, the exit, and the way of exit discharge. A means of egress comprises the vertical and horizontal ways of travel and shall include intervening room spaces, doorways, hallways, corridors, passageways, balconies, ramps, stairs, enclosures, lobbies, escalators, horizontal exits, courts, and yards.~~

~~(2) Exit access. Exit access is that portion of a means of egress which leads to an entrance to an exit.~~

~~(3) Exit. Exit is that portion of a means of egress which is separated from all other spaces of the building or structure by construction or equipment as required in these standards to provide a protected way of travel to the exit of discharge.~~

~~(4) Exit discharge. Exit discharge is that portion of a means of egress between the termination of an exit and a public way.~~

~~(5) Low hazard contents. Low hazard contents shall be classified as those of such low combustibility that no self-propagating fire therein can occur and that consequently the only probable danger requiring the use of emergency exits will be from panic, fumes, or smoke, or fire from some external source.~~

~~(6) High hazard contents. High hazard contents shall be classified as those which are liable to burn with extreme rapidity or from which poisonous fumes or explosions are to be feared in the event of fire.~~

~~(7) Ordinary hazard contents. Ordinary hazard contents shall be classified as those which are liable to burn with moderate rapidity and to give off a considerable volume of smoke but from which neither poisonous fumes nor explosions are to be feared in case of fire.~~

(8)) (1) Approved. For the purposes of chapter 296-24 WAC, Parts G-1, G-2 and G-3, approved shall mean listed or approved equipment by a nationally recognized testing laboratory. Refer to WAC 296-24-58503 (3)(c)(iv)(A) for definition of listed, and federal regulation 29 CFR 1910.7 for nationally recognized testing laboratory.

((9)) (2) Emergency action plan. A plan for a workplace, or parts thereof, describing what procedures the employer and employees must take to ensure employee safety from fire or other emergencies.

((10)) (3) Emergency escape route. The route that employees are directed to follow in the event they are required to evacuate the workplace or seek a designated refuge area.

AMENDATORY SECTION (Amending Order 73-5, filed 5/9/73 and Order 73-4, filed 5/7/73)

WAC 296-24-68215 Public exhibitions and demonstrations. (1) Installation requirements. Installation and operation of welding, cutting, and related equipment shall be done by, or under the supervision of, a competent operator to insure the personal protection of viewers and demonstrators as well as the protection from fire, of materials in and around the site and the building itself.

(2) Procedures.

(a) Cylinders containing compressed gases for use at the site shall not be charged in excess of one-half their maximum permissible content. (Cylinders of nonliquefied gases and acetylene shall be charged to not more than one-half their maximum permissible charged pressure in p.s.i.g. Cylinders of liquefied gases shall be charged to not more than one-half the maximum permissible capacity in pounds.)

(b) Cylinders located at the site shall be connected for use except that enough additional cylinders may be stored at the site to furnish approximately 1 day's consumption of each gas used. Other cylinders shall be stored, in an approved storage area, preferably outdoors, but this storage area shall not be located near a building exit.

(c) Cylinders in excess of 40 pounds total weight being transported to or from the site shall be carried on a hand or motorized truck.

(d) The site shall be constructed, equipped, and operated in such a manner that the demonstration will be carried out so as to minimize the possibility of injury to viewers.

(e) Sites involving the use of compressed gases shall be located so as not to interfere with the egress of people during an emergency.

(f) The fire department shall be notified in advance of such use of the site.

(g) Each site shall be provided with a portable fire extinguisher of appropriate size and type and with a pail of water.
Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(h) The public and combustible materials at the site shall be protected from flames, sparks, and molten metal.

(i) Hoses shall be located and protected so that they will not be physically damaged.

(j) Cylinder valves shall be closed when equipment is unattended.

(k) Where caps are provided for valve protection, such caps shall be in place except when the cylinders are in service or connected ready for service.

(l) Cylinders shall be located or secured so that they cannot be knocked over.

AMENDATORY SECTION (Amending Order 74-27, filed 5/7/74)

WAC 296-24-75003 Protection for floor openings.

~~((1) Every stairway floor opening shall be guarded by a standard railing constructed in accordance with WAC 296-24-75011. The railing shall be provided on all exposed sides (except at entrance to stairway). For infrequently used stairways where traffic across the opening prevents the use of fixed standard railing (as when located in aisle spaces, etc.); the guard shall consist of a hinged floor opening cover of standard strength and construction and removable standard railings on all exposed sides (except at entrance to stairway).~~

((2)) (1) Every ladderway floor opening or platform shall be guarded by a standard railing with standard toeboard on all exposed sides (except at entrance to opening), with the passage through the railing either provided with a swinging gate or so offset that a person cannot walk directly into the opening.

((3)) (2) Every hatchway and chute floor opening shall be guarded by one of the following:

(a) Hinged floor opening cover of standard strength and construction equipped with standard railings or permanently attached thereto so as to leave only one exposed side. When the opening is not in use, the cover shall be closed or the exposed side shall be guarded at both top and intermediate positions by removable standard railings.

(b) A removable railing with toeboard on not more than two sides of the opening and fixed standard railings with toeboards on all other exposed sides. The removable railings shall be kept in place when the opening is not in use and should preferably be hinged or otherwise mounted so as to be conveniently replaceable.

Where operating conditions necessitate the feeding of material into any hatchway or chute opening, protection shall be provided to prevent a person from falling through the opening.

(c) The area under floor openings shall, where practical, be fenced off. When this is not practical, the areas shall be plainly marked with yellow lines and telltales shall be installed to hang within five and one-half feet of ground or floor level.

(d) Where floor openings are used to drop materials from one level to another, audible warning systems shall be installed and used to indicate to employees on the lower level that material is to be dropped.

((4)) (3) Every skylight opening and hole shall be guarded by a standard skylight screen or a fixed standard railing on all exposed sides.

((5)) (4) Every pit and trapdoor floor opening, infrequently used, shall be guarded by a floor opening cover of standard strength and construction which should be hinged in place. While the cover is not in place, the pit or trap opening

PROPOSED

shall be constantly attended by someone or shall be protected on all exposed sides by removable standard railings.

~~((6))~~ (5) Every manhole floor opening shall be guarded by a standard manhole cover which need not be hinged in place. While the cover is not in place, the manhole opening shall be constantly attended by someone or shall be protected by removable standard railings.

~~((7))~~ Every temporary floor opening shall have standard railings, or shall be constantly attended by someone.

(8) Every floor hole into which persons can accidentally walk shall be guarded by either:

(a) A standard railing with standard toeboard on all exposed sides, or

(b) A floor hole cover of standard strength and construction that should be hinged in place. While the cover is not in place, the floor hole shall be constantly attended by someone or shall be protected by a removable standard railing.

(9) Every floor hole into which persons cannot accidentally walk (on account of fixed machinery, equipment, or walls) shall be protected by a cover that leaves no openings more than 1 inch wide. The cover shall be securely held in place to prevent tools or materials from falling through.

(10) Where doors or gates open directly on a stairway, a platform shall be provided, and the swing of the door shall not reduce the effective width to less than 20 inches.)

AMENDATORY SECTION (Amending Order 76-6, filed 3/1/76)

WAC 296-24-75007 Protection of open-sided ~~((floors, platforms and))~~ runways. ~~((1))~~ Every open-sided floor or platform 4 feet or more above adjacent floor or ground level shall be guarded by a standard railing (or the equivalent as specified in WAC 296-24-75011(3)) on all open sides, except where there is entrance to a ramp, stairway, or fixed ladder. The railing shall be provided with a toeboard wherever, beneath the open sides;

(a) Person can pass;

(b) There is moving machinery, or

(c) There is equipment with which falling materials could create a hazard.) (1) Railings must be provided with a toeboard wherever, beneath the open sides:

(a) Person can pass;

(b) There is moving machinery; or

(c) There is equipment with which falling materials could create a hazard.

(2) Every runway shall be guarded by a standard railing (or the equivalent as specified in WAC 296-24-75011(3)) on all open sides 4 feet or more above floor or ground level. Wherever tools, machine parts, or materials are likely to be used on the runway, a toeboard shall also be provided on each exposed side.

Runways used exclusively for special purposes (such as oiling, shafting, or filling tank cars) may have the railing on one side omitted where operating conditions necessitate such omission, providing the falling hazard is minimized by using a runway of not less than 18 inches wide. Where persons entering upon runways become thereby exposed to machinery, electrical equipment, or other danger not a falling hazard,

additional guarding than is here specified may be essential for protection.

(3) Regardless of height, ~~((open-sided floors, walkways, platforms, or))~~ runways above or adjacent to dangerous equipment, pickling or galvanizing tanks, degreasing units, and similar hazards shall be guarded with a standard railing and toeboard.

~~((4))~~ Tools and loose materials shall not be left on overhead platforms and scaffolds.)

AMENDATORY SECTION (Amending Order 73-5, filed 5/9/73 and Order 73-4, filed 5/7/73)

WAC 296-24-78003 Application of requirements.

This section is intended to prescribe rules and establish minimum requirements for the construction, ~~((care, and use))~~ of the common types of portable wood ladders, in order to insure safety under normal conditions of usage. Other types of special ladders, fruit-picker's ladders, industrial tripod ladders, combination step and extension ladders, stockroom step ladders, aisle-way step ladders, shelf ladders, and library ladders are not specifically covered by this section.

AMENDATORY SECTION (Amending Order 73-5, filed 5/9/73 and Order 73-4, filed 5/7/73)

WAC 296-24-78005 Materials. (1) Requirements applicable to all wood parts.

(a) All wood parts shall be of the species specified in Table D-5, seasoned to a moisture content of not more than 15 percent; smoothly machined and dressed on all sides; free from sharp edges and splinters; sound and free by accepted visual inspection from shake, wane, compression failures, decay, or other irregularities except as hereinafter provided. Low-density wood shall not be used.

(b) Black streaks in western hemlock shall not be considered an irregularity, except that chambers associated with black streaks when present in the part, shall be limited as specified for pitch and bark pockets.

(2) Permissible irregularities in side rails and back rails.

(a) The general slope of grain in side rails of minimum dimension shall not be steeper than 1 in 12, except that for ladders under 10 feet in length and having flat steps for treads, the general slope of grain shall not be steeper than 1 in 10. The slope of grain in areas of local grain deviation shall not be steeper than 1 in 12 or 1 in 10 as specified above when occurring on the edges or in the outer one-fourth of the width of the wide face. Local areas of grain deviation within the center half of the width of the wide face may contain grain slope as steep as 1 in 8. Local deviations of grain associated with otherwise permissible irregularities are permitted.

(b) Knots shall not appear in narrow faces of side rails. Knots, if tight and sound and less than one-half inch in diameter, are permitted on the wide face provided they are at least one-half inch back from either edge and not more frequent than 1 to any 3 feet of ladder length.

(c) Pitch and bark pockets are permitted provided they are not more than one-eighth inch in width, or more than 2 inches in length, or more than one-half inch in depth, and

then only if they are not more frequent than 1 to any 3 feet of ladder length.

(d) Checks are permitted on side rails provided they are not more than 6 inches in length or more than one-half inch in depth.

(e) Occurrences of compression wood in relatively small amounts and positively identified by competent and conscientious visual inspection of side rails are permitted provided no single streak shall exceed one-half inch in width nor shall the aggregate of streaks exceed one-fourth of the face of the side rail. Borderline forms of compression wood not positively identified by competent and conscientious visual inspection are permitted. Ladder parts containing bow or crook which would interfere with the operation of the ladder shall not be used.

(3) Permissible irregularities in flat steps, rungs, and cleats.

(a) The general slope of grain in flat steps of minimum dimension shall not be steeper than 1 in 12, except that for ladders under 10 feet in length the slope of grain shall not be steeper than 1 in 10. The slope of grain in areas of local deviation shall not be steeper than 1 in 12 or 1 in 10 as specified above. For all ladders, cross grain not steeper than 1 in 10 are permitted in lieu of 1 in 12, provided the size is increased to afford at least 15 percent greater calculated strength than for ladders built to minimum dimensions. Local deviations of grain associated with otherwise permissible irregularities are permitted.

(b) The general slope of grain and that in areas of local deviations of grain shall not be steeper than 1 in 15 in rungs and cleats. For all ladders cross grain not steeper than 1 in 12 are permitted in lieu of 1 in 15, provided the size is increased to afford at least 15 percent greater calculated strength for ladders built to minimum dimensions. Local deviations of grain associated with otherwise permissible irregularities are permitted.

(c) Knots over one-eighth inch in diameter shall not appear in rungs. Knots shall not appear in the narrow faces of flat steps and cleats. Knots appearing in the wide faces of flat steps and cleats shall not exceed a diameter of one-fourth inch.

(4) Classification of species of wood. Table D-5 gives a list of native woods, divided into four groups on the basis of mechanical properties considered from the standpoint of use for ladder construction.

(a) All minimum dimensions and specifications set forth in (b)(ii) for side rails and flat steps are based on the species of wood listed in Group 3 in Table D-5 except where otherwise provided. The species of all other groups may be substituted for those of Group 3 when used in sizes that provide at least equivalent strength. (See Table D-5 for suggested methods of size adjustment.)

(b) All minimum dimensions and specifications set forth in the following "factor for increase in" for rungs and cleats are based on the species of wood listed in Group 1 in Table D-5. The cross-sectional dimensions specified for Group 1 species are increased by the factors shown in this subsection (based on the percentages of Table D-5) for the species group of which the cleats are to be made.

FACTOR FOR INCREASE IN

Species group	Each dimension	Width only (thickness unchanged)
1	1.00	1.00
2	1.03	1.05
3	1.11	1.19
4	1.17	1.26

Table D-5

CLASSIFICATION OF VARIOUS SPECIES OF WOOD ACCEPTABLE FOR USE IN LADDER

The species are listed alphabetically within each group. The position of any species within a group therefore bears no relation to its strength or acceptability.

Where ladders are desired for use under conditions favorable to decay, it is recommended that the heartwood of decay-resistant species be used, or that the wood be given a treatment with a wood preservative. The species having the most durable heartwood are marked with an asterisk (*), and these should be preferred where resistance to decay is required.

GROUP 1

The allowable fiber stress in bending for the species listed herein when used for side rails shall not exceed two thousand one hundred fifty pounds per square inch. These species may be substituted for Group 3 woods on the following basis: The dimensions may be not more than ten percent smaller for each cross-section dimension, or the thickness may remain unchanged, in which case the width may not be more than fifteen percent smaller if used edgewise (as in a rail) or twenty-five percent smaller if used flatwise (as in a tread).

<u>White ash</u>	<u><i>Fraxinus americana, pennsylvanica, quadrangulata</i></u>
<u>Beech</u>	<u><i>Fagus grandifolia</i></u>
<u>Birch</u>	<u><i>Betula lenta, alleghaniensis, nigra (2)</i></u>
<u>Rock elm</u>	<u><i>Ulmus thomasii</i></u>
<u>Hickory</u>	<u><i>Carya ovata, laciniosa, tomentosa, glabra</i></u>
<u>Locust*</u>	<u><i>Robinia pseudoacacia, Gleditsia triacanthos</i></u>
<u>Hard maple</u>	<u><i>Acer nigrum, saccharum</i></u>
<u>Red maple</u>	<u><i>Acer rubrum (3)</i></u>

PROPOSED

PROPOSED

Red oak *Quercus velutina, marilandica, kelloggii, falcata var. pagodaefolia, laurifolia, ellipsoidalis, rubra, nuttallii, palustris, coccinea, shumardii, falcata, laevis, phellos*

White oak *Quercus arizonica, douglasii, macrocarpa, lobata, prinus, muehlenbergii, emoryi, gambelii, oblongifolia, virginiana, garryana, lyrata, stellata, michauxii, bicolor, alba*

Pecan *Carya illinoensis, cordiformis, myristicaeformis (4), aquatica (4)*

Persimmon *Diospyros virginiana*

GROUP 2

The allowable fiber stress in bending for the species listed herein when used for side rails shall not exceed two thousand pounds per square inch. These species may be substituted for Group 3 woods on the following basis: The dimensions may be not more than seven and one-half percent smaller for each cross-section dimension, or the thickness may remain unchanged, in which case the width may be not more than eleven percent smaller if used edgewise (as in a rail) or twenty percent smaller if used flatwise (as in a tread).

Douglas fir (coast region) *Pseudotsuga menziesii*
Western larch *Larix occidentalis*
Southern yellow pine *Pinus taeda, palustris, echinata, elliotii, rigida, virginiana*

GROUP 3

The allowable fiber stress in bending for the species listed herein when used for side rails shall not exceed one thousand six hundred pounds per square inch.

Red alder *Alnus rubra, rhombifolia (2)*
Oregon ash *Fraxinus latifolia*
Pumpkin ash *Fraxinus profunda*
Alaska cedar* *Chamaecyparis nootkatensis*
Port Orford cedar* *Chamaecyparis lawsoniana*
Cucumber *Magnolia acuminata*
Cypress* *Taxodium distichum*
Soft elm *Ulmus americana, rubra*
Douglas fir (Rocky Mountain type) *Pseudotsuga menziesii var. glauca*

Noble fir *Abies procera*
Gum *Liquidambar styraciflua*
West coast hemlock *Tsuga heterophylla*
Magnolia *Magnolia grandiflora*
Oregon maple *Acer macrophyllum*
Norway pine *Pinus resinosa*
Poplar *Liriodendron tulipifera*
Redwood* *Sequoia sempervirens*
Eastern spruce *Picea glauca, rubens*
Sitka spruce *Picea sitchensis*
Sycamore *Platanus occidentalis*
Tamarack *Larix laricina*
Tupelo *Nyssa aquatica, sylvatica*

GROUP 4

The allowable fiber stress in bending for the species listed herein when used for side rails shall not exceed one thousand three hundred seventy-five pounds per square inch. These species may be substituted for Group 3 woods on the following basis: The dimensions shall be at least five percent greater for each cross-section dimension, or the thickness may remain unchanged, in which case the width shall be at least seven and one-half percent greater if used edgewise (as in a rail) or fifteen percent greater if used flatwise (as in a tread).

Aspen *Populus tremuloides, grandidentata*
Basswood *Tilia americana, heterophylla (2)*
Buckeye *Aesculus octandra, glabra (2)*
Butternut *Juglanscinerea*
Incense cedar* *Libocedrus decurrens*
Western red cedar* *Thuja plicata*
Cottonwood *Populus balsamifera, deltoides, sargentii, heterophylla*
White fir *Abies concolor, grandis, amabilis, lasiocarpa, magnifica*
Hackberry *Celtis occidentalis, laevigata (2)*
Eastern hemlock *Tsuga canadensis*
Holly *Ilex opaca*
Soft maple *Acer saccharinum*
Lodgepole pine *Pinus contorta*
Idaho white pine *Pinus monticola*
Northern white pine *Pinus strobus*

<u>Ponderosa pine</u>	<u><i>Pinus ponderosa, pinus jeffreyi (Jeffrey pine)</i></u>
<u>Sugar pine</u>	<u><i>Pinus lambertiana</i></u>
<u>Engelmann spruce</u>	<u><i>Picea engelmannii</i></u>

Note 1: The common and scientific names of species used conform to the American Lumber Standards nomenclature and in most cases to U.S. Department of Agriculture Handbook No. 41, Check List of Native and Naturalized Trees of the United States (including Alaska), by Elbert L. Little. These publications can be obtained from the U.S. Government Printing Office, North Capital and "H" Streets Northwest, Washington D.C. 20401.

Note 2: This species is commonly associated with others of the same genus under American Lumber Standards nomenclature, but no strength tests have been made on it at the forest products laboratory.

Note 3: Included under soft maple in American Lumber Standards nomenclature.

Note 4: This species is not included under this common name in American Lumber Standards nomenclature, but strength data are available and it is accordingly included in this classification.

(5) Metal parts. All metal parts shall be made of aluminum, steel, wrought iron, malleable iron, or other material, adequate in strength for the purpose intended, and shall be properly coated and protected so as to be rust resistant.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-78009 ((Care and use of ladders.)) Ladder tests. ((1) Care. To insure safety and serviceability the following precautions on the care of ladders shall be observed:

(a) Ladders shall be maintained in good condition at all times, the joint between the steps and side rails shall be tight, all hardware and fittings securely attached, and the moveable parts shall operate freely without binding or undue play.

(b) Metal bearings of locks, wheels, pulleys, etc., shall be frequently lubricated.

(c) Frayed or badly worn rope shall be replaced.

(d) Safety feet and other auxiliary equipment shall be kept in good condition to insure proper performance.

(e) Ladders should be stored in such a manner as to provide ease of access or inspection, and to prevent danger of accident when withdrawing a ladder for use.

(f) Wood ladders, when not in use, should be stored at a location where they will not be exposed to the elements, but where there is good ventilation. They shall not be stored near radiators, stoves, steam pipes, or other places subjected to excessive heat or dampness.

(g) Ladders stored in a horizontal position should be supported at a sufficient number of points to avoid sagging and permanent set.

(h) Ladders carried on vehicles should be adequately supported to avoid sagging and securely fastened in position to minimize chafing and the effects of road shocks.

(i) Ladders should be kept coated with a suitable protective material. The painting of ladders is satisfactory providing the ladders are carefully inspected prior to painting by com-

petent and experienced inspectors acting for, and responsible to, the purchaser, and providing the ladders are not for resale.

(j) Ladders shall be inspected frequently and those which have developed defects shall be withdrawn from service for repair or destruction and tagged or marked as "dangerous, do not use."

(k) Rungs should be kept free of grease and oil.

(2) Use. The following safety precautions shall be observed in connection with the use of ladders:

(a) Portable rung and cleat ladders shall, where possible, be used at such a pitch that the horizontal distance from the top support to the foot of the ladder is one quarter of the working length of the ladder (the length along the ladder between the foot and the top support). The ladder shall be so placed as to prevent slipping, or it shall be lashed, or held in position. Ladders shall not be used in a horizontal position as platforms, runways, or scaffolds.

(b) Ladders for which dimensions are specified should not be used by more than one person at a time nor with ladder jacks and scaffold planks where use by more than one person is anticipated. In such cases, specially designed ladders with larger dimensions of the parts should be procured.

(c) Portable ladders shall be so placed that the side rails have a secure footing. The top rest for portable rung and cleat ladders shall be reasonably rigid and shall have ample strength to support the applied load.

(d) Ladders shall not be placed in front of doors opening toward the ladder unless the door is blocked open, locked, or guarded.

(e) Ladders shall not be placed on boxes, barrels, or other unstable bases to obtain additional height.

(f) To support the top of the ladder at a window opening, a board should be attached across the back of the ladder, extending across the window and providing firm support against the building walls or window frames.

(g) When ascending or descending, the user should face the ladder.

(h) Ladders with broken or missing steps, rungs, or cleats, broken side rails, or other faulty equipment shall not be used; improvised repairs shall not be made.

(i) Short ladders shall not be spliced together to provide long sections.

(j) Ladders made by fastening cleats across a single rail shall not be used.

(k) Ladders shall not be used as guys, braces, or skids, or for other than their intended purposes.

(l) Tops of the ordinary types of stepladders shall not be used as steps.

(m) On two section extension ladders the minimum overlap for the two sections in use shall be as follows:

Size of ladder (feet):	Overlap (feet)
Up to and including 36	3
Over 36 up to and including 48	4
Over 48 up to and including 60	5

(n) Portable rung ladders with reinforced rails (see WAC 296-24-78007 (3)(b)(iii) and (iv)) shall be used only with the metal reinforcement on the under side. Ladders of this type

PROPOSED

should be used with great care near electrical conductors, since the reinforcing itself is a good conductor.

(o) No ladder should be used to gain access to a roof unless the top of the ladder shall extend at least three feet above the point of support, at eave, gutter, or roof line.

(p) Adjustment of extension ladders should only be made by the user when standing at the base of the ladder, so that the user may observe when the locks are properly engaged. Adjustment of extension ladders from the top of the ladder (or any level over the locking device) is a dangerous practice and should not be attempted. Adjustment should not be made while the user is standing on the ladder.

(q) Middle and top sections of sectional or window cleaner's ladders should not be used for bottom section unless the user equips them with safety shoes.

(r) Extension ladders should always be erected so that the upper section is resting on the bottom section.

(s) The user should equip all portable rung ladders with nonslip bases when there is a hazard of slipping. Nonslip bases are not intended as a substitute for care in safety placing, lashing, or holding a ladder that is being used upon oily metal, concrete, or slippery surfaces.

(t) The bracing on the back legs of step ladders is designed solely for increasing stability and not for climbing.

(u) When service conditions warrant, hooks may be attached at or near the top of portable ladders to give added security.

(v) Stepladders shall not be used as single ladders.

(w) Separate ladders for ascending and descending shall be provided in building construction of more than two stories in height, or where traffic is heavy.

(x) Where one broad ladder is used, a center rail shall be provided, and each side plainly marked "up" and "down."

(y) Ladder rungs shall not be used to support more than one section of plank, and not more than two persons shall work on such section of planking at one and the same time. When two persons are working on the same section of plank, their work should be so arranged that their weight is equally distributed between two ladders as nearly as possible.

(z) When ladders are used of a length sufficient to possess a tendency to spring when weight is applied, they shall be provided with bracing to overcome same. This applies particularly to extension ladders.

(aa) Before climbing ladders, workers shall see that their shoes are free and clean of greasy or slippery substances.

(bb) When working from a stepladder over five feet high a worker shall not stand on a step higher than the third step from the top of the stepladder.

(cc) Ladders shall not be placed or used in elevator shafts or hoistways except where used by workers engaged in work within such shafts or hoistways, and then they shall be protected from objects falling from operations at higher elevations in or adjoining the shaft.

(dd) Workers shall not ascend or descend ladders while carrying tools or materials which will interfere with the free use of both hands.

(ee)) Ladders shall pass the following test:

When tested as a simple beam with a support under each end and the center rung loaded with a two hundred pound load, the ladder must support this load for ten minutes with-

out permanent set and without showing any sign of failure. The maximum deflection shall not be greater than shown in the enclosed table.

Lengths of extended ladder in feet	Distance of supports from ends, in inches	Total deflection, in inches
12	3	2 3/4
16	3	6 3/4
20	3	11 1/2
24	3	16 1/2
28	3	21 1/2
30	3	23 1/2
34	6	26
36	6	29
40	6	37
44	9	41

((ff) When working from a ladder over twenty five feet from the ground or floor, the ladder shall be secured at both top and bottom.

(gg) No type of work shall be performed on a ladder over twenty five feet from the ground or floor that requires the use of both hands to perform the work, unless a safety belt is worn and the safety lanyard is secured to the ladder.

(hh) Work such as sandblasting or spray painting, that requires wearing eye protection, respirators, and handling of pressure equipment, shall be limited to not over thirty feet from the ground or floor while working on a ladder.

TABLE D-5

CLASSIFICATION OF VARIOUS SPECIES OF WOOD ACCEPTABLE FOR USE IN LADDER

The species are listed alphabetically within each group. The position of any species within a group therefore bears no relation to its strength or acceptability.

Where ladders are desired for use under conditions favorable to decay, it is recommended that the heartwood of decay resistant species be used, or that the wood be given a treatment with a wood preservative. The species having the most durable heartwood are marked with an asterisk (*), and these should be preferred where resistance to decay is required.

GROUP 1

The allowable fiber stress in bending for the species listed herein when used for side rails shall not exceed two thousand one hundred fifty pounds per square inch. These species may be substituted for Group 3 woods on the following basis: The dimensions may be not more than ten percent smaller for each cross section dimension, or the thickness may remain unchanged, in which case the width may not be more than fifteen percent smaller if used edgewise (as in a rail) or twenty five percent smaller if used flatwise (as in a tread).

PROPOSED

White ash	<i>Fraxinus americana, pennsylvanica, quadrangulata</i>
Beech	<i>Fagus grandifolia</i>
Birch	<i>Betula lenta, alleghaniensis, nigra (2)</i>
Rock elm	<i>Ulmus thomasii</i>
Hickory	<i>Carya ovata, laciniosa, tomentosa, glabra</i>
Locust*	<i>Robinia pseudoacacia, Gleditsia triacanthos</i>
Hard maple	<i>Acer nigrum, saccharum</i>
Red maple	<i>Acer rubrum (3)</i>
Red oak	<i>Quercus velutina, marilandica, kelloggii, falcata var. pagodaefolia, laurifolia, ellipsoidalis, rubra-nuttallii, palustris, coccinea, shumardii, falcata, laevis, phellos</i>
White oak	<i>Quercus arizonica, douglasii, macrocarpa, lobata, prinus, muehlenbergii, emoryi, gambelii, oblongifolia, virginiana, garryana, lyrata, stellata, michauxii, bicolor, alba</i>
Pecan	<i>Carya illinoensis, cordiformis, myristiciformis (4), aquatica (4)</i>
Persimmon	<i>Diospyros virginiana</i>

GROUP 3

The allowable fiber stress in bending for the species listed herein when used for side rails shall not exceed two thousand pounds per square inch. These species may be substituted for Group 3 woods on the following basis: The dimensions may be not more than seven and one-half percent smaller for each cross-section dimension, or the thickness may remain unchanged, in which case the width may be not more than eleven percent smaller if used edgewise (as in a rail) or twenty percent smaller if used flatwise (as in a tread).

Douglas fir (coast region)	<i>Pseudotsuga menziesii</i>
Western larch	<i>Larix occidentalis</i>
Southern yellow pine	<i>Pinus taeda, palustris, echinata, elliotii, rigida, virginiana</i>

GROUP 3

The allowable fiber stress in bending for the species listed herein when used for side rails shall not exceed one thousand six hundred pounds per square inch.

Red alder	<i>Alnus rubra, rhombifolia (2)</i>
Oregon ash	<i>Fraxinus latifolia</i>
Pumpkin ash	<i>Fraxinus profunda</i>
Alaska cedar*	<i>Chamaecyparis nootkatensis</i>
Port Orford cedar*	<i>Chamaecyparis lawsoniana</i>
Cucumber	<i>Magnolia acuminata</i>
Cypress*	<i>Taxodium distichum</i>
Soft elm	<i>Ulmus americana, rubra</i>
Douglas fir (Rocky Mountain type)	<i>Pseudotsuga menziesii var. glauca</i>
Noble fir	<i>Abies procera</i>
Gum	<i>Liquidambar styraciflua</i>
West coast hemlock	<i>Tsuga heterophylla</i>
Magnolia	<i>Magnolia grandiflora</i>
Oregon maple	<i>Acer macrophyllum</i>
Norway pine	<i>Pinus resinosa</i>
Poplar	<i>Liriodendron tulipifera</i>

Redwood*	<i>Sequoia sempervirens</i>
Eastern spruce	<i>Picea glauca, rubens</i>
Sitka spruce	<i>Picea sitchensis</i>
Sycamore	<i>Platanus occidentalis</i>
Tamarack	<i>Larix laricina</i>
Tupelo	<i>Nyssa aquatica, sylvatica</i>

GROUP 4

The allowable fiber stress in bending for the species listed herein when used for side rails shall not exceed one thousand three hundred seventy-five pounds per square inch. These species may be substituted for Group 3 woods on the following basis: The dimensions shall be at least five percent greater for each cross-section dimension, or the thickness may remain unchanged, in which case the width shall be at least seven and one-half percent greater if used edgewise (as in a rail) or fifteen percent greater if used flatwise (as in a tread).

REPEALER

The following sections of the Washington Administrative Code are repealed:

WAC 296-24-59203 Exemptions.

PROPOSED

WAC 296-24-631	Employee alarm systems.
WAC 296-24-63101	Scope and application.
WAC 296-24-63103	General requirements.
WAC 296-24-63105	Installation and restoration.
WAC 296-24-63107	Maintenance and testing.
WAC 296-24-63109	Manual operation.
WAC 296-24-63199	Appendix A—Employee alarm systems.
WAC 296-24-75009	Stairway railings and guards.

AMENDATORY SECTION (Amending Rules (Part XVI), filed 12/28/62)

WAC 296-36-190 Fire prevention and fire fighting.

(1) **General.** Every building and every flammable structure above ground and all places underground shall be within easy range of fire fighting equipment, which shall at all times be maintained in proper working conditions and ready for use.

(2) **Smoking.** No person shall smoke or carry lighted smoking materials in compressed air. No matches, mechanical or chemical igniters will be permitted in the working chamber except those necessary for welding or flame cutting operations.

(3) **Welding or flame cutting.** While welding or flame cutting is being done in compressed air, a watchman with a fire hose or approved extinguisher shall stand by until such operation is completed. Acetylene shall not be used in compressed air at acetylene pressure exceeding 15 pounds per square inch gage, or 30 pounds per square inch absolute.

(4) **Fire hose.** Fire hose shall be at least 1-1/2 inches in nominal diameter; the water pressure shall at all times be adequate for efficient operation of the type of nozzle used; and the water supply shall be such as to insure an uninterrupted flow. Fire hose when not in use shall be so located or guarded to prevent injury thereto.

Every power house, compressor house and every building housing ventilating equipment shall be provided with at least one hose connection in the water line with the fire hose connected thereto. A fire hose shall be maintained within easy reach of structures of wood over or near shafts.

(5) **Shafts and caissons.** Every shaft and every caisson containing flammable material of any kind, either above or below ground, shall be provided with a water line and a fire hose connected thereto, so arranged that all points of the shaft or caisson are within easy reach of the hose stream.

(6) **Tunnels.** Every tunnel shall be provided with a water line extending into the working chamber and to within 100 feet of the working face. Such lines shall have hose outlets with 100 feet of fire hose properly attached and maintained as follows: One at the working face, one immediately inside of the bulkhead of the working chamber, and one immediately outside such bulkhead. In addition, hose outlets shall be provided at 200-foot intervals throughout the length of the tunnel and 100 feet of fire hose shall be attached to the outlet nearest

to any location where flammable material is being kept or stored or where any flame is being used.

(7) **Fire extinguishers.** In addition to required fire hose protection, on every floor of every building used in connection with compressed air work, there shall be provided at least one extinguisher of adequate size approved for the class of hazard involved, except that extinguishers containing carbon tetrachloride or methyl bromide shall not be used. Extinguishers shall be so located as to be readily available and protected from damage.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

AMENDATORY SECTION (Amending Order 89-03, filed 5/15/89, effective 6/30/89)

WAC 296-45-67545 Refueling operations. (1) Under no circumstances shall the refueling of any type helicopter with either aviation gasoline or Jet B (Turbine) type fuel be permitted while the engines are running.

(2) Helicopters using Jet A (Turbine-Kerosene) type fuel may be refueled with engines running provided the following criteria is met:

(a) No unauthorized persons shall be allowed within fifty feet of the refueling operation or fueling equipment.

(b) A minimum of one thirty-pound fire extinguisher, or a combination of same, good for class A, B and C fires, shall be provided within one hundred feet on the upwind side of the refueling operation.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(c) All fueling personnel shall be thoroughly trained in the refueling operation and in the use of the available fire extinguishing equipment they may be expected to utilize.

(d) There shall be no smoking, open flames, exposed flame heaters, flare pots, or open flame lights within fifty feet of the refueling area or fueling equipment. All entrances to the refueling area shall be posted with "NO SMOKING" signs.

(e) Due to the numerous causes of static electricity, it shall be considered present at all times. Prior to starting refueling operations, the fueling equipment and the helicopter shall be grounded and the fueling nozzle shall be electrically bonded to the helicopter. The use of conductive hose shall not be accepted to accomplish this bonding. All grounding and bonding connections shall be electrically and mechanically firm, to clean unpainted metal parts.

(f) To control spills, fuel shall be pumped either by hand or power. Pouring or gravity flow shall not be permitted. Self-closing nozzles or deadman controls shall be used and shall not be blocked open. Nozzles shall not be dragged along the ground.

(g) In case of a spill, the fueling operation shall be immediately stopped until such time as the person-in-charge determines that it is safe to resume the refueling operation.

(h) When ambient temperatures have been in the one hundred degrees Fahrenheit range for an extended period of time, all refueling of helicopters with the engines running shall be suspended until such time as conditions become suitable to resume refueling with the engines running.

(3) Helicopters with their engines stopped being refueled with aviation gasoline or Jet B (Turbine) type fuel, shall also comply with subsection (2)(a) through (g) of this section.

AMENDATORY SECTION (Amending WSR 99-17-117, filed 8/18/99, effective 12/1/99)

WAC 296-54-521 Motor vehicles. (1) The seats of each vehicle must be securely fastened.

(2) Each school bus type vehicle that will transport nine or more passengers must have a substantial barricade behind the driver. The barricade must extend from the floor to at least a level even with the top of the driver's head.

(3) Adequate provision must be made for safe entrance and exits. Each vehicle must have mounting steps and handholds wherever it is necessary to prevent an employee injury when entering or leaving the vehicle.

(4) When equipment or tools are carried inside the vehicle, the employer must provide and use racks, boxes, holsters or other means to transport tools so that a hazard is not created for any vehicle operator or passenger.

(5) No one may enter or exit any vehicle until the vehicle is completely stopped.

(6) Employees must keep all parts of the body within the vehicle.

(7) Heat and light must be available in the passenger area of the vehicle. Use of stoves in vehicles is prohibited.

(8) Vehicles designed to transport nine or more passengers must have an emergency exit that:

(a) Is at least six and one-half square feet in area, with the smallest dimension being at least 18 inches;

(b) Is placed at the back of the vehicle or near the back on the side opposite the regular entrance; and

(c) Has an unobstructed route to and from the exit.

(9) When no fuel is transported in the crew vehicle, a minimum rated 5/BC dry chemical fire extinguisher must be kept in the passenger compartment. When fuel is transported on the crew vehicle according to subsection (12) of this section, a minimum rated 10/BC dry chemical fire extinguisher must be kept in the passenger compartment. The extinguishing agent must be nontoxic and preferably noncorrosive.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(10) Exhaust systems must be designed and maintained to eliminate the exposure of passengers to toxic agents.

(11) Operating and maintenance instructions must be available in each vehicle. Each vehicle operator and maintenance employee must comply with the operating and maintenance instructions.

(12) Fuel must be transported or stored only in approved safety containers. Enclosed areas where fuels are carried or stored must be vented so that a hazardous concentration of fumes cannot accumulate. All containers or drums must be properly secured to the vehicle while being transported. Commercially built pick-up or flatbed trucks with a maximum seating capacity of six persons may be used to carry fuel in or on the bed of such vehicles, if the fuel is not carried in the crew compartment. Van-type vehicles may be used to carry fuel only when a vapor-proof bulkhead is installed between the passenger compartment and storage compart-

ment. A maximum of forty-two gallons of gasoline may be carried or stored in the compartment and each container must have a maximum capacity seven gallons.

(13) Motor vehicles used regularly to transport employees must be covered against the weather and equipped and operated according to applicable state of Washington motor vehicle laws.

(14) All operators of crew vehicles must be experienced drivers and have a valid operator's license for the class of vehicle being operated.

(15) Dump trucks must only be used in an emergency to transport workers and have adequate safety chains or locking devices that eliminate the possibility of the body of the truck being raised while employees are riding in the truck. "Emergency" means any unforeseen circumstances that call for immediate action when danger to life or danger from fire exists.

(16) An effective means of signaling must be provided for communication between the driver and the passengers being transported when they are in separate compartments.

(17) The passenger load limit of a crew vehicle must not exceed the seating capacity of the vehicle.

AMENDATORY SECTION (Amending WSR 99-17-117, filed 8/18/99, effective 12/1/99)

WAC 296-54-59330 Log unloading, booms, and rafting grounds—Boats and mechanical devices on waters.

(1) Before starting the boat motor, any spilled fuel must be removed and vapors must be exhausted from any area in which they may accumulate.

(2) The bilge area must be kept clean and oil, grease, fuel, or highly combustible materials must not be allowed to accumulate.

(3) Adequate ventilation equipment must be provided and used for the bilge area to prevent the accumulation of toxic or explosive gases or vapors.

(4) Adequate ventilation equipment must be provided and used for the cabin area on enclosed-cabin boats to prevent an accumulation of harmful gases or vapors.

(5) Deck and cabin lighting must be provided and used where necessary to provide safe levels of illumination aboard boats. Boats operated between sunset to sunrise, or in conditions of restricted visibility, must display navigation lights as required by the United States Coast Guard. Searchlights or floodlights must be provided for safe navigation and to illuminate working or boarding areas adjacent to the craft.

(6) On craft used by employees wearing calked shoes, all areas where employees must stand or walk must be made of or be covered with wood or other suitable matting or nonslip material. The covering must be maintained in good condition.

(7) Each boat must:

(a) Be provided with a fire extinguisher; and

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(b) Have a life ring with at least fifty feet of one-fourth inch line attached.

PROPOSED

Note: On log broncs, boomscooters, or other small boomboats where all occupants are required to wear life saving devices and a life ring would present a tripping hazard, the life ring may be omitted.

(8) Along docks, walkways, or other fixed installations on or adjacent to open water more than five feet deep, approved life rings with at least ninety feet of one-fourth inch line attached, must be provided. The life rings must be spaced at intervals not exceeding two hundred feet and must be easily visible and readily accessible.

(a) When employees are assigned work at other casual locations where exposure to drowning exists, at least one approved life ring with at least ninety feet of line attached must be provided in the immediate vicinity of the work assigned.

(b) Lines attached to life rings on fixed installations must be at least ninety feet long, at least one-fourth-inch in diameter, and have a minimum breaking strength of five hundred pounds. Similar lines attached to life rings on boats must be at least fifty feet long.

(c) Life rings must be United States Coast Guard approved thirty-inch size.

(d) Life rings and attached lines must be maintained to retain at least seventy-five percent of their designed buoyancy and strength.

(e) Where work is assigned over water where the vertical drop from an accidental fall would exceed fifty feet, special arrangements must be made with and approved by the department of labor and industries prior to such assignment.

(9) Log broncs, boomscooters, and boomboats must not be loaded with employees or equipment in a way that adversely affects stability or seaworthiness.

(10) Boats must not be operated at excessive speed or handled recklessly.

AMENDATORY SECTION (Amending WSR 00-21-103, filed 10/18/00, effective 2/1/01)

WAC 296-56-60083 Cranes and derricks. (1) Scope.

(a) This section through WAC 296-56-60103 applies to every kind of crane and derrick and to any other type of equipment performing the functions of a crane or derrick except as noted in (b) of this subsection.

(b) This section does not apply to small industrial truck-type cranes, container handling toploaders and sideloaders, chain hoists, and mobile straddle-type cranes incapable of straddling two or more intermodal containers (sixteen feet (4.88 m) in width).

(2) Ratings.

(a) Except for bridge cranes covered by subsection (7) of this section, cranes and derricks having ratings that vary with boom length, radius (outreach) or other variables shall have a durable rating chart visible to the operator, covering the complete range of the manufacturer's (or design) capacity ratings. The rating chart shall include all operating radii (outreach) for all permissible boom lengths and jib lengths as applicable, with and without outriggers, and alternate ratings for optional equipment affecting such ratings. Precautions or warnings specified by the owner or manufacturer shall be included.

(b) The manufacturer's (or design) rated loads for the conditions of use shall not be exceeded.

(c) Designated working loads shall not be increased beyond the manufacturer's ratings or original design limitations unless such increase receives the manufacturer's approval. When the manufacturer's services are not available or where the equipment is of foreign manufacture, engineering design analysis shall be performed or approved by a person accredited for certifying the equipment under WAC 296-56-60093. Cranes shall conform with the manufacturer's specifications or any current ANSI standards that apply. Engineering design analysis shall be performed by a registered professional engineer competent in the field of cranes and derricks. Any structural changes necessitated by the change in rating shall be carried out.

(3) Radius indicator. When the rated load varies with the boom radius, the crane or derrick shall be fitted with a boom angle or radius indicator visible to the operator.

(4) Prohibited usage.

(a) Equipment shall not be used in a manner that exerts sideloading stresses upon the crane or derrick boom.

(b) No crane or derrick having a visible or known defect that affects safe operation shall be used.

(5) Protective devices.

(a) When exposed moving parts such as gears, chains and chain sprockets present a hazard to employees during crane and derrick operations, those parts shall be securely guarded.

(b) Crane hooks shall be latched or otherwise secured to prevent accidental load disengagement.

(c) When hoisting personnel in an approved man basket, the hook shall have a positive safety latch to prevent rollouts.

(6) General.

(a) Operating controls.

(i) Crane and derrick operating controls shall be clearly marked, or a chart indicating their function shall be posted at the operator's position.

(ii) All crane controls shall operate in a uniform manner within a given port.

(iii) Overhead bridge and container gantry crane operating control levers shall be self-centering so that they will automatically move to the "off" position when the operator releases the control.

(b) Booms. Cranes with elevatable booms and without operable automatic limiting devices shall be provided with boom stops if boom elevation can exceed maximum design angles from the horizontal.

(c) Foot pedals. Foot pedals shall have a nonskid surface.

(d) Access. Ladders, stairways, stanchions, grab irons, foot steps or equivalent means shall be provided as necessary to ensure safe access to footwalks, cab platforms, the cab and any portion of the superstructure which employees must reach.

(i) Footwalks shall be of rigid construction, and shall be capable of supporting a load of one hundred pounds (4.79 kPa) per square foot.

(ii) If more than twenty feet (6.1 m) in height, vertical ladders shall comply with WAC 296-56-60209 (4), (5)(a), (5)(b)(iii) and (5)(b)(iv).

(iii) Stairways on cranes shall be equipped with rigid handrails meeting the requirements of WAC 296-56-60123 (5)(a).

(iv) If the top of a ladder or stairway or any position thereof is located where a moving part of a crane, such as a revolving house, could strike an employee ascending or descending the ladder or stairway, a prominent warning sign shall be posted at the foot of the ladder or stairway. A system of communication (such as a buzzer or bell) shall be established and maintained between the foot of the ladder or stairway and the operator's cab.

(e) Operator's station. The cab, controls, and mechanism of the equipment shall be so arranged that the operator has a clear view of the load or signal person, when one is used. Cab glass, when used, shall be safety plate glass or equivalent and good visibility shall be maintained through the glass. Clothing, tools and equipment shall be stored so as not to interfere with access, operation, or the operator's view.

(f) A seat (lap) belt, meeting the requirements of 49 CFR 571.208-210 for a Type 1 seat belt assembly, shall be installed on the operator's seat of high speed container gantry cranes where the seat trolleys.

(g) Counterweights or ballast. Cranes shall be operated only with the specified type and amount of ballast or counterweights. Ballast or counterweight shall be located and secured only as provided in the manufacturer's or design specifications, which shall be available.

(h) Outriggers. Outriggers shall be used according to the manufacturer's specifications or design data, which shall be available. Floats, when used, shall be securely attached to the outriggers. Wood blocks or other support shall be of sufficient size to support the outrigger, free of defects that may affect safety and of sufficient width and length to prevent the crane from shifting or toppling under load.

(i) Exhaust gases. Engine exhaust gases shall be discharged away from the normal position of crane operating personnel.

(j) Electrical equipment shall be so located or enclosed that live parts will not be exposed to accidental contact. Designated persons may work on energized equipment only if necessary during inspection, maintenance, or repair.

(k) Fire extinguisher.

(i) At least one portable fire extinguisher of at least 5-BC rating or equivalent shall be accessible in the cab of the crane or derrick.

(ii) No portable fire extinguisher using carbon tetrachloride or chlorobromomethane extinguishing agents shall be used.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(l) Rope on drums. At least three full turns of rope shall remain on ungrooved drums, and two turns on grooved drums, under all operating conditions. Wire rope shall be secured to drums by clamps, U-bolts, shackles, or equivalent means. Fiber rope fastenings are prohibited.

(m) Assembly or disassembly of boom sections. Mobile crane booms being assembled or disassembled on the ground with or without the support of the boom harness shall be blocked to prevent dropping of the boom or boom sections.

(n) Brakes.

(i) Each independent hoisting unit of a crane shall be equipped with at least one holding brake, applied directly to the motor shaft or gear train.

(ii) Each independent hoisting unit of a crane, except worm geared hoists, the angle of whose worm is such as to prevent the load from accelerating in the lowering direction, shall, in addition to a holding brake, be equipped with a controlled braking means to control lowering speeds.

(iii) Holding brakes for hoist units shall have not less than the following percentage of the rated load hoisting torque at the point where the brake is applied:

(A) One hundred twenty-five percent when used with a controlled braking means.

(B) One hundred percent when used with a mechanically-controlled braking means.

(C) One hundred percent when two holding brakes are provided.

(iv) All power control braking means shall be capable of maintaining safe lowering speeds of rated loads.

(o) Each crane or derrick shall be equipped with sufficient lights to maintain five foot candles in the working area around the load hook. All crane ladders and machinery houses shall be illuminated at a minimum of two candle power.

(p) Light fixtures connected to the boom, gantry legs, or machinery house shall be provided with safety devices which will prevent the light fixture from falling in case of bracket failure.

(q) Electronic devices may be installed to prevent collision subject to approval of the accredited certification agency.

(r) On all rail gantry cranes, truck guards shall extend on the ends of the trucks, close to the top of the rail to prevent worker's feet from being caught between the rail and wheel. This subsection does not apply if rail sweeps are present.

(s) All hydraulic cylinders used to control crane booms or to provide crane stability (outriggers) shall be equipped with a pilot operated check valve or a device which will prevent the boom or outrigger from retracting in case of failure of a component of the hydraulic system.

(t) Gantry cranes shall be provided with automatic rail clamps or other devices to prevent the crane from moving when not being used or when power is off.

(7) Rail-mounted cranes (excluding locomotive types).

(a) For the purposes of this section, rail-mounted cranes include bridge cranes and portal cranes.

(b) Rated load marking. The rated loads of bridge cranes shall be plainly marked on each side of the crane and in the cab. If there is more than one hoisting unit, each hoist shall have its rated load marked on it or on its load block. Marking shall be legible from the ground level.

(c) Wind-indicating devices.

(i) Each rail-mounted bridge and portal crane located outside of an enclosed structure shall be fitted with an operable wind-indicating device.

(ii) The wind indicating device shall provide a visible or audible warning to alert the operator of high wind conditions. That warning shall be transmitted whenever the following circumstances are present:

(A) When wind velocity reaches the warning speed, not exceeding the crane manufacturer's recommendations; and

(B) When wind velocity reaches the shutdown speed, not exceeding the crane manufacturer's recommendations, at which work is to be stopped and the crane secured.

(iii) Instructions. The employer shall post operating instructions for high wind conditions in the operator's cab of each crane. Operators shall be directed to comply with these instructions. The instructions shall include procedures for responding to high wind alerts and for any coordination necessary with other cranes.

(d) Securing of cranes in high winds.

(i) When the wind reaches the crane's warning speed:

(A) Gantry travel shall be stopped; and

(B) The crane shall be readied for shutdown.

(ii) When the wind reaches the crane's shutdown speed:

(A) Any portion of the crane spanning or partially spanning a vessel shall be moved clear of the vessel if safe to do so; and

(B) The crane shall be secured against travel, using all available means of securing.

(e) The employer shall monitor local weather conditions by subscribing to a weather service or using equally effective means.

(f) Stops and bumpers.

(i) The ends of all tracks shall be equipped with stops or bumpers. If a stop engages the tread of the wheel, it shall be of a height not less than the radius of the wheel.

(ii) When more than one crane operates on the same runway or more than one trolley on the same bridge, each crane or trolley shall be equipped with bumpers or equivalent devices at adjacent ends subject to impact.

(g) Employee exposure to crane movement. When employees may be in the vicinity of the tracks, crane trucks shall be equipped with personnel-deflecting guards.

(h) Pedestrian clearance. If the track area is used for employee passage or for work, a minimum clearance of three feet (0.91 m) shall be provided between trucks or the structures of rail-mounted cranes and any other structure or obstruction. When the required clearance is not available on at least one side of the crane's trucks, the area shall not be used and shall be marked and identified.

(i) Warning devices. Rail-mounted cranes shall be equipped with an effective audible and visible travel warning device which shall be used to warn employees who may be in the path of the moving crane.

(j) Communications.

(i) Means of communication shall be provided between the operator's cab and the base of the gantry of all rail-mounted cranes. This requirement may be met by telephone, radio, sound-signaling system or other effective methods, but not solely by hand-signaling.

(ii) All rail-mounted cranes thirty ton and above capacity shall be equipped with a voice hailing device (PA system) from the operator to the ground, audible within one hundred feet.

(k) Limit switch bypass systems shall be secured during all cargo operations. Such bypass systems shall not be used except in an emergency or during noncargo handling operations such as stowing cranes or derricks or performing

repairs. When a situation requiring the use of a bypass system or the readjustment of a limit switch arises, it shall be done only under the direction of a crane mechanic.

(l) Cranes and crane operations—Scope and application. The sections of this chapter, WAC 296-56-60083 through 296-56-60099, apply to cranes, derricks, and crane operations.

(m) Signal persons. A signal person shall be required when a crane operator's visibility is obstructed. When a signal person is required to transmit hand signals, they shall be in such a position that the operator can plainly see the signals.

(n) Signals. All operators and signal persons shall use standard signals as illustrated for longshore crane operations. (See Appendices C and D, at the end of this chapter.)

(o) Signal person for power units. Where power units, such as cranes and winches are utilized and signaling is required, the operator shall be instructed as to who is authorized to give signals. The operator shall take signals only from such authorized person. In case of emergency, any worker shall be authorized to give a stop signal.

(i) No draft shall be hoisted unless the winch or crane operator can clearly see the draft itself or see the signals of any signal person associated with the operation.

(ii) Loads requiring continuous manual guidance while in motion shall be provided with tag lines.

(p) Landing loads. Persons assisting in landing a load shall face the load and use caution to prevent themselves from getting in a position where they may be caught between the load and a fixed object.

(8) Stabilizing of locomotive cranes. Loads may be hoisted by locomotive cranes only if outriggers are in place, unless means are taken to prevent the load being carried by the truck springs of the crane.

(9) Operations.

(a) Use of cranes together. When two or more cranes hoist a load in unison, a designated person shall direct the operation and instruct personnel in positioning, rigging of the load and movements to be made.

(b) Guarding of swing radius. Accessible areas within the swing radius of the body of a revolving crane shall be physically guarded during operations to prevent an employee from being caught between the body of the crane and any fixed structure or between parts of the crane.

(c) Securing mobile crane components in transit. The crane's superstructure and boom shall be secured against rotation and carried in line with the direction of travel except when negotiating turns with an operator in the cab or when the boom is supported on a dolly. The empty hook or other attachment shall be secured.

(d) Unattended cranes. The following steps shall be taken before leaving a crane unattended between work periods:

(i) Suspended loads, such as those hoisted by lifting magnets or clamshell buckets, shall be landed unless the storage position or maximum hoisting of the suspended device will provide equivalent safety;

(ii) Clutches shall be disengaged;

(iii) The power supply shall be shut off;

(iv) The crane shall be secured against accidental travel; and

(v) The boom shall be lowered or secured against movement.

(e) Operating near electric power lines.

(i) Clearance. Unless electrical distribution and transmission lines are deenergized and visibly grounded at point of work, or unless insulating barriers not a part of or an attachment to the crane have been erected to prevent physical contact with lines, cranes may be operated near power lines only in accordance with following:

(A) For lines rated 50 kV or below, minimum clearance between the lines and any part of the crane or load shall be ten feet (3.05 m);

(B) For lines rated over 50 kV, minimum clearance between the lines and any part of the crane or load shall be either 10 feet (3.05 m) plus 0.4 inch (10.16 mm) for each 1 kV over 50 kV, or twice the length of the line insulator, but never less than ten feet; and

(C) In transit with no load and boom lowered, the clearance shall be a minimum of four feet (1.22 m).

(ii) Boom guards. Cage-type boom guards, insulating links or proximity warning devices may be used on cranes, but they shall not be used in place of the clearances required by subsection (9)(e)(i) of this section.

(iii) Determination of energized lines. Any overhead line shall be presumed to be energized until the owner of the line indicates that it is not energized.

(10) Protection for employees being hoisted.

(a) No employee shall be hoisted by the load hoisting apparatus of a crane or derrick except:

(i) On intermodal container spreaders, equipped in accordance with this subsection; or

(ii) In a boatswain's chair or other device rigged to prevent it from accidental disengagement from the hook or supporting member; or

(iii) On a platform meeting the following requirements:

(A) Enclosed by a railing or other means providing protection equivalent to that described in WAC 296-56-60123 (3). If equipped with open railings, the platform shall be fitted with toe boards;

(B) Having a safety factor of four based on ultimate strength;

(C) Bearing a plate or permanent marking indicating maximum load rating, which shall not be exceeded, and the weight of the platform itself;

(D) Equipped with a device to prevent access doors, when used, from opening accidentally;

(E) Equipped with overhead protection for employees on the platform if they are exposed to falling objects or overhead hazards;

(F) Secured to the load line by means other than wedge and socket attachments, unless the free (bitter) end of the line is secured back to itself by a clamp placed as close above the wedge as possible.

(b) Except in an emergency, the hoisting mechanism of all overhead and container gantry cranes used to hoist personnel shall operate in power up and power down, with automatic brake application when not hoisting or lowering.

(c) Variable radius booms of a crane or derrick used to hoist personnel shall be so constructed or secured as to prevent accidental boom movement.

(d) Platforms or devices used to hoist employees shall be inspected for defects before each day's use and shall be removed from service if defective.

(e) Employees being hoisted shall remain in continuous sight of and communication with the operator or signal person.

(f) Operators shall remain at the controls when employees are hoisted.

(g) Cranes shall not travel while employees are hoisted, except in emergency or in normal tier to tier transfer of employees during container operations.

(h) When intermodal container spreaders are used to transfer employees to or from the tops of containers, the spreaders shall be equipped with a personnel platform equipped with fixed railings, provided that the railings have one or more openings for access. The openings shall be fitted with a means of closure, such as chains with hooks. Existing railings shall be at least thirty-six inches (0.91 m) in height. New railings installed after October 3, 1983 shall be forty-two inches (1.07 m), plus or minus three inches (7.62 cm), in height. The provisions of (a)(iii)(C), (D), and (F) of this subsection also apply to personnel platforms when container spreaders are used.

(i) Positive safety latch-type hooks or moused hooks shall be used.

(j) Employees shall not be hoisted on intermodal container spreaders while a load is engaged.

Additional requirements are located in WAC 296-24-23533.

(11) Routine inspection.

(a) Designated persons shall visually inspect each crane and derrick on each day of use for defects in functional operating components and shall report any defect found to the employer. The employer shall inform the operator of the findings.

(b) A designated person shall thoroughly inspect all functional components and accessible structural features of each crane or device at monthly intervals.

(c) Any defects found during such inspections which may create a safety hazard shall be corrected before further use. Repairs shall be performed only by designated persons.

(d) A record of monthly inspections shall be maintained for six months in or on the crane or derrick or at the terminal.

AMENDATORY SECTION (Amending Order 86-02, filed 1/17/86)

WAC 296-56-60171 General requirements. (1) Adequate lighting shall be provided at each landing and in the shaftway.

(2) A sign bearing the following information shall be conspicuously posted within the car:

(a) Maximum capacity one person;

(b) Total load limit in pounds;

(c) For authorized personnel use only.

(3) A fire extinguisher in proper working condition shall be available in the car.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

PROPOSED

AMENDATORY SECTION (Amending Order 86-02, filed 1/17/86)

WAC 296-56-60207 General requirements. (1) No person other than an employee or duly authorized person shall ride or be permitted to ride in the car.

(2) Escape ladders shall be installed extending the full length of the hoistway and shall be located in a position so that, in an emergency, a person can safely transfer from the car platform to the ladder. An "IMPAIRED CLEARANCE" sign shall be posted at the bottom of a ladder when the face of the ladder is less than thirty inches from any structure.

(3) An automatic safety dog or device which will prevent the car from leaving the landing until manually released by the operator shall be installed at the bottom landing.

(4) A fire extinguisher in proper working condition shall be available in the car.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

AMENDATORY SECTION (Amending Order 89-03, filed 5/15/89, effective 6/30/89)

WAC 296-62-05209 Access to records. (1) General.

(a) Whenever an employee or designated representative requests access to a record, the employer shall assure that access is provided in a reasonable time, place, and manner. If the employer cannot reasonably provide access to the record within fifteen working days, the employer shall within fifteen working days apprise the employee or designated representative requesting the record of the reason for the delay and the earliest date when the record can be made available.

(b) The employer may require of the requester only such information as should be readily known to the requester and which may be necessary to locate or identify the records being requested (e.g., dates and locations where the employee worked during the time period in question).

(c) Whenever an employee or designated representative requests a copy of a record, the employer shall assure that either:

(i) A copy of the record is provided without cost to the employee or representative;

(ii) The necessary mechanical copying facilities (e.g., photocopying) are made available without cost to the employee or representative for copying the record;

(iii) The record is loaned to the employee or representative for a reasonable time to enable a copy to be made; or

(iv) In the case of an original x-ray, the employer may restrict access to on-site examination or make other suitable arrangements for the temporary loan of the x-ray.

(d) Whenever a record has been previously provided without cost to an employee or designated representative, the employer may charge reasonable, nondiscriminatory administrative costs (i.e., search and copying expenses but not including overhead expenses) for a request by the employee or designated representative for additional copies of the record, except that:

(i) An employer shall not charge for an initial request for a copy of new information that has been added to a record which was previously provided; and

(ii) An employer shall not charge for an initial request by a recognized or certified collective bargaining agent for a copy of an employee exposure record or an analysis using exposure or medical records.

(e) Nothing in this section is intended to preclude employees and collective bargaining agents from collectively bargaining to obtain access to information in addition to that available under this section.

(2) Employee and designated representative access.

(a) Employee exposure records. Except as limited by WAC ((296-62-05211)) 296-62-053, each employer shall, upon request, assure the access of each employee and designated representative to employee exposure records relevant to the employee. For the purpose of this section, an exposure record relevant to the employee consists of:

(i) A record which measures or monitors the amount of a toxic substance or harmful physical agent to which the employee is or has been exposed;

(ii) In the absence of such directly relevant records, such records of other employees with past or present job duties or working conditions related to or similar to those of the employee to the extent necessary to reasonably indicate the amount and nature of the toxic substances or harmful physical agents to which the employee is or has been subjected; and

(iii) Exposure records to the extent necessary to reasonably indicate the amount and nature of the toxic substances or harmful physical agents at workplaces or under working conditions to which the employee is being assigned or transferred.

(iv) Requests by designated representatives for unconsented access to employee exposure records shall be in writing and shall specify with reasonable particularity:

(A) The records requested to be disclosed; and

(B) The occupational health need for gaining access to these records.

(b) Employee medical records.

(i) Each employer shall, upon request, assure the access of each employee to employee medical records of which the employee is the subject, except as provided in (b)(iv) of this subsection.

(ii) Each employer shall, upon request, assure the access of each designated representative to the employee medical records of any employee who has given the designated representative specific written consent. Appendix A to this section contains a sample form which may be used to establish specific written consent for access to employee medical records.

(iii) Whenever access to employee medical records is requested, a physician representing the employer may recommend that the employee or designated representative:

(A) Consult with the physician for the purposes of reviewing and discussing the records requested;

(B) Accept a summary of material facts and opinions in lieu of the records requested; or

(C) Accept release of the requested records only to a physician or other designated representative.

(iv) Whenever an employee requests access to his or her employee medical records, and a physician representing the employer believes that direct employee access to information contained in the records regarding a specific diagnosis of a

PROPOSED

terminal illness or a psychiatric condition could be detrimental to the employee's health, the employer may inform the employee that access will only be provided to a designated representative of the employee having specific written consent, and deny the employee's request for direct access to this information only. Where a designated representative with specific written consent requests access to information so withheld, the employer shall assure the access of the designated representative to this information, even when it is known that the designated representative will give the information to the employee.

(v) A physician, nurse, or other responsible health care personnel maintaining employee medical records may delete from requested medical records the identity of a family member, personal friend, or fellow employee who has provided confidential information concerning an employee's health status.

(c) Analyses using exposure or medical records.

(i) Each employer shall, upon request, assure the access of each employee and designated representative to each analysis using exposure or medical records concerning the employee's working conditions or workplace.

(ii) Whenever access is requested to an analysis which reports the contents of employee medical records by either direct identifier (name, address, social security number, payroll number, etc.) or by information which could reasonably be used under the circumstances indirectly to identify specific employees (exact age, height, weight, race, sex, date of initial employment, job title, etc.) the employer shall assure that personal identifiers are removed before access is provided. If the employer can demonstrate that removal of personally identifiable portions of the analysis need not be provided.

(3) Department access.

(a) Each employer shall upon request, and without derogation of any rights under the Constitution or the Washington Industrial Safety and Health Act, that the employer chooses to exercise, assure the prompt access of representatives of the director of the department of labor and industries to employee exposure and medical records and to analyses using exposure or medical records. Rules of agency practice and procedures governing WISHA access to employee medical records are contained in this chapter.

(b) Whenever the department seeks access to personally identifiable employee medical information by presenting to the employer a written access order, the employer shall prominently post a copy of the written access order and its accompanying cover letter for at least fifteen working days.

AMENDATORY SECTION (Amending Order 92-15, filed 2/3/93, effective 3/15/93)

WAC 296-62-07619 Hygiene facilities and practices.

(1) Change rooms.

(a) The employer shall provide clean change rooms for employees, who must wear protective clothing, or who must use protective equipment because of their exposure to MDA.

(b) Change rooms must be equipped with separate storage for protective clothing and equipment and for street clothes which prevents MDA contamination of street clothes.

(2) Showers.

(a) The employer shall ensure that employees, who work in areas where there is the potential for exposure resulting from airborne MDA (e.g., particulates or vapors) above the action level, shower at the end of the work shift.

(i) Shower facilities required by this section shall comply with WAC ((296-24-12009(3))) 296-24-12010.

(ii) The employer shall ensure that employees who are required to shower pursuant to the provisions contained herein do not leave the workplace wearing any protective clothing or equipment worn during the work shift.

(b) Where dermal exposure to MDA occurs, the employer shall ensure that materials spilled or deposited on the skin are removed as soon as possible by methods which do not facilitate the dermal absorption of MDA.

(3) Lunch facilities.

(a) Availability and construction.

(i) Whenever food or beverages are consumed at the worksite and employees are exposed to MDA at or above the PEL or are subject to dermal exposure to MDA the employer shall provide readily accessible lunch areas.

(ii) Lunch areas located within the workplace and in areas where there is the potential for airborne exposure to MDA at or above the PEL shall have a positive pressure, temperature controlled, filtered air supply.

(iii) Lunch areas may not be located in areas within the workplace where the potential for dermal exposure to MDA exists.

(b) The employer shall ensure that employees who have been subjected to dermal exposure to MDA or who have been exposed to MDA above the PEL wash their hands and faces with soap and water prior to eating, drinking, smoking, or applying cosmetics.

(c) The employer shall ensure that employees exposed to MDA do not enter lunch facilities with MDA-contaminated protective work clothing or equipment.

AMENDATORY SECTION (Amending WSR 97-01-079, filed 12/17/96, effective 3/1/97)

WAC 296-62-07719 Hygiene facilities and practices.

(1) Change rooms.

(a) The employer shall provide clean change rooms for employees required to work in regulated areas or required by WAC 296-62-07717(1) to wear protective clothing.

Exception: In lieu of the change area requirement specified in this subsection, the employer may permit employees in Class III and Class IV asbestos work, to clean their protective clothing with a portable HEPA-equipped vacuum before such employees leave the area where maintenance was performed.

(b) The employer shall ensure that change rooms are in accordance with WAC 296-24-120, and are equipped with two separate lockers or storage facilities, so separated as to prevent contamination of the employee's street clothes from his/her protective work clothing and equipment.

(2) Showers.

PROPOSED

(a) The employer shall ensure that employees who work in negative pressure enclosures required by WAC 296-62-07712, or who work in areas where their airborne exposure is above the permissible exposure limits prescribed in WAC 296-62-07705, shower at the end of the work shift.

(b) The employer shall provide shower facilities which comply with WAC ((~~296-24-12009(3)~~) 296-24-12010).

(c) The employer shall ensure that employees who are required to shower pursuant to (a) of this subsection do not leave the workplace wearing any clothing or equipment worn during the work shift.

(3) Special requirements in addition to the other provisions of WAC 296-62-07719 for construction work defined in WAC 296-155-012 and for all shipyard work defined in WAC 296-304-010.

(a) Requirements for employees performing Class I asbestos jobs involving over 25 linear or 10 square feet of TSI or surfacing ACM and PACM.

(i) Decontamination areas: The employer shall establish a decontamination area that is adjacent and connected to the regulated area for the decontamination of such employees. The decontamination area shall consist of an equipment room, shower area, and clean room in series. The employer shall ensure that employees enter and exit the regulated area through the decontamination area.

(A) Equipment room. The equipment room shall be supplied with impermeable, labeled bags and containers for the containment and disposal of contaminated protective equipment.

(B) Shower area. Shower facilities shall be provided which comply with WAC ((~~296-24-12009(3)~~) 296-24-12010), unless the employer can demonstrate that they are not feasible. The showers shall be adjacent both to the equipment room and the clean room, unless the employer can demonstrate that this location is not feasible. Where the employer can demonstrate that it is not feasible to locate the shower between the equipment room and the clean room, or where the work is performed outdoors, the employers shall ensure that employees:

(I) Remove asbestos contamination from their worksuits in the equipment room using a HEPA vacuum before proceeding to a shower that is not adjacent to the work area; or

(II) Remove their contaminated worksuits in the equipment room, then don clean worksuits, and proceed to a shower that is not adjacent to the work area.

(C) Clean change room. The clean room shall be equipped with a locker or appropriate storage container for each employee's use.

(ii) Decontamination area entry procedures. The employer shall ensure that employees:

(A) Enter the decontamination area through the clean room;

(B) Remove and deposit street clothing within a locker provided for their use; and

(C) Put on protective clothing and respiratory protection before leaving the clean room.

(D) Before entering the regulated area, the employer shall ensure that employees pass through the equipment room.

(iii) Decontamination area exit procedures. The employer shall ensure that:

(A) Before leaving the regulated area, employees shall remove all gross contamination and debris from their protective clothing;

(B) Employees shall remove their protective clothing in the equipment room and deposit the clothing in labeled impermeable bags or containers;

(C) Employees shall not remove their respirators in the equipment room;

(D) Employees shall shower prior to entering the clean room. When taking a shower, employees shall be fully wetted, including the face and hair, prior to removing the respirators;

(E) After showering, employees shall enter the clean room before changing into street clothes.

(b) Requirements for Class I work involving less than 25 linear or 10 square feet of TSI or surfacing ACM and PACM, and for Class II and Class III asbestos work operations where exposures exceed a PEL or where there is no negative exposure assessment produced before the operation.

(i) The employer shall establish an equipment room or area that is adjacent to the regulated area for the decontamination of employees and their equipment which is contaminated with asbestos which shall consist of an area covered by a impermeable drop cloth on the floor or horizontal working surface.

(ii) The area must be of sufficient size as to accommodate cleaning of equipment and removing personal protective equipment without spreading contamination beyond the area (as determined by visible accumulations).

(iii) Work clothing must be cleaned with a HEPA vacuum before it is removed.

(iv) All equipment and surfaces of containers filled with ACM must be cleaned prior to removing them from the equipment room or area.

(v) The employer shall ensure that employees enter and exit the regulated area through the equipment room or area.

(c) Requirements for Class IV work. Employers shall ensure that employees performing Class IV work within a regulated area comply with hygiene practice required of employees performing work which has a higher classification within that regulated area. Otherwise employers of employees cleaning up debris and material which is TSI or surfacing ACM or identified as PACM shall provide decontamination facilities for such employees which are required by WAC 296-62-07719 (3)(b).

(d) Decontamination area for personnel shall not be used for the transportation of asbestos debris.

(e) Waste load-out procedure. The waste load-out area as required by WAC 296-62-07723 shall be used as an area for final preparation and external decontamination of waste containers, as a short term storage area for bagged waste, and as a port for transporting waste. The employer shall ensure waste containers be free of all gross contaminated material before removal from the negative-pressure enclosure. Gross contamination shall be wiped, scraped off, or washed off containers before they are placed into a two chamber air lock which is adjacent to the negative-pressure enclosure. In the first chamber, the exterior of the waste container shall be

decontaminated or placed within a second waste container, and then it shall be moved into the second chamber of the air lock for temporary storage or transferred outside of the regulated area. The second waste container shall not be reused unless thoroughly decontaminated.

(4) Lunchrooms.

(a) The employer shall provide lunchroom facilities for employees who work in areas where their airborne exposure is above the time weighted average and/or excursion limit.

(b) The employer shall ensure that lunchroom facilities have a positive pressure, filtered air supply, and are readily accessible to employees.

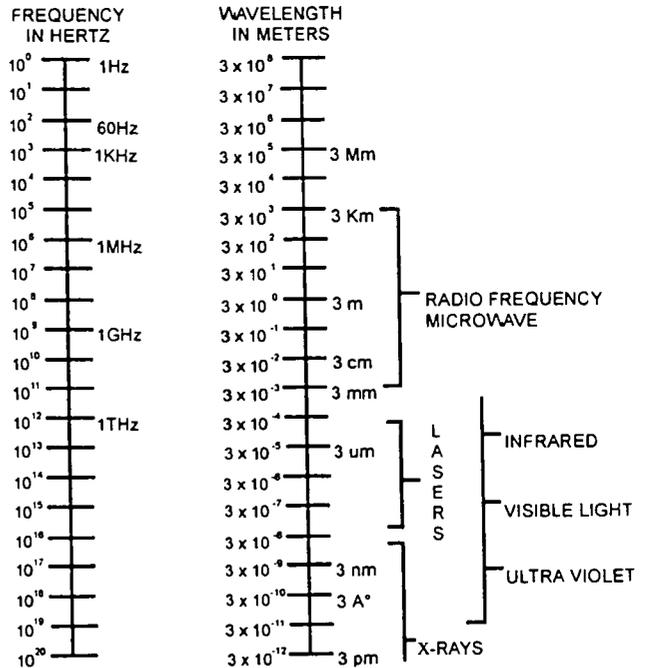

(c) The employer shall ensure that employees who work in areas where their airborne exposure is above the time weighted average and/or excursion limit, wash their hands and faces prior to eating, drinking, or smoking.

(d) The employer shall ensure that employees do not enter lunchroom facilities with protective work clothing or equipment unless surface asbestos fibers have been removed from the clothing or equipment by vacuuming or other method that removes dust without causing the asbestos to become airborne.

(5) Smoking in work areas. The employer shall ensure that employees do not smoke in work areas where they are occupationally exposed to asbestos because of activities in that work area.

ELECTROMAGNETIC SPECTRUM

Figure 1

PROPOSED

AMENDATORY SECTION (Amending Order 84-24, filed 12/11/84)

WAC 296-62-09001 Definitions. (1) "Physical agents" shall mean, but are not limited to: Illumination, ionizing radiation, nonionizing radiation, pressure, vibration, temperature and humidity, and noise.

(2) ~~("Illumination" means radiant energy evaluated according to its capacity to produce visual sensation.~~

(3) "Nonionizing radiation" as related to industrial sources, means electromagnetic radiation within the spectral range of approximately 200 nanometers to 3 kilometers including ultraviolet, visible, infrared and radiofrequency/microwave radiation. The electromagnetic spectrum is shown graphically in Figure 1 below.

~~((4))~~ (3) Pressure is a barometric force. Positive pressure would be that above 14.7 lbs. per square inch absolute and negative pressure would be that below 14.7 lbs. per square inch absolute. 14.7 lbs. per square inch equals 760 mm. mercury.

~~((5))~~ (4) "Vibration" means rapid movement to and fro or oscillating movement.

~~((6))~~ (5) "Noise" means unwanted sound or loud discordant or disagreeable sound or sounds.

~~((7))~~ (6) "Temperature" means the degree of hotness or coldness measured by use of a thermometer.

~~((8))~~ (7) "Radiant heat" means infrared radiation emitted from hot surfaces.

~~((9))~~ (8) "Relative humidity" means the percent of moisture in the air compared to the maximum amount of moisture the air could contain at the same temperature.

AMENDATORY SECTION (Amending WSR 99-07-097, filed 3/23/99, effective 6/23/99)

WAC 296-62-31335 Showers and change rooms. When hazardous waste clean-up or removal operations commence on a site and the duration of the work will require six months or greater time to complete, the employer must provide showers and change rooms for all employees exposed to hazardous substances and health hazards involved in hazardous waste clean-up or removal operations.

(1) Showers must be provided and must meet the requirements of WAC ~~((296-24-12009(3)))~~ 296-24-12010.

(2) Change rooms must be provided and must meet the requirements of WAC 296-24-12011. Change rooms must consist of two separate change areas separated by the shower area required in (1) of this subsection. One change area, with an exit leading off the worksite, must provide employees with a clean area where they can remove, store, and put on street clothing. The second area, with an exit to the worksite, must provide employees with an area where they can put on, remove and store work clothing and personal protective equipment.

(3) Showers and change rooms must be located in areas where exposures are below the permissible exposure limits and published exposure levels. If this cannot be accomplished, then a ventilation system must be provided that will supply air that is below the permissible exposure limits and published exposure levels.

(4) Employers must assure that employees shower at the end of their work shift and when leaving the hazardous waste site.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-62-40025 Appendix A—National Research Council recommendations concerning chemical hygiene in laboratories (nonmandatory). (1) Table of contents.

- (a) General principles.
 - (i) Minimize all chemical exposures.
 - (ii) Avoid underestimation of risk.
 - (iii) Provide adequate ventilation.
 - (iv) Institute a chemical hygiene program.
 - (v) Observe the PELs and TLVs.
- (b) Responsibilities.
 - (i) Chief executive officer.
 - (ii) Supervisor of administrative unit.
 - (iii) Chemical hygiene officer.
 - (iv) Laboratory supervisor.
 - (v) Project director.
 - (vi) Laboratory worker.
- (c) The laboratory facility.
 - (i) Design.
 - (ii) Maintenance.
 - (iii) Usage.
 - (iv) Ventilation.
- (d) Components of the chemical hygiene plan.
 - (i) Basic rules and procedures.
 - (ii) Chemical procurement, distribution, and storage.
 - (iii) Environmental monitoring.
 - (iv) Housekeeping, maintenance, and inspections.
 - (v) Medical program.
 - (vi) Personal protective apparel and equipment.
 - (vii) Records.
 - (viii) Signs and labels.
 - (ix) Spills and accidents.
 - (x) Training and information.
 - (xi) Waste disposal.
- (e) General procedures for working with chemicals.
 - (i) General rules for all laboratory work with chemicals.

- (ii) Allergens and embryotoxins.
- (iii) Chemicals of moderate chronic or high acute toxicity.
- (iv) Chemicals of high chronic toxicity.
- (v) Animal work with chemicals of high chronic toxicity.
- (f) Safety recommendations.
- (g) Material safety data sheets.
- (2) Foreword.

(a) As guidance for each employer's development of an appropriate laboratory chemical hygiene plan, the following nonmandatory recommendations are provided. They were extracted from "Prudent Practices for Handling Hazardous Chemicals in Laboratories" (referred to below as "Prudent Practices"), which was published in 1981 by the National Research Council and is available from the National Academy Press, 2101 Constitution Ave., N.W., Washington DC 20418.

(b) "Prudent practices" is cited because of its wide distribution and acceptance and because of its preparation by members of the laboratory community through the sponsorship of the National Research Council. However, none of the recommendations given here will modify any requirements of the laboratory standard. This appendix merely presents pertinent recommendations from "prudent practices," organized into a form convenient for quick reference during operation of a laboratory facility and during development and application of a chemical hygiene plan. Users of this appendix should consult "prudent practices" for a more extended presentation and justification for each recommendation.

(c) "Prudent practices" deals with both safety and chemical hazards while the laboratory standard is concerned primarily with chemical hazards. Therefore, only those recommendations directed primarily toward control of toxic exposures are cited in this appendix, with the term "chemical hygiene" being substituted for the word "safety." However, since conditions producing or threatening physical injury often pose toxic risks as well, page references concerning major categories of safety hazards in the laboratory are given in section F.

(d) The recommendations from "prudent practices" have been paraphrased, combined, or otherwise reorganized, and headings have been added. However, their sense has not been changed.

(e) Corresponding sections of the standard and this appendix.

(f) The following table is given for the convenience of those who are developing a chemical hygiene plan which will satisfy the requirements of WAC 296-62-40009. It indicates those sections of this appendix which are most pertinent to each of the sections of WAC 296-62-40009 and related sections.

Subsection and Topic in Laboratory Standard	Relevant Appendix Section
(3)(a) Standard operating procedure for handling toxic chemicals.	(c)(d)(e)
(3)(b) Criteria to be used for implementation of measures to reduce exposures.	(d)
(3)(c) Fume hood performance.	(c)(iv)(B)
(3)(d) Employee information and training (including emergency procedures).	(d)(x), (d)(ix)
(3)(e) Requirements for prior approval of laboratory activities.	(e)(ii)(B), (e)(v)(B)
(3)(f) Medical consultation and medical examinations.	(d)(v), (e)(v)(G)
(3)(g) Chemical hygiene responsibilities.	(b)
(3)(h) Special precautions for work with particularly hazardous substances.	(e)(ii)(iii)(v)

(3) In this appendix, those recommendations directed primarily at administrators and supervisors are given in sections (a) through (d). Those recommendations of primary concern to employees who are actually handling laboratory chemicals are given in section E. (Reference to page numbers in "prudent practices" are given in parentheses.)

(a) General principles for work with laboratory chemicals in addition to the more detailed recommendations listed below in sections (b) through (e), "prudent practices" expresses certain general principles, including the following:

(i) It is prudent to minimize all chemical exposures. Because few laboratory chemicals are without hazards, general precautions for handling all laboratory chemicals should be adopted, rather than specific guidelines for particular chemicals (2, 10). Skin contact with chemicals should be avoided as a cardinal rule (198).

(ii) Avoid underestimation of risk. Even for substances of no known significant hazard, exposure should be minimized; for work with substances which present special hazards, special precautions should be taken (10, 37, 38). One should assume that any mixture will be more toxic than its most toxic component (30, 103) and that all substances of unknown toxicity are toxic (3, 34).

(iii) Provide adequate ventilation. The best way to prevent exposure to airborne substances is to prevent their escape into the working atmosphere by use of hoods and other ventilation devices (32, 198).

(iv) Institute a chemical hygiene program. A mandatory chemical hygiene program designed to minimize exposures is needed; it should be a regular, continuing effort, not merely a standby or short-term activity (6, 11). Its recommendations should be followed in academic teaching laboratories as well as by full-time laboratory workers (13).

(v) Observe the PELs, TLVs. The permissible exposure limits of WISHA and the threshold limit values of the American Conference of Governmental Industrial Hygienists should not be exceeded (13).

(b) Chemical hygiene responsibilities. Responsibility for chemical hygiene rests at all levels (6, 11, 21) including the:

(i) Chief executive officer, who has ultimate responsibility for chemical hygiene within the institution and must, with other administrators, provide continuing support for institutional chemical hygiene (7, 11).

(ii) Supervisor of the department or other administrative unit, who is responsible for chemical hygiene in that unit (7).

(iii) Chemical hygiene officer(s), whose appointment is essential (7) and who must:

(A) Work with administrators and other employees to develop and implement appropriate chemical hygiene policies and practices (7);

(B) Monitor procurement, use, and disposal of chemicals used in the lab (8);

(C) See that appropriate audits are maintained (8);

(D) Help project directors develop precautions and adequate facilities (10);

(E) Know the current legal requirements concerning regulated substances (50); and

(F) Seek ways to improve the chemical hygiene program (8, 11).

(iv) Laboratory supervisor, who has overall responsibility for chemical hygiene in the laboratory (21) including responsibility to:

(A) Ensure that workers know and follow the chemical hygiene rules, that protective equipment is available and in working order, and that appropriate training has been provided (21, 22);

(B) Provide regular, formal chemical hygiene and house-keeping inspections including routine inspections of emergency equipment (21, 171);

(C) Know the current legal requirements concerning regulated substances (50, 231);

(D) Determine the required levels of protective apparel and equipment (156, 160, 162); and

(E) Ensure that facilities and training for use of any material being ordered are adequate (215).

(v) Project director or director of other specific operation, who has primary responsibility for chemical hygiene procedures for that operation (7).

(vi) Laboratory worker, who is responsible for:

(A) Planning and conducting each operation in accordance with the institutional chemical hygiene procedures (7, 21, 22, 230); and

(B) Developing good personal chemical hygiene habits (22).

(c) The laboratory facility:

(i) Design. The laboratory facility should have:

PROPOSED

(A) An appropriate general ventilation system (see C4 below) with air intakes and exhausts located so as to avoid intake of contaminated air (194);

(B) Adequate, well-ventilated stockrooms/storerooms (218, 219);

(C) Laboratory hoods and sinks (12, 162);

(D) Other safety equipment including eyewash fountains and drench showers (162, 169); and

(E) Arrangements for waste disposal (12, 240).

(ii) Maintenance. Chemical-hygiene-related equipment (hoods, incinerator, etc.) should undergo continuing appraisal and be modified if inadequate (11, 12).

(iii) Usage. The work conducted (10) and its scale (12) must be appropriate to the physical facilities available and, especially, to the quality of ventilation (13).

(iv) Ventilation.

(A) General laboratory ventilation. This system should: Provide a source of air for breathing and for input to local ventilation devices (199); it should not be relied on for protection from toxic substances released into the laboratory (198); ensure that laboratory air is continually replaced, preventing increase of air concentrations of toxic substances during the working day (194); direct air flow into the laboratory from nonlaboratory areas and out to the exterior of the building (194).

(B) Hoods. A laboratory hood with 2.5 linear feet of hood space per person should be provided for every 2 workers if they spend most of their time working with chemicals (199); each hood should have a continuous monitoring device to allow convenient confirmation of adequate hood performance before use (200, 209). If this is not possible, work with substances of unknown toxicity should be avoided (13) or other types of local ventilation devices should be provided (199). (See pp. 201-206 for a discussion of hood design, construction, and evaluation.)

(C) Other local ventilation devices. Ventilated storage cabinets, canopy hoods, snorkels, etc., should be provided as needed (199). Each canopy hood and snorkel should have a separate exhaust duct (207).

(D) Special ventilation areas. Exhaust air from glove boxes and isolation rooms should be passed through scrubbers or other treatment before release into the regular exhaust system (208). Cold rooms and warm rooms should have provisions for rapid escape and for escape in the event of electrical failure (209).

(E) Modifications. Any alteration of the ventilation system should be made only if thorough testing indicates that worker protection from airborne toxic substances will continue to be adequate (12, 193, 204).

(F) Performance. Rate: 4-12 room air changes/hour is normally adequate general ventilation if local exhaust systems such as hoods are used as the primary method of control (194).

(G) Quality. General air flow should not be turbulent and should be relatively uniform throughout the laboratory, with no high velocity or static areas (194, 195); airflow into and within the hood should not be excessively turbulent (200); hood face velocity should be adequate (typically 60-100 fpm) (200, 204).

(H) Evaluation. Quality and quantity of ventilation should be evaluated on installation (202), regularly monitored (at least every 3 months) (6, 12, 14, 195), and reevaluated whenever a change in local ventilation devices is made (12, 195, 207). See pp. 195-198 for methods of evaluation and for calculation of estimated airborne contaminant concentrations.

(d) Components of the chemical hygiene plan:

(i) Basic rules and procedures (recommendations for these are given in section (e), below).

(ii) Chemical procurement, distribution, and storage.

(A) Procurement. Before a substance is received, information on proper handling, storage, and disposal should be known to those who will be involved (215, 216). No container should be accepted without an adequate identifying label (216). Preferably, all substances should be received in a central location (216).

(B) Stockrooms/storerooms. Toxic substances should be segregated in a well-identified area with local exhaust ventilation (221). Chemicals which are highly toxic (227) or other chemicals whose containers have been opened should be in unbreakable secondary containers (219). Stored chemicals should be examined periodically (at least annually) for replacement, deterioration, and container integrity (218-19).

(C) Stockrooms/storerooms should not be used as preparation or repackaging areas, should be open during normal working hours, and should be controlled by one person (219).

(D) Distribution. When chemicals are hand carried, the container should be placed in an outside container or bucket. Freight-only elevators should be used if possible (223).

(E) Laboratory storage. Amounts permitted should be as small as practical. Storage on bench tops and in hoods is inadvisable. Exposure to heat or direct sunlight should be avoided. Periodic inventories should be conducted, with unneeded items being discarded or returned to the storeroom/stockroom (225-6, 229).

(iii) Environmental monitoring. Regular instrumental monitoring of airborne concentrations is not usually justified or practical in laboratories but may be appropriate when testing or redesigning hoods or other ventilation devices (12) or when a highly toxic substance is stored or used regularly (e.g., 3 times/week) (13).

(iv) Housekeeping, maintenance, and inspections.

(A) Cleaning. Floors should be cleaned regularly (24).

(B) Inspections. Formal housekeeping and chemical hygiene inspections should be held at least quarterly (6, 21) for units which have frequent personnel changes and semiannually for others; informal inspections should be continual (21).

(C) Maintenance. Eye wash fountains should be inspected at intervals of not less than 3 months (6). Respirators for routine use should be inspected periodically by the laboratory supervisor (169). Safety showers should be tested routinely (169). Other safety equipment should be inspected regularly. (E.g., every 3-6 months) (6, 24, 171). Procedures to prevent restarting of out-of-service equipment should be established (25).

(D) Passageways. Stairways and hallways should not be used as storage areas (24). Access to exits, emergency equipment, and utility controls should never be blocked (24).

(v) Medical program.

(A) Compliance with regulations. Regular medical surveillance should be established to the extent required by regulations (12).

(B) Routine surveillance. Anyone whose work involves regular and frequent handling of toxicologically significant quantities of a chemical should consult a qualified physician to determine on an individual basis whether a regular schedule of medical surveillance is desirable (11, 50).

(C) First aid. Personnel trained in first aid should be available during working hours and an emergency room with medical personnel should be nearby (173). See pp. 176-178 for description of some emergency first-aid procedures.

(vi) Protective apparel and equipment. These should include for each laboratory:

(A) Protective apparel compatible with the required degree of protection for substances being handled (158-161);

(B) An easily accessible drench-type safety shower (162, 169);

(C) An eyewash fountain (162);

(D) A fire extinguisher (162-164);

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(E) Respiratory protection (164-9), fire alarm and telephone for emergency use (162) should be available nearby; and

(F) Other items designated by the laboratory supervisor (156, 160).

(vii) Records.

(A) Accident records should be written and retained (174).

(B) Chemical hygiene plan records should document that the facilities and precautions were compatible with current knowledge and regulations (7).

(C) Inventory and usage records for high-risk substances should be kept as specified in sections E3e below.

(D) Medical records should be retained by the institution in accordance with the requirements of state and federal regulations (12).

(viii) Signs and labels. Prominent signs and labels of the following types should be posted:

(A) Emergency telephone numbers of emergency personnel/facilities, supervisors, and laboratory workers (28);

(B) Identity labels, showing contents of containers (including waste receptacles) and associated hazards (27, 48);

(C) Location signs for safety showers, eyewash stations, other safety and first aid equipment, exits (27) and areas where food and beverage consumption and storage are permitted (24); and

(D) Warnings at areas or equipment where special or unusual hazards exist (27).

(ix) Spills and accidents.

(A) A written emergency plan should be established and communicated to all personnel; it should include procedures for ventilation failure (200), evacuation, medical care, reporting, and drills (172).

(B) There should be an alarm system to alert people in all parts of the facility including isolation areas such as cold rooms (172).

(C) A spill control policy should be developed and should include consideration of prevention, containment, cleanup, and reporting (175).

(D) All accidents or near accidents should be carefully analyzed with the results distributed to all who might benefit (8, 28).

(x) Information and training program.

(A) Aim: To assure that all individuals at risk are adequately informed about the work in the laboratory, its risks, and what to do if an accident occurs (5, 15).

(B) Emergency and personal protection training: Every laboratory worker should know the location and proper use of available protective apparel and equipment (154, 169).

(C) Some of the full-time personnel of the laboratory should be trained in the proper use of emergency equipment and procedures (6).

(D) Such training as well as first-aid instruction should be available to (154) and encouraged for (176) everyone who might need it.

(E) Receiving and stockroom/storeroom personnel should know about hazards, handling equipment, protective apparel, and relevant regulations (217).

(F) Frequency of training: The training and education program should be a regular, continuing activity—not simply an annual presentation (15).

(G) Literature/consultation: Literature and consulting advice concerning chemical hygiene should be readily available to laboratory personnel, who should be encouraged to use these information resources (14).

(xi) Waste disposal program.

(A) Aim: To assure that minimal harm to people, other organisms, and the environment will result from the disposal of waste laboratory chemicals (5).

(B) Content (14, 232, 233, 240): The waste disposal program should specify how waste is to be collected, segregated, stored, and transported and include consideration of what materials can be incinerated. Transport from the institution must be in accordance with DOT regulations (244).

(C) Discarding chemical stocks: Unlabeled containers of chemicals and solutions should undergo prompt disposal; if partially used, they should not be opened (24, 27).

(D) Before a worker's employment in the laboratory ends, chemicals for which that person was responsible should be discarded or returned to storage (226).

(E) Frequency of disposal: Waste should be removed from laboratories to a central waste storage area at least once per week and from the central waste storage area at regular intervals (14).

(F) Method of disposal: Incineration in an environmentally acceptable manner is the most practical disposal method for combustible laboratory waste (14, 238, 241).

(G) Indiscriminate disposal by pouring waste chemicals down the drain (14, 231, 242) or adding them to mixed refuse for landfill burial is unacceptable (14).

(H) Hoods should not be used as a means of disposal for volatile chemicals (40, 200).

(I) Disposal by recycling (233, 243) or chemical decontamination (40, 230) should be used when possible.

(e) Basic rules and procedures for working with chemicals. The chemical hygiene plan should require that laboratory workers know and follow its rules and procedures. In addition to the procedures of the subprograms mentioned above, these should include the general rules following:

(i) General rules. The following should be used for essentially all laboratory work with chemicals:

(A) Accidents and spills—Eye contact: Promptly flush eyes with water for a prolonged period (15 minutes) and seek medical attention (33, 172).

(B) Ingestion: Encourage the victim to drink large amounts of water (178).

(C) Skin contact: Promptly flush the affected area with water (33, 172, 178) and remove any contaminated clothing (172, 178). If symptoms persist after washing, seek medical attention (33).

(D) Clean-up. Promptly clean up spills, using appropriate protective apparel and equipment and proper disposal (24, 33). See pp. 233-237 for specific clean-up recommendations.

(E) Avoidance of "routine" exposure: Develop and encourage safe habits (23); avoid unnecessary exposure to chemicals by any route (23);

(F) Do not smell or taste chemicals (32). Vent apparatus which may discharge toxic chemicals (vacuum pumps, distillation columns, etc.) into local exhaust devices (199).

(G) Inspect gloves (157) and test glove boxes (208) before use.

(H) Do not allow release of toxic substances in cold rooms and warm rooms, since these have contained recirculated atmospheres (209).

(I) Choice of chemicals: Use only those chemicals for which the quality of the available ventilation system is appropriate (13).

(J) Eating, smoking, etc.: Avoid eating, drinking, smoking, gum chewing, or application of cosmetics in areas where laboratory chemicals are present (22, 24, 32, 40); wash hands before conducting these activities (23, 24).

(K) Avoid storage, handling, or consumption of food or beverages in storage areas, refrigerators, glassware, or utensils which are also used for laboratory operations (23, 24, 226).

(L) Equipment and glassware: Handle and store laboratory glassware with care to avoid damage; do not use damaged glassware (25). Use extra care with Dewar flasks and other evacuated glass apparatus; shield or wrap them to contain chemicals and fragments should implosion occur (25). Use equipment only for its designed purpose (23, 26).

(M) Exiting: Wash areas of exposed skin well before leaving the laboratory (23).

(N) Horseplay: Avoid practical jokes or other behavior which might confuse, startle, or distract another worker (23).

(O) Mouth suction: Do not use mouth suction for pipetting or starting a siphon (23, 32).

(P) Personal apparel: Confine long hair and loose clothing (23, 158). Wear shoes at all times in the laboratory but do not wear sandals, perforated shoes, or sneakers (158).

(Q) Personal housekeeping: Keep the work area clean and uncluttered, with chemicals and equipment being prop-

erly labeled and stored; clean up the work area on completion of an operation or at the end of each day (24).

(R) Personal protection: Assure that appropriate eye protection (154-156) is worn by all persons, including visitors, where chemicals are stored or handled (22, 23, 33, 154).

(S) Wear appropriate gloves when the potential for contact with toxic materials exists (157); inspect the gloves before each use, wash them before removal, and replace them periodically (157). (A table of resistance to chemicals of common glove materials is given p. 159.)

(T) Use appropriate (164-168) respiratory equipment when air contaminant concentrations are not sufficiently restricted by engineering controls (164-5), inspecting the respirator before use (169).

(U) Use any other protective and emergency apparel and equipment as appropriate (22, 157-162).

(V) Void use of contact lenses in the laboratory unless necessary; if they are used, inform supervisor so special precautions can be taken (155).

(W) Remove laboratory coats immediately on significant contamination (161).

(X) Planning: Seek information and advice about hazards (7), plan appropriate protective procedures, and plan positioning of equipment before beginning any new operation (22, 23).

(Y) Unattended operations: Leave lights on, place an appropriate sign on the door, and provide for containment of toxic substances in the event of failure of a utility service (such as cooling water) to an unattended operation (27, 128).

(Z) Use of hood: Use the hood for operations which might result in release of toxic chemical vapors or dust (198-9).

(AA) As a rule of thumb, use a hood or other local ventilation device when working with any appreciably volatile substance with a TLV of less than 50 ppm (13).

(BB) Confirm adequate hood performance before use; keep hood closed at all times except when adjustments within the hood are being made (200); keep materials stored in hoods to a minimum and do not allow them to block vents or air flow (200).

(CC) Leave the hood "on" when it is not in active use if toxic substances are stored in it or if it is uncertain whether adequate general laboratory ventilation will be maintained when it is "off" (200).

(DD) Vigilance: Be alert to unsafe conditions and see that they are corrected when detected (22).

(EE) Waste disposal: Assure that the plan for each laboratory operation includes plans and training for waste disposal (230).

(FF) Deposit chemical waste in appropriately labeled receptacles and follow all other waste disposal procedures of the chemical hygiene plan (22, 24).

(GG) Do not discharge to the sewer concentrated acids or bases (231); highly toxic, malodorous, or lachrymatory substances (231); or any substances which might interfere with the biological activity of waste water treatment plants, create fire or explosion hazards, cause structural damage, or obstruct flow (242).

(HH) Working alone: Avoid working alone in a building; do not work alone in a laboratory if the procedures being conducted are hazardous (28).

(ii) Working with allergens and embryotoxins.

(A) Allergens (examples: Diazomethane, isocyanates, bichromates): Wear suitable gloves to prevent hand contact with allergens or substances of unknown allergenic activity (35).

(B) Embryotoxins (34-5) (examples: Organomercurials, lead compounds, formamide): Women of childbearing age shall handle these substances only in a hood whose satisfactory performance has been confirmed, using appropriate protective apparel (especially gloves) to prevent skin contact.

(C) Review each use of these materials with the research supervisor and review continuing uses annually or whenever a procedural change is made.

(D) Store these substances, properly labeled, in an adequately ventilated area in an unbreakable secondary container.

(E) Notify supervisors of all incidents of exposure or spills; consult a qualified physician when appropriate.

(iii) Work with chemicals of moderate chronic or high acute toxicity.

Examples: diisopropylfluorophosphate (41), hydrofluoric acid (43), hydrogen cyanide (45).

(iv) Supplemental rules to be followed in addition to those mentioned above (Procedure B of "prudent practices," pp. 39-41):

(A) Aim: To minimize exposure to these toxic substances by any route using all reasonable precautions (39).

(B) Applicability: These precautions are appropriate for substances with moderate chronic or high acute toxicity used in significant quantities (39).

(C) Location: Use and store these substances only in areas of restricted access with special warning signs (40, 229).

(D) Always use a hood (previously evaluated to confirm adequate performance with a face velocity of at least 60 linear feet per minute) (40) or other containment device for procedures which may result in the generation of aerosols or vapors containing the substance (39); trap released vapors to prevent their discharge with the hood exhaust (40).

(E) Personal protection: Always avoid skin contact by use of gloves and long sleeves (and other protective apparel as appropriate) (39). Always wash hands and arms immediately after working with these materials (40).

(F) Records: Maintain records of the amounts of these materials on hand, amounts used, and the names of the workers involved (40, 229).

(G) Prevention of spills and accidents: Be prepared for accidents and spills (41).

(H) Assure that at least 2 people are present at all times if a compound in use is highly toxic or of unknown toxicity (39).

(I) Store breakable containers of these substances in chemically resistant trays; also work and mount apparatus above such trays or cover work and storage surfaces with removable, absorbent, plastic backed paper (40).

(J) If a major spill occurs outside the hood, evacuate the area; assure that cleanup personnel wear suitable protective apparel and equipment (41).

(K) Waste: Thoroughly decontaminate or incinerate contaminated clothing or shoes (41). If possible, chemically decontaminate by chemical conversion (40).

(L) Store contaminated waste in closed, suitably labeled, impervious containers (for liquids, in glass or plastic bottles half-filled with vermiculite) (40).

(v) Work with chemicals of high chronic toxicity.

Examples: Dimethylmercury and nickel carbonyl (48), benzo-a-pyrene (51), N-nitrosodiethylamine (54), other human carcinogens or substances with high carcinogenic potency in animals (38).

(vi) Further supplemental rules to be followed, in addition to all these mentioned above, for work with substances of known high chronic toxicity (in quantities above a few milligrams to a few grams, depending on the substance) (47). (Procedure A of "Prudent Practices" pp. 47-50).

(A) Access: Conduct all transfers and work with these substances in a "controlled area": A restricted access hood, glove box, or portion of a lab, designated for use of highly toxic substances, for which all people with access are aware of the substances being used and necessary precautions (48).

(B) Approvals: Prepare a plan for use and disposal of these materials and obtain the approval of the laboratory supervisor (48).

(C) Noncontamination/decontamination: Protect vacuum pumps against contamination by scrubbers or HEPA filters and vent them into the hood (49). Decontaminate vacuum pumps or other contaminated equipment, including glassware, in the hood before removing them from the controlled area (49, 50).

(D) Decontaminate the controlled area before normal work is resumed there (50).

(E) Exiting: On leaving a controlled area, remove any protective apparel (placing it in an appropriate, labeled container) and thoroughly wash hands, forearms, face, and neck (49).

(F) Housekeeping: Use a wet mop or a vacuum cleaner equipped with a HEPA filter instead of dry sweeping if the toxic substance was a dry powder (50).

(G) Medical surveillance: If using toxicologically significant quantities of such a substance on a regular basis (e.g., 3 times per week), consult a qualified physician concerning desirability of regular medical surveillance (50).

(H) Records: Keep accurate records of the amounts of these substances stored (229) and used, the dates of use, and names of users (48).

(I) Signs and labels: Assure that the controlled area is conspicuously marked with warning and restricted access signs (49) and that all containers of these substances are appropriately labeled with identity and warning labels (48).

(J) Spills: Assure that contingency plans, equipment, and materials to minimize exposures of people and property in case of accident are available (233-4).

(K) Storage: Store containers of these chemicals only in a ventilated, limited access (48, 227, 229) area in appropriately labeled, unbreakable, chemically resistant, secondary containers (48, 229).

(L) Glove boxes: For a negative pressure glove box, ventilation rate must be at least 2 volume changes/hour and pressure at least 0.5 inches of water (48). For a positive pressure glove box, thoroughly check for leaks before each use (49). In either case, trap the exit gases or filter them through a HEPA filter and then release them into the hood (49).

(M) Waste: Use chemical decontamination whenever possible; ensure that containers of contaminated waste (including washings from contaminated flasks) are transferred from the controlled area in a secondary container under the supervision of authorized personnel (49, 50, 233).

(vii) Animal work with chemicals of high chronic toxicity.

(A) Access: For large scale studies, special facilities with restricted access are preferable (56).

(B) Administration of the toxic substance: When possible, administer the substance by injection or gavage instead of in the diet. If administration is in the diet, use a caging system under negative pressure or under laminar air flow directed toward HEPA filters (56).

(C) Aerosol suppression: Devise procedures which minimize formation and dispersal of contaminated aerosols, including those from food, urine, and feces (e.g., use HEPA filtered vacuum equipment for cleaning, moisten contaminated bedding before removal from the cage, mix diets in closed containers in a hood) (55, 56).

(D) Personal protection: When working in the animal room, wear plastic or rubber gloves, fully buttoned laboratory coat or jumpsuit and, if needed because of incomplete suppression of aerosols, other apparel and equipment (shoe and head coverings, respirator) (56).

(E) Waste disposal: Dispose of contaminated animal tissues and excreta by incineration if the available incinerator can convert the contaminant to nontoxic products (238); otherwise, package the waste appropriately for burial in an EPA-approved site (239).

(f) Safety recommendations. The above recommendations from "prudent practices" do not include those which are directed primarily toward prevention of physical injury rather than toxic exposure. However, failure of precautions against injury will often have the secondary effect of causing toxic exposures. Therefore, we list below page references for recommendations concerning some of the major categories of safety hazards which also have implications for chemical hygiene:

(i) Corrosive agents: (35-6)

(ii) Electrically powered laboratory apparatus: (179-92)

(iii) Fires, explosions: (26, 57-74, 162-4, 174-5, 219-20, 226-7)

(iv) Low temperature procedures: (26, 88)

(v) Pressurized and vacuum operations (including use of compressed gas cylinders): (27, 75-101)

(g) Material safety data sheets. Material safety data sheets are presented in "prudent practices" for the chemicals listed below. (Asterisks denote that comprehensive material safety data sheets are provided.)

*Acetyl peroxide (105) *Acrolein (106) *Acrylonitrile (107) Ammonia (anhydrous) (91) *Aniline (109) *Benzene (110) *Benzo[a]pyrene (112) *Bis(chloromethyl) ether (113) Boron trichloride (91) Boron trifluoride (92) Bromine (114)

*Tert-butyl hydroperoxide (148) *Carbon disulfide (116) Carbon monoxide (92) *Carbon tetrachloride (118) *Chlorine (119) Chlorine trifluoride (94) *Chloroform (121) Chloromethane (93) *Diethyl ether (122) Diisopropyl fluorophosphate (41) *Dimethylformamide (123) *Dimethyl sulfate (125) *Dioxane (126) *Ethylene dibromide (128) *fluorine (95) *Formaldehyde (130) *Hydrazine and salts (132) Hydrofluoric acid (43) Hydrogen bromide (98) Hydrogen chloride (98) *Hydrogen cyanide (133) *Hydrogen sulfide (135) Mercury and compounds (52) *Methanol (137) *Morpholine (138) *Nickel carbonyl (99) *Nitrobenzene (139) Nitrogen dioxide (100) N-nitrosodiethylamine (54) *Peracetic acid (141) *Phenol (142) *Phosgene (143) *Pyridine (144) *Sodium azide (145) *Sodium cyanide (147) Sulfur dioxide (101) *Trichloroethylene (149) *Vinyl chloride (150)

AMENDATORY SECTION (Amending WSR 96-17-056, filed 8/20/96, effective 10/15/96)

WAC 296-78-56505 Boats and mechanical devices on waters. (1) The applicable provisions of the Standard for Fire Protection for Motorcraft, NFPA No. 302-1994, shall be complied with. Prior to starting the boat motor, any spilled fuel shall be removed and vapors shall be exhausted from any area in which they may accumulate.

(2) The bilge area shall be kept clean and oil, grease, fuel, or highly combustible materials shall not be allowed to accumulate.

(3) Adequate ventilation equipment shall be provided and used for the bilge area to prevent the accumulation of toxic or explosive gases or vapors.

(4) Adequate ventilation equipment shall be provided and used for the cabin area on enclosed cabin-type boats to prevent an accumulation of harmful gases or vapors.

(5) Deck and cabin lighting shall be provided and used where necessary to provide safe levels of illumination aboard boats. Boats operated during the period from sunset to sunrise, or in conditions of restricted visibility, shall display navigation lights as required by the United States Coast Guard. Searchlights or floodlights shall be provided to facilitate safe navigation and to illuminate working or boarding areas adjacent to the craft.

(6) Decks of pond boats shall be covered with nonslip material. On craft used by workers wearing calked shoes, all areas where the operator or workers must stand or walk shall be made of or be covered with wood or other suitable matting or nonslip material and such covering shall be maintained in good condition.

(7) Each boat shall be provided with a fire extinguisher and life ring with at least fifty feet of one-fourth inch line attached. On log broncs, boom-scooters, or other small boomboats where all occupants are required to wear life saving devices and a life ring would present a tripping hazard, the life ring may be omitted.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(8)(a) Along docks, walkways, or other fixed installations on or adjacent to open water more than five feet deep, approved life rings with at least ninety feet of one-fourth inch

line attached, shall be provided. The life rings shall be spaced at intervals not to exceed two hundred feet and shall be kept in easily visible and readily accessible locations.

(b) When employees are assigned work at other casual locations where exposure to drowning exists, at least one approved life ring with at least ninety feet of line attached, shall be provided in the immediate vicinity of the work assigned.

(c) When work is assigned over water where the vertical drop from the accidental fall would exceed fifty feet, special arrangements shall be made with and approved by the department of labor and industries prior to such assignment.

(d) Lines attached to life rings on fixed locations shall be at least ninety feet in length, at least one-fourth inch in diameter, and have a minimum breaking strength of five hundred pounds. Similar lines attached to life rings on boats shall be at least fifty feet in length.

(e) Life rings must be United States Coast Guard approved thirty-inch size.

(f) Life rings and attached lines shall be maintained to retain at least seventy-five percent of their designed buoyancy and strength.

(g) Log broncs, boomscoters, and boomboats shall not be loaded with personnel or equipment so as to adversely affect their stability or seaworthiness.

(h) Boats shall not be operated at an excessive speed or handled recklessly.

(i) Boat fuel shall be transported and stored in approved containers. Refer to WAC 296-24-58501(19) for definition of approved.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-105 Handcharge makeup methods.

General. The department shall recognize two permissible methods concerning handcharges for avalanche control blasting. The descriptions and requirements for each method are contained in this section. Every ski area operation which conducts avalanche control blasting should use Method II "Hand charge makeup room." A well designed and constructed handcharge makeup room can enhance the correct assembly of components which will maintain the best possible control over explosives and components, reduce the probability of an explosives incident, and reduce the incidence of misfires from incorrect makeup or moisture.

(1) Method I. Makeup at the blast site.

(a) The ignition system shall consist of a nonelectrical blasting cap and highest quality water resistant safety fuse, or detonating cord, assembled as recommended by the manufacturer.

(b) Detonating cord (i.e., primacord) shall be used to connect separated multiple-charge blasts.

(c) No other ignition system shall be permissible on hand-placed or hand-thrown avalanche control charges unless variance is granted by the department.

(d) Caps shall be installed on correct length fuses prior to being transported out onto control routes.

(e) Caps shall only be crimped with a crimper tool approved for that purpose.

(f) Assembling caps and fuses shall be done in a warm, dry, well-lighted environment. The location used for assembly shall not have flammable fuels, flammable gases, or explosives present where accidental detonation of the caps could create a secondary ignition or detonation hazard.

(g) Each cap shall be protected by a styrofoam shield or the equivalent before being placed in an avalanche control pack for transportation.

(h) A fuse igniter shall never be attached to a fuse until the fuse and cap assembly is installed in the handcharge at the blast site and the control crew is fully prepared to ignite the charge.

(i) All class A explosives shall be attended as defined in WAC 296-59-007 at all times when the explosive is out of the class 1 storage magazine.

(j) Disbursement of explosive charges from the class 1 storage magazine into avalanche control packs shall be done outside the storage magazine. Records shall be maintained for all explosives disbursed.

(k) Caps, cap and fuse assemblies, armed handcharges, or fuse igniters shall not be carried into or stored in a class 1 magazine which contains class A explosives.

(2) Method II. Handcharge makeup room. This method is different from method I primarily in that the fuse and cap assembly is installed in the explosive charge while inside a special makeup room. The assembly procedure shall be as follows:

(a) Install caps on correct length fuses with an approved crimper tool before explosives are brought into the makeup room.

(b) The cap and fuse assemblies shall not be combined with explosives to form handcharges until just before the intended time of distribution.

(c) Only nonsparking skewers shall be used to punch holes in an explosives cartridge.

(d) The fuse shall be laced or taped in position after inserting the cap in the charge.

(e) Each handcharge shall be placed in an explosives box or avalanche control pack immediately after assembly is completed.

(f) No spark-producing metal tools shall be used to open explosives containers.

(g) Fuse igniters shall never be attached to a fuse or a handcharge until the handcharge is at the blast site and the control crew is fully prepared to ignite the charge.

(3) Makeup room requirements, procedures.

(a) Construction requirements.

(i) Makeup rooms located in accordance with the American Standard Quantity and Distance Tables for storage shall not require construction of reinforced concrete walls, floors, and doors. All other requirements of this chapter shall be applicable for such facilities.

(ii) Floors and walls. The floor and walls shall be constructed of reinforced concrete not less than eight inches thick. The rebar shall be not less than one-half inch diameter and shall be spaced on twelve-inch vertical and horizontal centers. The rebar shall be bent at a ninety degree angle and extend a minimum of twenty-four inches into the adjoining floor or wall to secure each floor and wall joint.

PROPOSED

(iii) Roof. The roof is not limited to specific materials but shall provide both weather protection and standard snow loading protection for the region.

(iv) Access door(s).

(A) If a hinged door mounting is utilized, the hinge shall be mounted on the inside so that the door opens into the makeup room. In the fully closed position, in position to be locked, the door shall be a minimum of two inches larger than the access opening on all sides.

(B) If a flush door mounting is utilized, the door shall be mounted with a two-inch decreasing taper on all sides of both the door and the concrete access opening to form a wedge seal.

(C) If a sliding door mounting is utilized, the mounting apparatus shall be on the inside of the makeup room and the door shall be a minimum of two inches larger than the access opening when the door is fully closed.

(D) Makeup room door may be either:

(I) Constructed to the same structural integrity and mounting requirements of (a)(iii)(A) through (C) of this subsection; or

(II) Constructed of plywood not less than two inches thick and overlaid on the outside with a steel plate not less than one-eighth inch thick.

(III) If a door which complies with (iii)(D)(II) of this subsection is used, a berm or barricade shall be installed within six feet of the door. The berm or barricade shall extend at least as high as the top of the door and shall be a minimum of two feet wider than the door on both sides of the door.

(E) For security purposes, one steel padlock having at least five tumblers and a case hardened shackle of at least three-eighths inch diameter is sufficient for locking purposes. Hinges and hasps shall be attached so that they cannot be removed from the outside when in the closed position and with the lock in place.

(v) Interior finish. The inside of all makeup rooms shall be finished and equipped to the following minimum requirements:

(A) Construction shall be fire resistant and nonsparking up to the top of the walls. Nails or screws shall be countersunk, blind nailed, or covered.

(B) Lighting shall be by N.E.C. explosion-proof rated fixtures and all wiring shall be in sealed conduit.

(C) Control switches shall be outside the makeup room.

(D) No electrical outlet boxes are permissible inside the room.

(b) Restrictions.

(i) Smoking, matches, open flames, or flame or spark-producing devices shall not be permitted inside the makeup room.

(ii) Flammable liquids or flammable compressed gases shall not be stored in the makeup room.

(iii) Signs limiting entry to authorized personnel shall be posted on the door(s).

(iv) A sign stating the occupancy rules shall be posted inside the makeup room where it is clearly legible upon entering the room. The sign shall post the following rules:

(A) Occupancy shall be restricted to specifically authorized personnel;

(B) Smoking, matches, flame or spark-producing devices, tools or equipment shall not be permitted in the room at any time when explosives or explosive components are present; and

(C) Flammable fuels or compressed gases shall not be permitted inside the room nor stored within fifty feet of the room.

(v) Heating units shall be limited to:

(A) Forced air systems with the heating unit located outside the room.

(B) Steam systems of 15 psig or less.

(C) Hot water systems of 130°F or less.

(D) The radiant heating coils and piping for steam or hot water systems shall be protected so that explosives cannot come into contact with them.

(E) Heating ducts shall be installed so that the hot air does not discharge directly on explosives.

(F) The heating system used in a makeup room shall have controls which prevent the ambient room temperature from exceeding 130°F.

(vi) The makeup room shall be equipped with a portable fire extinguisher of at least 2A-20BC rating.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(vii) Ventilation.

(A) The makeup room shall be equipped with a ventilation system capable of maintaining a minimum rate of three air exchanges per hour during all times when explosives are present in the room.

(B) Fans and controls shall be located outside the makeup room and shall be of a type approved for this service.

(C) The lighting circuit control shall also activate the ventilation fan and the ventilation fan shall be operated whenever personnel are in the room.

(D) Exhaust ventilation shall be arranged to discharge into outside air, not into an enclosed structure.

(viii) The floor or exterior walls may be constructed with duct openings for heating and ventilation purposes provided that:

(A) Each duct opening is not greater in volume than seventy-two square inches;

(B) The combined number of duct openings shall not exceed three;

(C) Duct openings shall be located within twelve inches of the floor or ceiling;

(D) The exhaust duct opening shall not be located on the wall above the makeup workbench.

(c) Practices and procedures.

(i) When explosives are present in the makeup room, entry into the makeup room shall be restricted to trained and authorized personnel.

(ii) The access door(s) to the makeup room shall be kept locked or bolted from the inside while employees are assembling explosives.

(iii) The entire makeup room shall be kept clean, orderly, and free of burnable rubbish.

(iv) Brooms and other cleaning utensils shall not have any spark-producing metal parts if used when explosives are present.

(v) Sweepings and empty explosives containers shall be disposed of as recommended by the explosives supplier.

(vi) Repair activities which utilize spark-producing tools shall not be conducted on any part of the makeup room while explosives are present.

(d) Storage of explosives.

(i) A makeup room shall not be used for the unattended storage of class A explosives.

(ii) A makeup room which meets all requirements of this chapter may contain a class 3 storage facility, for one thousand or less blasting caps.

(iii) A class 3 storage facility shall be constructed to meet the following minimum requirements:

(A) A class 3 storage facility shall be fire resistant and theft resistant. It does not need to be bullet resistant and weather resistant if the locked makeup room provides protection from weather and bullet penetration.

(B) Sides, bottoms, and covers shall be constructed of not less than number twelve gauge metal and lined with a nonsparking material.

(C) Hinges and hasps shall be attached so that they cannot be removed from the outside.

(D) One steel padlock having at least five tumblers and a case-hardened shackle of at least three-eighths inch diameter is sufficient for locking purposes. The lock and hasp is not required to be equipped with a steel hood.

(e) Location.

(i) The makeup room shall be located in accordance with the American Quantity and Distance Separation Tables as adopted in chapter 70.74 RCW "Washington State Explosives Act" and chapter 296-52 WAC "Safety standards for the possession and handling of explosives," except under conditions as indicated in this section.

(ii) Where locating the makeup room in accordance with the quantity and distance separation table is impractical because of bad weather accessibility, rough terrain, or space availability:

(A) Upon application the department will issue a variance enabling location of the makeup room, by mutual agreement, at the safest possible location within the limitation of the individual base area.

(B) The safest possible location will be the location most isolated from assembly areas and buildings that are inhabited with application of additional protection measures such as:

(I) Berming.

(II) Locating natural obstructions or buildings that are not inhabited between the makeup room and assembly areas and buildings that are inhabited.

(III) Limitations on the total quantity of explosives in the makeup room at any one time.

(iii) Makeup rooms designed to hold the boxes of explosives awaiting makeup and the madeup explosives in avalanche control packs awaiting distribution may be located using the total quantity of explosives allowed at the makeup table at any one time as the referenced quantity of explosives provided.

(A) The makeup room is located in accordance with the American Quantity and Distance Separation Tables as adopted in chapter 70.74 RCW "Washington State Explosives Act" and chapter 296-52 WAC "Safety standards for the

possession and handling of explosives" for the referenced quantity of explosives at the makeup table.

(I) This separation shall apply only to human proximity to the makeup room and only at such time as there are explosives in the makeup room.

(II) When the makeup room does not contain explosives the separation tables shall not apply.

(B) The concrete walls of the room are designed to withstand the explosion of the total amount of the referenced explosives.

(I) The concrete walls must be constructed in accordance with specifications designed and certified by a licensed engineer; or

(II) The concrete walls must be constructed to the specifications of Department of the Army TM5-1300 "Structures to Resist the Effects of Accidental Explosions" designed to produce walls which will withstand explosion of the referenced quantity explosives.

(C) The boxes of explosives awaiting makeup and the madeup explosives in avalanche control packs awaiting distribution are located behind separate concrete debris barrier walls which will ensure that detonation of these explosives will not occur if the explosives at the makeup table detonate.

(I) The concrete debris barrier wall must be constructed in accordance with specifications designed and certified by a licensed engineer; or

(II) The concrete debris barrier wall must be constructed to the specifications of Department of the Army TM5-1300 "Structures to Resist the Effects of Accidental Explosions" to produce a barrier which will not allow detonation of the explosives awaiting makeup and distribution should the referenced quantity of explosives detonate.

(III) Access from the makeup table to the area behind the concrete debris barrier walls shall not be doored. The concrete debris barrier walls will be designed so that the access way from the makeup table to the area behind the concrete debris barrier wall will deflect debris from an explosive blast by inherent design.

(D) The roof shall be designed so that the resistance to an interior explosive blast will be negligible.

(iv) A full containment makeup room may be located anywhere and must meet the following requirements:

(A) The makeup room must be constructed in accordance with a licensed explosive engineer's approved design.

(B) The total amount of explosives in the room at any time must not exceed the design limit of the room.

(C) The makeup room cannot be used for storage.

(v) This section shall become effective December 1, 1989.

Note: Explosives shall be stored in licensed magazines only. All magazines must be located in compliance with the American Quantity and Distance Separation Tables until the United States Treasury Department Bureau of Alcohol, Tobacco and Firearms approves full containment class 1 magazines for storage at distances less than those specified in the American Standard Quantity and Distance Separation Tables and the Washington state department of labor and industries adopts corresponding amendments.

PROPOSED

AMENDATORY SECTION (Amending WSR 99-17-094, filed 8/17/99, effective 12/1/99)

WAC 296-155-270 Flammable and combustible liquids. (1) General requirements.

(a) Only approved containers and portable tanks shall be used for storage and handling of flammable and combustible liquids. Approved metal safety cans, or department of transportation approved containers shall be used for the handling and use of flammable liquids in quantities five gallons or less, except that this shall not apply to those flammable liquid materials which are highly viscid (extremely hard to pour), which may be used and handled in original shipping containers. For quantities of one gallon or less, only the original container may be used for storage, use, and handling of flammable liquids.

(b) Flammable or combustible liquids shall not be stored in areas used for exits, stairways, or normally used for the safe passage of people.

(c) Flammable and combustible liquid containers shall be legibly marked to indicate their contents. Each storage container for flammable or combustible liquids, with a capacity of 50 gallons or more, shall have the contents of the container identified by a sign of clearly visible contrasting colors with letters at least 3 inches high, painted on the container at the discharge valve and at the fill point.

(d) Gasoline shall not be used as a solvent or a cleaning agent.

(2) Indoor storage of flammable and combustible liquids.

(a) No more than 25 gallons of flammable or combustible liquids shall be stored in a room outside of an approved storage cabinet. For storage of liquid petroleum gas, see WAC 296-155-275.

(b) Quantities of flammable and combustible liquid in excess of 25 gallons shall be stored in an acceptable or approved cabinet meeting the following requirements:

(i) Acceptable wooden storage cabinets shall be constructed in the following manner, or equivalent: The bottom, sides, and top shall be constructed of an exterior grade of plywood at least 1 inch in thickness, which shall not break down or delaminate under standard fire test conditions. All joints shall be rabbeted and shall be fastened in two directions with flathead wood screws, when more than one door is used, there shall be a rabbeted overlap of not less than 1 inch. Steel hinges shall be mounted in such a manner as to not lose their holding capacity due to loosening or burning out of the screws when subjected to fire. Such cabinets shall be painted inside and out with fire retardant paint.

(ii) Approved metal storage cabinets will be acceptable.

(iii) Cabinets shall be labeled in conspicuous lettering, "Flammable—Keep fire away."

(c) Not more than 60 gallons of flammable or 120 gallons of combustible liquids shall be stored in any one storage cabinet. Not more than three such cabinets may be located in a single storage area. Quantities in excess of this shall be stored in an inside storage room.

(d)(i) Inside storage room shall be constructed to meet the required fire-resistive rating for their use. Such construction shall comply with the test specifications set forth in Stan-

ard Methods of Fire Test of Building Construction and Material, NFPA 251-1972.

(ii) Where an automatic extinguishing system is provided, the system shall be designed and installed in an approved manner. Openings to other rooms or buildings shall be provided with noncombustible liquid-tight raised sills or ramps at least 4 inches in height, or the floor in the storage area shall be at least 4 inches below the surrounding floor. Openings shall be provided with approved self-closing fire doors. The room shall be liquid-tight where the walls join the floor. A permissible alternate to the sill or ramp is an open-grated trench, inside of the room, which drains to a safe location. Where other portions of the building or other buildings are exposed, windows shall be protected as set forth in the Standard for Fire Doors and Windows, NFPA No. 80-1983, for Class E or F openings. Wood of at least 1-inch nominal thickness may be used for shelving, racks, dunnage, scuffboards, floor overlay and similar installations.

(iii) Materials which will react with water and create a fire hazard shall not be stored in the same room with flammable or combustible liquids.

(iv) Storage in inside storage rooms shall comply with Table D-2 following:

TABLE D-2

Fire protection provided	Fire resistance	Maximum size	Total allowable quantities gals./sq. ft./floor area
Yes	2 hrs.	500 sq. ft.	10
No	2 hrs.	500 sq. ft.	4
Yes	1 hr.	150 sq. ft.	5
No	1 hr.	150 sq. ft.	2

Note: Fire protection system shall be sprinkler, water spray, carbon dioxide or other system approved by a nationally recognized testing laboratory for this purpose.

(v) Electrical wiring and equipment located in inside storage rooms shall be approved for Class 1, Division 1, hazardous locations. For definition of Class 1, Division 1, hazardous locations, see WAC 296-155-456.

(vi) Every inside storage room shall be provided with either a gravity or a mechanical exhausting system. Such system shall commence not more than 12 inches above the floor and be designed to provide for a complete change of air within the room at least 6 times per hour. If a mechanical exhausting system is used, it shall be controlled by a switch located outside of the door. The ventilating equipment and any lighting fixtures shall be operated by the same switch. An electric pilot light shall be installed adjacent to the switch if flammable liquids are dispensed within the room. Where gravity ventilation is provided, the fresh air intake, as well as the exhausting outlet from the room, shall be on the exterior of the building in which the room is located.

(vii) In every inside storage room there shall be maintained one clear aisle at least 3 feet wide. Containers over 30 gallons capacity shall not be stacked one upon the other.

PROPOSED

(viii) Flammable and combustible liquids in excess of that permitted in inside storage rooms shall be stored outside of buildings in accordance with subsection (3) of this section.

(3) Storage outside buildings.

(a) Storage of containers (not more than 60 gallons each) shall not exceed 1,100 gallons in any one pile or area. Piles or groups of containers shall be separated by a 5-foot clearance. Piles or groups of containers shall not be nearer than 20 feet to a building.

(b) Within 200 feet of each pile of containers, there shall be a 12-foot-wide access way to permit approach of fire control apparatus.

(c) The storage area shall be graded in a manner to divert possible spills away from buildings or other exposures, or shall be surrounded by a curb or earth dike at least 12 inches high. When curbs or dikes are used, provisions shall be made for draining off accumulations of ground or rain water, or spills of flammable or combustible liquids. Drains shall terminate at a safe location and shall be accessible to operation under fire conditions.

(d) Outdoor portable tank storage.

(i) Portable tanks shall not be nearer than 20 feet from any building. Two or more portable tanks, grouped together, having a combined capacity in excess of 2,200 gallons, shall be separated by a 5-foot-clear area. Individual portable tanks exceeding 1,100 gallons shall be separated by a 5-foot-clear area.

(ii) Within 200 feet of each portable tank, there shall be a 12-foot-wide access way to permit approach of fire control apparatus.

(e) Storage areas shall be kept free of weeds, debris, and other combustible material not necessary to the storage.

(f) Portable tanks, not exceeding 660 gallons, shall be provided with emergency venting and other devices, as required by chapters III and IV of NFPA 30-1972, The Flammable and Combustible Liquids Code.

(g) Portable tanks, in excess of 660 gallons, shall have emergency venting and other devices, as required by chapters II and III of the Flammable and Combustible Liquids Code, NFPA 30-1972.

(4) Fire control for flammable or combustible liquid storage.

(a) At least one portable fire extinguisher, having a rating of not less than 20-B units, shall be located outside of, but not more than 10 feet from, the door opening into any room used for storage of more than 60 gallons of flammable or combustible liquids.

(b) At least one portable fire extinguisher having a rating of not less than 20-B units shall be located not less than 25 feet, nor more than 75 feet, from any flammable liquid storage area located outside.

(c) When sprinklers are provided, they shall be installed in accordance with the Standard for the Installation of Sprinkler Systems, NFPA 13-1972.

(d) At least one portable fire extinguisher having a rating of not less than 20-B:C units shall be provided on all tank trucks or other vehicles used for transporting and/or dispensing flammable or combustible liquids.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(5) Dispensing liquids.

(a) Areas in which flammable or combustible liquids are transferred at the same time, in quantities greater than 5 gallons from one tank or container to another tank or container, shall be separated from other operations by 25-foot distance or by construction having a fire-resistance of at least 1 hour. Drainage or other means shall be provided to control spills. Adequate natural or mechanical ventilation shall be provided to maintain the concentration of flammable vapor at or below 10 percent of the lower flammable limit.

(b) Transfer flammable liquids from one container to another shall be done only when containers are electrically interconnected (bonded).

(c) Flammable or combustible liquids shall be drawn from or transferred into vessels, containers, or tanks within a building or outside only through a closed piping system, from safety cans, by means of a device drawing through the top, or from a container, or portable tanks, by gravity or pump, through an approved self-closing valve. Transferring by means of air pressure on the container or portable tank is prohibited.

(d) The dispensing units shall be protected against collision damage.

(e) Dispensing devices and nozzles for flammable liquids shall be of an approved type, as required by WAC 296-24-33015.

(6) Handling liquids at point of final use.

(a) Flammable liquids shall be kept in closed containers when not actually in use.

(b) Leakage or spillage of flammable or combustible liquids shall be disposed of promptly and safely.

(c) Flammable liquids shall be used only where there are no open flames or other sources of ignition within 50 feet of the operation, unless conditions warrant greater clearance.

(7) Service and refueling areas.

(a) Flammable or combustible liquids shall be stored in approved closed containers, in tanks located underground, or in aboveground portable tanks.

(b) The tank trucks shall comply with the requirements covered in the Standard for Tank Vehicles for Flammable and Combustible Liquids, NFPA No. 385-1977.

(c) The dispensing hose shall be an approved type.

(d) The dispensing nozzle shall be an approved automatic-closing type.

(e) Underground tanks shall not be abandoned.

(f) Clearly identified and easily accessible switch(es) shall be provided at a location remote from dispensing devices to shut off the power to all dispensing devices in the event of an emergency.

(g)(i) Heating equipment of an approved type may be installed in the lubrication or service area where there is no dispensing or transferring of flammable liquids, provided the bottom of the heating unit is at least 18 inches above the floor and is protected from physical damage.

(ii) Heating equipment installed in lubrication or service areas, where flammable liquids are dispensed, shall be of an approved type for garages, and shall be installed at least 8 feet above the floor.

(h) There shall be no smoking or open flames in the areas used for fueling, servicing fuel systems for internal combus-

tion engines, receiving or dispensing of flammable or combustible liquids.

(i) Conspicuous and legible signs prohibiting smoking shall be posted.

(j) The motor of any equipment being fueled shall be shut off during the fueling operation.

(k) Each service or fueling area shall be provided with at least one fire extinguisher having a rating of not less than 20BC located so that an extinguisher will be within 75 feet of each pump, dispenser, underground fill pipe opening, and lubrication or service area.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

AMENDATORY SECTION (Amending Order 86-14, filed 1/21/86)

WAC 296-155-275 Liquefied petroleum gas (LP-gas). (1) Approval of equipment and systems.

(a) Each system shall have containers, valves, connectors, manifold valve assemblies, and regulators of an approved type.

(b) All cylinders shall meet the department of transportation specification identification requirements published in 49 CFR Part 178, Shipping Container Specifications.

(2) Welding on LP-gas containers. Welding is prohibited on containers.

(3) Container valves and container accessories.

(a) Valves, fittings, and accessories connected directly to the container, including primary shut off valves, shall have a rated working pressure of at least 250 p.s.i.g. and shall be of material and design suitable for LP-gas service.

(b) Connections to containers, except safety relief connections, liquid level gauging devices, and plugged openings, shall have shutoff valves located as close to the container as practicable.

(4) Safety devices.

(a) Every container and every vaporizer shall be provided with one or more approved safety relief valves or devices. These valves shall be arranged to afford free vent to the outer air with discharge not less than 5 feet horizontally away from any opening into a building which is below such discharge.

(b) Shutoff valves shall not be installed between the safety relief device and the container, or the equipment or piping to which the safety relief device is connected, except that a shutoff valve may be used where the arrangement of this valve is such that full required capacity flow through the safety relief device is always afforded.

(c) Container safety relief devices and regulator relief vents shall be located not less than 5 feet in any direction from air openings into sealed combustion system appliances or mechanical ventilation air intakes.

(5) Dispensing.

(a) Filling of fuel containers for trucks or motor vehicles from bulk storage containers shall be performed not less than 10 feet from the nearest masonry-walled building, or not less than 25 feet from the nearest building or other construction and, in any event, not less than 25 feet from any building opening.

(b) Filling of portable containers or containers mounted on skids from storage containers shall be performed not less than 50 feet from the nearest building.

(6) Requirements for appliances.

(a) LP-gas consuming appliances shall be approved types.

(b) Any appliance that was originally manufactured for operation with a gaseous fuel other than LP-gas, and is in good condition, may be used with LP-gas only after it is properly converted, adapted, and tested for performance with LP-gas before the appliance is placed in use.

(7) Containers and regulating equipment installed outside of buildings or structures. Containers shall be upright upon firm foundations or otherwise firmly secured. The possible effect on the outlet piping of settling shall be guarded against by a flexible connection or special fitting.

(8) Containers and equipment used inside of buildings or structures.

(a) When operational requirements make portable use of containers necessary, and their location outside of buildings or structures is impractical, containers and equipment are permitted to be used inside of buildings or structures in accordance with (b) through (k) of this subsection. In addition, there may be provisions of this section that are applicable to the particular use or occupancy.

(b) "Containers in use" means connected for use.

(c) Systems utilizing containers having a water capacity greater than 2 1/2-pounds (nominal 1 pound LP-gas capacity) shall be equipped with excess flow valves. Such excess flow valves shall be either integral with the container valves or in the connections to the container valve outlets.

(d) Regulators, when required, shall be either directly connected to the container valves or to manifolds connected to the container valves. The regulator shall be suitable for use with LP-gas. Manifolds and fittings connecting containers to pressure regulator inlets shall be designed for at least 250 p.s.i.g. service pressure.

(e) Valves on containers having water capacity greater than 50 pounds (nominal 20 pounds LP-gas capacity) shall be protected from damage while in use or storage.

(f) Aluminum piping or tubing shall not be used.

(g) Hose shall be designed for a working pressure of at least 250 p.s.i.g. Design, construction, and performance of hose, and hose connections shall have their suitability determined by listing by a nationally recognized testing agency. The hose length shall be as short as practical. Hoses shall be long enough to permit compliance with spacing provisions of (a) through (m) of this subsection, without kinking or straining, or causing hose to be so close to a burner as to be damaged by heat.

(h) Portable heaters, including salamanders, shall be equipped with an approved automatic device to shut off the flow of gas to the mainburner, and pilot if used, in the event of flame failure. Such heaters, having inputs above 50,000 BTU per hour, shall be equipped with either a pilot, which must be lighted and proved before the main burner can be turned on, or an electrical ignition system.

Note: The provisions of this subdivision do not apply to portable heaters under 7,500 BTU per hour input when used with containers having a maximum water capacity of 2 1/2 pounds.

(i) Container valves, connectors, regulators, manifolds, piping, and tubing shall not be used as structural supports for heaters.

(j) Containers, regulating equipment, manifolds, pipe, tubing, and hose shall be located to minimize exposure to high temperatures or physical damage.

(k) Containers having a water capacity greater than 2 1/2 pounds (nominal 1 pound LP-gas capacity) connected for use shall stand on a firm and substantially level surface and, when necessary, shall be secured in an upright position.

(l) The maximum water capacity of individual containers shall be 245 pounds (nominal 100 pounds LP-gas capacity).

(m) For temporary heating, heaters (other than integral heater-container units) shall be located at least 6 feet from any LP-gas container. This shall not prohibit the use of heaters specifically designed for attachment to the container or to a supporting standard, provided they are designed and installed so as to prevent direct or radiant heat application from the heater onto the containers. Blower and radiant type heaters shall not be directed toward any LP-gas container within 20 feet.

(n) If two or more heater-container units, of either the integral or nonintegral type, are located in an unpartitioned area on the same floor, the container or containers of each unit shall be separated from the container or containers of any other unit by at least 20 feet.

(o) When heaters are connected to containers for use in an unpartitioned area on the same floor, the total water capacity of containers, manifolded together for connection to a heater or heaters, shall not be greater than 735 pounds (nominal 300 pounds LP-gas capacity). Such manifolds shall be separated by at least 20 feet.

(p) Storage of containers awaiting use shall be in accordance with subsections (10) and (11) of this section.

(9) Multiple container systems.

(a) Valves in the assembly of multiple container systems shall be arranged so that replacement of containers can be made without shutting off the flow of gas in the system. This provision is not to be construed as requiring an automatic changeover device.

(b) Heaters shall be equipped with an approved regulator in the supply line between the fuel cylinder and the heater unit. Cylinder connectors shall be provided with an excess flow valve to minimize the flow of gas in the event the fuel line becomes ruptured.

(c) Regulators and low-pressure relief devices shall be rigidly attached to the cylinder valves, cylinders, supporting standards, the building walls, or otherwise rigidly secured, and shall be so installed or protected from the elements.

(10) Storage of LPG containers. Storage of LPG within building is prohibited.

(11) Storage outside of buildings.

(a) Storage outside of buildings, for containers awaiting use, shall be located from the nearest building or group of buildings, in accordance with Table D-3:

TABLE D-3

Quantity of LP-gas stored:	Distance (feet)
500 lbs. or less	0
501 to 6,000 lbs.	10
6,001 to 10,000 lbs.	20
Over 10,000 lbs.	25

(b) Containers shall be in a suitable ventilated enclosure or otherwise protected against tampering, or possible damage by vehicular traffic.

(12) Fire protection. Storage locations shall be provided with at least one approved portable fire extinguisher having a rating of not less than 20-B:C.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

AMENDATORY SECTION (Amending WSR 95-17-036, filed 8/9/95, effective 9/25/95)

WAC 296-155-525 Cranes and derricks. (1) Definitions applicable to this part:

Accessory - a secondary part or assembly of parts which contributes to the overall function and usefulness of a machine.

Administrative or regulatory authority - a governmental agency, or the employer in the absence of governmental jurisdiction.

Angle indicator (boom) - an accessory which measures the angle of the boom to the horizontal.

Appointed - assigned specific responsibilities by the employer or the employer's representative.

Authorized person - means a person approved or assigned by the employer to perform a specific type of duty or duties or be at a specific location or locations at the workplace.

Auxiliary hoist - a secondary hoist rope system used either in conjunction with, or independently of, the main hoist system.

Axis of rotation - the vertical axis around which the crane superstructure rotates.

Axle - the shaft or spindle with which or about which a wheel rotates. On wheel-mounted cranes it refers to a type of axle assembly including housings, gearing, differential, bearings, and mounting appurtenances.

Axle (bogie) - two or more axles mounted in tandem in a frame so as to divide the load between the axles and permit vertical oscillation of the wheels.

Ballast - weight used to supplement the weight of the machine in providing stability for lifting working loads (the term ballast is normally associated with locomotive cranes).

Base, anchor bolt - a crane base that is bolted to a footing.

Base, expendable - for static-mounting cranes, a style of bottom mast section or member that is cast into a concrete

PROPOSED

footing block; all or part of this component is lost to future installations.

Base, fixed - a crane base that does not travel. It may be expendable, knee braced, or anchor bolted.

Base (mounting) - the traveling base on which the rotating superstructure of a locomotive or crawler crane is mounted.

Base, tower crane - the lowermost supporting component of the crane.

Base, travel - a crane base that is a ballasted platform mounted on trucks that ride along rails.

Boom (crane) - a member hinged at the rotating superstructure and used for supporting the existing tackle.

Boom angle - the angle above or below horizontal of the longitudinal axis of the base boom section.

Boom hoist mechanism - means for supporting the boom and controlling the boom angle.

Boom point - the outer extremity of the crane boom, containing the hoist sheave assembly.

Boom point sheave assembly - an assembly of sheaves and pin built as an integral part of the boom point.

Boom stop - a device used to limit the angle of the boom at the highest recommended position.

Brake - a device used for retarding or stopping motion.

Brace, tower - a structural attachment placed between a crane tower and an adjacent structure to pass loads to the adjacent structure and permit the crane to be erected to greater than free standing height.

Buffer - an energy absorbing device for reducing impact when a moving crane or trolley reaches the end of its permitted travel.

Cab - a housing which covers the rotating superstructure machinery, or the operator's or driver's station.

Climbing frame - a frame used with climbing cranes to transmit operational and climbing reactions to the host building frame.

Climbing ladder - a steel member with crossbars (used in parts) suspended from a climbing frame and used as jacking support points when some cranes climb.

Clutch - a means for engagement or disengagement of power.

Commercial truck vehicle - a commercial motor vehicle designed primarily for the transportation of property in connection with business and industry.

Counterweight - weight used to supplement the weight of the machine in providing stability for lifting working loads.

Counterweight jib - a horizontal member of a crane on which the counterweights and usually the hoisting machinery are mounted.

Crane carrier - the undercarriage of a wheel-mounted crane specifically designed for transporting the rotating crane superstructure. It may or may not provide its own travel mechanism. It is distinguished from a commercial truck vehicle in that it is not designed to transport personnel, materials, or equipment other than the crane-rotating superstructure.

Cross-over points - in multiple layer spooling of rope on a drum, those points of rope contact where the rope crosses the preceding rope layer.

Designated - selected or assigned by the employer or the employer's representative as being competent to perform specific duties.

Drum - the cylindrical member around which a rope is wound for lifting and lowering the load or boom.

Dynamic (loading) - loads introduced into the machine or its components due to accelerating or decelerating forces.

Flange point - a point of contact between rope and drum flange where the rope changes layers.

Free standing height - that height of a crane which is supported by the tower (mast) alone without assistance from braces, guys, or other means.

Gage, track - the horizontal distance between two rails measured perpendicular to the direction of travel.

Gantry (A-frame) - a structural frame, extending above the superstructure, to which the boom support ropes are reeved.

High strength (traction) bolts - high strength tensile bolts used in the assembly of crane sections. The bolts are installed in tension by torquing or other means at a level greater than that produced by in- or out-of-service loads for the purpose of reducing the likelihood of bolt fatigue failure.

Hoist mechanism - a hoist drum and rope reeving system used for lifting and lowering loads.

Jib - an extension attached to the boom point to provide added boom length for lifting specified loads. The jib may be in line with the boom or offset to various angles in the vertical plane of the boom.

Jib backstop - a device which will restrain the jib from turning over backward.

Job site - work area defined by the construction contract.

Limiting device - a mechanical device which is operated by some part of a power driven machine or equipment to control loads or motions of the machine or equipment.

Load (working) - the external load in pounds (kilograms) applied to the crane, including the weight of load-attaching equipment such as lower load block, shackles, and slings.

Load block, lower - the assembly of hook or shackle, swivel, sheaves, pins, and frame suspended by the hoisting ropes.

Load block, upper - the assembly of shackle, swivel, sheaves, pins, and frame suspended from the boom point.

Load ratings - crane ratings in pounds (kilograms) established by the manufacturer.

Mast (boom) - a frame hinged at or near the boom hinge for use in connection with supporting a boom. The head of the mast is usually supported and raised or lowered by the boom hoist ropes.

Mast (jib) - a frame hinged at or near the boom point for use in connection with supporting a jib.

Normal operating conditions.

Cab- or station-operated cranes - conditions during which a crane is performing functions within the manufac-

turer's operating recommendations. Under these conditions, the operator is at the operating control devices on the crane, and no other persons except those appointed are to be on the crane.

Ground- or floor-operated cranes - conditions during which a crane is performing functions within the manufacturer's operating recommendations. Under these conditions, the operator is at the operating control devices that are mounted to the crane but operated with the operator off the crane, and no other persons except those appointed are to be on the crane.

Remote-operated cranes - conditions during which a crane is performing functions within the manufacturer's operating recommendations. Under these conditions, the operator is at the operating control devices that are mounted to any part of the crane, and no other persons except those appointed are to be on the crane.

Out-of-service - the condition of a crane when unloaded, without power and with the controls unattended and prepared to endure winds above the in-service level.

Outriggers - extendable or fixed members attached to the mounting base, which rest on supports at the outer ends used to support the crane.

Pawl (dog) - a device for positively holding a member against motion in one or more directions.

Payload - that load or loads being transported by the commercial truck chassis from place to place.

Pendant - a rope or strand of specified length with fixed end connections.

Pitch diameter - the diameter of a sheave or rope drum measured at the center line of the rope.

Power-controlled lowering - a system or device in the power train, other than the load hoist brake, which can control the lowering rate of speed of the load hoist mechanism.

Qualified person - a person who, by possession of a recognized degree or certificate of professional standing, or who, by extensive knowledge, training, and experience, has successfully demonstrated the ability to solve or resolve problems relating to the subject matter and work.

Radius (load) - the horizontal distance from a projection of the axis of rotation to the base of the crane, before loading, to the center of the vertical hoist line or tackle with load applied.

Rail clamp - a tong-like metal device mounted on a locomotive crane car, which can be connected to the track.

Reeving - a rope system in which the rope travels around drums and sheaves.

Remote control station - a location, not on the crane, from which the operator can control all the crane movements.

Repetitive pickup point - when operating on a short cycle operation, the rope being used on a single layer and being spooled repetitively over a short portion of the drum.

Rope - refers to wire rope unless otherwise specified.

Rotation resistant rope - a wire rope consisting of an inner layer of strand laid in one direction covered by a layer of strand laid in the opposite direction. This has the effect of counteracting torque by reducing the tendency of the finished rope to rotate.

Running rope - a rope which travels around sheaves or drums.

Shall - this word indicates that the rule is mandatory and must be followed.

Service, light - service that involves irregular operation with loads generally about one-half or less of the rated load; a service crane at a storage yard or building site would be an example.

Service, normal - service that involves operating occasionally at rated load but normally at less than eighty-five percent of the rated load and not more than ten lift cycles per hour except for isolated instances; a crane used for concrete placement at a building site would be an example.

Service, heavy - service that involves operating at eighty-five percent to one hundred percent of the rated load or in excess of ten lift cycles per hour as a regular specified procedure; some cranes operating at material yards or in industrial applications may fall into this category.

Sheave - a grooved wheel or pulley used with a rope to change the direction and point of application of a pulling force.

Should - this word indicates that the rule is a recommendation, the advisability of which depends on the facts in each situation.

Side loading - a load applied to an angle to the vertical plane of the boom.

Stabilizer - stabilizers are extendable or fixed members attached to the mounting base to increase the stability of the crane, but which may not have the capability of relieving all of the weight from wheels or tracks.

Standby crane - a crane which is not in regular service but which is used occasionally or intermittently as required.

Standing (guy) rope - a supporting rope which maintains a constant distance between the points of attachment to the two components connected by the rope.

Structural competence - the ability of the machine and its components to withstand the stresses imposed by applied loads.

Superstructure - the rotating upper frame structure of the machine and the operating machinery mounted thereon.

Swing - rotation of the superstructure for movement of loads in a horizontal direction about the axis of rotation.

Swing mechanism - the machinery involved in providing rotation of the superstructure.

Swivel - a load carrying member with thrust bearings to permit rotation under load in a plane perpendicular to the direction of the load.

Swiveling - the rotation of the load attachment portion (hook or shackle) of a load block (lower) or hook assembly about its axis of suspension in relation to the load line(s).

Tackle - an assembly of ropes and sheaves arranged for lifting, lowering, or pulling.

Telescoping boom - consists of a base boom from which one or more boom sections are telescoped for additional length.

Telescoping (tower crane) - a process whereby the height of a traveling or fixed base crane is increased typically by raising the inner tower and then adding sections at the top

of the outer tower; there are also cranes that are telescoped by adding to the inner tower from below.

Tower (mast) - a vertical structural frame consisting of columns and bracing capable of supporting an upperstructure with its working and dynamic loads and transmitting them to the supporting surface or structure.

Traction (high strength) bolts - see high strength bolts.

Transit - the moving or transporting of a crane from one job site to another.

Travel - the function of the machine moving under its own power from one location to another on a job site.

Trolley - the device that travels along the load jib and contains the upper load block.

Two-blocking - the condition in which the lower load block or hook assembly comes in contact with the upper load block or boom point sheave assembly.

Weathervaning - wind induced rotation of a crane upperstructure, when out-of-service, to expose minimal surface area to the wind.

Wedge - a tapered wood or steel device used to provide stability to cranes during use as a climber. When the wedges are tightened against the four main legs of the tower, they convert overturning moments into horizontal forces to be resisted by the floor framing or slab.

Wheel base - the distance between centers of front and rear axles. For a multiple axle assembly the axle center for wheel base measurement is taken as the midpoint of the assembly.

Whipline (runner or auxiliary) - a secondary rope system usually of lighter load capacity than that provided by the main rope system.

Winch head - a power driven spool for handling of loads by means of friction between fiber or wire rope and the spool.

(2) General requirements.

(a) The employer shall comply with the manufacturer's specifications and limitations applicable to the operation of any and all cranes and derricks. Where manufacturer's specifications are not available the limitations assigned to the equipment shall be based on the determinations of a qualified engineer, competent in this field and such determinations will be appropriately documented and recorded. Attachments used with cranes shall not exceed the capacity, rating, or scope recommended by the manufacturer.

(b) Rated load capacities, and recommended operating speeds, and special hazard warnings, or instruction, shall be conspicuously posted on all equipment. Instructions or warnings shall be visible to the operator while at the control station.

(c) Hand signals to crane and derrick operators shall be those prescribed by the applicable ANSI standard for the type of crane in use. An illustration of the signals shall be posted at the job site.

(d) The employer shall designate a competent person who shall inspect all machinery and equipment prior to each use, and periodically during use to make sure it is in safe operating condition. Any deficiencies shall be repaired, or defective parts replaced, before continued use.

(e) A thorough, annual inspection of the hoisting machinery shall be made by a competent person, or by a government or private agency recognized by the department. The employer shall maintain a permanent record of the dates and results of all inspections for each hoisting machine and piece of equipment.

(f) A tag line or guide rope shall be used on all loads that swing freely. Guide ropes or tag lines shall be held by experienced persons.

(g) Care shall be taken to guard against injury to workers, or damage to scaffolds or buildings, from swinging loads.

(h) The operator shall avoid carrying loads over people.

(i) When work is stopped or when the derrick is not in operation, the boom shall be lowered to a horizontal position or tied in place to prevent it whipping with the wind or other external force.

(j) Only authorized personnel shall make sling hitches on loads.

(k) Workers shall not be allowed to ride on loads handled by derricks.

(l) Operators shall observe signals only from duly authorized persons. Under no circumstances shall a load be moved until the signal is received from authorized personnel.

(m) Belts, gears, shafts, pulleys, sprockets, spindles, drums, fly wheels, chains, or other reciprocating, rotating, or other moving parts or equipment shall be guarded if such parts are exposed to contact by employees, or otherwise create a hazard. Guarding shall meet the requirements of chapter 296-24 WAC.

(n) A minimum distance of thirty inches clearance shall be maintained between the swing radius of the greatest extension of the crane superstructure or counterweights and a stationary object, including the crane itself, while the crane is in operation. When this clearance cannot be maintained, suitable barricades or safeguards shall be used to isolate the pinch point hazard area.

(o) All exhaust pipes shall be guarded or insulated where contact by employees, in the performance of normal duties, is possible.

(3) Additional requirements.

(a) Whenever internal combustion engine powered equipment exhausts in enclosed spaces, tests shall be made and recorded to see that employees are not exposed to unsafe concentrations of toxic gases or oxygen deficient atmospheres. (See chapter 296-62 WAC, the general occupational health standards and other applicable standards.)

(b) All cab glazing shall be safety glazing material. Windows shall be provided in the front and on both sides of the cab or operator's compartment with visibility forward and to either side. Visibility forward shall include a vertical range adequate to cover the boom point at all times. The front window may have a section which can be readily removed or held open, if desired. If the section is of the type held in the open position, it shall be secured to prevent inadvertent closure. A windshield wiper should be provided on the front window.

(c)(i) Where necessary for rigging or service requirements, a ladder or steps shall be provided to give access to a cab roof.

(ii) On cranes, guardrails, handholds and steps shall be provided for easy access to the car and cab in accordance with chapter 296-155 WAC, Part C-1 and Part J.

(iii) Platforms and walkways shall have anti-skid surfaces.

(d) Fuel tank filler pipe shall be located in such a position, or protected in such manner, as to not allow spill or overflow to run onto the engine, exhaust, or electrical equipment of any machine being fueled.

(i) An accessible fire extinguisher of 5BC rating, or higher, shall be available at all operator stations or cabs of equipment.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(ii) All fuels shall be transported, stored, and handled to meet the rules of Part D of this chapter. When fuel is transported by vehicles on public highways, department of transportation rules concerning such vehicular transportation are considered applicable.

(e) Except where electrical distribution and transmission lines have been deenergized and visibly grounded at point of work or where insulating barriers, not a part of or an attachment to the equipment or machinery, have been erected to prevent physical contact with the lines, equipment or machines shall be operated proximate to power lines only in accordance with the following:

(i) For lines rated 50 kV. or below, minimum clearance between the lines and any part of the crane or load shall be 10 feet;

(ii) For lines rated over 50 kV., minimum clearance between the lines and any part of the crane or load shall be 10 feet plus 0.4 inch for each 1 kV. over 50 kV., or twice the length of the line insulator, but never less than 10 feet;

(iii) In transit with no load and boom lowered, the equipment clearance shall be a minimum of 4 feet for voltages less than 50 kV., and 10 feet for voltages over 50 kV. up to and including 345 kV., and 16 feet for voltages up to and including 750 kV.;

(iv) A person shall be designated to observe clearance of the equipment and give timely warning to insure that the required separation is maintained for all operations where it is difficult for the operator to maintain the desired clearance by visual means;

(v) Cage-type boom guards, insulating links, or proximity warning devices may be used on cranes, but the use of such devices shall not alter the requirements of any other regulation of this part even if such device is required by law or regulation;

(vi) Any overhead wire shall be considered to be an energized line unless and until the person owning such line or the electrical utility authorities indicate that it is not an energized line and it has been visibly grounded;

(vii) Prior to work near transmitter tower where an electrical charge can be induced in the equipment or materials being handled, the transmitter shall be deenergized or tests shall be made to determine if electrical charge is induced on the crane.

(f) The following precautions shall be taken when necessary to dissipate induced voltage:

(i) The equipment shall be provided with an electrical ground directly to the upper rotating structure supporting the boom; and

(ii) Ground jumper cables shall be attached to materials being handled by boom equipment when electrical charge is induced while working near energized transmitters. Crews shall be provided with nonconductive poles having large alligator clips or other similar protection to attach the ground cable to the load.

(iii) Combustible and flammable materials shall be removed from the immediate area prior to operations.

(g) No modifications or additions which affect the capacity or safe operation of the equipment shall be made by the employer without the manufacturer's or a qualified engineer's written approval. If such modifications or changes are made, the capacity, operation, and maintenance instruction plates, tags, or decals, shall be changed accordingly. In no case shall the original safety factor of the equipment be reduced.

(h) The employer shall comply with Power Crane and Shovel Association, Mobile Hydraulic Crane Standard No. 2.

(i) Sideboom cranes mounted on wheel or crawler tractors shall meet the requirements of SAE J743a-1964.

(4) Crawler, locomotive, and truck cranes.

(a) All jibs shall have positive stops to prevent their movement of more than 5° above the straight line of the jib and boom on conventional type crane booms. The use of cable type belly slings does not constitute compliance with this standard.

(b) All crawler, truck or locomotive cranes in use shall meet the applicable requirements for design, inspection, construction, testing, maintenance and operation as prescribed in the ANSI B30.5-1989, Safety Code for Crawler, Locomotive and Truck Cranes.

(5) Tower cranes.

(a) Tower cranes shall be erected, jumped and dismantled under the immediate supervision of a competent person, designated by the employer.

(b) Tower cranes shall be erected, maintained and used in accordance with the manufacturer's specifications, recommendations and procedures. All modifications shall be approved by the manufacturer and engineered by a professional engineer. The safety factors shall not be reduced by any modifications. The crane plates and charts shall be changed to reflect any modifications made.

(c) A professional engineer shall certify that the crane foundations and underlying soil are adequate support for the tower crane with its maximum overturning movement.

(d) Tower cranes shall be positioned whereby they can swing 360° without either the counterweight or jib striking any building, structure or other object, except:

(i) If the crane can strike an object or another crane, suitable limit switches shall be installed which will prohibit contact with such objects, or;

(ii) Direct voice communications shall be established between any operator of the tower crane(s) involved and a signalperson so stationed where the boom and/or counterweight movement, and the object with which it may contact can be observed so that the operator(s) can be warned of imminent danger.

(iii) A secondary means of positive communications shall be established as a back-up for possible direct voice communication failure.

(iv) Radio communication systems without tone coded squelch are prohibited. Citizens band radios shall not be used as a means of communications for tower cranes.

(e) Prior to installing a climbing tower crane within an existing building or new construction, a structural engineer shall certify that the building is designed to withstand the torque and floor loading created by the crane to be installed.

(f) Tower cranes erected on a new foundation shall be tested in accordance with ANSI B30.3-1990 Chapter 3-1.

(i) The test shall consist of suspending a load of not less than 110% of the rated capacity for 15 minutes. The load shall be suspended from the furthest point of the length of boom (jib) to be used. The results of this test shall be within the manufacturer's recommendations and/or specifications.

(ii) A record of each test shall be made and signed by the person responsible for conducting the test. Such records shall be maintained on the construction site for the duration of the construction work for which it was erected and subsequently made a part of the firm's permanent equipment records. Records shall be made available to authorized representatives of the department, upon request.

(g) A capacity chart shall be furnished by each crane manufacturer which shall include a full and complete range of crane load ratings at all stated operating radii for each allowable speed and each recommended counterweight load.

(i) Such chart shall be posted in the operator's cab or at the remote control stand in use. In lieu of the chart at the remote control stand, a minimum of two weight capacity signs shall be affixed to the jib or boom.

(ii) The chart shall be visible and readable to the operator while at the normal operating position.

(h) Operating controls shall be properly marked to indicate the function of the controls in each position.

(i) An operating and maintenance manual written in the English language shall be provided with each tower crane.

(j) Limit switches shall be installed and shall be kept properly adjusted. They shall be protected or isolated in a manner which will prevent unauthorized tampering. Limit switches shall provide the following functions:

(i) Safely limit the travel of the trolley to prevent it from hitting the outer end of the jib.

(ii) Limit the upward travel of the load block to prevent two-blocking.

(iii) Lower over travel limiting devices shall be provided for all load hoists where the hook area is not visible to the operator.

(iv) Limit the load being lifted in a manner whereby no more than 110% of the maximum rated load can be lifted or moved.

(k) The crane shall not be used to pull vehicles of any type, remove piling, loosen form work, pull away loads which are attached to the ground or walls, or for any operation other than the proper handling of freely suspended loads.

(l) When the operator may be exposed to the hazard of falling objects, the tower crane cab and/or remote control station shall have adequate overhead protection.

(m) The operator shall be protected from the weather. If enclosed cabs are provided they shall provide clear visibility in all directions and glass shall be approved safety glass or the equivalent.

(n) An approved and safe means shall be provided for access to operator's cab and machinery platform.

(o) When necessary for inspection or maintenance purposes, ladders, walkways with railing or other devices shall be provided.

(p) Each tower crane shall be provided with a slewing brake capable of preventing the jib or boom from rotating in either direction and stopping the rotation of the jib or boom while loaded, when desired. Such brake shall have a holding device which, when set, will hold the jib or boom in a fixed location without additional attention of the operator. When the crane is out of operation, the jib or boom shall be pointed downwind and the slewing brake shall be released so as to permit the jib or boom to weathervane, providing the jib or boom has a clear 360 degree rotation. Where a 360 degree rotation is not provided, the jib or boom shall be pointed downwind from the prevailing wind and the slewing brake set.

(q) Each tower crane shall be provided with a braking system on the trolley capable of stopping and holding the trolley in any desired position while carrying a maximum load. This brake shall be capable of being locked in a fixed location without additional attention of the operator. An automatic brake or device shall be installed which will immediately stop and lock the trolley in position in the event of a breakage of the trolley rope.

(r) All electrical equipment shall be properly grounded and protection shall be provided against lightning.

(s) When the operator is actually operating the crane, the operator shall remain in a stationary position.

(t) All crane brakes shall automatically set in event of power failure. Swing brakes shall also function in this manner or be capable of being set manually.

(u) Climbing jack systems used for raising a tower crane shall be equipped with over-pressure relief valves, direct-reading pressure gauges, and pilot-operated hydraulic check valves installed in a manner which will prevent jack from retracting should a hydraulic line or fitting rupture or fail.

(v) During periods of high winds or weather affecting visibility, i.e., fog, etc., only loads shall be handled that are consistent with good safety practices. Good safety practices shall be mutually agreed upon by the operator and the person in charge of the construction job, with due consideration given to manufacturer's specifications and recommendations.

(w) Counterweights shall be securely fastened in place and shall not exceed the weight as recommended by the manufacturer for the length of jib being used. However, an amount of counterweight as recommended by the manufacturer shall be used.

(x) Tower cranes shall be inspected and maintained in accordance with the manufacturer's recommendations or more frequently if there is reason to suspect a possible defect or weakening of any portion of the structure or equipment.

(y) Guy wires, wedges, braces or other supports shall be inspected at the beginning and at midpoint of each working shift to ascertain that they are functioning as intended.

(6) Additional tower crane requirements.

(a) An approved method shall be instituted for transmitting signals to the operator. Standard hand signals for crane operations shall be used, whenever possible; however, if conditions are such that hand signals are ineffective, radio-controlled or electric-whistle signal or two-way voice communication shall be used. (See WAC 296-155-525 (4)(d).)

(b) Tower cranes shall not be erected or raised when the wind velocity at the worksite exceeds 20 m.p.h. or that specified by the manufacturer.

(c) Tower crane operators shall be trained and experienced in tower crane operations; however, for gaining experience, persons may operate the tower crane if under the immediate supervision of an experienced operator.

(d) Adequate clearance shall be maintained between moving and rotating structures of the crane and fixed objects to allow the passage of employees without harm.

(e) Employees required to perform duties on the horizontal boom of hammerhead tower cranes shall be protected against falling by guardrails or by a full body harness and lanyards attached to crane or to lifelines in conformance with Part C-1 of this chapter.

(f) Buffers shall be provided at both ends of travel of the trolley.

(g) Cranes mounted on rail tracks shall be equipped with limit switches limiting the travel of the crane on the track and stops or buffers at each end of the tracks.

(h) All hammerhead tower cranes in use shall meet the applicable requirements for design, construction, installation, testing, maintenance, inspection, and operation as prescribed by the manufacturer.

(i) Access ladders inside the telescoping sections of tower cranes are exempt from those sections of the safety standards pertaining to cleat length and cleat spacing, but shall conform to manufacturer's recommendations and specifications.

(7) Overhead and gantry cranes.

(a) The rated load of the crane shall be plainly marked on each side of the crane, and if the crane has more than one hoisting unit, each hoist shall have its rated load marked on it or its load block, and this marking shall be clearly legible from the ground or floor.

(b) Bridge trucks shall be equipped with sweeps which extend below the top of the rail and project in front of the truck wheels.

(c) Except for floor-operated cranes, a gong or other effective audible warning signal shall be provided for each crane equipped with a power traveling mechanism.

(d) All overhead and gantry cranes in use shall meet the applicable requirements for design, construction, installation, testing, maintenance, inspection, and operation as prescribed in ANSI B30.2.0-1990, Safety Code for Overhead and Gantry Cranes.

(8) Derricks. All derricks in use shall meet the applicable requirements for design, construction, installation, inspection, testing, maintenance, and operation as prescribed in American National Standard Institute B30.6-1990, Safety Code for Derricks.

(9) Floating cranes and derricks.

(a) Mobile cranes mounted on barges.

(i) When a mobile crane is mounted on a barge, the rated load of the crane shall not exceed the original capacity specified by the manufacturer.

(ii) A load rating chart, with clearly legible letters and figures, shall be provided with each crane, and securely fixed at a location easily visible to the operator.

(iii) When load ratings are reduced to stay within the limits for list of the barge with a crane mounted on it, a new load rating chart shall be provided.

(iv) Mobile cranes on barges shall be positively secured.

(b) Permanently mounted floating cranes and derricks.

(i) When cranes and derricks are permanently installed on a barge, the capacity and limitations of use shall be based on competent design criteria.

(ii) A load rating chart with clearly legible letters and figures shall be provided and securely fixed at a location easily visible to the operator.

(iii) Floating cranes and floating derricks in use shall meet the applicable requirements for design, construction, installation, testing, maintenance, and operation as prescribed by the manufacturer.

(c) Protection of employees working on barges. The employer shall comply with the applicable requirements for protection of employees as specified in WAC 296-155-630.

(10) Mobile cranes and excavation machines.

(a) In all power driven shovel operations the person in charge shall issue instructions necessary to prevent accidents, to detect and correct unsafe acts and dangerous conditions, and to enforce all safety rules and regulations.

The person in charge shall also issue instructions on the proper method of using tools and handling material.

(b) Where the ground is soft or uneven, timbering and planking shall be used to provide firm foundation and distribute the load.

(c) In case of a breakdown, the shovel shall be moved away from the foot of the slope before repairs are made.

(d) All persons shall keep away from the range of the shovel's swing and shall not be permitted to stand back of the shovel or in line with the swing of the dipper during operation or moving of shovel.

(e) Unauthorized persons shall not be allowed on the shovel during operations, and the operator shall not converse with other persons while operating machine.

(f) The shovel dipper shall rest on the ground or on blocking during shut down periods.

(g) Shovels shall be inspected daily and all defects promptly repaired.

(h) All rubber tired mobile cranes shall be equipped with outriggers and sufficient blocking to properly stabilize crane while operating.

(i) Rubber tired mobile cranes shall be equipped with rear view mirrors.

(j) Positive boom stops shall be provided on all mobile cranes of the wheel and crawler type.

(k) Length of a crane boom and amount of counterweight shall not exceed manufacturer's rated capacity for equipment involved; except on isolated cases where permission is granted by the department.

(l) On all cranes where wedge beackets are used as terminal connections, the proper size wedge shall be used.

(m) On all mobile cranes, the hoist and boom drums shall be provided with a positive operated pawl or dog which shall be used in addition to the brake to hold the load and boom when they are suspended. Counterweight operated dogs are prohibited.

(n) Oiling and greasing shall be done under safe conditions with machine at rest, except when motion of machine is necessary.

(o) All steps, running boards, and boom ladder shall be of substantial construction and in good repair at all times.

(p) Operators shall not leave the cab while master clutch is engaged.

(q) Fire extinguishers shall be readily accessible and within reach of operator at all times.

(r) All shovel and crane cabs shall be kept clean and free of excess oil and grease on floor and machinery. Oily and greasy rags shall be disposed of immediately after use and not allowed to accumulate.

(s) Tools shall not be left on the cab floor. Spare cans of oil or fuel, and spare parts, shall not be stored in cabs, except in approved racks provided for that purpose.

(t) Mats or planking shall be used in moving shovels or cranes over soft or uneven ground.

(u) Cranes or shovels setting on steep grades shall be securely blocked or secured with a tail hold.

(v) Smoking shall be prohibited while fueling or oiling machines.

(w) Gasoline powered motors shall be stopped during refueling.

(x) Handling of movable feed line (bologna) shall be accomplished with insulated hooks and lineman's rubber gloves.

(y) Where cables cross roads they shall be elevated or placed in a trench.

(z) On all power shovels, including back-hoe types, of one-half cubic yard capacity or over, and on all dragline cranes or all-purpose cranes of the crawler or wheel type, two persons shall constitute the minimum working crew. It is mandatory that one be a qualified operator of the equipment in use. The job title of the other crew member may be oiler, rigger, signal person, or a laborer. The primary purpose of the second crew member is to signal the operator when the operator's vision is impaired or obscured and to be on-hand in case of emergency.

(i) Second-crew persons shall be properly trained in their second-person required skills.

(ii) The second crew member shall be close enough to the machine in operation to be aware of any emergency, if one arises, and to assure the machine is operated with necessary and appropriate signals to the operator.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-155-575 Helicopters and helicopter cranes. (1) Helicopter regulations. Helicopter cranes shall be expected to comply with any applicable regulations of the Federal Aviation Administration.

(2) Briefing. Prior to each day's operation a briefing shall be conducted. This briefing shall set forth the plan of operation for the pilot and ground personnel.

(3) Slings and tag lines. Load shall be properly slung. Tag lines shall be of a length that will not permit their being drawn up into rotors. Pressed sleeve, swaged eyes, or equivalent means shall be used for all freely suspended loads to prevent hand splices from spinning open or cable clamps from loosening.

(4) Cargo hooks. All electrically operated cargo hooks shall have the electrical activating device so designed and installed as to prevent inadvertent operation. In addition, these cargo hooks shall be equipped with an emergency mechanical control for releasing the load. The hooks shall be tested prior to each day's operation to determine that the release functions properly, both electrically and mechanically.

(5) Personal protective equipment.

(a) Personal protective equipment for employees receiving the load shall consist of complete eye protection and hard hats secured by chinstraps.

(b) Loose-fitting clothing likely to flap in the downwash, and thus be snagged on hoist line, shall not be worn.

(6) Loose gear and objects. Every practical precaution shall be taken to provide for the protection of the employees from flying objects in the rotor downwash. All loose gear within 100 feet of the place of lifting the load, depositing the load, and all other areas susceptible to rotor downwash shall be secured or removed.

(7) Housekeeping. Good housekeeping shall be maintained in all helicopter loading and unloading areas.

(8) Operator responsibility. The helicopter operator shall be responsible for size, weight, and manner in which loads are connected to the helicopter. If, for any reason, the helicopter operator believes the lift cannot be made safely, the lift shall not be made.

(9) Hooking and unhooking loads. Employees shall not perform work under hovering craft except for that limited period of time necessary to guide, secure and unhook loads, or to hook loads. Regardless of whether the hooking or unhooking of a load takes place on the ground or a flat roof, or other location in an elevated work position in structural members, a safe means of access and egress, to include an unprogrammed emergency escape route or routes, shall be provided for the employees who are hooking or unhooking loads.

(10) Static charge. Static charge on the suspended load shall be dissipated with a grounding device before ground personnel touch the suspended load, or protective rubber gloves shall be worn by all ground personnel touching the suspended load.

(11) Weight limitation. The weight of an external load shall not exceed the manufacturer's rating.

(12) Ground lines. Hoist wires or other gear, except for pulling lines or conductors that are allowed to "pay out" from a container or roll off a reel, shall not be attached to any fixed ground structure, or allowed to foul on any fixed structure.

(13) Visibility. When visibility is reduced by dust or other conditions, ground personnel shall exercise special caution to keep clear of main and stabilizing rotors. Precautions

shall also be taken by the employer to eliminate as far as practical reduced visibility.

(14) Signal systems. Signal systems between aircrew and ground personnel shall be understood and checked in advance of hoisting the load. This applies to either radio or hand signal systems. Hand signals shall be as shown in Figure L-1.

(15) Approach distance. No unauthorized person shall be allowed to approach within 50 feet of the helicopter when the rotor blades are turning.

(16) Approaching helicopter. Whenever approaching or leaving a helicopter with blades rotating, all employees shall remain in full view of the pilot and keep in a crouched position. Employees shall avoid the area from the cockpit or cabin rearward unless authorized by the helicopter operator to work there.

(17) Personnel. Sufficient ground personnel shall be provided when required for safe helicopter loading and unloading operations.

(18) Communications. There shall be constant reliable communication between the pilot, and a designated employee of the ground crew who acts as a signalperson during the period of loading and unloading. This signalperson shall be distinctly recognizable from other ground personnel.

(19) Fires. Open fires shall not be permitted in an area that could result in such fires being spread by the rotor downwash.

(20) Refueling operations.

(a) Under no circumstances shall the refueling of any type helicopter with either aviation gasoline or Jet B (turbine-kerosene) type fuel be permitted while the engines are running.

(b) No unauthorized persons shall be allowed within fifty feet of the refueling operation or fueling equipment.

(c) A minimum of one thirty-pound fire extinguisher, or a combination of same, good for Class A, B and C fires, shall be provided within one hundred feet on the upwind side of the refueling operation.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(d) All fueling personnel shall be thoroughly trained in the refueling operation and in the use of available fire extinguishing equipment.

(e) There shall be no smoking, open flames, exposed flame heaters, flare pots or open flame lights for spark producing agents within fifty feet of the refueling area or fueling equipment. All entrances to the refueling area shall be posted with "NO SMOKING" signs.

(f) Due to the numerous causes of static electricity, it should be considered present at all times. Prior to starting refueling operations, the fueling equipment and the helicopter shall be grounded and the fueling nozzle shall be electrically bonded to the helicopter.

(i) Conductive hose shall not be used to accomplish the bonding.

(ii) All grounding and bonding connections shall be electrically and mechanically firm, to clean unpainted metal parts.

(g) To control spills:

(i) Fuel shall be pumped either by hand or power.

(ii) Pouring or gravity flow shall not be permitted.

(iii) Selfclosing nozzles shall not be dragged on the ground.

(h) In case of a spill, the fueling operation shall be immediately stopped until such time as the person in charge determines that it is safe to resume the refueling operation.

(i) When ambient temperatures have been in the one hundred degree F range for an extended period of time, all refueling of helicopters with the engines running shall be suspended until such time as conditions become suitable to resume refueling with the engines running.

(21) Hook on persons shall wear contrasting colored hard hats, with chinstraps, and high visibility vests or outer garments to enable the helicopter operator to readily identify their locations.

(22) Riding the load or hook of a helicopter is prohibited except in the case of emergency and then only with the proper safety gear.

AMENDATORY SECTION (Amending WSR 99-10-071, filed 5/4/99, effective 9/1/99)

WAC 296-155-730 Tunnels and shafts. (1) Scope and application.

(a) This section applies to the construction of underground tunnels, shafts, chambers, and passageways. This section also applies to cut-and-cover excavations which are both physically connected to ongoing underground construction operations within the scope of this section, and covered in such a manner as to create conditions characteristic of underground construction.

(b) This section does not apply to excavation and trenching operations covered by Part N of this chapter, such as foundation operations for above-ground structures that are not physically connected to underground construction operations, and surface excavation.

(c) The employer shall comply with the requirements of this part and chapter in addition to applicable requirements of chapter 296-36 WAC, Safety standards—Compressed air work.

(2) Access and egress.

(a) Each operation shall have a check-in/check-out system that will provide positive identification of every employee underground. An accurate record of identification and location of the employees shall be kept on the surface. This procedure is not required when the construction of underground facilities designed for human occupancy has been sufficiently completed so that the permanent environmental controls are effective, and when the remaining construction activity will not cause any environmental hazard, or structural failure within the facilities.

(b) The employer shall provide and maintain safe means of access and egress to all work stations.

(c) The employer shall provide access and egress in such a manner that employees are protected from being struck by excavators, haulage machines, trains, and other mobile equipment.

(d) The employer shall control access to all openings to prevent unauthorized entry underground. Unused chutes,

PROPOSED

manways, or other openings shall be tightly covered, bulk-headed, or fenced off, and shall be posted with warning signs indicating "keep out" or similar language. Completed or unused sections of the underground facility shall be barricaded.

(3) Safety instruction. All employees shall be instructed in the recognition and avoidance of hazards associated with underground construction activities including, where appropriate, the following subjects:

- (a) Air monitoring;
- (b) Ventilation;
- (c) Confined space entry procedures;
- (d) Permit-required confined space entry procedures;
- (e) Illumination;
- (f) Communications;
- (g) Flood control;
- (h) Mechanical equipment;
- (i) Personal protective equipment;
- (j) Explosives;
- (k) Fire prevention and protection; and
- (l) Emergency procedures, including evacuation plans and check-in/check-out systems.

(4) Notification.

(a) Oncoming shifts shall be informed of any hazardous occurrences or conditions that have affected, or might affect employee safety, including liberation of gas, equipment failures, earth or rock slides, cave-ins, floodings, fire(s), or explosions.

(b) Information specified in (a) of this subsection shall be recorded in a shift journal which shall be current prior to the end of each shift, and shall be located aboveground.

(c) Oncoming supervisory personnel shall read the notification prior to going underground, and shall signify their understanding of the contents by affixing their respective initials to the log.

(d) The hazard notification log shall be retained on the site until the completion of the project.

(e) The employer shall establish and maintain direct communications for coordination of activities with other employers whose operations at the jobsite affect or may affect the safety of employees underground.

(5) Communications.

(a) When natural unassisted voice communication is ineffective, a power-assisted means of voice communication shall be used to provide communication between the work face, the bottom of the shaft, and the surface.

(b) Two effective means of communication, at least one of which shall be voice communication, shall be provided in all shafts which are being developed or used either for personnel access or for hoisting. Additional requirements for hoist operator communication are contained in subsection (22)(c)(xv) of this section.

(c) Powered communication systems shall operate on an independent power supply, and shall be installed so that the use of or disruption of any one phone or signal location will not disrupt the operation of the system from any other location.

(d) Communication systems shall be tested upon initial entry of each shift to the underground, and as often as necessary at later times, to ensure that they are in working order.

(e) Any employee working alone underground in a hazardous location, who is both out of the range of natural unassisted voice communication and not under observation by other persons, shall be provided with an effective means of obtaining assistance in an emergency.

(6) Emergency provisions. Hoisting capability. When a shaft is used as a means of egress, the employer shall make advance arrangements for power-assisted hoisting capability to be readily available in an emergency, unless the regular hoisting means can continue to function in the event of an electrical power failure at the jobsite. Such hoisting means shall be designed so that the load hoist drum is powered in both directions of rotation and so that the brake is automatically applied upon power release or failure.

(7) Self-rescuers. The employer must provide self-rescuers certified by the National Institute for Occupational Safety and Health under 42 CFR part 84. The respirators must be immediately available to all employees at work stations in underground areas where employees might be trapped by smoke or gas. The selection, issuance, use, and care of respirators must be in accordance with the requirements of chapter 296-62 WAC, Part E.

(8) Designated person. At least one designated person shall be on duty aboveground whenever any employee is working underground. This designated person shall be responsible for securing immediate aid and keeping an accurate record of the number, identification, and location of employees who are underground in case of emergency. The designated person must not be so busy with other responsibilities that the personnel counting and identification function is encumbered.

(9) Emergency lighting. Each employee underground shall have an acceptable portable hand lamp or cap lamp in his or her work area for emergency use, unless natural light or an emergency lighting system provides adequate illumination for escape.

(10) Rescue teams.

(a) On jobsites where 25 or more employees work underground at one time, the employer shall provide (or make arrangements in advance with locally available rescue services to provide) at least two 5-person rescue teams, one on the jobsite or within one-half hour travel time from the entry point, and the other within 2 hours travel time.

(b) On jobsites where less than 25 employees work underground at one time, the employer shall provide (or make arrangements in advance with locally available rescue services to provide) at least one 5-person rescue team to be either on the jobsite or within one-half hour travel time from the entry point.

(c) Rescue team members shall be qualified in rescue procedures, the use and limitations of breathing apparatus, and the use of fire fighting equipment. Qualifications shall be reviewed not less than annually.

(d) On jobsites where flammable or noxious gases are encountered or anticipated in hazardous quantities, rescue team members shall practice donning and using pressure demand mode, self-contained breathing apparatuses monthly.

(e) The employer shall ensure that rescue teams are familiar with conditions at the jobsite.

(11) Hazardous classifications.

(a) Potentially gassy operations. Underground construction operations shall be classified as potentially gassy if either:

(i) Air monitoring discloses 10 percent or more of the lower explosive limit for methane or other flammable gases measured at 12 inches (304.8 mm) +/- 0.25 inch (6.35 mm) from the roof, face, floor, or walls in any underground work area for more than a 24-hour period; or

(ii) The history of the geographical area or geological formation indicates that 10 percent or more of the lower explosive limit for methane or other flammable gases is likely to be encountered in such underground operations.

(b) Gassy operations. Underground construction operations shall be classified as gassy if:

(i) Air monitoring discloses 10 percent or more of the lower explosive limit for methane or other flammable gases measured at 12 inches (304.8 mm) +/- 0.25 inch (6.35 mm) from the roof, face, floor, or walls in any underground work area for three consecutive days; or

(ii) There has been an ignition of methane or of other flammable gases emanating from the strata that indicates the presence of such gases; or

(iii) The underground construction operation is both connected to an underground work area which is currently classified as gassy and is also subject to a continuous course of air containing the flammable gas concentration.

(c) Declassification to potentially gassy operations. Underground construction gassy operations may be declassified to potentially gassy when air monitoring results remain under 10 percent of the lower explosive limit for methane or other flammable gases for three consecutive days.

(12) Gassy operations—Additional requirements. Only acceptable equipment, maintained in suitable condition, shall be used in gassy operations.

(a) Mobile diesel-powered equipment used in gassy operations shall be either approved in accordance with the requirements of 30 CFR Part 36 (formerly Schedule 31) by MSHA, or shall be demonstrated by the employer to be fully equivalent to such MSHA-approved equipment, and shall be operated in accordance with that part.

(b) Each entrance to a gassy operation shall be prominently posted with signs notifying all entrants of the gassy classification.

(c) Smoking shall be prohibited in all gassy operations and the employer shall be responsible for collecting all personal sources of ignition, such as matches and lighters, from all persons entering a gassy operation.

(d) A fire watch as described in chapter 296-155 WAC, Part H, shall be maintained when hot work is performed.

(e) Once an operation has met the criteria in subsection (11)(a)(i) of this section, warranting classification as gassy, all operations in the affected area, except the following, shall be discontinued until the operation either is in compliance with all of the gassy operation requirements or has been declassified in accordance with (c) of this subsection:

(i) Operations related to the control of the gas concentration;

(ii) Installation of new equipment, or conversion of existing equipment, to comply with this subsection; and

(iii) Installation of above-ground controls for reversing the air flow.

(13) Air quality and monitoring.

(a) General. Air quality limits and control requirements specified in chapter 296-62 WAC, Part H, shall apply except as modified by this subsection.

(b) The employer shall assign a competent person who shall perform all air monitoring required by this section.

(c) Where this section requires monitoring of airborne contaminants "as often as necessary," the competent person shall make a reasonable determination as to which substances to monitor and how frequently to monitor, considering at least the following factors:

(i) Location of jobsite: Proximity to fuel tanks, sewers, gas lines, old landfills, coal deposits, and swamps;

(ii) Geology: Geological studies of the jobsite, particularly involving the soil type and its permeability;

(iii) History: Presence of air contaminants in nearby jobsites, changes in levels of substances monitored on the prior shift; and

(iv) Work practices and jobsite conditions: The use of diesel engines, use of explosives, use of fuel gas, volume and flow of ventilation, visible atmospheric conditions, decompression of the atmosphere, welding, cutting and hot work, and employees' physical reactions to working underground.

(d) The employer shall provide testing and monitoring instruments which are capable of achieving compliance with the provisions of this subsection, and:

(i) Shall maintain the testing and monitoring instruments in good condition;

(ii) Shall calibrate the instruments on a frequency not to exceed 6 months.

(e) Exposure to airborne contaminants shall not exceed the levels established by chapter 296-62 WAC, Part H.

(f) Respirators shall not be substituted for environmental control measures. However, where environmental controls have not yet been developed, or when necessary by the nature of the work involved (for example, welding, sand blasting, lead burning), an employee may work for short periods of time in concentrations of airborne contaminants which exceed the limit of permissible exposure referred to in (d) of this subsection, if the employee wears a respiratory protective device certified by MSHA-NIOSH for protection against the particular hazards involved, and the selection and use of respirators complies with the provisions of chapter 296-62 WAC, Part E.

(g) Employees shall be withdrawn from areas in which there is a concentration of an airborne contaminant which exceeds the permissible exposure limit listed for that contaminant, except as modified in (t)(i) and (ii) of this subsection.

(h) The atmosphere in all underground work areas shall be tested as often as necessary to assure that the atmosphere at normal atmospheric pressure contains at least 19.5 percent oxygen and no more than 22 percent oxygen.

(i) Tests for oxygen content shall be made before tests for air contaminants.

(j) Field-type oxygen analyzers, or other suitable devices, shall be used to test for oxygen deficiency.

(k) The atmosphere in all underground work areas shall be tested quantitatively for carbon monoxide, nitrogen diox-

ide, hydrogen sulfide, and other toxic gases, dust, vapors, mists, and fumes as often as necessary to ensure that the permissible exposure limits prescribed in chapter 296-62 WAC, Part H, are not exceeded.

(l) The atmosphere in all underground work areas shall be tested quantitatively for methane and other flammable gases as often as necessary to determine:

(i) Whether action is to be taken under (q), (r), and (s) of this subsection; and

(ii) Whether an operation is to be classified potentially gassy or gassy under subsection (11) of this section.

(m) If diesel-engine or gasoline-engine driven ventilating fans or compressors are used, an initial test shall be made of the inlet air of the fan or compressor, with the engines operating, to ensure that the air supply is not contaminated by engine exhaust.

(n) Testing shall be performed as often as necessary to ensure that the ventilation requirements of subsection (15) of this section are met.

(o) When rapid excavation machines are used, a continuous flammable gas monitor shall be operated at the face with the sensor(s) placed as high and close to the front of the machine's cutter head as practicable.

(p) Whenever air monitoring indicates the presence of 5 ppm or more of hydrogen sulfide, a test shall be conducted in the affected underground work area(s), at least at the beginning and midpoint of each shift, until the concentration of hydrogen sulfide has been less than 5 ppm for 3 consecutive days.

(i) Whenever hydrogen sulfide is detected in an amount exceeding 10 ppm, a continuous sampling and indicating hydrogen sulfide monitor shall be used to monitor the affected work area.

(ii) Employees shall be informed when a concentration of 10 ppm hydrogen sulfide is exceeded.

(iii) The continuous sampling and indicating hydrogen sulfide monitor shall be designed, installed, and maintained to provide a visual and aural alarm when the hydrogen sulfide concentration reaches 15 ppm to signal that additional measures, such as respirator use, increased ventilation, or evacuation, might be necessary to maintain hydrogen sulfide exposure below the permissible exposure limit.

(q) When the competent person determines, on the basis of air monitoring results or other information, that air contaminants may be present in sufficient quantity to be dangerous to life, the employer shall:

(i) Prominently post a notice at all entrances to the underground jobsite to inform all entrants of the hazardous condition; and

(ii) Immediately increase sampling frequency levels to insure workers are not exposed to identified contaminants in excess of the permissible exposure limit(s); and

(iii) Ensure that all necessary precautions are taken to comply with pertinent requirements of this section, and chapter 296-62 WAC.

(r) Whenever five percent or more of the lower explosive limit for methane or other flammable gases is detected in any underground work area(s) or in the air return, steps shall be taken to increase ventilation air volume or otherwise control the gas concentration, unless the employer is operating in

accordance with the potentially gassy or gassy operation requirements. Such additional ventilation controls may be discontinued when gas concentrations are reduced below five percent of the lower explosive limit, but shall be reinstated whenever the five percent level is exceeded.

(s) Whenever 10 percent or more of the lower explosive limit for methane or other flammable gases is detected in the vicinity of welding, cutting, or other hot work, such work shall be suspended until the concentration of such flammable gas is reduced to less than 10 percent of the lower explosive limit.

(t) Whenever 20 percent or more of the lower explosive limit for methane or other flammable gases is detected in any underground work area(s) or in the air return:

(i) All employees, except those necessary to eliminate the hazard, shall be immediately withdrawn to a safe location above ground; and

(ii) Employees who remain underground to correct or eliminate the hazard described in (t) above shall be equipped with approved, pressure demand mode, self-contained breathing apparatus, and shall have received adequate training in the proper use of that equipment.

(iii) Electrical power, except for acceptable pumping and ventilation equipment, shall be cut off to the area endangered by the flammable gas until the concentration of such gas is reduced to less than 20 percent of the lower explosive limit.

(14) Additional monitoring for potentially gassy and gassy operations. Operations which meet the criteria for potentially gassy and gassy operations set forth in subsection (13) of this section shall be subject to the additional monitoring requirements of this subsection.

(a) A test for oxygen content shall be conducted in the affected underground work areas and work areas immediately adjacent to such areas at least at the beginning and midpoint of each shift.

(b) When using rapid excavation machines, continuous automatic flammable gas monitoring equipment shall be used to monitor the air at the heading, on the rib, and in the return air duct. The continuous monitor shall signal the heading, and shut down electric power in the affected underground work area, except for acceptable pumping and ventilation equipment, when 20 percent or more of the lower explosive limit for methane or other flammable gases is encountered.

(i) A manual flammable gas monitor shall be used as needed, but at least at the beginning and midpoint of each shift, to ensure that the limits prescribed in subsections (11) and (13) of this section are not exceeded. In addition, a manual electrical shut down control shall be provided near the heading.

(ii) Local gas tests shall be made prior to and continuously during any welding, cutting, or other hot work.

(iii) In underground operations driven by drill-and-blast methods, the air in the affected area shall be tested for flammable gas prior to re-entry after blasting, and continuously when employees are working underground.

(c) Recordkeeping. A record of all air quality tests shall be maintained above ground at the worksite and be made available to the director or his/her representatives upon request. The record shall include the location, date, time, substance and amount monitored. Records of exposures to toxic

substances shall be retained in accordance with Part B, chapter 296-62 WAC. All other air quality test records shall be retained until completion of the project.

(15) Ventilation.

(a)(i) Fresh air shall be supplied to all underground work areas in sufficient quantities to prevent dangerous or harmful accumulation of dust, fumes, mists, vapors, or gases.

(ii) Mechanical ventilation shall be provided in all underground work areas except when the employer can demonstrate that natural ventilation provides the necessary air quality through sufficient air volume and air flow.

(b) A minimum of 200 cubic feet (5.7 m³) of fresh air per minute shall be supplied for each employee underground.

(c) The linear velocity of air flow in the tunnel bore, in shafts, and in all other underground work areas shall be at least 30 feet (9.15 m) per minute where blasting or rock drilling is conducted, or where other conditions likely to produce dust, fumes, mists, vapors, or gases in harmful or explosive quantities are present.

(d) The direction of mechanical air flow shall be reversible.

(e) Air that has passed through underground oil or fuel-storage areas shall not be used to ventilate working areas.

(f) Following blasting, ventilation systems shall exhaust smoke and fumes to the outside atmosphere before work is resumed in affected areas.

(g) Ventilation doors shall be designed and installed so that they remain closed when in use, regardless of the direction of the air flow.

(h) When ventilation has been reduced to the extent that hazardous levels of methane or flammable gas may have accumulated, a competent person shall test all affected areas after ventilation has been restored and shall determine whether the atmosphere is within flammable limits before any power, other than for acceptable equipment, is restored or work is resumed.

(i) Whenever the ventilation system has been shut down with all employees out of the underground area, only competent persons authorized to test for air contaminants shall be allowed underground until the ventilation has been restored and all affected areas have been tested for air contaminants and declared safe.

(j) When drilling rock or concrete, appropriate dust control measures shall be taken to maintain dust levels within limits set in chapter 296-155 WAC, Part B-1. Such measures may include, but are not limited to, wet drilling, the use of vacuum collectors, and water mix spray systems.

(k)(i) Internal combustion engines, except diesel-powered engines on mobile equipment, are prohibited underground.

(ii) Mobile diesel-powered equipment used underground in atmospheres other than gassy operations shall be either approved by MSHA in accordance with the provisions of 30 CFR Part 32 (formerly Schedule 24), or shall be demonstrated by the employer to be fully equivalent to such MSHA-approved equipment, and shall be operated in accordance with that Part. (Each brake horsepower of a diesel engine requires at least 100 cubic feet (28.32 m³) of air per minute for suitable operation in addition to the air requirements for personnel. Some engines may require a greater amount of air

to ensure that the allowable levels of carbon monoxide, nitric oxide, and nitrogen dioxide are not exceeded.)

(iii) Application shall be made to the mining/explosives section, department of labor and industries, for permission to use specified diesel equipment in a specified underground area and shall include the following:

(A) The type of construction and complete identification data and specifications including analysis of the undiluted exhaust gases of the diesel equipment.

(B) The location where the diesel equipment is to be used.

(C) Before the diesel equipment is taken underground, written permission shall be obtained from the department of labor and industries or its duly authorized representative. A satisfactory test on surface, to show that the exhaust gases do not exceed the maximum percentage of carbon monoxide permitted, shall be required.

(D) Diesel equipment shall only be used underground where the ventilation is controlled by mechanical means and shall not be operated if the ventilating current is less than 100 CFM per horsepower based on the maximum brake horsepower of the engines.

(E) Air measurements shall be made at least once daily in the diesel engine working area and the measurements entered in the Underground Diesel Engine Record Book. Permissible maximum amounts of noxious gases are as follows:

At engine exhaust ports	Carbon Monoxide	.10%	1,000 ppm ³
Next to equipment	Carbon Monoxide	.0035%	35 ppm
General atmosphere	Carbon Monoxide	.0035%	35 ppm
General atmosphere	Nitrogen Dioxide	.0001%	1 ppm
General atmosphere	Aldehydes	.0002%	2 ppm

³Parts of vapor or gas per million parts of contaminated air by volume at 25°C and 760 mm Hg. pressure.

(l) Potentially gassy or gassy operations shall have ventilation systems installed which shall:

(i) Be constructed of fire-resistant materials; and

(ii) Have acceptable electrical systems, including fan motors.

(m) Gassy operations shall be provided with controls located aboveground for reversing the air flow of ventilation systems.

(n) In potentially gassy or gassy operations, wherever mine-type ventilation systems using an offset main fan installed on the surface are used, they shall be equipped with explosion-doors or a weak-wall having an area at least equivalent to the cross-sectional area of the airway.

(16) Illumination.

(a) Sufficient lighting shall be provided, in accordance with the requirements of chapter 296-155 WAC, Part B-1, to permit safe operations at the face as well as in the general tunnel or shaft area and at the employees' workplace.

(b) Only acceptable portable lighting shall be used within 50 feet (15.24 m) of any underground heading during explosive handling.

(17) Fire prevention and control. Fire prevention and protection requirements applicable to underground construc-

PROPOSED

tion operations are found in Part D of this chapter except as modified by the following additional standards.

(a) Open flames and fires are prohibited in all underground construction operations except as permitted for welding, cutting, and other hot work operations.

(i) Smoking may be allowed only in areas free of fire and explosion hazards.

(ii) Readily visible signs prohibiting smoking and open flames shall be posted in areas having fire or explosion hazards.

(iii) The carrying of matches, lighters, or other flame-producing smoking materials shall be prohibited in all underground operations where fire or explosion hazards exist.

(b) The employer may store underground no more than a 24-hour supply of diesel fuel for the underground equipment used at the worksite.

(c) The piping of diesel fuel from the surface to an underground location is permitted only if:

(i) Diesel fuel is contained at the surface in a tank whose maximum capacity is no more than the amount of fuel required to supply for a 24-hour period the equipment serviced by the underground fueling station; and

(ii) The surface tank is connected to the underground fueling station by an acceptable pipe or hose system that is controlled at the surface by a valve, and at the shaft bottom by a hose nozzle; and

(iii) The pipe is empty at all times except when transferring diesel fuel from the surface tank to a piece of equipment in use underground; and

(iv) Hoisting operations in the shaft are suspended during refueling operations if the supply piping in the shaft is not protected from damage.

(d)(i) Gasoline shall not be carried, stored, or used underground.

(ii) Acetylene, liquefied petroleum gas, and methylacetylene propadiene stabilized gas may be used underground only for welding, cutting and other hot work, and only in accordance with Part H of this chapter and subsections (13), (15), (17), and (18) of this section.

(e) Oil, grease, and diesel fuel stored underground shall be kept in tightly sealed containers in fire-resistant areas at least 300 feet (91.44 m) from underground explosive magazines, and at least 100 feet (30.48 m) from shaft stations and steeply inclined passageways. Storage areas shall be positioned or diked so that the contents of ruptured or overturned containers will not flow from the storage area.

(f) Flammable or combustible materials shall not be stored above ground within 100 feet (30.48 m) of any access opening to any underground operation. Where this is not feasible because of space limitations at the jobsite, such materials may be located within the 100-foot limit, provided that:

(i) They are located as far as practicable from the opening; and

(ii) Either a fire-resistant barrier of not less than one-hour rating is placed between the stored material and the opening, or additional precautions are taken which will protect the materials from ignition sources.

(g) Fire-resistant hydraulic fluids shall be used in hydraulically-actuated underground machinery and equipment unless such equipment is protected by a fire suppression

system or by multipurpose fire extinguisher(s) rated at a sufficient capacity for the type and size of hydraulic equipment involved, but rated at least 4A:4OB:C.

(h)(i) Electrical installations in underground areas where oil, grease, or diesel fuel are stored shall be used only for lighting fixtures.

(ii) Lighting fixtures in storage areas, or within 25 feet (7.62 m) of underground areas where oil, grease, or diesel fuel are stored, shall be approved for Class I, Division 2 locations, in accordance with Part I of this chapter.

(i) Leaks and spills of flammable or combustible fluids shall be cleaned up immediately.

(j) A fire extinguisher of at least 4A:4OB:C rating or other equivalent extinguishing means shall be provided at the head pulley and at the tail pulley of underground belt conveyors, and at 300-foot intervals along the belt.

(k) Any structure located underground or within 100 feet (30.48 m) of an opening to the underground shall be constructed of material having a fire-resistance rating of at least one hour.

(18) Welding, cutting, and other hot work. In addition to the requirements of Part H of this chapter, the following requirements shall apply to underground welding, cutting, and other hot work.

(a) No more than the amount of fuel gas and oxygen cylinders necessary to perform welding, cutting, or other hot work during the next 24-hour period shall be permitted underground.

(b) Noncombustible barriers shall be installed below welding, cutting, or other hot work being done in or over a shaft or raise.

(19) Ground support.

(a) In tunnels (other than hard rock) timber sets, steel rings, steel frames, concrete liners, or other engineered tunnel support systems shall be used. Every tunnel support system shall be designed by a licensed professional engineer. Design specifications shall be available at the worksite.

(b) Portal areas. Portal openings and access areas shall be guarded by shoring, fencing, head walls, shotcreting, or other equivalent protection to ensure safe access of employees and equipment. Adjacent areas shall be scaled or otherwise secured to prevent loose soil, rock, or fractured materials from endangering the portal and access area.

(c) Subsidence areas. The employer shall ensure ground stability in hazardous subsidence areas by shoring, by filling in, or by erecting barricades and posting warning signs to prevent entry.

(d) Underground areas.

(i)(A) A competent person shall inspect the roof, face, and walls of the work area at the start of each shift and as often as necessary to determine ground stability.

(B) Competent persons conducting such inspections shall be protected from loose ground by location, ground support, or equivalent means.

(ii) Ground conditions along haulageways and travelways shall be inspected as frequently as necessary to ensure safe passage.

(iii) Loose ground that might be hazardous to employees shall be taken down, scaled, or supported.

(iv) Torque wrenches shall be used wherever bolts that depend on torsionally applied force are used for ground support.

(v) A competent person shall determine whether rock bolts meet the necessary torque, and shall determine the testing frequency in light of the bolt system, ground conditions, and the distance from vibration sources.

(vi) Suitable protection shall be provided for employees exposed to the hazard of loose ground while installing ground support systems.

(vii) Support sets shall be installed so that the bottoms have sufficient anchorage to prevent ground pressures from dislodging the support base of the sets. Lateral bracing (collar bracing, tie rods, or spreaders) shall be provided between immediately adjacent sets to ensure added stability.

(viii) Damaged or dislodged ground supports that create a hazardous condition shall be promptly repaired or replaced. When replacing supports, the new supports shall be installed before the damaged supports are removed.

(ix) A shield or other type of support shall be used to maintain a safe travelway for employees working in dead-end areas ahead of any support replacement operation.

(e) Shafts.

(i) Shafts and wells over 4 feet (1.219 m) in depth that employees must enter shall be supported by a steel casing, concrete pipe, timber, solid rock, or other suitable material.

(ii)(A) The full depth of the shaft shall be supported by casing or bracing except where the shaft penetrates into solid rock having characteristics that will not change as a result of exposure. Where the shaft passes through earth into solid rock, or through solid rock into earth, and where there is potential for shear, the casing or bracing shall extend at least 5 feet (1.53 m) into the solid rock. When the shaft terminates in solid rock, the casing or bracing shall extend to the end of the shaft or 5 feet (1.53 m) into the solid rock, whichever is less.

(B) The casing or bracing shall extend 42 inches (1.07 m) plus or minus 3 inches (8 cm) above ground level, except that the minimum casing height may be reduced to 12 inches (0.3 m), provided that a standard railing is installed; that the ground adjacent to the top of the shaft is sloped away from the shaft collar to prevent entry of liquids; and that effective barriers are used to prevent mobile equipment operating near the shaft from jumping over the 12-inch (0.3 m) barrier.

(iii) After blasting operations in shafts, a competent person shall determine if the walls, ladders, timbers, blocking, or wedges have loosened. If so, necessary repairs shall be made before employees other than those assigned to make the repairs are allowed in or below the affected areas.

(f) Blasting. This subsection applies in addition to the requirements for blasting and explosives operations, including handling of misfires, which are found in chapter 296-52 WAC.

(i) Blasting wires shall be kept clear of electrical lines, pipes, rails, and other conductive material, excluding earth, to prevent explosives initiation or employee exposure to electric current.

(ii) Following blasting, an employee shall not enter a work area until the air quality meets the requirements of subsection (13) of this section.

(g) Drilling.

(i) A competent person shall inspect all drilling and associated equipment prior to each use. Equipment defects affecting safety shall be corrected before the equipment is used.

(ii) The drilling area shall be inspected for hazards before the drilling operation is started.

(iii) Employees shall not be allowed on a drill mast while the drill bit is in operation or the drill machine is being moved.

(iv) When a drill machine is being moved from one drilling area to another, drill steel, tools, and other equipment shall be secured and the mast shall be placed in a safe position.

(v) Receptacles or racks shall be provided for storing drill steel located on jumbos.

(vi) Employees working below jumbo decks shall be warned whenever drilling is about to begin.

(vii) Drills on columns shall be anchored firmly before starting drilling, and shall be retightened as necessary thereafter.

(viii) The employer shall provide mechanical means on the top deck of a jumbo for lifting unwieldy or heavy material.

(ix) When jumbo decks are over 10 feet (3.05 m) in height, the employer shall install stairs wide enough for two persons.

(x) Jumbo decks more than 10 feet (3.05 m) in height shall be equipped with guardrails on all open sides, excluding access openings of platforms, unless an adjacent surface provides equivalent fall protection.

(xi) Only employees assisting the operator shall be allowed to ride on jumbos, unless the jumbo meets the requirements of subsection (20)(e) of this section.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(xii) Jumbos shall be chocked to prevent movement while employees are working on them.

(xiii) Walking and working surfaces of jumbos shall be maintained to prevent the hazards of slipping, tripping, and falling.

(xiv) Jumbo decks and stair treads shall be designed to be slip-resistant and secured to prevent accidental displacement.

(xv) Scaling bars shall be available at scaling operations and shall be maintained in good condition at all times. Blunted or severely worn bars shall not be used.

(xvi) Before commencing the drill cycle, the face and lifters shall be examined for misfires (residual explosives) and, if found, they shall be removed before drilling commences at the face. Blasting holes shall not be drilled through blasted rock (muck) or water.

(xvii) Employees in a shaft shall be protected either by location or by suitable barrier(s) if powered mechanical loading equipment is used to remove muck containing unfired explosives.

(xviii) A caution sign reading "buried line," or similar wording shall be posted where air lines are buried or otherwise hidden by water or debris.

(20) Haulage.

(a) A competent person shall inspect haulage equipment before each shift.

(i) Equipment defects affecting safety and health shall be corrected before the equipment is used.

(ii) Powered mobile haulage equipment shall be provided with adequate brakes.

(iii) Power mobile haulage equipment, including trains, shall have audible warning devices to warn employees to stay clear. The operator shall sound the warning device before moving the equipment and whenever necessary during travel.

(iv) The operator shall assure that lights which are visible to employees at both ends of any mobile equipment, including a train, are turned on whenever the equipment is operating.

(v) In those cabs where glazing is used, the glass shall be safety glass, or its equivalent, and shall be maintained and cleaned so that vision is not obstructed.

(b) Antirollback devices or brakes shall be installed on inclined conveyor drive units to prevent conveyors from inadvertently running in reverse. Employees shall not be permitted to ride a power-driven chain, belt, or bucket conveyor unless the conveyor is specifically designed for the transportation of persons.

(c) Endless belt-type manlifts are prohibited in underground construction.

(d) General requirements also applicable to underground construction for use of conveyors in construction are found in chapter 296-155 WAC, Part L.

(e) No employee shall ride haulage equipment unless it is equipped with seating for each passenger and protects passengers from being struck, crushed, or caught between other equipment or surfaces. Members of train crews may ride on a locomotive if it is equipped with handholds and nonslip steps or footboards. Requirements applicable to underground construction for motor vehicle transportation of employees are found in chapter 296-155 WAC, Part M.

(f) Conveyor lockout.

(i) Conveyors shall be de-energized and locked out with a padlock, and tagged out with a "Do Not Operate" tag at any time repair, maintenance, or clean-up work is being performed on the conveyor.

(ii) Tags or push button stops are not acceptable.

(iii) Persons shall not be allowed to walk on conveyors except for emergency purposes and then only after the conveyor has been deenergized and locked out in accordance with (f) above, and persons can do so safely.

(g) Powered mobile haulage equipment, including trains, shall not be left unattended unless the master switch or motor is turned off; operating controls are in neutral or park position; and the brakes are set, or equivalent precautions are taken to prevent rolling.

(h) Whenever rails serve as a return for a trolley circuit, both rails shall be bonded at every joint and crossbonded every 200 feet (60.96 m).

(i) When dumping cars by hand, the car dumps shall have tiedown chains, bumper blocks, or other locking or holding devices to prevent the cars from overturning.

(j) Rocker-bottom or bottom-dump cars shall be equipped with positive locking devices to prevent unintended dumping.

(k) Equipment to be hauled shall be loaded and secured to prevent sliding or dislodgement.

(l)(i) Mobile equipment, including rail-mounted equipment, shall be stopped for manual connecting or service work, and;

(ii) Employees shall not reach between moving cars during coupling operations.

(iii) Couplings shall not be aligned, shifted, or cleaned on moving cars or locomotives.

(iv) Safety chains or other connections shall be used in addition to couplers to connect person cars or powder cars whenever the locomotive is uphill of the cars.

(v) When the grade exceeds one percent and there is a potential for runaway cars, safety chains or other connections shall be used in addition to couplers to connect haulage cars or, as an alternative, the locomotive must be downhill of the train.

(vi) Such safety chains or other connections shall be capable of maintaining connection between cars in the event of either coupler disconnect, failure or breakage.

(m) Parked rail equipment shall be chocked, blocked, or have brakes set to prevent inadvertent movement.

(n) Berms, bumper blocks, safety hooks, or equivalent means shall be provided to prevent overtravel and overturning of haulage equipment at dumping locations.

(o) Bumper blocks or equivalent stopping devices shall be provided at all track dead ends.

(p)(i) Only small handtools, lunch pails, or similar small items may be transported with employees in person cars, or on top of a locomotive.

(ii) When small hand tools or other small items are carried on top of a locomotive, the top shall be designed or modified to retain them while traveling.

(q)(i) Where switching facilities are available, occupied personnel cars shall be pulled, not pushed. If personnel cars must be pushed and visibility of the track ahead is hampered, then a qualified person shall be stationed in the lead car to give signals to the locomotive operator.

(ii) Crew trips shall consist of personnel loads only.

(21) Electrical safety. This subsection applies in addition to the general requirements for electrical safety which are found in Part I of this chapter.

(a) Electric power lines shall be insulated or located away from water lines, telephone lines, air lines, or other conductive materials so that a damaged circuit will not energize the other systems.

(b) Lighting circuits shall be located so that movement of personnel or equipment will not damage the circuits or disrupt service.

(c) Oil-filled transformers shall not be used underground unless they are located in a fire-resistant enclosure suitably vented to the outside and surrounded by a dike to retain the contents of the transformers in the event of rupture.

(22) Hoisting unique to underground construction except as modified by this section, the following provisions of chapter 296-155 WAC, Part L apply: Requirements for cranes are found in WAC 296-155-525. WAC 296-155-528 contains rules applicable to crane hoisting of personnel, except, that the limitations imposed by WAC 296-155-528(2) do not apply to the routine access of employees to the underground

via a shaft. Requirements for personnel hoists, material hoists, and elevators are found in WAC 296-155-530 and in this subsection.

(a) General requirements for cranes and hoists.

(i) Materials, tools, and supplies being raised or lowered, whether within a cage or otherwise, shall be secured or stacked in a manner to prevent the load from shifting, snagging, or falling into the shaft.

(ii) A warning light suitably located to warn employees at the shaft bottom and subsurface shaft entrances shall flash whenever a load is above the shaft bottom or subsurface entrances, or the load is being moved in the shaft. This subsection does not apply to fully enclosed hoistways.

(iii) Whenever a hoistway is not fully enclosed and employees are at the shaft bottom, conveyances or equipment shall be stopped at least 15 feet (4.57 m) above the bottom of the shaft and held there until the signalperson at the bottom of the shaft directs the operator to continue lowering the load, except that the load may be lowered without stopping if the load or conveyance is within full view of a bottom signalperson who is in constant voice communication with the operator.

(iv)(A) Before maintenance, repairs, or other work is commenced in the shaft served by a cage, skip, or bucket, the operator and other employees in the area shall be informed and given suitable instructions.

(B) A sign warning that work is being done in the shaft shall be installed at the shaft collar, at the operator's station, and at each underground landing.

(v) Any connection between the hoisting rope and the cage or skip shall be compatible with the type of wire rope used for hoisting.

(vi) Spin-type connections, where used, shall be maintained in a clean condition and protected from foreign matter that could affect their operation.

(vii) Cage, skip, and load connections to the hoist rope shall be made so that the force of the hoist pull, vibration, misalignment, release of lift force, or impact will not disengage the connection. Only closed shackles shall be used for cage and skip rigging.

(viii) When using wire rope wedge sockets, means shall be provided to prevent wedge escapement and to ensure that the wedge is properly seated.

(b) Additional requirements for cranes. Cranes shall be equipped with a limit switch to prevent overtravel at the boom tip. Limit switches are to be used only to limit travel of loads when operational controls malfunction and shall not be used as a substitute for other operational controls.

(c) Additional requirements for hoists.

(i) Hoists shall be designed so that the load hoist drum is powered in both directions of rotation, and so that brakes are automatically applied upon power release or failure.

(ii) Control levers shall be of the "deadman type" which return automatically to their center (neutral) position upon release.

(iii) When a hoist is used for both personnel hoisting and material hoisting, load and speed ratings for personnel and for materials shall be assigned to the equipment.

(iv) Hoist machines with cast metal parts shall not be used.

(v) Material hoisting may be performed at speeds higher than the rated speed for personnel hoisting if the hoist and components have been designed for such higher speeds and if shaft conditions permit.

(vi) Employees shall not ride on top of any cage, skip, or bucket except when necessary to perform inspection or maintenance of the hoisting system, in which case they shall be protected by a body belt/harness system to prevent falling.

(vii) Personnel and materials (other than small tools and supplies secured in a manner that will not create a hazard to employees) shall not be hoisted together in the same conveyance. However, if the operator is protected from the shifting of materials, then the operator may ride with materials in cages or skips which are designed to be controlled by an operator within the cage or skip.

(viii) Line speed shall not exceed the design limitations of the systems.

(ix) Hoists shall be equipped with landing level indicators at the operator's station. Marking of the hoist rope does not satisfy this requirement.

(x) Whenever glazing is used in the hoist house, it shall be safety glass, or its equivalent, and be free of distortions and obstructions.

(xi) A fire extinguisher that is rated at least 2A:10B:C (multipurpose, dry chemical) shall be mounted in each hoist house.

(xii) Hoist controls shall be arranged so that the operator can perform all operating cycle functions and reach the emergency power cutoff without having to reach beyond the operator's normal operating position.

(xiii) Hoists shall be equipped with limit switches to prevent overtravel at the top and bottom of the hoistway.

(xiv) Limit switches are to be used only to limit travel of loads when operational controls malfunction and shall not be used as a substitute for other operational controls.

(xv) Hoist operators shall be provided with a closed-circuit voice communication system to each landing station, with speaker-microphones so located that the operator can communicate with individual landing stations during hoist use.

(xvi) When sinking shafts 75 feet (22.86 m) or less in depth, cages, skips, and buckets that may swing, bump, or snag against shaft sides or other structural protrusions shall be guided by fenders, rails, ropes, or a combination of those means.

(xvii) When sinking shafts more than 75 feet (22.86 m) in depth, all cages, skips, and buckets shall be rope or rail-guided to within a rail length from the sinking operation.

(xviii) Cages, skips, and buckets in all completed shafts, or in all shafts being used as completed shafts, shall be rope or rail-guided for the full length of their travel.

(xix) Wire rope used in load lines of material hoists shall be capable of supporting, without failure, at least five times the maximum intended load or the factor recommended by the rope manufacturer, whichever is greater. Refer to chapter 296-155 WAC, Part L, for design factors for wire rope used in personnel hoists. The design factors shall be calculated by dividing the breaking strength of wire rope, as reported in the manufacturer's rating tables, by the total static load, including the weight of the wire rope in the shaft when fully extended.

(xx) A competent person shall visually check all hoisting machinery, equipment, anchorages, and hoisting rope at the beginning of each shift and during hoist use, as necessary.

(xxi) Each safety device shall be checked by a competent person at least weekly during hoist use to ensure suitable operation and safe condition.

(xxii) In order to ensure suitable operation and safe condition of all functions and safety devices, each hoist assembly shall be inspected and load-tested to 100 percent of its rated capacity: At the time of installation; after any repairs or alterations affecting its structural integrity; after the operation of any safety device; and annually when in use. The employer shall prepare a certification record which includes the date each inspection and load-test was performed; the signature of the person who performed the inspection and test; and a serial number or other identifier for the hoist that was inspected and tested. The most recent certification record shall be maintained on file until completion of the project.

(xxiii) Before hoisting personnel or material, the operator shall perform a test run of any cage or skip whenever it has been out of service for one complete shift, and whenever the assembly or components have been repaired or adjusted.

(xiv) Unsafe conditions shall be corrected before using the equipment.

(d) Additional requirements for personnel hoists.

(i) Hoist drum systems shall be equipped with at least two means of stopping the load, each of which shall be capable of stopping and holding 150 percent of the hoist's rated line pull. A broken-rope safety, safety catch, or arrestment device is not a permissible means of stopping under this subsection.

(ii) The operator shall remain within sight and sound of the signals at the operator's station.

(iii) All sides of personnel cages shall be enclosed by one-half inch (12.70 mm) wire mesh (not less than No. 14 gauge or equivalent) to a height of not less than 6 feet (1.83 m). However, when the cage or skip is being used as a work platform, its sides may be reduced in height to 42 inches (1.07 m) when the conveyance is not in motion.

(iv) All personnel cages shall be provided with a positive locking door that does not open outward.

(v) All personnel cages shall be provided with a protective canopy. The canopy shall be made of steel plate, at least 3/16 -inch (4.763 mm) in thickness, or material of equivalent strength and impact resistance. The canopy shall be sloped to the outside, and so designed that a section may be readily pushed upward to afford emergency egress. The canopy shall cover the top in such a manner as to protect those inside from objects falling in the shaft.

(vi) Personnel platforms operating on guide rails or guide ropes shall be equipped with broken-rope safety devices, safety catches, or arrestment devices that will stop and hold 150 percent of the weight of the personnel platform and its maximum rated load.

(vii) During sinking operations in shafts where guides and safeties are not yet used, the travel speed of the personnel platform shall not exceed 200 feet (60.96 m) per minute. Governor controls set for 200 feet (60.96 m) per minute shall be installed in the control system and shall be used during personnel hoisting.

(viii) The personnel platform may travel over the controlled length of the hoistway at rated speeds up to 600 feet (182.88 m) per minute during sinking operations in shafts where guides and safeties are used.

(ix) The personnel platform may travel at rated speeds greater than 600 feet (182.88 m) per minute in complete shafts.

AMENDATORY SECTION (Amending WSR 96-24-051, filed 11/27/96, effective 2/1/97)

WAC 296-155-745 Compressed air. (1) General provisions.

(a) There shall be present, at all times, at least one competent person designated by and representing the employer, who shall be familiar with this part in all respects and responsible for full compliance with these and other applicable parts.

(b) Every employee shall be instructed in the rules and regulations which concern their safety or the safety of others.

(2) Medical attendance, examination, and regulations.

(a) There shall be retained one or more licensed physicians familiar with and experienced in the physical requirements and the medical aspects of compressed air work and the treatment of decompression illness. They shall be available at all times while work is in progress in order to provide medical supervision of employees employed in compressed air work. They shall be physically qualified and be willing to enter a pressurized environment.

(b) No employee shall be permitted to enter a compressed air environment until they have been examined by the physician and reported to be physically qualified to engage in such work.

(c) In the event an employee is absent from work for 10 days, or is absent due to sickness or injury, they shall not resume work until they are reexamined by the physician, and their physical condition reported, as provided in this subsection, to be such as to permit them to work in compressed air.

(d) After an employee has been employed continuously in compressed air for a period designated by the physician, but not to exceed 1 year, the employee shall be reexamined by the physician to determine if they are still physically qualified to engage in compressed air work.

(e) Such physician shall at all times keep a complete and full record of examinations made by themselves. The physician shall also keep an accurate record of any decompression illness or other illness or injury incapacitating any employee for work, and of all loss of life that occurs in the operation of a tunnel, caisson, or other compartment in which compressed air is used.

(f) Records shall be available for the inspection by the director or his/her representatives, and a copy thereof shall be forwarded to the department within 48 hours following the occurrence of the accident, death, injury, or decompression illness. It shall state as fully as possible the cause of said death or decompression illness, and the place where the injured or sick employee was taken, and such other relative information as may be required by the director.

(g) A fully equipped first-aid station shall be provided at each tunnel project regardless of the number of persons

PROPOSED

employed. An ambulance or transportation suitable for a litter case shall be at each project.

(h) Where tunnels are being excavated from portals more than 5 road miles apart, a first-aid station and transportation facilities shall be provided at each portal.

(i) A medical lock shall be established and maintained in immediate working order whenever air pressure in the working chamber is increased above the normal atmosphere.

(j) The medical lock shall:

(i) Have at least 6 feet of clear headroom at the center, and be subdivided into not less than two compartments;

(ii) Be readily accessible to employees working under compressed air;

(iii) Be kept ready for immediate use for at least 5 hours subsequent to the emergence of any employee from the working chamber;

(iv) Be properly heated, lighted and ventilated;

(v) Be maintained in a sanitary condition;

(vi) Have a nonshatterable port through which the occupant(s) may be kept under constant observation;

(vii) Be designed for a working pressure of 75 p.s.i.g.;

(viii) Be equipped with internal controls which may be overridden by external controls;

(ix) Be provided with air pressure gauges to show the air pressure within each compartment to observers inside and outside the medical lock;

(x) Be equipped with a manual type sprinkler system that can be activated inside the lock or by the outside lock tender;

(xi) Be provided with oxygen lines and fittings leading into external tanks. The lines shall be fitted with check valves to prevent reverse flow. The oxygen system inside the chamber shall be of a closed circuit design and be so designed as to automatically shut off the oxygen supply whenever the fire system is activated.

(xii) Be in constant charge of an attendant under the direct control of the retained physician. The attendant shall be trained in the use of the lock and suitably instructed regarding steps to be taken in the treatment of employee exhibiting symptoms compatible with a diagnosis of decompression illness;

(xiii) Be adjacent to an adequate emergency medical facility;

(xiv) The medical facility shall be equipped with demand-type oxygen inhalation equipment approved by the U.S. Bureau of Mines or Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health (NIOSH);

(xv) Be capable of being maintained at a temperature, in use, not to exceed 90°F. nor be less than 70°F.; and

(xvi) Be provided with sources of air, free of oil and carbon monoxide, for normal and emergency use, which are capable of raising the air pressure in the lock from 0 to 75 p.s.i.g. in 5 minutes.

(k) Identification badges shall be furnished to all employees, indicating that the wearer is a compressed air worker. A permanent record shall be kept of all identification badges issued. The badge shall give the employee's name, address of the medical lock, the telephone number of the licensed physician for the compressed air project, and contain

instructions that in case of emergency of unknown or doubtful cause or illness, the wearer shall be rushed to the medical lock. The badge shall be worn at all times—off the job, as well as on the job.

(3) Telephone and signal communication. Effective and reliable means of communication, such as bells, whistles, or telephones, shall be maintained at all times between all the following locations;

(a) The working chamber face;

(b) The working chamber side of the man lock near the door;

(c) The interior of the man lock;

(d) Lock attendant's station;

(e) The compressor plant;

(f) The first-aid station;

(g) The emergency lock (if one is required); and

(h) The special decompression chamber (if one is required).

(4) Signs and records.

(a) The time of decompression shall be posted in each man lock as follows:

TIME OF DECOMPRESSION FOR THIS LOCK

..... pounds to pounds in minutes.

..... pounds to pounds in minutes.

(Signed by)

(Superintendent)

This form shall be posted in the man lock at all times.

(b) Any code of signals used shall be conspicuously posted near workplace entrances and such other locations as may be necessary to bring them to the attention of all employees concerned.

(c) For each 8-hour shift, a record of employees employed under air pressure shall be kept by an employee who shall remain outside the lock near the entrance. This record shall show the period each employee spends in the air chamber and the time taken from decompression. A copy shall be submitted to the appointed physician after each shift.

(5) Compression.

(a) Every employee going under air pressure for the first time shall be instructed on how to avoid excessive discomfort.

(b) During the compression of employees, the pressure shall not be increased to more than 3 p.s.i.g. within the first minute. The pressure shall be held at 3 p.s.i.g. and again at 7 p.s.i.g. sufficiently long to determine if any employees are experiencing discomfort.

(c) After the first minute the pressure shall be raised uniformly and at a rate not to exceed 10 p.s.i. per minute.

(d) If any employee complains of discomfort, the pressure shall be held to determine if the symptoms are relieved. If, after 5 minutes the discomfort does not disappear, the lock attendant shall gradually reduce the pressure until the employee signals that the discomfort has ceased. If the employee does not indicate that the discomfort has disappeared, the lock attendant shall reduce the pressure to atmospheric and the employee shall be released from the lock.

(e) No employee shall be subjected to pressure exceeding 50 pounds per square inch except in an emergency.

(6) Decompression.

(a) Decompression to normal condition shall be in accordance with the decompression tables in Appendix A of this part.

(b) In the event it is necessary for an employee to be in compressed air more than once in a 24-hour period, the appointed physician shall be responsible for the establishment of methods and procedures of decompression applicable to repetitive exposures.

(c) If decanting is necessary, the appointed physician shall establish procedures before any employee is permitted to be decompressed by decanting methods. The period of time that the employees spend at atmospheric pressure between the decompression following the shift and recompression shall not exceed 5 minutes.

(7) Man locks and special decompression chambers.

(a) Man locks.

(i) Except in emergency, no employees employed in compressed air shall be permitted to pass from the working chamber to atmospheric pressure until after decompression, in accordance with the procedures in this part.

(ii) The lock attendant in charge of a man lock shall be under the direct supervision of the appointed physician. The lock attendant shall be stationed at the lock controls on the free air side during the period of compression and decompression and shall remain at the lock control station whenever there are persons in the working chamber or in the man lock.

(iii) Except where air pressure in the working chamber is below 12 p.s.i.g., each man lock shall be equipped with automatic controls which, through taped programs, cams, or similar apparatus, shall automatically regulate decompressions. It shall also be equipped with manual controls to permit the lock attendant to override the automatic mechanism in the event of an emergency, as provided in item (viii) of this subdivision.

(iv) A manual control, which can be used in the event of an emergency, shall be placed inside the man lock.

(v) A clock, thermometer, and continuous recording pressure gauge with a 4-hour graph shall be installed outside of each man lock and shall be changed prior to each shift's decompression. The chart shall be of sufficient size to register a legible record of variations in pressure within the man lock and shall be visible to the lock attendant. A copy of each graph shall be submitted to the appointed physician after each shift. In addition, a pressure gauge, clock, and thermometer shall also be installed in each man lock. Additional fittings shall be provided so that the test gauges may be attached whenever necessary.

(vi) Except where air pressure is below 12 p.s.i.g. and there is no danger of rapid flooding, all caissons having a working area greater than 150 square feet, and each bulkhead in tunnels of 14 feet or more in diameter, or equivalent area, shall have at least two locks in perfect working condition, one of which shall be used exclusively as a man lock, the other, as a materials lock.

(vii) Where only a combination man-and-materials lock is required, this single lock shall be of sufficient capacity to hold the employees constituting two successive shifts.

(viii) Emergency locks shall be large enough to hold an entire heading shift and a limit maintained of 12 p.s.i.g. There shall be a chamber available for oxygen decompression therapy to 28 p.s.i.g.

(ix) The man lock shall be large enough so that those using it are not compelled to be in a cramped position and shall not have less than 5 feet clear head room at the center and a minimum of 30 cubic feet of air space per occupant.

(x) Locks on caissons shall be so located that the bottom door shall be not less than 3 feet above the water level surrounding the caisson on the outside. (The water level, where it is affected by tides, is construed to mean high tide.)

(xi) In addition to the pressure gauge in the locks, an accurate pressure gauge shall be maintained on the outer and inner side of each bulkhead. These gauges shall be accessible at all times and shall be kept in accurate working order.

(xii) Man locks shall have an observation port at least 4 inches in diameter located in such a position that all occupants of the man lock may be observed from the working chamber and from the free air side of the lock.

(xiii) Adequate ventilation in the lock shall be provided.

(xiv) Man locks shall be maintained at a minimum temperature of 70°F.

(xv) When locks are not in use and employees are in the working chamber, lock doors shall be kept open to the working chamber, where practicable.

(xvi) Provision shall be made to allow for rescue parties to enter the tunnel if the working force is disabled.

(xvii) A special decompression chamber of sufficient size to accommodate the entire force of employees being decompressed at the end of a shift shall be provided whenever the regularly established working period requires total time of decompression exceeding 75 minutes.

(b) Special decompression chamber.

(i) The headroom in the special decompression chamber shall be not less than a minimum 7 feet and the cubical content shall provide at least 50 cubic feet of airspace for each employee. For each occupant, there shall be provided 4 square feet of free walking area and 3 square feet of seating space, exclusive of area required for lavatory and toilet facilities. The rated capacity shall be based on the stated minimum space per employee and shall be posted at the chamber entrance. The posted capacity shall not be exceeded, except in case of emergency.

(ii) Each special decompression chamber shall be equipped with the following:

(A) A clock or clocks suitably placed so that the attendant and the chamber occupants can readily ascertain the time;

(B) Pressure gauges which will indicate to the attendants and to the chamber occupants the pressure in the chamber;

(C) Valves to enable the attendant to control the supply and discharge of compressed air into and from the chamber.

(D) Valves and pipes, in connection with the air supply and exhaust, arranged so that the chamber pressure can be controlled from within and without;

(E) Effective means of oral intercommunication between the attendant, occupants of the chamber, and the air compressor plant; and

(F) An observation port at the entrance to permit observation of the chamber occupants.

(iii) Seating facilities in special decompression chambers shall be so arranged as to permit a normal sitting posture without cramping. Seating space, not less than 18 inches by 24 inches wide, shall be provided per occupant.

(iv) Adequate toilet and washing facilities, in a screened or enclosed recess, shall be provided. Toilet bowls shall have a built-in protector on the rim so that an air space is created when the seat lid is closed.

(v) Fresh and pure drinking water shall be available. This may be accomplished by either piping water into the special decompression chamber and providing drinking fountains, or by providing individual canteens, or by some other sanitary means. Community drinking vessels are prohibited.

(vi) No refuse or discarded material of any kind shall be permitted to accumulate, and the chamber shall be kept clean.

(vii) Unless the special decompression chamber is serving as the man lock to atmospheric pressure, the special decompression chamber shall be situated, where practicable, adjacent to the man lock on the atmospheric pressure side of the bulkhead. A passageway shall be provided, connecting the special chamber with the man lock, to permit employees in the process of decompression to move from the man lock to the special chamber without a reduction in the ambient pressure from that designated for the next stage of decompression. The passageway shall be so arranged as to not interfere with the normal operation of the man lock, nor with the release of the occupants of the special chamber to atmospheric pressure upon the completion of the decompression procedure.

(8) Compressor plant and air supply.

(a) At all times there shall be a thoroughly experienced, competent, and reliable person on duty at the air control valves as a gauge tender who shall regulate the pressure in the working areas. During tunneling operations, one gauge tender may regulate the pressure in not more than two headings: Provided; That the gauges and controls are all in one location. In caisson work, there shall be a gauge tender for each caisson.

(b) The low air compressor plant shall be of sufficient capacity to not only permit the work to be done safely, but shall also provide a margin to meet emergencies and repairs.

(c) Low air compressor units shall have at least two independent and separate sources of power supply and each shall be capable of operating the entire low air plant and its accessory systems.

(d) The capacity, arrangement, and number of compressors shall be sufficient to maintain the necessary pressure without overloading the equipment and to assure maintenance of such pressure in the working chamber during periods of breakdown, repair, or emergency.

(e) Switching from one independent source of power supply to the other shall be done periodically to ensure that workability of the apparatus in an emergency.

(f) Duplicate low-pressure air feedlines and regulating valves shall be provided between the source of air supply and a point beyond the locks with one of the lines extending to within 100 feet of the working face.

(g) All high-pressure and low-pressure air supply lines shall be equipped with check valves.

(h) Low-pressure air shall be regulated automatically. In addition, manually operated valves shall be provided for emergency conditions.

(i) The air intakes for all air compressors shall be located at a place where fumes, exhaust gases, and other air contaminants will be at a minimum.

(j) Gauges indicating the pressure in the working chamber shall be installed in the compressor building, the lock attendant's station, and at the employer's field office.

(9) Ventilation and air quality.

(a) Exhaust valves and exhaust pipes shall be provided and operated so that the working chamber shall be well ventilated, and there shall be no pockets of dead air. Outlets may be required at intermediate points along the main low-pressure air supply line to the heading to eliminate such pockets of dead air. The quantity of ventilation air shall be not less than 30 cubic feet per minute.

(b) The air in the workplace shall be analyzed by the employer not less than once each shift, and records of such tests shall be kept on file at the place where the work is in progress. The test results shall be within the threshold limit values specified in part B of this chapter, for hazardous gases, and within 10 percent of the lower explosive limit of flammable gases. If these limits are not met, immediate action to correct the situation shall be taken by the employer.

(c) The temperature of all working chambers which are subjected to air pressure shall, by means of after-coolers or other suitable devices, be maintained at a temperature not to exceed 85°F.

(d) Forced ventilation shall be provided during decompression. During the entire decompression period, forced ventilation through chemical or mechanical air purifying devices that will ensure a source of fresh air shall be provided.

(e) Whenever heat-producing machines (moles, shields) are used in compressed air tunnel operations, a positive means of removing the heat build-up at the heading shall be provided.

(10) Electricity.

(a) All lighting in compressed-air chambers shall be by electricity exclusively, and two independent electric-lighting systems with independent sources of supply shall be used. The emergency source shall be arranged to become automatically operative in the event of failure of the regularly used source.

(b) The minimum intensity of light on any walkway, ladder, stairway, or working level shall be not less than 10 foot-candles, and in all workplaces the lighting shall at all times be such as to enable employees to see clearly.

(c) All electrical equipment, and wiring for light and power circuits, shall comply with requirements of Part I, of this standard, for use in damp, hazardous, high temperature, and compressed air environments.

(d) External parts of lighting fixtures and all other electrical equipment, when within 8 feet of the floor, shall be constructed of noncombustible, nonabsorptive, insulating mate-

rials, except that metal may be used if it is effectively grounded.

(e) Portable lamps shall be equipped with noncombustible, nonabsorptive, insulating sockets, approved handles, basket guards, and approved cords.

(f) The use of worn or defective portable and pendant conductors is prohibited.

(11) Sanitation.

(a) Sanitary, heated, lighted, and ventilated dressing rooms and drying rooms shall be provided for all employees engaged in compressed air work. Such rooms shall contain suitable benches and lockers. Bathing accommodations (showers at the ratio of one to 10 employees per shift), equipped with running hot and cold water, and suitable and adequate toilet accommodations, shall be provided. One toilet for each 15 employees, or fractional part thereof, shall be provided.

(b) When the toilet bowl is shut by a cover, there should be an air space so that the bowl or bucket does not implode when pressure is increased.

(c) All parts of caissons and other working compartments shall be kept in a sanitary condition.

(12) Fire prevention and protection.

(a) Fire fighting equipment shall be available at all times and shall be maintained in working condition.

(b) While welding or flame-cutting is being done in compressed air, a firewatch with a fire hose or approved extinguisher shall stand by until such operation is completed.

(c) Shafts and caissons containing flammable material of any kind, either above or below ground, shall be provided with a waterline and a fire hose connected thereto, so arranged that all points of the shaft or caisson are within reach of the hose stream.

(d) Fire hose shall be at least 1 1/2 inches in nominal diameter; the water pressure shall at all times be adequate for efficient operation of the type of nozzle used; and the water supply shall be such as to ensure an uninterrupted flow. Fire hose, when not in use, shall be located or guarded to prevent injury thereto.

(e) The power house, compressor house, and all buildings housing ventilating equipment, shall be provided with at least one hose connection in the waterline, with a fire hose connected thereto. A fire hose shall be maintained within reach of structures of wood over or near shafts.

(f) Tunnels shall be provided with a 2-inch minimum diameter waterline extending into the working chamber and to within 100 feet of the working face. Such line shall have hose outlets with 100 feet of fire hose attached and maintained as follows: One at the working face; one immediately inside of the bulkhead of the working chamber; and one immediately outside such bulkhead. In addition, hose outlets shall be provided at 200-foot intervals throughout the length of the tunnel, and 100 feet of fire hose shall be attached to the outlet nearest to any location where flammable material is being kept or stored or where any flame is being used.

(g) In addition to fire hose protection required by this part, on every floor of every building not under compressed air, but used in connection with the compressed air work, there shall be provided at least one approved fire extinguisher of the proper type for the hazards involved. At least two

approved fire extinguishers shall be provided in the working chamber as follows: One at the working face and one immediately inside the bulkhead (pressure side). Extinguishers in the working chamber shall use water as the primary extinguishing agent and shall not use any extinguishing agent which could be harmful to the employees in the working chamber. The fire extinguisher shall be protected from damage.

(h) Highly combustible materials shall not be used or stored in the working chamber. Wood, paper, and similar combustible material shall not be used in the working chamber in quantities which could cause a fire hazard. The compressor building shall be constructed of noncombustible material.

(i) Man locks shall be equipped with a manual type fire extinguisher system that can be activated inside the man lock and also by the outside lock attendant. In addition, a fire hose and portable fire extinguisher shall be provided inside and outside the man lock. The portable fire extinguisher shall be the dry chemical type.

Note: For additional requirements relating to portable fire extinguishers see WAC 296-800-300.

(j) Equipment, fixtures, and furniture in man locks and special decompression chambers shall be constructed of noncombustible materials. Bedding, etc., shall be chemically treated so as to be fire resistant.

(k) Head frames shall be constructed of structural steel or open frame-work fireproofed timber. Head houses and other temporary surface buildings or structures within 100 feet of the shaft, caisson, or tunnel opening shall be built of fire-resistant materials.

(l) No oil, gasoline, or other combustible materials shall be stored within 100 feet of any shaft, caisson, or tunnel opening, except that oils may be stored in suitable tanks in isolated fireproof buildings, provided such buildings are not less than 50 feet from any shaft, caisson, or tunnel opening, or any building directly connected thereto.

(m) Positive means shall be taken to prevent leaking flammable liquids from flowing into the areas specifically mentioned in the preceding subdivision.

(n) All explosives used in connection with compressed air work shall be selected, stored, transported, and used as specified in part T of this chapter.

(13) Bulkheads and safety screens.

(a) Intermediate bulkheads with locks, or intermediate safety screens or both, are required where there is danger of rapid flooding.

(b) In tunnels 16 feet or more in diameter, hanging walkways shall be provided from the face to the man lock as high in the tunnel as practicable, with at least 6 feet of head room. Walkways shall be constructed of noncombustible material. Standard railings shall be securely installed throughout the length of all walkways on open sides in accordance with Part K of this chapter. Where walkways are ramped under safety screens, the walkway surface shall be skidproofed by cleats or by equivalent means.

(c) Bulkheads used to contain compressed air shall be tested, where practicable, to prove their ability to resist the highest air pressure which may be expected to be used.

WSR 01-10-048
PERMANENT RULES
DEPARTMENT OF
FISH AND WILDLIFE

[Order 01-69—Filed April 26, 2001, 2:57 p.m.]

Date of Adoption: April 6, 2001.

Purpose: To amend WAC 232-12-001, 232-12-071, 232-12-141, 232-28-515, 232-12-004, 232-12-007, 232-12-027, 232-12-271, 232-28-276, 232-12-068, 232-28-248, 232-28-272, 232-28-273, 232-28-02203, 232-28-02205, 232-28-02220, 232-28-02240, 232-28-278 and 232-28-279; adopting WAC 232-28-299, 232-28-290, 232-28-291, 232-28-292 and 232-28-293; and repealing WAC 232-28-258, 232-28-260, 232-12-131, 232-28-274, 232-28-280, and 232-28-281.

Citation of Existing Rules Affected by this Order: Repealing WAC 232-28-258, 232-28-260, 232-12-131, 232-28-274, 232-28-280 and 232-28-281; and amending WAC 232-12-001, 232-12-071, 232-12-141, 232-28-515, 232-12-004, 232-12-007, 232-12-027, 232-12-271, 232-28-276, 232-12-068, 232-28-248, 232-28-272, 232-28-273, 232-28-02203, 232-28-02205, 232-28-02220, 232-28-02240, 232-28-278, and 232-28-279.

Statutory Authority for Adoption: RCW 77.12.040, 77.12.020, 77.32.070, 77.32.530.

Adopted under notice filed as WSR 01-05-135, 01-05-144, 01-05-141, 01-05-138, 01-05-142, 01-05-134, 01-05-140, 01-05-137, 01-05-136, 01-05-143, 01-05-139, 01-05-145, and 01-05-146 on February 21, 2001.

Changes Other than Editing from Proposed to Adopted Version: **WAC 232-12-001 Definition of terms.**

Changes, if any, from the text of the proposed rule and reasons for difference:

Under subsection (5):

- Added the word type to Conibear traps, to avoid use of a brand name and include all traps with similar mechanisms.

WAC 232-12-071 Buying or selling game unlawful.

Changes, if any, from the text of the proposed rule and reasons for difference:

- In the sentence "It is unlawful to offer for sale, sell, purchase, or trade..." the word knowingly was eliminated for clarity.
- Under subsection (c), both "and"s were changed to "or" to make individual items (e.g. gallbladder) stand alone.
- Renumbered the WAC because item (2) must be listed as a separate prohibition because statute (I-713) prohibits the director from issuing a permit for any sale of furs taken with body-gripping traps.

WAC 232-12-141 Wild animal trapping.

Changes, if any, from the text of the proposed rule and reasons for difference:

Under subsection (4)(b)(i):

- Added the words, "and Human Services" to "the United States Department of Health" to be consistent with the statute.

Under subsection (4)(b)(ii):

- Corrected the language to be consistent with the statute.

WAC 232-28-515 Trapping seasons and regulations, 232-12-004 Classification of wild birds, 232-12-007 Classification of wild animals, 232-12-271 Criteria for planting aquatic plants and releasing wildlife, 232-28-272 2000-2001, 2001-2002, and 2002-2003 Black bear and cougar hunting seasons and regulations, 232-28-258 Washington auction hunts, 232-28-260 Special hunting seasons, 232-28-291 Special hunting season permits, 232-28-293 PLWMA raffle hunts, 232-12-131 Permits for special hunting and trapping seasons, 232-28-274 2000 Big game and wild turkey auction permits and raffles, 232-28-280 1999 Deer general seasons and 1999 special permits, 232-28-281 1999-2000 Elk general seasons and 1999-2000 special permits, 232-28-02205 Game management units (GMUs)—Special game areas—Boundary descriptions—Region five, and 232-28-02240 Game management units (GMUs)—Special game areas—Boundary descriptions—Muzzleloader area descriptions.

Changes, if any, from the text of the proposed rule and reasons for difference:

None.

WAC 232-12-027 Game farm license provisions.

Changes, if any, from the text of the proposed rule and reasons for difference:

Under subsection (1):

- Changed possess to possessed to correct a grammatical error.
- Eliminated the wording "by virtue of" and replaced it with the word "under," for clarity.
- Added the word "subsection," for clarity.

Under subsection (6):

- Added the word "inspection" to the second sentence, for clarity.

WAC 232-28-276 2000-01, 2001-02, 2002-03 Official hunting hours and small game seasons.

Changes, if any, from the text of the proposed rule and reasons for difference:

Under Hound Hunting During Deer and Elk Hunting Seasons:

- Added except by public safety removal permit to the last sentence, for clarity.

Under the Mountain Quail section:

- Added the word northern to Bobwhite to be consistent with the species name.

Under Turkey Season Special Regulations:

- Bullet item 3 was eliminated because it is covered in another WAC.

Under Canada Goose September Season:

- Eliminate Goose Management Areas 1 and 3 after Western Washington, for clarity.
- Eliminated the last phrase "for cottontail and snowshoe hare (or Washington hare)," to be consistent with the rest of the WAC.

PERMANENT

WAC 232-12-068 Nontoxic shot requirements.

Changes, if any, from the text of the proposed rule and reasons for difference:

- Added OLF Coupeville and Bayview to the line containing Whidbey Island Seaplane Base pheasant release site to better address potential secondary poisoning to bald eagles.

WAC 232-28-248 Special closures and firearm restriction areas.

Changes, if any, from the text of the proposed rule and reasons for difference:

Under Firearm Restriction Areas - Franklin, Grant, and Adams counties:

- Changed the wording to read: "That part of GMU 381...", instead of "Those parts of GMU 278 and 381...", this is to correct an error. No part of GMU 278 was supposed to be included in this particular Firearm Restriction Area.

Under Firearm Restriction Areas - Pierce County:

- Changed the note from "see GMU 484" to "see GMU 652," to correct an oversight.

WAC 232-28-299 Mandatory report of hunting activity.

Changes, if any, from the text of the proposed rule and reasons for difference:

Note The WAC number has been changed from WAC 232-28-300 to 232-28-299.

Under subsection (2):

- Eliminated the word raffle to reduce confusion with other types of drawings.
- Added sentence: To be eligible for the drawing, hunters must report their hunting activity for each transport tag acquired. This is to increase compliance for deer, elk, bear, and turkey.
- Added sentence: Bag limit: One additional deer or elk. This is to increase compliance for deer, elk, bear, and turkey.
- The word "special" was added before "incentive permit" to distinguish them from other permits.

Under subsection (2)(c):

- The word may was changed to must because it is a requirement.

Under subsection (3):

- Eliminated the last sentence (There is no penalty for hunters not purchasing a hunting license the previous year.), to reduce confusion.

WAC 232-28-290 Washington raffle hunts.

Changes, if any, from the text of the proposed rule and reasons for difference:

Under subsection (6)(b):

- For added clarity the wording was changed to read, "The public must be informed of the date, time, and place of the raffle, and the organization must hold the drawing as specified."

Under subsection (6)(g):

- Require the department's share of the raffle revenue be delivered within 30 days rather than 10 days, to make it consistent with auctions and raffles.

Under subsection (9):

- Changed the wording in the first sentence from "If the winner cannot..." to "If the winner does not...", for clarity.

Under subsection (11):

- Eliminated the sentence, "A hunter may obtain only one hunting license for mountain sheep, mountain goat, or moose annually." This is to correct an oversight, hunters are not restricted to one bighorn sheep, mountain goat, or moose permit in a given license year.

WAC 232-28-292 Washington auction hunts.

Changes, if any, from the text of the proposed rule and reasons for difference:

Under subsection (5)(a):

- For added clarity the wording was changed to read, "The public must be informed of the date, time, and place of the auction and the organization must hold the auction as specified."

Under subsection (5)(e):

- Require the organization to notify the department of the name and address of the successful bidder within 2 days rather than 10 days, to be consistent with auctions and raffles.

Under subsection (7):

- Eliminated the sentence, "A hunter may obtain only one hunting license for mountain sheep, mountain goat, or moose annually." This is to correct an oversight, hunters are not restricted to one bighorn sheep, mountain goat, or moose permit in a given license year.

WAC 232-28-273 2001 Moose, bighorn sheep, and mountain goat seasons and permit quotas.

Changes, if any, from the text of the proposed rule and reasons for difference:

Under permit levels for mountain goats:

- Reduce goat permits in Methow to two (2). This is because a low number of goats were observed during the survey in 2000.

Under Who May Apply (for all three species moose, mountain sheep, and mountain goat):

- Added raffle and auction hunts to the end of the section to be consistent with WAC 232-28-290 and 232-28-292.

WAC 232-28-02203 Game management units (GMUs)—Special game areas—Boundary descriptions—Region three.

Changes, if any, from the text of the proposed rule and reasons for difference:

- GMU 329 Quilomene, added the letters WDFW before the roads 14 and 14.14 for clarification.

WAC 232-28-02220 Game management units (GMUs)—Special game areas—Boundary descriptions—Elk area descriptions.

Changes, if any, from the text of the proposed rule and reasons for difference:

- Elk Area 037 West Bar has been deleted because it is now designated as GMU 330 West Bar.
- A new Elk Area 067 is proposed because damage problems have occurred and a new damage hunt is recommended for this area.

WAC 232-28-278 2000-2002 Deer general seasons and 2001 special permits.

Changes, if any, from the text of the proposed rule and reasons for difference:

Under Branched Antler Restrictions:

- The sentence "Applies to all hunters during any open season" should be changed to: "Applies to all hunters during any general season," for clarity.

Under "Youth and Disabled hunters":

- The subtitle "Eastern Washington Mule Deer" was changed to "Eastern Washington Deer" because any deer, whether whitetail or mule deer is legal.
- A new hunting season for youth and disabled hunters was added allowing youth and disabled to take any whitetail during modern firearm deer season in GMUs 204, 209, 215, and any deer in GMUs 209-248, 260 and 269.

Under Advanced Hunter Education Graduate Seasons:

- The GMUs were changed from 127-142 to 130-142 and the legal deer was changed from "Antlerless Only" to "Whitetail, Antlerless Only" to correct an oversight. This is the same restriction as last year. The 127 unit was dropped from AHE to prevent an overlap with late archery deer.

Under "Hunters 65 and over Disabled or Youth Seasons":

- GMU 127 was deleted from the Eastern Washington Mule Deer Seasons to focus pressure on GMU 142 where damage is severe.
- The legal deer for GMU 142 was changed from "Any Mule Deer" to "Mule deer, 3 pt. min. or antlerless." This change was made to be consistent with the antler point requirement for whitetail deer in the same unit.

Under Early Archery Mule Deer:

- Game Management Units open September 1-30 were changed from "101 through 127, 204 through 247, 249 through 251, 260, 262, 328, 334 through 340, 346 through 368, 372" to "101 through 127, 204, 249 through 251, 260, 262, 328, 334 through 340, 346 through 368, 372." The September 1-15 early archery mule deer seasons were changed from "GMUs 130 through 154, 162 through 178, 181, 186, 248, 254, 266, 269, 272, 278, 284, 381, 382" to "130 through 154, 162 through 178, 181, 186, 209 through 242, 248, 254, 266, 269, 272, 278, 284, 381, 382." The September 16-30 archery mule deer seasons were changed from "130 through 154, 162 through 178, 248, 254, 266, 269, 272, 278, 284, 381, 382" to "130 through 154, 162 through 178, 209 through 242, 248, 254, 266, 269, 272, 278, 284, 381, 382." These changes were made to allow archers to take antlerless mule deer in GMUs 209 through 242 during the period September 16-30.

- Eliminated the Bangor Submarine Base from the open hunting area for persons of disability because the Navy will not allow hunting on the Base this year.

Under Early Archery Eastern Washington Whitetail

Deer:

- The legal deer for GMUs 101 through 124, 204 through 284, was changed from "Any deer" to "Any whitetail Deer" to clarify the legal deer.
- In GMUs 127 through 154, 162 through 186, the legal deer was changed from "3 pt. min. or antlerless" to "Whitetail, 3 pt. min. or antlerless" to clarify the legal deer.

Under late Archery Deer Seasons:

- The ending date for Eastern Washington Mule Deer was errantly listed as December 15 for GMUs 209, 215, 233, 243, 250, 346, 352 the ending date should be December 8 as it was last year.
- Under Early Muzzleloader Deer Seasons, GMU 381 was added to the early Whitetail Deer seasons for any buck and Mule Deer for 3 pt. min. and in late muzzleloader season Mule Deer 3 pt. min. or antlerless. This unit was opened to muzzleloaders for whitetail so mule deer were added to allow taking of whitetail or mule deer during this season.
- Under Special Deer Permit Hunting Seasons the Steptoe hunt special restrictions were changed from "Whitetail, Antlerless" to "Antlerless" to allow taking of antlerless mule deer.
- The permit level for Mayview was changed from 500 to 700 because of damage complaints.
- The boundary description for Prescott B was changed from "That portion of GMU 149 north of Hwy 261" to "That portion of GMU 149 north and east of Hwy 261" for clarification.
- The legal deer for Blue Mountains A and B was changed from whitetail, 3 pt. min or antlerless to any whitetail.

Under Modern Firearm Permit Hunts:

- Permit quotas for the following hunts were changed because of improved buck ratios and the opportunity to take more bucks, the changes are as follows:
 - Chewuch from 15 to 30
 - Pearygin from 15 to 35
 - Gardner from 15 to 25
 - Chiliwist from 5 to 25
 - Alta from 15 to 30
- The permit quota for Beezley East was changed from 200 to 300. This change was made because of recent damage complaints in the area.

Under Muzzleloader Only Deer Permit Hunts:

- The boundary description for Blue Mtns Foothills C was changed from "GMUs 149-154, 162-166" to "149, 154, 162-166," this was changed because there is no unit between 149 and 154.

Under Special Deer Permit Hunts for Hunters 65 or older:

- The boundary description was changed from "GMUs 145-149, 181" to "145, 149, 181," because there is no unit between 145 and 149.

Under Special Youth Deer Permit Hunts:

- The following letter designations were added to hunts to separate hunt opportunities, the changes are as follows:
 - Quilomene "D"
 - Umtanum "D"
 - Wind River "C"
 - Satsop "C"
 - Skookumchuck from "D" to "C"

The following changes to permit quotas were adjusted to reflect changes in hunter success and allocation for each user group. The ending dates were changed to prevent an overlap with late archery elk seasons.

- The hunt dates for Quilomene A were changed from Nov 8-23 to Nov 7-22 and the permit level changed from 92 to 100.
- The hunt dates for Umtanum A were changed from Nov 8-23 to Nov 7-22 and the permit level changed from 95 to 90.
- The hunt dates for Alkali A were changed from Nov 8-23 to Nov 7-22 and the permit level changed from 89 to 80.
- The hunt dates for Alkali B were changed from Nov 8-23 to Nov 7-22 and the permit level changed from 25 to 75.
- The hunt dates for Green River A were changed from Oct 7-13 to Oct 6-10 and permit level increased from 10 to 20.
- Added superscript a to the Green River hunt and added the footnote, Green River deer and elk permit hunters may hunt bear and cougar in GMU 485, during the permit season, with bear and cougar tags.
- Changed the asterisk to superscript b for both GMUs 504 and 554.
- Changed the asterisks for Pysht to superscript c.
- The legal deer for East Klickitat was changed from 3 pt min or antlerless to any deer.
- The Sinlahekin B and Pogue B Archery deer permit hunts were dropped because early archery deer seasons Sept. 16-30 were changed to include antlerless opportunity.
- Changed the footnote asterisks to letter footnotes for clarification.
- Under Muzzleloader Only Deer Permit Hunts the permit quota for Desert C was changed from 3 to 4.
- The permit quota for Quilomene B was changed from 15 to 11.
- The permit quota for Umtanum B was changed from 8 to 9.
- The permit quota for Alkali C was changed from 15 to 12.
- The permit quota for Alkali D was changed from 5 to 8.
- The hunt name Mason Lake was changed to "Mason Lake B."
- The hunt name Satsop was changed to "Satsop C."
- The legal deer for Blue Mtns. Foothills C was changed from Whitetail, 3 pt. min or antlerless to any whitetail.
- Under Archery Only Deer Permit Hunts the permit quota for Desert D was changed from 45 to 62.

- The Quilomene C and Umtanum C hunts were changed from Nov. 21-Dec. 8 to Nov. 23-Dec. 8, to avoid an overlap with modern firearm permit hunts.
- The permit quota for Quilomene C was changed from 146 to 126.
- The permit quota for Umtanum C was changed from 55 to 45.
- The hunt dates for Alkali E were changed from Nov 21 to Dec 8 to Nov 23 to Dec 8 and the permit level changed from 60 to 90. Date changed to prevent an overlap with modern firearm elk season.
- Under Special Permit Hunts for Hunters 65 or older the boundary description for the Blue Mtn Foothills D hunt was changed from GMUs 145-149, 163, 178, 181 to GMUs 145-149, 181.
- Under Special Youth Deer Permit Hunts the following permit hunts were deleted: East Okanogan B, West Okanogan B, Sinlahekin C, Pearygin B, Gardner B, Chiliwist B, Alta B, Big Bend B, Foster Creek, and Moses Coulee B. These permit hunts were replaced by general antlerless opportunity for youth in modern firearm deer seasons.
- The letter "D" was added after Quilomene and Umtanum hunts. The letter "C" was added after Wind River, Satsop, and Skookumchuck hunts for clarification.

WAC 232-28-279 2000-2002 Elk general seasons and 2001-2002 special permits.

Changes, if any, from the text of the proposed rule and reasons for difference:

- The year 2000 should be 2001 in the Bag Limit section.
- Under Elk Tag Areas the last sentence, "The Northwest, Blue Mountains..." was deleted. This sentence no longer applies because all of eastern Washington is on tag area.
- GMU 371 (Alkali) was dropped from the spike only GMUs because the unit is not open in general seasons.
- The Harvest Report Card section was deleted because it is now covered in another WAC.
- Added GMU 371 (Alkali) as a permit only unit in eastern Washington, for clarification.
- The "Hunting Method" for archery was modified to read, "Bow and arrow only as defined by WAC 232-12-054." for clarification.
- In Early Archery Elk Seasons, the first entry (GMUs 101 through 109, 121 through 142, 243, 247, 249, 250, 334) was changed to GMUs 101 through 142, 243, 247, 249, 250, 334.
- The legal elk for GMUs 113-117 in the Early Archery Elk Season was changed from any bull to any elk. These corrections were made because elk transplants to northeast Washington (GMU 117) have been successful, the elk have settled, and we now can open the season to any elk for archers.
- Under Early Archery Elk Seasons for western Washington, the open GMUs were changed for 3 pt. min. or antlerless from "407, 448, 501 through 673, 684, and Long Island," to "407, 408, 501 through

505, 550, 554, 558, 560, 572, 654, 660, 663, 667 through 673, 684 and Long Island."

- Under the Early Archery Elk seasons for western Washington, the open GMUs were changed for 3 pt. min. from "460, 466, 510, 513, 516, 601, 602, 603, 612 through 648, 624 through 633, 638 through 651, 652, 653, 658, 666, 681" to "460, 466, 506, 510, 513, 516, 520, 530, 601, 602, 603, 612 through 618, 624 through 633, 638 through 651, 652, 653, 658, 666, 681." This changes was made to drop antlerless opportunity in early archery elk seasons in GMUs 506, 520 and 530.
- In Late Archery Elk Seasons, GMUs 101, 105, 121 through 127 was changed to GMUs 101, 105, 117 through 127.
- Also in Late Archery Elk Seasons, the listing for GMU 117 was deleted because it was incorporated in the listing above.
- Under western Washington Late Archery Elk Seasons, the open units for 3 pt. min. were changed from "506, 520, 530, 603, 612, 615, 638, 648, and 652" to "603, 612, 615, 638, 648, and 652."
- Added GMUs 506, 520, 530 to 3 pt. min. or antlerless, Nov. 21-Dec. 2, 2001, Nov. 20-Dec. 1, 2002. Added GMUs 506, 520, 530 to 3 pt. min. hunts Dec. 3-15, 2001, and Dec. 2-15, 2002. These changes were made to allow archers to take antlerless elk Nov. 21-Dec. 2, 2001 and Nov. 20-Dec. 1, 2002 instead of during early seasons that may be subject to access restrictions.
- The "Hunting Method" for muzzleloader was modified to read, "Muzzleloader only as defined by WAC 232-12-051." for clarity.
- Under Early Muzzleloader Elk Seasons change the legal elk from antlerless to spike or antlerless in "That part of GMU 368..." This was made because the unit is already open to spike bull hunting at this time.
- Under Western Washington Early Muzzleloader Elk Seasons GMU 501 was listed under both the 3 pt. min. and 3 pt. min. or antlerless seasons. It should be dropped from the 3 pt. min. season.
- Under Late Eastern Washington Muzzleloader Elk Seasons the following hunt was added: GMUs 101, 105, 121, that part of GMU 124 west of Hwy 395, Oct. 27-Nov. 4, 2001, Oct. 28-Nov. 3, 2002, open for any elk. This change was made to give all 3 user groups hunting opportunities in this area.
- In the Special Elk Hunts Open to Specified Tag Holders, the hunts in GMUs 127-142 and Grant, Adams, Douglas, Franklin, Okanogan, and Benton counties etc. should allow the EA, EM, or EF elk tag. This change allows all these user groups to hunt these areas.
- The two ML Area 941 hunts (one for muzzleloader and the other for archery) were proposed to be dropped but are now proposed to be open to help alleviate damage complaints.

The following corrections were made to the Special Elk Permit Hunting Seasons because of recent field survey infor-

mation and hunter report success information. All the asterisks were changed to superscripts for ease of reading and clarification.

- The permit quota for Blue Creek A was changed from 4 to 3.
- In the Dayton A modern firearm bull permit hunt, the boundary description was changed from "Part of GMU 162 and 163****" to "GMU 162." This is not a change from last year.
- The permit quota for Mtn. View A was changed from 7 to 8.
- The West Bar A and B Spike bull permit hunts were deleted because of poor bull ratios in the Colockum herd.
- The permit quota for Peaches Ridge A was changed from 69 to 86.
- The permit quota for Observatory A was changed from 46 to 48, special restrictions changed from any bull to any elk, and GMU 371 was added to the boundary description. Also, the permit hunt was moved to the Modern Firearm Elk permit hunts on the following page. This change was made to allow hunters to take any elk.
- The permit quota for Goose Prairie A was changed from 206 to 176.
- The permit quota for Bethel A was changed from 135 to 120.
- The permit quota for Rimrock A was changed from 108 to 103.
- The permit quota for Cowiche A was changed from 28 to 26.
- The permit hunt for Margaret A was changed from 19 to 18.
- The permit quota for Toutle A was changed from 85 to 90.
- The permit quota for Olympic A was changed from 13 to 21.
- The phrase "North and west of Jimmy Come Lately Creek and Grey Wolf River and" was deleted from the footnote.
- Under Modern Firearm Elk Permit Hunts, the date for the Three Forks hunt was changed from Oct 22-Nov 4 to Oct 27-Nov 4.
- The date for the Mount Spokane hunt was changed from Oct 22-Nov 4 to Oct 27-Nov 4.
- The date for the Blue Creek E hunt was changed from Oct 22-Nov 4 to Oct 27-Nov 4.
- The name Payton was changed to Dayton A and the dates for the hunt changed from Oct 22-Nov 4 to Oct 27-Nov 4, the permit quota changed from 75-100.
- The permit quota for Shushuskin was changed from 50 to 75.
- The permit quota for Malaga B was increased from 37 to 75.
- A new hunt Peshastin A was added Dec. 1-31, Any Elk, EF or EM tag, Elk Area 033 for 5 permits. This hunt is recommended for damage control.
- The hunt West Bar changed to West Bar A Oct. 22-31. A new hunt West Bar B was added Nov. 1-4, antlerless, EF or EM in GMU 330 for 10 permits.

- The permit quota for Umtanum A was changed from 440 to 400.
- A new hunt Cleman, Dec 9-31, Antlerless, EF or EM, ML Area 944, with 75 permits was added for damage control.
- The permit quota for Little Naches A was changed from 270 to 250.
- The permit quota for Nile was changed from 250 to 300.
- The permit quota for Bumping was changed from 500 to 530.
- The permit quota for Bethel B was changed from 250 to 275.
- The permit quota for Rimrock B was changed from 255 to 275.
- The permit quota for Cowiche B was changed from 160 to 180.
- The hunt Alkali A was deleted because this GMU was included in the Observatory hunt.
- The date for the Willapa Hills hunt was changed from Nov 8-12 to Nov 7-11.
- The Raymond C hunt permit quota changed from 10 to 15.
- The Raymond D hunt permit quota changed from 10 to 15.
- The year for the Raymond D hunt was added to correct an oversight.
- A new hunt Raymond E, Feb. 1-28, 2002, Antlerless, WF or WM, Part of GMUs 506 and 673, and 15 permits, was added for damage control.
- The Dungeness A hunt was changed from Nov 7-11 to Nov 28-Dec 2 and the permit quota changed from 9 to 6.
- The Dungeness B hunt was changed from Nov 7-11 to Dec 5-9, 3 pt min changed to antlerless, and permit quota changed from 4 to 6.
- A new hunt, Dungeness C was added. Dates Dec 12-16; Antlerless, WF or WM, Part of GMU 621, and 6 permits.
- The year 2002 was added to the Puyallup A hunt.
- The hunt "Minot" was changed to "North Minot" and the boundary changed from "Part of GMU 660" to "Elk Area 067."
- The year 2002 was added to the date Jan 15-23 for the Deschutes A hunt.
- Under Muzzleloader Bull Permit Hunts the permit quota for Mountain View B was changed from 2 to 1.
- The permit quota for Peaches Ridge B was changed from 9 to 11.
- Observatory B special restrictions changed from any bull to any elk and GMU 371 added to the hunt area and the hunt moved to the next table, Muzzleloader Permit Hunts.
- The permit quota for Goose Prairie B was changed from 26 to 22.
- The permit quota for Bethel C was changed from 18 to 17.
- The permit quota for Rimrock C was changed from 14 to 13.
- The Alkali hunt was deleted because it was combined with units in Observatory.
- The permit quota for Toutle C was changed from 16 to 15.
- The permit quota for the Olympic B hunt changed from 2 to 3.
- The Dungeness C hunt was deleted.
- The permit quota for Columbia A and B were increased from 40 to 50 in both hunts for damage control.
- The legal elk for West Bar C was changed from Spike Bull to Antlerless.
- The Alkali B hunt was deleted because GMU 371 was added to the Observatory hunt.
- The year 2001 was replaced by the year 2002 for the Mossyrock A, Randle A, and Boistfort hunts.
- A new hunt for Peshastin B was added after Malaga D as follows: Peshastin B, Aug. 18-Sept. 23, Antlerless, EM, Elk Area 033, 20 permits.
- The hunt name Minot Peak was changed to "North Minot B" and the boundary changed from "GMU 660***" to "Elk Area 067."
- The permit quota for Raymond A was increased from 10 to 15 for damage control.
- The two asterisk footnote below the table was changed from "That part of GMU 162 east of North Touchet Rd, outside National Forest." to superscript n "That part of GMU 162 east of North Touchet Rd excluding National Forest. Mostly private land, winter road closures in GMU 162."
- The three asterisk footnote "That part of GMU 660..." was deleted.
- Under Archery Bull Permit Hunts: (The title was changed to Archery Permit Hunts because some of the permit hunts are not restricted to bulls.)
 - The permit quota for Dayton C was changed from 7 to 4.
 - The permit quota for Tucannon C was changed from 3 to 1.
 - The permit quota for Wenah D^a was changed from 3 to 2.
 - The permit quota for Mtn. View C was changed from 8 to 6.
 - The permit quota for Peaches Ridge C was changed from 53 to 88.
- The permit quota for Observatory C was changed from 28 to 40, special restrictions changed from any bull to any elk and GMU 371 was added to the hunt area.
- The permit quota for Goose Prairie C was changed from 138 to 267.
- The permit quota for Bethel D was changed from 87 to 100.
- The permit quota for Rimrock D was changed from 56 to 87.
- The permit quota for Cowiche D was changed from 22 to 20.
- The hunt "Alkali" was deleted because GMU 371 was added to the Observatory hunt.
- The permit quota for Margaret D was changed from 6 to 8.

- The permit quota for Toutle D was changed from 42 to 55.
- The permit quota for Olympic C was changed from 3 to 6.
- The year 2002 was added to the date for the Mashel B hunt to correct an error.
- The permit quota for Raymond B was changed from 10 to 15.
- The Raymond A hunt was dropped because it was replaced by a muzzleloader hunt.
- The Dungeness D hunt was deleted, as a result of negotiations with Pt. No Pt. Treaty Council.
- The hunt name "Puy-muck" was changed to "Tan-wax."
- Under Advanced Hunter Education Permit Hunts the South Bank A hunt was deleted.
- The single asterisk footnote "Firearm Restriction Area - Hunters may use only muzzleloader equipment" was deleted.
- The South Bank B hunt was deleted because it was replaced by Chehalis Valley.
- The two Skookumchuck hunts were labeled Skookumchuck A and Skookumchuck B for clarification.
- The permit quota for Centralia Mine A and B was reduced from 4 to 2 for each hunt because some of the hunt area will be mined.
- The boundary for Chehalis Valley D was changed from "GMU 667" to "Elk Area 066."
- The three asterisk footnote was deleted.

April 26, 2001

Debbie Nelson

for Russ Cahill, Chairman
Fish and Wildlife Commission

AMENDATORY SECTION (Amending Order 00-134, filed 7/31/00, effective 8/31/00)

WAC 232-12-001 Definition of terms Definitions used in rules of the commission are defined in RCW 77.08.010. In addition, unless otherwise provided:

(1) A "valid" license, permit, tag, stamp or catch record card means a license, permit, tag, stamp, or catch record card that was issued to the bearer for the current season and is

required to hunt, fish or possess wildlife and has not been altered except as provided by rule of the commission.

(2) "Falconry" means possession, control, or use of a raptor for the purpose of hunting and free flight training.

(3) "Anadromous game fish" means:

(a) Steelhead trout, *Oncorhynchus mykiss*, defined as any searun rainbow trout over twenty inches in length

(b) Searun cutthroat, *Oncorhynchus clarkii*

(c) Searun Dolly Varden, *Salvelinus malma*

(4) "Handgun" means any pistol, revolver or short fire-arm with a barrel length of less than sixteen inches and does not have a shoulder stock.

(5) "Body-gripping trap" means a trap that grips an animal's body or body part. Body-gripping trap includes, but is not limited to, steel-jawed leghold traps, padded-jaw leghold traps, Conibear-type traps, neck snares, and non-strangling foot snares. Cage and box traps, suitcase-type live beaver traps, and common rat and mouse traps are not considered body-gripping traps.

(6) "Raw fur" means a pelt that has not been processed for purposes of retail sale.

(7) "Padded foot-hold trap" means a trap designed and set to grip the foot of a wild animal, both jaws of which are covered with rubber pads having a minimum thickness of one-eighth inch.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order 177, filed 1/28/82)

WAC 232-12-071 Buying or selling game unlawful.

Unless prohibited by federal regulations, nonedible parts of wild animals, game birds or game fish lawfully taken may be offered for sale, sold, purchased or traded, **except**,

(1) It is unlawful to offer for sale, sell, purchase or trade the following unless authorized by a written permit issued by the director: ((cougar, mountain sheep, mountain goat, velvet antlers of deer or elk or the gall bladder, claws and teeth of bear, except those claws and teeth permanently attached to a full bear skin or mounted bear, unless the offer for sale, sale, purchase or trade is authorized by a written permit issued by the director.))

(a) nonedible parts of cougar, bighorn sheep, or mountain goat.

(b) velvet antlers of deer or elk.

(c) gall bladder, claws, or teeth of bear, except those claws or teeth permanently attached to a full bear skin or mounted bear.

(2) It is unlawful to knowingly buy, sell, or otherwise exchange, or offer to buy, sell, or otherwise exchange the raw fur or carcass of a wild animal trapped in Washington with a body-gripping trap, whether or not pursuant to permit.

AMENDATORY SECTION (Amending Order 00-197, filed 9/27/00, effective 10/28/00)

WAC 232-12-141 Wild animal trapping (1) The trapping season authorizes the taking of furbearing animals for their hides and pelts only. Furbearers may not be taken from the wild and held alive for sale or personal use without a special permit pursuant to WAC 232-12-064.

(2) Any wildlife trapped for which the season is not open shall be released unharmed. Any wildlife that cannot be released unharmed must be left in the trap, and the department of fish and wildlife must be notified immediately.

(3) Lawfully trapped wild animals must be lethally dispatched or immediately released. A firearm may be used to dispatch trapped animals.

(4) It is unlawful to trap for wild animals:

(a) ~~((By any means other than padded foot hold traps having a minimum rubber pad thickness of one eighth inch, unpadded foot hold traps, cage (live) traps, kill traps and snares-))~~ with body-gripping traps, EXCEPT as provided for in subsection (b).

~~((b) With an unpadded foot hold trap, unless the trap has jaws with a minimum jaw face width of one fourth inch, or the trap is set so that it completely submerges and drowns any trapped animal, except that unpadded foot hold traps not meeting the one fourth inch jaw face requirement may be used on nondrowning sets on private property with landowner permission for the purpose of protecting livestock, domestic animals, private property, or public safety.~~

~~(e) With a steel trap having a jaw spread exceeding seven and one half inches, except that a kill trap having a jaw spread exceeding seven and one half inches is lawful when set beneath the water surface.~~

~~(d) On dry land, with a nondrowning set with a No. 3 size or larger unpadded foot hold trap if it does not have jaw spacing of at least three sixteenth of one inch when the trap is sprung-~~

~~(e) With a steel trap with teeth or serrated edges-))~~

(b) Conibear-type traps in water, non-strangling foot snares, and padded foot-hold traps may be used for the following purposes with a permit issued by the Director:

(i) To protect public health and safety, in consultation with the Department of Social and Health Services or the United States Department of Health and Human Services.

(ii) To abate damages caused to private property, domestic animals, livestock or timber, that cannot be reasonably abated by nonlethal control tools. Any person requesting a damage control permit must apply in writing, stating the threat or damages, the nonlethal control methods attempted or why they cannot be applied, and agree to use the above traps for no more than thirty days under the permit granted.

(iii) To protect threatened or endangered species, if such traps are used by Department employees or agents.

(iv) To conduct wildlife research. EXCEPT that Conibear-type traps are prohibited for this purpose.

~~((f)) (c) Unless kill traps(-, including foot hold drowning sets-))~~ are checked and animals removed within seventy-two hours.

~~((g)) (d) Unless animals captured in restraining traps (any nonkilling set) are removed within twenty-four hours of capture.~~

~~((h) With a neck or body snare attached to a spring pole or any spring pole type of device-))~~

~~((i)) (e) Using game birds, game fish or game animals for bait, except nonedible parts of game birds, game fish or game animals may be used as bait.~~

~~((j)) (f) Within thirty feet of any exposed meat bait or nonedible game parts which are visible to flying raptors.~~

(5) Game bird feathers may be used as an attractor.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order 00-197, filed 9/27/00, effective 10/28/00)

WAC 232-28-515 Trapping seasons and regulations.
Trapping Regulations

To be issued your first Washington State trapping license an individual must pass the Washington State trapper education exam.

A trapping license will only be issued to a trapper that has returned the mandatory trapper report of catch postmarked on or before April 10 of the previous year. A trapper that fails to submit a report of catch must wait one year before purchasing another trapping license. False reports will be considered the same as failure to return the catch report.

It is unlawful to: Trap for wild animals before October 1, and after March 15, in western Washington, except that owners of, or persons legally controlling a property (or their designee) may trap unclassified wild animals that are causing damage or depreddating on said property.

It is unlawful to: Place traps or establish drowning wires and weights prior to 7:00 a.m. on the opening date of the trapping season. All opening and closing season dates are inclusive.

Trapping Seasons:

General Western Washington Trapping Seasons (Clallam, Clark, Cowlitz, Grays Harbor, Island, Jefferson, King, Kitsap, Lewis, Mason, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Thurston, Wahkiakum, Whatcom counties):

SPECIES	OPENING DATE	CLOSING DATE
Bobcat, Red Fox, and Weasel	November 18, 2000	February 15, 2001
	November 17, 2001	February 15, 2002
	November 16, 2002	February 15, 2003
Marten, Mink, Muskrat, and Raccoon	November 18, 2000	January 31, 2001
	November 17, 2001	January 31, 2002
	November 16, 2002	January 31, 2003
Beaver and River Otter	December 9, 2000	February 15, 2001
	December 8, 2001	February 15, 2002
	December 14, 2002	February 15, 2003

PERMANENT

Exceptions to General Western Washington Trapping Seasons:

Game Management Unit 522 (Loo-wit) (Cowlitz and Skamania counties) is closed to all trapping.

Island County
The red fox season is closed.

Lewis County
Green River drainage, above and including Miners Creek drainage, is closed to all trapping except for bobcat and coyote.

Skagit and Whatcom counties
Ross Lake National Recreation Area is closed to all trapping. Red fox season is closed, except within the boundaries of Mount Baker-Snoqualmie and Okanogan National Forests.

Skamania County
The following areas are closed to all trapping, except for bobcat and coyote: Muddy River drainage, above and including Bean Creek drainage; Pine Creek drainage above USFS Road 83; and Green River drainage, above and including Miners Creek drainage.

General Eastern Washington Trapping Seasons (Adams, Asotin, Benton, Chelan, Columbia, Douglas, Ferry, Franklin, Garfield, Grant, Kittitas, Klickitat, Lincoln, Okanogan, Pend Oreille, Spokane, Stevens, Walla Walla, Whitman, and Yakima counties):

SPECIES	OPENING DATE	CLOSING DATE
Badger, Beaver, Bobcat, Mink, Muskrat, Raccoon, Red Fox, and Weasel	November 11, 2000	February 28, 2001
	November 10, 2001	February 28, 2002
	November 9, 2002	February 28, 2003
Marten	December 15, 2000	January 31, 2001
	December 15, 2001	January 31, 2002
	December 15, 2002	January 31, 2003
River Otter (Season Bag Limit is 6 River Otter in Eastern Washington)	November 11, 2000	February 28, 2001
	November 10, 2001	February 28, 2002
	November 9, 2002	February 28, 2003

Exceptions to General Eastern Washington Trapping Seasons:

River otter trapping season is closed in all Eastern Washington counties, except that it is open in Chelan, Ferry, Klickitat, Kittitas, Okanogan, Pend Oreille, Spokane, Stevens, and Yakima counties, as well as in the Snake and Walla Walla River drainages.

Chelan County
Beaver season is closed in Swakane and Mudd Creek drainages.

Kittitas County
Beaver season is closed in the following drainages: North fork of Tarpiscan Creek and Umtanum Creek.

Urban Trapping Areas: Special Regulations and Trap Restrictions

The following described areas are closed to the taking of classified furbearing animals, and coyote, opossum, nutria, and skunk, by the use of body-gripping or ((foot-hold;)) kill((-or snare)) traps ((except muskrat and mink may be taken with a number one and one half foot hold drowning set or a 110 instant kill trap during lawful trapping seasons as established by the fish and wildlife commission. In these areas all traps or devices, not capable of killing the animal must be checked and the animal removed within 24 hours.)) **except by permit under WAC 232-12-141.**

Thurston County, within the established city limits (including county islands) of Lacey, Olympia, and Tumwater.

Within Snohomish, King, and Pierce counties: Beginning at the confluence of Snohomish River and Puget Sound; east up Snohomish River to Interstate 5 (I-5); south on I-5 to Interstate 405 (I-405); south on I-405 to I-5; south on I-5 to Pioneer Way; east on Pioneer Way to Waller Road; south on Waller Road to SR 512; west on SR 512 to Highway 7; south on Highway 7 and Highway 507 to Pierce County line; north on Pierce County line to Puget Sound; north along coast to mouth of Snohomish River and point of beginning.

AMENDATORY SECTION (Amending Order 491, filed 5/2/91, effective 6/2/91)

WAC 232-12-004 Classification of wild birds (1)

Game birds include:

Common Name	Scientific Name
migratory waterfowl	Anatidae
<u>wild</u> turkey	<i>Meleagris gallopavo</i>
blue grouse	((Dendragapus)) <i>Falcipennis obscurus</i>
spruce grouse	<i>Dendragapus canadensis</i>
ruffed grouse	<i>Bonasa umbellus</i>
"Forest grouse" means blue, spruce, or ruffed grouse	
sharp-tailed grouse	<i>Tympanuchus phasianellus</i>
((sage grouse)) <u>greater sage-grouse</u>	((Centrocercus)) <i>Centrocercus urophasianus</i>
white-tailed ptarmigan	<i>Lagopus leucurus</i>
California quail	<i>Callipepla ((californicus)) californica</i>
mountain quail	<i>Oreortyx pictus</i>
<u>northern</u> bobwhite ((quail))	<i>Colinus virginianus</i>
scaled quail	<i>Callipepla squamata</i>
chukar	<i>Alectoris chukar</i>
ring-necked pheasant	<i>Phasianus colchicus</i>
Gray (Hungarian) partridge	<i>Perdix perdix</i>

PERMANENT

Common Name	Scientific Name
"Upland bird" means quail, chukar, pheasant, or partridge	
<u>American</u> coot	<i>Fulica americana</i>
common snipe	((Capella)) <i>Gallinago gallinago</i>
band-tailed pigeon	<i>Columba fasciata</i>
mourning dove	((Zenaidura)) <i>Zenaida macroura</i>

(2) Predatory birds include:

Common Name	Scientific Name
<u>black-billed</u> magpie	<i>Pica</i> ((pica)) <u>hudsonia</u>
<u>American</u> crow	<i>Corvus brachyrhynchos</i>
<u>European</u> starling	<i>Sturnus vulgaris</i>
((House)) <u>house</u> (English) sparrow	<i>Passer domesticus</i>

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order 614, filed 10/14/93, effective 11/14/93)

WAC 232-12-007 Classification of wild animals (1) Game animals include:

Common Name	Scientific Name
eastern cottontail	<i>Sylvilagus floridanus</i>
Nuttall's cottontail	<i>Sylvilagus nuttallii</i>
snowshoe hare	<i>Lepus americanus</i>
white-tailed jackrabbit	<i>Lepus townsendii</i>
black-tailed jackrabbit	<i>Lepus californicus</i>
fox	<i>Vulpes vulpes</i>
black bear	<i>Ursus americanus</i>
raccoon	<i>Procyon lotor</i>
cougar	((Felis)) <i>Puma concolor</i>
bobcat	<i>Lynx rufus</i>
Roosevelt and Rocky Mountain elk	<i>Cervus elaphus</i>
mule deer and black-tailed deer	<i>Odocoileus hemionus</i>
white-tailed deer	<i>Odocoileus virginianus</i>
moose	<i>Alces alces</i>
pronghorn	<i>Antilocapra americana</i>
mountain goat	<i>Oreamnos americanus</i>
California and Rocky Mountain bighorn sheep	<i>Ovis canadensis</i>
bullfrog	<i>Rana catesbeiana</i>

(2) Furbearing animals are game animals and include:

Common Name	Scientific Name
beaver	<i>Castor canadensis</i>
muskrat	<i>Ondatra zibethicus</i>
fox	<i>Vulpes vulpes</i>
raccoon	<i>Procyon lotor</i>
marten	<i>Martes americana</i>
short-tailed weasel or ermine	<i>Mustela erminea</i>
long-tailed weasel	<i>Mustela frenata</i>
mink	<i>Mustela vison</i>
badger	<i>Taxidea taxus</i>
river otter	<i>Lutra canadensis</i>
bobcat	<i>Lynx rufus</i>

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order 520, filed 11/22/91, effective 12/23/91)

WAC 232-12-027 Game farm license provisions. It is unlawful to operate a game farm without a current, valid Washington state game farm license.

(1) Game farms licensed prior to January 1, 1992, may continue to possess, propagate, sell and transfer wildlife they lawfully ~~((possess))~~ possessed on January 1, 1992, ~~((by virtue of))~~ under their license issued by the department. Transfers of wildlife other than those species listed under ~~((2))~~ subsection (2) are restricted to licensed game farms authorized by written license to possess said wildlife.

(2) Game farms licensed on or after January 1, 1992, may purchase, possess, propagate, sell or transfer the following wildlife:

(a) Game birds - pheasant, of the genus *Phasianus*; gray partridge of the genus *Perdix*; chukar ~~((partridge))~~ of the genus *Alectoris*; quail of the genus ~~((Lophortyx))~~ *Colinus*, *Callipepla*, and *Oreortyx*; waterfowl of the family *Anatidae*.

(3) Application for a game farm license shall be made on a form provided by the department.

(4) The director or designee of the director may issue, with conditions or restrictions, a game farm license, if the applicant meets the requirements of subsection (1) or (2) above and complies with the following criteria:

(a) The applicant is the owner or tenant of or has a possessory interest in the lands, waters, and riparian rights shown in the application.

(b) The rearing and holding facilities are adequate and structurally sound to prevent the egress of game farm wildlife.

(c) Operating conditions are clean and humane.

(d) No hazards to state wildlife exist from the operation.

(e) The license covers only the immediate premises and areas described on the application where wildlife will be held.

PERMANENT

(5) Holders of a game farm license must make annual reports no later than the 15th of January to the director on forms to be furnished by the department.

(6) A licensed game farm must be inspected annually. All inspection costs will be paid by the licensee. The inspection must occur during the months of June, July, or August. An inspection form will be provided by the department and must be completed and signed by a licensed veterinarian or an agent authorized by the department. The inspection form must accompany the annual report and be submitted to the director no later than the 15th day of January.

(7) A game farm license is not required for captive-bred mink, *Mustela vison*, and captive-bred silver fox, *Vulpes fulva*, lawfully acquired from a licensed breeder or fur farm and held for fur farming purposes.

AMENDATORY SECTION (Amending Order 521, filed 11/22/91, effective 12/23/91)

WAC 232-12-271 Criteria for planting aquatic plants and releasing wildlife (1) Release by persons other than the director. It is unlawful for persons other than the director to plant aquatic plants or release any species, subspecies, or hybrids of animals which do not already exist in the wild in Washington. If such species, subspecies, or hybrid does already exist in the wild in Washington, it may be released within its established range by persons other than the director, but only after obtaining a permit from the director.

(a) Application for a permit must be made on a form provided by the department. It must be submitted at least thirty days prior to acquisition of the wildlife or aquatic plants intended for release or planting, and must provide all information indicated.

(b) Permits will only be issued if the director determines there will be no adverse impact on the wildlife or wildlife habitat of the state.

(c) Each permit shall require that at least thirty days prior to planting or release of wildlife or aquatic plants they must be made available for inspection by the director. It shall be the responsibility of the applicant to show that the wildlife will not pose a disease threat. If the director is not satisfied that the wildlife or aquatic plants do not pose a disease threat, they shall not be released or planted in the state. Director approval for release or planting may be withdrawn for cause.

(d) Each permit shall require that an applicant intending to release wildlife in the state shall report immediately to the director the outbreak of any disease among the wildlife intended to be released. If the director determines that such outbreak presents a threat to the wildlife of the state, the director may immediately order such action as necessary including quarantine or destruction of stock, sterilization of enclosures and facilities, cessation of activities, and disposal of wildlife in a manner satisfactory to the director.

(e) Each permit shall require that wildlife to be released shall not be branded, tattooed, tagged, fin clipped or otherwise marked for identification without approval of the director or as required in WAC 232-12-044.

(f) Legally acquired pheasant of the genus (~~Phasianus~~) *Phasianus*; gray partridge of the genus (~~Pardix~~) *Pardix*;

chukar (~~partridge~~) of the genus (~~Alectoris~~) *Alectoris*; quail of the genus (~~Lophortyx~~) (~~Callipepla~~) *Callipepla* and (~~Colinus~~) *Colinus*; and (~~mallard ducks of the species~~) mallards (~~Anas platyrhynchos~~) (*Anas platyrhynchos*) may be released without a permit for purposes of dog training, and hunting pursuant to WAC 232-12-044. Game birds released for these purposes must be purchased from facilities that have been inspected by a certified veterinarian within the past twelve months.

(2) Release by the director. The director may plant aquatic plants or release animal species, subspecies, or hybrids which have been planted or released previously in Washington if they do not pose a disease threat and if planting or release will not cause adverse impact on the wildlife or wildlife habitat of the state. Before releasing any species, subspecies, or hybrid of animal not already existing in the wild in Washington, the director shall report to the commission on the planned release, stating the basis for determining that the planned release fulfills the criteria set forth herein. The director may release nonnative species, subspecies, or hybrids not previously released in Washington only if the director in his or her sole discretion has determined that:

(a) There is no reasonable expectation of adverse impact on the wildlife or wildlife habitat of the state and there is an adequate plan for evaluating such impact following the release;

(b) The commission has classified the species, subspecies, or hybrids to be released pursuant to RCW 77.12.020;

(c) Suitable habitat is available;

(d) The nonnative species, subspecies, or hybrids to be released are free of exotic pathogens;

(e) The release serves the public interest.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

* These are lawful hunting hours (one-half hour before sunrise to one-half hour after sunset) for game animals and forest grouse (ruffed, blue, spruce) during established seasons.

Exceptions:

- 1) Bobcat and raccoon are exempt from hunting hour restrictions during established bobcat and raccoon seasons except when that area is open to modern firearm hunting of deer or elk, hunting hours shall be one-half hour before sunrise to one-half hour after sunset.
- 2) Hunting hours for falconry seasons (except migratory game bird seasons) are exempt from these hunting hours, except on designated pheasant release sites.

Hound Hunting During Deer and Elk Hunting Seasons

It is unlawful to hunt any wildlife at night or wild animals with dogs (hounds) during the months of September, October, or November in any area open to a center-fire rifle deer or elk season. The use of hounds to hunt black bear, cougar (EXCEPT by public safety removal permit), and bobcat is prohibited year around.

BOBCAT

Bag and Possession Limits: No Limit

OPEN SEASON: State-wide

Sept. 5, 2000-Mar. 15, 2001; Sept. 4, 2001-Mar. 15, 2002; Sept. 3, 2002-Mar. 15, 2003.

RACCOON

Bag and Possession Limits: No Limit

OPEN SEASON: State-wide, except CLOSED on Long Island within Willapa National Wildlife Refuge.

Sept. 5, 2000-Mar. 15, 2001; Sept. 4, 2001-Mar. 15, 2002; Sept. 3, 2002-Mar. 15, 2003.

FOX

Bag and Possession Limits: No Limit

OPEN SEASON: State-wide, except CLOSED within the exterior boundaries of the Mount Baker-Snoqualmie, Okanogan, Wenatchee, and Gifford Pinchot National Forests and GMUs 407 and 410.

Sept. 5, 2000-Mar. 15, 2001; Sept. 4, 2001-Mar. 15, 2002; Sept. 3, 2002-Mar. 15, 2003.

COYOTE

Bag and Possession Limits: No Limit

OPEN SEASON: State-wide, year around except CLOSED from September 15 to November 30 in the Pasayten Wilderness, GMUs 426 and 450, and those portions of GMUs 218, 245, and 448 within the external boundaries of the Mount Baker-Snoqualmie, Okanogan, and Wenatchee National Forests. However, coyote may only be killed and/or pursued with hounds during the following period: Sept. 5, 2000-Mar. 15, 2001; Sept. 4, 2001-Mar. 15, 2002; Sept. 3, 2002-Mar. 15, 2003; except coyote may be hunted year around with hounds in Grant, Adams, Benton, and Franklin counties.

FOREST GROUSE (BLUE, RUFFED, AND SPRUCE)

Bag and Possession Limits: Three (3) grouse per day, with a total of nine (9) grouse in possession at any time; straight or mixed bag.

PERMANENT

State-wide: Sept. 1-Dec. 31, 2000; Sept. 1-Dec. 31, 2001; Sept. 1-Dec. 31, 2002.

PTARMIGAN, SAGE, AND SHARP-TAILED GROUSE

Season closed state-wide.

Upland Birds

Eastern Washington

Ring-necked Pheasant

Bag and Possession Limits: Three (3) cock pheasants per day, with a total of fifteen (15) cock pheasants in possession at any time.

Youth Season: Sept. 23 and 24, 2000; Sept. 22 and 23, 2001; Sept. 21 and 22, 2002. Open only to youth hunters accompanied by an adult at least 18 years old.

Regular Season: Oct. 7-Dec. 31, 2000; Oct. 6-Dec. 31, 2001; Oct. 5-Dec. 31, 2002.

Chukar ((Partridge))

Bag and Possession Limits: Six (6) chukar per day, with a total of eighteen (18) chukar in possession at any time.

Regular Season: Oct. 1, 2000-Jan. 15, 2001; Oct. 1, 2001-Jan. 21, 2002; Oct. 1, 2002-Jan. 20, 2003.

Gray (Hungarian) Partridge

Bag and Possession Limits: Six (6) gray partridges per day, with a total of eighteen (18) gray partridges in possession at any time.

Regular Season: Oct. 1, 2000-Jan. 15, 2001; Oct. 1, 2001-Jan. 21, 2002; Oct. 1, 2002-Jan. 20, 2003.

Mountain Quail

Season closed throughout Eastern Washington.

((Valley and Bobwhite Quail)) California (valley) Quail and northern Bobwhite

Bag and Possession Limits: Ten (10) quail per day, with a total of thirty (30) quail in possession at any time, straight or mixed bag.

Youth Season: Sept. 23 and 24, 2000; Sept. 22 and 23, 2001; Sept. 21 and 22, 2002. Open only to youth hunters accompanied by an adult at least 18 years old.

Regular Season: Oct. 7, 2000-Jan. 15, 2001; Oct. 6, 2001-Jan. 21, 2002; Oct. 5, 2002-Jan. 20, 2003.

Yakama Indian Reservation: The 2000-01, 2001-02, 2002-03 Upland bird seasons within the Yakama Indian Reservation shall be the same as the season established by the Yakama Indian Nation.

Western Washington

Ring-necked Pheasant

Bag and Possession Limits: Two (2) pheasants of either sex per day, with a total of fifteen (15) pheasants in possession at any time.

Youth Season: Sept. 23 and 24, 2000; Sept. 22 and 23, 2001; Sept. 21 and 22, 2002. Open only to youth hunters accompanied by an adult at least 18 years old.

Hunters 65 years of age or older: Sept. 25-29, 2000; Sept. 24-28, 2001; Sept. 23-27, 2002.

Regular Season: Sept. 30-Nov. 30, 2000; Sept. 29-Nov. 30, 2001; Sept. 28-Nov. 30, 2002. 8 a.m. to 4 p.m.; except Dungeness Recreation site (Clallam County) starting Oct. 7, 2000; Oct. 6, 2001; Oct. 5, 2002.

A Western Washington Pheasant Permit is required to hunt pheasant in Western Washington, in addition to a current small game hunting license. Pheasant kills must be recorded. Upon taking a pheasant, the holder of a Western Washington Pheasant Permit must immediately enter on the corresponding space the date and location of kill.

There are three options available:

- (1) Full Season Option: Allows the harvest of eight (8) pheasants.
- (2) Youth Option: Allows the harvest of eight (8) pheasants by youth hunters.
- (3) 3-Day Option: Allows the harvest of four (4) pheasants during three consecutive days.

Every person possessing a Western Washington Pheasant Permit must by December 31, return the permit to the Department of Fish and Wildlife. The number of permits purchased per year is not limited.

A hunter shall select one valid option at the time they purchase their Western Washington Pheasant Permit. It is unlawful to purchase an additional permit until the eight pheasant allowed on the current permit are taken.

Special Restriction: Western Washington pheasant hunters must choose to hunt on either odd-numbered or even-numbered weekend days from 8:00 - 10:00 a.m. at all units of Lake Terrell, Tennant Lake, Snoqualmie, Skagit, Skookumchuck, and Scatter Creek Wildlife Areas, and Dungeness Recreation Area, and must indicate their choice on the Western Washington Pheasant Permit by choosing "odd" or "even." Hunters ~~((that))~~ who select the three day option, hunters 65 years of age or older, and youth hunters may hunt during either weekend day morning. Youth hunters must be accompanied by an adult at least 18 years old ~~((Adults))~~ who must have an appropriately marked pheasant permit if hunting.

Mountain Quail

Bag and Possession Limits: Two (2) mountain quail per day, with a total of four (4) mountain quail in possession at any time.

Oct. 7-Nov. 30, 2000; Oct. 6-Nov. 30, 2001; Oct. 5-Nov. 30, 2002.

((Valley and Bobwhite Quail)) California (valley) Quail and northern Bobwhite

Bag and Possession Limits: Ten (10) ~~((valley))~~ California (valley) quail or northern bobwhite ((quail)) per day, with a

total of thirty (30) (~~valley~~) California (valley) quail or northern bobwhite (~~quail~~) in possession at any time, straight or mixed bag.

Oct. 7-Nov. 30, 2000; Oct. 6-Nov. 30, 2001; Oct. 5-Nov. 30, 2002.

WILD TURKEY

Spring Season

Gobblers and Turkeys with Visible Beards Only.

State-wide: April 15-May 15, 2001; April 15-May 15, 2002; April 15-May 15, 2003.

Fall Season

Either Sex

Permit Only - Asotin, Columbia, Garfield, Klickitat, Skamania, Stevens, and Walla Walla counties, and GMU 133: Oct. 1-5, 2000; Oct. 1-5, 2001; Oct. 1-5, 2002.

Permit Area	Number of Permits
Asotin, Columbia, Garfield, and Walla Walla counties	50
Klickitat and Skamania counties	75
Stevens County	((250)) 300
GMU 133	((30)) 75
<u>Ferry County</u>	<u>50</u>
<u>Pend Oreille County</u>	<u>25</u>

OFFICIAL HUNTING HOURS/BAG LIMITS:

Bag and Possession Limit: One (1) wild turkey per day, only two (2) may be killed in Eastern Washington per year, except only one (1) may be killed in Chelan, Kittitas, or Yakima counties; and one per year in Western Washington, except two (~~((turkeys))~~) (2) may be killed in Klickitat County. The season limit is three (3) birds per year.

Hunting Hours: One-half hour before sunrise to sunset during spring and fall seasons.

SPECIAL REGULATIONS:

1. Turkey season is open for shotgun and bow-and-arrow hunting only.
2. A turkey tag is required for hunting turkey.
~~((3. Each successful hunter must report harvest to the Department of Fish and Wildlife within ten days after taking a turkey.))~~
- ~~((4.))~~ 3. It is unlawful to use dogs to hunt turkeys.
- ~~((5.))~~ 4. It is unlawful to bait game birds.

BIRD DOG TRAINING SEASON

Wild upland game birds may be pursued during the dog training season, but may not be killed except during established hunting seasons. Captive raised game birds may be released and killed during dog training if proof of lawful acquisition (invoices) are in possession and the birds are appropriately marked (WAC 232-12-271) (WAC 232-12-044).

Aug. 1, 2000-Mar. 31, 2001; Aug. 1, 2001-Mar. 31, 2002; Aug. 1, 2002-Mar. 31, 2003, except from Sept. 15-Nov. 30, dog training is only allowed from 8:00 a.m. to 4:00 p.m. on designated Western Washington pheasant release sites.

Dog training may be conducted year around on posted portions of: Region One - Espanola (T 24 N, R 40 E, E 1/2 of Sec. 16); Region Three - South L.T. Murray Wildlife Area; Region Four - Fort Lewis Military Base, Skagit Wildlife Area, Lake Terrell Wildlife Area, and Snoqualmie Wildlife Area; Region Five - Shillapoo/Vancouver Lake Wildlife Area; Region Six - Scatter Creek Wildlife Area.

HIP REQUIREMENTS:

All hunters age 16 and over of migratory game birds (duck, goose, coot, snipe, mourning dove) are required to complete a Harvest Information Program (HIP) survey (~~((form))~~) at a license dealer, and possess a Washington Migratory Bird validation (~~((Stamp))~~) as evidence of compliance with this requirement when hunting migratory game birds. Youth hunters are required to complete a HIP survey (~~((form))~~), and possess a free Washington Youth Migratory Bird (~~((Authorization))~~) validation as evidence of compliance with this requirement when hunting migratory game birds.

CANADA GOOSE SEPTEMBER SEASON

Bag and Possession Limits: Western Washington (~~((Goose Management Areas 1 and 3))~~), except Cowlitz and Wahkiakum counties and that part of Clark County north of the Washougal River: Five (5) Canada geese per day with a total of ten (10) in possession at any time. Remainder of the state: Three (3) Canada geese per day with a total of six (6) in possession at any time.

State-wide: Sept. 9-14, 2000; Sept. 8-13, 2001; Sept. 7-12, 2002. EXCEPT Pacific and Grays Harbor counties: Sept. 1-15, 2001; Sept. 1-15, 2002.

BAND-TAILED PIGEON

Closed season state-wide.

MOURNING DOVE

Bag and Possession Limits: Ten (10) mourning doves per day with a total of twenty (20) mourning doves in possession at any time.

State-wide: Sept. 1-15, 2000; Sept. 1-15, 2001; Sept. 1-15, 2002.

COTTONTAIL AND SNOWSHOE HARE (OR WASHINGTON HARE)

Bag and Possession Limits: Five (5) (~~((rabbits))~~) cottontails or snowshoe hares per day, with a total of fifteen (15) in possession at any time, straight or mixed bag.

State-wide: Sept. 1, 2000-Mar. 15, 2001; Sept. 1, 2001-Mar. 15, 2002; Sept. 1, 2002-Mar. 15, 2003.

JACKRABBIT

Closed season state-wide.

PERMANENT

CROWS

Bag and Possession Limits: No Limit

State-wide: Oct. 1, 2000-Jan. 31, 2001; Oct. 1, 2001-Jan. 31, 2002; Oct. 1, 2002-Jan. 31, 2003.

FALCONRY SEASONS

Upland Game Bird and Forest Grouse - Falconry

Daily Bag: Two (2) pheasants (either sex), six (6) partridge, five (5) California (valley) quail or northern bobwhite, two (2) mountain quail (in western Washington only), and three (3) forest grouse (blue, ruffed, spruce) per day.

Possession limit is twice the daily bag limit.

State-wide: Sept. 1, 2000-Mar. 15, 2001; ~~((Sept.))~~ Aug. 1, 2001-Mar. 15, 2002; ~~((Sept.))~~ Aug. 1, 2002-Mar. 15, 2003.

Mourning Dove - Falconry

Daily Bag: Three (3) mourning doves per day straight bag or mixed bag with snipe, coots, ducks, and geese during established seasons.

Possession limit is twice the daily limit.

State-wide: Sept. 1-15 and Oct. 1-Dec. 31, 2000; Sept. 1-15 and Oct. 1-Dec. 31, 2001; Sept. 1-15 and Oct. 1-Dec. 31, 2002.

Cottontail and Snowshoe Hare - Falconry

Daily Bag: Five (5) ~~((rabbits))~~ cottontails or snowshoe hares per day, straight or mixed bag.

Possession limit is twice the daily bag limit.

State-wide: Aug. 1, 2000-Mar. 15, 2001; Aug. 1, 2001-Mar. 15, 2002; Aug. 1, 2002-Mar. 15, 2003 ~~((; for cottontail and snowshoe hare (or Washington hare)))~~.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

Reviser's note: The typographical errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 00-50, filed 5/23/00, effective 6/23/00)

WAC 232-12-068 Nontoxic shot requirements. It is unlawful to possess shot (either in shotshells or as loose shot for muzzleloading) other than nontoxic shot when hunting for waterfowl, coot, or snipe. Nontoxic shot includes steel shot, bismuth-tin shot ~~((nominally))~~ 97 parts bismuth: 3 parts tin with <1 percent residual lead), tungsten-iron shot ~~((nominally))~~ 40 parts tungsten: 60 parts iron with <1 percent residual lead), tungsten-polymer shot ~~((nominally))~~ 95.5 parts tungsten: 4.5 parts ~~((polymer))~~ nylon 6 or 11 with <1 percent residual lead), tungsten-matrix shot ~~((nominally))~~ 95.9 parts tungsten: 4.1 parts polymer with <1 percent residual lead), ~~((or))~~ tin shot (99.9 percent tin with <1 percent residual lead), or tungsten-nickel-iron shot (50% tungsten: 35% nickel: 15% iron with <1 percent residual lead).

It is unlawful to possess shot (either in shotshells or as loose shot for muzzleloading) other than nontoxic shot

~~((when hunting for game birds or game animals))~~ in the following areas:

Bridgeport Bar segment of the Well's Wildlife Area ~~((Chehalis River pheasant release site))~~

Skagit Wildlife Area (all segments)

Snoqualmie Wildlife Area (all segments)

Sunnyside Wildlife Area

~~((Two Rivers and Wallula Units of the U.S. Fish and Wildlife Service's McNary National Wildlife Refuge))~~

The Driscoll Island, Hegdahl, and Kline Parcel segments of the Sinlahekin Wildlife Area

Vancouver Lake Wildlife Area

It is unlawful to possess shot (either in shotshells or as loose shot for muzzleloading) other than nontoxic shot when hunting for game birds or game animals in the following areas:

Chehalis River pheasant release site

Dungeness Recreation Area

Hunter Farms pheasant release site

Raymond Airport pheasant release site

Two Rivers and Wallula Units of the U.S. Fish and Wildlife Service's McNary National Wildlife Refuge

Whidbey Island Seaplane Base, OLF Coupeville, and Bayview pheasant release sites

AMENDATORY SECTION (Amending Order 00-50, filed 5/23/00, effective 6/23/00)

WAC 232-28-248 Special closures and firearm restriction areas

RESTRICTED AND PROHIBITED HUNTING AREAS.

These areas are closed by Fish and Wildlife Commission action. Other areas may be closed to hunting by local, state or federal regulations.

IT IS ILLEGAL TO HUNT EXCEPT WHERE PROVIDED IN THE FOLLOWING AREAS:

1. Little Pend Oreille National Wildlife Refuge: The southern part of the Little Pend Oreille National Wildlife Refuge in Stevens County is closed to hunting and discharge of firearms except during the ~~((period of Oct. 1-Dec. 31))~~ periods of April 15-May 15 and October 1-December 31. This closure is south of a boundary beginning at the west project boundary in Section 3, Township 34 N, R 40 EWM, then easterly along Road 1.0 (Bear Creek Road) to the intersection with Road 2.0 (Blacktail Mountain Road) in Section 2, then easterly along Road 2.0 to the easterly boundary in Section 8, Township 34 N, R 42 EWM.

The Little Pend Oreille National Wildlife Refuge north of the preceding boundary is open to all legally estab-

PERMANENT

lished hunting seasons (~~during~~) from April 15 to May 15 and September through December.

2. Parker Lake: All lands south of Ruby Creek Road (USFS Road 2489), north of Tacoma Creek Road (USFS Road 2389) and west of Bonneville Power Administration power lines are designated as "CLOSED AREA" to the hunting of wild animals and wild birds year round. Both the Little Pend Oreille (1) and Parker Lake (2) closures were established to provide a protected area for the Air Force Military Survival Training Program.
3. Columbia River and all the islands in the river, and the Benton County shoreline below the high water mark, and any peninsula originating on the Benton County shoreline, between Vernita Bridge (Highway 24) downstream to the old Hanford townsite powerline crossing (wooden towers) in Section 24, T 13 N, R 27 E, is designated as a "CLOSED AREA" to the hunting of wild animals and wild birds.
4. Green River (GMU 485): Except for special permit hunters, who may also take a black bear and/or cougar with the appropriate license/tag options, all lands within GMU 485 are designated as a "CLOSED AREA" to the hunting of big game by Department of Fish and Wildlife regulated hunters throughout the year. During the general westside elk season and general and late deer seasons, all lands within GMU 485 are also designated as a "CLOSED AREA" to the hunting of all wild animals (including wild birds). The City of Tacoma enforces trespass within GMU 485 on lands owned or controlled by the City during all times of the year.
5. McNeil Island: McNeil Island (part of GMU 652) is closed to the hunting of all wild animals (including wild birds) year around.
6. Loo-wit (GMU 522): Closed to hunting and trapping within GMU 522 (Loo-wit).
7. The Voice of America Dungeness Recreation Area County Park in Clallam County is closed to all hunting except Wednesdays, weekends, and holidays, from the first weekend in October to the end of January.

BIG GAME CLOSURES

1. Clark, Cowlitz, Pacific, and Wahkiakum counties are closed to Columbian Whitetail Deer hunting.
2. Cathlamet: Beginning in the town of Skamokawa; then east along SR 4 to the Risk Road; then south and east along the Risk Road to Foster Road; then south along the Foster Road to the Elochoman River; then upstream along the Elochoman River to the Elochoman Valley Road (old SR 407); then west along the Elochoman Valley Road to SR 4; then east along SR 4 to SR 409; then south along SR 409 to the Cathlamet Channel of the Columbia River; then east along the north shore of the Cathlamet Channel to Cape Horn; then south in the Columbia River to the state line; then west along the state line to a point directly south of the mouth of Skamokawa Creek; then north on Skamokawa Creek to SR 4 and the point of beginning. This area is closed to all deer and elk hunting, to protect the Columbian White-tail Deer.

3. Willapa National Wildlife Refuge: Except for Long Island, Willapa National Wildlife Refuge is closed to all big game hunting.
4. Walla Walla Mill Creek Watershed (GMU 157): All lands in the Mill Creek Watershed are designated as a "CLOSED AREA" to the hunting of all wild animals (including wild birds) except for holders of special elk permits during the established open season. This area is closed to motorized vehicles. Entry is allowed only by Forest Service permit for the duration of the hunt. Any entry into the Mill Creek Watershed at other times is prohibited.
5. Westport: Closed to hunting of all big game animals on that part of Westport Peninsula lying north of State Highway 105 from the west end of the Elk River Bridge and the Schafer Island Road to the ocean beach.

FIREARM RESTRICTION AREAS

The firearm restriction areas listed below have been established by the Fish and Wildlife Commission. Centerfire and rimfire rifles are not legal for hunting in these areas.

In firearm restriction areas, hunters may hunt only during the season allowed by their tag. Archery tag holders may hunt during archery seasons with archery equipment. Muzzleloaders may hunt during muzzleloader seasons with muzzleloader equipment except in the GMU 652 restriction area outlined for King County. Modern firearm tag holders may hunt during modern firearm seasons with bows and arrows, muzzleloaders or revolver-type handguns meeting the equipment restrictions or legal shotguns firing slugs or buckshot.

Island	<p>That portion of GMU 410 (Island) located on Camano and Whidbey islands.</p>	Pacific	GMU 684 (Long Beach) west of Sand Ridge Road. The portion of GMU 658 (North River) south and west of State Highway 105 and Airport Road between Raymond and North River Bridge.
Jefferson	Indian and Marrowstone islands.	Pierce	GMU 652 (Anderson and Ketron islands) limited to archery, shotgun, and muzzleloader. McNeil Island closed to hunting. See GMU ((484)) <u>652</u> restriction area outlined for King County.
King	<p>The area west of Highway 203 (Monroe-Fall City, Fall City-Preston Road) to Interstate 90 (I-90), I-90 to Highway 18, Highway 18 to Interstate 5 (I-5), I-5 to the Pierce-King County line; Vashon and Maury islands.</p> <p>The following portion of GMU 652 (Puyallup): Beginning at the intersection of State Highway 410 and the southeast Mud Mountain Dam Road near the King/Pierce County line north of Buckley; then east along the southeast Mud Mountain Road to 284th Avenue Southeast; then north along 284th Avenue Southeast to State Highway 410; then west along Highway 410 to the point of the beginning. (This restriction includes high power rifles and muzzleloaders.)</p>	Snohomish	West of Highway 9.
		Skagit	Guemes Island and March Point north of State Highway 20.
		Thurston	GMU 666 (Deschutes) north of U.S. Highway 101 and Interstate 5 between Oyster Bay and the mouth of the Nisqually River.
		Whatcom	Area west of I-5 and north of Bellingham city limits including Lummi Island and Point Roberts.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

NEW SECTION

WAC 232-28-299 Mandatory report of hunting activity (1) All hunters purchasing a hunting license must report their hunting activity for deer, elk, bear, or turkey.

a) Hunters must report hunting activity, for each tag acquired, by January 31.

b) Reports must be made using the Department's designated automated telephone hunter reporting system (toll free) or Internet hunter reporting system.

c) Any hunter not reporting, for each tag acquired, by January 31 will be in non-compliance of reporting requirements.

d) Compliance will be credited for each species for which a transport tag is acquired.

(2) As an incentive for prompt reporting, all successful hunters who report harvest within 10 days of killing an animal and unsuccessful hunters who report by midnight January 10 will be entered into a drawing for special deer and elk incentive permits. To be eligible for the drawing, hunters must report their hunting activity for each transport tag acquired.

a) There will be two (2) any elk special incentive permits for western Washington and two (2) for eastern Washington for use in any area open to general or permit hunting seasons EXCEPT Private Lands Wildlife Management Areas and GMUs 157 and 485.

b) There will be five (5) statewide any deer special incentive permits, for use in any area open to general or permit hunting seasons EXCEPT Private Lands Wildlife Management Areas and GMUs 157 and 485.

c) Open Season: The deer or elk special incentive permit hunter must use archery equipment during archery seasons, muzzleloader equipment during muzzleloader seasons, and any legal weapon at other times if there are no firearm restrictions.

d) The dates for the hunts will be September 1 to December 31.

e) Hunters awarded the special incentive permit will be required to send the appropriate license fee to the Department of Fish and Wildlife headquarters in Olympia. The Department will issue the license and transport tag and send it to the special incentive permit winner.

f) Bag limit: One additional deer or elk.

(3) Beginning with license year 2002 and there after, hunters who have not reported hunting activity for the tags acquired the previous year will be required to complete a hunting report for those species before a new license for that species will be issued.

AMENDATORY SECTION (Amending Order 00-215, filed 10/12/00, effective 11/12/00)

WAC 232-28-272 2000-2001, 2001-2002 and 2002-2003 Black bear and cougar hunting seasons and regulations.

Black Bear Seasons:

Hunt Name	2000 Season	Hunt Area
General Eastern	Aug. 1 - Nov. 5	GMUs 121-142, 203-382, 578, 588
Northeastern	Sept. 5 - Nov. 5	GMUs 101-117

Long Island	Sept. 1 - Nov. 10	Long Island

License Required: A valid big game hunting license which includes black bear as a species option is required to hunt black bear. One black bear transport tag is included with a big game hunting license that has black bear as a species option. A second black bear transport tag must be purchased to take a second bear.

Bag Limit: Two (2) black bear per annual hunting season only one of which may be taken in Eastern Washington.

Hunting Method: Hunters may use any lawful big game modern firearm, archery, or muzzleloader equipment for hunting black bear. The use of hounds and bait to hunt black bear is prohibited statewide.

~~((Harvest Report Cards: All hunters that purchase a big game hunting license which includes black bear as an option are required to fill out and return their black bear harvest report card(s). Successful hunters must complete the report card(s) and return within 10 days after taking an animal. Unsuccessful hunters are required to complete and return their report card(s) within 10 days after the close of the bear season.))~~

Submitting Bear Teeth: Successful bear hunters must submit the black bear premolar tooth located behind the canine tooth of the upper jaw.

Cougar Season:

General Statewide Season:
Aug. 1, 2000 - Mar. 15, 2001;

PERMANENT

Aug. 1, 2001 - Mar. 15, 2002; and

Aug. 1, 2002 - Mar. 15, 2003.

License Required: A valid big game hunting license which includes cougar as a species option is required to hunt cougar.

Bag Limit: Two (2) cougar per license year excluding public safety cougar removals. It is unlawful to kill or possess spotted cougar kittens or adult cougars accompanied by spotted kittens. Individuals selected for a public safety cougar removal permit may take one (1) cougar and must take the first legal cougar available.

Tag Information:

(1) One cougar transport tag is included with a big game license that has cougar as a species option. A second cougar transport tag must be purchased to take a second cougar.

(2) Individuals selected for a public safety cougar removal must possess a valid big game license and cougar transport tag prior to issuance of the permit. Individuals may participate in multiple public safety cougar removals, but must purchase a cougar transport tag for each cougar removed. Purchases in excess of two (2) cougar transport tags must be made at department offices.

Hunting Method: Hunters may use any lawful big game modern firearm, archery, or muzzleloader equipment for hunting cougar. The use of hounds to hunt cougar is prohibited except during a public safety cougar removal.

~~((Harvest Report Cards: All hunters that purchase a big game license which includes cougar as a species option are required to fill out and return their cougar harvest report card. Successful hunters must complete the report card and return within 10 days after taking an animal. Unsuccessful hunters are required to complete and return their report card within 10 days after the close of the cougar season.))~~

Cougar Pelt Sealing: Any person who takes a cougar must notify the department within 72 hours of kill (excluding legal state holidays) and provide the hunter's name, date and location of kill, and sex of animal. The raw pelt of a cougar must be sealed by an authorized department employee within five days of the notification of kill. Any person who takes a cougar must present the cougar skull, in such a manner that teeth and biological samples can be extracted, to an authorized department employee at the time of sealing.

Public safety cougar removals:

The commission authorizes the director to issue public safety cougar removal permits consistent with this rule. Prior to issuing public safety cougar removal permits, the department shall use other practical alternatives to address a public safety need, including livestock or pet depredations. Other practical alternatives may include, but are not limited to, general cougar hunting seasons, general public information, educational programs, information to recreational hunters, cougar depredation/kill permits, and department capture and relocation/euthanasia of specific cougars.

Public safety cougar removals: Criteria.

(1) The commission determines that when the above practical alternatives have been utilized within a game management unit, four or more confirmed human-cougar safety incidents or livestock/pet depredations per year and seven or more confirmed cougar sightings or nuisance activities per year therein demonstrate that the practical alternatives have been inadequate to address the public safety need. The director then is authorized by the commission to remove one or more cougar, with the aid of dogs, in a selected area of that game management unit or nearby geographic area suitable for the use of dogs. The commission authorizes the director to remove one cougar per one hundred twenty square kilometers of complaint area in preferred cougar habitat, and one cougar per four hundred thirty square kilometers of complaint area in marginal cougar habitat.

(2) Public safety cougar removal(s) will be conducted between December 16, 2000, and March 15, 2001, in selected areas of game management units designated by the director to address a public safety need presented by one or more cougar, not to exceed removal of more than seventy-four cougar during the 2000-2001 removal period unless otherwise authorized by the commission.

Public safety cougar removals: Permit issuance procedure.

(1) To participate in a public safety cougar removal, individuals must request that his/her name be placed on a list of available participants (participant list) by mailing their request to Washington Department of Fish and Wildlife, Enforcement Program - Public Safety Cougar Removal, 600 Capitol Way North, Olympia, WA 98501-1091. The request must include the individual's name, address, phone number, and region applying for (see page 4 of 2000 Big Game Hunting Seasons and Rules Pamphlet for region map). Individuals may apply for multiple regions. An individual's request to be placed on a participant list for the 2000-2001 removal must be postmarked no later than November 15, 2000, or received at Washington department of fish and wildlife's (department) Olympia office no later than 5:00 p.m. on November 15, 2000.

(2) To be eligible for a public safety cougar removal permit (permit), participants must have at their disposal dogs capable of detecting and tracking cougar. The permit holder must use dogs while participating in a public safety cougar removal.

(3) Individuals eligible for participation in a public safety cougar removal will be randomly selected from the participant list. The department will issue a permit to the person whose name is selected from the participant list. Individuals selected will be notified by telephone or mail. Individuals selected must contact the department's enforcement program in Olympia and accept the public safety cougar removal permit within 15 days of being notified. Failure to contact the department will result in forfeit of the permit and the individual will be placed on the participant list for later selections. Permits may not be sold or reassigned.

(4) No more than four (4) total individuals may participate per public safety cougar removal, including the permit

holder(s). Only the permit holder, whose name appears on the permit, may take a cougar.

(5) Permit holders shall notify the department's enforcement program in Olympia at least 24 hours prior to exercising a public safety cougar removal permit. The department reserves the right to accompany permit holders while participating in a public safety cougar removal.

(6) Permit holders must complete the department's public safety cougar removal education course prior to participating in a public safety cougar removal.

Definitions:

As used in this section and in the context of public safety cougar removals, the following definitions apply:

(1) "Confirmed" means qualified department staff is led to believe a cougar(s) was at the scene of the incident by interview of the complainant or observation of evidence at the scene.

(2) "Human-cougar safety incident" means aggressive or unusual behavior by a cougar which presents an actual or perceived threat to an individual.

(3) "Livestock or pet depredation" means incidents where livestock and/or pets are killed and/or injured by cougar.

(4) "Marginal cougar habitat" means those areas usually dominated by urban/suburban, developed lands with relatively high human densities.

(5) "Nuisance activity" means incidents associated with property disturbance, property damage, or livestock/pet harassment.

(6) "Preferred cougar habitat" means those areas usually dominated by rural, undeveloped lands with relatively low human densities.

(7) "Public safety need" means there exists a reasonable threat to human safety or property by one or more cougar, as indicated by the level of confirmed human-cougar safety incidents or livestock/pet depredations, and confirmed cougar sightings or nuisance activities.

(8) "Removal" means the act of killing one or more cougar with the aid of dogs.

(9) "Sighting" means a direct observation of one or more cougar, in urban or rural settings, near individuals or residences; typically more than chance observations.

REPEALER

The following sections of the Washington Administrative Code are repealed:

- WAC 232-28-258 Washington auction hunts
- WAC 232-28-260 Special hunting seasons

NEW SECTION

WAC 232-28-290 Washington raffle hunts 1. The Commission, in consultation with the director, may authorize hunts for big game animals and wild turkey through raffle.

2. When a raffle hunt is adopted by the Commission the director may conduct the raffle or may award a contract to a nonprofit wildlife conservation organization (hereafter

referred to as "organization") to market and conduct the raffle drawing. The department of Fish and Wildlife shall solicit bids consistent with established state competitive bid rules.

3. There is no limit on the number of raffle tickets a person may purchase.

4. The organization interested in conducting a raffle for an authorized hunt shall submit a proposal outlining its experience and plan to conduct a raffle. The proposal shall include:

- a. Name of the organization, articles of incorporation, and contact person.
- b. The date, time, and place of the proposed raffle drawing.
- c. The approximate number of raffle tickets expected to be sold.
- d. Past experience in conducting raffles.
- e. Marketing strategies to be used.
- f. Portion of revenue proposed to be retained by the organization.

5. The director will select an organization to conduct a raffle.

- a. Revenue potential to the department will be a primary criterion in applicant selection.
- b. The department shall enter into a contract with the organization identifying specific terms of the contract.
- c. The director may authorize the organization to sell raffle tickets for the department and retain a portion of the revenue from the tickets sold.

6. The following are rules for raffles conducted by a director authorized nonprofit wildlife conservation organization.

- a. The organization shall notify the public about the raffle hunt opportunity and offer raffle tickets for sale.
- b. The public must be informed of the date, time, and place of the raffle, and the organization must hold the drawing as specified.
- c. The drawing must be accessible to the public.
- d. Raffle ticket sales must be completed prior to the public drawing. An accounting must be made of raffle tickets and funds received. A representative of the department will monitor the drawing.
- e. One winner and two alternates shall be drawn at the drawing.
- f. The organization shall notify the department of the name, address, and telephone number of the raffle winner and two alternates immediately (but no later than two business days) after the drawing.
- g. The department's share of the raffle revenue shall be delivered to the department within 30 (thirty) business days of the drawing.

7. The following are rules for raffles conducted by the department.

- a. The department shall notify the public about the raffle hunt opportunity and offer raffle tickets for sale.
- b. The department shall inform the public of date and place of the raffle, and hold the drawing as specified.
- c. Raffle ticket sales must be complete prior to the drawing.
- d. One winner and two alternates shall be drawn at the drawing.

PERMANENT

8. The department will notify the winner and two alternates by telephone and by certified mail. The department will obtain enough information from the winner to issue the appropriate hunting license and transport tag(s).

9. If the winner does not contact the Department within 15 business days of the drawing, the first alternate will be contacted and offered the raffle hunt. If the first alternate cannot be contacted within 10 business days after the winner disqualification deadline, the second alternate will be contacted and offered the raffle hunt. If the second alternate cannot be contacted within 10 business days after the first alternate disqualification deadline, the raffle hunt will not be offered by the department.

10. There shall be no refunds for any raffle ticket purchases.

11. The deer raffle winner may purchase an additional deer hunting license and transport tag and the elk raffle winner may purchase an additional elk hunting license and transport tag if desired. Even if drawn in a previous license year for a mountain goat, bighorn sheep, or moose hunt a hunter may participate in a raffle hunt. Turkey raffle winners may purchase up to three (3) additional turkey licenses and transport tags.

12. Hunting licenses or transport tags obtained pursuant to a raffle may not be resold or reassigned.

13. All revenue to the department from a raffle shall be used for the management and benefit of that species, except the hunting license and transport tag fees for the appropriate species shall be deducted from the raffle revenue.

NEW SECTION

WAC 232-28-291 Special hunting season permits The commission may establish special hunting seasons limited to species and/or weapon type.

1. Deer, elk, cougar, or black bear special hunting season permit applications:

A. To apply for special hunting season permits for deer, elk, cougar, or black bear applicants must have a valid Washington big game hunting license and a valid transport tag for the appropriate species. To apply for a particular hunt, each applicant for deer or elk must have the proper transport tag as identified in the special deer or elk permit regulations.

B. No refunds or exchanges for deer, elk, cougar, or black bear hunting licenses or transport tags will be made for persons applying for special hunting season permits after the permit drawing has been held.

C. A holder of a deer, elk, cougar, or black bear special hunting season permit may hunt only with a weapon in compliance with the special hunting season.

2. Mountain goat, moose, and bighorn sheep special hunting season permit applications:

A. Persons who have previously drawn and accepted a special hunting season permit for Washington mountain goat, bighorn sheep, or moose are ineligible to apply for a special hunting season permit for that species. This lifetime permit holder restriction does not apply to mountain goat permits acquired before 1999, raffle or auction hunt authorizations, or youth-only moose hunts.

B. Successful applicants under this section must purchase the appropriate hunting license within fifteen days of notification by the department. Failure to purchase forfeits the permit to an alternate applicant.

C. No refunds for mountain goat, moose, or bighorn sheep hunting licenses will be made for persons successfully drawing and purchasing special hunting season permits.

3. Wild turkey special hunting season permit applications

A. To apply for wild turkey special hunting season permits, each applicant must have a valid small game hunting license.

B. No refunds for small game hunting licenses will be made, regardless of success in the drawing for wild turkey special hunting season permits.

C. Wild turkey special hunting season permit holders must have a valid turkey transport tag in possession to hunt turkeys in the special hunting season.

4. Special hunting season permit applications:

A. Group applications will be accepted for any species with a group size larger than one. Maximum group sizes are determined for each species. If a group application is drawn, all hunters in the group will receive a special hunting season permit and each hunter in the group can take an animal.

i. Maximum group size for deer is 12.

ii. Maximum group size for elk is 12.

iii. Maximum group size for bear is 2.

iv. Maximum group size for cougar is 2.

v. Maximum group size for mountain goat is 2.

vi. Maximum group size for bighorn sheep is 1.

vii. Maximum group size for turkey is 4.

viii. Maximum group size for moose is 1.

B. An applicant may purchase only one application for a special hunting season permit for each species.

C. Permits will be drawn by computer selection using a weighted point selection system.

D. Incomplete applications will not be accepted.

E. If an applicant makes a mistake, applies for the wrong hunt, and is successfully drawn, the special hunting season permit can be returned to the Department of Fish and Wildlife Olympia headquarters before the opening day of the special hunting season or the opening day of the general hunting season, whichever comes first. The applicant's points will be restored to the level prior to the permit drawing.

F. Anyone may apply for a special hunting season permit for deer, elk, bear, cougar, and wild turkey.

5. In addition to requirements for special hunting season permit applications, following are application requirements for:

A. Special hunting seasons for Persons of Disability: Only applicants with a Washington disabled hunter permit are eligible to apply for any special hunting season permits for persons of disability.

B. Special hunting seasons for Youth: Only persons who are eligible to lawfully purchase a youth hunting license are eligible to apply for special hunting season permits for youth.

C. Special hunting seasons for Hunters Age 65 and Older: Only applicants sixty-five years of age or older on or before March 31 of the current license year will be eligible to

apply for special hunting season permits for hunters age 65 and older.

D. Special hunting seasons for Advanced Hunter Education Graduates: Only persons who hold a valid certificate from the Washington Department of Fish and Wildlife Advanced Hunter Education (AHE) program are eligible to apply for special hunting season permits for AHE hunters.

6. Citizen reward for reporting violations - bonus points: A person who provides information which contributes substantially to the arrest of another person for illegally killing big game or an endangered species as defined by Title 77 RCW is eligible to receive ten bonus points toward the special hunting permit drawing for deer or elk special hunting season permits.

A. Only ten bonus points can be awarded for providing information for each person charged regardless of the number of violations involved.

B. Selection of bonus points is in lieu of application for a cash award.

NEW SECTION

WAC 232-28-292 Washington auction hunts 1. The Commission, in consultation with the director, may authorize hunts for big game animals and wild turkeys through auction.

2. When an auction hunt is adopted by the Commission, the director shall solicit nonprofit wildlife conservation organizations (hereafter referred to as "organizations") to bid to market and conduct a public auction for the special auction hunt. The department of fish and wildlife shall solicit bids consistent with established state competitive bid rules.

3. The organization interested in conducting an auction for an authorized hunt shall submit a proposal outlining its experience and plan to conduct a public auction. The proposal shall include:

- a. Name of the organization, articles of incorporation, and contact person.
- b. The date, time, and place of the proposed public auction.
- c. The approximate number of people expected to attend the auction.
- d. Past experience in conducting auctions.
- e. Marketing strategies to be used.
- f. Portion of revenue proposed to be retained by the organization.

4. The director will select an organization to conduct an auction.

- a. Revenue potential to the department will be a primary criterion in applicant selection.
- b. The department shall enter into a contract with the organization identifying specific terms of the contract.

5. The organization shall notify the public about the auction hunt opportunities.

- a. The public must be informed of the date, time, and place of the auction and, the organization must hold the auction as specified.
- b. The auction must be accessible to the public.
- c. Anyone may bid on an auction permit.

d. The organization shall award the hunt to the highest qualified bidder who will then become the auction hunt hunter.

e. The organization shall notify the department of the name and address of the successful bidder within two days of the auction.

f. The department's share of the auction revenue shall be delivered to the department within 30 days of the auction.

6. All revenue to the department from an auction shall be used for the management and benefit of that species. Except, that the hunting license fees for the appropriate species shall be considered part of the auction price and be deducted from the auction revenue. A hunting license and transport tag will be mailed to the successful bidder.

7. The deer auction winner may purchase an additional deer hunting license and transport tag, and the elk auction winner may purchase an additional elk hunting license and transport tag. Even if drawn in a previous license year for a mountain goat, bighorn sheep, or moose hunt, a hunter may participate in an auction hunt.

8. Hunting licenses or transport tags obtained pursuant to an auction may not be resold or reassigned.

9. The auction hunt hunter shall comply with all applicable hunting rules and regulations.

NEW SECTION

WAC 232-28-293 PLWMA raffle hunts The commission, in consultation with the director and by agreement with a Private Lands Wildlife Management Area (PLWMA), may authorize hunts for big game animals through raffle.

1. The PLWMA manager will conduct the raffle drawing. Raffle tickets will be sold for not more than \$25.00 each.

2. Any person may purchase PLWMA raffle tickets in addition to WDFW raffle tickets and participate in auctions and special hunting season permit drawings.

3. The PLWMA raffle winners must possess the appropriate hunting license and transport tag prior to participating in the PLWMA raffle hunt.

4. The PLWMA deer or elk raffle hunt winners may purchase an additional deer or elk hunting license and obtain a second transport tag if desired.

5. If an additional deer or elk hunting license and transport tag are acquired by a raffle winner, the additional transport tag can only be used on the PLWMA during the raffle hunt.

6. The additional deer or elk hunting license and transport tag must be issued by the Olympia department headquarters licensing division.

7. Hunting licenses or transport tags obtained pursuant to a raffle may not be resold or reassigned.

8. The PLWMA manager conducting an authorized raffle will provide an annual report to the Department of Fish and Wildlife prior to December 31. The report will include information on how the event was administered, where and when it occurred, who the winners were, the cost of tickets, and the number of tickets sold.

9. Anyone may participate in PLWMA raffles.

AMENDATORY SECTION (Amending Order 00-50, filed 5/23/00, effective 6/23/00)

WAC 232-28-273 ((2000)) 2001 Moose, bighorn sheep, and mountain goat seasons and permit quotas.

((2000)) 2001 Moose Permit Hunts

Who May Apply: Anyone may apply; EXCEPT those who drew a moose permit previously in Washington State. Only one moose permit will be issued during an individual's lifetime (waived for Mt. Spokane youth hunt, and raffle and auction hunts).

Bag Limit: One moose of either sex, EXCEPT antlerless only for the Mt. Spokane B Hunt and the Mt. Spokane Youth Hunt.

Hunt Name	Permit Season	Permit Hunt Boundary Description	Special Restrictions	((2000)) 2001 Permits
Kettle River	Oct. 1-Nov. 30	GMU 101, 105	Any Legal Weapon	1
Selkirk Mtns.	Oct. 1-Nov. 30	GMU 113	Any Legal Weapon	((45)) 18
Mt. Spokane A	Oct. 1-Nov. 30	GMU 124	Any Legal Weapon	((5)) 15
Mt. Spokane B	Oct. 1-Nov. 30	GMU 124	Any Legal Weapon	15
Mt. Spokane Youth Only.*	Oct. 1-Nov. 30	GMU 124	Any Legal Weapon	((5)) 10
49 Degrees North	Oct. 1-Nov. 30	GMU 117	Any Legal Weapon	((18)) 22
Three Forks	Oct. 1-Nov. 30	GMU 109	Any Legal Weapon	6
Hangman	Oct. 1-Nov. 30	GMU 127, 130	Any Legal Weapon	((2)) 5

*Applicants must be eligible to purchase a youth moose permit application. Youth hunters must be accompanied by an adult during the hunt.

((2000)) 2001 Mountain Sheep (Bighorn) Permit Hunts

Who May Apply: Anyone may apply; EXCEPT those who drew a bighorn permit previously in Washington State. Only one bighorn sheep permit will be issued during an individual's lifetime. (Waived for raffle and auction hunts.)

Bag Limit: One bighorn ram.

Hunt Name	Permit Season	Permit Hunt Boundary Description	Special Restrictions	((2000)) 2001 Permits
Selah Butte	Sept. 15-Oct. 10	Sheep Unit 4	Any Legal Weapon	((2)) 4
Umtanum	Sept. 15-Oct. 10	Sheep Unit 5	Any Legal Weapon	((4)) 4
Cleman Mountain	Sept. 15-Oct. 10	Sheep Unit 7	Any Legal Weapon	((5)) 5
Mt. Hull	Sept. 15-Oct. 10	Sheep Unit 10	Any Legal Weapon	((4)) 0
Lincoln Cliffs	Sept. 15-Oct. 10	Sheep Unit 12	Any Legal Weapon	1
Quilomene	Sept. 15-Oct. 10	Sheep Unit 13	Any Legal Weapon	((3)) 5
Swakane	Sept. 15-Oct. 10	Sheep Unit 14	Any Legal Weapon	1

Mountain (Bighorn) Sheep Units:

Sheep Unit 4 Selah Butte: Permit Area: That part of Yakima and Kittitas counties between Ellensburg and Yakima east of the Yakima River and north of Selah Creek, west of Interstate 82 and south of Interstate 90.

Sheep Unit 5 Umtanum: Permit Area: Those portions of Yakima and Kittitas counties west of the Yakima River, north of Wenas Creek, and east of USFS Road 1701 to Manastash Lake and its drainage; south and east along the South Fork Manastash Creek to Manastash Creek and the Yakima River.

Sheep Unit 7 Cleman Mountain: Permit Area: That part of Yakima County south of Wenas Creek and east of USFS Road 1701, north of Highway 410 and Highway 12 and west of the Yakima River.

Sheep Unit 10 Mt. Hull: Permit Area: That part of Okanogan County within the following described boundary: Beginning at Oroville; then south along U.S. Highway 97 to the Swanson's Mill Road (old Mt. Hull Road) near Lake Andrews; then east to the Dry Gulch Road; then north to the Oroville-Toroda Creek Road (Molson Grade Road); then west to Oroville and the point of beginning.

Sheep Unit 12 Lincoln Cliffs: Permit Area: That part of Lincoln County north of Highway 2.

Sheep Unit 13 Quilomene: Permit Area: GMU 329.

Sheep Unit 14 Swakane: Permit Area: GMU 250.

PERMANENT

((2000)) 2001 Mountain Goat Permit Hunts

Who May Apply: Anyone may apply; except those who drew a mountain goat permit in Washington state after 1998. Starting in 1999, only one mountain goat permit will be issued during an individual's lifetime. (Waived for raffle and auction hunts.)

Bag Limit: One (1) adult goat of either sex with horns four (4) inches or longer. WDFW urges hunters to refrain from shooting nannies with kids. Permit hunters may start hunting Sept. 1 with archery equipment.

Hunt Name	Permit Season	Permit Hunt Boundary Description	Special Restrictions	((2000)) 2001 Permits
Chelan North	Sept. 15-Oct. 31	Goat Unit 2-1	Any Legal Weapon	2
Methow	Sept. 15-Oct. 31	Goat Unit 2-2	Any Legal Weapon	((5)) 2
Naches Pass	Sept. 15-Oct. 31	Goat Unit 3-6	Any Legal Weapon	3
Bumping River	Sept. 15-Oct. 31	Goat Unit 3-7	Any Legal Weapon	2
Tieton River	Sept. 15-Oct. 31	Goat Unit 3-9	Any Legal Weapon	3
Blazed Ridge	Sept. 15-Oct. 31	Goat Unit 3-10	Any Legal Weapon	((6)) 2
Kachess Ridge	Sept. 15-Oct. 31	Goat Unit 3-11	Any Legal Weapon	1
Jack Mountain	Sept. 15-Oct. 31	Goat Unit 4-9	Any Legal Weapon	((+)) 0
Corral Pass	Sept. 15-Oct. 31	Goat Unit 4-38	Any Legal Weapon	2
Tatoosh	Sept. 15-Oct. 31	Goat Unit 5-2	Any Legal Weapon	((5)) 3
Smith Creek	Sept. 15-Oct. 31	Goat Unit 5-3	Any Legal Weapon	((3)) 1
Goat Rocks	Sept. 15-Oct. 31	Goat Unit 5-4	Any Legal Weapon	((7)) 3

Mountain Goat Units:

Goat Unit 2-1 Chelan N. (Chelan County): Permit Area: Beginning at the mouth of Fish Creek on Lake Chelan (Moore Point); then northeast up Fish Creek and USFS trail 1259 to the Sawtooth crest near Deephole Spring; then south-east along the Sawtooth crest, which separates Chelan and Okanogan County, to Horsethief Basin and the headwaters of Safety Harbor Creek; then south along Safety Harbor Creek to Lake Chelan, then northwest along the north shore of Lake Chelan to the mouth of Fish Creek at Moore Point and the point of beginning.

Goat Unit 2-2 Methow Area: Permit Area: Okanogan County within the following described boundary: Beginning at the Town of Twisp, westerly along the Twisp River Road (County Road 4440) to Roads End; west up the Twisp Pass Trail 432 to Twisp Pass and the Okanogan County line; northerly along the Okanogan County line through Washington Pass to Harts Pass; southeast down Harts Pass (Road 5400) to Lost River; then along the Lost River-Mazama Road to Mazama; then southwest to State Highway 20; then southeasterly along State Highway 20 to Twisp and the point of beginning.

Goat Unit 3-6 Naches Pass: Permit Area: Yakima and Kittitas counties within the following described boundary: Beginning at Chinook Pass; then north along the Pacific Crest Trail to Naches Pass; then east to USFS Road 19 and continuing to State Highway 410; then west along State Highway 410 to Chinook Pass and point of beginning.

Goat Unit 3-7 Bumping River: Permit Area: Yakima County within the following described boundary: Beginning at White Pass and the Pacific Crest Trail; then north to Forest Trail 980; then north to USFS Road 18; then north to State Highway 410; then east to State Highway 12; then west along

State Highway 12 and back to point of beginning; EXCEPT Timberwolf Mountain, which is closed.

Goat Unit 3-9 Tieton River: Permit Area: Yakima County within the following described boundary: Beginning at White Pass and Pacific Crest Trail; then south to the Yakama Indian Reservation Boundary; then east to USFS Jeep Trail 1137; then west to USFS Road 1070-578 Spur; then west to Road 1000; then north to USFS Road 12; then north to State Highway 12; then west on State Highway 12 to point of beginning.

Goat Unit 3-10 Blazed Ridge: Permit Area: Kittitas and Yakima counties within the following described boundary: Beginning at the mouth of Cabin Creek on the Yakima River; then west along Cabin Creek to the headwaters near Snowshoe Butte; then south along the Cascade Crest separating the Green and Yakima river drainage to Pyramid Peak; then southeast along the North Fork, Little Naches, and Naches River to the Yakima River; then north along the Yakima River to the mouth of Cabin Creek and point of beginning.

Goat Unit 3-11 Kachess Ridge: Permit Area: Kittitas County within the following described boundary: Beginning at the mouth of the Kachess River on the Yakima River; then north along the Kachess River and Kachess Lake to USFS Road 4600; then east on USFS Road 4600 to the Cle Elum River; then south along the Cle Elum River and Lake Cle Elum to the Yakima River; then northwest along the Yakima River to the mouth of the Kachess River and point of beginning.

Goat Unit 4-9 Jack Mountain: Permit Area: Whatcom County within the following described boundary: Beginning at the confluence of Ruby Creek and Crater Creek; then north up Crater Creek to the ridge line between Jerry Lakes and a pinnacle of Jack Mountain (7,292 ft. elevation); continue due

PERMANENT

north to Devil's Creek; then west down Devil's Creek to Ross Lake; then south along the east shoreline of Ross Lake to Ruby Arm; then easterly up Ruby Arm and Ruby Creek to the confluence of Crater Creek and the point of beginning.

Goat Unit 4-38 Corral Pass: Permit Area: Pierce County within the following described boundary: Beginning where Goat Creek intersects the Corral Pass Road; then southeast up Goat Creek to the Cascade Crest; then north along the Crest to USFS Trail 1188; then northwest along said trail to USFS Trail 1176; then north along said trail to Corral Pass; then west along Corral Pass Road to its intersection with Goat Creek and the point of beginning.

Goat Unit 5-2 Tatoosh: Permit Area: Lewis County within the following described boundary: Beginning at the junction of the southern Mount Rainier National Park Boundary and State Highway 123; then south along State Highway 123 to U.S. Highway 12; then southwest along said highway to Skate Creek Road (USFS Road 52); then northwest along said road to the junction of Morse Creek Road (old road to Longmire Campground); then north along said road to the Mount Rainier National Park Boundary; then east along the southern park boundary to the point of beginning.

Goat Unit 5-3 Smith Creek: Permit area: Lewis County within the following described boundary: Beginning at the Town of Randle; then east along U.S. Highway 12 to USFS Road 21; then southeast along USFS Road 21 to USFS Road 22; then northeast and northwest along USFS Road 22 to USFS Road 23; then east and northwest on USFS Road 23 to USFS Road 25; then north along USFS Road 25 to Randle and point of beginning.

Goat Unit 5-4 Goat Rocks: Permit Area: Lewis County south of the White Pass Highway (U.S. Highway 12) and east of the Johnson Creek Road (USFS Road 1302).

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

REPEALER

The following sections of the Washington Administrative Code are repealed:

- WAC 232-12-131 Permits for special hunting and trapping seasons
- WAC 232-28-274 2000 Big game and wild turkey auction permits and raffles
- WAC 232-28-280 1999 Deer general seasons and 1999 special permits
- WAC 232-28-281 1999-2000 Elk general seasons and 1999-2000 special permits

AMENDATORY SECTION (Amending Order 01-04 [00-254], filed 1/31/01)

WAC 232-28-02203 Game management units (GMUs)—Special game areas—Boundary descriptions—Region three

GMU 328-NANEUM (Kittitas and Chelan counties): Beginning at Swauk Pass on U.S. Highway 97 and USFS Road 9716; east on USFS Road 9716 to the Liberty-Beehive Road (USFS 9712); east on the Liberty-Beehive Road to the west boundary of Section 22 (T21N, R19E); southeast along the ridge past Mission Peak to Wenatchee Mountain and Naneum Ridge Road (WDFW Road 9); southeast on the Naneum Ridge Road to the Colockum Pass Road (WDFW Road 10); south on the Colockum Pass Road to the East Highline Canal; northwest along the East Highline Canal to the Lower Green Canyon Road; south on the Lower Green Canyon Road to U.S. Highway 97; north on U.S. Highway 97 to Swauk Pass and the point of beginning.

GMU 329-QUILOMENE (Kittitas and Chelan counties): Beginning on the Columbia River at the mouth of Tarpiscan Creek; south along the Columbia River to ~~((Vantage and Interstate Highway 90; west on Interstate Highway 90 to the East Highline Canal; north on the East Highline Canal))~~ Cape Horn; south along the top of Cape Horn and West Bar Cliffs (cliffs overlooking West Bar) to WDFW Road 14.14; east along WDFW Road 14.14 to WDFW Road 14.17; south along WDFW Road 14.17 to WDFW Road 14 rear gate; south on WDFW Road 14 to Tekison Creek; southeast along Tekison Creek to the Columbia River; south along Columbia River to Vantage and Interstate 90 (I-90); west along I-90 to East Highline Canal; north on East Highline Canal to the Colockum Pass Road (Road 10); north on the Colockum Pass Road to North Fork Tarpiscan Road (Rd 10.10); east on North Fork Tarpiscan Road to ~~((North Fork))~~ Tarpiscan Road 14; south on Tarpiscan Road approximately 100 feet to Tarpiscan Creek; east on ~~((North Fork Tarpiscan Creek and))~~ Tarpiscan Creek to the Columbia River and the point of beginning.

GMU 330-West Bar (Kittitas County): Beginning on the Columbia River at Cape Horn; south along the top of Cape Horn and West Bar Cliffs (cliffs overlooking West Bar) to WDFW Road 14.14; east along Road 14.14 to WDFW Road 14.17; south along WDFW Road 14.17 to WDFW Road 14 near the gate; south on road WDFW 14 to Tekison Creek; southeast along Tekison Creek to the Columbia River; north and west along the Columbia River to Cape Horn and the point of beginning.

GMU 334-ELLENSBURG (Kittitas County): Beginning on U.S. Highway 97 and the Lower Green Canyon Road; north on the Lower Green Canyon Road to the East Highline Canal; east and south along the canal past Interstate 90 to the pump station; south and west along the north branch of the canal to State Highway 821 and the Yakima River; north along the Yakima River to the Damon Road; south on Damon Road and Shushuskin Canyon to the South Branch Extension Canal; west along the canal to the Bradshaw Road; west

PERMANENT

along Bradshaw Road to the elk fence; west and north along the elk fence to Taneum Creek; east along Taneum Creek to the Yakima River; southeast along the Yakima River to the Thorp Highway; east on the Thorp Highway and State Highway 10 to U.S. Highway 97; north along U.S. Highway 97 to the Lower Green Canyon Road and the point of beginning.

GMU 335-TEANAWAY (Kittitas County): Beginning at Snoqualmie Pass on the Pacific Crest Trail; north on the Pacific Crest Trail to the Alpine Lakes Wilderness Boundary; east on the Alpine Wilderness Boundary to the Chelan-Kittitas County line; southeast on the county line and Trail 1226 to Swauk Pass and U.S. Highway 97; south on U.S. Highway 97 to State Highway 10; northwest on State Highways 10, 970, 903 to Cle Elum and Interstate 90; west on Interstate 90 to Snoqualmie Pass and the Pacific Crest Trail and the point of beginning.

GMU 336-TANEUM (Kittitas County): Beginning at the Pacific Crest Trail and Interstate 90 at Snoqualmie Pass; east on Interstate 90 to Cle Elum and State Highway 903; east on State Highways 903, 970 and 10 to the Thorp Highway; southeast on the Thorp Highway to the Thorp Highway Bridge and the Yakima River; southwest along the Yakima River (upstream) to Taneum Creek; west along Taneum Creek to the South Fork Taneum Creek; west along the South Fork Taneum Creek to Trail 1367; west on Trail 1367 to Trail 1363; south on Trail 1363 and south along Peaches Ridge to Trail 1388; west on Trail 1388 to Blowout Mountain on the Pacific Crest Trail; north on the Pacific Crest Trail to Snoqualmie Pass and the point of beginning.

GMU 340-MANASTASH (Kittitas County): Beginning at Quartz Mountain and Peaches Ridge (Trail 1363); north and east on Trail 1363 to Trail 1367; southeast on Trail 1367 to the South Fork Taneum Creek; east along the South Fork Taneum Creek to Taneum Creek; east along Taneum Creek to the elk fence; southeast along the elk fence to Bradshaw Road; east on Bradshaw Road to the South Branch Highline Canal; southeast along the South Branch Highline Canal to the Wenas-Ellensburg Road (at Shushuskin Canyon); north on the Wenas-Ellensburg Road to the Damon Road; north on the Damon Road to the Yakima River; south along the Yakima River to Umtanum Creek; west along Umtanum Creek to the Wenas-Ellensburg Road; west on the Wenas-Ellensburg Road to Ellensburg Pass and the Observatory Road (Section 6, T16N, R17E); north on the Observatory Road to Manastash Ridge (Section 20, T17N, R17E, W.M.); northwest along the Manastash Ridge to USFS Trail 694 (T17N, R15E, NW 1/4 of Section 12) near the USFS fence; northwest on ORV Trail 694 to ORV Trail 688 near Rocky Saddle; northwest on ORV Trail 688 to USFS Trail 1388; northwest on Trail 1388 to Quartz Mountain and Peaches Ridge Trail and the point of beginning.

GMU 342-UMTANUM (Kittitas and Yakima counties): Beginning at Manastash Ridge at the junction of Forest Road 1701; east along the Manastash Ridge to the Observatory Road in Section 20, T17N, R17E, W.M.; south on the Observatory Road to the Wenas-Ellensburg Road near Ellensburg Pass (Section 6, T16N, R17E, W.M.); east on the Wenas-

Ellensburg Road to Umtanum Creek; east along the Umtanum Creek to the Yakima River; south along the Yakima River to Yakima and U.S. Highway 12; northwest on U.S. Highway 12 to State Highway 410; northwest on State Highway 410 to USFS Road 1701; north on USFS Road 1701 to the point of beginning.

GMU 346-LITTLE NACHES (Yakima and Kittitas counties): Beginning at Blowout Mountain and the USFS Road 1388; east on USFS Road 1388 to USFS ORV Trail 688 to Rocky Saddle; east on USFS ORV Trail 694 to USFS Road 1701 near the USFS fence (T17N, R15E, NW 1/4 of Section 12); south on USFS Road 1701 to State Highway 410; northwest and southwest on State Highway 410 to the Pacific Crest Trail near Chinook Pass; north on the Pacific Crest Trail to Blowout Mountain and the point of beginning.

GMU 352-NILE (Yakima County): Beginning on the Bumping Lake Road and State Highway 410; east and south on State Highway 410 to Nile and USFS Road 1500; west on USFS Road 1500 to the McDaniel Lake Road (USFS Road 1502); west on the McDaniel Lake Road to the North Fork of Rattlesnake Creek; west along the North Fork Rattlesnake Creek to the USFS Richmond Mine Trail 973; north on the Richmond Mine Trail 973 to the Bumping Lake Road; north on the Bumping Lake Road to State Highway 410 and the point of beginning.

GMU 356-BUMPING (Yakima County): Beginning on the Pacific Crest Trail and State Highway 410 at Chinook Pass; northeast on State Highway 410 to the Bumping Lake Road; southwest on the Bumping Lake Road to the USFS Richmond Mine Trail 973; southeast on the Richmond Mine Trail 973 to the North Fork Rattlesnake Creek; southeast along the North Fork Rattlesnake Creek to the McDaniel Lake Road (USFS Road 1502); southeast on the McDaniel Lake Road to USFS Road 1500; south on USFS Road 1500 to State Highway 12; west on Highway 12 to the Pacific Crest Trail at White Pass; north on the Pacific Crest Trail to Chinook Pass and the point of beginning. (Lands within the boundary of Mt. Rainier National Park along the Pacific Crest Trail are not open to hunting.)

GMU 360-BETHEL (Yakima County): Beginning on USFS Road 1500 and Highway 410 at Nile; southeast on Highway 410 to Highway 12; southwest on Highway 12 to USFS Road 1500; north and east on USFS Road 1500 to Nile and the point of beginning.

GMU 364-RIMROCK (Yakima County): Beginning on the Pacific Crest Trail and Highway 12 at White Pass; east on Highway 12 to Windy Point and the Jump Off Road (USFS 1302); southwest on Jump Off Road to Jump Off Lookout; south on Divide Ridge Crest to Darland Mountain and to the Darland Mountain Road and the north boundary of the Yakama Indian Reservation; west on the Yakama Indian Reservation boundary to the Pacific Crest Trail; north on the Pacific Crest Trail to Highway 12 at White Pass and the point of beginning.

GMU 366-RIMROCK-COWICHE (Yakima County): GMUs 364 (Rimrock) and 368 (Cowiche).

GMU 368-COWICHE (Yakima County): Beginning on Highway 12 and Jump Off Road near Windy Point; northeast and southeast on Highway 12 to the Yakima River; south along the Yakima River to the Yakama Indian Reservation boundary south of Union Gap; west on the reservation boundary to Darland Mountain; north on the crest of Divide Ridge to the Jump Off Lookout and the Jump Off Road (USFS Road 1302); northeast on the Jump Off Road to Highway 12 and the point of beginning.

GMU 371-ALKALI (Kittitas and Yakima counties): Beginning one mile south of Thrall and Highway 821 at the Yakima River and the East High Canal; east and north along the East High Canal to Interstate Highway 90; east on Interstate Highway 90 to Vantage and the Columbia River; south along the Columbia River to Priest Rapids Dam and the Yakima Training Center (YTC) boundary; south and west along the YTC boundary to the main gate at Firing Center Road; west along Firing Center Road and Harrison Road to the Yakima River; north along the Yakima River to the East High Canal and the point of beginning.

GMU 372-KIONA (Benton and Yakima counties): Beginning at Priest Rapids Dam and the Columbia River; east and south along the Columbia River (Yakima, Grant, Benton, and Walla Walla County line) to the Alderdale Road; north on the Alderdale Road to the Klickitat-Yakima County line; west on the county line to the Yakama Indian Reservation boundary; northeast on the reservation boundary to the Mabton-Sunnyside Road; north on the Mabton-Sunnyside Road to the Yakima River; northwest along the Yakima River to Harrison Road; east along Harrison Road and Firing Center Road to the main gate of the Yakima Training Center (YTC); south and east along the YTC boundary to Priest Rapids Dam and the Columbia River and the point of beginning. The Hanford Nuclear Reservation is closed to all unauthorized public entry.

GMU 381-ESQUATZEL (Franklin, Grant and Adams counties): Beginning at the Vernita Bridge on the west shore of the Columbia River and State Highway 24; north and east on State Highway 24 to Muse Road; east on Muse Road to State Highway 17; north on State Highway 17 to State Highway 26; east on State Highway 26 to Palouse River; south on Palouse River to Snake River; west and southwest on Snake River to Columbia River; north and west on Columbia River (including all islands) to the Vernita Bridge and the point of beginning. The Hanford Nuclear Site and the Saddle Mountain National Wildlife Refuge are closed to unauthorized public entry.

GMU 382-EAST KLICKITAT (Klickitat County): Beginning at the U.S. Highway 97 Bridge on the Columbia River (Maryhill); north on U.S. Highway 97 to Satus Pass and the Yakama Indian Reservation; east along south reservation boundary to the Yakima County line; east on the Yakima/Klickitat County line to Alderdale Road; southeast and south on Alderdale Road to Alderdale and the Columbia River; west down the Columbia River to U.S. Highway 97 Bridge and the point of beginning.

GMU 524-MARGARET (Cowlitz, Skamania and Lewis counties): Beginning on the North Fork Toutle River at the mouth of the Green River; southeast up the North Fork Toutle River to the mouth of Hoffstadt Creek; up Hoffstadt Creek to the State Route 504 Bridge over Hoffstadt Creek; east on State Route 504 to mile post 45 (the bridge over the outlet to Coldwater Lake); up the outlet of Coldwater Lake to Coldwater Lake; northeast along the shoreline of Coldwater Lake to Coldwater Creek; up Coldwater Creek to its headwaters and east to the headwaters of Grizzly Lake; east down the west inlet creek to Grizzly Lake; down Grizzly Creek to the Green

PERMANENT

River and the mouth of Strawberry Lake Creek; up Strawberry Lake Creek to the USFS 26 Road (Ryan Lake Road); north on the USFS 26 Road to the USFS 2612 Road; west on USFS 2612 Road to the Green River; down the Green River to its mouth and point of beginning.

GMU 530-RYDERWOOD (Cowlitz, Lewis and Wahkiakum counties): Beginning south of the Town of Doty on State Highway 6; east on State Highway 6 to Chehalis and Interstate 5; south on Interstate 5 to the Cowlitz River; south along the Cowlitz River to Castle Rock and the PH 10 Road (Four Corners); west on the PH 10 Road to State Highway 411; south on State Highway 411 to Delameter Road (Woodside Drive); southwest on Delameter Road to the 2000 Road; west on the 2000 Road to the 2200 Road; north and west on the 2200 Road to the International Paper 1050 Road; west on the International Paper 1050 Road to the International Paper 1000 Road; south on the International Paper 1000 Road to the Germany Creek Road; south on the Germany Creek Road to State Highway 4; west on State Highway 4 to Germany Creek; south along Germany Creek to its mouth at the Columbia River; west along the Columbia River and the Cathlamet Channel to the Puget Island Bridge on State Highway 409; north on State Highway 409 to State Highway 4; west on State Highway 4 to State Highway 407 (Elochoman Valley Road); northwest on State Highway 407 (Elochoman Valley Road) to the 500 Road; west on the 500 Road to the 1800 Road; north on the 1800 Road to the ~~((International Paper))~~ Weyerhaeuser 1000 Road; north on the ~~((International Paper))~~ Weyerhaeuser 1000 Road to the Muller Road; north on Muller Road to Pe Ell and State Highway 6; north on State Highway 6 to south of Doty and the point of beginning.

GMU 550-COWEEMAN (Cowlitz County): Beginning where the Toutle River flows into Cowlitz River; east along the Toutle River to the South Fork Toutle River; up the South Fork Toutle to the 4950 Road; south and east on the 4950 Road to the 235 Road; south on the 235, 200, 245, 134, 133, 130 and 1680 Roads to the 1600 Road; southeast along the 1600 and 1400 Roads to the Kalama/Coweeman Summit; south along the 1420 Road to the 1426 Road; southwest along the 1426 Road to the 1428 Road; southwest along 1428 Road to 1429 Road; southwest along 1429 Road to 6400 Road; southwest down the 6400 Road to the 6000 Road; east to the 6450 Road; southeast approximately one mile on the 6450 Road to the 6452 Road; southeast on 6452 Road to Dubois Road; to State Highway 503; west on State Highway 503 to Cape Horn Creek; down Cape Horn Creek to Merwin Reservoir and the Lewis River; down the Lewis River to the Natural Gas Pipeline right of way; north up the Natural Gas Pipeline right of way to Ostrander Creek; west down Ostrander Creek to ~~((I-5))~~ the Cowlitz River; north on ~~((I-5))~~ the Cowlitz River to the Toutle River and point of beginning.

GMU 554-YALE (Cowlitz County): Beginning on State Highway 503 at its crossing of Cape Horn Creek; east on State Highway 503 to 6690 Road (Rock Creek Road); northeast on the 6690 and 6696 Roads to West Fork Speelyai Creek; down Speelyai Creek to State Highway 503; northeast on State Highway 503 to Dog Creek; down Dog Creek to Yale Reservoir; south and west down Yale Reservoir, Lewis

River, and Merwin Reservoir to Cape Horn Creek; up Cape Horn Creek to State Highway 503 and point of beginning.

GMU 556-TOUTLE (Cowlitz County): Beginning on State Highway 503 (Lewis River Road) and USFS 81 Road (Merril Lake Road) intersection; north on USFS 81 Road to Weyerhaeuser 7200 Road; northeast on the 7200 Road to the 7400 Road; northwest on the 7400 Road to the 5500 Road; east and north on the 5500 and 5670 Roads to the South Fork Toutle River; east up the South Fork Toutle River to a point due south of the headwaters of the South Fork Castle Creek (Section 1, T8N, R4E); north along the posted Loo-wit boundary to end of the Weyerhaeuser 3092 Road; west on the 3092 Road to 3090 Road; northwest on the 3090, 3000 and 3001 Roads; west on the 3001 Road to Deer Creek Springs; down Deer Creek Springs to Deer Creek, downstream on Deer Creek to the North Fork Toutle River; down the North Fork Toutle River to the South Fork Toutle River; southeast up the South Fork Toutle River to the 4950 Road; south on the 4950, 235, 200, 245, 243A, 134, 133, 130, and 1680 Roads to the 1600 Road; southeast on the 1600 and 1400 Roads to the Kalama/Coweeman Summit; south on the 1420 Road to the 1426 Road; southwest along the 1426 Road to the 1428 Road; southwest along 1428 Road to 1429 Road to 6400 Road; southwest on the 6400 Road to the 6000 Road; east up the 6000 Road to the 6450 Road; southwest on the 6450 Road approximately one mile to the 6452 Road; southeast on 6452 Road to Dubois Road to State Highway 503; east on State Highway 503 to the 6690 Road (Rock Creek Road); northeast on the 6690 and 6696 Roads to the West Fork Speelyai Creek; down Speelyai Creek to State Highway 503; northeast on State Highway 503 to USFS 81 Road and point of beginning.

GMU 558-MARBLE (Cowlitz and Skamania counties): Beginning on State Highway 503 (Lewis River Road) and USFS 81 Road intersection; north on USFS 81 Road to Weyerhaeuser 7200 Road; northeast on the 7200 Road to the 7400 Road; northwest on the 7400 Road to the 5500 Road; east and north on the 5500 and 5670 Roads to the South Fork Toutle River; east up the South Fork Toutle River to Mount St. Helens crater and along crater to headwaters of Ape Canyon; east down Ape Canyon Creek to USFS Smith Creek Trail; north up USFS Smith Creek Trail to USFS 99 Road; northeast on USFS 99 Road to USFS 25 Road; south on USFS 25 Road to the Muddy River; south down the Muddy River to the North Fork Lewis River; west down the North Fork Lewis River, Swift Reservoir to Yale Reservoir and Dog Creek; north up Dog Creek to State Highway 503; southwest to USFS 81 Road and point of beginning.

GMU 560-LEWIS RIVER (Skamania, Klickitat, Yakima and Lewis counties): Beginning at Trout Lake, north to the USFS 80 Road; north to USFS 17 Road (Mt. Adams Recreational Road); northeast to USFS 82 Road; northeast on the USFS 82 Road to the Yakama Indian Reservation Boundary (Section 16, T7N, R11E); north along reservation boundary (Cascade Crest) to USFS 5603 Road; west to the USFS 56 Road; west to the Cispus River; northwest down the Cispus River to the USFS 26 Road (Ryan Lake Road); west and south on the USFS 26 Road to USFS 99 Road; northeast to

the USFS 25 Road; south to Muddy River; south down the Muddy River to the North Fork Lewis River; west to the USFS 90 Road bridge (Eagle Cliff); east on USFS 90 Road to USFS 51 Road; southeast to USFS 30 Road; northeast on the USFS 30 Road to USFS 24 Road; southeast to the State Highway 141; northeast on State Highway 141 to Trout Lake and point of beginning.

GMU 564-BATTLE GROUND (Clark and Skamania counties): Beginning where Ostrander Creek flows into the Cowlitz River; east up Ostrander Creek approximately 1/2 mile to the Northwest Natural Gas Pipeline right of way; south on the Northwest Natural Gas Pipeline right of way to the Lewis River; northeast along the Lewis River (Cowlitz-Clark County line) to the Merwin Dam; east along the south shoreline of Lake Merwin and Lewis River to State Route 503; south and west on State Route 503 to N.E. Amboy Road; south on N.E. Amboy Road to N.E. Yacolt Road; east on Yacolt Road to Railroad Avenue; southeast to Sunset Falls Road; east to Dole Valley Road; south on the Dole Valley Road to Rock Creek Road; southeast and south on the DNR 1000 Road to DNR 1500 Road; east on DNR 1500 Road to N.E. 412th Avenue; south on N.E. 412th Avenue to Skye Road; east and south on the Skye Road to Washougal River Road; south on Washougal River Road to State Highway 140; southeast on State Highway 140 to Cape Horn Road; south on Cape Horn Road to the Columbia River; west down the Columbia River (including islands in Washington) to the Cowlitz River; north along the Cowlitz River to Ostrander Creek and the point of beginning.

GMU 568-WASHOUGAL (Clark and Skamania counties): Beginning on the Lewis River at State Route 503; east on Lewis River (Cowlitz-Clark County line) to Canyon Creek; southeast along Canyon Creek to N.E. Healy Road; east on N.E. Healy Road to USFS Road 54; east on USFS Road 54 to USFS Road 37; northwest on USFS Road 37 to USFS Road 53; south on USFS Road 53 to USFS Road 4205 (Gumboat Road); south on USFS Road 4205 to USFS Road 42 (Green Fork Road); southwest on USFS Road 42 to USFS Road 41 (Sunset Hemlock Road) at Sunset Falls; east on USFS Road 41 to USFS Road 406 at Lookout Mountain; southeast on USFS Road 406 to the boundary of the Gifford Pinchot National Forest; due east on the National Forest Boundary to Rock Creek; southeast along Rock Creek to Stevenson and the Columbia River; west down the Columbia River (including the islands in Washington) to the Cape Horn Road; north on the Cape Horn Road to Canyon Creek Road; west on Canyon Creek Road to the Washougal River Road; east on the Washougal River Road to the Skye Road; northwest on the Skye Road to N.E. 412th Avenue; northwest on DNR 1500 Road to DNR 1000 Road; north and west on DNR 1000 Road to Dole Valley Road; north on the Dole Valley Road to Sunset Falls Road; northwest to Railroad Avenue through Yacolt; northwest on N.E. Cedar Creek Road to State Route 503; northeast along State Route 503 to the Lewis River and the point of beginning.

GMU 572-SIOUXON (Skamania and Clark counties): Beginning at the Yale Dam and Yale Lake; north along Yale

Lake (Cowlitz-Clark County line) to the North Fork Lewis River and Lewis River (old river bed); northeast along the Lewis River to the Swift Creek Reservoir; east along the Swift Creek Reservoir to Eagle Cliff Bridge and USFS Road 90; east on USFS Road 90 to USFS 51 Road (Curly Creek Road); southeast on USFS Road 51 to USFS Road 30; north on USFS Road 30 to USFS Road 24 (Twin Butte Road); south on USFS Road 24 to USFS Road 60 (Carson Guler Road); southwest on USFS Road 60 to USFS Road 65 (Panther Creek Road); southwest on USFS Road 65 to the Wind River Highway; northwest on the Wind River Highway to Stabler; west on Hemlock Road to USFS Road 41 (Sunset-Hemlock Road); west on the USFS Road 41 to Sunset Falls and USFS Road 42 (Green Fork Road); northeast on USFS Road 42 to USFS Road 4205 (Gumboat Road); north on USFS Road 4205 to USFS Road 53; northwest on USFS Road 53 to USFS Road 54 (N.E. Healy Road); west on USFS Road 54 to Canyon Creek; north along Canyon Creek to the Lewis River; northeast along the Lewis River to the Yale Dam and the point of beginning.

GMU 574-WIND RIVER (Skamania County): Beginning at Little Lookout Mountain on USFS Road 41 (Sunset-Mowich Butte); east on USFS Road 41 to Stabler; east on the Hemlock Road to the Wind River Road; southeast on the Wind River Road to Old State Road; east on Old State Road to USFS Road 65 (Panther Creek Road); north on USFS Road 65 to USFS Road 60; northeast on USFS Road 60 to State Highway 141; continue east on State Highway 141 to USFS Road 86; south on USFS Road 86 to USFS Road 1840; south on USFS Road 1840 to USFS Road 18 (Oklahoma Road); south on USFS Road 18 to Willard and the Little White Salmon River; south on the Little White Salmon River to the Columbia River; west along the Columbia River to the mouth of Rock Creek; northwest along Rock Creek through Stevenson to the south boundary of Gifford Pinchot National Forest; on the south boundary of Gifford Pinchot National Forest due west to USFS Road 4100-406; northwest on USFS Road 4100-406 to USFS Road 41 and the point of beginning.

GMU 578-WEST KLICKITAT (Klickitat, Yakima, and Skamania counties): Beginning on the Columbia River at the mouth of the Little White Salmon River; up the Little White Salmon River to Willard; north on USFS 18 Road (Oklahoma Road) to USFS 1840 Road; north on USFS 1840 Road to USFS Road 86; north on USFS Road 86 to State Highway 141; northeast on State Highway 141 to Trout Lake and Mt. Adams Recreational Area Road; north on Mt. Adams Recreational Area Road to USFS 82 Road; northeast on USFS 82 Road to the Yakama Indian Reservation Boundary (Section 16, T7N, R11E); south along the reservation boundary to King Mountain and the southwest corner of the reservation (Section 27, T7N, R11E); east along reservation boundary (approximately one mile) to the end of King Mountain Road; north along the reservation boundary to Section 2 T7N, R11E; east along the reservation boundary to the northeastern corner of Section 4, T7N, R12E; southeast along the reservation boundary to Summit Creek Boundary Road; south to the Glenwood/Goldendale Road; northwest on the Glenwood/Goldendale Road to the Lakeside Road; south on

the Lakeside Road to Fisher Hill Road (P-2000); south on Fisher Hill Road to the Fisher Hill Bridge; south down the Klickitat River to the Columbia River; west down the Columbia River to the mouth of the Little White Salmon River and point of beginning.

GMU 588-GRAYBACK (Klickitat County): Beginning at U.S. Highway 97 bridge across Columbia River (Maryhill); west down the Columbia River to Lyle and the mouth of the Klickitat River; up the Klickitat River to the Fisher Hill Bridge; north along the Fisher Hill Road (P-2000) to the Lakeside Road; north and northwest on the Lakeside Road to Glenwood/Goldendale Road; east and southeast on the Glenwood/Goldendale Road to the Summit Creek Primary Road; northeast to the Yakama Indian Reservation Boundary; east along the southern boundary of the reservation to U.S. Highway 97 (Satus Pass Highway); south on U.S. Highway 97 to Maryhill and point of beginning.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order 00-05, filed 1/24/00, effective 2/24/00)

WAC 232-28-02220 Game management units (GMUs)—Special game areas—Boundary descriptions—Elk area descriptions

Elk Area No. 029 Toledo (Lewis and Cowlitz counties): Beginning at the Cowlitz River and State Highway 505 junction; east along State Highway 505 to Eden Road; east along Eden Road to the Evans Road; east along the Evans Road to the Weyerhaeuser 1800 Road; south along Weyerhaeuser 1800 Road to the Weyerhaeuser 1900 Road; south along the Weyerhaeuser 1900 Road to the North Fork Toutle River to Alder Creek to the Weyerhaeuser 2400 Road; west along the Weyerhaeuser 2400 Road to the Weyerhaeuser 4400 Road to Johnson Creek and the South Fork Toutle River to State Highway 504; east on Highway 504 to State Highway 505; north along Highway 505 to the Weyerhaeuser 1500 Road to Salmon Creek; west along Salmon Creek to the Cowlitz River; north along the Cowlitz River to the junction of State Highway 505 and point of beginning.

Elk Area No. 031 Shushuskin (Kittitas County): Beginning at Umtanum Road and the Yakima River; west along Umtanum Road to Manastash Road; west on Manastash Road to Cove Road; south and west on Cove Road to Hanson Road and Umtanum Creek; east (downstream) along Umtanum Creek to the Yakima River; north (upstream) along the Yakima River to the point of beginning.

Elk Area No. 032 Malaga (Kittitas and Chelan counties): (~~Beginning at the power line on the Columbia River (approximately 3/4 mile downstream from Colockum Creek); west and south along the Powerline Road to the intersection with the North Fork Tarpiscan Creek Road (Section 9, T20N, R21E); north and west along North Fork of Tarpiscan Creek Road to Colockum Pass Road (Section 9, T20N,~~

~~R21E); south and west on Colockum Pass Road to section line between Sections 8 and 9 as well as Sections 4 and 5 (T20N, R21E) and Sections 32 and 33 (T21N, R21E); to Mose Carr Road; west and north on Mose Carr Road to Jump Off Road; south and west on Jump Off Road to Shaller Road; north and west on Shaller Road to Upper Basin Loop Road; north and west on Upper Basin Loop Road to Wheeler Ridge Road; north on Wheeler Ridge Road to the Basin Loop Road (pavement) in Section 10 (T21N, R20E); north on the Basin Loop Road to Wenatchee Heights Road; west on Wenatchee Heights Road to Squilchuck Road; south on Squilchuck Road to Beehive Road (USFS Road 9712); northwest on Beehive Road to USFS Road 7100 near Beehive Reservoir; north and west on USFS Road 7100 to Peavine Canyon Road (USFS Road 7101); north and east on Peavine Canyon Road to Number Two Canyon Road; north on Number Two Canyon Road to Crawford Street in Wenatchee; east on Crawford Street to the Columbia River; south and east along the Columbia River to the powerline south of Colockum Creek and point of beginning.)) Beginning at the mouth of Davies Canyon on the Columbia River; west along Davies Canyon to the cliffs above (north of) the North Fork Tarpiscan Creek; west and north along the cliffs to the Bonneville Power Line; south-west along the powerline to the North Fork Tarpiscan Road in Section 9, Township 20N, Range 21E; north and west along North Fork Tarpiscan Road to Colockum Pass Road (Section 9, Township 20N, Range 21E); south and west on Colockum Pass Road to section line between Sections 8 & 9; north along the section line between Sections 8 and 9 as well as Sections 4 & 5 (T20N, R21E) & Sections 32 & 33 (T21N, R21E) to Moses Carr Road; west and north on Moses Carr Road to Jump Off Road; south and west on Jump Off Road to Shaller Road; north and west on Shaller Road to Upper Basin Loop Road; north and West on Upper Basin Loop Road to Wheeler Ridge Road; north on Wheeler Ridge Road to the Basin Loop Road (pavement) in Section 10 (T21N, R20E); north on Basin Loop Road to Wenatchee Heights Road; west on Wenatchee Heights Road to Squilchuck Road; south on Squilchuck Road to Beehive Road (USFS Rd 9712); north-west on Beehive Road to USFS Rd 7100 near Beehive Reservoir; north and west on USFS Rd 7100 to Peavine Canyon Road (USFS Rd 7101); north and east on Peavine Canyon Road to Number Two Canyon Road; north on Number Two Canyon Road to Crawford Street in Wenatchee; east on Crawford Street to the Columbia River; south and east along the Columbia River to Davies Canyon and point of beginning. (Naneum Green Dot, Washington Gazetteer, Wenatchee National Forest)~~

Elk Area No. 033 Peshastin (Chelan County): Beginning at Crawford Street and the Columbia River in Wenatchee; west on Crawford Street and Number Two Canyon Road to USFS 7101 Road (Peavine Canyon); west on USFS 7101 Road to Mission Creek Road; north on Mission Creek Road to USFS 7104 Road (Sand Creek Road); west on USFS 7104 Road (Sand Creek Road) to Camas Creek; west up Camas Creek to where Camas Creek crosses USFS 7200 Road, T22N, R18E, Section 4; north along USFS 7200 Road to U.S. Highway 97; north on U.S. Highway 97 to USFS 7300 Road (Mountain Home Road); north on the USFS 7300 Road to the

Wenatchee River at Leavenworth; down the Wenatchee River and Columbia River to the point of beginning.

Elk Area No. 036 Riverbottom (Kittitas County): Beginning at the junction of Umtanum Road and State Route 821; south on State Route 821 and the Yakima River to Umtanum Creek; west up Umtanum Creek to Umtanum Road; north on Umtanum Road to State Route 821 and the point of beginning.

Elk Area No. 041 Skagit (Skagit County): Begin at the intersection of CP 190 Road and CP 132 Road (Section 28, T36N, R5E); east along the CP 132 Road to the CP 130 Road; east and south along CP 130 Road to CP 110 Road, west, south and east along CP 110 Road to Childs Creek; south down Childs Creek to State Route 20; east on State Route 20 to Grandy Creek; south down Grandy Creek to the Skagit River; south on a line to South Skagit Hwy; west on South Skagit Hwy to State Route 9; north on State Route 9 to State Route 20; east on State Route 20 to Helmick Road; north on Helmick Road to CP 190 Road to CP 132 Road and the point of beginning. (WA Atlas & Gazetteer & Mt. Baker-Snoqualmie National Forest Map)

Elk Area No. 050 Curtis (Lewis County): Beginning at the Boistfort Road, State Highway 6 intersection; west to the Mauerman Road; west and southwest on the Mauerman Road to the Pe Ell/McDonald Road; south and east on the Pe Ell/McDonald Road to the Lost Valley Road; south and southeast on the Lost Valley Road to the Boistfort Road; east and north along the Boistfort Road to State Highway 6 and point of beginning.

Elk Area No. 052 Mossyrock (Lewis County): Beginning at the intersection of Winston Creek Road and State Highway 12; east on State Highway 12 to the Cowlitz River; east on the Cowlitz River to Riffe Lake; southeast along the south shore of Riffe Lake to Swofford Pond outlet creek; south on Swofford Pond outlet creek to Green Mountain Road; west on Green Mountain Road to Perkins Road; west on Perkins Road to Longbell Road; south on Longbell Road to Winston Creek Road; north on Winston Creek Road to State Highway 12 and the point of beginning. (All lands owned and managed by the Cowlitz Wildlife Area are excluded from this Elk Area.)

Elk Area No. 053 Randle (Lewis County): Beginning at the town of Randle and the intersection of U.S. Highway 12 and State Route 131 (Forest Service 23 and 25 Roads); south on State Route 131 to Forest Service 25 Road; south on Forest Service 25 Road to the Cispus River; west along the Cispus River to the Champion 300 line bridge; south and west on the Champion 300 line to the Champion Haul Road; north along the Champion Haul Road to Kosmos Road; north on Kosmos Road to U.S. Highway 12; east on U.S. Highway 12 to Randle and point of beginning. (All lands owned and managed by the Cowlitz Wildlife Area are excluded from this Elk Area.)

Elk Area No. 054 Boistfort (Lewis County): Beginning at the Town of Vader; west along State Highway 506 to the Wildwood Road; north along the Wildwood Road to the

Abernathy 500 line gate (Section 20, T11N, R3W, Willamette Meridian); northwest along the 500, 540, and 560 lines to the Weyerhaeuser 813 line; northwest along the 813, 812, 5000J, 5000 and 4000 lines to the Pe Ell/McDonald Road (Section 15, T12N, R4W); west along the Pe Ell/McDonald Road to the Lost Valley Road; northeast along the Lost Valley Road to the Boistfort Road; north along the Boistfort Road to the King Road; east along the King Road to the town of Winlock and State Highway 603; south along Highway 505 to the Winlock/Vader Road; south along said road to the Town of Vader and the point of beginning.

Elk Area No. 055 East Valley (Wahkiakum County): Within one mile on either side of the line beginning at Wilson Creek Park on East Valley Road; west on East Valley Road to the junction with Middle Valley Road (4.5 miles); north along Middle Valley Road to the junction of Oat Field Road (2.5 miles).

Elk Area No. 057 Carlton (Lewis County): That part of 513 (South Rainier) lying east of Highway 123 and north of Highway 12.

Elk Area No. 058 West Goat Rocks (Lewis County): Goat Rocks Wilderness west of the Pacific Crest Trail.

Elk Area No. 059 Mt. Adams Wilderness (Skamania and Yakima counties): The Mt. Adams Wilderness.

Elk Area No. 062 South Bank (Grays Harbor County): That portion of GMU 660 (Minot Peak) described as follows: Beginning at Highway 12 and Wakefield Road Junction (South Elma); south on Wakefield Road, across the Chehalis River to the South Bank Road; southeast on the South Bank Road to Delezene Road; south on the Delezene Road to a point one mile from the South Bank Road; southeast along a line one mile southwest of the South Bank Road to the Oakville-Brooklyn Road; east on the Oakville-Brooklyn Road to Oakville and Highway 12; northwest on Highway 12 to Wakefield Road to Elma and the point of beginning.

Elk Area No. 064 Quinault Valley (Grays Harbor and Jefferson counties): That portion of GMU 638 (Quinault) beginning at the junction of Wright Canyon Road and South Shore Road; north to the shoreline of Lake Quinault; north along Lake Quinault to the Olympic National Park (ONP) boundary; east along ONP boundary to its intersection with the South Shore Road and U.S. Forest Service boundary; west along the U.S. Forest Service boundary to the Wright Canyon Road Junction with the South Shore Road and point of beginning.

Elk Area No. 066 Chehalis Valley (Grays Harbor County): That portion of GMU 660 (Minot Peak) beginning at Highway 12 and Highway 107 junction near Montesano; east and south on Highway 12 to Oakville; south on Oakville-Brooklyn Road to a point one mile west of South Bank Road; northwest along a line one mile southwest of South Bank Road to Delezene Road; north along Delezene Road to South Bank Road; northwest along South Bank Road to Wakefield Road; north on Wakefield Road to Chehalis River; west on

Chehalis River to Highway 107 bridge; north on Highway 107 to Highway 12 and the point of beginning.

Elk Areas No. 067 North Minot (Grays Harbor County): The portion of GMU 660 (Minot Peak) beginning at the junction on State Route 107 and the Melbourne A-line, on the Melbourne A-line to the Vesta F-line; south on Vesta F-line to Vesta H-line (Vesta Creek Road); south on Vesta Creek Road to the North River Road; south and east on North River Road to the Brooklyn Road; east on Brooklyn Road to the Garrard Creek Road; east and north on Garrard Creek Road to the South Bank Road; east on South Bank to South State Street (Oakville); north on South State Street to US 12; north-west and west on US 12 to State Route 107; south and south-west on SR 107 to the Melbourne A-line and the point of beginning.

AMENDATORY SECTION (Amending Order 00-05, filed 1/24/00, effective 2/24/00)

WAC 232-28-02240 Game management units (GMUs)—Special game areas—Boundary descriptions—Muzzleloader area descriptions

Muzzleloader Area No. 911 Fairview (Kittitas County): Begin at U.S. Highway 97 and First Creek Road; east on First Creek Road to (~~Upper Green Canyon Road and Reeceer Creek; north on Reeceer Creek~~) USFS 3507; south on USFS 3507 to (USFS 35 Road) to USFS 3517 Road; east on USFS 3517 Road to Lillard Hill Road and Wilson Creek Road; south on Wilson Creek Road to the BPA Powerlines (T19N; R19E; Section 19); east along the BPA Powerlines to the Colockum Pass Road (T19N; R20E; Section 16); south on Colockum Pass Road to the BPA Powerlines (T18N; R20E; Section 6); east along the BPA Powerlines to the Parke Creek Road; ((south)) north on Parke Creek Road to ((Christiansen)) Whiskey Jim Road; ((west)) east on ((Christiansen)) Whiskey Jim Road to ((Fox Road; north on Fox Road to Lyons Road; west on Lyons Road to Venture Road; north on Venture Road to Brick Mill Road; west on Brick Mill Road to Look Road; north on Look Road to Hungry Junction Road; west on Hungry Junction Road to U.S. Highway 97; north on U.S. Highway 97 to First Creek Road and point of beginning.) Beacon Ridge Road; south on Beacon Ridge Road to Vantage Highway; east on Vantage Highway to Interstate 90 (I-90); west on I-90 to Highway 97 and the point of beginning.

Muzzleloader Area No. 925 Ritzville (Adams County): Beginning at the junction of Interstate 90 and S.R. 261 near the Town of Ritzville; south along S.R. 261 to S.R. 26; east on S.R. 26 to the Whitman County line; north along the Adams, Whitman County line to where it intersects the Lincoln, Adams County line; north along the Adams, Lincoln

County line to Interstate 90; west along Interstate 90 to point of beginning.

Muzzleloader Area No. 926 Guemes (Skagit County): That part of GMU 407 (North Sound) on Guemes Island.

Muzzleloader Area No. 941 Skagit River (Skagit County): Beginning at the intersection of State Route 9 and State Route 20; east on State Route 20 to Grandy Creek; south down Grandy Creek to the Skagit River; south on a line to South Skagit Highway; west on South Skagit Highway to State Route 9; north on State Route 9 to point of beginning.

Muzzleloader Area No. 944 Clemen (Yakima County): That portion of GMU 342 beginning at the junction of Highway 410 and USFS Road 1701 (Big Bald Mountain Road); north to USFS Road 1712; east on USFS Road 1712 (Clemen Ridge Road) to the east edge of Meyster Canyon; along the east side of Meyster Canyon to the elk fence; west along the elk fence to Waterworks Canyon and Highway 410 and to point of beginning.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order 00-50, filed 5/23/00, effective 6/23/00)

WAC 232-28-278 2000-2002 Deer general seasons and ((2000)) 2001 special permits.

Bag Limit: One (1) deer per hunter during the ((2000)) 2001 hunting season. The Fish and Wildlife Commission may authorize two doe permits for damage areas. Any multiple doe permits will be identified by special permit.

Hunting Method: Hunters must select one of the hunting methods (modern firearm, archery, muzzleloader).

Any Buck Deer Seasons: Open only to the taking of male deer with visible antlers (buck fawns illegal).

Branched Antler Restrictions: APPLIES TO ALL HUNTERS DURING ANY ((OPEN)) GENERAL SEASON! Buck deer taken in these GMUs must meet minimum antler point requirements. Minimum antler point requirements are antler points on one side only. Antler points include eye guards but all antler points must be at least one inch long. The following GMUs have 2 or 3 point minimum requirements on buck deer taken.

2 Point GMUs: 437, 558, 574, 578, 588, 636, 654, and 681.

3 Point GMUs: All Mule Deer in 100, 200, and 300 series GMUs; Whitetail Deer in GMUs 127, 130, 133, 136, 139, 142, 145, 149, 154, 162, 163, 166, 169, 172, 175, 178, 181, and 186.

Permit Only Units: The following GMUs are closed during general seasons: 290 (Desert), 329 (Quilomene), 342 (Umtanum), 371 (Alkali), and 485 (Green River).

GMUs Closed to Deer Hunting: 157 (Mill Creek Watershed) and 522 (Loo-wit).

Blacktail Deer: Any member of blacktail/mule deer (species *Odocoileus hemionus*) found west of a line drawn from the Canadian border south on the Pacific Crest Trail and along the Yakama Indian Reservation boundary in Yakima County to Klickitat County and in Klickitat County west of Highway 97.

Mule Deer: Any member of blacktail/mule deer (species *Odocoileus hemionus*) found east of a line drawn from the Canadian border south on the Pacific Crest Trail and along the Yakama Indian Reservation boundary in Yakima County to Klickitat County and in Klickitat County east of Highway 97.

Whitetail Deer: Means any whitetail deer (member of the species *Odocoileus virginianus*) except the Columbian Whitetail Deer (species *Odocoileus virginianus leucurus*).

~~((Harvest Report Card: Successful hunters must fill out and return a Game Harvest Report Card within 10 days after taking a deer.))~~

Modern Firearm Deer Seasons

License Required: A valid big game hunting license which includes a deer species option.

Tag Required: Valid modern firearm deer tag on his/her person for the area hunted.

Hunting Method: Modern firearm deer tag hunters may use rifle, handgun, shotgun, bow or muzzleloader, but only during modern firearm seasons.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

Reviser's note: The typographical errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 00-50, filed 5/23/00, effective 6/23/00)

WAC 232-28-279 2000-2002 Elk general seasons and ((2000-2001)) 2001-2002 special permits.

Bag Limit: One (1) elk per hunter during the ((2000)) 2001 hunting season.

Hunting Method: Elk hunters must select only one of the hunting methods (modern firearm, archery, or muzzleloader).

Elk Tag Areas: Elk hunters must choose either Eastern or Western Washington to hunt in and buy the appropriate tag for that area. ((The Northwest, Blue Mountains, Colockum, and Yakima elk tags are all valid for the Eastern Washington Tag Area.))

Any Bull Elk Seasons: Open only to the taking of male elk with visible antlers (bull calves are illegal).

Spike Bull Restrictions: Bull elk taken in these GMUs must have at least one antler that is a spike above the ears (does not branch above ears). An animal with branched antlers on both sides is illegal but an animal with a spike on one side is legal in spike only units.

PERMANENT

Spike Only GMUs: 145-154, 162-186, 249-251, 328, 329, and 335-~~(371)~~ 368.

3 Point Restriction: Legal bull elk taken must have at least 3 antler points on one side only. Antler points may include eye guards, but antler points on the lower half of the main beam must be at least four (4) inches long measured from antler tip to nearest edge of beam; all other antler points must be at least one (1) inch long. Antler restrictions apply to all hunters during any open season.

3 Point GMUs: All of Western Washington except for GMUs 454, 564, 568, 574, 578, and 588 and Muzzleloader Area 941.

GMUs Closed to Elk Hunting: 418 (Nooksack), and 437 (Sauk) except for ML Elk Area 941, 485 (Green River), 490 (Cedar River), 522 (Loo-wit) and 636 (Skokomish).

Special Permits: Only hunters with elk tag prefix identified in the Special Elk Permits tables may apply for special bull or antlerless permits. Please see permit table for tag eligibility. Hunters drawn for a special permit may hunt only with a weapon in compliance with their tag and during the dates listed for the hunt.

~~((Harvest Report Card: Successful hunters must fill out and return a Game Harvest Report Card within 10 days after taking an elk.))~~

Elk Tag Areas

Eastern Washington: All 100, 200, and 300 GMUs except permit only in GMUs 127 and 130 for modern firearm hunters and permit only for all hunters in ~~((GMU))~~ GMUs 157 and 371. Modern firearm restrictions in GMU 334.

EA - Eastern Washington Archery Tag

EF - Eastern Washington Modern Firearm General Elk Tag

EM - Eastern Washington Muzzleloader Tag

Western Washington: All 400, 500, and 600 GMUs except closed in GMUs 418, 437 (except for Muzzleloader Area 941), 485, 490, 522, 636 and modern firearm restrictions in portions of GMU 660. GMU 554 is open only for early archery and muzzleloader seasons. Elk Area 064 in GMU 638 (Quinault) is open to AHE hunters only. Elk hunting by permit only in GMUs 524, 556, 621, and PLWMA 600 (Pysht).

WA - Western Washington Archery Tag

WF - Western Washington Modern Firearm General Elk Tag

WM - Western Washington Muzzleloader Tag

Modern Firearm Elk Seasons

License Required: A valid big game hunting license with an elk tag option.

Tag Required: Valid modern firearm elk tag as listed below on his/her person for the area hunted.

Hunting Method: May use rifle, bow and arrow, or muzzleloader, but only during modern firearm seasons.

Special Elk Hunts Open to Specified Tag Holders

License Required: A valid big game hunting license with an elk tag option.

Tag Required: Proper elk tags are listed with each GMU below.

Hunting Method: Hunters must use method listed on their tag, except in Firearm Restriction Areas, where some types of weapons are banned from use. See elk tag required, dates, and legal elk in table below. In firearm restriction areas modern firearm hunters may hunt with a muzzleloader equipped with a scope.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

Reviser's note: The typographical errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

WSR 01-11-038
PERMANENT RULES
DEPARTMENT OF
LABOR AND INDUSTRIES

[Filed May 9, 2001, 11:33 a.m., effective September 1, 2001]

Date of Adoption: May 9, 2001.

Purpose: Chapter 296-800 WAC, Safety and health core rules.

In 1999, the Washington state legislature approved funding for a redesign of WISHA safety and health rules. Innovations will contribute to safer and more healthful workplaces in Washington by simplifying the language of the rules and organizing them for ease of use. The purpose of this project is to develop a user-friendly rulebook of core requirements that apply to most employers in the state of Washington. We organized the safety and health rules that apply to most employers into one rulebook. We did not change or increase requirements with this rulemaking.

INNOVATIONS
Chapter 296-24 WAC,
General safety and health standards.

Chapter 296-24 WAC, Part A-1, General, educational, medical and first-aid requirements.

- The title of this part has been changed to "Purpose and scope."

Chapter 296-24 WAC, Part G-1, Means of Egress.

- The title of this part has been changed to "Automatic sprinkler systems, Fire alarm signaling systems, and Employee emergency plans and fire prevention plans."

Chapter 296-24 WAC, Part A-2, Personal Protective Equipment.

- Added a reference indicating that personal protective equipment requirements have been moved to WAC 296-800-160.
- Added a reference indicating that electrical personal protective equipment requirements have been moved to WAC 296-24-980.
- Reserved this part.

WAC 296-24-005 Purpose and scope.

- This section has been rewritten to include a reference to chapter 296-800 WAC, Safety and health core rules.

WAC 296-24-006 Equipment approval by nonstate agency or organization.

- This section has been repealed.

WAC 296-24-007 Incorporation of standards of national organization.

- This section has been moved to WAC 296-800-360.
- This section has been repealed.

WAC 296-24-008 Incorporation of standards of federal agency.

- This section has been moved to WAC 296-800-360.
- This section has been repealed.

WAC 296-24-010 Variance and procedure.

- This section is located in WAC 296-27-350.
- This section has been repealed.

WAC 296-24-015 Education and first-aid standards.

- This section has been repealed.

PERMANENT

WAC 296-24-020 Management's responsibility.

- Requirements relating to establishing, supervising, and enforcing a safe and healthful working environment; an accident prevention program; and training programs have been moved to WAC 296-800-110 and 296-800-140.
- Requirements relating to the investigation of accidents that have caused serious injuries have been moved to WAC 296-800-320.
- Requirements relating to equipment that has been involved in an immediate or probable fatality or the inpatient hospitalization of two or more employees have been moved to WAC 296-800-320.
- Requirements relating to machinery, tools, material and equipment meeting compliance requirements have been moved to WAC 296-800-110.
- Requirements relating to the posting of a notice or notices (the WISHA poster, Job safety and health protection; form F416-081-000) have been moved to WAC 296-800-200.
- Requirements relating to systems of maintaining records of occupational injuries and illnesses have been moved to WAC 296-27-030.
- This section has been repealed.

WAC 296-24-025 Employee's responsibility.

- Requirements relating to the responsibilities of employees have been moved to WAC 296-800-120.
- This section has been repealed.

WAC 296-24-040 Accident prevention programs.

- Requirements relating to the formal accident prevention program have been moved to WAC 296-800-140.
- This section has been repealed.

WAC 296-24-045 Safety and health committee plan.

- Requirements relating to safety and health committee plans have been moved to WAC 296-800-130.
- This section has been repealed.

WAC 296-24-055 Safety bulletin board.

- Requirements relating to the safety bulletin board have been moved to WAC 296-800-190.
- This section has been repealed.

WAC 296-24-061 First-aid requirements.

- Requirements relating to first-aid have been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06105 What workplaces does this rule apply to?

- Requirements relating to who the first-aid requirements apply to have been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06110 What is the purpose of this rule?

- The purpose of the first-aid requirements has been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06115 What definitions apply to this section?

- Definitions relating to first aid have been moved to WAC 296-800-370.
- This section has been repealed.

WAC 296-24-06120 How must an employer ensure that first-aid assistance is available in the workplace?

- Requirements relating to ensuring that first-aid assistance is available have been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06125 How many employees must be trained in first aid?

- Requirements relating to how many employees must be trained in first aid have been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06130 What must first-aid training cover?

- Requirements relating to what first-aid training must cover have been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06135 How often must employees complete first-aid training?

- Requirements relating to how often employees must complete first-aid training have been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06140 How must an employer document first-aid training?

- Requirements relating to documentation of first-aid training have been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06145 What is the requirement for first-aid supplies?

- Requirements relating to first-aid supplies have been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06150 What is the requirement to provide a first-aid station?

- Requirements relating to first-aid stations have been moved to WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06155 Appendix 1—Evaluation worksheet for the first-aid response plan.

- This appendix has been incorporated into WAC 296-800-150.
- This section has been repealed.

WAC 296-24-06160 Appendix 2—First-aid kit guidance.

- This appendix has been incorporated into WAC 296-800-150.
- This section has been repealed.

WAC 296-24-073 Safe place standards.

- Requirements relating to safe place standards have been moved to WAC 296-800-110.
- This section has been repealed.

WAC 296-24-075 Personal protective equipment.

- This section has been repealed.

WAC 296-24-07501 General requirements.

- General requirements relating to personal protective equipment have been moved to WAC 296-800-160.
- This section has been repealed.

WAC 296-24-078 Eye and face protection.

- Requirements relating to eye and face protection have been moved to WAC 296-800-160.
- This section has been repealed.

WAC 296-24-07801 General.

- General requirements relating to eye and face protection have been moved to WAC 296-800-160.
- A chart relating to filter lenses for protection against radiant energy has been moved to WAC 296-24-70003.
- This section has been repealed.

WAC 296-24-084 Occupational head protection.

- Requirements relating to occupational head protection have been moved to WAC 296-800-160.
- This section has been repealed.

WAC 296-24-086 Personal flotation devices.

- Requirements relating to personal flotation devices have been moved to WAC 296-800-160.
- This section has been repealed.

WAC 296-24-088 Occupational foot protection.

- Requirements relating to occupational foot protection have been moved to WAC 296-800-160.
- This section has been repealed.

WAC 296-24-090 Hand protection.

- Requirements relating to hand protection have been moved to WAC 296-800-160.
- This section has been repealed.

WAC 296-24-092 Electrical protective equipment.

- Requirements relating to electrical protective equipment have been moved to WAC 296-24-980.
- This section has been repealed.

WAC 296-24-094 Lighting and illumination.

- Requirements relating to lighting and illumination have been moved to WAC 296-800-210.
- This section has been repealed.

WAC 296-24-096 Appendix A to Part A-2—References for further information (nonmandatory).

- This section has been repealed.

WAC 296-24-098 Appendix B to Part A-2—Nonmandatory compliance guidelines for hazard assessment and personal protective equipment selection.

- This appendix has been incorporated into WAC 296-800-160.

- This section has been repealed.

WAC 296-24-10203 General requirements.

- Update a reference.

WAC 296-24-12001 Scope.

- Update references.

WAC 296-24-12003 General requirements. Housekeeping.

- All general requirements relating to housekeeping have been moved to WAC 296-800-220.
- This section has been repealed.

WAC 296-24-12005 Water supply.

- Requirements relating to potable water have been moved to WAC 296-800-230.
- Requirements relating to the construction of nonpotable water systems have been moved to WAC 296-800-230.
- Requirements relating to outlets for nonpotable water have been moved to WAC 296-800-230.
- This section has been repealed.

WAC 296-24-12007 Toilet facilities.

- Requirements relating to general toilet facilities have been moved to WAC 296-800-230.
- Requirements relating to the construction of toilet rooms have been moved to WAC 296-800-230.
- This section has been repealed.

WAC 296-24-12009 Washing facilities.

- General requirements relating to washing facilities have been moved to WAC 296-800-230.
- Requirements relating to lavatories have been moved to WAC 296-800-230.
- Requirements relating to showers have been moved to WAC 296-24-12010.
- This section has been repealed.

WAC 296-24-12010 Showers.

- Moved requirements relating to showers to this section for better organization of information.

WAC 296-24-12019 Waste disposal.

- Requirements relating to waste disposal have been moved to WAC 296-800-220.
- This section has been repealed.

WAC 296-24-12021 Vermin control.

- Requirements relating to vermin control have been moved to WAC 296-800-220.
- This section has been repealed.

WAC 296-24-14007 Sign design and colors.

- Update a reference.

WAC 296-24-21503 Secure storage.

- Requirements relating to the secure storage of material have been moved to WAC 296-800-220.
- This section has been repealed.

WAC 296-24-21505 Housekeeping.

- Requirements relating to housekeeping hazards within a storage area have been moved to WAC 296-800-220.
- This section has been repealed.

WAC 296-24-21507 Drainage.

- Requirements relating to proper drainage have been moved to WAC 296-800-220.
- This section has been repealed.

WAC 296-24-23503 General requirements.

- Update a reference.

WAC 296-24-23507 Footwalks and ladders.

- Add a reference.

WAC 296-24-23513 Electric equipment.

- Add a reference.

WAC 296-24-40513 Extinguishment.

- Update a reference.

WAC 296-24-550 Means of egress.

- Requirements relating to means of egress have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-55003 General requirements.

- General requirements relating to means of egress have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-55005 Fundamental requirements.

- Fundamental requirements relating to means of egress have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-55007 Protection of employees exposed by construction and repair operations.

- Requirements relating to the protection of employees exposed by construction and repair operations have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-55009 Maintenance.

- Requirements relating to the maintenance of automatic sprinkler systems, fire detection and alarm systems, exit lighting and fire doors have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-565 Means of egress, general.

- This section has been repealed.

WAC 296-24-56501 Permissible exit components.

- Requirements relating to exit components have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56503 Protective enclosure of exits.

- Requirements relating to the protective enclosure of exits have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56505 Width and capacity of means of egress.

- Requirements relating to the capacity in number of persons per unit of exit width have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56507 Egress capacity and occupant load.

- Requirements relating to egress capacity and occupant load have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56509 Arrangement of exits.

- Requirements relating to the arrangement of exits have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56511 Access to exits.

- Requirements relating to the access to exits have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56513 Exterior ways of exit access.

- Requirements relating to the exterior ways of exit access have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56515 Discharge from exits.

- Requirements relating to the discharge from exits have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56517 Headroom.

- Requirements relating to the headroom for means of egress have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56519 Changes in elevation.

- Requirements relating to the changes in elevation for means of egress have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56521 Maintenance and workmanship.

- Requirements relating to the means of egress being continuously maintained free of all obstructions or impediments have been moved to WAC 296-800-310.
- Requirements relating to devices or alarms installed to restrict the improper use of an exit to not impede or prevent emergency use have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56523 Furnishings and decorations.

- Requirements relating to furnishings and decorations obstructing exits have been moved to WAC 296-800-310.
- Requirements relating to furnishings and decorations being of an explosive or highly flammable character have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56529 Fire retardant paints.

- Requirements relating to fire retardant paints have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-56531 Exit marking.

- Requirements relating to exit marking have been moved to WAC 296-800-310.
- This section has been repealed.

WAC 296-24-567 Employee emergency plans and fire prevention.

- Updated a reference.

WAC 296-24-58513 Protective clothing.

- Update references.

WAC 296-24-58517 Appendix A—Fire brigades.

- Update a reference.

WAC 296-24-59201 Scope and application.

- Rewritten for clarity.

WAC 296-24-59205 General requirements.

- General requirements relating to portable fire extinguishers have been moved to WAC 296-800-300.
- This section has been repealed.

WAC 296-24-59207 Selection and distribution.

- Requirements relating to the selection and distribution of portable fire extinguishers have been moved to WAC 296-800-300.
- This section has been repealed.

WAC 296-24-59209 Inspection, maintenance and testing.

- Requirements relating to the inspection, maintenance and testing of portable fire extinguishers have been moved to WAC 296-800-300.
- This section has been repealed.

WAC 296-24-59211 Hydrostatic testing.

- The requirements relating to hydrostatic testing of portable fire extinguishers have been moved to WAC 296-800-300.
- Remaining requirements relating to hydrostatic testing have been moved to WAC 296-24-59212 for better organization of information.
- This section has been repealed.

WAC 296-24-59212 Hydrostatic testing.

- Created this section relating to hydrostatic testing for better organization of information.

WAC 296-24-59213 Training and education.

- Requirements relating to the training and education of portable fire extinguishers have been moved to WAC 296-800-300.
- This section has been repealed.

WAC 296-24-59215 Appendix A—Portable fire extinguishers.

- Update a reference.

WAC 296-24-61705 Total flooding systems with potential health and safety hazards to employees.

- Rewritten for clarity.

WAC 296-24-62203 Specific requirements.

- Rewritten for clarity.

WAC 296-24-65001 General requirements.

- Requirements relating to the safe condition of tools and equipment used by employees have been moved to WAC 296-800-110.
- This section has been repealed.

WAC 296-24-65501 Portable powered tools.

- Add a reference.

WAC 296-24-67515 Personal protective equipment.

- Update a reference.

WAC 296-24-68503 Application of arc welding equipment.

- Add a reference.

WAC 296-24-68505 Installation of arc welding equipment.

- Add references.

WAC 296-24-69001 General.

- Add a reference.

WAC 296-24-70003 Eye protection.

- Moved chart relating to filter lenses for protection against radiant energy from WAC 296-24-07801 for better organization of information.

WAC 296-24-70005 Protective clothing.

- Add a reference.

WAC 296-24-73503 Housekeeping.

- Requirements relating to housekeeping hazards on walking/working surfaces have been moved to WAC 296-800-220.
- This section has been repealed.

WAC 296-24-73509 Floor loading protection.

- Requirements relating to floor loading protection have been moved to WAC 296-800-270.
- This section has been repealed.

WAC 296-24-73513 Buildings—Floors.

- Requirements relating to buildings and floors have been moved to WAC 296-800-270.
- This section has been repealed.

WAC 296-24-76505 Where fixed stairs are required.

- Requirements relating to where fixed stairs are required have been moved to WAC 296-800-250.
- This section has been repealed.

WAC 296-24-76507 Stair strength.

- Requirements relating to the design and construction of fixed stairs have been moved to WAC 296-800-250.

WAC 296-24-76509 Stair width.

- Requirements relating to stair width have been moved to WAC 296-800-250.

WAC 296-24-76513 Stair treads.

- Requirements relating to stair treads have been moved to WAC 296-800-250.

WAC 296-24-76517 Railings and handrails.

- Requirements relating to railings and handrails have been moved to WAC 296-800-250.
- This section has been repealed.

WAC 296-24-780 Portable wood ladders.

- Some definitions relating to portable wood ladders have been moved to WAC 296-800-290 and 296-24-370.

WAC 296-24-95607 Wiring design and protection.

- Requirements relating to the polarity of connections have been moved to WAC 296-800-280.
- Requirements relating to outlet devices have been moved to WAC 296-800-280.
- Requirements relating to grounding have been moved to WAC 296-800-280.
- Update references.

WAC 296-24-980 Safeguards for personnel protection.

- Move requirements relating electrical protection equipment from WAC 296-24-092 to this section for better organization of information.
- Update references.

Chapter 296-27 WAC, Administrative rules.

The following sections from the administrative rules standard have been clear rule written and moved into a new chapter for better organization of information.

WAC 296-27-090 Reporting of fatality or multiple hospitalization incidents.

- Requirements relating to the reporting of fatality or multiple hospitalization incidents have been moved to WAC 296-800-320.
- Requirements relating to equipment that has been involved in an immediate or probable fatality or the inpatient hospitalization of two or more employees have been moved to WAC 296-800-320.
- This section has been repealed.

WAC 296-27-15501 Division of consultation and compliance, public records.

- Requirements relating to public records have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-15503 Special exemptions for confidential reports within the department's files.

- Requirements relating to exemptions for confidential reports have been moved to WAC 296-800-340.
- This section has been repealed.

WAC 296-27-15505 Accident investigation reports.

- Requirements relating to accident investigation reports have been moved to WAC 296-800-330.
- This section has been repealed.

WAC 296-27-210 Abatement verification.

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21001 What is the purpose of this rule?

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21005 When does this rule apply?

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21010 What definitions apply to this rule?

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21015 What must an employer do when asked to abate a violation?

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21020 When must an employer submit additional documentation of abatement?

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21025 When must an employer provide abatement plans?

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21030 When must an employer submit progress reports?

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21035 What must an employer do to keep employees informed about abatement activities?

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21040 How will the department determine the date that documents are submitted?

- Requirements relating to abatement verification have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21045 What are the requirements related to movable equipment?

- Requirements relating to movable equipment have been moved to WAC 296-800-350.
- This section has been repealed.

WAC 296-27-21050 Appendix A (nonmandatory).

- This section has been repealed.

Chapter 296-32 WAC,**Safety standards for telecommunications.****WAC 296-32-200 Scope and application.**

- Updated references.

WAC 296-32-220 General.

- Updated references.

WAC 296-32-230 Training.

WAC 296-62-050 Application for waiver or variances.

- Updated references.

WAC 296-62-05207 Preservation of records.

- Deleted a reference.

WAC 296-62-05211 Trade secrets.

- Moved trade secret requirements to WAC 296-62-05305 - 296-62-05325 for better organization of information.
- This section has been repealed.

Chapter 296-62 WAC, Part B-1, Trade Secrets.

- Created this part and moved the trade secret requirements from WAC 296-62-05211 and 296-62-05417 to this part.
- Rewrite for clarity.

WAC 296-62-05301 Definitions.

- Created this section and moved definitions relating to trade secrets to this section for better organization of information.

WAC 296-62-05305 Meet certain conditions if you withhold trade secret information.

- Moved trade secret requirements to WAC 296-62-05305 - 296-62-05325 for better organization of information.
- Rewrite for clarity.

WAC 296-62-05310 Reveal trade secret information when it is needed in order to treat a medical or first-aid emergency.

- Moved trade secret requirements to WAC 296-62-05305 - 296-62-05325 for better organization of information.
- Rewrite for clarity.

WAC 296-62-05315 Reveal trade secret information in nonemergency situations when requested by a health professional, employee, or designated representative.

- Moved trade secret requirements to WAC 296-62-05305 - 296-62-05325 for better organization of information.
- Rewrite for clarity.

WAC 296-62-05320 Deny a written request for disclosure of a specific chemical identity in the manner specified in this rule.

- Moved trade secret requirements to WAC 296-62-05305 - 296-62-05325 for better organization of information.
- Rewrite for clarity.

WAC 296-62-05325 Understand what is a trade secret.

- Moved trade secret requirements to WAC 296-62-05305 - 296-62-05325 for better organization of information.
- Rewrite for clarity.

WAC 296-62-054 Hazard communication purpose.

- Moved requirements relating to the chemical hazard communication program to WAC 296-800-170.
- Changed the title of this section to "Manufacturers, importers and distributors—Hazard communication."
- Rewrite for clarity.

WAC 296-62-05402 Determine whether the chemicals you produce in your workplace or import are hazardous.

- Moved requirements relating to chemicals produced in the workplace or imported are hazardous, specific to manufacturers, importers and distributors produce, to this section.
- Rewrite for clarity.

WAC 296-62-05403 Scope and application.

- Moved requirements relating to the employer's chemical hazard communication program to WAC 296-800-170.
- This section has been repealed.

WAC 296-62-05404 Use these criteria in making hazard determinations.

- Moved requirements relating to making hazard determinations, specific to manufacturers, importers and distributors, to this section.
- Rewrite for clarity.

WAC 296-62-05405 Definitions applicable to this part.

- Moved requirements relating to the employer's chemical hazard communication program to WAC 296-800-170.
- This section has been repealed.

WAC 296-62-05406 Determine whether the chemicals you produce or import are health hazards.

- Moved requirements relating to determining whether the chemicals produced or imported are health hazards, specific to manufacturers, importers and distributors, to this section.
- Rewrite for clarity.

WAC 296-62-05407 Hazard determination.

- Moved requirements relating to the employer's chemical hazard communication program to WAC 296-800-170.
- This section has been repealed.

WAC 296-62-05408 Obtain or develop a material safety data sheet for each hazardous chemical you produce or import.

- Moved requirements relating to material safety data sheets, specific to manufacturers, importers and distributors, to this section.
- Rewrite for clarity.

WAC 296-62-05409 Written hazard communication program.

- Moved requirements relating to the employer's chemical hazard communication program to WAC 296-800-170.
- This section has been repealed.

WAC 296-62-05410 Label clearly each container of hazardous chemicals that leaves your workplace.

- Moved requirements relating to labeling, specific to manufacturers, importers and distributors, to this section.
- Rewrite for clarity.

WAC 296-62-05411 Labels and other forms of warning.

- Moved requirements relating to the employer's chemical hazard communication program to WAC 296-800-170.
- This section has been repealed.

WAC 296-62-05412 Provide material safety data sheets.

- Moved requirements relating to material safety data sheets, specific to manufacturers, importers and distributors, to this section.
- Rewrite for clarity.

WAC 296-62-05413 Material safety data sheets.

- Moved requirements relating to material safety data sheets (MSDSs) to WAC 296-800-170 and 296-800-180.
- This section has been repealed.

WAC 296-62-05415 Employee training and information.

- Moved requirements relating to material safety data sheets (MSDSs) to WAC 296-800-170 and 296-800-180.
- This section has been repealed.

WAC 296-62-05417 Trade secrets.

- Moved trade secret requirements to WAC 296-62-05305 - 296-62-05325 for better organization of information.
- This section has been repealed.

WAC 296-62-05419 Effective dates.

- This section has been repealed.

WAC 296-62-05421 Appendix A—Health hazard definitions (mandatory).

- Incorporated this appendix in WAC 296-800-170 and 296-62-054 - 296-62-05412.
- This section has been repealed.

WAC 296-62-05423 Appendix B—Hazard determination (mandatory).

- Incorporated this appendix in WAC 296-800-170 and 296-62-054 - 296-62-05412.
- This section has been repealed.

WAC 296-62-05425 Appendix C—Information sources (advisory).

- This section has been repealed.

WAC 296-62-05427 Appendix D—Definition of "trade secret" (mandatory).

- Moved this section to WAC 296-62-05325.
- This section has been repealed.

WAC 296-62-05429 Appendix E—Guidelines for employer compliance (advisory).

- This section has been repealed.

- This section has been repealed.

WAC 296-350-35035 Extension of abatement date(s)—Notice of application—Notice of opportunity for hearing—Notice of provisional determination.

- Moved requirements relating to extension of abatement date(s), notice of application, notice of opportunity for hearing, notice of provisional determination to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-35040 Extension of abatement date(s)—Posting.

- Moved requirements relating to extension of abatement date(s) and posting to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-35045 Extension of abatement date(s)—Application for hearing.

- Moved requirements relating to extension of abatement date(s) and application for hearing to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-35050 Extension of abatement date(s)—Notice of hearing.

- Moved requirements relating to extension of abatement date(s) and notice of hearing to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-35055 Extension of abatement date(s)—Hearings.

- Moved requirements relating to extension of abatement date(s) and hearings to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-35060 Extension of abatement date(s)—Decision and order.

- Moved requirements relating to extension of abatement date(s) and decision and order to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-500 Citation and notice—Copy to employee representative.

- Moved requirements relating to citation and notices and copies to employee representatives to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-600 WISHA appeals.

- Moved requirements relating to WISHA appeals to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-60010 Filing an appeal—Who, when and where.

- Moved requirements relating to filing an appeal to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-60015 What must be in a WISHA appeal.

- Moved requirements relating to content of an appeal to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-60020 Why we reassume jurisdiction.

- Moved requirements relating to reassuming jurisdiction to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-60030 Reviewing appeals and extending review time.

- Moved requirements relating to reviewing appeals and extending review time to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-60035 Informal WISHA conferences.

- Moved requirements relating to informal conferences to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-60040 Issuing and appealing corrective notices.

- Moved requirements relating to issuing and appealing corrective notices to WAC 296-800-350.
- This section has been repealed.

WAC 296-350-60045 Notifying employees.

- Moved requirements relating to notifying employees to WAC 296-800-350.
- This section has been repealed.

**Chapter 296-800 WAC,
Safety and health core rules.****WAC 296-800-100 Introduction.**

- Added language regarding what the safety and health core rules represents and whom it affects.

WAC 296-800-110 Employer responsibilities: Safe workplace.

- Moved requirements relating to employer responsibilities and safe workplaces to WAC 296-800-110 through 296-800-11035.
 - WAC 296-800-1105, provide a workplace free from recognized hazards.
 - WAC 296-800-11010, provide and use means to make your workplace safe.
 - WAC 296-800-11015, prohibit employees from entering, or being in, any workplace that is not safe.
 - WAC 296-800-11020, construct your workplace so it is safe.
 - WAC 296-800-11025, prohibit alcohol and narcotics from your workplace.
 - WAC 296-800-11030, prohibit employees from using equipment or materials that do not meet the applicable WISHA requirements.
 - WAC 296-800-11035, establish, supervise, and enforce rules that lead to a safe and healthy work environment that are effective in practice.

WAC 296-800-120 Employee responsibilities.

- Moved requirements relating to employee responsibilities to this section.
 - WAC 296-800-12005 Employee responsibilities.

WAC 296-800-130 Safety committees and safety meetings.

- Moved requirements relating to safety committees and safety meetings to WAC 296-800-130 through 296-800-13015.
- Added a table for clarity.
 - WAC 296-800-13005, establish a safety committee or have safety meetings.
 - WAC 296-800-13010, make sure each meeting includes a discussion of safety topics.
 - WAC 296-800-13015, make sure that safety committee meeting minutes are recorded and preserved.

WAC 296-800-140 Accident prevention program.

- Moved requirements relating to accident prevention programs to WAC 296-800-140 through 296-800-14025.
 - WAC 296-800-14005, develop a formal, written accident prevention program.
 - WAC 296-800-14020, develop, supervise, implement, and enforce safety and health training programs that are effective in practice.
 - WAC 296-800-14025, make sure your accident prevention program is effective in practice.

WAC 296-800-150 First-aid.

- Moved requirements relating to first-aid to WAC 296-800-150 through 296-800-15025.
 - WAC 296-800-15005, make sure that first-aid trained personnel are available to provide quick and effective first aid.
 - WAC 296-800-15010, make sure first-aid training contains required subjects.
 - WAC 296-800-15015, document your first-aid training.

- WAC 296-800-15020, make sure appropriate first-aid supplies are readily available.
- WAC 296-800-15025, provide a first-aid station when required.

WAC 296-800-160 Personal protective equipment (PPE).

- Moved requirements relating to personal protective equipment to WAC 296-800-160 through 296-800-16070.
 - WAC 296-800-16005, do a hazard assessment for PPE.
 - WAC 296-800-16010, document your hazard assessment for PPE.
 - WAC 296-800-16015, select appropriate PPE for your employees.
 - WAC 296-800-16020, provide PPE to your employees.
 - WAC 296-800-16025, train your employees to use PPE.
 - WAC 296-800-16030, retrain employees to use PPE, if necessary.
 - WAC 296-800-16035, document PPE training.
 - WAC 296-800-16040, require your employees to use necessary PPE on the job.
 - WAC 296-800-16045, keep PPE in safe and good condition.
 - WAC 296-800-16050, make sure your employees use appropriate face and eye protection.
 - WAC 296-800-16055, make sure your employees use appropriate head protection.
 - WAC 296-800-16060, make sure your employees use appropriate foot protection.
 - WAC 296-800-16065, make sure your employees use appropriate hand protection.
 - WAC 296-800-16070, make sure your employees are protected from drowning.

WAC 296-800-170 Employer chemical hazard communication.

- Moved requirements relating to chemical hazard communication to WAC 296-800-170 through 296-800-17055.
 - WAC 296-800-17005, develop, implement, maintain, and make available a written chemical hazard communication program.
 - WAC 296-800-17010, identify and list all the hazardous chemicals present in your workplace.
 - WAC 296-800-17015, obtain and maintain material safety data sheets (MSDSs) for each hazardous chemical used.
 - WAC 296-800-17020, make sure material safety data sheets are readily accessible to your employees.
 - WAC 296-800-17025, label containers holding hazardous chemicals.
 - WAC 296-800-17030, inform and train your employees about hazardous chemicals in your workplace.
 - WAC 296-800-17035, follow these rules for laboratories using hazardous chemicals.
 - WAC 296-800-17040, follow these rules for handling chemicals in factory-sealed containers.

PERMANENT

- WAC 296-800-17045, translate certain chemical hazard communication documents upon request.
- WAC 296-800-17050, attempt to obtain a material safety data sheet (MSDS) upon request.
- WAC 296-800-17055, items or chemicals exempt from this rule, and exemptions from labeling.

WAC 296-800-180 Material safety data sheets (MSDSs) as exposure records.

- Moved requirements relating to material safety data sheets to WAC 296-800-180 through 296-800-18020.
 - WAC 296-800-18005, preserve exposure records for at least thirty years.
 - WAC 296-800-18010, inform current employees of exposure records.
 - WAC 296-800-18015, provide access to exposure records.
 - WAC 296-800-18020, transfer records when ceasing to do business.

WAC 296-800-190 Safety bulletin board.

- Moved requirements relating to safety bulletin boards to WAC 296-800-190 through 296-800-19005.
 - WAC 296-800-19005, provide a safety bulletin board in your workplace.

WAC 296-800-200 WISHA poster.

- Moved requirements relating to the WISHA poster to WAC 296-800-200 through 296-800-20005.
 - WAC 296-800-20005, post and keep a WISHA poster in your workplace.

WAC 296-800-210 Lighting.

- Moved requirements relating to lighting to WAC 296-800-210 through 296-800-21005.
 - WAC 296-800-21005, provide and maintain adequate lighting.

WAC 296-800-220 Housekeeping, drainage, and storage.

- Moved requirements relating to housekeeping, drainage, and storage to WAC 296-800-220 through 296-800-22040.
 - WAC 296-800-22005, keep your workplace clean.
 - WAC 296-800-22010, sweep and clean your workplace to minimize dust.
 - WAC 296-800-22015, keep your workplace free of obstacles that interfere with cleaning.
 - WAC 296-800-22020, control pests in your workplace.
 - WAC 296-800-22022, make sure floors are maintained in a safe condition.
 - WAC 296-800-22025, keep your workroom floors dry, when practical.
 - WAC 296-800-22030, provide proper drainage.
 - WAC 296-800-22035, store things safely.
 - WAC 296-800-22040, control vegetation in your storage areas.

WAC 296-800-230 Drinking water, bathrooms, washing facilities, and waste disposal.

- Moved requirements relating to drinking water, washing facilities, and waste disposal to WAC 296-800-230 through 296-800-23035.
 - WAC 296-800-23005, provide safe drinking (potable) water in your workplace.
 - WAC 296-800-23010, clearly mark the water outlets that are not fit for drinking (nonpotable).
 - WAC 296-800-23015, make sure that systems delivering not-fit-for-drinking (nonpotable) water prevent backflow into drinking water systems.
 - WAC 296-800-23020, provide bathrooms for your employees.
 - WAC 296-800-23025, provide convenient, clean washing facilities.
 - WAC 296-800-23030, keep containers used for garbage or waste in a sanitary condition.
 - WAC 296-800-23035, remove garbage and waste in a way that does not create a health hazard.

WAC 296-800-240 Environmental tobacco smoke in the office.

- Moved requirements relating to environmental tobacco smoke to WAC 296-800-240 through 296-800-24010.
 - WAC 296-800-24005, control tobacco smoke in your building.
 - WAC 296-800-24010, control tobacco smoke that comes in from the outside.

WAC 296-800-250 Stairs and stair railings.

- Moved requirements relating to stairs and stair railings to WAC 296-800-250 through 296-800-25015.
 - WAC 296-800-25005, provide fixed stairs where required.
 - WAC 296-800-25010, provide stairs that minimize hazards.
 - WAC 296-800-25015, provide handrails and stair railings.

WAC 296-800-260 Floor openings, floor holes and open-sided floors.

- Moved requirements relating to floor openings, floor holes and open-side floors to WAC 296-800-260 through 296-800-26010.
 - WAC 296-800-26005, guard or cover floor openings and floor holes.
 - WAC 296-800-26010, protect open-sided floors and platforms.

WAC 296-800-270 Workplace structural integrity.

- Moved requirements relating to workplace structural integrity to WAC 296-800-270 through 296-800-27020.
 - WAC 296-800-27005, do not overload floors or roofs.
 - WAC 296-800-27010, make sure that floors are safe.
 - WAC 296-800-27015, make sure floors can support equipment that moves or has motion.
 - WAC 296-800-27020, post approved load limits (weight limits) for floors.

WAC 296-800-280 Electrical.

- Moved requirements relating to electrical to WAC 296-800-280 through 296-800-28045.
 - WAC 296-800-28005, inspect all electrical equipment your employees use to make sure the equipment is safe.
 - WAC 296-800-28010, make sure all electrical equipment is used for its approved or listed purpose.
 - WAC 296-800-28015, make sure electrical equipment used or located in wet or damp locations is designed for such use.
 - WAC 296-800-28020, make sure electrical equipment that is not marked is not used.
 - WAC 296-800-28022, identify disconnecting means.
 - WAC 296-800-28025, maintain electrical fittings, boxes, cabinets and outlets in good condition.
 - WAC 296-800-28030, maintain all flexible cords and cables in good condition and use safely.
 - WAC 296-800-28035, guard electrical equipment to prevent your employees from electrical hazards.
 - WAC 296-800-28040, make sure electrical equipment is effectively grounded.
 - WAC 296-800-28045, make sure electrical equipment has overcurrent protection.

WAC 296-800-290 Portable ladders: Metal and wooden.

- Moved requirements relating to metal and wooden portable ladders to WAC 296-800-290 through 296-800-29045.
 - WAC 296-800-29005, inspect your portable metal ladders periodically.
 - WAC 296-800-29010, make sure your portable metal ladders are kept in good condition.
 - WAC 296-800-29015, use your portable metal ladders safely.
 - WAC 296-800-29020, inspect your portable wooden ladders frequently.
 - WAC 296-800-29025, make sure your portable wooden ladders are kept in good condition.
 - WAC 296-800-29030, use your portable wooden ladders safely and for their intended purpose.
 - WAC 296-800-29035, safely use a portable wooden ladder when working more than twenty-five feet above the ground.
 - WAC 296-800-29040, use stepladders safely.

WAC 296-800-300 Portable fire extinguishers.

- Moved requirements relating to portable fire extinguishers to WAC 296-800-300 through 296-800-30025.
 - WAC 296-800-30005, provide portable fire extinguishers in your workplace.
 - WAC 296-800-30010, select and distribute portable fire extinguishers in your workplace.
 - WAC 296-800-30015, make sure that portable fire extinguishers are kept fully charged, in good operating condition, and left in their designated places.
 - WAC 296-800-30020, inspect and test all portable fire extinguishers.

- WAC 296-800-30025, train your employees to use portable fire extinguishers.

WAC 296-800-310 Exit routes and employee alarm systems.

- Moved requirements relating to exit routes and employee alarm systems to WAC 296-800-310 through 296-800-31080.
 - WAC 296-800-31005, provide an adequate number of exit routes.
 - WAC 296-800-31010, make sure that exit routes are large enough.
 - WAC 296-800-31015, make sure that exit routes meet their specific design and construction requirements.
 - WAC 296-800-31020, make sure that each exit route leads outside.
 - WAC 296-800-31025, provide unobstructed access to exit routes.
 - WAC 296-800-31030, exit doors must be readily opened from the inside.
 - WAC 296-800-31035, use side-hinged doors to connect rooms to exit routes.
 - WAC 296-800-31040, provide outdoor exit routes that meet requirements.
 - WAC 296-800-31045, minimize danger to employees while they are using emergency exit routes.
 - WAC 296-800-31050, mark exits adequately.
 - WAC 296-800-31053, provide adequate lighting for exit routes and signs.
 - WAC 296-800-31055, maintain the fire retardant properties of paints or other coatings.
 - WAC 296-800-31060, maintain emergency safeguards.
 - WAC 296-800-31065, maintain exit routes during construction and repair.
 - WAC 296-800-31067, provide doors in freezer or refrigerated rooms that open from the inside.
 - WAC 296-800-31070, install and maintain an appropriate employee alarm system.
 - WAC 296-800-31075, establish procedures for sounding emergency alarms.
 - WAC 296-800-31080, test the employee alarm system.

WAC 296-800-320 Accident reporting and investigating.

- Moved requirements relating to accident reporting and investigating to WAC 296-800-320 through 296-800-32025.
 - WAC 296-800-32005, report the death, probable death of any employee, or inpatient hospitalization of two or more employees within eight hours.
 - WAC 296-800-32010, make sure that any equipment involved in an accident is not moved.
 - WAC 296-800-32015, assign people to assist the department of labor and industries.
 - WAC 296-800-32020, conduct a preliminary investigation for all serious injuries.
 - WAC 296-800-32025, document investigation findings.

WAC 296-800-330 Releasing accident investigation reports.

- Moved requirements relating to releasing accident investigation reports to this section.

WAC 296-800-340 Protecting the identity of the source of confidential information.

- Moved requirements relating to protecting the identity of the source of confidential information to this section.

WAC 296-800-350 WISHA appeals, penalties, and other procedural rules.

- Moved requirements relating to WISHA appeals, penalties, and other procedural rules to WAC 296-800-350 through 296-800-35084.
 - WAC 296-800-35002, types of workplace inspections.
 - WAC 296-800-35004, scheduling inspections.
 - WAC 296-800-35006, inspection techniques.
 - WAC 296-800-35008, response to complaints submitted by employees or their representatives.
 - WAC 296-800-35010, citations mailed after an inspection.
 - WAC 296-800-35012, employees (or their representatives) can request a citation and notice.
 - WAC 296-800-35016, posting a citation and notice and employee complaint information.
 - WAC 296-800-35018, reasons to assess civil penalties.
 - WAC 296-800-35020, minimum penalties.
 - WAC 296-800-35022, base penalty calculations - severity and probability.
 - WAC 296-800-35024, severity rate determination.
 - WAC 296-800-35026, probability rate determination.
 - WAC 296-800-35028, determining the gravity of a violation.
 - WAC 296-800-35030, base penalty adjustments.
 - WAC 296-800-35032, types of base penalty adjustments.
 - WAC 296-800-35038, maximum base penalty amount.
 - WAC 296-800-35040, reasons for increasing civil penalty amounts.
 - WAC 296-800-35042, employers must certify that violations have been abated.
 - WAC 296-800-35044, for willful, repeated, or serious violations, submit additional documentation.
 - WAC 296-800-35046, submitting correction action plans.
 - WAC 296-800-35048, submit progress reports to the department, when required.
 - WAC 296-800-35049, WISHA determines the date by which abatement documents must be submitted.
 - WAC 296-800-35050, inform affected employees and their representatives of abatement actions you have taken.
 - WAC 296-800-35052, tag cited moveable equipment to warn employees of a hazard.
 - WAC 296-800-35056, you can request more time to comply.

- WAC 296-800-35062, WISHA's response to your request for more time.
- WAC 296-800-35063, post the department's response.
- WAC 296-800-35064, a hearing can be requested about the department's response.
- WAC 296-800-35065, post the department's hearing notice.
- WAC 296-800-35066, hearing procedures.
- WAC 296-800-35072, post the hearing decision.
- WAC 296-800-35076, employers and employees can request an appeal of a citation and notice.
- WAC 296-800-35078, await the department's response to your appeal request.
- WAC 296-800-35080, department actions when reassuming jurisdiction over an appeal.
- WAC 296-800-35082, appealing a corrective notice.
- WAC 296-800-35084, notify employees.

WAC 296-800-360 Using standards from national organizations and federal agencies.

- Moved requirements relating to using standards from national organizations and federal agencies to WAC 296-800-360 through 296-800-36005.
 - WAC 296-800-36005, comply with standards of national organizations or of federal agencies when referenced in WISHA rules.

WAC 296-800-370 Definitions.

- Moved definitions to this section.

Citation of Existing Rules Affected by this Order:

AMENDED PARTS: Chapter 296-24 WAC, Part A-1, General, educational, medical and first-aid requirements, chapter 296-24 WAC, Part A-2, Personal protective equipment, chapter 296-24 WAC, Part G-1, Means of egress.

AMENDED SECTIONS: WAC 296-24-005 Purpose and scope, 296-24-10203 General requirements, 296-24-12001 Scope, 296-24-14007 Sign design and colors, 296-24-23503 General requirements, 296-24-23507 Footwalks and ladders, 296-24-23513 Electric equipment, 296-24-40513 Extinguishment, 296-24-567 Employee emergency plans and fire prevention, 296-24-58513 Protective clothing, 296-24-58517 Appendix A—Fire brigades, 296-24-59201 Scope and application, 296-24-59215 Appendix A—Portable fire extinguishers, 296-24-61705 Total flooding systems with potential health and safety hazards to employees, 296-24-62203 Specific requirements, 296-24-65501 Portable powered tools, 296-24-67515 Personal protective equipment, 296-24-68503 Application of arc welding equipment, 296-24-68505 Installation of arc welding equipment, 296-24-69001 General, 296-24-70003 Eye protection, 296-24-70005 Protective clothing, 296-24-95607 Wiring design and protection, 296-24-980 Safeguards for personnel protection, 296-32-200 Scope and application, 296-32-220 General, 296-32-230 Training, 296-32-250 Tools and personal protective equipment—General, 296-32-260 Rubber insulating equipment, 296-37-510 Scope and application, 296-37-575 Recordkeeping requirements, 296-45-015 Scope and application, 296-45-035 Definitions, 296-45-055 Employer's responsibility, 296-45-075 Employer's safety program, 296-45-125 Medical services and

first aid, 296-45-25505 Personal protective equipment, 296-45-275 Ladders, platforms, and manhole steps, 296-45-285 Hand, and portable powered tools, 296-45-45510 Sprayers and related equipment, 296-45-48535 Chemical cleaning of boilers and pressure vessels, 296-52-465 Storage of ammonium nitrate, 296-52-489 Transportation, 296-52-497 Blasting agents, 296-52-501 Water gel (slurry) explosives and blasting agents, 296-54-501 Scope and application, 296-54-507 Employer's responsibilities, 296-54-51120 Eye and face protection, 296-54-51160 Leg protection, 296-54-59340 Log unloading, booms, and rafting grounds—Dry land sorting and storage, 296-56-60001 Scope and applicability, 296-56-60003 Variance and procedure, 296-56-60009 Accident prevention program, 296-59-001 Foreword, 296-59-005 Incorporation of other standards, 296-59-010 Safe place standards, 296-59-020 Management's responsibility, 296-59-025 Employee's responsibility, 296-59-030 Safety bulletin board, 296-59-035 First-aid, 296-59-050 Personal protective equipment, general requirements, 296-59-065 Fire protection and ignition sources, 296-59-070 Illumination, 296-59-085 Scaffolds, construction, use, and maintenance, 296-62-010 Purpose and scope, 296-62-050 Application for waiver or variances, 296-62-05207 Preservation of records, 296-62-054 Hazard communication purpose, 296-62-07101 To whom does chapter 296-62 WAC, Part E apply?, 296-62-07306 Requirements for areas containing carcinogens listed in WAC 296-62-07302, 296-62-07308 General regulated area requirements, 296-62-07336 Acrylonitrile, 296-62-07338 Appendix B—Substance technical guidelines for acrylonitrile, 296-62-07342 1,2-Dibromo-3-chloropropane, 296-62-07347 Inorganic arsenic, 296-62-07367 Respiratory protection and personal protective equipment, 296-62-07373 Communication of EtO hazards to employees, 296-62-07385 Appendix B—Substance technical guidelines for ethylene oxide (nonmandatory), 296-62-07417 Protective work clothing and equipment, 296-62-07419 Hygiene areas and practices, 296-62-07425 Communication of cadmium hazards to employees, 296-62-07460 Butadiene, 296-62-07470 Methylene chloride, 296-62-07473 Appendix A—Substance safety data sheet and technical guidelines for methylene chloride, 296-62-07519 Thiram, 296-62-07521 Lead, 296-62-07523 Benzene, 296-62-07540 Formaldehyde, 296-62-07601 Scope and application, 296-62-07617 Protective work clothing and equipment, 296-62-07621 Communications of hazards to employees, 296-62-07631 Recordkeeping, 296-62-07717 Protective work clothing and equipment, 296-62-07721 Communication of hazards to employees, 296-62-11021 Open surface tanks, 296-62-20013 Protective clothing and equipment, 296-62-20015 Hygiene facilities and practices, 296-62-30001 Scope and application, 296-62-30230 Risk identification, 296-62-30235 Employee notification, 296-62-30425 Training course content for 40 and 80 hour hazardous waste clean-up courses, 296-62-30435 16-hour supplemental training for hazardous waste sites, 296-62-30605 Personal protective equipment selection, 296-62-3090 Handling drums and containers, 296-62-31410 Hazard communication program requirements under RCRA, 296-62-3195 Appendix E—Training curriculum guidelines, 296-62-40003 Definitions applicable to all sections of this chapter, 296-62-40015 Hazard identification, 296-62-41031 Personal protective

equipment selection, 296-62-41086 Appendix E—Training curriculum guidelines, 296-63-009 Exemption requests, 296-67-005 Definitions, 296-67-053 Emergency planning and response, 296-67-061 Trade secrets, 296-67-291 Appendix C—Compliance guidelines and recommendations for process safety management (nonmandatory), 296-78-500 Foreword, 296-78-515 Management's responsibility, 296-78-540 First-aid training and certification, 296-78-545 First-aid supplies, 296-78-56501 Log dumps and ponds, 296-78-670 Glue machines, 296-78-71001 General, 296-78-71003 Floor and wall openings, 296-78-71009 Stairways and ladders, 296-78-71011 Egress and exit, 296-78-71015 Tanks and chemicals, 296-78-71017 Dry kilns, 296-78-71019 Exhaust systems, 296-78-71023 Lighting, 296-78-730 Electrical service and equipment, 296-78-735 Elevators, moving walks, 296-78-795 Crane cages, 296-78-84005 Dry kilns, 296-79-010 Scope and application, 296-79-020 General requirements, 296-79-040 Fire protection, ignition sources and means of egress, 296-79-050 Personal protection clothing and equipment, 296-79-090 Electrical equipment and distribution, 296-79-100 Floors, platforms, stairways, ladders, loading docks, 296-79-120 Scaffolds, construction and maintenance, 296-79-300 Machine room equipment and procedures, 296-99-010 What safety hazards does this chapter require the employer to control?, 296-99-040 What practices must an employer follow for entry into grain storage structures?, 296-155-005 Purpose and scope, 296-155-110 Accident prevention program, 296-155-120 First-aid training and certification, 296-155-125 First-aid supplies, 296-155-130 First-aid station, 296-155-140 Sanitation, 296-155-17321 Hygiene facilities and practices, 296-155-17323 Communication of hazards to employees, 296-155-174 Cadmium, 296-155-17609 Exposure assessment, 296-155-17615 Protective work clothing and equipment, 296-155-17625 Employee information and training, 296-155-180 Hazard communication, 296-155-200 General requirements, 296-155-20301 Definitions, 296-155-260 Fire protection, 296-155-407 Protective clothing, 296-301-010 Textiles—Application requirements, 296-301-020 General safety requirements, 296-301-215 First aid, 296-301-220 Personal protective equipment, 296-302-010 Bakery equipment—General requirements, 296-302-02501 General requirements for flour-handling, 296-302-050 Miscellaneous equipment, 296-302-060 Biscuit and cracker equipment, 296-302-06513 Oil-burning equipment, 296-303-01001 General industry safety standards, 296-304-010 Scope and application, 296-304-06013 Health and sanitation, 296-305-01003 Scope and application, 296-305-01005 Definitions, 296-305-01009 Appeals, 296-305-01509 Management's responsibility, 296-305-01515 First-aid training and certification, 296-305-01517 First-aid kits, 296-305-04511 Elevated platforms, 296-305-05503 Summary of training requirements, 296-305-06005 Ground ladders, 296-305-06007 Electrical, 296-305-06503 General requirements, 296-305-06511 Indoor air quality, and 296-305-06515 Hose drying towers.

REPEALED SECTIONS: WAC 296-24-001 Foreword, 296-24-006 Equipment approval by nonstate agency or organization, 296-24-007 Incorporation of standards of national organization, 296-24-008 Incorporation of standards of fed-

eral agency, 296-24-010 Variance and procedure, 296-24-015 Education and first-aid standards, 296-24-020 Management's responsibility, 296-24-025 Employee's responsibility, 296-24-040 Accident prevention programs, 296-24-045 Safety and health committee plan, 296-24-055 Safety bulletin board, 296-24-061 First-aid requirements, 296-24-06105 What workplaces does this rule apply to?, 296-24-06110 What is the purpose of this rule?, 296-24-06115 What definitions apply to this section?, 296-24-06120 How must an employer ensure that first-aid assistance is available in the workplace?, 296-24-06125 How many employees must be trained in first aid?, 296-24-06130 What must first-aid training cover?, 296-24-06135 How often must employees complete first-aid training?, 296-24-06140 How must an employer document first-aid training?, 296-24-06145 What is the requirement for first-aid supplies?, 296-24-06150 What is the requirement to provide a first-aid station?, 296-24-06155 Appendix 1—Evaluation worksheet for the first-aid response plan, 296-24-06160 Appendix 2—First-aid kit guidance, 296-24-073 Safe place standards, 296-24-075 Personal protective equipment, 296-24-07501 General requirements, 296-24-078 Eye and face protection, 296-24-07801 General, 296-24-084 Occupational head protection, 296-24-086 Personal flotation devices, 296-24-088 Occupational foot protection, 296-24-090 Hand protection, 296-24-092 Electrical protective equipment, 296-24-094 Lighting and illumination, 296-24-096 Appendix A to Part A-2—References for further information (nonmandatory), 296-24-098 Appendix B to Part A-2—Nonmandatory compliance guidelines for hazard assessment and personal protective equipment selection, 296-24-12003 General requirements—Housekeeping, 296-24-12005 Water supply, 296-24-12007 Toilet facilities, 296-24-12009 Washing facilities, 296-24-12019 Waste disposal, 296-24-12021 Vermin control, 296-24-21503 Secure storage, 296-24-21505 Housekeeping, 296-24-21507 Drainage, 296-24-550 Means of egress, 296-24-55003 General requirements, 296-24-55005 Fundamental requirements, 296-24-55007 Protection of employees exposed by construction and repair operations, 296-24-55009 Maintenance, 296-24-565 Means of egress, general, 296-24-56501 Permissible exit components, 296-24-56503 Protective enclosure of exits, 296-24-56505 Width and capacity of means of egress, 296-24-56507 Egress capacity and occupant load, 296-24-56509 Arrangement of exits, 296-24-56511 Access to exits, 296-24-56513 Exterior ways of exit access, 296-24-56515 Discharge from exits, 296-24-56517 Headroom, 296-24-56519 Changes in elevation, 296-24-56521 Maintenance and workmanship, 296-24-56523 Furnishings and decorations, 296-24-56529 Fire retardant paints, 296-24-56531 Exit marking, 296-24-59205 General requirements, 296-24-59207 Selection and distribution, 296-24-59209 Inspection, maintenance and testing, 296-24-59211 Hydrostatic testing, 296-24-59213 Training and education, 296-24-65001 General requirements, 296-24-73503 Housekeeping, 296-24-73509 Floor loading protection, 296-24-73513 Buildings—Floors, 296-24-76505 Where fixed stairs are required, 296-24-76517 Railings and handrails, 296-27-090 Reporting of fatality or multiple hospitalization incidents, 296-27-15501 Division of consultation and compliance, public records, 296-27-15503 Special exemptions for confidential reports within the department's

files, 296-27-15505 Accident investigation reports, 296-27-210 Abatement verification, 296-27-21001 What is the purpose of this rule?, 296-27-21005 When does this rule apply?, 296-27-21010 What definitions apply to this rule?, 296-27-21015 What must an employer do when asked to abate a violation?, 296-27-21020 When must an employer submit additional documentation of abatement?, 296-27-21025 When must an employer provide abatement plans?, 296-27-21030 When must an employer submit progress reports?, 296-27-21035 What must an employer do to keep employees informed about abatement activities?, 296-27-21040 How will the department determine the date that documents are submitted?, 296-27-21045 What are the requirements related to movable equipment?, 296-27-21050 Appendix A (non-mandatory), 296-62-05211 Trade secrets, 296-62-05403 Scope and application, 296-62-05405 Definitions applicable to this part, 296-62-05407 Hazard determination, 296-62-05409 Written hazard communication program, 296-62-05411 Labels and other forms of warning, 296-62-05413 Material safety data sheets, 296-62-05415 Employee training and information, 296-62-05417 Trade secrets, 296-62-05419 Effective dates, 296-62-05421 Appendix A—Health hazard definitions (mandatory), 296-62-05423 Appendix B—Hazard determination (mandatory), 296-62-05425 Appendix C—Information sources (advisory), 296-62-05427 Appendix D—Definition of "trade secret" (mandatory), 296-62-05429 Appendix E—Guidelines for employer compliance (advisory), 296-62-09003 Lighting and illumination, 296-62-12000 Environmental tobacco smoke in office work environments—Scope and application, 296-62-12003 Definitions, 296-62-12005 Controls for environmental tobacco smoke, 296-62-12009 Appendix—Smoking cessation program information—Nonmandatory, 296-350-100 Inspections and citations, 296-350-10010 Selecting workplaces to inspect, 296-350-10020 Inspections—Site visit, 296-350-10030 Complaints by employees or employee representatives, 296-350-10040 Results of a WISHA inspection—Notice of violations, 296-350-10050 Posting a citation and notice, 296-350-150 Civil penalties, 296-350-15010 Assessing civil penalties—Purpose, 296-350-15015 Minimum penalty amounts, 296-350-15020 Severity and probability determine base penalties, 296-350-15025 Severity, 296-350-15030 Probability, 296-350-15035 Gravity and base penalties, 296-350-15040 Adjustments to base penalties, 296-350-15045 Increasing penalty amounts, 296-350-350 Extension of abatement date(s)—Application—Authority, 296-350-35010 Application for extension of abatement date(s), 296-350-35015 Extension of abatement date(s)—Application—Timeliness, 296-350-35020 Extension of abatement date(s)—Application—Service, 296-350-35025 Extension of abatement date(s)—Application—Contents, 296-350-35030 Extension of abatement date(s)—Provisional determination, 296-350-35035 Extension of abatement date(s)—Notice of application—Notice of opportunity for hearing—Notice of provisional determination, 296-350-35040 Extension of abatement date(s)—Posting, 296-350-35045 Extension of abatement date(s)—Application for hearing, 296-350-35050 Extension of abatement date(s)—Notice of hearing, 296-350-35055 Extension of abatement date(s)—Hearings, 296-350-35060 Extension of abatement date(s)—Decision and order, 296-

350-500 Citation and notice—Copy to employee representative, 296-350-600 WISHA appeals, 296-350-60010 Filing an appeal—Who, when and where, 296-350-60015 What must be in a WISHA appeal, 296-350-60020 Why we reassume jurisdiction, 296-350-60030 Reviewing appeals and extending review time, 296-350-60035 Informal WISHA conferences, 296-350-60040 Issuing and appealing corrective notices, and 296-350-60045 Notifying employees.

Statutory Authority for Adoption: RCW 49.17.010, [49.17].040, and [49.17].050.

Adopted under notice filed as WSR 00-23-099 on January 3, 2001 [November 21, 2000].

Changes Other than Editing from Proposed to Adopted Version: As a result of written or oral comments received, the following sections are being withdrawn:

WITHDRAWN SECTIONS: The following sections were proposed to be repealed and will not be repealed because some of the requirements in the section were not moved to the new safety and health core rulebook: **WAC 296-24-005 Purpose and scope, 296-24-75003 Protection for floor openings, 296-24-76507 Stair strength, and 296-24-76509 Stair width**, these sections were proposed to be repealed, they will not be adopted because it is not applicable.

The following sections were proposed to be amended and will not be amended because some of the requirements in the section were not moved to the new safety and health core rulebook:

WAC 296-24-12006 Water supply (nonpotable).

- This section was proposed as a new section. It will not be adopted as proposed. The requirements relating to nonpotable water were moved into WAC 296-800-230.

WAC 296-24-20700 Appendix A to WAC 296-24-195.

- A reference to the electrical section in WAC 296-800-280 was proposed to be added to WAC 296-24-20700 (4)(b)(vi)(C), this will not be adopted because it is not applicable.

WAC 296-24-23001 Definitions.

- A reference to the portable fire extinguisher section in WAC 296-800-300 was proposed to be added to WAC 296-24-23001, this will not be adopted because it is not applicable.

WAC 296-24-23007 Designated locations.

- A reference to the electrical section in WAC 296-800-280 was proposed to be added to WAC 296-24-23007(2), this will not be adopted because it is not applicable.

WAC 296-24-23533 Crane and derrick suspended personnel (work) platforms.

- A reference to the floor openings, floor holes and open-sided floors in WAC 296-800-260 was proposed to be added to WAC 296-24-23533 (6)(d), this will not be adopted because it is not applicable.

WAC 296-24-31503 Gaseous hydrogen systems.

- References to the electrical section in WAC 296-800-280 were proposed to be added to WAC 296-24-31503 (3)(b)(v) and (c)(v), these will not be adopted because they are not applicable.

WAC 296-24-31505 Liquefied hydrogen systems.

- References to the electrical section in WAC 296-800-280 were proposed to be added to WAC 296-24-31505 (3)(a)(iv), (b)(iv) and (c)(v), these will not be adopted because they are not applicable.

WAC 296-24-32003 Bulk oxygen systems.

- References to the electrical section in WAC 296-800-280 were proposed to be added to WAC 296-24-32003 (8)(i), these will not be adopted because they are not applicable.

WAC 296-24-33011 Industrial plants.

- A reference to the electrical section in WAC 296-800-280 was proposed to be added to WAC 296-24-33011 (7)(a), this will not be adopted because it is not applicable.

WAC 296-24-33015 Service station.

- References to the electrical section in WAC 296-800-280 were proposed to be added to WAC 296-24-33015 (4)(a) and (b), these will not be adopted because they are not applicable.

WAC 296-24-33017 Processing plants.

- References to the electrical section in WAC 296-800-280 were proposed to be added to WAC 296-24-33017 (7)(c)(i) and (iii), these will not be adopted because they are not applicable.

WAC 296-24-37005 Electrical and other sources of ignition.

- A reference to the electrical section in WAC 296-800-280 was proposed to be added to WAC 296-24-37005(4), this will not be adopted because it is not applicable.

WAC 296-24-37019 Drying, curing, or fusion apparatus.

- A reference to the electrical section in WAC 296-800-280 was proposed to be added to WAC 296-24-37019 (4)(d), this will not be adopted because it is not applicable.

WAC 296-24-37023 Powder coating.

- A reference to the electrical section in WAC 296-800-280 was proposed to be added to WAC 296-24-37023(1), this will not be adopted because it is not applicable.

WAC 296-24-47505 Basic rules.

- References to the electrical section in WAC 296-800-280 were proposed to be added to WAC 296-24-47505 (17)(a) and (18), these will not be adopted because they are not applicable.

WAC 296-24-75001 Terms.

- A reference to the floor openings, floor holes and open-sided floors section in WAC 296-800-260 was proposed to be added to WAC 296-24-75001(7), this will not be adopted because it is not applicable.

WAC 296-24-75005 Protection for wall openings and holes.

- A reference to the floor openings, floor holes and open-sided floors section in WAC 296-800-260 was proposed to be added to WAC 296-24-75005(5), this will not be adopted because it is not applicable.

WAC 296-24-780 Portable wood ladders.

- A reference to the portable ladders: Wooden and metal section in WAC 296-800-290 was proposed to be added to WAC 296-24-780, this will not be adopted because it is not applicable.

WAC 296-24-79501 Terms.

- A reference to the portable ladders: Wooden and metal section in WAC 296-800-290 was proposed to be added to WAC 296-24-79501, this will not be adopted because it is not applicable.

WAC 296-24-81003 Design requirements.

- A reference to the portable ladders: Wooden and metal section in WAC 296-800-290 was proposed to be added to WAC 296-24-81003 (2)(a), this will not be adopted because it is not applicable.

WAC 296-24-95605 General requirements.

- A reference to the electrical section in WAC 296-800-280 was proposed to be added to WAC 296-24-95605 (8)(d), this will not be adopted because it is not applicable.

As a result of written and oral comments received, the following changes are as a result of the public hearings, to clarify language or for better organization:

**Chapter 296-62 WAC,
General occupational health standards.**

WAC 296-62-05301 Definitions.

- Created this section and added the following clarifying language that reads:

"Understand a trade secret. The following is a reprint of the Restatement of Torts section 757, comment b (1939):

Definition of trade secret.

A trade secret may consist of any formula, pattern, device or compilation of information which is used in one's business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it. It may be a formula for a chemical compound, a process of manufacturing, treating or preserving materials, a pattern for a machine or other device, or a list of customers. It differs from other secret information in a business (see § 759 of the Restatement of Torts which is not included in this Appendix) in that it is not simply information as to single or ephemeral events in the conduct of the business, as, for example, the amount or other terms of a secret bid for a contract or the salary of certain employees, or the security investments made or contemplated, or the date fixed for the announcement of a new policy or for bringing out a new model or the like. A trade secret is a process or device for continuous use in the operations of the business. Generally it relates to the production of goods, as, for example, a machine or formula for the production of an article. It may, however, relate to the sale of goods or to other operations in the business, such as a code for determining discounts, rebates or other concessions in a price list or catalogue, or a list of specialized customers, or a method of bookkeeping or other office management."

WAC 296-62-05320 Deny a written request for disclosure of a specific chemical identity in the manner specified in this rule.

- Corrected housekeeping errors.

WAC 296-62-054 Manufacturers, importers and distributors.

- Added a note that reads:

"If you are an employer who relies on a material safety data sheet from the manufacturer, importer, or distributor and you distribute or produce hazardous chemicals, you do not have to comply with this rule."

- Added the following language at the end of WAC 296-62-054 that reads:

"Article means a manufactured item other than a fluid or particle:

(a) Which is formed to a specific shape or design during manufacture;

(b) Which has end use function(s) dependent in whole or in part upon its shape or design during end use; and

(c) Which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under WAC 296-62-05407), and does not pose a physical hazard or health risk to employees.

Director means the director of the department of labor and industries or his/her designee.

Chemical means any element, chemical compound or mixture of elements and/or compounds.

Chemical manufacturer means an employer with a workplace where chemical(s) are produced for use or distribution.

Chemical name means the scientific designation of a chemical in accordance with the nomenclature system developed by the International Union of Pure and Applied Chemistry (IUPAC) or the Chemical Abstracts Service (CAS) rules of nomenclature, or a name which will clearly identify the chemical for the purpose of conducting a hazard evaluation.

Common name means any designation or identification such as code name, code number, trade name, brand name or generic name used to identify a chemical other than by its chemical name.

Designated representative means any individual or organization to whom an employee gives written authorization to exercise such employee's rights under this section. A recognized or certified collective bargaining agent shall be treated automatically as a designated representative without regard to written employee authorization.

Employee means an employee of an employer who is employed in the business of his or her employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is personal labor for an employer under this standard whether by way of manual labor or otherwise. However, for the purposes of this part, employee shall not mean immediate family members of the officers of any corporation, partnership, sole proprietorship, or other business entity or officers of any closely held corporation engaged in agricultural production of crops or livestock. This part applies to employees who may be

exposed to hazardous chemicals under normal operating conditions or in foreseeable emergencies.

Employer means any person, firm, corporation, partnership, business trust, legal representative, or other business entity that engages in any business, industry, profession, or activity in this state and employs one or more employees or who contract with one or more persons, the essence of which is the personal labor of such person or persons and includes the state, counties, cities, and all municipal corporations, public corporations, political subdivisions of the state, and charitable organizations. This part applies to employers engaged in a business where chemicals are either used, distributed, or are produced for use or distribution, including a contractor or subcontractor.

Exposure or exposed means that an employee is/was subjected to a hazardous chemical in the course of employment through any route of entry (inhalation, ingestion, skin contact or absorption, etc.), and includes potential (e.g., accidental or possible) exposure.

Foreseeable emergency means any potential occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which could result in an uncontrolled release of a hazardous chemical into the workplace.

Hazardous chemical means any chemical which is a physical hazard or a health hazard.

Identity means any chemical or common name which is indicated on the material safety data sheet (MSDS) for the chemical. The identity used shall permit cross-references to be made among the required list of hazardous chemicals, the label and the MSDS.

Importer means the first business within the Customs Territory of the United States which receives hazardous chemicals produced in other countries, for the purpose of supplying them to distributors or employers within the United States.

This definition is the same as Webster's therefore we did not include it in the definitions.

Material safety data sheet (MSDS) means written or printed material concerning a hazardous chemical which is prepared in accordance with WAC 296-62-05408.

Mixture means any combination of two or more chemicals if the combination is not, in whole or in part, the result of a chemical reaction.

Novelty and prior art. A trade secret may be a device or process which is patentable; but it need not be that. It may be a device or process which is clearly anticipated in the prior art or one which is merely a mechanical improvement that a good mechanic can make. Novelty and invention are not requisite for a trade secret as they are for patentability.

These requirements are essential to patentability because a patent protects against unlicensed use of the patented device or process even by one who discovers it properly through independent research. The patent monopoly is a reward to the inventor. But such is not the case with a trade secret. Its protection is not based on a policy of rewarding or otherwise encouraging the development of secret processes or devices. The protection is merely against breach of faith and reprehensible means of learning another's secret. For this limited protection it is not appropriate to require also the kind

of novelty and invention which is a requisite of patentability. The nature of the secret is, however, an important factor in determining the kind of relief that is appropriate against one who is subject to liability under the rule stated in this section. Thus, if the secret consists of a device or process which is a novel invention, one who acquires the secret wrongfully is ordinarily enjoined from further use of it and is required to account for the profits derived from his past use. If, on the other hand, the secret consists of mechanical improvements that a good mechanic can make without resort to the secret, the wrongdoer's liability may be limited to damages, and an injunction against future use of the improvements made with the aid of the secret may be inappropriate.

Secrecy. The subject matter of a trade secret must be secret. Matters of public knowledge or of general knowledge in an industry cannot be appropriated by one as his secret. Matters which are completely disclosed by the goods which one markets cannot be his secret. Substantially, a trade secret is known only in the particular business in which it is used. It is not requisite that only the proprietor of the business know it. He may, without losing his protection, communicate it to employees involved in its use. He may likewise communicate it to others pledged to secrecy. Others may also know of it independently, as, for example, when they have discovered the process or formula by independent invention and are keeping it secret. Nevertheless, a substantial element of secrecy must exist, so that, except by the use of improper means, there would be difficulty in acquiring the information. An exact definition of a trade secret is not possible. Some factors to be considered in determining whether given information is one's trade secret are:

The extent to which the information is known outside of his business;

The extent to which it is known by employees and others involved in his business;

The extent of measures taken by him to guard the secrecy of the information;

The value of the information to him and his competitors;

The amount of effort or money expended by him in developing the information;

The ease or difficulty with which the information could be properly acquired or duplicated by others.

Specific chemical identity means the chemical name, Chemical Abstracts Service (CAS) registry number, or any other information that reveals the precise chemical designation of the substance.

Trade secret means any confidential formula, pattern, process, device, information or compilation of information that is used in an employer's business, and that gives the employer an opportunity to obtain an advantage over competitors who do not know or use it. WAC 296-62-05225 provides a legal definition of trade secret and this rule sets out the criteria to be used in evaluating trade secrets.

Use means to package, handle, react, emit, extract, generate as a by-product, or transfer.

Workplace means an establishment, job site, or project, at one geographical location containing one or more work areas."

- Added the following language:

PERMANENT

"Director means the director of the department of labor and industries or his/her designee.

Chemical means any element, chemical compound or mixture of elements and/or compounds.

Chemical manufacturer means an employer with a workplace where chemical(s) are produced for use or distribution.

Chemical name means the scientific designation of a chemical in accordance with the nomenclature system developed by the International Union of Pure and Applied Chemistry (IUPAC) or the Chemical Abstracts Service (CAS) rules of nomenclature, or a name which will clearly identify the chemical for the purpose of conducting a hazard evaluation.

Combustible liquid means any liquid having a flashpoint at or above 100°F (37.8°C), but below 200°F (93.3°C), except any mixture having components with flashpoints of 200°F (93.3°C), or higher, the total volume of which make up ninety-nine percent or more of the total volume of the mixture.

Commercial account means an arrangement whereby a retail distributor sells hazardous chemical(s) to an employer, generally in large quantities over time and/or at costs that are below the regular retail price.

Common name means any designation or identification such as code name, code number, trade name, brand name or generic name used to identify a chemical other than by its chemical name.

Compressed gas means:

(a) A gas or mixture of gases having, in a container, an absolute pressure exceeding 40 psi at 70°F (21.1°C); or

(b) A gas or mixture of gases having, in a container, an absolute pressure exceeding 104 psi at 130°F (54.4°C) regardless of the pressure at 70°F (21.1°C); or

(c) A liquid having a vapor pressure exceeding 40 psi at 100°F (37.8°C) as determined by ASTM D-323-72.

Container means any bag, barrel, bottle, box, can, cylinder, drum, reaction vessel, storage tank, or the like that contains a hazardous chemical. For purposes of this part, pipes or piping systems are not considered to be containers.

Designated representative means any individual or organization to whom an employee gives written authorization to exercise such employee's rights under this section. A recognized or certified collective bargaining agent shall be treated automatically as a designated representative without regard to written employee authorization.

Definitions applicable to this rule:

Distributor means a business, other than a chemical manufacturer or importer, which supplies hazardous chemicals to other distributors or to employers.

Employee means an employee of an employer who is employed in the business of his or her employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is personal labor for an employer under this standard whether by way of manual labor or otherwise. However, for the purposes of this part, employee shall not mean immediate family members of the officers of any corporation, partnership, sole proprietorship, or other business entity or officers of any closely held corporation engaged in agricultural production of crops

or livestock. This part applies to employees who may be exposed to hazardous chemicals under normal operating conditions or in foreseeable emergencies.

Employer means any person, firm, corporation, partnership, business trust, legal representative, or other business entity that engages in any business, industry, profession, or activity in this state and employs one or more employees or who contract with one or more persons, the essence of which is the personal labor of such person or persons and includes the state, counties, cities, and all municipal corporations, public corporations, political subdivisions of the state, and charitable organizations. This part applies to employers engaged in a business where chemicals are either used, distributed, or are produced for use or distribution, including a contractor or subcontractor.

Explosive means a chemical that causes a sudden, almost instantaneous release of pressure, gas, and heat when subjected to sudden shock, pressure, or high temperature.

Exposure or exposed means that an employee is/was subjected to a hazardous chemical in the course of employment through any route of entry (inhalation, ingestion, skin contact or absorption, etc.), and includes potential (e.g., accidental or possible) exposure.

Flammable means a chemical that falls into one of the following categories:

(a) Aerosol flammable means an aerosol that, when tested by the method described in 16 C.F.R. 1500.45 yields a flame projection exceeding eighteen inches at full valve opening, or a flashback (a flame extending back to the valve) at any degree of valve opening;

(b) Gas, flammable means:

(i) A gas that, at ambient temperature and pressure, forms a flammable mixture with air at a concentration of thirteen percent by volume or less; or

(ii) A gas that, at ambient temperature and pressure, forms a range of flammable mixtures with air wider than twelve percent by volume, regardless of the lower limit;

(c) Liquid, flammable means any liquid having a flashpoint below 100°F (37.8°C), except any mixture having components with flashpoints of 100°F (37.8°C) or higher, the total of which make up ninety-nine percent or more of the total volume of the mixture.

(d) Solid, flammable means a solid, other than a blasting agent or explosive as defined in WAC 296-52-417 or 29 C.F.R. 1910.109(a), that is liable to cause fire through friction, absorption of moisture, spontaneous chemical change, or retained heat from manufacturing or processing, or which can be ignited readily and when ignited burns so vigorously and persistently as to create a serious hazard. A chemical shall be considered to be a flammable solid if, when tested by the method described in 16 CFR 1500.44, it ignites and burns with a self-sustained flame at a rate greater than one-tenth of an inch per second along its major axis.

Flashpoint means the minimum temperature at which a liquid gives off a vapor in sufficient concentration to ignite when tested as follows:

(a) Tagliabue closed tester: (See American National Standard Method of Test for Flash Point by Tag Closed Tester, Z11.24-1979 (ASTM D 56-79)) for liquids with a vis-

cosity of less than 45 Saybolt Universal Seconds (SUS) at 100°F (37.8°C), that do not contain suspended solids and do not have a tendency to form a surface film under test; or

(b) Pensky-Martens closed tester: (See American National Standard Method of Test for Flash Point by Pensky-Martens Closed Tester, Z11.7-1979 (ASTM D 93-79)) for liquids with a viscosity equal to or greater than 45 SUS at 100°F (37.8°C), or that contain suspended solids, or that have a tendency to form a surface film under test; or

(c) Setaflash closed tester: (See American National Standard Method of Test for Flash Point by Setaflash Closed Tester (ASTM D 3278-78)).

Note: Organic peroxides, which undergo autoaccelerating thermal decomposition, are excluded from any of the flashpoint determination methods specified above.

Foreseeable emergency means any potential occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which could result in an uncontrolled release of a hazardous chemical into the workplace.

Hazardous chemical means any chemical which is a physical hazard or a health hazard.

Hazard warning means any words, pictures, symbols, or combination thereof appearing on a label or other appropriate form of warning which convey the specific physical and health hazard(s), including target organ effects, of the chemical(s) in the container(s). (See definition for "physical hazard" and "health hazard" to determine the hazards which must be covered.)

Health hazard means a chemical for which there is statistically significant evidence based on at least one study conducted in accordance with established scientific principles that acute or chronic health effects may occur in exposed employees.

The term "health hazard" includes chemicals which are carcinogens, toxic or highly toxic agents, reproductive toxins, irritants, corrosives, sensitizers, hepatotoxins, nephrotoxins, neurotoxins, agents which act on the hematopoietic system, and agents which damage the lungs, skin, eyes, or mucous membranes. Appendix A provides further definitions and explanations of the scope of health hazards covered by this part, and Appendix B describes the criteria to be used to determine whether or not a chemical is to be considered hazardous for purposes of this standard.

Identity means any chemical or common name which is indicated on the material safety data sheet (MSDS) for the chemical. The identity used shall permit cross-references to be made among the required list of hazardous chemicals, the label and the MSDS.

Importer means the first business within the Customs Territory of the United States which receives hazardous chemicals produced in other countries, for the purpose of supplying them to distributors or employers within the United States.

This definition is the same as Webster's therefore we did not include it in the definitions.

Material safety data sheet (MSDS) means written or printed material concerning a hazardous chemical which is prepared in accordance with WAC 296-62-05408.

Mixture means any combination of two or more chemicals if the combination is not, in whole or in part, the result of a chemical reaction.

Organic peroxide means an organic compound that contains the bivalent-O-O-structure and which may be considered to be a structural derivative of hydrogen peroxide where one or both of the hydrogen atoms has been replaced by an organic radical.

Oxidizer means a chemical other than a blasting agent or explosive as defined in WAC 296-52-417 or C.F.R. 1910.109(a), that initiates or promotes combustion in other materials, thereby causing fire either of itself or through the release of oxygen or other gases.

Permissible exposure limits (PELs) refer to airborne concentrations of substances without regard to the use of respiratory protection and represent conditions under which it is believed that nearly all workers may be repeatedly exposed day after day without adverse effect. The permissible exposure limits (PELs) shall include the following four categories:

(a) Permissible exposure limits - Time-weighted average (PEL-TWA) is the time weighted average airborne exposure to any 8-hour work shift of a 40-[hour] work week which shall not be exceeded.

(b) Permissible exposure limits - Short-term exposure limit (PEL-STEL) is the employee's 15-minute time weighted average exposure which shall not be exceeded at any time during a work day unless another time limit is specified in a parenthetical notation below the limit. If another time period is specified, the time weighted average exposure over that time period shall not be exceeded at any time during the working day.

(c) Permissible exposure limits - Ceiling (PEL-C) is the employee's exposure which shall not be exceeded during any part of the work day. If instantaneous monitoring is not feasible, then the ceiling shall be assessed as a 15-minute time weighted average exposure which shall not be exceeded at any time over a working day.

(d) "Skin" notation is the potential contribution to the overall employee exposure by the cutaneous route including mucous membranes and eye, either by airborne, or more particularly, by direct contact with the substance. These substances are identified as having a "skin" notation in the OSHA and WISHA PEL tables (29 C.F.R. Part 1910 Subpart Z and WAC 296-62-075, respectively).

Physical hazard means a chemical for which there is scientifically valid evidence that it is a combustible liquid, a compressed gas, explosive, flammable, an organic peroxide, an oxidizer, pyrophoric, unstable (reactive) or water-reactive.

Produce means to manufacture, process, formulate, blend, extract, generate, emit, or repackage.

Purchaser means an employer with a workplace who purchases a hazardous chemical for use within that workplace.

Pyrophoric means a chemical that will ignite spontaneously in air at a temperature of 130°F (54.4°C) or below.

Responsible party means someone who can provide additional information on the hazardous chemical and appropriate emergency procedures, if necessary.

Specific chemical identity means the chemical name, Chemical Abstracts Service (CAS) registry number, or any other information that reveals the precise chemical designation of the substance.

Threshold limit values (TLVs) refer to airborne concentrations of substances without regard to the use of respiratory protection and represent conditions under which it is believed that nearly all workers may be repeatedly exposed day after day without adverse effect. The TLV includes the TLV-Time weighted average (TLV-TWA), TLV-Short term exposure limit (TLV-STEL), TLV-Ceiling (TLV-Ceiling) and "skin" notation as stated in the most recent edition of the 'Threshold Limit Values for Chemical Substances and Physical Agents and Biological Exposure Indices' from the American Conference of Governmental Industrial Hygienists (ACGIH).

Trade secret means any confidential formula, pattern, process, device, information or compilation of information that is used in an employer's business, and that gives the employer an opportunity to obtain an advantage over competitors who do not know or use it. WAC 296-62-05427, Appendix D, provides a legal definition of trade secret and WAC 296-62-05417 sets out the criteria to be used in evaluating trade secrets.

Unstable (reactive) means a chemical which in the pure state, or as produced or transported, will vigorously polymerize, decompose, condense, or will become self-reactive under conditions of shocks, pressure or temperature.

Use means to package, handle, react, emit, extract, generate as a by-product, or transfer.

Water-reactive means a chemical that reacts with water to release a gas that is either flammable or presents a health hazard.

Workplace means an establishment, job site, or project, at one geographical location containing one or more work areas."

Chapter 296-800 WAC, Safety and health core rules.

WAC 296-800-100 Introduction.

- Added language regarding what the safety and health core rules represents and who it affects.
- Added language in the introduction relating to building, fire, and electrical codes that reads:

"How do the WISHA rules relate to fire, building and electrical codes?"

Fire codes: WISHA rules contain basic requirements for portable fire extinguishers, exit routes, housekeeping, storage, stairs and electrical hazards for the protection of employees in your workplace. The rules contained in this book are the most basic requirements to make sure that as an employer you provide a safe and healthy work environment. However, these are not the only rules regarding the requirements for portable fire extinguishers, exit routes, housekeeping, storage, stairs and electrical. The fire marshall and local fire authorities enforce the Uniform Fire Code (UFC). WISHA and UFC differ in some areas, for example UFC requires exit sign lettering to be 6" or more and WISHA only states that the letters have to be clearly visible. Fire codes have more detailed and extensive requirements for the protection of the

public than WISHA. Some codes overlap with WISHA requirements.

Building and electrical codes: WISHA rules are minimum requirements regardless of when the building was built or remodeled. Buildings must also comply with building and electrical codes at the time of construction. If you remodel you must comply with the building and electrical codes applicable at that time. Building authorities and electrical inspection authorities enforce rules from the Uniform Building Code (UBC), and the National Electrical Code (NEC).

You are encouraged to call your local fire, building or electrical authority. For more information on the requirements in your area look in the government section of your phone book. Copies of these codes are available at your local library."

WAC 296-800-110 Employer responsibilities: Safe workplace.

- Added a note that reads:

"Employees may discuss and participate in any WISHA safety and health related practice and may refuse to perform dangerous tasks without fear of discrimination. Discrimination includes: Dismissal, demotion, loss of seniority, denial of a promotion, harassment, etc. (See chapter 296-360 WAC, Discrimination, pursuant to RCW 49.17.160 for a complete description of discrimination and the department's responsibility to protect employees)."

- Clarified language for consistency within the rule (matched titles of rules with the summary page).

WAC 296-800-11005 Provide a workplace free from recognized hazards.

- First bullet now reads:

"Provide your employees a workplace free from recognized hazards that are causing, or are likely to cause, serious injury or death."

- Added a note that reads:

"A hazard is recognized if it is commonly known in the employer's industry, if there is evidence that the employer knew or should have known the existence of the hazard or if it can be established at [that] any reasonable person would have recognized the hazard."

WAC 296-800-11010 Provide and use means to make your workplace safe.

- First bullet now reads:

"Do not remove, displace, damage, destroy or carry off any safety device, safeguard, notice or warning, furnished for use in any employment of place of employment."

"Do not interfere with use of any of the above."

"Do not interfere with the use of any method or process adopted for the protection of any employee."

"Do everything reasonably necessary to protect the life and safety of your employees."

WAC 296-800-11015 Prohibit employees from entering, or being in, any workplace that is not safe.

- Title of this section now reads:

"~~Prohibit~~ Not require employees ~~to go in~~ from entering, or ~~be~~ being in, any workplace that is not safe."

- Added a bullet that reads:

"You must: Prohibit employees from entering, or being in, any workplace that is not safe."

WAC 296-800-11020 Construct your workplace so it is safe.

- Title of this section now reads:
"Construct your workplace so ~~that~~ it is safe."

WAC 296-800-11025 Prohibit alcohol and narcotics from your workplace.

- Second bullet now reads:
"Prohibit ~~not permit~~ employees under the influence of alcohol or narcotics from ~~on~~ the worksite."
- Third bullet is now an exemption.

WAC 296-800-11030 Prohibit employees from using equipment or materials that do not meet the applicable WISHA requirements.

- Title of this section now reads:
"Prohibit ~~not allow~~ employees from using ~~to use~~ equipment or materials that do not meet the applicable WISHA requirements."

- First bullet now reads:
"Prohibit ~~not allow~~ employees from using ~~to use~~ equipment, materials, tools, or machinery that fails to ~~does not~~ meet the applicable WISHA requirements, ~~of WISHA rules~~ including the rules for specific industries."

WAC 296-800-11035 Establish, supervise, and enforce rules that lead to a safe and healthy work environment that are effective in practice.

- Moved rule from WAC 296-800-14015.
- The title now reads:
"Establish, supervise, and enforce rules that lead to a safe and healthy work environment that are effective in practice."
- Added a bullet that reads:

"You must: Establish, supervise, and enforce rules that lead to a safe and healthy work environment that are effective in practice."

WAC 296-800-120 Employee responsibilities.

- Added a note that reads:
"Employees may discuss and participate in any WISHA safety and health related practice and may refuse to perform dangerous tasks without fear of discrimination. Discrimination includes: Dismissal, demotion, loss of seniority, denial of a promotion, harassment, etc. (See chapter 296-360 WAC, Discrimination, pursuant to RCW 49.17.160 for a complete description of discrimination and the department's responsibility to protect employees)."

WAC 296-800-12005 Employee responsibilities.

- Fourth bullet now reads:
"Take care of ~~for~~ all personal protective equipment (PPE) properly."
- Sixth bullet now reads:
"Report promptly to their ~~your~~ supervisor every industrial injury or occupational illness."
- Seventh bullet now reads:

"Not remove, displace, damage, or destroy or carry of any safeguard, notice, or warning, provided to make the workplace safe."

- Ninth bullet now reads:
"Not interfere with the use of any work practice designed to protect them ~~employees~~ from injuries."
- Tenth bullet now reads:

"Do ~~Not fail or neglect~~ to every other thing reasonably necessary to protect the life and safety of employees."

WAC 296-800-130 Safety committees and safety meetings.

- Summary page now reads:
"Your responsibility: To establish a workplace safety committee/meeting to develop and maintain a safe and healthy workplace for all employees."
- Clarified language for consistency within the rule (matched titles of rules with the summary page).

WAC 296-800-13005 Establish a safety committee or have safety meetings.

- The title now reads:
"Establish a safety committee or have safety meetings."
- Added the words "You must."
- This rule now reads:

IF:	Then:
You employ 11 or more employees on the same shift at the same location.	You must establish a safety committee
You have 10 or less employees	You may elect to have a safety meeting instead of a safety committee.
OR	
If you have 11 or more that meet these conditions:	
• Work on different shift and 10 or less employees are on each shift	
OR	
• Work in widely separated locations and 10 or less employees are at each location.	

Make sure your safety committee:

- Has both employer-selected and employee-selected members.
 - The number of employer-selected members must be equal to or less than the number of employee-elected members.
 - The term of employee-elected members must be a maximum of one year. This rule does not specify the number of terms a representative can serve.
 - If there is an employee-elected member vacancy, a new member must be elected prior to the next scheduled meeting.
- Has an elected chairperson.
- Determines how often the safety committee will meet.

Note:

- If the committee cannot agree on the frequency of safety meetings, the department of labor and industries regional safety consultation representative must be consulted for recommendations (see the resource section in this book).
- Employees selected by the employees bargaining representative or union qualify as "employee-elected."

You must:

Make sure your safety committee:

PERMANENT

- Determines when and where the safety committee will meet.
- Meetings cannot exceed one hour, unless extended by a majority vote of the committee.
- Make sure safety meetings:
 - Are held at least once a month; or weekly (or biweekly) if conditions arise that require discussions of safety problems.
 - Be composed of at least one management representative, in addition to the crew/staff."

WAC 296-800-13010 Make sure that each meeting includes a discussion of established safety topics.

- The title now reads:
"Make sure that each meeting includes a discussion of established safety topics."
- First bullet now reads:
"You must: At each safety committee or safety meeting ~~you must:~~"
- First dash now reads:
"Review safety and health inspection reports to help correct safety hazards."
- Second dash now reads:
"Evaluate the accident investigations conducted since the last meeting to determine if causes of the unsafe situation were identified and corrected."
- Third dash now reads:
"Evaluate the workplace accident and illness prevention program and discuss recommendations for improvement if needed."
- Second paragraph now reads:
"In addition, at each meeting you must:"
- Fourth dash now reads:
"Document attendance ~~and the subject(s) discussed~~"
- Fifth dash now reads:
"Write down subject(s) discussed."

WAC 296-800-13015 Make sure that safety committee meeting minutes are recorded and preserved.

- Added the words "You must."
- First bullet now reads:
 - "Prepare minutes from each safety committee meeting:
 - Preserved them for one year.
 - Make them available for review by safety and health consultation personnel of the department of labor and industries."

WAC 296-800-140 Accident prevention program.

- Summary page now reads:
"Your responsibility: To establish, supervise and enforce an accident prevention program (APP) that is effective in practice (You may call this your total safety and health plan)."
- Clarified language for consistency within the rule (matched titles of rules with the summary page).

WAC 296-800-14005 Develop a formal, written accident prevention program.

- First bullet: Replace the word "type" with "types."
- Second bullet now reads:
"Make sure your accident prevention program contains at least the following ~~minimum~~ elements."
- First diamond now reads:

"A description of your total safety and health program ~~accident prevention program~~."

- Third diamond bullet: Add the word "the."
- Sixth diamond bullet: Add a comma.
- Seventh diamond now reads:
"Identification of ~~the~~ hazardous gases, chemicals, or materials used ~~on-the-job~~ and instruction about ~~on~~ the safe use and emergency action to take after ~~following~~ accidental exposure."
- Second dash: Deleted the word "designated."
- Deleted the word "See" from the reference.

WAC 296-800-14015 Establish, supervise, and enforce rules that lead to a safe and healthy work environment that are effective in practice.

- Moved rule to WAC 296-800-11035.

WAC 296-800-14020 Develop, supervise, implement, and enforce safety and health training programs that are effective in practice.

- Title now reads:
"Develop, supervise, implement, and enforce safety and health training programs that are effective in practice."

WAC 296-800-150 First aid.

- Summary page now reads:
"Your responsibility: ~~To~~ Make sure ~~all employees receive quick and effective~~ first aid trained personnel are available to provide quick and effective first aid."
- Clarified language for consistency within the rule (matched titles of rules with the summary page).

WAC 296-800-15005 Make sure that first aid trained personnel are available to provide quick and effective first aid.

- Title now reads:
"Make sure that first aid ~~is available~~ trained personnel are available to provide quick and effective first aid."
- First bullet now reads:
"Choose one of the following two options to make sure that ~~first aid trained personnel are available to your employees~~ your employees have access to personnel who are trained in first aid."
- Second dash now reads:
"- Determine how many, if any, employees ~~to train~~ should be trained in first aid, based on the following factors:"
- Second diamond now reads:
"Another person with first aid training is present or available to your employees, whenever you have 2 or more employees present."

WAC 296-800-15010 Make sure first aid training contains required subjects.

- Note now reads:
"~~Also~~ Assess your workplace to determine if there are certain job hazards, ~~or~~ if the time and distance from emergency medical services indicate a need for training, beyond the items listed below."
- First bullet: Add and delete a comma.

WAC 296-800-15020 Make sure appropriate first-aid supplies are readily available.

- Title now reads:
"Make sure that appropriate first aid supplies are appropriate and easily accessible readily available."
- Second bullet: Added the word "are."
- Third bullet: Replace the word "the" with "an."

WAC 296-800-15025 Provide a first-aid station when required.

- Fourth dash: Replaced the word "have" with "has."

WAC 296-800-160 Personal protective equipment (PPE).

- Summary page now reads:
"What is PPE?: PPE are is an item or items used to protect the eyes, face, head, body, arms, hands, legs and feet such as goggles, helmets, head covers, gloves, rubber slickers, disposable coveralls, safety shoes, protective shields, and barriers."
- Changed the note to an exemption.
- Replace the word "requirement" with "rules."
- Clarified language for consistency within the rule (matched titles of rules with the summary page).

WAC 296-800-16005 Do a hazard assessment for PPE.

- Note now reads:
"PPE as one should not be relied on to provide protection for your employees. PPE should be used after all other reasonable means of reducing hazards have been carried out. Identifying hazards in your workplace should be built into your regular routine. ~~When you identify hazards~~ You should take active steps to get rid of all identified hazards them. For example, you can:
- Consider other ways of ~~getting a to get~~ hazardous job jobs done."

WAC 296-800-16010 Document your hazard assessment for PPE.

- First bullet now reads:
- "Name of person certifying ~~person's name who certifies~~ that a workplace hazard assessment was done."

WAC 296-800-16015 Select appropriate PPE for your employees.

- Title now reads:
"Select appropriate PPE for your employees."
- This rule now reads:
"(1) Select appropriate PPE.
• Select appropriate PPE for your employees if hazards are present, or likely to be present.
• Select PPE for each at-risk employee to use for protection from the hazards identified in your workplace hazard assessment.
• ~~Communication your PPE selection decisions to each at-risk employee.~~
(2) Select PPE that properly fits each at-risk employee."
• Move language relating to communicating your PPE selection decision to WAC 296-800-16025.
• In the note:
Added the word "may."
Added a comma. Replaced "department of labor and industries" with "OSHA."
Deleted "a" and changed "professional" to "professionals."

WAC 296-800-16020 Provide PPE to your employees.

- Second bullet now reads:
-"Is the type that would not reasonable or normally be worn away from the workplace such as single use or disposable PPE."
- Note now reads:
"Examples of PPE that the employer must provide are:
- Boots or gloves that could become contaminated with hazardous materials in the workplace.
- Safety glasses, goggles, and non-prescription protective eyewear.
- Goggles that to fit over prescription eyewear.
- Hardhats.
- Full body harnesses and lanyards.
- Single use or disposable PPE such as plastic type gloves used in the food service or medical industries."

WAC 296-800-16025 Train your employees to use PPE.

- Move language relating to communicating your PPE selection decision from WAC 296-800-16015.
- First bullet now reads:
"Communicate your PPE selection decisions to each at-risk employee."

WAC 296-800-16030 Retrain employees to use PPE, if necessary.

- First bullet now reads:
"Retrain an employee when you have reason to believe the understanding ~~they have not retained~~, motivation, and skills require to use the PPE has not been retained. Circumstances where retraining is required includes:"

WAC 296-800-16040 Require your employees to use necessary PPE on the job.

- Title now reads:
"Require your employees to use necessary PPE on the job."
- Added a bullet that reads: "You must: Require your employees to use necessary PPE on the job."
- Delete language:
"You must:
• ~~Require that employees use PPE on the job once you have:~~

- ~~Identified that employees need PPE
selected the appropriate PPE for your employees
trained employees to use PPE."~~

WAC 296-800-16045 Keep PPE in safe and ~~in~~ good condition.

- Title now reads: "Keep PPE in safe and ~~in~~ good condition."
- Replace the first bullet with the following that reads:
 - "Make sure all PPE is safe for the work to be performed. It must:
 - Be durable.
 - Fit snugly.
 - Not interfere with the employee's movement.
 - Make sure PPE is used and maintained in a clean and reliable condition.
 - Defective equipment must not be used."
- Third bullet reads:
"Make sure if employees provide their own PPE, that it is adequate for the workplace hazards, and maintained in a clean and reliable condition."

- Third bullet was incorporated into the first bullet.

WAC 296-800-16050 Make sure your employees use appropriate face and eye protection.

- First bullet reads:
"Make sure that employees exposed to hazards that could injure their ~~eyes face~~ and/or ~~face eyes~~ use appropriate protection. Examples of these hazards include:
- Second dash now reads:
"- ~~Is large~~ ~~Be big~~ enough to be worn over the prescription lenses without disturbing them."
- Fourth bullet: Replaced the word "requirements" with "standards."

WAC 296-800-16055 Make sure your employees use appropriate head protection.

- The rule now reads:
"(1) Make sure employees wear appropriate protective helmets.

~~•Make sure~~ Where employees are exposed to hazards that could cause a head injury ~~wear appropriate protective helmets such as hard hats.~~ Examples of this type of hazard include:

- Flying or propelled objects.
- Falling objects or materials.

~~•Make sure~~ Where employees are working around or under scaffolds or other overhead structures ~~wear protective helmets.~~

~~•Make sure protective~~ That helmets meet the following specific ANSI standards (most commercially available PPE is marked with specific ANSI requirements):

- Protective helmets bought before February 20, 1995, must meet ANSI standard Z89.1-1969.
- Protective helmets bought after February 20, 1995, must meet ANSI standard Z89.1-1986.
- If you use protective helmets that do not meet these ANSI standards, you must show they are equally effective.

(2) Make sure employees working near exposed electrical conductors that could contact their head wear a protective helmet designed (that meet the above ANSI standards)."

- Fourth bullet: Is numbered 3. Replace the word "then" with "if."
- Fifth bullet: Language from the fifth bullet was incorporated into the first bullet.
- Deleted the note that read:

~~"Note: When an employee must wear PPE, such as mask type respirators or ear cup type hearing protection devices, and hair, either facial or head, interferes with a proper seal."~~

WAC 296-800-16060 Make sure your employees use appropriate foot protection.

- The rule now reads:
"(1) Use appropriate foot protection.
- ~~Make sure~~ Where employees are exposed to hazards that could injure their feet ~~use appropriate foot protection.~~ Examples of these hazards are:
 - Falling objects.
 - Rolling objects.
 - Piercing/cutting injuries.
 - Electrical hazards.

~~•Make sure employees wear calks or other suitable footwear to protect against slipping while they are working on top of logs.~~

~~•Make sure PPE used to protect your employees' feet~~ That meets specific ANSI requirements.

(2) Make sure employees wear calks or other suitable footwear to protect against slipping while they are working on top of logs."

WAC 296-800-16065 Make sure your employees use appropriate hand protection.

- First bullet: Delete the word "severe."

WAC 296-800-16070 Make sure your employees are protected from drowning.

- Title now reads:
"Make sure your employees are protected from drowning."

- The rule now reads:

"(1) Provide and wear personal flotation devices.

~~•Make sure employees wear personal flotation devices (PFDs)~~ When they work in areas where the danger of drowning exists, such as:

- On the water.
- Over the water.
- Alongside the water.

Note: Employees are not exposed to the danger of drowning when:

- The water is known to be less than chest high on the employee.
- Employees are working behind standard strength and height guardrails.
- Employees are working inside operating cabs or stations that eliminate the possibility of accidentally falling into the water.
- Employees are wearing an approved safety belt with a lifeline attached that prevents the possibility of accidentally falling into the water.

- Provide your employees with ~~appropriate or allowable approved~~ approved United States Coast Guard-approved PFDs. Ski belts or inflatable type PFDs are prohibited. The following are appropriate or allowable United States Coast Guard-approved PFDs."

- Fourth bullet: Is numbered (2). Replace the words "exposure to" with "the risk of."

WAC 296-800-170 Employer chemical hazard communication.

- The introduction now reads:
"Employer Chemical Hazard Communication - Introduction.

Important:

Thousands of chemicals can be found in today's workplaces. These chemicals may have the capacity to cause health problems, from minor skin irritations to serious injuries or diseases like cancer.

The employer chemical hazard communication rule was developed to make sure employers and employees are informed about chemical hazards in the workplace.

This rule applies to:

- Employers engaged in businesses where chemicals are used, distributed, or produced for use or distribution.
- Contractors or subcontractors that work for employers engaged in businesses where chemicals are used, distributed, or produced for use or distribution.

Note:

- If you produce, import, distribute and/or repackage chemicals, or choose not to rely on labels or material safety data sheets provided by the manufacturer or importer, you must comply with chemical hazard communication for manufacturers, importers and distributors, WAC 296-62-054.
- You may withhold trade secret information under certain circumstances, see trade secrets, WAC 296-62-053, to find out what information may be withheld as a trade secret and what information must be released.

Exemptions:

- For the purposes of this employer hazard communication rule, if you are engaged in agricultural production of crops or livestock, "employee" does not mean:
 - Immediate family members of the officers of any corporation, partnership, sole proprietorship or other business entity or officers of any closely held corporation.
- Certain products, chemicals, or items are exempt from this rule. Below is a summarized list of these exemptions. See WAC 296-800-17055 at the end of this rule to get complete information about these exemptions:
 - Any hazardous waste or substance.
 - Tobacco or tobacco products.
 - Wood or wood products that are not chemically treated and will not be processed, for example, by sawing and sanding.
 - Food or alcoholic beverages.
 - Some drugs, such as retail or prescription medications.
 - Retail cosmetics.
 - Ionizing and nonionizing radiation.
 - Biological hazards.
 - Any consumer product or hazardous substance when workplace exposure is the same as that of a consumer.
 - Retail products used in offices in the same manner and frequency used by consumers can be termed "consumer products." Consumer products include things such as: Correction fluid, glass cleaner, and dishwashing liquid.

Example: If you use a household cleaner in your workplace in the same way that a consumer would use it when cleaning their house, the exposure should be the same as the consumer's. ("In the same way" means using the household cleaner in the same manner and frequency.) A janitor using a household cleaner, such as bleach, throughout the day, is not considered to be consumer use.

- Manufactured items that remain intact are exempt for this rule.

The following are examples:

Item	Covered by this rule	Not covered by this rule
Brick	sawed or cut in half	used whole or intact
Pipe	cut by a torch	bent with a tube bender
Nylon rope	burning the ends	tying a knot

- Manufactured items that are fluids or in the form of particles are not exempt for this rule."
- Summary page now reads:
"Your responsibility: To inform and train your employees about the hazards of chemicals they may be exposed to during normal working conditions, or in foreseeable emergencies by:"
- Clarified language for consistency within the rule (matched titles of rules with the summary page).

WAC 296-800-17005 Develop, implement, maintain, and make available a written chemical hazard communication program.

- First bullet: Delete the word "and."
- Second bullet reads:
"~~Hazardous~~ Chemical hazards used during nonroutine tasks."
- Fourth bullet now reads:
"Make sure ~~that~~ your written chemical hazard communication program includes the following communication methods you will apply if you produce, use, or store hazardous chemicals at your workplace(s) in such a way that the employees of other employer(s) maybe exposed:
 - Provide the other employer(s) with a copy of the relevant material safety data sheets (MSDSs) or provide access to the ~~material safety data sheets~~ MSDS in a central location at the workplace.
 - Inform the other employer(s) of any precautionary measures that need to taken to protect employees during normal operating conditions and in foreseeable emergencies.
 - Describe how to inform the other employer(s) of the labeling system used in the workplace."
- Note now reads:

"Note:

- Examples of employees of other employers who could be exposed to chemical hazards that you produce, use, or store in your workplace include employees of construction, cleaning service, or maintenance contractors visiting or working on-site.
- Your employees have the right to get chemical hazard communication information from other employers at workplaces where they are working; and
- Employees of other employers have the right to get the information from you when they are working at your workplace.
- Include in your written chemical hazard communication program the methods that you will use to share information with other employers and their employees at your workplace(s) regarding:
 - Access to material safety data sheets.
 - Precautionary measures such as personal protective equipment and emergency plans.
 - Any labeling systems used at the workplace.

If you rely on another employer's chemical hazard communication program to share the information required and the program meets the requirements of this rule, document this say so in your own written chemical hazard communication program."

- Fifth bullet now reads:
"Make your chemical hazard communication program available to your employees. ~~Where employees must travel between workplaces during a workshift, that is, if their work is carried out at more than one geographical location, the written Chemical Hazard Communication Program may be kept at the primary workplace facility.~~"
- Note now reads:

"Note:

- You must make the written chemical hazard communication program available, upon request, to employees, their designated representatives, the ~~director or his/her designee~~ department and NIOSH, in accordance with the requirements of Access to records, WAC 296-62-053.
- Where employees must travel between workplaces during a workshift, that is, if their work is carried out at more than one geographical location, the written chemical hazard communication program may be kept at the primary workplace facility."

WAC 296-800-17010 Identify and list all the hazardous chemicals present in your workplace.

- First bullet: Replace the word "predictable" with "fore-seeable."
- Second bullet: Spell out (MSDS), material safety data sheets. Replace the word "requirement" with "rule."
- Note now reads:

"Note:

The following are some ways to determine whether a product is hazardous:

- Look for words on the label, such as CAUTION, WARNING, or DANGER.
- Look for words or "hazard coding" that indicate that the chemical is flammable, an irritant, corrosive, carcinogenic, etc. "Hazard coding" refers to words, numbers, or colors that tell you a chemical is dangerous.
- Check the product's MSDS for hazard information.

Examples of hazardous chemicals are: Acids, adhesives, caustics, fuels, paints, varnishes, shellacs and pesticides. Too many other classes of hazardous chemicals exist to list them all here.

If you have any questions about a chemical you have at your workplace, contact your local L&I office (see the resource section of this book)."

WAC 296-800-17015 Obtain and maintain material safety data sheets (MSDS) for each hazardous chemical used.

- Note now reads:
"MSDSs are a type of employee exposure record. Therefore, you must comply with the Access to MSDS as Exposure Records, WAC 296-800-180, which is located in this book."
- First bullet now reads:
"Obtain a MSDS for each hazardous chemical used as

soon as possible if the MSDS is not provided with a the shipment of a hazardous chemical ~~you must get one from the chemical manufacturer or importer as soon as possible.~~"

- Second bullet: Incorporate information into first bullet.
- Note: Housekeeping errors fixed. For example, changed the word "chemical" to "chemicals."

WAC 296-800-17020 Make sure that MSDSs material safety data sheets are readily accessible to your employees.

Title now reads:

- "Make sure ~~that MSDSs~~ material safety data sheets are readily accessible to your employees."
- Note now reads:

"Note:

- Electronic access (such as computer or fax), microfiche, and other alternatives to maintaining paper copies of the ~~((material safety data sheets))~~ MSDSSs are permitted as long as they do not create barriers to immediate employee access in each workplace.
- Barriers to immediate access of electronic ~~((material safety data sheets))~~ MSDSSs may include:
-Power outages.
-Equipment failure.
-System delays.
-Deficient user knowledge to operate equipment.
-Location of equipment outside the work area.
Solutions to eliminating these and other possible barriers to access may require the availability of back-up systems, employee training, and providing access equipment in the work areas.
- ~~Material safety data sheets~~ MSDSSs must also be made readily available, upon request, to ~~designated representatives and to the director or his/her designee~~ the department in accordance with the requirements of ~~Access to MSDSs~~ material safety data sheets (MSDSS) as exposure records, WAC 296-800-180. NIOSH (National Institute for Occupational Safety and Health) must also be given access to ~~material safety data sheets~~ MSDSSs in the same manner."

WAC 296-800-17025, Label containers holding hazardous chemicals.

- Second bullet: The rule became a note. Added the words "to be."
- Second note: Replaced "material safety data sheet" with "MSDS."
- Third note now reads:

"Note:

You may use words, pictures, symbols or any combination to communicate the hazards of the chemical. Be sure to train your employees so they can demonstrate a knowledge of ~~whatever~~ the labeling system you use.

Some alternative labeling systems do not communicate target organ information, so ~~employees~~ the employee will have to rely on training to provide provided by the employer to obtain this information."

- Fourth bullet now reads:

PERMANENT

"Make sure that labels or other forms of warning are legible, in English, and prominently displayed on the container, or readily available in the work area throughout each work shift. ~~Employers with non-English speaking employees may use other languages in the warning information in addition to the English language.~~"

Fourth note now reads:

"Note:

- Above is an example of a labeled container. You may use a laminated or coated label, affixed to the container with a wire, to avoid deterioration of labels due to a solvent, such as acetone.
- Employers with non-English speaking employees may use other languages in the warning information in addition to the English language."

Fifth bullet now reads:

"Make sure if the hazardous chemical is regulated by WISHA or OSHA in a substance-specific health standard rule, you must make sure that the labels or other forms of warnings used are used in accordance to those rules with the requirements of that standard. For examples include: Asbestos; WAC 296-62-0772(6) Formaldehyde, WAC 296-62-07540-(13)(e)."

WAC 296-800-17030 Inform and train your employees about hazardous chemicals in your workplace.

- First bullet: Change the word "standard" to "rule." Add the word "MSDSs."
- Fifth bullet: Delete the words "of Labor and Industries."
- Note now reads:
 - "Interactive computer-based training or training videos can be used ~~when provisions are made to: provided they are effective.~~ Allow trainees to ask questions of a qualified trainer. Provide trainees of sufficient hands-on experience. Incorporate relevant site-specific information.
- Second note: Replaced the words "Material Safety Data Sheets" with "MSDSs."

WAC 296-800-17035 Follow these rules for laboratories using hazardous chemicals.

- First bullet now reads:
 - (1) Make sure that labels on incoming containers of hazardous chemicals are in place and readable.
 - (2) Maintain material safety data sheets (MSDS) received with incoming shipments of hazardous chemicals and make them available to laboratory employees when they are in their workareas.
 - (3) Provide laboratory employees with information and training as described in: "Inform and train your employees about hazardous chemicals in your workplace," WAC 296-800-17030, except for the part about the location and availability of the written chemical hazard communication program."

WAC 296-800-17040 Follow these rules for handling chemicals in factory-sealed containers.

- First paragraph now reads:

~~"Make sure where employees~~ This applies to situations where employees only handle chemicals in factory-sealed containers that are not opened under normal use (such as those found in marine cargo handling, trucking, warehousing, or retail sales), you must comply with the following:

You must:

- (1) Make sure that labels on incoming containers of hazardous chemicals are in place and readable.
- (2) Keep or obtain material safety data sheets.
 - Keep any MSDS that are received with incoming shipments of the sealed containers of hazardous chemicals.
 - If a factory-sealed container of hazardous chemicals comes without a MSDS, obtain a MSDS one as soon as possible, if an employee requests it.
- (3) Make sure that the MSDSs are readily accessible during each work shift to employees when they are in their work area(s).
- (4) ~~Provide employees with information and training in WAC 296-800-17030.*~~ Inform and train your employees about hazardous chemicals in your workplace, to protect them in case of a hazardous chemical spill or leak from a factory-sealed container. Exemption: You do not have to cover the location and availability of the written chemical hazard communication program."

WAC 296-800-17045 Translate certain chemical hazard communication documents upon request.

- First bullet: Replace the word "MSDS" with "material safety data sheet." Replace the word "standard" with "rule."

WAC 296-800-17050 Attempt to obtain a material safety data sheet (MSDS) upon request.

- First bullet now reads:
 - "Upon receipt of an employer's written request for a MSDS material safety data sheet, attempt to obtain the MSDS from the chemical manufacturer, importer, or distributor. When the department receives the MSDS, ~~it the department~~ must forward a copy of it to the purchaser at no cost. Priority for this service will be given to small employers. Small business employers will be given priority for this service."

WAC 296-800-17055 Items or chemicals exempt from this rule, and exemptions from labeling.

- In the description of any consumer product or hazardous substance: Delete the words "as those terms are."
- In the description of any hazardous waste: Delete the words "as such term is." Replace the word "standard" with "rule."
- In the description of any hazardous substance: Delete the words "as such term is."
- In the description of wood or wood products: Replace the word "standard" with "rule."
- In the description of articles:
 - Replaced the word "e.g." with "for example" and "such as."
 - Replaced the word "mean" with "meaning."
 - Added the word "and."
- In the description of food and alcoholic beverages: Delete the parenthesis.

- In the description of any drug: Delete the words "as that term is." Replace the word "e.g." with "for example."
- In the description of any pesticide: Delete the words "as such term is."
- In the description of any chemical substance or mixture: Delete the words "as such terms are."
- In the description of any food, food additive, color additive, drug, cosmetic, or medical/veterinarian device or product: Replace the word "e.g." with "for example" and delete the words "as such terms."
- In the description of any distilled spirits: Delete the words "as such terms are."
- In the description of any consumer product or hazardous substance: Delete the words "as those terms are." Replace the word "standard" with "rule."

WAC 296-800-180 Material safety data sheets (MSDSs) as exposure records.

- Summary page: Add a note that reads:

"Note:

- Access to records, WAC 296-62-052, requires the preservation and access to other exposure records including records such as workplace monitoring data and biological monitoring results in medical records. If you keep these other types of employee exposure records or employee medical records you must comply with these additional requirements.
- This rule applies to every employer who maintains, makes, contracts for, or has access to MSDSs for chemicals used in their workplace.
- The specific identity of a toxic substance may be withheld from a disclosable record if it is a verifiable trade secret. For trade secret requirements, see WAC 296-62-053.
- Clarified language for consistency within the rule (matched titles of rules with the summary page).

WAC 296-800-18005 Preserve exposure records for at least 30 years.

- The title now reads:

"Preserve exposure records for at least 30 years."

- The rule now reads:

- "Keep material safety data sheets (MSDSs) and analysis using MSDSs for at least thirty years, (includes current, former and employers receiving transferred records). Preserve MSDSs in any form, as long as the information is not altered and is retrievable. You may keep alternative records instead of MSDSs concerning the identity of a substance. The alternative record must also be kept for thirty years and contain the following information:
 - Some record of the identity (chemical name, if known) of a substance or agent.
 - Where the substance or agent was used.
 - When the substance or agent was used.
- Preserve MSDSs in any form, as long as the information is not altered and is retrievable.

Note: ~~Maintaining an MSDSs in an alternative form may be less work than you think.~~ Keeping alternative records may be less work than you think. When developing your hazard communication program's list of haz-

ardous chemicals (WAC 296-800-17010), add the "where used" and "when used" information required by this ~~standard rule.~~

WAC 296-800-18010 Inform current employees of exposure records.

- First bullet: Spell out material safety data sheets. Add the word "thereafter."
- After the note added the words "You must."
- Third bullet: Replace "assistant director for WISHA services" with "department."

WAC 296-800-18015 Provide access to exposure records.

- First bullet now reads:
 - "Provide access, whenever requested by an employee (any current, former, or transferred worker) or their designated representative, to a relevant exposure record such as material safety data sheets (MSDSs) or their alternative, or analysis using MSDSs or their alternative:
 - In a reasonable time, place, and manner.
 - Within fifteen working days. If the employer cannot meet the fifteen working day this requirement, they must inform the requesting party of the reason for the delay and the earliest date the record will be made available.

~~If the employer cannot meet the fifteen working day requirement, they must inform the requesting party of the reason for the delay and the earliest date the record will be made available.~~

Definition: A designated representative is:

- ☐ Any individual or organization to which an employee gives written authorization.
- ☐ A recognized or certified collective bargaining agent, without regard to written employee authorization.
- ☐ A deceased or legally incapacitated employee's legal representative.

Definition: ☐ An employee is any current, former or transferred worker.

- Second bullet now reads:

"Make sure the ~~director of the department of labor and industries~~ department has prompt access to any exposure records and related analysis. This must be done without violation of any rights under the Constitution or the Washington Industrial Safety and Health Act that the employer chooses to exercise."

WAC 296-800-18020 Transfer records when ceasing to do business.

- First bullet now reads:

"Transfer all material safety data sheets (MSDSs) as exposure records to the successor employer, who must receive and preserve, or keep unchanged, these records."

- Second bullet now reads:

"If there is no successor to receive and preserve the employee exposure records:

-Notify affected current employees of their rights of access to records at least 3 months prior to the cessation of the employer of the business and

-Transfer the records to the department, if required by a specific WISHA safety and health rule."

~~Do the following if:~~

~~There is no successor to receive and preserve the employee exposure records:
 Notify affected current employees of their rights of access to records at least three months prior to the cessation of the employer's business and
 Transfer the records to the director of the department of labor and industries, if so required by a specific industrial safety and health standard.~~

WAC 296-800-19005 Provide a safety bulletin board in your workplace.

- First bullet now reads:
 - "Install and maintain a safety bulletin board in every fixed workplace (establishment) that has eight or more employees. Make sure the safety bulletin board is large enough to post information such as the following:
 - Safety bulletins
 - Safety newsletters
 - Safety posters
 - Accident statistics
 - Other safety educational material."

WAC 296-800-20005 Post and keep a WISHA poster in your workplace.

- First bullet now reads:
 - "Post it where employees it can easily see it be seen by employees and keep it in good condition ~~Keep it posted and in good shape.~~"

WAC 296-800-21005 Provide and maintain adequate lighting.

- First bullet now reads:
 - "You must:
 - Provide and maintain adequate lighting for all work activities in your workplace. (See the following table)
 - ~~If general lighting is not available, you must have adequate light to see nearby objects that might be potential hazards or to see to operate emergency controls or other equipment.~~

Lighting Table

Activity	Lighting Table	
	Minimum acceptable average lighting level in an area: (Foot-candles)	Any one single measurement used to determine the average lighting level. *cannot be less than: (Foot-candles)
Indoor task	10	5
Outdoor task	5	2.5
Nontask activities for both indoor and outdoor	3	1.5

* Lighting levels must be measured at thirty inches above the floor/working surface or at the task.

You must:

- Have adequate light for employees to see nearby objects that might be potential hazards or to see to operate emergency controls or other equipment, if general lighting is not available.

Note: -Lighting levels can be measured with a light meter.
 -Conversion information: 1 foot-candle =1 lumen incident per square foot =10.76 lux."

WAC 296-800-220 Housekeeping, drainage, and storage.

- Clarified language for consistency within the rule (matched titles of rules with the summary page).
- Summary page: Add a note that reads:
 - "Note: The introduction has important information about building, electrical and fire codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to building, fire, and electrical codes" in the introduction section of this book."

WAC 296-800-22005 Keep your workplace clean.

- Added the word "orderly."

WAC 296-800-22010 Sweep and clean your workplace to minimize dust.

- Title now reads: "Sweep and clean your workplace ~~in a way that~~ to minimizes dust."
- First bullet now reads:
 - "Sweep and clean your workplace in a way that minimizes dust in the air as much as possible."
- Second bullet now reads:
 - "When practical, clean after hours so that your employees are not exposed to dust in the air on the job ~~Sweep and clean your workplace in a way that minimizes dust in the air as much as possible.~~"

WAC 296-800-22015 Keep your workplace free of obstacles that would interfere with cleaning.

- Title now reads: "Keep your workplace free of obstacles that ~~would~~ interfere with cleaning."
- Incorporated second bullet into first bullet that now reads:
 - "Keep your workplace clear of obstructions such as nails, splinters, ~~and~~ loose boards and unnecessary holes and openings to make cleaning easier and more effective."
 - ~~Get rid of unnecessary holes and openings.~~

WAC 296-800-22020 Control pests in your workplace.

- Added a note that reads:
 - "By handling dead or live pests including waste products, attached parasites and other contaminated materials, your employees may be exposed to certain health risks. These risks include, but are not limited to: Hanta virus, rabies, lyme disease and psittacosis. Contact your local L&I office (see resources section of this book) or the public health department for more information about health risks and proper pest handling and disposal techniques.
 - "Workplace" includes storage areas."

WAC 296-800-22022 Make sure floors are maintained in a safe condition.

- The language in this section is moved from WAC 296-800-27010 and reads:

"Make sure floors are maintained in a safe condition.

PERMANENT

You must:

- Make sure floors are kept free of debris. This includes:
 - Buildings
 - Platforms
 - Walkways and driveways
 - Storage yards
 - Docks
- Use a nonslip coating on all polished floors."

WAC 296-800-22025 Keep your workroom floors dry, when practical.

- First bullet now reads:
 "Do the following to help keep your employees dry if wet processes are used in your you workplace workarea:
 - Maintain drainage away from the workarea workplace; and
 Provide false floors, platforms, or other dry places where employees can stand, where practical or provide appropriate waterproof footwear." ~~where practical or appropriate for your workplace.~~

WAC 296-800-22035 Store things safely.

- Third bullet: Add the words "or more."

WAC 296-800-230 Drinking water, bathrooms, washing facilities, and waste disposal.

- Clarified language for consistency within the rule (matched titles of rules with the summary page).

WAC 296-800-23005 Provide safe drinking (potable) water in your workplace.

- This section now reads:
 "(1) Provide safe drinking (potable) water for employees for:

- ~~Drinking~~
- Washing themselves
- Personal service rooms
- Cooking
- Washing premises where food is prepared or processed of food preparation or processing premises
- Washing food, eating utensils, or clothing

(2) Containers and dispensers.

- Make sure your movable, or portable, drinking water dispensers are:
 - Capable of being closed
 - Kept in sanitary condition
 - Equipped with a tap
- ~~Prohibit the~~ Not use of open containers such as barrels, pails, and tanks from which employees must dip or pour drinking water, ~~even if the containers have covers.~~

~~(3) Not allow~~ Prohibit employees ~~to use~~ from using shared drinking cups or utensils.

Definition: Potable water: Water that you can safely drink that meets specific safety standard prescribed by the United State Environmental Protection Agencies National Interim Primary Drinking Water Regulations, published in 40 C.F.R. Part 141, and 40 C.F.R. 147.2400."

WAC 296-800-23010 Clearly mark the water outlets that are not fit for drinking (nonpotable).

- First bullet: Numbered (1).

- Second bullet now reads:
 "Not Prohibit the use of nonpotable water that could create unsafe conditions such as concentrations of chemicals, for example lead or chlorine, fecal coliform bacteria, or other ~~organisms~~ substances."
- Note: Added the word "Cleaning."

WAC 296-800-23015 Make sure that systems delivering not-fit-for-drinking (nonpotable) water prevent backflow into drinking water systems.

- Title now reads:
 "Make sure that systems delivering not-fit-for-drinking (nonpotable) water prevent backflow into drinking water systems."
- Added a bullet that reads: "You must: Make sure that systems delivering not-fit-for-drinking (nonpotable) water prevent backflow into drinking water systems."

WAC 296-800-23020 Provide bathrooms for your employees.

- First bullet: Numbered (1).
- Third bullet: Numbered (2).
- Fourth bullet: Numbered (3).

WAC 296-800-23025 Provide convenient, clean washing facilities.

- First and second bullet: Replaced the word "bathroom" with "washing facilities."
- Third bullet now reads:
 "Near the sinks and basins provide, individual paper or cloth hand towels; or individual sections of clean continuous cloth toweling; or warm air blowers for drying hands; ~~in a location near the sinks and basins.~~"

WAC 296-800-23030 Keep containers used for garbage or waste in a sanitary condition.

- This section now reads:
 "~~Not allow garbage to leak out of your waste container.~~
 ☒ Be able to thoroughly clean your waste container.
 ☒ Have a solid, tight fitting cover on your waste container, unless it can be maintained in a sanitary condition without a cover.
 Do the following to maintain your waste containers:
 -Do not allow garbage to leak out of the containers
 -Be able to thoroughly clean the containers
 -Make sure containers have tight fitting covers (unless you can keep them sanitary without)."
 Note:
 If you can demonstrate that you keep your waste container(s) clean, they do not have to meet ~~these~~ the requirements."

WAC 296-800-23035 Remove garbage and waste in a way that does not create a health hazard.

- First bullet: Removed two commas.

WAC 296-800-240 Environmental tobacco smoke in the office.

- Clarified language for consistency within the rule (matched titles of rules with the summary page).

WAC 296-800-24005 Control tobacco smoke in your building.

- Title now reads:
 "Control ~~the~~ tobacco smoke in your building."
 • This section now reads:

PERMANENT

"Exemption: The minimum criteria specified in this rule do not apply to outdoor structures provided for smokers such as gazebos or lean-tos.

You must:

Prohibit *smoking* in your office work environment or Restrict *smoking* inside your office work environment to designated enclosed smoking rooms that meet the following specific minimum criteria:

~~The minimum criteria for employee smoking rooms is as follows:~~

-Identify *smoking* rooms clearly with signs.

-Make sure the designated *smoking* rooms are not in common areas, such as:

-Places where nonsmoking employees are required to work or visit

-Restrooms

-Washrooms

-Hallways

-Stairways

-Cafeterias/lunchrooms

-Meeting rooms

- Make sure that no employee is required to enter a designated *smoking* room while someone is smoking there.

- Conduct cleaning and maintenance work in designated *smoking* rooms when smokers are not present.

- You must: Ventilate designated smoking rooms at a rate of at least 60 ~~cfm~~ cubic feet per minute per smoker (calculated on the basis of the maximum number of smokers expected during the course of a normal working day), which can be supplied by transfer air from adjacent areas.

- Maintain, ~~at all times,~~ enough negative air pressure in designated *smoking* areas to prevent smoke from migrating into nonsmoking areas, at all times.

- Operate a separate mechanical exhaust system in designated *smoking* rooms, ~~This is to make sure that the exhausted air moves directly outside,~~ and does not recirculate into nonsmoking areas.

- Prohibit use of the designated *smoking* room; if the mechanical exhaust system is not working properly, until repairs are completed.

Note:

This ventilation rate is recommended for occupancies of no more than seven people for every 100 square feet of net occupied space in the designated smoking room."

WAC 296-800-24010 Control tobacco smoke that comes in from the outside.

- Title now reads:

"Control tobacco ~~the~~ smoke that comes in from the outside."

WAC 296-800-250 Stairs and stair railings.

- Note: Add a note that reads:

"Note: The introduction has important information about building, electrical and fire codes that may apply to you in addition to WISHA rules. See "How do the

WISHA rules relate to building, fire, and electrical codes" in the introduction section of this book."

- Exemptions now reads:

- "Stairs used exclusively for fire exit purposes

- Construction operations (See WAC 296-24-76503 for the specifications for safe design and construction of fixed general industrial stairs)

- Private buildings or residences

- Articulated stairs (for example, stairs used at a marina)

- Nonindustrial and "Monumental" are excluded as they are not "industrial" stairs; however, when public and private building steps are located at loading or receiving docks, in maintenance areas, etc., or are used exclusively by employees, the requirements of this rule must apply."

WAC 296-800-25005 Provide fixed stairs where required.

- Second bullet: Moved some of this language and added it to the note that reads:

"You could use a spiral stairway as an exit route in a restricted area that lacks room for a conventional stairway."

- Definition section: Definition of a riser now reads:

"A riser is the vertical part of the step at the back of a tread that rises to the front of the tread above."

WAC 296-800-25010 Provide stairs that minimize hazards.

- First bullet: Numbered (1).

- Second bullet: Numbered (2).

- Third bullet now reads:

- ~~Provide a stairway platform, if doors or gates open directly on a stairway:~~

- ~~The platform must be at least 20 inches wide when the door swings open:~~

"(3) Provide a platform where doors or gates open directly on a stairway. The swing of the door must not reduce the effective width of the platform to less than 20 inches."

"Note: To see all of the ~~standards~~ rules for building fixed stairs, refer to WAC 296-24-75011 and 296-24-765 of the General safety and health standard."

WAC 296-800-25015 Provide handrails and stair railings.

- Exemption: Replace the word "requirement" with "rules."

- Definition: Definition of handrail now reads:

"Handrails is a single bar or pipe on brackets from a wall or partition to provide a continuous handhold for persons using a stair."

- Note: Replace the word "standard" with "rule."

WAC 296-800-26005 Guard or cover floor openings and floor holes.

- First bullet now reads:

"You must:

(1) Guard stairway floor openings, temporary floor opening and floor holes.

- ~~A railing must~~ Protect all stairway floor openings with a railing. The railing must protect all open sides except the stairway entrance side.

- Use a hinged cover and a removable railing where traffic across an infrequently used stairway floor

opening prevents the installation of a fixed railing. ~~You must use a hinged cover and removable railing.~~ This removable railing must protect all open sides except the stairway entrance side.

- Protect temporary floor openings ~~must be protected~~ by either a railing or by a person who constantly attends the opening.
- Guard floor holes. ~~When a floor hole cover is not in place, the hole must be protected by a removable railing or constantly attended by someone.~~
- Protect exposed floor holes into which a person can accidentally walk must be protected by either:
 - A railing with a toeboard on all open sides or
 - A floor hole cover of standard strength and construction that can be hinged in place. When a floor hole cover is not in place, the hole must be protected by a removable railing or constantly attended by someone.
- Provide covers for floor openings ~~and floor holes~~. Floor opening covers may be of any material that has a safety factor of 4, or is strong enough to hold up to 4 times the intended load. Covers that do not project more than 1 inch above the floor level may be used providing all edges are beveled (slanted) to prevent tripping. All hinges, handles, bolts, or other parts of a cover must set flush with the floor or cover surface.

(2) ~~To~~ Prevent tools and materials from falling through a floor hole. The floor hole must be protected by a cover that leaves an opening no more than one inch wide and is securely held in place. This applies only to floor holes that persons cannot accidentally walk into on account of fixed machinery, equipment, or walls."

WAC 296-800-26010 Protect open-sided floors and platforms.

- Deleted definition of "open-sided floor."
Definition: ~~An open-sided floor is any floor or platform four feet or more above adjacent floor or ground level that is not enclosed.~~
- First three bullets now read:
 - (1) "Guard open sided floors and platforms
 - Guard open-sided floors and platforms 4 feet or more above adjacent floor or ground level by a railing. The entrance to a ramp, stairway, or fixed ladder does **not** need a railing.
 - Guard open-sided floors, walkways and platforms above or adjacent to dangerous equipment, pickling or galvanizing tanks, degreasing units, and other similar hazards, regardless of height with a railing and toeboard.

Note:

- Where the guarding requirements rules above do not apply because employee are exposed exposure to falls is infrequent (not on other than a predictable and regular basis), you must comply with the personal protective equipment (PPE) requirements rules (WAC 296-800-160) or other effective fall protection must be provided.

- You can find the minimum requirements for standard railings of various types of construction in WAC 296-24 800-75011.

You must:

(2) Make sure tools and loose materials are not left on overhead platforms and scaffolds."

WAC 296-800-270 Workplace structural integrity.

- Clarified language for consistency within the rule (matched titles of rules with the summary page).

- Note: Add a note that reads:

"Note: The introduction has important information about fire, building and electrical codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to fire building and electrical codes" in the introduction section of this book."

WAC 296-800-27005 Do not overload floors or roofs.

- Added the word "Do" to the title of this section.
- Replaced the words "Not load" with "Prohibit overloading."

WAC 296-800-27010 Make sure that floors are safe.

- Second bullet now reads:
 - Make sure floors are of substantial construction and kept in good repair ~~and free of debris~~. This includes floors of:
 - Buildings
 - Platforms
 - Walks and driveways
 - Storage yards
 - Docks

- Third bullet: Delete this bullet.

~~"Use a non-slip coating on all polished floors."~~

- Fourth bullet: Add language from WAC 296-800-27015.

"Make sure that structures are designed, constructed, and maintained to provide a safety factor of 4 times the imposed maximum strain.

- If you notice bowing, cracking, or other indications of excessive strain on a structure, you must take action to make sure it is safe.
- Note: This rule applies to all buildings or those that have had complete or major changes or repairs built after 5/7/74."

~~**WAC 296-800-27015 Make sure that structures provide a safety factor of 4.** This section is deleted and incorporated into WAC 296-800-27010.~~

WAC 296-800-2701520 Make sure floors can support equipment that moves or has motion Post-approved load limits (weight limits) for floors.

- Added the word "fixed."
- Change WAC number from WAC 296-800-27020 to 296-800-27015.

WAC 296-800-2702520 Post approved load limits (weight limits) for floors.

- Change WAC number from WAC 296-800-27025 to 296-800-27020

WAC 296-800-280 Electrical.

- Clarified language for consistency within the rule (matched titles of rules with the summary page).
- Note: Add a note that reads:

Note: The introduction has important information about fire, building and electrical codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to fire, building and electrical codes" in the introduction section of this book.

WAC 296-800-28010 Make sure all electrical equipment is used for its approved or listed purpose.

- Definition of electrical outlets now reads:
"Electrical outlets are places on an electric circuit where power is supplied to equipment through receptacles, sockets and outlets for attachment plugs."

WAC 296-800-28020 Make sure electrical equipment that is not marked is not used.

- The title now reads:
"Make sure electrical equipment that is not marked by ~~the manufacturer can not be~~ is not used.

You must:

- Make sure ~~manufacturer~~ markings are durable and appropriate to the environment. ~~appropriate markings include:~~

- Provide Appropriate markings which include:

- The manufacturers' name.

or

- Trademark.

or

- The organization responsible for the product.

and

- Voltage, current and wattage or other ratings as necessary."

WAC 296-800-28025 Maintain electrical fittings, boxes, cabinets, and outlets in good condition.

- First through fifth bullet: Numbered (1) and titled "Do the following to covers and openings."
- Sixth bullet: Numbered (2) and replace the word "that" with "which."
- Added "ft." to table and titled the table "Work clearance table."

WAC 296-800-28030 Maintain all flexible cords and cables in good condition and use safely.

- Note: Added the words "a type of."
- First bullet: Numbered (1) and titled "Perform visual inspections." Replaced the words "Visually inspect" with "on."
- Second bullet: This is now an exemption that reads:
"Exemption: You do not need to visually inspect portable cord- and plug-connected equipment and extension cords that which stay connected once in place and are not exposed to damage do not need visual inspection until they are moved."
- Second through tenth bullet: Numbered (2) and titled "Make sure flexible cords and cables are used as described."
- Second bullet reads:
"And remove from service any defective or damaged cord until repaired and tested."
- Note: Added a note that now reads:
"Note: Extension cords (flexible cord sets) may be used on a temporary basis if you follow the rules

described in the temporary use section WAC 296-800-28030(3)."

- Fourth bullet: Moved this bullet to the second bullet.
~~"Remove from service any defective or damaged cord until repaired and tested."~~
- Sixth bullet: Moved this bullet to the eighth bullet.
~~"Make sure insulation on flexible cords, extension cords and cables is intact."~~
- Eighth bullet now reads:
"Make sure insulation on flexible cords, extension cords and cables is intact."
- Tenth bullet: Added this bullet and it now reads:
"Prohibit your employees from using wet hands to plug or un-plug equipment or extension cords if the equipment is energized."
- Eleventh and twelfth bullets: Numbered (3), titled "Provide the following for temporary use," and rearranged.

WAC 296-800-28035 Guard electrical equipment to prevent your employees from electrical hazards.

- Title now reads:
~~Prevent your employees from coming into contact with live electrical parts:~~
"guard electrical equipment to prevent your employees from electrical hazards."
- Second bullet: Numbered (1) and incorporated this bullet into the second sub-bullet under the first bullet that reads:

"By location in a room, vault, or similar enclosure that is accessible only to employees qualified to work on the equipment. Entrances to rooms and other guarded locations containing exposed live parts must be marked with conspicuous warning signs forbidding unqualified persons to enter."

- Third bullet: Numbered (3) that reads:
"In locations where electric equipment would be exposed to physical damage, enclosures or guards shall be so arranged and of such strength as to prevent such damage."
- Fifth bullet: Numbered (2).

WAC 296-800-28040 Make sure electrical equipment is effectively grounded.

- The title now reads:
~~"You must make sure electrical equipment is effectively grounded"~~
"Make sure electrical equipment is effectively grounded."
- Note: Note now reads:
~~"An approved system of double insulation can be used instead of grounding listed or labeled portable tools and appliances. If such a system is used, the equipment must be distinctly marked. Grounding can be achieved by: Using tools and appliances equipped with an equipment grounding conductor (three-pronged plug and grounded electrical system)."~~

WAC 296-800-28045 Make sure electrical equipment has overcurrent protection.

- Seventh bullet: Deleted the words "that to."

WAC 296-800-290 Portable ladders: Metal and wooden.

- Clarified language for consistency within the rule (matched titles of rules with the summary page).
- Exemption: Added the words "other special ladders" to the list.
- Note: Add a note that reads:
"For design and construction requirements for wood and metal ladders, see WAC 296-24-780 and 296-24-79503 of the General safety and health standard."

WAC 296-800-29005 Inspect your portable metal ladders periodically.

- First and second bullet now reads:
 - "Immediately inspect a ~~portable metal~~ ladder if it ~~tips over~~ look at:
 - Tips over.
 - Is exposed to oil or grease.
 - Is exposed to excessive as in the case of fire.
 - Is subjected to certain acids or alkali solutions.~~The rails for dents, bends or dented rungs.~~
~~All the rungs to side rail connections.~~
~~The hardware connections.~~
~~Rivets for shear damage.~~
- If it tips over, look at:
 - The rails for dents, bends or dented rungs.
 - All the rungs to side rail connections.
 - The hardware connections.
 - Rivets for shear damage."

WAC 296-800-29010 Make sure your portable metal ladders are kept in good condition.

- Fourth bullet now reads:
"Properly support your ladder while transporting on vehicles. To prevent chafing and the effects of road shock, use supports that are made of material softer than the metal ladder, such as hard wood or rubber-covered iron pipe. ~~Tying the ladder to each support point will greatly reduce damage due to road shock.~~"
- Note: Second bullet in the note was moved to the summary page of this rule.

WAC 296-800-29015 Use your portable metal ladders safely.

- First bullet now reads:
"(1) Use metal ladders only for their intended purpose.
~~Make sure a non-self supporting portable ladder is set at a safe angle at 75 1/2 degrees, for maximum balance and strength.~~"
- Second bullet: Numbered (2).
- Third bullet: Numbered (3).
- Fourth bullet: Numbered (4).
- Fifth bullet: Numbered (5).
- Sixth bullet now reads:
"(6) Make sure a nonself-supporting ladder is set at a safe angle. of 75 1/2 degrees, for maximum balance and strength. The proper angle is to place the base a distance from the vertical wall equal to one-fourth the working length of the ladder."

WAC 296-800-29025 Make sure your portable wooden ladders are kept in good condition.

- First bullet: Added a sub-bullet that reads:

"Safety feet and other auxiliary equipment are kept in good condition."

- Third bullet: Deleted this bullet.
"~~Make sure that where the top of the ladder rests is reasonably rigid and strong enough to support the load.~~"
- Fourth bullet: Deleted this bullet.
"~~Make sure safety feet and other auxiliary equipment are kept in good condition.~~"

WAC 296-800-29030 Use your portable wooden ladders safely and for their intended purpose.

- This section now reads:
 - "(1) Use the appropriate length of ladder."
 - Use single ladders less than or equal to 30 feet long.
 - Use 2-section extension ladders less than or equal to 60 feet long.
 - (2) Make sure ladders meet the following rules:
 - Shorter sections can not be spliced to make longer sections.
 - Ladders can be made by fastening cleats across a single rail.
 - (3) Use ladders safely.
 - Make sure ladders are not used as guys, braces, or skids.
 - Putting ladders on boxes, barrels or other unstable to make the ladder taller is not allowed.
 - Make sure ladders are not used in a horizontal position.
 - (4) Make sure that rung and cleat ladders are set up at a safe angle. (See note and illustration on Safe Ladder Angle in WAC 296-800-29015.)
 - (5) Make sure that where the top of the ladder rests is reasonably rigid and strong enough to support the load.
 - (6) Place the bottom of a portable wooden ladder so it will not slip, or the bottom must be tied or held in position.
 - (7) Not place a portable wooden ladder in front of doors that open towards the ladder, UNLESS you:
 - Block the door open, or
 - Lock the door, or
 - Guard the door to keep it from opening into the ladder

(8) Make sure 2-section extension ladders overlap as follows:

<u>Length of section of extension ladders (feet)</u>	<u>Minimum overlap allowed (feet)</u>
<u>Less than 36</u>	<u>3</u>
<u>37-48</u>	<u>4</u>
<u>49-60</u>	<u>5</u>

(9) Make sure ladders with metal reinforced rails are used with the reinforcement on the under side to avoid hazards such as tripping and electrocution.

(10) Not place ladders in elevator shafts and hoistways, except where used by workers assigned to that type of work.

- Employees must be protected from falling objects, when assigned to work on ladders in elevator shafts and hoistways

(11) Not support more than one section of plank per ladder rung.

PERMANENT

- Do not allow more than 2 persons on one section of planking at a time.

(12) Brace the ladder to reduce the spring caused by weight on the ladder.

(13) Keep shoes free and clean of greasy and slippery substances when climbing.

(14) Have both hands free to hold on to the ladder when climbing."

- ~~Not use single ladders more than thirty feet long.~~
- ~~Not use two-section extension ladders more than sixty feet long.~~
- ~~Not:~~
- ~~Splice shorter sections together to make longer sections.~~
- ~~Use ladders as guys, braces or skids.~~
- ~~Place ladders on boxes, barrels or other unstable bases to make the ladder taller.~~
- ~~Use ladders in a horizontal position.~~
- ~~Make ladders by fastening cleats across a single rail.~~

~~Make sure that rung and cleat ladders are set up at a safe angle. (See note and illustration on safe ladder angle in WAC 296-800-29015.)~~

WAC 296-800-29035 When climbing portable wooden ladders safely.

- This section was deleted and incorporated into 296-800-29030.

~~"You must:~~

- ~~Keep shoes free and clean of greasy and slippery substances.~~
- ~~Have both hands free to hold on to the ladder.~~
- ~~Make available separate portable wooden ladders for climbing up and climbing down, when there is heavy traffic on a ladder in building construction of more than two stories in height."~~

WAC 296-800-2903540 Safely use a portable wooden ladder when working more than 25 feet above the ground.

- Moved this section to WAC 296-800-29035.
- First bullet: Numbered (1)
- Second bullet: Numbered (2)
- Third bullet: Numbered (3)
- Incorporated bullets four through twelve into WAC 296-800-29030.
- ~~Place the bottom of a portable wooden ladder so it will not slip, or the bottom must be tied or held in position.~~
- ~~Not place a portable wooden ladder in front of doors that open towards the ladder, UNLESS:~~
 - ~~You block the door open or~~
 - ~~You lock the door or~~
 - ~~You guard the door to keep it from opening into the ladder~~
- ~~Make sure 2-section extension ladders overlap as follows:~~

Length of section of extension ladders (feet)	Minimum overlap allowed (feet)
Less than 36	3
37-48	4
49-60	6

- ~~Make sure ladders with metal reinforced rails are used with the reinforcement on the under side to avoid hazards such as tripping and electrocution.~~
- ~~Not place ladders in elevator shafts and hoistways, except where used by workers assigned to that type of work.~~
- ~~Employees must be protected from falling objects, when assigned to work on ladders in elevator shafts and hoistways~~
- ~~Not support more than 1 section of plank per ladder rung.~~
- ~~Do not allow more than 2 persons on 1 section of planking at a time.~~
- ~~Brace the ladder to reduce the spring caused by weight on the ladder.~~
- ~~Have a center rail and sides that are plainly marked as "up" and "down" if you use 1 broad ladder.~~
- ~~Not perform work requiring eye protection, respirators, and/or pressure equipment if over 30 feet above the ground."~~

WAC 296-800-290405 Use wooden stepladders safely.

- The title of this section reads:
- "Use wooden stepladders safely."
- Moved this section to WAC 296-800-29040.

WAC 296-800-300 Portable fire extinguishers.

- Clarified language for consistency within the rule (matched titles of rules with the summary page).
- Note: Deleted proposed language in note and replace with:

Important:

"The following WISHA rule applies to the placement, use, maintenance, and testing of portable fire extinguishers provided for the use of employees. Your local fire marshal also enforces fire codes which address fire safety that are more comprehensive and may go beyond WISHA rules.

Note: The introduction has important information about building, electrical and fire codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to building, fire, and electrical codes" in the introduction section of this book."

- Modified exemption that reads:
- "Exemptions:
 - You are exempt from the requirements of portable fire extinguishers if you have the following:
 - You have:
 - A written fire safety policy that requires the immediate and total evacuation of employees from the workplace when there is a fire alarm signal,
 - AND
 - An emergency action plan and a fire prevention plan which meet the requirements of WAC 296-24-567
 - AND
 - Portable fire extinguishers in your workplace that are not accessible for employee use.
 - If another WISHA rule requires portable fire extinguishers, then you must comply with these requirements.

PERMANENT

Where extinguishers are provided but are not intended for employee use and you have an emergency action plan and a fire prevention plan (which meet the requirements of WAC 296-24-567), then only the requirements of WAC 296-800-30020 apply."

WAC 296-800-30005 Provide portable fire extinguishers in your workplace.

- First bullet: Numbered (1).
- Second bullet: Numbered (2)
- Third bullet: Incorporated into numbered (1) and reads:
 - "Make sure that your portable fire extinguisher does not use extinguishing agents such as carbon tetrachloride or chlorobromomethane extinguishing agents. In addition, soda-acid foam, loaded stream, anti-freeze and water extinguishers of the inverting type shall not be recharged or placed into service."
 - ~~Make sure that your portable fire extinguisher does not use tetrachloride or chlorobromomethane extinguishing agents."~~

WAC 296-800-30010 Select and distribute portable fire extinguishers in your workplace.

- Modified exemption that reads:

Exemption:

- This does not apply to the portable fire extinguishers provided for employees to use outside of workplace buildings or structures.
- You are exempt from the distribution requirements of this rule if you have an emergency action plan (that meets requirements of WAC 296-24-567):
 - Which designates certain employees to be the only employees authorized to use the available portable fire extinguishers; and
 - Requires all other employees in the fire area to immediately evacuate the affected work area upon the sounding of the fire alarm
- First bullet: Added the words "you must."
- Table: Added a title to the table, it reads: "Fire Extinguisher Distance Table."
- Table: Added a note that reads: "You may choose to use a smaller fire extinguisher in lieu of that required for the 50 foot distance. If you do choose to have the smaller fire extinguisher the travel distance must not be greater than 30 feet. See UFC Standard 10 Chapter 3 for the basic minimum extinguisher rating allowed."

WAC 296-800-30015 Make sure that portable fire extinguishers are kept fully charged, in operable condition, and left in their designated places.

- Added a bullet that reads:

"Make sure that fire extinguishers found with deficiencies are removed from service and replaced with a suitable fire extinguisher."

WAC 296-800-30020 Inspect and test all portable fire extinguishers.

- Deleted second subbullet that reads:

"Make records of inspections available to the director of the department of labor and industries if requested."

- First bullet-second subbullet: Changed to an exemption that reads:

"Exemption: Most stored pressure extinguishers do not require an internal examination. Examples of those that do require an internal examination are those containing a loaded stream agent."

~~"Stored pressure extinguishers do not require an internal examination."~~

- Added an exemption that reads:

"Exemptions: Dry chemical extinguishers that have non-refillable disposable containers are exempt from this requirement. Manually pressurized pumptanks are exempt from this requirement."

- Fourth bullet - second subbullet: Added a title to the table that reads: "the Hydrostatic Test Table."
- Sixth bullet: Replace the word "requirements" with "rules regarding" and replace the word "director" with "department."
- Last bullet became an exemption that read:

~~"Dry chemical extinguishers that have non-refillable disposable containers are exempt from requirement."~~
- Titled the table "Hydrostatic Test Table."
- Added a note after the hydrostatic test table that reads:

"Note: Stored pressure water extinguishers with fiber glass shell (pre-1976) are prohibited from hydrostatic testing due to manufacturer's recall."

WAC 296-800-30025 Train your employees to use portable fire extinguishers.

- This section now reads:

"You must:

- Train your employees where you have provided portable fire extinguisher for their use in:
 - The hazards involved with incipient stage fire fighting (the early stage of a fire when it can be extinguished by a portable fire extinguisher)
 - The general principles of fire extinguisher use
- Provide the training when they are first hired and then annually.

WAC 296-800-310 Exit routes and employee alarm systems.

- Clarified language for consistency within the rule (matched titles of rules with the summary page).
- Added a note that reads:

"Note: The introduction has important information about building, electrical and fire codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to building, fire, and electrical codes" in the introduction section of this book."

- Deleted note:

~~"Fire safety codes for cities and counties in the state of Washington may be more restrictive than the rules in this section. Call your local fire department for more information about the fire safety codes in your area."~~

WAC 296-800-31005 Provide an adequate number of exit routes.

- First bullet: Added parenthesis.

WAC 296-800-31010 Make sure that exit routes are large enough.

- Third bullet: Incorporated this language from WAC 296-800-31015 into this section that reads:
 - Make sure an exit route is at least 6 feet 8 inches high at all points.
 - Make sure objects that stick out into the exit route, such as fans hanging from the ceiling or cabinets on walls, do not reduce the minimum height and width of the exit route.
 - Make sure exit routes are at least 28 inches wide at all points between any handrails.
 - If necessary, routes must be wider than 28 inches to accommodate the expected occupant load.

WAC 296-800-31015 Make sure that exit routes meet their specific design and construction requirements.

- Third bullet: Added the words "through a fire wall."
- Sixth bullet was incorporated into WAC 296-800-31010:
 - ~~Make sure an exit route is at least 6 feet 8 inches high at all points.~~
~~Make sure objects that stick out into the exit route, such as fans hanging from the ceiling or cabinets on walls, do not reduce the minimum height and width of the exit route.~~
 - ~~Make sure exit routes are at least 28 inches wide at all points between any handrails.~~
~~If necessary, routes must be wider than 28 inches to accommodate the expected occupant load.~~
- Sixth bullet: Incorporated from WAC 296-800-31025 that reads:

"Make sure employees are provided with stairs or a ramp, if the exit route is not substantially level."

WAC 296-800-31025 Provide unobstructed access to exit routes.

- First bullet: Numbered (1).
- Second bullet: Numbered (2).
- Third bullet was incorporated into WAC 296-800-31015 that read:
 - ~~"Make sure employees use stairs or a ramp if the exit route is not substantially level."~~

WAC 296-800-31040 Provide outdoor exit routes that meet requirements.

- First bullet: Deleted the words "to these requirements."

WAC 296-800-31045 Minimize danger to employees while they are using emergency exit routes.

- Third bullet: Deleted the words "Exit routes must."

WAC 296-800-31050 Mark exits adequately.

- Fourth bullet: Added the words "and clearly indicated the direction of travel."
- Fifth bullet: Replace language with:
 - "Not obstruct or conceal exit signs in anyway."
 - ~~"Make sure decorations, furnishings, or equipment do not obscure or cover up the exit sign."~~

WAC 296-800-31067 Provide doors, in freezer or refrigerated rooms that open from the inside.

- Title: Added the word "the" to the title. It reads:
 - "Provide doors, in freezer or refrigerated rooms that open from the inside."

WAC 296-800-31070 Install and maintain an appropriate employee alarm system.

- Title: Replaced the word "operable" with "appropriate." It reads:
 - "Install and maintain an ~~operable~~ appropriate employee alarm system."
- Third bullet - Sixth dash: Replaced the word "alerting" with "Able to alert."
- Third bullet - Tenth dash: This now reads,
 - ~~"Having a distinctive signal to warn~~ Warning employees of fire or other emergencies, with a distinctive signal if they are not able to see or smell a fire or other hazard."
- Third bullet - Eleventh dash: Deleted the word "Have."
- Third bullet - Twelfth dash: Replaced "Use" with "Using."
- Third bullet - Thirteenth dash: Replaced "Have" with "Supplied with."
- Third bullet - Fourteenth dash: Deleted the word "Are."
- Third bullet - Fifteenth dash: Replace the word "Have" with "supplied with a."

WAC 296-800-320 Accident reporting and investigating.

- Clarified language for consistency within the rule (matched titles of rules with the summary page).
- Note now reads:
 - ~~"After handling medical emergencies,~~ Call the nearest office of the department of labor and industries at 1-800-4BE-SAFE or call OSHA (Occupational Safety and Health Administration) at 1-800-321-6742, to report the incident death, probable death of any employee or the in-patient hospitalization of 2 or more employees within 8 hours, after handling medical emergencies."

WAC 296-800-32005 Report the death, ~~or~~ probable death of any employee, or in-patient hospitalization of 2 or more employees within 8 hours.

- This section was proposed as WAC 296-800-32010.
- Deleted "Report the death or probable death of any employee, or the in-patient hospitalization of 2 or more employees with 8 hours."
- First bullet: Add the words "at 1-800-4BE SAFE (24 hours)." Replace the words "you can make a report to" with "contact." Deleted "(24 hours)."
- First bullet - Third dash: Replaced the words "sent to the" with "admitted to the."

WAC 296-800-32010 Make sure that any equipment involved in an accident is not moved.

- This section was proposed as WAC 296-800-32005.

WAC 296-800-32020 Conduct ~~the~~ a preliminary investigation for all serious injuries.

- Title now reads:
 - ~~"Assign people to~~ Conduct a preliminary investigation for all serious injuries."
- First bullet now reads:
 - "Make sure your preliminary investigation is conducted to evaluate the facts relating to the cause of the incident by the following people:"
- First bullet - Fifth dash reads:
 - ~~"Any other person who has the experience and skills to evaluate the facts relating to the cause of the incident."~~

- This section now has the requirements from WAC 296-800-32025.

WAC 296-800-32025 Conduct a preliminary investigation.

- This section was incorporated into WAC 296-800-32020. This section now has the title and requirements from WAC 296-800-32030.

WAC 296-800-32030 Document investigation findings.

- This section was moved to WAC 296-800-32025. This WAC number is deleted.

WAC 296-800-330 Releasing accident investigation reports.

- Grammatical errors corrected.

WAC 296-800-350 WISHA appeals, penalties, and other procedural rules.

- WAC 296-800-350 through 296-800-35084 were reorganized and reads as follows:

"Your Responsibility:

This section describes actions WISHA takes during or after inspections, and your related obligation and rights. You must follow posting requirements and notify your employees of the information listed in these rules, as indicated.

You must:

WISHA INSPECTIONS AND CITATIONS**WAC 296-800-35002 Types of workplace inspections.**

- WISHA conducts the following types of inspections:
 - **Programmed inspections of hazardous workplaces.** WISHA identifies hazardous workplaces using objective criteria and inspection-scheduling systems that may look at any of the following factors:
 - Type of industry
 - Available data of injuries and illnesses where an inspection might eliminate the hazards causing them
 - Employer's industrial insurance experience
 - Number, type, and toxicity of contaminants in the workplace
 - Degree of exposure to hazards
 - Number of employees exposed
 - Other factors, such as history of employee complaints

WISHA periodically reviews the scheduling systems and may adjust the factors used and/or the weight given to each factor
 - **Routine programmed inspections** in the following high hazard industries:
 - Agriculture
 - Asbestos renovation and demolition
 - Construction
 - Electrical utilities and communications
 - Logging
 - Maritime
 - **Unprogrammed inspections** of workplaces that may be in violation of WISHA safety or health rules or chapter 49.17 RCW, the Washington Industrial Safety and Health Act. Unprogrammed inspections may result because of:
 - Complaints from employees, former employees, or employee representatives who believe they have been exposed to a hazard because of a violation
 - Referrals from anyone who reasonably believes that workers under WISHA jurisdiction are being or have been exposed to a hazard because of a violation
 - **Workplace deaths and serious injuries or illnesses investigations** to determine if they were caused by a violation of safety and health rules or chapter 49.17 RCW, the Washington Industrial Safety and Health Act. WISHA may also initiate comprehensive inspections based on such investigations
 - **Imminent danger of serious injury or death inspections** when there is a reason to believe that employees may be in imminent danger of serious injury or death
 - **Follow-up inspections** at later dates to verify that you have corrected any hazards identified in a citation

WAC 296-800-35004 Scheduling inspections.

- WISHA distributes staff performing inspections as efficiently as possible to ensure maximum protection for workers.

WAC 296-800-35006 Inspection techniques.

- During an inspection, WISHA staff may:
 - Take samples, photographs, videotapes, or audiotapes
 - Conduct tests
 - Ask employees to wear sampling devices
 - Conduct interviews
 - Privately question, on or off the worksite, any:
 - Employer
 - Employer representative
 - Owner
 - Operator
 - Employee
 - Employee representative
 - Employ any other reasonable investigative techniques

WAC 296-800-35008 Response to complaints submitted by employees or their representatives.

- When an employee or their representative has filed a complaint, WISHA will:
 - Remove the name of the person submitting the complaint and the names of any employees identified in the complaint before giving a copy of the complaint to an employer, unless the person filing the complaint gives WISHA written permission to release the names involved
 - Give a copy of the citation and notice to the employee (or their representative) who submitted the complaint, or explain to them why an inspection was not conducted
 - Review any department decision refusing to inspect or cite violations alleged in a complaint, if requested in writing
 - Notify the person in writing of the review results. If the person requesting the review is not satisfied with the results, they may request a second review by the department

WAC 296-800-35010 Citations mailed after an inspection.

- After an inspection or an investigation, WISHA will mail a citation to you within 6 months following the inspection or investigation
- The citation will include
 - A description of any violations found
 - The amount and type of assessed penalties
 - The length of time given to correct the violations
- If no violations are found, WISHA will normally send you a citation and notice indicating that no violations were found

Note:

- Copies of WISHA Safety and Health Inspection Reports can be requested. The request should be mailed to:

DEPARTMENT OF LABOR AND INDUSTRIES
PUBLIC DISCLOSURE UNIT
BOX 44632
OLYMPIA WA 98504-4632

- You can also contact your local Labor and Industries field office for information on requesting copies of inspection reports (see the resources section of this book).

WAC 296-800-35012 Employees (or their representatives) can request a citation and notice.

- Employees or their representatives may request copies of citation and notices issued to the employer
- Complete the Request for Copy of Citation and Notice form, and mail it to:
 DEPARTMENT OF LABOR AND INDUSTRIES
 STANDARDS AND INFORMATION
 BOX 44638
 OLYMPIA WA 98504-4638

Note:

To obtain a copy of the Request for copy of Citation and Notice form, call 360-902-5534, or contact your local Labor and Industries office (see the Resources section for a complete list of the offices).

- If you submit this form, you will receive all citation and notices issued to that employer for the next 12 months.
- When the department approves the request for a copy of a citation and notice, WISHA will indicate the date the application is approved, and the date it expires. Once approved, your application is valid for one year. Once expired, a one-year extension may be requested.
- You can waive the one-year period when you make your initial request.
- If more than one employee representative requests a copy of the same citation and notice, the department may decide which person will receive the copy of the citation and notice.

Note: The department can deny requests for copies of citation and notices if the person filing the request is not an employee representative.

WAC 296-800-35016 Posting a citation and notice & employee complaint information.

You must:

- Immediately notify your employees of a citation and notice by posting them and/or any correspondence related to an employee complaint on the safety bulletin board for 3 working days, or until all violations have been corrected, whichever is longer.
- Use any other appropriate means to notify employees who cannot receive notices posed on the safety bulletin board; for example, a copy to authorized employee representatives or the safety committee, or copies sent electronically.

CIVIL PENALTIES FOR VIOLATING WISHA REQUIREMENTS

WAC 296-800-35018 Reasons to assess civil penalties.

- WISHA may assess civil penalties when a citation and notice is issued for any violation of health and safety rules, or statutes found during an inspection.
- WISHA will assess civil penalties:
 - When a citation for a serious violation is issued.
 - Under other circumstances specified by statute (such as RCW 49.17.180, 49.26.016, 49.17.177, 49.70.190).

- Civil penalties promote compliance, encouraging employers to correct violations before an inspection takes place and avoiding the risk of receiving a penalty assessment. Civil penalties help promote a level playing field for employers complying with the rules by assessing penalties for those who do not comply.

WAC 296-800-35020 Minimum penalties.

- The minimum penalty amounts assessed by WISHA are:
 - \$100 for any penalty
 - \$5,000 per violation for all willful violations

HOW CIVIL PENALTIES ARE CALCULATED

WAC 296-800-35022 Base penalty calculations—Severity and probability.

- Except for specific penalty amounts that are dictated by statute, WISHA calculates the base civil penalty for a violation by evaluating:
 - The severity of the injury, illness, or disease that could result from the alleged hazard
 - The probability that an injury, illness, or disease could occur as a result of the alleged hazard

WAC 296-800-35024 Severity rate determination.

- Severity describes how serious an injury, illness, or disease might be because of a hazardous condition. Severity ratings are based on the most serious injury, illness, or disease that could be reasonably expected to occur because of a hazardous condition (see Table 1).
- Severity ratings are expressed in whole numbers and range from 1 (lowest) to 6 (highest). A violation with a severity rating of 4, 5, or 6 is considered to be a serious violation.

Table 1: Severity Ratings

Severity	Most serious injury, illness, or disease likely to result in:
6	Death from injury, illness or disease; injuries involving permanent severe disability; chronic, irreversible illness.
5	Permanent disability of a limited or less severe nature, injuries or reversible illnesses resulting in hospitalization.
4	Injuries or temporary, reversible illnesses resulting in serious physical harm (but less than 5 or 6 above) and may require removal from exposure or supportive treatment without hospitalization for recovery.
3	Injuries or illness would probably not cause death or serious physical harm, but violations have at least major impact and an indirect relationship to serious injury, illness or disease. Violations could have direct and immediate relationship to safety and health of employees. No need for medical treatment beyond first aid.

PERMANENT

- 2 Nonserious or general violations of minor impact, including violations that have an indirect relationship to nonserious injury, illness or disease. No injury, illness or disease without additional violations.

- 1 No injury, and not likely to result in injury in the presence of other violations.

WAC 296-800-35026 Probability rate determination.

- Probability refers to the likelihood of an injury, illness or disease occurring, and is expressed in whole numbers ranging from 1 (lowest) to 6 (highest). Probability does not change severity.
- When determining probability, WISHA considers the number of employees affected and other factors, depending on the situation. Other factors may include
 - Frequency of employee exposure
 - Instances (number of times the same violation occurs in the workplace)
 - How close an employee is to the hazard
 - Weather and other working conditions
 - Employee skill level
 - Employee awareness of the hazard
 - The pace, speed, and nature of the task or work
 - Use of personal protective equipment
 - Amount of exposure (for health violations)
 - Other mitigating or contributing circumstances

WAC 296-800-35028 Determining the gravity of a violation.

- WISHA calculates most base penalties by assigning a weight to a violation. This weight is called "gravity." Gravity is calculated by multiplying a violation's severity by its probability. Expressed as a formula, gravity is:

Gravity = Severity x Probability

- Unless a particular rule establishes penalty amounts for specific violations, WISHA uses Table 2 to determine the dollar amount for each base penalty

Table 2: Penalty Amount Using Gravity

Gravity	Base Penalty
1	\$100
2	\$200
3	\$300
4	\$400
5	\$500
6	\$1000
8	\$1500
9	\$2000
10	\$2500
12	\$3000
15	\$3500
16	\$4000
18	\$4500
20	\$5000

24	\$5500
25	\$6000
30	\$6500
36	\$7000

WAC 296-800-35030 Base penalty adjustments.

- WISHA may adjust an employee's base penalty amount because of the employer's good faith effort, size, and compliance history. No adjustments are made to penalty amounts specified by statute

WAC 296-800-35032 Types of base penalty adjustments.

Employer's Good Faith

- An employer's good faith effort (or lack of) may justify increasing or decreasing a base penalty. No single factor determines good faith. Good faith is a reflection of an employer's:
 - Effort before an inspection to provide a safe and healthful workplace for employees
 - Effort to comply with a standard they have violated
 - Cooperation during an inspection that is measured by a desire to comply with the cited standard and immediately correct identified hazards
- WISHA uses Table 3 to adjust base penalty amounts because of good faith effort

Table 3: Good Faith Adjustments

Good Faith Rating	Adjustment to Base Penalty
Excellent	35% reduction
Good	20% reduction
Average	No adjustment
Poor	20% increase

Employer's Work Force Size

- WISHA may adjust base penalties due to the size of an employer's work force in the state of Washington by using Table 4:

Table 4: Size Adjustments

Number of Employees	Adjustment to Base Penalty
1-25	60% reduction
26-100	40% reduction
101-250	20% reduction
More than 250	No adjustment

Employer's Compliance History

- WISHA may adjust a base penalty based on an employer's history of safety and health violations in the state of Washington, using previous citations as well as injury and illness rates (see Table 5).

Table 5: History Adjustments

History Rating	Adjustment to Base Penalty
Good	10% reduction
Average	No adjustment
Poor	10% increase

WAC 296-800-35038 Maximum base penalty amount.

- The maximum penalty for a violation other than repeat, willful, egregious or failure-to-abate is \$7,000.

PERMANENT

WAC 296-800-35040 Reasons for increasing civil penalty amounts.

- WISHA may increase civil penalties by applying a multiplier to an adjusted base penalty. Multipliers may be applied for the following reasons:

Repeat violations:

A repeat violation occurs when WISHA cites an employer more than once in the last 3 years for a substantially similar hazard.

- The 3-year period is measured from the date of the final order for each previous citation

- The adjusted base penalty will be multiplied by the total number of inspections with violations (including the current inspection with a violation) involving similar hazards

- The maximum penalty cannot exceed \$70,000 for each violation

Willful violations:

A willful violation is a voluntary action done either with an intentional disregard of, or plain indifference to, the requirements of the applicable WISHA rule(s):

- For all willful violations, the adjusted base penalty will be multiplied by 10

- All willful violations will receive at least the statutory minimum penalty of \$5,000

- The maximum penalty cannot exceed \$70,000 for each violation

Egregious violations:

An egregious violation may be issued for exceptionally flagrant cases involving willful violations. In these cases, WISHA will issue a separate penalty for each instance of an employer failing to comply with a particular rule

Failure-to-abate violations:

A failure-to-abate violation occurs when an employer who has been cited for a WISHA violation, fails to correct the violation on time (certifying corrected violations is covered in WAC 296-800-35200 through 296-800-35270)

- The maximum penalty cannot exceed \$7,000 for every day the violation is not corrected

- For a general violation with no initial penalty, the minimum failure-to-abate penalty is \$1,000, with a possible adjustment for the employer's effort to comply

- For violations with an initial penalty, WISHA, based on the facts at the time of reinspection:

- Will multiply the adjusted base penalty by 5, but may possibly make adjustments for the employer's effort to comply

- May multiply the adjusted base penalty by the number of days past the correction date if the employer does not make an effort to comply

CERTIFY THAT VIOLATIONS HAVE BEEN ABATED

WAC 296-800-35042 Employers must certify that violations have been abated.

You must:

- Certify within 10 calendar days following the correction date that you have abated each violation, unless the compliance officer indicates in your citation and notice that you have corrected the violations. Include the following:

- Your name and address
- The inspection number your written statement applies to
- The citation and item numbers your written statement applies to
- The date and method you used to abate each violation
- That you informed your affected employees and their representatives that each violation was corrected
- That the information you submitted is accurate
- Your signature or the signature of your authorized representative

WAC 296-800-35044 For willful, repeated, or serious violations, submit additional documentation.

You must:

- Submit additional documentation for each willful or repeated violation supporting that abatement is completed. This documentation may include, but is not limited to:
 - Evidence of the purchase, or repair, of equipment
 - Photographic or video evidence of corrections
 - Other written records
- Submit additional documentation for a serious violation, when required by the citation and notice.

WAC 296-800-35046 Submitting correction action plans.

You must:

- Submit a correction action plan within 25 calendar days from the final order date if the citation and notice requires it. Your plan must:
 - Identify the violation
 - List the steps you will take to correct the violation
 - Include a schedule to complete the steps
 - Describe how employees will be protected until the corrections are completed

Note:

- The department will notify you in writing if there is anything inadequate about your plan and will work out the problems.
- When determining if required documents are submitted on time, the department looks at the postmark date for documents sent by standard mail and the date received by other means, such as personal delivery or fax.

WAC 296-800-35048 Submit progress reports to the department when required.

You must:

- Submit progress reports on the abatement if the citation and notice requires it, and briefly state (a single sentence is normally adequate for each violation):
 - The action taken to abate each violation
 - The date each action was taken

Note:

If progress reports are required, the citation and notice will include:

- The items for which periodic progress reports are required,
- The date when an initial progress report must be submitted (no sooner than 30 calendar days after you submit a correction plan),

PERMANENT

- Whether additional progress reports are required, and
- The date(s) on which additional progress reports must be submitted.

WAC 296-800-35049 WISHA determines the date by which abatement documents must be submitted.

- When determining if required documents are submitted on time, the department looks at:
 - Date of postmark for documents sent by mail
 - Date the department receives the documents, if transmitted by a means other than mail

WAC 296-800-35050 Inform affected employees and their representatives of abatement actions you have taken. You must:

- Post a copy of each abatement action document you submit to the department (or a summary) near the place where the violations occurred, if practical.
- Do the following if posting near the violation site is not practical, such as with a mobile work operation:
 - Post each document (or a summary) in a location that is readily accessible by affected employees and their representatives
 - Take other steps to fully communicate abatement actions to affected employees and their representatives
- Make sure that:
 - Notice is given to your employees and their representatives on or before the date you submit abatement information to the department
 - All abatement documents remain posted for at least 3 working days after they are submitted to the department
 - All posted abatement documents are not altered, defaced, or covered by other materials
- Inform employees and their representatives of their right to examine and copy all abatement documents you submit to the department. If they ask to examine or copy your documents within 3 working days of receiving notice that you submitted them to the department, you have 5 days to comply with their request after receiving it.

WAC 296-800-35052 Tag cited moveable equipment to warn employees of a hazard.

You must:

- Tag cited moveable equipment to warn employees of a hazard if it has not been abated.
 - Attach a warning tag or a copy of the citation to the equipment's operating controls or to the cited component:
 - For hand-held equipment, tag it immediately after you receive a citation
 - For other equipment, tag it before moving it within the worksite or between worksites
- The tag should properly warn employees about the nature of the violation and tells them where the citation is posted (see the helpful tools section for a sample tag that can be used to meet this requirement)
- Make sure that the tag or copy of the citation attached to movable equipment is not altered, defaced, or covered by other materials

- Make sure that the tag or copy of the citation attached to movable equipment remains attached until:

- You have abated the violation and submitted all abatement certification documents required by the department
- You have permanently removed the cited equipment from service
- You no longer have control over the cited equipment
- A final order sets aside the violation

Note:

Chapter 296-155 WAC, Safety standards for construction work and chapter 296-24 WAC, General safety and health standards have information on warning tags. You can use warning tags that meet the requirements in those rules instead of the warning tags required by this rule.

REQUESTING MORE TIME TO COMPLY

WAC 296-800-35056 You can request more time to comply.

- You can request more time to comply if you:
 - Have made a good faith effort to comply with a citation's abatement requirements
 - Have not completed your abatement because of factors beyond your control
- Requests for more time must:
 - Be submitted in writing by you or your representative, and include:
 - The name of your business
 - The address of the workplace(s)
 - Identification of the citation and the abatement date(s) you want extended
 - The new abatement date and length of abatement period you are seeking
 - A description of the actions you have taken to comply with the abatement date(s) in the citation
 - Identification of the factors beyond your control that are preventing you from complying with the abatement date(s)
 - The means you will use to protect your employees during the time you are abating the violation.
 - Be received before midnight of the date you are asking to be extended
- The department may accept late requests if they are:
 - Received within 5 days following the applicable correction date.
 - Accompanied by your written statement explaining the exceptional circumstances that caused the delay.

Note:

The department does not accept late requests when compliance activity related to the abatement starts before the request is received.

- The department accepts requests by:

PERMANENT

- First class mail postage prepaid. Mailed to:
Department of Labor and Industries
WISHA Appeals
P.O. Box 44604
Olympia, WA 98504-4604
- Personal delivery
- Fax: (360) 902-5581

WAC 296-800-35062 WISHA's response to your request for more time.

- Within 5 working days of receiving your request for more time to comply, the assistant director must make a decision to approve or deny it. Before making a decision, the assistant director may conduct an investigation. Once made, the decision remains in effect unless a hearing is requested.
- The assistant director must issue the following 3 notices (which can be combined into one):
 - A notice verifying that your request was received, including the correction dates listed in your citation.
 - A notice of your right to request a hearing on the decision and
 - A notice announcing their decision.
- ◆ These notices must:
 - Be signed by the assistant director,
 - Contain the date they were issued, and
 - Include the address to which a hearing request may be sent.

WAC 296-800-35063 Post the department's response.

You must:

- Post notices with the citation for which you are requesting additional abatement time immediately upon receipt. The notices must remain posted until:
 - The abatement date has passed or
 - A hearing notice is posted.

WAC 296-800-35064 A hearing can be requested about the department's response.

- You, your affected employees or their authorized representative, may request a hearing if they disagree with the department's response to a request for more time to comply.
- All hearing requests must be sent or delivered to the assistant director and be received at the address identified in the notice of your right to request a hearing no later than 10 calendar days after the issue date of the notice.
- Upon receiving a hearing request, the assistant director will issue a notice of hearing to the requesting party and the employer at least 20 days before the hearing date. The hearing notice will:
 - state that all interested parties can participate in the hearing
 - set the time and date, including:
 - ◆ The time, place, and nature of the proceeding
 - ◆ The legal authority and jurisdiction under which the hearing will be held
 - ◆ A reference to the particular sections of the statute and rules involved
 - ◆ A short and clear explanation why a hearing was requested.

- The employer must post the department's hearing notice or a complete copy until the hearing is held. This includes the:
 - Citation containing the correction date for which more time was requested.
 - Department notices issued in response to the employer's request for more time.

WAC 296-800-35065 Post the department's hearing notice. You must:

- Post the department's hearing notice or a complete copy until the hearing is held. This includes the:
 - Citation containing the correction date for which more time was requested
 - Department notices issued in response to the employer's request for more time

WAC 296-800-35066 Hearing procedures.

- The assistant director for WISHA services will appoint someone from the department to act as a hearings officer.
- The hearings officer must be present at, and conduct, the hearing. An assistant attorney general may be present to give legal advice to the hearings officer.
- If the hearings officer requests, the assistant attorney general may conduct the hearing.
- The hearings officer may discuss the material to be presented to determine how the hearing will proceed.
- The hearing must be conducted according to the Administrative Procedure Act recorded. Copies of hearing transcripts will be available to the parties, at cost, upon request.

WAC 296-800-35072 Post the hearing decision.

- After the hearing, the assistant director will issue an order:
 - Affirming or modifying the correction date that caused the hearing
- AND
- Complying with the provisions of the Administrative Procedure Act, chapter 34.05 RCW and the practice and procedure rules, chapter 296-08 WAC.

You must:

- Post a complete, unedited copy of this decision, along with the citation to which it applies, as soon as it is received.

REQUESTING AN APPEAL OF WISHA

CITATIONS AND CORRECTIVE NOTICES

WAC 296-800-35076 Employers and employees can request an appeal of a citation and notice.

EMPLOYER REQUESTS

- Any employer cited for a violation of WISHA safety and health rules may appeal a citation or corrective notice.
- Your request must include:
 - Business name, address, telephone number; and the name, address and telephone number of any person representing you.
 - Citation number.
 - What you think is wrong with the citation or corrective notice and any related facts.

-What you think should be changed, and why.

EMPLOYEE REQUESTS

Any employee or employee representative who could be affected by a citation or its correction may appeal the abatement date in the citation or corrective notice.

Your request must include:

- Your name, address, telephone number, and the name, address and telephone number of any person representing you
- Citation number

- What you think is wrong with the abatement date

All appeal requests must be in writing and submitted to the department within 15 working days after receiving the citation corrective notice. If you mail your request, the postmark is considered the submission date.

All requests must be:

- Mailed to:
Department of Labor and Industries
WISHA Appeals
P.O. Box 44604
Olympia, WA 98504-4606
or
- Faxed to: (360) 902-5581
or
- Brought to any department service location

WAC 296-800-35078 Await the department's response to your appeal request.

When an appeal request is received, the department decides whether to reassume jurisdiction over the citation and notice being appealed or forward the appeal to the Board of Industrial Insurance Appeals. The department will notify the person who submitted the appeal when the department reassumes jurisdiction.

Definition: Reassume jurisdiction means that the department has decided to hear the appeal.

The department may reassume jurisdiction to:

- Provide an employer and affected employees an opportunity to present relevant information, facts, and opinions during an informal conference
- Give an employer, affected employees and the department an opportunity to resolve appeals rapidly and without further contest, especially in routine compliance cases
- Educate employers about the citation and notice, the WISHA appeals process, and WISHA compliance
- Review citations, penalties, and correction dates for fairness and accuracy to ensure quality work by the department

If the department does not reassume jurisdiction, it will send the appeal to the Board of Industrial Insurance Appeals. The board will send the person submitting the appeal a notice with the time and location of any board proceedings.

WAC 296-800-35080 Department actions when reassuming jurisdiction over an appeal.

The department has 30 working days after receipt of the appeal to review it, gather more information and decide whether to make changes to the citation and notice. The 30 working days begin with the first working day after the appeal is received. For example, if an appeal

is received on Friday, the 30 days will begin on the following Monday unless it is a state holiday.

- The department may extend the appeal review period up to an additional 15 working days if everyone involved agrees to the extension.
- During the review period, the department will hold an informal conference about the appeal.

- An informal conference is not an evidentiary hearing. It is an opportunity for interested parties to briefly explain their positions and provide any additional information they would like the department to consider when reviewing the citation and notice.

- Although informal, the conference is an official conference and the department may record all or part of it. The department will tell participants when the conference will be recorded.
- After the review period, the department will issue a corrective notice reflecting any changes made to the citation and notice. This notice will be sent to the employer and any employee representatives participating in the appeal process.

WAC 296-800-35082 Appealing a corrective notice.

- Anyone who can appeal a citation and notice may appeal a corrective notice. All corrective notice appeals must be submitted within 15 working days after the notice was received.

WAC 296-800-35084 Notify employees.

You must:

- Immediately post all correspondence from the department in a conspicuous place after submitting an appeal. This correspondence includes:
 - The notice of appeal
 - The notice explaining that the department reassumed jurisdiction over the citation and notice
 - Any extensions to the review period
 - The notice for an informal conference
 - Corrective notices
- Post all notices and information related to the appeal in the place where WISHA citations and notices are posted (see WAC 296-800-35150). These include:
 - A notice of appeal until the appeal is resolved
 - Notices about the department reassuming jurisdiction and any extension of the review period until the end of review period
 - A notice of an informal conference until after the conference is held
 - Corrective notices for as long as citations and notices must be posted
 - Requesting alternate means of compliance with WISHA rules.

Note: If you wish to develop an alternate means of compliance with WISHA rules, you may do so by following the instructions in WAC 296-350-700 Variances from WISHA rules.

- In certain circumstances, the department allows an employer to vary from a specific WISHA safety and health standard if the employer uses department-approved substitute measures to protect employees. The substitute measure must provide at least the same

protection from work place hazards as provided by the WISHA standard.

WAC 296-800-370 Definitions.

- The following definitions were removed:

Board, correction, label, lighting outlet, safety and health standard, suitable, threshold limit values (TLVs), wet process, willful violation, WISHA poster.

- The following definitions were added:

Abatement date, failure-to-abate, floor hole, floor opening, OSHA, toilet.

- This section now reads:

Note: The first time a defined word is used on a page in the Safety and Health Core Rules it is italicized and bolded.

Abatement date.

The date on the citation when you must comply with specific safety and health standards listed on the citation and notice of assessment or the corrective notice of redetermination.

Acceptable.

The term acceptable used ~~As used~~ in electrical, WAC 296-800-280 means an installation or equipment is acceptable to the director of labor and industries, and approved:

- If it is accepted, or certified, or listed, or labeled, or otherwise determined to be safe by a nationally recognized testing laboratory; or
- With respect to an installation or equipment of a kind which no nationally recognized testing laboratory accepts, certifies, lists, labels, or determines to be safe, if it is inspected or tested by another federal agency, or by a state, municipal, or other local authority responsible for enforcing occupational safety provisions of the National Electrical Code, and found in compliance with the provisions of the National Electrical Code as applied in this section;

OR

- With respect to custom-made equipment or related installations which are designed, fabricated for, and intended for use by a particular customer, if it is determined to be safe for its intended use by its manufacturer on the basis of test data which the employer keeps and makes available for inspection to the director and his/her authorized representatives. Refer to federal regulation 29 C.F.R. 1910.7 for definition of nationally recognized testing laboratory.

Accepted. The term accepted ~~As used~~ in electrical, WAC 296-800-280 means an installation is accepted if it has been inspected and found by a nationally recognized testing laboratory to conform to specified plans or to procedures of applicable codes.

Access. The term access ~~As used~~ in material safety data sheets (MSDSs) as exposure records, WAC 296-800-180 means the right and opportunity to examine and copy exposure records.

Affected employees. ~~Affected employees are~~ Employees exposed to hazards identified as violations in a citation.

Analysis using exposure or medical records.

- An analysis using exposure records or medical records can be any collection of data or a statistical study. It can be based on either:
 - Partial or complete information from individual employee exposure or medical records or
 - Information collected from health insurance claim records
- The analysis is not final until it has been:
 - Reported to the employer or
 - Completed by the person responsible for the analysis

ANSI. This is an acronym for the American National Standards Institute.

Approved. ~~The term approved means:~~

- Approved by the director of the department of labor and industries or their authorized representative, or by an organization that is specifically named in a rule, such as Underwriters' Laboratories (UL), Mine Safety and Health Administration (MSHA), or the National Institute for Occupational Safety and Health (NIOSH).
- As used in Electrical, WAC 296-800-280 means acceptable to the authority enforcing this section. The authority enforcing this section is the director of labor and industries. The definition of acceptable indicates what is acceptable to the director and therefore approved.

Assistant director. ~~Assistant director means~~ The assistant director for the WISHA services division at the department of labor and industries.

ASTM. This is an acronym for American Society for Testing and Materials.

Attachment plug or plug. ~~An attachment plug;~~ Is the attachment at the end of a flexible cord or cable that is part of a piece of electrical equipment. When it is inserted into an outlet or receptacle, it connects the conductors supplying electrical power from the outlet to the flexible cable.

Bare conductor. ~~A bare conductor is~~ A conductor that does not have any covering or insulation.

Bathroom. A room maintained within or on the premises of any place of employment, contained toilets for use by employees.

Board. ~~Board means~~ The board of industrial insurance appeals.

Certification. ~~Certification~~ Refers to an employer's written statement describing when and how a citation violation was corrected.

C.F.R. This is an acronym for Code of Federal Regulations.

Chemical. ~~A chemical is~~ Any element, chemical compound, or mixture of elements and/or compounds.

Chemical manufacturer. An employer with a workplace where one or more chemicals are produced for use or distribution.

Chemical name. The scientific designation of a chemical in accordance with one of the following:

- The nomenclature system developed by the International Union of Pure and Applied Chemistry (IUPAC)

- The Chemical Abstracts Service (CAS) rules of nomenclature

OR

- A name which will clearly identify the chemical for the purpose of conducting a hazard evaluation.

Circuit breaker. ~~A circuit breaker is:~~

- Is a device used to manually open or close a circuit. This device will also open the circuit automatically and without damage to the breaker when a predetermined overcurrent is applied. (600 volts nominal or less)
- Is a switching device capable of making, carrying, and breaking currents under normal circuit conditions, and also making, carrying for a specified time, and breaking currents under specified abnormal circuit conditions, such as those of short circuit. (over 600 volts nominal)

Citation. ~~Citation~~ Refers to the citation and notice issued to an employer for any violation of WISHA safety and health rules. A citation and notice may be referred to as a citation and notice of assessment but is more commonly referred to as a citation.

Combustible liquid. A combustible liquid has a flash-point of at least 100°F (37.8°C) and below 200°F (93.3°C). Mixtures with at least 99% of their components having flash-points of 200°F (93.3°C) or higher are not considered combustible liquids.

Commercial account. ~~A commercial account is~~ An arrangement in which a retail distributor sells hazardous chemical(s) to an employer, generally in large quantities over time, and/or at costs that are below the regular retail price.

Common name. ~~A common name is~~ Any designation or identification such as:

- Code name
- Code number
- Trade name
- Brand name
- Generic name used to identify a chemical other than by its chemical name.

Compressed gas. ~~Compressed gas is~~ A gas or mixture of gases that, when in a container, has have an absolute pressure exceeding:

- 40 psi at 70°F (21.1°C)
- OR
- 104 psi at 130°F (54.4°C) regardless of the pressure at 70°F (21.1°C)

Compressed gas can also mean a liquid with a vapor pressure that exceeds 40 psi at 100°F (37.8°C)

Conductor. ~~A conductor is~~ A wire that transfers electric power.

Container. ~~This term describes~~ Any container, except for pipes or piping systems, that contains a hazardous chemical. It can be any of the following:

- Bag
- Barrel
- Bottle
- Box
- Can
- Cylinder
- Drum

- Reaction vessel
- Storage tank

Correction date. ~~Correction date means~~ The date by which a violation must be corrected. Final orders or extensions that give additional time to make corrections establish correction dates. A correction date established by an order of the board of industrial insurance appeals remains in effect during any court appeal unless the court suspends the date.

Abatement action plans. Refers to your written plans for correcting a WISHA violation.

Corrective notice. ~~Corrective notice~~ Refers to a notice changing a citation and is issued by the department after a citation has been appealed.

Covered conductor. ~~A covered conductor is~~ A conductor that is covered by something else besides electrical insulation.

Damp location. ~~Damp locations are~~ Partially protected areas that are exposed to moderate moisture. Outdoor examples include roofed open porches and marquees. Interior examples include basements and barns.

Department. ~~Department means~~ Those portions of the department of labor and industries responsible for enforcing the Washington Industrial Safety Act (WISHA).

Designated representative. ~~A designated representative is:~~

- Any individual or organization to which an employee gives written authorization.
- A recognized or certified collective bargaining agent without regard to written employee authorization.
- The legal representative of a deceased or legally incapacitated employee.

Director. The director means the director of the department of labor and industries or their designee.

Distributor. A business, other than a chemical manufacturer or importer, that supplies hazardous chemicals to other distributors or to employers. See WAC 296-62-054 for requirements dealing with Manufacturers, Distributors and Importers - Hazard Communication.

Documentation. ~~Documentation means~~ Material that you submit to prove that a correction is completed. Documentation includes, but is not limited to, photographs, receipts for materials and/or labor.

Dry location. ~~Dry locations are~~ Areas not normally subjected to damp or wet conditions. Dry locations may become temporarily damp or wet, such as when constructing a building.

Electrical outlets. ~~Electrical outlets are~~ Places on an electric circuit where power is supplied to equipment through receptacles, sockets, and outlets for attachment plugs.

Employee. The term employee and other terms of like meaning, unless the context of the provision containing such term indicates otherwise, means an employee of an employer who is employed in the business of his or her employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is personal labor for an employer under this standard whether by way of manual labor or otherwise.

PERMANENT

Employee exposure record. ~~An employee exposure record is~~ A record containing any of the following kinds of information:

- Environmental (workplace) monitoring or measuring of a toxic substance or harmful physical agent, including personal, area, grab, wipe, or other form of sampling, as well as related collection and analytical methodologies, calculations, and other background data relevant to interpretation of the results obtained;
- Biological monitoring results which directly assess the absorption of a toxic substance or harmful physical agent by body systems (e.g., the level of a chemical in the blood, urine, breath, hair, fingernails, etc.) but not including results which assess the biological effect of a substance or agent or which assess an employee's use of alcohol or drugs;
- Material safety data sheets indicating that the material may pose a hazard to human health;

OR

- In the absence of the above, a chemical inventory or any other record which reveals where and when used and the identity (e.g., chemical, common or trade name) of a toxic substance or harmful physical agent.

Employer. An employer is any person, firm, corporation, partnership, business trust, legal representative, or other business entity which engages in any business, industry, profession, or activity in this state and employs one or more employees or who contracts with one or more persons, the essence of which is the personal labor of such person or persons and includes the state, counties, cities, and all municipal corporations, public corporations, political subdivisions of the state, and charitable organizations: Provided, That any persons, partnership, or business entity not having employees, and who is covered by the Industrial Insurance Act must be considered both an employer and an employee.

Exit. ~~An exit~~ Provides a way of travel out of the workplace.

Exit route. ~~An exit route is~~ A continuous and unobstructed path of exit travel from any point within a workplace to safety outside.

Explosive. ~~An explosive is~~ A chemical that causes a sudden, almost instant release of pressure, gas, and heat when exposed to a sudden shock, pressure, or high temperature.

Exposed live parts. ~~Exposed live parts are~~ Electrical parts that are:

- Not suitably guarded, isolated, or insulated
- AND
- Capable of being accidentally touched or approached closer than a safe distance.

Exposed wiring methods. ~~Exposed wiring methods~~ Involve working with electrical wires that are attached to surfaces or behind panels designed to allow access to the wires.

Exposure or exposed. ~~The terms exposure and exposed mean that~~ As used in employer chemical hazard communication, WAC 296-800-170, an employee has been, or may have possibly been, subjected to a hazardous chemical, toxic substance or harmful physical agent while working. An employee could have been exposed to hazardous chemicals,

toxic substances, or harmful physical agents in any of the following ways:

- Inhalation
- Ingestion
- Skin contact
- Absorption
- Related means.

The term's exposure and exposed only cover workplace exposure involving a toxic substance or harmful physical agent in the workplace different from typical nonoccupational situations in the way it is:

- Used
- Handled
- Stored
- Generated

OR

- Present

Extension ladder. ~~An extension ladder is~~ A portable ladder with 2 or more sections and is not self-supporting. The 2 or more sections travel in guides or brackets that let you change the length. The size of a portable ladder is determined by adding together the length of each section.

Failure-to-abate. Any violation(s) resulting from you not complying with an abatement date.

Final order. ~~Final order means~~ Any of the following unless an employer or other party files a timely appeal:

- Citation and notice;
- Corrective notice;
- Decision and order from the board of industrial insurance appeals;
- Denial of petition for review from the board of industrial insurance appeals; or
- Decision from a Washington State superior court, court of appeals, or the state supreme court.

Final order date. ~~Final order date means~~ The date a final order is issued.

First aid. ~~First aid means~~ The extent of treatment you would expect from a person trained in basic first aid, using supplies from a first-aid kit. Tests, such as X-rays, must not be confused with treatment. For example, an employee thought he broke his arm and went to the hospital to get X-rays. If the X-rays show no broken bones, they are not considered first aid. On the other hand, if they do show a broken bone, they would be considered medical treatment.

Flammable. ~~Flammable means~~ A chemical covered by one of the following categories:

- Aerosol flammable means an aerosol that, when tested by the method described in 16 C.F.R. 1500.45 yields either a flame projection more than 18 inches at full valve opening or a flashback (a flame extending back to the valve) at any degree of valve opening;
- Gas, flammable means:
 - A gas that, at temperature and pressure of the surrounding area, forms a flammable mixture with air at a concentration of 13% by volume or less; or
 - A gas that, at temperature and pressure of the surrounding area, forms a range of flammable mixtures with air wider than 12% by volume, regardless of the lower limit;

- Liquid, flammable means any liquid having a flashpoint below 100°F (37.8°C), except any mixture having components with flashpoints of 100°F (37.8°C) or higher, the total of which make up 99% or more of the total volume of the mixture.

- Solid, flammable means a solid, other than a blasting agent or explosive as defined in WAC 296-52-417 or 29 C.F.R. 1910.109(a), that is likely to cause fire through friction, moisture absorption, spontaneous chemical change, or retained heat from manufacturing or processing, or which can be ignited readily. Solid, inflammable also means that when the substance is ignited, it burns so powerfully and persistently that it creates a serious hazard. A chemical must be considered to be a flammable solid if, when tested by the method described in 16 C.F.R. 1500.44, it ignites and burns with a self-sustained flame at a rate greater than one-tenth of an inch per second along its major axis.

Flashpoint.

- The minimum temperature at which a liquid gives off a vapor in sufficient concentration to ignite when tested by any of the following measurement methods:

- Tagliabue closed tester: (See American National Standard Method of Test for Flash Point by Tag Closed Tester, Z11.24-1979 (ASTM D 56-79)) for liquids with a viscosity of less than 45 Saybolt Universal Seconds (SUS) at 100°F (37.8°C), that do not contain suspended solids and do not have a tendency to form a surface film under test; or
- Pensky-Martens closed tester: (See American National Standard Method of Test for Flash Point by Pensky-Martens Closed Tester, Z11.7-1979 (ASTM D 93-79)) for liquids with a viscosity equal to or greater than 45 SUS at 100°F (37.8°C), or that contain suspended solids, or that have a tendency to form a surface film under test; or
- Setaflash closed tester: (See American National Standard Method of Test for Flash Point by Setaflash Closed Tester (ASTM D 3278-78).)

Note: Organic peroxides, which undergo auto accelerating thermal decomposition, are excluded from any of the flashpoint measurement methods specified above.

Flexible cords and cables. ~~Flexible cords and cables are~~ Typically used to connect electrical equipment to an outlet or receptacle. These cords can have an attachment plug to connect to a power source or can be permanently wired into the power source. Flexible cords, extension cord, cables and electrical cords are all examples of flexible cord.

Floor hole. An opening in any floor, platform, pavement, or yard that measures at least one inch but less than 12 inches at its smallest dimension and through which materials and tools (but not people) can fall.

Examples of floor holes are:

- Belt holes
- Pipe openings
- Slot openings

Floor opening. An opening in any floor, platform, pavement, or yard that measures at least 12 inches in its smallest dimension and through which a person can fall.

Examples of floor openings are:

- Hatchways
- Stair or ladder openings
- Pits
- Large manholes

The following are NOT considered floor openings:

- Openings occupied by elevators
- Dumbwaiters
- Conveyors
- Machinery
- Containers

Foreseeable emergency. ~~A foreseeable emergency is~~ Any potential event that could result in an uncontrolled release of a hazardous chemical into the workplace. Examples of foreseeable emergencies include equipment failure, rupture of containers, or failure of control equipment.

Ground. ~~A ground~~ As used in electrical, WAC 296-800-280, means a connection between an electrical circuit or equipment and the earth or other conducting body besides the earth. This connection can be intentional or accidental.

Grounded. ~~The term grounded means~~ A connection has been made between an electrical circuit or equipment and the earth or another conducting body besides the earth.

Grounded conductor. ~~A grounded conductor is~~ A system or circuit conductor that is intentionally grounded.

Ground-fault circuit-interrupter. ~~A ground fault circuit interrupter is~~ A device whose function is to interrupt the electric circuit to the load when a fault current to ground exceeds some predetermined value that is less than that required to operate the overcurrent protective device of the supply circuit.

Grounding conductor. ~~A grounding conductor~~ Is used to connect equipment or the grounded circuit of a wiring system to a grounding electrode or electrodes.

Grounding conductor, equipment. ~~An equipment grounding conductor is~~ A conductor used to connect noncurrent-carrying metal parts of equipment, raceways, and other enclosures to the system grounded conductor and/or the grounding electrode conductor at the service equipment or at the source of a separately derived system.

Guarded. ~~The term guarded means~~ Covered, shielded, fenced, enclosed, or otherwise protected by means of suitable covers, casings, barriers, rails, screens, mats, or platforms to remove the likelihood of being accidentally touched or approached closer than a safe distance.

Handrail. ~~A handrail is~~ A single bar or pipe supported on brackets from a wall or partition to provide a continuous handhold for persons using a stair.

Harmful physical agent. ~~A harmful physical agent is~~ Any chemical substance, biological agent (bacteria, virus, fungus, etc.), or physical stress (noise, heat, cold, vibration, repetitive motion, ionizing and nonionizing radiation, hypobaric or hyperbaric pressure, etc.) which:

- Is listed in the latest printed edition of the National Institute for Occupational Safety and Health (NIOSH) Registry of Toxic Effects of Chemical Substances (RTECS) (See Appendix B); or

- Has shown positive evidence of an acute or chronic health hazard in testing conducted by, or known to, the employer; or
- Is the subject of a material safety data sheet kept by or known to the employer showing that the material may pose a hazard to human health.

Hazard. ~~A hazard is~~ Any condition, potential or inherent, which can cause injury, death, or occupational disease.

Hazard warning. ~~A hazard warning~~ Can be a combination of words, pictures, symbols, or combination appearing on a label or other appropriate form of warning which shows the specific physical and health hazard(s), including target organ effects, of the chemical(s) in the container(s).

Note: See definition for physical hazard and health hazard to determine which hazards must be covered.

Hazardous chemical. ~~A hazardous chemical is~~ Any chemical that is a physical or health hazard.

Health hazard. Any chemical with the potential to cause acute or chronic health effects in exposed employees. The potential must be statistically significant based on evidence from at least one study conducted under established scientific principles. Health hazards include:

- Chemicals which are carcinogens
- Toxic or highly toxic agents
- Reproductive toxins
- Irritants
- Corrosives
- Sensitizers
- Hepatotoxins
- Nephrotoxins
- Neurotoxins
- Agents which act on the hematopoietic system
- Agents which damage the lungs, skin, eyes, or mucous membranes

Appendix A See WAC 296-62-054 for provides more definitions and explanations about the scope of health hazards covered by this part.

Appendix B See WAC 296-62-054 for describes the criteria to be used for determining whether or not a chemical is considered hazardous for purposes of this rule.

Hospitalization. ~~Hospitalization means~~ To be sent to, go to, or be admitted to, a hospital or an equivalent medical facility and receive medical treatment beyond first-aid treatment, regardless of the length of stay in the hospital or medical facility.

Identity. ~~Identity means~~ Any chemical or common name listed on the material safety data sheet (MSDS) for the specific chemical. Each identity used must allow cross-references among the:

- Required list of hazardous chemicals
- Chemical label
- MSDSs

Imminent danger violation. ~~Imminent danger violation is~~ Any violation(s) resulting from conditions or practices in any place of employment, which are such that a danger exists which could reasonably be expected to cause death or serious physical harm, immediately or before such danger can be eliminated through the enforcement procedures other-

wise provided by the Washington Industrial Safety and Health Act.

Importer. ~~An importer is~~ The first business within the Customs Territory of the USA that:

- Receives hazardous chemicals produced in other countries

AND

- Supplies them to distributors or employers within the USA

See WAC 296-62-054 for requirements dealing with Manufacturers, Importer and Distributors - Hazard Communication.

Insulated. ~~Insulated means~~ A conductor has been completely covered by a material that is recognized as electrical insulation and is thick enough based on:

- The amount of voltage involved

AND

- The type of covering material

Interim waiver. ~~Interim waiver is~~ An order granted by the department allowing an employer to vary from WISHA requirements until the department decides to grant a permanent or temporary waiver.

Label. A label is displayed or attached to containers of hazardous chemicals. It can be:

- Written
- Printed

OR

- Graphic material

Ladder. ~~A ladder~~ Consists of 2 side rails joined at regular intervals by crosspieces called steps, rungs, or cleats. These steps are used to climb up or down.

Lighting outlet. A lighting outlet is an outlet intended for the direct connection of a lampholder, a lighting fixture, or a pendant cord for a lampholder.

Listed. Equipment is listed if it:

- Is listed in a publication by a nationally recognized laboratory (such as UL, underwriters laboratory) that inspects the production of that type of equipment,

AND

- States the equipment meets nationally recognized standards or has been tested and found safe to use in a specific manner.

Material safety data sheet (MSDS). ~~MSDS is~~ Written or printed material that tells you about the chemical(s), what it can do to and how to protect yourself, others, or the environment. For requirements for developing MSDSs.

Medical treatment. ~~Medical treatment is~~ Treatment provided by a physician or by registered professional personnel under the standing orders of a physician. Medical treatment does not include first-aid treatment even if provided by a physician or registered professional personnel.

Mixture. ~~A mixture means~~ As used in employer chemical hazard communication, WAC 296-800-170, any combination of 2 or more chemicals (if that combination did not result from a chemical reaction).

Movable equipment. As used in WAC 296-800-35052, ~~Movable equipment~~ A hand-held or nonhand-held machine or device;

- That is powered or nonpowered;

AND

- Can be moved within or between worksites

Must. Must means mandatory.

NEMA. These initials stand for National Electrical Manufacturing Association.

NFPA. This is an acronym for National Fire Protection Association.

Nose, nosing. ~~A nose is~~ The portion of the stair tread that projects over the face of the riser below it.

Occupational Safety and Health Administration (OSHA). Passed in 1970 by the U.S. Congress, the OSHA (Occupational Safety and Health) Act provides safety on the job for working men and women. OSHA oversees states (such as Washington) that have elected to administer their own safety and health program. OSHA requires WISHA rules to be at least as effective as OSHA rules.

Office work environment. ~~Office work environment is~~ An indoor or enclosed occupied space where clerical work, administration, or business is carried out.

- In addition, it includes:
 - Other workplace spaces controlled by the employer and used by office workers, such as cafeterias, meeting rooms, and washrooms.
 - Office areas of manufacturing and production facilities, not including process areas.
 - Office areas of businesses such as food and beverage establishments, agricultural operations, construction, commercial trade, services, etc.

Open riser. A stair step with an air space between treads has an open riser.

Organic peroxide. This is an organic compound containing the bivalent-O-O-structure. It may be considered a structural derivative of hydrogen peroxide if one or both of the hydrogen atoms has been replaced by an organic radical.

Outlet. See definition for electrical outlets.

Oxidizer. ~~An oxidizer is~~ A chemical other than a blasting agent or explosive as defined in WAC 296-52-417 or C.F.R. 1910.109(a), that starts or promotes combustion in other materials, causing fire either of itself or through the release of oxygen or other gases.

Permissible exposure limits (PELs). PELs are airborne concentrations of substances measured by their concentration in the air no matter what amount is breathed by the employee. The permissible exposure limits (PELs) must include the following four categories:

- Permissible exposure limits - Time-weighted average (PEL-TWA) is the time weighted average airborne exposure to any 8-hour work shift of a 40-work week and must not be exceeded.
- Permissible exposure limits - Short-term exposure limit (PEL-STEL) is the employee's 15-minute time weighted average exposure which must not be exceeded at any time during a work day unless another time limit is specified in a parenthetical notation below the limit. If another time period is specified, the time weighted average exposure over that time period must not be exceeded at any time during the working day.
- Permissible exposure limits - Ceiling (PEL-C) is the employee's exposure which must not be exceeded dur-

ing any part of the workday. If instantaneous monitoring is not feasible, then the ceiling must be assessed as a 15-minute time weighted average exposure which must not be exceeded at any time over a working day.

- Skin notation is the potential contribution to the overall employee exposure by the cutaneous route including mucous membranes and eye, either by airborne, or more particularly, by direct contact with the substance. These substances are identified as having a skin notation in the OSHA and WISHA PEL tables (29 C.F.R. Part 1910 Subpart Z and WAC 296-62-075, respectively).

Person. ~~See definition for employee. Person means~~ One or more individuals, partnerships, associations, corporations, business trusts, legal representatives, or any organized group of persons. (RCW 49.17.020)

Personal service room. ~~A personal service room is~~ Used for activities not directly connected with a business' production or service function such as:

~~Examples of personal service rooms include:~~

- ~~First-aid rooms~~
- ~~Medical services rooms~~
- ~~Dressing rooms~~
- ~~Showering rooms~~
- ~~Restrooms Bathrooms~~
- ~~Wash rooms Washing~~
- ~~Lunch rooms Eating~~

Personnel. See the definition for employees.

Physical hazard. ~~A physical hazard is~~ A chemical that has scientifically valid evidence to show it is one of the following:

- Combustible liquid
- Compressed gas
- Explosive
- Flammable
- Organic peroxide
- Oxidizer
- Pyrophoric
- Unstable (reactive)
- Water reactive

Platform. Platform means an extended step or landing that breaks a continuous run of stairs.

Plug. See definition for attachment plug.

Potable water. Water that you can safely drink. It meets specific safety standards prescribed by the United States Environmental Protection Agency's National Interim Primary Drinking Water Regulations, published in 40 C.F.R. Part 141, and 40 C.F.R. 147.2400.

Predictable and regular basis. ~~The term predictable and regular basis means~~ Employee functions such as, but not limited to, inspection, service, repair and maintenance which are performed

- At least once every 2 weeks

OR

~~for a total of~~

- 4 man-hours or more during any sequential 4 week period (~~e.g., 2 employees once every 4 weeks for 2 hours = 4 hours per 4 week period~~) (to calculate man

PERMANENT

hours multiply the number of employees by the number of hours during a 4 week period).

Produce. ~~The term produce means~~ As used in employer chemical hazard communication, WAC 296-800-170, any one of the following:

- Manufacture
- Process
- Formulate
- Blend
- Extract
- Generate
- Emit
- Repackage

Purchaser. ~~A purchaser is~~ As used in employer chemical hazard communication, WAC 296-800-170, an employer who buys one or more hazardous chemicals to use in their workplace.

Pyrophoric. A chemical is pyrophoric if it will ignite spontaneously in the air when the temperature is 130°F (54.4°C) or below.

Qualified. A person is qualified if they have one of the following:

- Extensive knowledge, training and experience about the subject matter, work or project
- A recognized degree, certificate, or professional standing
- Successfully demonstrated problem solving skills about the subject, work, or project

Railing or standard railing. ~~A railing, sometimes called standard railing, is the vertical barrier erected along the exposed sides of a stairway and platform to keep people from falling. The top surface of the stair railing is used as a handrail.~~ A vertical barrier erected along exposed edges of a floor opening, wall opening, ramp, platform, or runway to prevent falls of persons.

Reassume jurisdiction. ~~The term reassume jurisdiction means that~~ The department has decided to take back its control over a citation and notice that has been appealed.

Receptacle or receptacle outlet. Outlets that accept a plug to supply electric power to equipment through a cord or cable.

Record. A record is any item, collection, or grouping of information. Examples include:

- Paper document
- Microfiche
- Microfilm
- X-ray film
- ~~Automated data processing~~
- Computer record

Repeat violation. ~~The term repeat violation is when~~ A repeat violation occurs when WISHA cites an employer more than once in the last 3 years for a substantially similar hazard.

Responsible party. ~~A responsible party is~~ As used in employer chemical hazard communication, WAC 296-800-170, someone who can provide appropriate information about the hazardous chemical and emergency procedures.

Rise. ~~The rise of a stairstep is~~ The vertical distance from the top of a tread to the top of the next higher tread.

Riser. ~~A riser of a stairstep is~~ The vertical part of the step at the back of a tread that rises to the front of the tread above.

Rungs. ~~Rungs are the round and oval cross pieces~~ cross pieces on ladders that are used to climb up and down the ladder.

Runway. ~~A runway is~~ An elevated walkway above the surrounding floor or ground level. Examples of runways are footwalks along shafting or walkways between buildings.

Safety factor. The term safety factor means the ratio of when something will break versus the actual working stress or safe load when it is used.

Serious violation. Serious violation must be deemed to exist in a workplace if there is a substantial probability that death or serious physical harm could result from a condition which exists, or from one or more practices, means, methods, operations, or processes which have been adopted or are in use in such workplace, unless the employer did not, and could not with the exercise of reasonable diligence, know of the presence of the violation.

Should. Should means recommended.

Single ladder. ~~A single ladder is~~ A type of portable ladder with one section.

It is distinguished by all of the following:

- It has one section
- It cannot support itself
- Its length cannot be adjusted

Smoking. A person is smoking if they are:

- Lighting up
- Inhaling
- Exhaling
- Carrying a pipe, cigar or cigarette of any kind that is burning

Specific chemical identity. This term applies to chemical substances. It can mean the:

- Chemical name
- Chemical Abstracts Service (CAS) registry number
- Any other information that reveals the precise chemical designation of the substance.

Stair railing. A ~~structure~~ vertical barrier attached to a stairway with an open side to prevent falls. The top surface of the stair railing is used as a handrail.

Stairs or stairway. ~~Stairs or stairways~~ A series of steps and landings:

- Leading from one level or floor to another,
- Leading to platforms, pits, boiler rooms, crossovers, or around machinery, tanks, and other equipment
- Used more or less continuously or routinely by employees, or only occasionally by specific individuals.
- With three or more risers

Standard safeguard. ~~Standard safeguards are~~ Safety devices that prevent hazards by their attachment to:

- Machinery
- Appliances
- Tools
- Buildings
- Equipment

These safeguards must be constructed of:

- Metal
- Wood
- Other suitable materials

The ~~department director of labor and industries~~ makes the final determination about whether a safeguard is sufficient for its use.

Step ladder. ~~A stepladder is~~ A portable ladder with the following qualities:

- Flat steps
- A hinge at the top allowing the ladder to fold out and support itself
- Its length that cannot be adjusted

~~Threshold limit values (TLVs). TLVs refer to airborne concentrations of substances without regard to the use of respiratory protection and represent conditions under which it is believed that nearly all workers may be repeatedly exposed day after day without adverse effect. The TLV includes the TLV Time weighted average (TLV TWA), TLV Short term exposure limit (TLV STEL), TLV Ceiling (TLV Ceiling) and skin notation as stated in the most recent edition of the 'Threshold Limit Values for Chemical Substances and Physical Agents and Biological Exposure Indices' from the American Conference of Governmental Industrial Hygienists (ACGIH).~~

Toeboard. A toeboard is A vertical barrier at floor level erected along exposed edges of a floor opening, wall opening, platform, runway, or ramp to prevent falls of materials.

Toilet. Means a fixture that flushes maintained within a bathroom for the purpose of defecation or urination or both.

Toxic substance. A toxic substance is Any:

- Chemical substance
- Biological agent (such as bacteria, virus, or fungus)
- Physical stress (such as noise, vibration, or repetitive motion)

A substance is toxic if:

- The latest printed edition of the National Institute for Occupational Safety and Health (NIOSH) Registry of Toxic Effects of Chemical Substances (RTECS) lists the substance
- Testing by or known to the employer has shown positive evidence that the substance is an acute or chronic health hazard
- A material safety data sheet kept by or known to the employer shows the material may be a hazard to human health

Trade secret. A trade secret is Any confidential:

- Formula
- Pattern
- Process
- Device
- Information
- Collection of information

The trade secret is used in an employer's business and gives an opportunity to gain an advantage over competitors who do not know or use it.

~~You can find a legal definition of trade secret in See~~ WAC 296-62-053 for requirements dealing with trade secrets. WAC 296-62-05427, Appendix D, provides a legal

~~definition of trade secret. WAC 296-62-05417 sets out criteria to be used in evaluating trade secrets.~~

Tread. A tread is The horizontal part of the stair step.

Tread run. ~~The tread run is~~ The distance from the front of one stair tread to the front of an adjacent tread.

Tread width. ~~The width of a stair tread is~~ The distance from front to rear of the same tread including the nose, if used.

UL (Underwriters' Laboratories, Inc.). You will find these initials on electrical cords and equipment. The initials mean the cord or equipment meets the standards set by the Underwriters' Laboratories, Inc.

Unstable (reactive). As used in employer chemical hazard communication, WAC 296-800-170, an unstable or reactive chemical is one that in its pure state, or as produced or transported, will vigorously polymerize, decompose, condense, or will become self-reactive under conditions of shocks, pressure or temperature.

Urinal. A urinal is A toilet in a men's bathroom that is designed and intended solely for urination.

Use. The term use As used in employer chemical hazard communication, WAC 296-800-170, means to:

- Package
- Handle
- React
- Emit
- Extract
- Generate as a by-product
- Transfer

Voltage of a circuit. ~~The voltage of a circuit is~~ The greatest effective potential difference between any two conductors or between a conductor and ground.

Voltage to ground. ~~The term voltage to grounds means~~ The voltage between a conductor and the point or conductor of the grounded circuit. For undergrounded circuits, it is the greatest voltage between the conductor and any other conductor of the circuit.

Voltage, nominal. Nominal voltage is a value assigned to a circuit or system to designate its voltage class (120/240, 480Y/277, 600, etc.). The actual circuit voltage can vary from the value if it is within a range that permits the equipment to continue operating in a satisfactory manner.

WAC. This is an acronym for Washington Administrative Code, which are rules developed to address state law.

Water-reactive. As used in employer chemical hazard communication, WAC 296-800-170, a water-reactive chemical reacts with water to release a gas that is either flammable or presents a health hazard.

Watertight. ~~A container or enclosure into which moisture cannot enter~~ Constructed so that moisture will not enter the enclosure or container.

Weatherproof. ~~The term weatherproof means that weather will not interfere with the equipment's successful operation. The following types of equipment can fulfill the requirements for waterproof if wetness is not a factor: Rainproof, Raintight, Watertight.~~ Constructed or protected so that exposure to the weather will not interfere with successful operation. Rainproof, raintight, or watertight equipment can

fulfill the requirements for weatherproof where varying weather conditions other than wetness, such as snow, ice, dust, or temperature extremes, are not a factor.

Wet location. ~~Wet locations are:~~

- Underground installations or in concrete slabs or masonry that are in direct contact with the earth
- Locations that can be saturated by water or other liquids
- Unprotected locations exposed to the weather (like vehicle washing areas)

~~**Wet process.** A wet process is any process or operation that takes place in a workroom where surfaces that employees may walk or stand on would normally get wet.~~

~~**Willful violation.** Willful violation is one involving a voluntary action, done either with an intentional disregard of, or plain indifference to, the requirements of the applicable WISHA rule(s) in the Washington Administrative Code (WAC) rule(s).~~

WISHA. This is an acronym for the Washington Industrial Safety and Health Act.

~~**WISHA poster.** The WISHA poster is the job safety and health protection poster. You can order it by requesting form F416-081-000.~~

~~**Workdays.** Workdays mean weekdays that do not fall on state holidays. State holidays include: New Year's Day; Martin Luther King, Jr. Day; Presidents' Day; Memorial Day; Independence Day; Labor Day; Veterans' Day; Thanksgiving Day; and Christmas Day—December 25.~~

Workdays. A calendar day, except Saturdays, Sundays, and legal holidays as set forth in RCW 1.16.050, as now or hereafter amended, and for the purposes of the computation of time within which an act is to be done under the provisions of this chapter, shall be computed by excluding the first working day and including the last working day.

Worker. See the definition for employee.

Workplace.

- The term workplace means:
 - Any plant, yard, premises, room, or other place where an employee or employees are employed for the performance of labor or service over which the employer has the right of access or control, and includes, but is not limited to, all workplaces covered by industrial insurance under Title 51 RCW, as now or hereafter amended.
 - An establishment, job site, or project, at one geographical location containing one or more work areas.
 - ~~The term workplace means~~ As used in employer chemical hazard communication, WAC 296-800-

Note: There are other WISHA rules you may need to comply with. For a complete list of WISHA rules, see the resources section of this book.

Why does workplace safety and health matter to you?

On average, two people lose their lives every week in job-related incidents in Washington state. Each year, more than 250,000 workers' compensation claims are accepted for work-related injuries and illnesses. Medical care and wage replacement for these injured workers costs more than a bil-

180, any plant, yard, premises, room, or other place where an employee or employees are employed for the performance of labor or service over which the employer has the right of access or control, and includes, but is not limited to, all workplaces covered by industrial insurance under Title 51 RCW, as now or hereafter amended. ~~An establishment, job site, or project, at one geographical location containing one or more work areas.~~

~~**You.** You means the employer as defined in RCW 49.17.020. See definition of employer.~~

Your representative. Your representative is the person selected to act in your behalf."

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 305, Amended 223, Repealed 152.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 305, Amended 223, Repealed 152.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 305, Amended 223, Repealed 152.

Effective Date of Rule: September 1, 2001.

Chapter 296-800 WAC

SAFETY AND HEALTH CORE RULES

NEW SECTION

WAC 296-800-100 Introduction. The WISHA Core Rules: Your foundation for a safe and healthful workplace. This book contains 26 basic safety and health rules that affect all employers and should cover almost everything small, nonmanufacturing employers need for a safe and healthful workplace. These core rules include requirements for your Accident Prevention Program, personal protective equipment, first aid, and hazard communication.

lion dollars. The indirect costs of workplace injuries are even larger in terms of lost quality of life, personal financial ruin, operating costs of business, and decreased profitability. Employers and employees who work together to identify and control hazards on the job can save lives and money while improving business and productivity.

PERMANENT

What is L&I and WISHA?

The department of labor and industries (L&I) is a state agency that provides many different services:

- Workplace safety and health, including inspections and enforcement, consultation, technical assistance, training, education and grants. (WISHA)
- Workers' compensation (or industrial insurance), including claims management, rate setting, medical payments, and research.
- Specialty compliance services, including contractor registration, electrical inspections, boiler and elevator inspections, apprenticeship programs and employment standards.

Many of these services are available from L&I's twenty-two regional offices (see the resources section of this book for a list of regional offices).

In 1973, the legislature passed the Washington Industrial Safety and Health Act or WISHA (Revised Code of Washington (chapter 49.17 RCW)). WISHA requires employers to provide safe and healthful workplaces for all employees. It gives L&I the responsibility to establish and enforce workplace safety and health rules.

How does WISHA work?

WISHA covers nearly all employers and employees in Washington, including employees who work for the state, counties, and cities. L&I inspectors enforce WISHA rules by inspecting workplaces without advance notice including investigations of work-related deaths, injuries, and employees' complaints. When WISHA inspectors find a violation in a workplace, they issue a citation to the employer and a penalty may be attached. If you have questions about whether you are covered by WISHA, call 1-800-4BE SAFE (1-800-423-7233) or a local office of L&I.

What is OSHA and its relationship to WISHA?

The U.S. Congress created the Occupational Safety and Health Administration (OSHA) in 1971 to develop and enforce workplace safety and health rules throughout the country. States may choose to run their own safety and health programs as long as they are at least as effective as OSHA. Washington state has chosen to run its own program and most employers in the state, therefore, are subject to enforcement by L&I and not by federal OSHA.

In Washington state, OSHA covers workplaces with federal employees, nonfederal employees working on federal reservations and military bases, employees working on floating worksites (floating dry docks, fishing boats, construction barges), and employees working for tribal employers on tribal lands.

Does WISHA apply to you?

WISHA applies to almost every employer and employee in Washington. WISHA applies to you if:

- You hire someone to work for you as an employee, including workers from a temporary agency.
- You are hired to work for someone as their employee.
- You own your own business or you are a corporate officer and have elected industrial insurance coverage for yourself.
- You have a contract with someone else that primarily involves personal labor, even though you are not required to

pay industrial insurance or unemployment insurance premiums.

- You volunteer your personal labor, or you have volunteers working for you who receive any benefit or compensation.

If you have any questions about your particular situation, call **1-800-4BE SAFE (1-800-423-7233)** or contact your local office of L&I for help. See the resources section of this book for a complete list of L&I offices.

Are there other safety and health rules I need to know about?

In addition to the rules in the WISHA *Safety and Health Core Rules* book, there are other general WISHA rules that may apply to employers, depending upon the industry and workplace activities. See the resources section of this book for a complete list of WISHA rules or go to the website for all the state rules administered by L&I at <http://www.wa.gov/lni/home/wacs.htm>. If you have questions about these rules or would like copies of them, call 1-800-4BE SAFE (1-800-423-7233) or your local office of L&I.

How do the WISHA rules relate to fire, building and electrical codes?

Fire codes: WISHA rules contain basic requirements for portable fire extinguishers, exit routes, housekeeping, storage, stairs and electrical hazards for the protection of employees in your workplace. The rules contained in this book are the most basic requirements to make sure that as an employer you provide a safe and healthy work environment. However, these are not the only rules regarding the requirements for portable fire extinguishers, exit routes, housekeeping, storage, stairs and electrical equipment. The fire marshal and local fire authorities enforce the Uniform Fire Code (UFC). WISHA and UFC differ in some areas, for example UFC requires exit sign lettering to be 6" or more and WISHA only states that the letters have to be clearly visible. Fire codes have more detailed and extensive requirements for the protection of the public than WISHA. Some codes overlap with WISHA requirements.

Building and electrical codes: WISHA rules are minimum requirements regardless of when the building was built or remodeled. Buildings must also comply with building and electrical codes at the time of construction. If you remodel, you must comply with the building and electrical codes applicable at that time. Building authorities and electrical inspection authorities enforce rules from the Uniform Building Code (UBC), and the National Electrical Code (NEC).

You are encouraged to call your local fire, building or electrical authority. For more information on the requirements in your area look in the government section of your phone book. Copies of these codes are available at your local library.

How can WISHA help employers and employees?

Employers can ask WISHA safety and health consultation staff for free, confidential consulting services in your workplace. WISHA safety and health professionals can examine your workplace and make recommendations about how to comply with WISHA rules. If the consultant finds hazards, the employer will be given a reasonable period of time to correct the hazard without citation or penalty.

Sometimes you might have to wait for an appointment because of the demand for these services. You still must provide a safe workplace while you wait for a consultation.

WISHA offers a wide variety of free services:

- Safety and health workshops held in locations throughout the state
- A comprehensive safety and health video lending library
- Safety and health publications geared for both employer and employee
- Website with on-line publications and learning opportunities

Note: By law, WISHA consultants do not have any enforcement authority.

Link: For more information, call 1-800-4BE SAFE (1-800-423-7233) or visit <http://www.wa.gov/lni/home/training.htm>.

EMPLOYER RESPONSIBILITIES: SAFE WORKPLACE

NEW SECTION

WAC 296-800-110 Employer responsibilities: Safe workplace—Summary. Your responsibility: To provide a safe and healthy workplace free from recognized hazards.

- Note:
- Use these rules where there are no specific rules applicable to the particular hazard.
 - Employees may discuss and participate in any WISHA safety and health related practice and may refuse to perform dangerous tasks without fear of discrimination. Discrimination includes: Dismissal, demotion, loss of seniority, denial of a promotion, harassment, etc. (see chapter 296-360 WAC, Discrimination) pursuant to RCW 49.17.160 for a complete description of discrimination and the department's responsibility to protect employees.

You must:

Provide a workplace free from recognized hazards.

WAC 296-800-11005.

Provide and use means to make your workplace safe.

WAC 296-800-11010.

Prohibit employees from entering, or being in, any workplace that is not safe.

WAC 296-800-11015.

Construct your workplace so it is safe.

WAC 296-800-11020.

Prohibit alcohol and narcotics from your workplace.

WAC 296-800-11025.

Prohibit employees from using equipment or materials that do not meet requirements.

WAC 296-800-11030.

Establish, supervise, and enforce rules that lead to a safe and healthy work environment that are effective in practice.

WAC 296-800-11035.

NEW SECTION

WAC 296-800-11005 Provide a workplace free from recognized hazards. You must:

- Provide your employees a workplace free from recognized hazards that are causing, or are likely to cause, serious injury or death.

Note: A hazard is recognized if it is commonly known in the employer's industry or if there is evidence that the employer knew or should have known of the existence of the hazard or if it can be established that any reasonable person would have recognized the hazard.

NEW SECTION

WAC 296-800-11010 Provide and use means to make your workplace safe. You must:

- Provide and use safety devices, safeguards, and use work practices, methods, processes, and means that are reasonably adequate to make your workplace safe.
 - Do not remove, displace, damage, destroy or carry off any safety device, safeguard, notice or warning, furnished for use in any employment or place of employment.
 - Do not interfere with use of any of the above.
 - Do not interfere with the use of any method or process adopted for the protection of any employee.
 - Do everything reasonably necessary to protect the life and safety of your employees.

NEW SECTION

WAC 296-800-11015 Prohibit employees from entering, or being in, any workplace that is not safe. You must:

- Prohibit employees from entering, or being in, any workplace that is not safe.

NEW SECTION

WAC 296-800-11020 Construct your workplace so it is safe. You must:

- Not construct, or cause to be constructed, a workplace that is not safe. This rule applies to employers, owners, and renters of property used as a place of employment.

NEW SECTION

WAC 296-800-11025 Prohibit alcohol and narcotics from your workplace. You must:

- Prohibit alcohol and narcotics from your workplace, except in industries and businesses that produce, distribute, or sell alcohol and narcotic drugs.
- Prohibit employees under the influence of alcohol or narcotics from the worksite.

EXEMPTION: Employees who are taking prescription drugs, as directed by a physician or dentist, are exempt from this section, if the employees are not a danger to themselves or other employees.

NEW SECTION

WAC 296-800-11030 Prohibit employees from using equipment or materials that do not meet the applicable WISHA requirements. You must:

- Prohibit employees from using equipment, materials, tools, or machinery that fails to meet the applicable WISHA requirements, including the rules for specific industries.
- Be responsible for the safe condition of tools and equipment used by employees.

Note: This applies to all equipment, materials, tools, and machinery whether owned by the employer or under control of another firm or individual.

NEW SECTION

WAC 296-800-11035 Establish, supervise, and enforce rules that lead to a safe and healthy work environment that are effective in practice. You must:

- Establish, supervise, and enforce rules that lead to a safe and healthy work environment that are effective in practice.

EMPLOYEE RESPONSIBILITIES

NEW SECTION

WAC 296-800-120 Rule—Employee responsibilities. Employee's responsibility: To play an active role in creating a safe and healthy workplace and comply with all applicable safety and health rules.

Note: Employees may discuss and participate in any WISHA safety and health related practice and may refuse to perform dangerous tasks without fear of discrimination. Discrimination includes: Dismissal, demotion, loss of seniority, denial of a promotion, harassment, etc. (see chapter 296-360 WAC, Discrimination) pursuant to RCW 49.17.160 for a complete description of discrimination and the department's responsibility to protect employees.

NEW SECTION

WAC 296-800-12005 Employee responsibilities. Employees must:

- Study and follow all safe practices that apply to their work.
- Coordinate and cooperate with all other employees in the workplace to try to eliminate on-the-job injuries and illnesses.
- Apply the principles of accident prevention in your daily work and use proper safety devices and protective equipment as required by your employment or employer.
- Take care of all personal protective equipment (PPE) properly.
- Not wear torn or loose clothing while working around machinery.

Note: Things such as clothing, hair, and jewelry can get caught in machinery and be a hazard on the job.

Employees must:

- Report promptly to their supervisor every industrial injury or occupational illness.
- Not remove, displace, damage, or destroy or carry off any safeguard, notice, or warning provided to make the workplace safe.
- Not interfere with use of any safeguard by anyone in the workplace.

- Not interfere with the use of any work practice designed to protect them from injuries.
- Do everything reasonably necessary to protect the life and safety of employees.

SAFETY COMMITTEES AND SAFETY MEETINGS

NEW SECTION

WAC 296-800-130 Safety committees and safety meetings—Summary. Your responsibility: To establish a workplace safety committee/meeting to develop and maintain a safe and healthy workplace for all employees.

You must:

Establish a safety committee or have safety meetings.
WAC 296-800-13005.

Make sure that each meeting includes a discussion of established safety topics.

WAC 296-800-13010.

Make sure that safety committee meeting minutes are recorded and preserved.

WAC 296-800-13015.

NEW SECTION

WAC 296-800-13005 Establish a safety committee or have safety meetings. You must:

If:	Then:
You employ 11 or more employees on the same shift at the same location	You must establish a safety committee
You have 10 or less employees or If you have 11 or more that meet these conditions: • Work on different shifts and 10 or less employees are on each shift or • Work in widely separated locations and 10 or less employees are at each location	You may elect to have a safety meeting instead of a safety committee

Make sure your safety committee:

- Has both employer-selected and employee-elected members.
- The number of employer-selected members must be equal to or less than the number of employee-elected members.
- The term of employee-elected members must be a maximum of one year. This rule does not specify the number of terms a representative can serve.
- If there is an employee-elected member vacancy, a new member must be elected prior to the next scheduled meeting.
- Has an elected chairperson.
- Determines how often the safety committee will meet.

PERMANENT

- Note: • If the committee cannot agree on the frequency of safety meetings, the department of labor and industries' regional safety consultation representative must be consulted for recommendations (see the resource section in this book).
- Note: Employees selected by the employees bargaining representative or union qualify as "employee-elected."

You must:

Make sure your safety committee:

- Determines when and where the safety committee will meet.
 - Meetings cannot exceed one hour, unless extended by a majority vote of the committee.
- Make sure safety meetings:
 - Are held at least once a month; or weekly (or biweekly) if conditions arise that require discussions of safety problems.
 - Be composed of at least one management representative, in addition to the crew/staff.

NEW SECTION

WAC 296-800-13010 Make sure that each meeting includes a discussion of established safety topics. You must:

- At each safety committee or safety meeting:
 - Review safety and health inspection reports to help correct safety hazards.
 - Evaluate the accident investigations conducted since the last meeting to determine if causes of the unsafe situation were identified and corrected.
 - Evaluate the workplace accident and illness prevention program and discuss recommendations for improvement if needed.
- In addition, at each meeting you must:
- Document attendance.
 - Write down subject(s) discussed.

NEW SECTION

WAC 296-800-13015 Make sure that safety committee meeting minutes are recorded and preserved. You must:

- Prepare minutes from each safety committee meeting:
 - Preserve them for one year.
 - Make them available for review by safety and health consultation personnel of the department of labor and industries.

ACCIDENT PREVENTION PROGRAM

NEW SECTION

WAC 296-800-140 Accident prevention program.
Summary.

Your responsibility: To establish, supervise and enforce an accident prevention program (APP) that is effective in practice. (You may call this your total safety and health plan.)

You must:

Develop a formal, written accident prevention program (APP).

WAC 296-800-14005.

Develop, supervise, implement, and enforce safety and health training programs that are effective in practice.

WAC 296-800-14020.

Make sure your accident prevention program (APP) is effective in practice.

WAC 296-800-14025.

NEW SECTION

WAC 296-800-14005 Develop a formal, written accident prevention program. You must:

- Develop a formal accident prevention program that is outlined in writing. The program must be tailored to the needs of your particular workplace or operation and to the types of hazards involved.

Note: The term "accident prevention program" refers to your written plan to prevent accidents, illnesses, and injuries on the job. Your accident prevention program may be known as your safety and health plan, injury prevention program, or by some other name.

You must:

- Make sure your Accident Prevention Program contains at least the following elements:
 - A safety orientation:
 - ◆ A description of your total safety and health program.
 - ◆ On-the-job orientation showing employees what they need to know to perform their initial job assignments safely.
 - ◆ How and when to report on-the-job injuries including instruction about the location of first-aid facilities in your workplace.
 - ◆ How to report unsafe conditions and practices.
 - ◆ The use and care of required personal protective equipment (PPE).
 - ◆ What to do in an emergency, including how to exit the workplace.
 - ◆ Identification of hazardous gases, chemicals, or materials used on-the-job and instruction about the safe use and emergency action to take after accidental exposure.
 - A safety and health committee.
- (WAC 296-800-130.)

NEW SECTION

WAC 296-800-14020 Develop, supervise, implement, and enforce safety and health training programs that are effective in practice. You must:

- Develop, supervise, implement, and enforce training programs to improve the skill, awareness, and competency of all your employees in the field of occupational safety and health.
- Make sure training includes on-the-job instruction to employees prior to their job assignment about hazards such as:
 - Safe use of powered materials-handling equipment, such as forklifts, backhoes, etc.
 - Safe use of machine tool operations.
 - Use of toxic materials.
 - Operation of utility systems.

NEW SECTION

WAC 296-800-14025 Make sure your accident prevention program is effective in practice. You must:
 • Establish, supervise, and enforce your accident prevention program in a manner that is effective in practice.

FIRST-AID SUMMARY

NEW SECTION

WAC 296-800-150 Rule summary. Your responsibility: Make sure first-aid trained personnel are available to provide quick and effective first aid.

You must:

Make sure that first-aid trained personnel are available to provide quick and effective first aid.

WAC 246-800-15005.

Make sure first-aid training contains required subjects.

WAC 296-800-15010.

Keep current and document your first-aid training.

WAC 296-800-15015

Make sure appropriate first-aid supplies are readily available.

WAC 296-800-15020.

Provide a first-aid station when required.

WAC 296-800-15025.

Note: Your workplace may be covered by separate first-aid rules. If you do any of the types of work listed below, you must follow separate industry specific rules:

Industry	Chapter (WAC)
Agriculture	296-307
Compressed air	296-36
Construction	296-155
Fire fighting	296-305
Logging	296-54
Sawmill	296-78
Ship building and repairing	296-304

You can get copies of these rules by calling 1-800-4BE SAFE (1-800-423-7233), or by going to <http://www.lni.wa.gov>.

NEW SECTION

WAC 296-800-15005 Make sure that first-aid trained personnel are available to provide quick and effective first aid. You must:

• Choose one of the following two options to make sure that your employees have access to personnel who are trained in first aid.

Option 1:

Make sure first-aid trained employees are in your workplace to help your employees if they become hurt or ill on the job by doing the following:

– Make sure that:

◆ Each person in charge of employees has first-aid training; or

◆ Another person with first-aid training is present or available to your employees, whenever you have 2 or more employees present.

– Adequately post emergency telephone numbers in your workplace.

Option 2:

Develop and maintain a written first-aid response plan for your workplace. If you choose this option, you must do all of the following:

– Determine how many, if any, employees should be trained in first-aid, based on the following factors:

◆ What type(s) of occupational hazards are present in your workplace?

◆ How likely is it that a workplace injury or illness will occur?

◆ How serious are the occupational hazards in your workplace?

◆ How remote is your workplace?

◆ How complex is your worksite in terms of size, design, etc.?

◆ What medical emergencies have occurred at your workplace in the past?

◆ How far away and how long does it take to get to emergency medical services?

Note: Employers who require their employees to provide first-aid must comply with the bloodborne pathogen rule, WAC 296-62-080.

You must:

• Make sure your first-aid response plan:

– Fits your work location, type of work, and environmental conditions.

– Identifies the available emergency medical services and access numbers and where they are posted.

– Describes the type of first-aid training employees receive, if applicable.

– Identifies the location(s) of first-aid supplies and/or first-aid stations.

– Identifies the contents of first-aid kits.

– Describes how first-aid supplies or kits will be inspected and maintained.

– Describes how injured or ill employees will have access to first-aid trained employees.

NEW SECTION

WAC 296-800-15010 Make sure first-aid training contains required subjects.

Note: Assess your workplace to determine if there are certain job hazards, if the time and distance from emergency medical services indicate a need for training beyond the items listed below.

You must:

• Make sure that every two years, employees are trained in and able to demonstrate their skill and knowledge of the following subject areas:

– Role and responsibilities of the first-aid provider.

– Assessing a scene.

– Performing an initial and ongoing assessment of an injured or ill person.

– Scene safety.

– Body substance isolation/bloodborne pathogens.

PERMANENT

- Performing an emergency move.
- Placing an ill person in the recovery position.
- Opening and maintaining an airway.
- Providing rescue breathing.
- Managing an obstructed airway.
- Performing adult/one-rescuer CPR.
- Recognizing the warning signs and symptoms of medical problems.
- Recognizing and caring for an injured or ill person with decreased levels of responsiveness.
- Controlling external bleeding and recognizing internal bleeding.
- Recognizing and caring for victims of shock.
- Recognizing and stabilizing spinal injury.
- Recognizing and manually stabilizing suspected skeletal injuries.
- Knowledge of voluntary provisions of first aid, consent and confidentiality.

NEW SECTION

WAC 296-800-15015 Document your first-aid training. You must:

- Keep a written record of your employees' first-aid training by keeping rosters, first-aid cards, or certificates. You may store your documentation on a computer, as long as the information is readily available when requested by personnel of the department of labor and industries.

NEW SECTION

WAC 296-800-15020 Make sure appropriate first-aid supplies are readily available. You must:

- Make sure first-aid supplies are readily available.
- Make sure first-aid supplies at your workplace are appropriate to:
 - Your occupational setting.
 - The response time of your emergency medical services.

Note: First-aid kits from your local retailer or safety supplier should be adequate for most nonindustrial employers.

You must:

- Make sure that first-aid supplies are:
 - Easily accessible to all your employees.
 - Stored in containers that protect them from damage, deterioration, or contamination. Containers must be clearly marked, not locked, and may be sealed.
 - Able to be moved to the location of an injured or acutely ill worker.

NEW SECTION

WAC 296-800-15025 Provide a first-aid station when required. You must:

- Provide a first-aid station with at least one first-aid trained employee available if there are fifty or more employees per shift at one location.
- Make sure the first-aid station:
 - Is well marked.
 - Is available to employees during all working hours.

- Is equipped with first-aid supplies that are appropriate for your number of employees, occupational setting, and working conditions.
- Has at least one portable first-aid kit.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

NEW SECTION

WAC 296-800-160 Summary. Your responsibility: To make sure that your employees have, use, and care for the appropriate personal protective equipment (PPE).

What is PPE?: PPE is an item or items used to protect the eyes, face, head, body, arms, hands, legs, and feet such as goggles, helmets, head covers, gloves, rubber slickers, disposable coveralls, safety shoes, protective shields, and barriers.

EXEMPTION: • WAC 296-800-16015, 296-800-16025, 296-800-16030, and 296-800-16035 do not apply to electrical protective equipment or respiratory protection. See chapters 296-24 WAC, Part L, and chapter 296-62 WAC Part E, for rules about these types of protective equipment.

You must:

Do a hazard assessment for PPE.

WAC 296-800-16005.

Document your hazard assessment for PPE.

WAC 296-800-16010.

Select appropriate PPE for your employees.

WAC 296-800-16015.

Provide PPE to your employees.

WAC 296-800-16020.

Train your employees to use PPE.

WAC 296-800-16025.

Retrain employees to use PPE, if necessary.

WAC 296-800-16030.

Document PPE training.

WAC 296-800-16035.

Require your employees to use necessary PPE on the job.

WAC 296-800-16040.

Keep your PPE safe and in good condition.

WAC 296-800-16045.

Make sure your employees use appropriate face and eye protection.

WAC 296-800-16050.

Make sure your employees use appropriate head protection.

WAC 296-800-16055.

Make sure your employees use appropriate foot protection.

WAC 296-800-16060.

Make sure your employees use appropriate hand protection.

WAC 296-800-16065.

Make sure your employees are protected from drowning.

WAC 296-800-16070.

NEW SECTION

WAC 296-800-16005 Do a hazard assessment for PPE. You must:

- Look for and identify hazards or potential hazards in your workplace and determine if PPE is necessary on the job.

Note: PPE alone should not be relied on to provide protection for your employees. PPE should be used after all other reasonable means of reducing hazards have been carried out. Identifying hazards in your workplace should be built into your regular routine. You should take active steps to get rid of all identified hazards. For example, you can:

- Consider other ways to get hazardous jobs done.
- Reduce hazardous materials or processes.
- Apply engineering controls to reduce or eliminate hazards.

NEW SECTION

WAC 296-800-16010 Document your hazard assessment for PPE. You must:

- Verify that a hazard assessment for PPE has been done at your workplace and complete a written certification (paper or electronic format) that includes the:

- Name of the workplace
- Address of the workplace you inspected for hazards
- Name of person certifying that a workplace hazard assessment was done
- Date(s) the workplace hazard assessment was done
- Statement identifying the document as the certification of hazard assessment for PPE for the workplace

NEW SECTION

WAC 296-800-16015 Select appropriate PPE for your employees. You must:

(1) Select appropriate PPE.

- Select appropriate PPE for your employees if hazards are present, or likely to be present.

- Select PPE for each at-risk employee to use for protection from the hazards identified in your workplace hazard assessment.

(2) Select PPE that properly fits each at-risk employee.

Note: The hazards in your workplace have special rules that may apply to them. For information about PPE for specific workplaces, see these WISHA rule books:

Chapter 296-24 WAC	General Safety and Health Standards
Chapter 296-32 WAC	Telecommunication
Chapter 296-45 WAC	Electrical Workers
Chapter 296-54 WAC	Logging Operations
Chapter 296-59 WAC	Ski Area Facilities and Operations
Chapter 296-62 WAC	General Occupational Health Standards
Chapter 296-79 WAC	Pulp, Paper, and Paperboard Mills and Converters
Chapter 296-155 WAC	Construction Work
Chapter 296-301 WAC	Textile Industry

Chapter 296-304 WAC Ship Repairing, Ship Building and Shipbreaking

Chapter 296-305 WAC Fire Fighters

Note: For help in selecting PPE for your employees, you have several options. You may:

- Visit the OSHA website <http://www.osha-slc.gov/SLTC/personalprotectiveequipment/index.html>.
- Call 1-800-4BE SAFE (1-800-423-7233) for guidelines for selecting PPE.
- Consult with safety and health professionals knowledgeable in this area.
- Discuss PPE choices with your employees.

NEW SECTION

WAC 296-800-16020 Provide PPE to your employees. You must:

- Provide PPE wherever hazards exist from:

- Processes or the environment
- Chemical hazards
- Radiological hazards or
- Mechanical irritants that could cause injury or impairment to the function of any body part through absorption, inhalation, or physical contact.

- Provide necessary PPE to employees at no cost to the employee if the PPE:

- Will be used to protect against hazardous materials or
- Is the type that would not reasonably or normally be worn away from the workplace, such as single use or disposable PPE.

Note: Examples of PPE that the employer **must** provide are:

- Boots or gloves that could become contaminated with hazardous materials in the workplace.
 - Safety glasses, goggles, and nonprescription protective eye wear.
 - Goggles that fit over prescription eye wear.
 - Hard hats.
 - Full body harnesses and lanyards.
 - Single use or disposable PPE such as plastic type gloves used in the food service or medical industries.
- Examples of PPE that the employer may **not** have to provide are:
- Coats to protect against inclement weather.
 - Leather boots, with or without steel toes, that will not become contaminated on the job.
 - Prescription protective eye wear (except as part of a full face piece or hooded respirator).

NEW SECTION

WAC 296-800-16025 Train your employees to use PPE. You must:

- Communicate your PPE selection decision to each at-risk employee.

- Provide training to each employee who is required to use PPE on the job. Each affected employee must be trained to know at least the following:

- When PPE is necessary
- What PPE is necessary
- How to put on, take off, adjust, and wear PPE
- Limitations of PPE
- Proper care, maintenance, useful life, and disposal of PPE.

PERMANENT

- Make sure before an employee is allowed to perform work requiring the use of PPE that the employer can:
 - Demonstrate an understanding of the training specified above; and
 - Demonstrate the ability to use PPE properly.

NEW SECTION

WAC 296-800-16030 Retrain employees to use PPE, if necessary. You must:

- Retrain an employee when you have reason to believe the understanding, motivation, and skills required to use the PPE has not been retained. Circumstances where retraining is required include:
 - Changes in the workplace that make previous training out of date.
 - Changes in the types of PPE to be used make previous training out of date.
 - Work habits or demonstrated knowledge indicate that the employee has not retained the necessary understanding, skill, or motivation to use PPE.

NEW SECTION

WAC 296-800-16035 Document PPE training. You must:

- Document in writing that each employee using PPE has received and understood the required training.

This documentation must include:

- Name of each employee
- Date(s) of training
- Subject of the training

Note: Documentation may be stored on a computer as long as it is available to safety and health personnel from the department of labor and industries.

NEW SECTION

WAC 296-800-16040 Require your employees to use necessary PPE on the job. You must:

- Require your employees to use necessary PPE on the job.

NEW SECTION

WAC 296-800-16045 Keep PPE in safe and good condition. You must:

- Make sure all PPE is safe for the work to be performed. It must:
 - Be durable.
 - Fit snugly.
 - Not interfere with the employee's movements.
- Make sure PPE is used and maintained in a clean and reliable condition.
 - Defective equipment **MUST NOT** be used.
 - Make sure if employees provide their own PPE, that it is adequate for the workplace hazards, and maintained in a clean and reliable condition.

NEW SECTION

WAC 296-800-16050 Make sure your employees use appropriate eye and face protection. You must:

- Make sure that employees exposed to hazards that could injure their eyes and/or face use appropriate protection. Examples of these hazards include:

- Flying particles.

- Molten metal.

- Liquid chemicals.

- Acids or caustic liquids.

- Chemical gases or vapors.

- Any light that could injure the eyes such as lasers, ultraviolet, or infrared light.

- Make sure employees exposed to hazards from flying objects have eye protection with side protection, such as safety glasses with clip-on or slide-on side shields.

- Make sure eye protection for employees who wear prescription lenses:

- Incorporates the prescription into the design of the eye protection; or

- Is large enough to be worn over the prescription lenses without disturbing them.

- Make sure PPE used to protect the eyes and face meet the following specific ANSI standards: (Most commercially available PPE is marked with the specific ANSI requirements.)

- PPE bought before February 20, 1995, must meet ANSI standard A87.1-1968.

- PPE bought after February 20, 1995, must meet ANSI standard Z87.1-1989.

- If you use eye or face protection that does not meet these ANSI standards, you must show they are equally effective.

NEW SECTION

WAC 296-800-16055 Make sure your employees use appropriate head protection. You must:

(1) Make sure employees wear appropriate protective helmets.

- Where employees are exposed to hazards that could cause a head injury. Examples of this type of hazard include:

- Flying or propelled objects.

- Falling objects or materials.

- Where employees are working around or under scaffolds or other overhead structures.

- That helmets meet the following specific ANSI standards (most commercially available PPE is marked with specific ANSI requirements):

- Protective helmets bought before February 20, 1995, must meet ANSI standard Z89.1-1969.

- Protective helmets bought after February 20, 1995, must meet ANSI standard Z89.1-1986.

- If you use protective helmets that do not meet these ANSI standards, you must show they are equally effective.

(2) Make sure employees working near exposed electrical conductors that could contact their head wear a protective helmet designed (that meet the above ANSI standards) to reduce electrical shock hazard.

- Caps with metal buttons or metal visors must **not** be worn around electrical hazards.

(3) Make sure employees working around machinery or in locations that present a hair-catching or fire hazard wear caps or head coverings that completely cover their hair.

- Employees must wear a hair net that controls all loose ends when:

- Hair is as long as the radius of pressure rolls with exposed in-running nip points.

- Hair is twice as long as the circumference of exposed revolving shafts or tools in fixed machines.

- Employees must wear a hair covering of solid material when:

- The employee is exposed to an ignition source and may run into an area containing class-I flammable liquids, such as ether, benzene, or combustible atmospheres if their hair is on fire.

NEW SECTION

WAC 296-800-16060 Make sure your employees use appropriate foot protection. You must:

(1) Use appropriate foot protection.

- Where employees are exposed to hazards that could injure their feet. Examples of these hazards are:

- Falling objects
- Rolling objects
- Piercing/cutting injuries
- Electrical hazards

- That meets specific ANSI requirements. (Most commercially available PPE is marked with specific ANSI requirements.)

- PPE bought before February 20, 1995, must meet ANSI standard Z41.1-1967.

- PPE bought after February 20, 1995, must meet ANSI standard Z41-1991.

- If you use foot protection that does not meet these ANSI standards, you must show it is equally effective.

(2) Make sure your employees wear calks or other suitable footwear to protect against slipping while they are working on top of logs.

NEW SECTION

WAC 296-800-16065 Make sure your employees use appropriate hand protection. You must:

- Make sure employees exposed to hazards that could injure their hands use appropriate hand protection. Examples of these hazards include:

- Absorbing harmful substances
- Severe cuts, lacerations or abrasions
- Punctures
- Chemical burns and/or thermal burns
- Harmful temperature extremes

- Make sure when choosing hand protection, you consider how well the hand protection performs relative to the:

- Task
- Conditions present
- Duration of use

- Hazards
- Potential hazards

NEW SECTION

WAC 296-800-16070 Make sure your employees are protected from drowning. You must:

(1) Provide and wear personal flotation devices (PFD).

- When they work in areas where the danger of drowning exists, such as:

- On the water.
- Over the water.
- Alongside the water.

Note: Employees are not exposed to the danger of drowning when:

- The water is known to be less than chest high on the employee.
- Employees are working behind standard height and strength guardrails.
- Employees are working inside operating cabs or stations that eliminate the possibility of accidentally falling into the water.
- Employees are wearing an approved safety belt with a lifeline attached that prevents the possibility of accidentally falling into the water.

You must:

- Provide your employees with approved United States Coast Guard PFDs. Ski belts or inflatable type PFDs are prohibited. The following are appropriate or allowable United States Coast Guard-approved PFDs:

Type of PFD	General Description
Type I	Off-shore life jacket, effective for all waters or where rescue may be delayed.
Type II	Near-shore buoyant vest, intended for calm, inland water or where there is a good chance of quick rescue.
Type III	Flotation aid, good for calm, inland water, or where there is a good chance of rescue.
Type V	Flotation aids such as board-sailing vests, deck suits, and work vests.

Note: Commercially available PFDs are marked or imprinted with the type of PFD.

- Inspect PFDs before and after each use for defects and make sure that defective PFDs are not used.

You must:

(2) Provide approved life rings with an attached line on all docks, walkways, and fixed installations on or adjacent to water more than five feet deep.

- Life rings must:

- Be United States Coast Guard approved 30 inch size.
- Have attached lines that are at least 90 feet in length.
- Have attached lines at least 1/4 inch in diameter.
- Have attached lines with a minimum breaking strength of 500 pounds.

PERMANENT

- Be spaced no more than 200 feet apart.
- Be kept in easily visible and readily accessible locations.
 - Life rings and attached lines must:
 - Be maintained to retain at least 75 percent of their designed buoyancy and strength.
 - Be provided in the immediate vicinity when employees are assigned work at other casual locations where the risk of drowning exists.
 - Work assigned over water where the vertical drop from an accidental fall would be more than 50 feet, must be subject to specific procedures as approved by the department.

EMPLOYER—CHEMICAL HAZARD COMMUNICATION INTRODUCTION

NEW SECTION

WAC 296-800-170 Employer chemical hazard communication—Introduction. Important:

Thousands of chemicals can be found in today's workplaces. These chemicals may have the capacity to cause health problems, from minor skin irritations to serious injuries or diseases like cancer.

The Employer Chemical Hazard Communication rule was developed to make sure employers and employees are informed about chemical hazards in the workplace.

This rule applies to:

- Employers engaged in businesses where chemicals are used, distributed, or produced for use or distribution.
- Contractors or subcontractors that work for employers engaged in businesses where chemicals are used, distributed, or produced for use or distribution.

- Note:
- If you produce, import, distribute and/or repackage chemicals, or choose not to rely on labels or material safety data sheets provided by the manufacturer or importer, you must comply with chemical hazard communication for manufacturers, importers and distributors, WAC 296-62-054.
 - You may withhold trade secret information under certain circumstances, see trade secrets, WAC 296-62-053, to find out what information may be withheld as a trade secret and what information must be released.

- EXEMPTIONS:**
- For the purposes of this Employer Hazard Communication rule, if you are engaged in agricultural production of crops or livestock, "employee" does not mean:
 - Immediate family members of the officers of any corporation, partnership, sole proprietorship or other business entity or officers of any closely held corporation.
 - Certain products, chemicals, or items are exempt from this rule. Below is a summarized list of these exemptions. See WAC 296-800-17055 at the end of this rule to get complete information about these exemptions:
 - Any hazardous waste or substance
 - Tobacco or tobacco products
 - Wood or wood products that are not chemically treated and will not be processed, for example, by sawing and sanding
 - Food or alcoholic beverages
 - Some drugs, such as retail or prescription medications
 - Retail cosmetics
 - Ionizing and nonionizing radiation
 - Biological hazards
 - Any consumer product or hazardous substance when workplace exposure is the same as that of a consumer

◆ Retail products used in offices in the same manner and frequency used by consumers can be termed "consumer products." Consumer products include things such as: Correction fluid, glass cleaner, and dishwashing liquid.

Example: If you use a household cleaner in your workplace in the same way that a consumer would use it when cleaning their house, the exposure should be the same as the consumer's. ("In the same way" means using the household cleaner in the same manner and frequency.) A janitor using a household cleaner, such as bleach, throughout the day, is not considered to be consumer use.

- Manufactured items that remain intact are exempt for this rule.

The following are examples:

Item	Covered by this rule	Not covered by this rule
Brick	Sawed or cut in half	Used whole or intact
Pipe	Cut by a torch	Bent with a tube bender
Nylon Rope	Burning the ends	Tying a knot

- Manufactured items that are fluids or in the form of particles are not exempt for this rule.

Your responsibility: To inform and train your employees about the hazards of chemicals they may be exposed to during normal working conditions, or in foreseeable emergencies by:

- Making a list of the hazardous chemicals present in your workplace
- Preparing a written Chemical Hazard Communication Program for your workplace
- Informing your employees about this rule and your program
- Providing training to your employees about working in the presence of hazardous chemicals
- Getting and keeping the material safety data sheets (MSDSs) for the hazardous chemicals
- Making sure that labels on containers of hazardous chemicals are in place and easy to read

You must:

Develop, implement, maintain, and make available a written Chemical Hazard Communication Program.

WAC 296-800-17005.

Identify and list all the hazardous chemicals present in your workplace.

WAC 296-800-17010.

Obtain and maintain material safety data sheets (MSDS) for each hazardous chemical used.

WAC 296-800-17015.

Make sure that material safety data sheets (MSDS) are readily accessible to your employees.

WAC 296-800-17020.

Label containers holding hazardous chemicals.

WAC 296-800-17025.

Inform and train your employees about hazardous chemicals in your workplace.

WAC 296-800-17030.

Follow these rules for laboratories using hazardous chemicals.

WAC 296-800-17035.

Follow these rules for handling chemicals in factory sealed containers.

PERMANENT

WAC 296-800-17040.

The department must:

Translate certain chemical hazard communication documents upon request.

WAC 296-800-17045.

Attempt to obtain a material safety data sheet (MSDS) upon request.

WAC 296-800-17050.

Exemption:

Items or chemicals exempt from the rule, and exemptions from labeling.

WAC 296-800-17055.

NEW SECTION

WAC 296-800-17005 Develop, implement, maintain, and make available a written Chemical Hazard Communication Program. You must:

- Develop, implement, maintain, and make available a written Chemical Hazard Communication Program specifically for your workplace. The Chemical Hazard Communication Program must, at a minimum, include:

- A list of hazardous chemicals known to be present in your workplace.

- Procedures for making sure all containers are properly labeled.

- A description of how you are going to obtain and maintain your material safety data sheets (MSDS).

- A description of how you are going to train and inform your employees about hazardous chemicals in their workplace.

- A description of how you are going to inform your employees about:

- ◆ Chemical hazards used during nonroutine tasks.

- ◆ The hazards associated with chemicals contained in unlabeled pipes in their work areas.

You must:

- Make sure your written chemical hazard communication program includes the following communication methods you will apply if you produce, use, or store hazardous chemicals at your workplace(s) in such a way that the employees of other employer(s) may be exposed:

- Provide the other employer(s) with a copy of the relevant material safety data sheets (MSDSs), or provide access to the MSDSs in a central location at the workplace.

- Inform the other employer(s) of any precautionary measures that need to be taken to protect employees during normal operating conditions and in foreseeable emergencies.

- Describe how to inform the other employer(s) of the labeling system used in the workplace.

Note: • Examples of employees of other employers who could be exposed to chemical hazards that you produce, use, or store in your workplace include employees of construction companies, cleaning services, or maintenance contractors visiting or working on-site.

• Your employees have the right to get chemical hazard communication information from other employers at workplaces where they are working; and

Employees of other employers have the right to get the information from you when they are working at your workplace.

- Include in your written Chemical Hazard Communication Program the methods that you will use to share information with other employers and their employees at your workplace(s) regarding:

- Access to MSDS.

- Precautionary measures such as personal protective equipment (PPE) and emergency plans.

- Any labeling systems used at the workplace.

If you rely on another employer's Chemical Hazard Communication Program to share the information required and the program meets the requirements of this rule, document this in your own written Chemical Hazard Communication Program.

You must:

- Make your Chemical Hazard Communication Program available to your employees.

Note: • You must make the written Chemical Hazard Communication Program available, upon request, to employees, their designated representatives, the department and NIOSH, in accordance with the requirements of Access to records, WAC 296-62-052.

- Where employees must travel between workplaces during a workshift, that is, if their work is carried out at more than one geographical location, the written Chemical Hazard Communication Program may be kept at the primary workplace facility.

NEW SECTION

WAC 296-800-17010 Identify and list all the hazardous chemicals present in your workplace. You must:

- Identify all hazardous chemicals at your workplace. This includes any chemical that is known to be present in your workplace in such a way that employees may be exposed to it under normal conditions of use or in a foreseeable emergency.

- Create a list of these chemicals using the chemical or common name on the material safety data sheet (MSDS).

This list:

- Must be compiled for the workplace as a whole, or for individual work areas.

- Is necessary to make sure that all hazardous chemicals are identified and that MSDS, and labeling rules are met.

- Must be current.

Note: The following are some ways to determine whether a product is hazardous:

- Look for words on the label, such as "CAUTION," "WARNING," or "DANGER."

- Look for words or "hazard coding" that indicate that the chemical is flammable, an irritant, corrosive, carcinogenic, etc. "Hazard coding" refers to words, numbers, or colors that tell you a chemical is dangerous.

- Check the product's MSDS for hazard information.

Examples of hazardous chemicals are: Acids, adhesives, caustics, fuels, paints, varnishes, shellacs and pesticides. Too many other classes of hazardous chemicals exist to list them all here. If you have any questions about a chemical you have at your workplace, contact your local L&I office (see the resource section of this book).

NEW SECTION**WAC 296-800-17015 Obtain and maintain material safety data sheets (MSDSs) for each hazardous chemical used.**

Note: MSDSs are a type of employee exposure record. Therefore, you must comply with the Access to MSDS as exposure records, WAC 296-800-180, located in this book.

You must:

- Obtain a MSDS for each hazardous chemical used as soon as possible if the MSDS is not provided with the shipment of a hazardous chemical from the chemical manufacturer or importer.

Note:

- To obtain a MSDS, you may try calling the manufacturer or checking their website.
- If you have a commercial account with a retailer or wholesaler, you have the right to request and receive a MSDS about hazardous chemicals you purchase.
- If a chemical is purchased from a retailer with no commercial accounts, you have the right to request and receive the manufacturer's name and address so that you can contact them and request a MSDS for the chemical.
- Whoever prepares the MSDS is required to mark all blocks on the form, even if there is no relevant information for that section.
- If you have problems getting a MSDS within 30 calendar days after making a written request to the chemical manufacturer, importer, or distributor, you can get help from WISHA. You may contact your local regional office for assistance or make a written request for assistance to the: Department of Labor and Industries
Right-to-Know Program
P.O. Box 44610
Olympia, Washington 98504-4610.

Include in your request:

- A copy of the purchaser's written request to the chemical manufacturer, importer, or distributor.
- The name of the product suspected of containing a hazardous chemical.
- The identification number of the product, if available.
- A copy of the product label, if available.
- The name and address of the chemical manufacturer, importer, or distributor from whom the product was obtained.

You must:

- Maintain a MSDS for each hazardous chemical:
 - Keep copies of the required MSDSs for each hazardous chemical present in your workplace. These may be kept in any form, including as a part of operating procedures.
 - Each MSDS must be in English. You may also keep copies in other languages.

Note:

- If you choose not to rely on MSDSs or labels provided by the manufacturer or importer, you must comply with the Chemical hazard communication standard for manufacturers, importers, and distributors, WAC 296-62-054.
- It may be more appropriate to address the hazards of a process rather than individual hazardous chemicals. MSDS can be designed to cover groups of hazardous chemicals in a work area.

NEW SECTION**WAC 296-800-17020 Make sure material safety data sheets are readily accessible to your employees. You must:**

- Make sure that MSDSs are readily accessible, easily obtained without delay during each work shift to employees when they are in their work area(s).

- Make sure that employees can immediately obtain the required MSDS information in an emergency.

- Where employees must travel between workplaces during a workshift, such as when their work is carried out at more than one geographical location, the MSDSs may be kept at a central location at the primary workplace facility.

- This can be done by means such as voice communication or laptop computer.

Note:

- Electronic access (such as computer or fax), microfiche, and other alternatives to maintaining paper copies of the MSDSs are permitted as long as they do not create barriers to immediate employee access in each workplace.

- Barriers to immediate access of electronic MSDSs may include:

- Power outages
- Equipment failure
- System delays
- Deficient user knowledge to operate equipment
- Location of equipment outside the work area.

Solutions to eliminating these and other possible barriers to access may require the availability of back-up systems, employee training, and providing access equipment in the work areas.

- MSDSs must also be made readily available, upon request, to the department in accordance with the requirements of material safety data sheets (MSDSs) as exposure records, WAC 296-800-180. NIOSH (National Institute for Occupational Safety and Health) must also be given access to MSDSs in the same manner.

NEW SECTION**WAC 296-800-17025 Label containers holding hazardous chemicals. Exemptions:**

- The following is a summary of items that are exempt from this rule. For complete information about each of these, see WAC 296-800-17055.

- Pesticides, when labeled as required by the Environmental Protection Agency (EPA).

- Food, food additives, drugs, cosmetics, or medical/veterinary devices or products.

- Alcoholic beverages not intended for industrial use.

- Consumer products labeled as required by the Consumer Product Safety Commission.

- Agriculture or vegetable seeds treated and labeled as required by the Federal Seed Act.

Note: You are not required to label portable containers into which hazardous chemicals are transferred from labeled containers, if the chemical is used and controlled by the employee who performed the transfer within the same shift.

You must:

- Make sure that each container of hazardous chemicals in the workplace is labeled, tagged, or marked with the following information:

- The identity of the hazardous chemical(s) using either the chemical or common name.

Note: You are not required to list each component in a hazardous mixture on the label. If a mixture is referred to on a material safety data sheet (MSDS) by a product name, then the product name should be used as the identifier.

- Appropriate hazard warnings which give general information about the relevant health and physical hazards of the chemicals. This includes health effects information, such as

information about organs most likely to be affected by the chemicals.

Examples of label:

Name of chemical Physical hazards Health Hazards • Health effects information • Affected Target organs
--

– For individual stationary process containers, you may use alternate labeling methods such as:

- ◆ Signs
- ◆ Placards
- ◆ Process sheets
- ◆ Batch tickets
- ◆ Operating procedures or
- ◆ Other such written materials,

as long as the alternate method identifies the containers and conveys the required label information.

Note: • You may use words, pictures, symbols or any combination to communicate the hazards of the chemical. Be sure to train your employees so they can demonstrate a knowledge of the labeling system you use.

Sample Container Labels

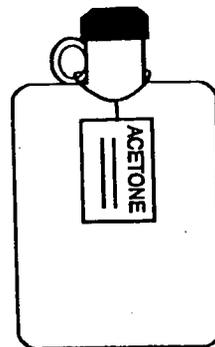

- Some alternative labeling systems do not communicate target organ information, so the employee will have to rely on training provided by the employer to obtain this information.

You must:

• Not remove or deface existing labels on incoming containers of hazardous chemicals (such as those marked with the United States Department of Transportation (USDOT) markings, placards and labels), unless the container is immediately labeled with the required information. You do not need to put on new labels if existing labels already provide the required information. If the package or container is sufficiently cleaned of residue and purged of vapors to remove any potential health or physical hazard, existing labels can be removed.

• Make sure that labels or other forms of warning are legible, in English, and prominently displayed on the container, or readily available in the work area throughout each work shift.

Note: • Employers with non-English speaking employees may use other languages in the warning information in addition to the English language.

Note: • Above is an example of a labeled container. You may use a laminated or coated label, affixed to the container with a wire, to avoid deterioration of labels due to a solvent, such as acetone.

• Make sure if the hazardous chemical is regulated by WISHA or OSHA in a substance-specific health rule, that the labels or other warnings are used according to those rules.

NEW SECTION

WAC 296-800-17030 Inform and train your employees about hazardous chemicals in your workplace. You must:

• Provide employees with effective information on hazardous chemicals in their work area at the time of their initial job assignment. Whenever a new physical or health hazard related to chemical exposure is introduced into their employees' work areas, information must be provided.

– Inform employees of:

- ◆ The requirements of this rule
- ◆ Any operations in their work area where hazardous chemicals are present
- ◆ The location and availability of your written Chemical Hazard Communication Program, including the list(s) of hazardous chemicals and material safety data sheets (MSDSs) required by this rule.

• Provide employees with effective training about hazardous chemicals in their work area at the time of their initial job assignment. Whenever a new physical or health hazard related to chemical exposure is introduced, the employees must be trained.

Make sure that employee training includes:

– Methods and observations that may be used to detect the presence or release of a hazardous chemical in the work area.

Examples of these methods and observations may include:

- ◆ Monitoring conducted by you
- ◆ Continuous monitoring devices
- ◆ Visual appearance or odor of hazardous chemicals when being released
- ◆ Physical and health hazards of the chemicals in the work area, including the likely physical symptoms or effects of overexposure
- ◆ Steps employees can take to protect themselves from the chemical hazards in your workplace, including specific procedures implemented by you to protect employees from exposure to hazardous chemicals. Specific procedures may include:
 - Appropriate work practices

PERMANENT

- Engineering controls
- Emergency procedures
- Personal protective equipment to be used
- Details of the chemical hazard communication program developed by you, including an explanation of the labeling system and the MSDS, and how employees can obtain and use the appropriate hazard information.

- Tailor information and training to the types of hazards to which employees will be exposed. The information and training may be designed to cover categories of hazards, such as flammability or cancer-causing potential, or it may address specific chemicals. Chemical-specific information must always be available through labels and MSDSs

- Make reasonable efforts to post notices in your employees' native languages (as provided by the department) if those employees have trouble communicating in English.

- Note:
- Interactive computer-based training or training videos can be used provided they are effective.
 - Your MSDSs may not have WISHA permissible exposure limits (PELs) listed. In some cases, WISHA PELs are stricter than the OSHA PELs and other exposure limits listed on the MSDSs you receive. If this is the case, you must refer to the WISHA PEL table, WAC 296-62-075, for the appropriate exposure limits to be covered during training.

NEW SECTION

WAC 296-800-17035 Follow these rules for laboratories using hazardous chemicals.

Note: Laboratories are required to have a written Chemical hygiene plan under WAC 296-62-400, if applicable. They are **not** required to have a written Chemical Hazard Communication Program.

You may combine your accident prevention program and chemical hazard communication program to assist you in developing a chemical hygiene plan for your laboratory.

You must:

(1) Make sure that labels on incoming containers of hazardous chemicals are in place and readable.

(2) Maintain material safety data sheets (MSDSs) received with incoming shipments of hazardous chemicals and make them available to laboratory employees when they are in their work areas.

(3) Provide laboratory employees with information and training as described in: "Inform and train your employees about hazardous chemicals in your workplace," WAC 296-800-17030, **except** for the part about the location and availability of the Written Chemical Hazard Communication Program.

Note: Laboratory employers that ship hazardous chemicals are considered to be either chemical manufacturers or distributors. When laboratory employers ship hazardous chemicals they must comply with the rule, "hazard communication standards for chemical manufacturers, importers and distributors," WAC 296-62-054.

NEW SECTION

WAC 296-800-17040 Follow these rules for handling chemicals in factory-sealed containers. This applies to situations where employees only handle chemicals in factory-

sealed containers that are not opened under normal use (such as those found in marine cargo handling, trucking, warehousing, or retail sales).

You must:

(1) Make sure that labels on incoming containers of hazardous chemicals are in place and readable.

(2) Keep or obtain material safety data sheets.

- Keep any MSDS that are received with incoming shipments of the sealed containers of hazardous chemicals.

- If a factory-sealed container of hazardous chemicals comes without a MSDS, obtain one as soon as possible, if an employee requests it.

(3) Make sure that the MSDSs are readily accessible during each work shift to employees when they are in their work area(s).

(4) Inform and train your employees about hazardous chemicals in your workplace, to protect them in case of a hazardous chemical spill or leak from a factory-sealed container. You do not have to cover the location and availability of the written Chemical Hazard Communication Program.

NEW SECTION

WAC 296-800-17045 Translate certain chemical hazard communication documents upon request. The department must:

- Upon receipt of a written or verbal request, prepare and make available (within available resources) to employers or the public, a translation into Cambodian, Chinese, Korean, Spanish, or Vietnamese of any of the following:

- An employer's written Chemical Hazard Communication Program.

- A material safety data sheet or

- Written materials prepared by the department to inform employees of their rights described in this rule, regarding chemical hazard communication.

Note: Written requests for translations should be directed to:
Department of Labor and Industries
Right-to-Know Program
P.O. Box 44610
Olympia, Washington 98504-4610.

NEW SECTION

WAC 296-800-17050 Attempt to obtain a material safety data sheet (MSDS) upon request. The department must:

- Upon receipt of an employer's written request for a material safety data sheet, attempt to obtain the MSDS from the chemical manufacturer, importer, or distributor. When the department receives the MSDS, the department must forward a copy of it to the purchaser at no cost. Small business employers will be given priority for this service.

NEW SECTION

WAC 296-800-17055 Items or chemicals exempt from the rule, and exemptions from labeling.

- Listed below are the full descriptions of the items or chemicals that are exempt, or not covered, by this rule:

– Any consumer product or hazardous substance, defined in the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) and Federal Hazardous Substance Act (15 U.S.C. 1261 et seq.) respectively, where you can show that it is used in the workplace for the purpose intended by the chemical manufacturer or importer of the product, and the use results in a duration and frequency of exposure that is not greater than the range of exposures that could reasonably be experienced by consumers when used for the purpose intended.

– Any hazardous waste defined by the Hazardous Waste Management Act chapter 70.105 RCW, when subject to regulations issued under that act by the department of ecology that describes specific safety, labeling, personnel training, and other rules for the accumulation, handling and management of hazardous waste.

– Any hazardous waste defined by the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6901 et seq.), when subject to regulations issued under that act by the Environmental Protection Agency.

– Any hazardous substance defined by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601 et seq.), when the hazardous substance is the focus of remedial or removal action being conducted under CERCLA in accordance with Environmental Protection Agency regulations.

– Tobacco or tobacco products.

– Wood or wood products, including lumber that will not be processed, where the chemical manufacturer or importer can establish that the only hazard they pose to the employees is the potential for flammability or combustibility. Wood or wood products that have been treated with hazardous chemicals covered by this rule, and wood that may be subsequently sawed or cut, generating dust, are not exempted.

– Articles, meaning manufactured items other than a fluid or particle that:

◆ Are formed to a specific shape or design during manufacture;

◆ Have end use function(s) dependent in whole or in part upon their shape or design during end use; and

◆ Under normal conditions of use, do not release more than very small quantities, for example, minute or trace amounts of a hazardous chemical such as, emissions from a marking pen or a newly varnished wood chair, and do not pose a physical hazard or health risk to employees

– Food or alcoholic beverages that are sold, used, or prepared in a retail establishment such as a grocery store, restaurant, or drinking place, and foods intended for personal consumption by employees while in the workplace.

– Any drug, defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), when it is in solid, final form for direct administration to the patient (for example, tablets or pills); drugs that are packaged by the chemical manufacturer for sale to consumers in a retail establishment (for example, over-the-counter drugs); and drugs intended for personal consumption by employees while in the workplace (for example, first aid supplies). Aerosolized or cytotoxic drugs administered by a health care worker are not excluded.

– Cosmetics packaged for sale to consumers in a retail establishment, and cosmetics intended for personal consumption by employees while in the workplace.

– Ionizing and nonionizing radiation.

– Biological hazards.

• This rule does not require labeling of the following chemicals:

– Any pesticide defined in the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.), when subject to the labeling requirements of that act and labeling regulations issued under that act by the Environmental Protection Agency.

– Any chemical substance or mixture defined in the Toxic Substance Control Act (15 U.S.C. 2601 et seq.), when subject to the labeling requirements of that act, and labeling requirements issued under that act by the Environmental Protection Agency.

– Any food, food additive, color additive, drug, cosmetic, or medical/veterinary device or product, including materials intended for use as ingredients in such products (for example, flavors and fragrances), are defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) or the Virus-Serum Toxin Act of 1913 (21 U.S.C. 151 et seq.) and regulations issued under those acts, when they are subject to the labeling requirements under those acts by either the Food and Drug Administration or the Department of Agriculture.

– Any distilled spirits (beverage alcohols), wine, or malt beverage intended for nonindustrial use, defined in the Federal Alcohol Administration Act (27 U.S.C. 201 et seq.) and regulations issued under that act, when subject to the labeling requirements of that act and labeling regulations issued under that act by the Bureau of Alcohol, Tobacco, and Firearms.

– Any consumer product or hazardous substance defined in the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) and Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) respectively, when subject to a consumer product safety rule or labeling requirement of those acts, or regulations issued under those acts by the Consumer Product Safety Commission.

– Agricultural or vegetable seed treated with pesticides and labeled in accordance with the Federal Seed Act (7 U.S.C. 1551 et seq.) and the labeling requirements issued under that act by the Department of Agriculture.

NEW SECTION

WAC 296-800-180 Material safety data sheets (MSDSs) as exposure records introduction. Important: Exposure records contain information about employees' exposure to toxic substances or harmful physical agents. Material safety data sheets (MSDSs) are one type of exposure record. The preservation of and access to exposure records is necessary to improve detection, treatment, and prevention of occupational diseases.

This rule supplements the chemical hazard communication rule by extending access to MSDSs, or their alternative, after employment and after the hazardous chemical is no longer used in the workplace. Your responsibility:

To preserve and provide access to material safety data sheets (MSDSs) or their alternative as exposure records.

You must:

Preserve exposure records for at least 30 years.

WAC 296-800-18005.

Inform current employees of exposure records.

WAC 296-800-18010.

Provide access to exposure records.

WAC 296-800-18015.

Transfer records when ceasing to do business.

WAC 296-800-18020.

- Note:
- Access to records, WAC 296-62-052, requires the preservation and access to other exposure records including records such as workplace monitoring data and biological monitoring results and medical records. If you keep these other types of employee exposure records or employee medical records, you must comply with these additional requirements.
 - This rule applies to every employer who maintains, makes, contracts for, or has access to MSDSs for chemicals used in their workplace.
 - The specific identity of a toxic substance may be withheld from a disclosable record if it is a verifiable trade secret. For trade secret requirements see WAC 296-62-053.

NEW SECTION

WAC 296-800-18005 Preserve exposure records for at least 30 years. You must:

- Keep material safety data sheets (MSDSs) and analysis using MSDSs for at least thirty years, including current, former, and future employers receiving transferred records. Preserve MSDSs in any form, as long as the information is not altered and is retrievable. You may keep alternative records instead of MSDSs concerning the identity of a substance. The alternative record must also be kept for thirty years and contain the following information:
 - Some record of the identity (chemical name, if known) of a substance or agent
 - Where the substance or agent was used
 - When the substance or agent was used

Note: Keeping alternative records may be less work than you think. When developing your hazard communication program's list of hazardous chemicals (WAC 296-800-17010), add the "where used" and "when used" information required by this rule.

NEW SECTION

WAC 296-800-18010 Inform current employees of exposure records. You must:

- Inform current employees who are, or will be exposed to toxic substance or harmful physical agents of:
 - The existence, location, and availability of material safety data sheets (MSDSs) or alternative records, and any other records covered by this rule.
 - The person responsible for maintaining and providing access to records.
 - Their rights of access to these records.
 - Exposure records when the employee first enters into employment and then once a year thereafter.

Note: Informing employees of the availability of these records may be accomplished by posting, group discussion or by individual notifications.

You must:

- Keep a copy of this rule and make copies available upon request to employees.

- Distribute to employees any informational materials about this rule that are made available to the employer by the department.

NEW SECTION

WAC 296-800-18015 Provide access to exposure records. You must:

- Provide access, whenever requested by an employee (any current, former, or transferred worker) or their designated representative to a relevant exposure record such as material safety data sheets (MSDSs) or their alternative, or analysis using MSDSs or their alternative:
 - In a reasonable time, place, and manner.
 - Within fifteen working days. If the employer cannot meet this requirement, they must inform the requesting party of the reason for the delay and the earliest date the record will be made available.
- Make sure the department has prompt access to any exposure records and related analysis. This must be done without violation of any rights under the Constitution or the Washington Industrial Safety and Health Act that the employer chooses to exercise.

Note: Nothing in this rule is meant to prevent employees and collective bargaining agents from getting access to information beyond that required by this rule.

You must:

- Make sure that whenever an employee or designated representative requests an initial copy of an exposure record, related analysis or new information added to the record:
 - A copy of the record is provided without cost to the employee or their representative or
 - The facilities are made available for copying without cost to the employee or their representative or
 - The record is loaned to the employee or their representative for a reasonable time to enable a copy to be made.

Note: Whenever a record has been previously provided without cost to an employee or designated representative, and they request additional copies, the employer may charge reasonable, non-discriminatory administrative costs (e.g., search and copying expenses, but no overhead expenses).

NEW SECTION

WAC 296-800-18020 Transfer records when ceasing to do business. You must:

- Transfer all material safety data sheets (MSDSs) as exposure records to the successor employer, who must receive and preserve, or keep unchanged, these records.
- If there is no successor to receive and preserve the employee exposure records:
 - Notify affected current employees of their rights of access to records at least 3 months prior to the cessation of the employer's business and
 - Transfer the records to the department, if required by a specific WISHA safety and health rule.

SAFETY BULLETIN BOARD

NEW SECTION

WAC 296-800-190 Summary/rule. Your responsibility: To provide a safety bulletin board.

NEW SECTION

WAC 296-800-19005 Provide a safety bulletin board in your workplace. You must:

- Install and maintain a safety bulletin board in every fixed workplace (establishment) that has eight or more employees. Make sure the safety bulletin board is large enough to post information such as the following:

- Safety bulletins
- Safety newsletters
- Safety posters
- Accident statistics
- Other safety educational material.

Note: You may want to post your emergency phone numbers on the safety bulletin board.

WISHA POSTER

NEW SECTION

WAC 296-800-200 WISHA poster. Your responsibility: To post the WISHA poster, which informs your employees of their job safety and health protection rights.

NEW SECTION

WAC 296-800-20005 Post and keep a WISHA poster in your workplace. You must:

- Post it where it can easily be seen by employees and keep it in good condition.

Note: You can order a free copy of the WISHA Poster (Form F416-081-000) from any labor and industries office. Find the labor and industries office closest to you by:

- Looking at <http://www.wa.gov/lni/pa/direct.htm> or
- Calling 1-800-4BE SAFE (1-800-423-7233) or
- Checking the resources section of this book for regional offices.

LIGHTING

NEW SECTION

WAC 296-800-210 Lighting. Your responsibility: To provide and maintain adequate lighting in your workplace.

NEW SECTION

WAC 296-800-21005 Provide and maintain adequate lighting.

Note: This section establishes minimal levels of lighting for safety purposes only. Guidelines pertaining to optimal levels of lighting and illumination may be found in Practice for Industrial Lighting, ANSI/IES RP7-1979.

You must:

- Provide and maintain adequate lighting for all work activities in your workplace. See the following table.

Lighting Table		
Activity	Minimum acceptable average lighting level in an area:	Any one single measurement used to determine the average lighting level*cannot be less than:
	(Foot-candles)	(Foot-candles)
Indoor task	10	5
Outdoor task	5	2.5
Nontask activities for both indoor and outdoor	3	1.5

*Lighting levels must be measured at thirty inches above the floor/working surface or at the task.

You must:

- Have adequate light for employees to see nearby objects that might be potential hazards or to see to operate emergency controls or other equipment, if general lighting is not available.

Note: • Lighting levels can be measured with a light meter.
• Conversion information: 1 foot-candle = 1 lumen incident per square foot = 10.76 lux.

HOUSEKEEPING, DRAINAGE, AND STORAGE

NEW SECTION

WAC 296-800-220 Housekeeping, drainage, and storage—Summary. Your responsibility: To provide your employees with a clean, dry, pest-free workplace.

Note: The introduction has important information about building, electrical and fire codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to building, fire, and electrical codes" in the introduction section of this book.

You must:

Housekeeping

Keep your workplace clean.

WAC 296-800-22005.

Sweep and clean your workplace to minimize dust.

WAC 296-800-22010.

Keep your workplace free of obstacles that interfere with cleaning.

WAC 296-800-22015.

Control pests in your workplace.

WAC 296-800-22020.

Make sure floors are maintained in a safe condition.

WAC 296-800-22022.

Drainage

Keep your workroom floors dry, when practical.

WAC 296-800-22025.

Provide proper drainage.

PERMANENT

WAC 296-800-22030.

Storage areas

Store things safely.

WAC 296-800-22035.

Control vegetation in your storage areas.

WAC 296-800-22040.

HOUSEKEEPING

NEW SECTION

WAC 296-800-22005 Keep your workplace clean.

You must:

- Keep all areas of your workplace, passageways, storage rooms, and service rooms in a clean, orderly and sanitary condition to the extent the nature of the work allows.

NEW SECTION

WAC 296-800-22010 Sweep and clean your workplace to minimize dust. You must:

- Sweep and clean your workplace in a way that minimizes dust in the air as much as possible.
- When practical, clean after hours so that your employees are not exposed to dust in the air on the job.

NEW SECTION

WAC 296-800-22015 Keep your workplace free of obstacles that interfere with cleaning. You must:

- Keep your workplace clear of obstructions such as nails, splinters, loose boards and unnecessary holes and openings to make cleaning easier and more effective.

NEW SECTION

WAC 296-800-22020 Control pests in your workplace. You must:

- Make sure each building in your workplace is constructed, equipped and maintained so it restricts pests from entering or living in it. Pests include animals such as:
 - Rodents (rats, mice, and squirrels)
 - Birds (starlings, pigeons, and swallows)
 - Insects (bees, wasps, and mosquitoes)
- Take steps to effectively control pests in your workplace, if they are detected.
 - Carry out a continuing and effective control program in the areas of your workplace where pests have been detected.

- Note:
- By handling dead or live pests including their waste products, attached parasites and other contaminated materials, your employees may be exposed to certain health risks. These risks include, but are not limited to: Hanta virus, rabies, lyme disease and psittacosis. Contact your local L&I office (see resources section of this book) or the public health department for more information about health risks and proper pest handling and disposal techniques.
 - "Workplace" includes storage areas.

NEW SECTION

WAC 296-800-22022 Make sure floors are maintained in a safe condition. You must:

- Make sure floors are kept free of debris. This includes:
 - Buildings
 - Platforms
 - Walkways and driveways
 - Storage yards
 - Docks
- Use a nonslip coating on all polished floors.

DRAINAGE

NEW SECTION

WAC 296-800-22025 Keep your workroom floors dry, when practical. You must:

- Do the following to help keep your employees dry if wet processes are used in your work area:
 - Maintain drainage away from the work area; and
 - Provide false floors, platforms, or other dry places where employees can stand, where practical, or
 - Provide appropriate waterproof footwear.

NEW SECTION

WAC 296-800-22030 Provide proper drainage. You must:

- Provide all areas where employees work, such as yards, basements, or garages, with adequate drainage.

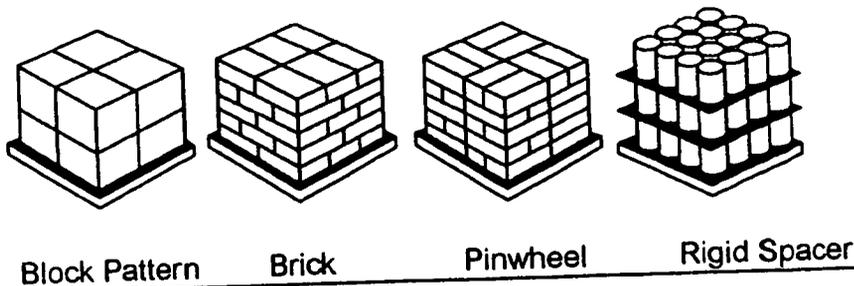

STORAGE AREAS

NEW SECTION

WAC 296-800-22035 Store things safely. You must:

- Store materials so they do not create a hazard.
- Keep workplace storage areas free from accumulation of materials that could create hazards from tripping, fire, or explosion.
 - Secure stored items such as bundles, containers, and bags to prevent them from falling, sliding, or collapsing by doing one or more of the following:
 - Stacking
 - Racking
 - Blocking
 - Interlocking
 - Otherwise securing them
- Make sure stored items are limited in height so that they are stable and secure to prevent sliding or collapse.

Examples of Proper Material Storage

Block Pattern Brick Pinwheel Rigid Spacer

NEW SECTION

WAC 296-800-22040 Control vegetation in your storage areas. You must:

- Control vegetation in your storage areas when necessary to create a safe working environment.

DRINKING WATER, BATHROOMS, WASHING FACILITIES AND WASTE DISPOSAL

NEW SECTION

WAC 296-800-230 Summary. Your responsibility: To provide safe drinking (potable) water, bathrooms, washing facilities, and waste disposal in your workplace

You must:

Provide safe drinking (potable) water in your workplace
WAC 296-800-23005.

Clearly mark the water outlets that are not fit for drinking (nonpotable)
WAC 296-800-23010.

Make sure that systems delivering not-fit-for-drinking water prevent backflow
WAC 296-800-23015.

Provide bathrooms for your employees
WAC 296-800-23020.

Provide convenient, clean washing facilities
WAC 296-800-23025.

Keep containers used for garbage or waste in a sanitary condition
WAC 296-800-23030.

Remove garbage and waste in a way that does not create a health hazard
WAC 296-800-23035.

Note: Some industries may have additional rules on bathrooms and washing facilities. For example:

- WAC 296-62-07308 Carcinogens; general regulated area requirements
- WAC 296-62-31315 Hazardous waste operations and treatment, storage and disposal facilities
- WAC 296-155-140 Construction

WAC 296-115-050
chapter 296-307 WAC

WAC 296-36-160(5)
WAC 296-24-12507

- Charter boats
- Agriculture; indoor sanitation and temporary labor camps
- Compressed air work
- Temporary labor camps

NEW SECTION

WAC 296-800-23005 Provide safe drinking (potable) water in your workplace. You must:

(1) Provide safe drinking (potable) water for employees for:

- Washing themselves
- Personal service rooms
- Cooking
- Washing premises where food is prepared or processed
- Washing food, eating utensils, or clothing

(2) Containers and dispensers

• Make sure your movable, or portable, drinking water dispensers are:

- Capable of being closed
- Kept in sanitary condition
- Equipped with a tap

• Prohibit the use of open containers such as barrels, pails, and tanks from which employees must dip or pour drinking water, even if the containers have covers.

(3) Prohibit employees from using shared drinking cups or utensils.

Definition: Potable water is water that you can safely drink that meets specific safety standards prescribed by the United States Environmental Protection Agency's *National Interim Primary Drinking Water Regulations*, published in 40 CFR Part 141, and 40 CFR 147.2400.

NEW SECTION

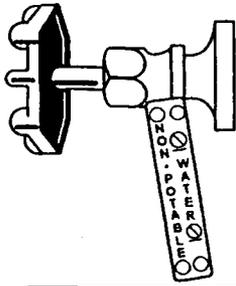

WAC 296-800-23010 Clearly mark the water outlets that are not fit for drinking (nonpotable). You must:

(1) Mark nonpotable water outlets, such as those used for industrial processes or firefighting, so that no one will use them for:

- Drinking

PERMANENT

- Washing themselves
- Cooking
- Washing food, eating utensils, or clothing.

Outlets for water not fit to drink must be marked.

(2) Prohibit the use of nonpotable water that could create unsafe conditions such as concentrations of chemicals, for example lead or chlorine, fecal coliform bacteria, or other substances.

- Note: As long as the water does not contain substances that could create unsafe conditions, then nonpotable water can be used for:
- Cleaning work premises that do not involve food preparation or food processing
 - Cleaning personal service rooms, such as bathrooms.

NEW SECTION

WAC 296-800-23015 Make sure that systems delivering not-fit-for-drinking (nonpotable) water prevent backflow into drinking water systems. You must:

- Make sure that systems delivering not-fit-for-drinking (nonpotable) water prevent backflow into drinking water systems.

NEW SECTION

WAC 296-800-23020 Provide bathrooms for your employees.

- Exemption: You do not have to provide bathrooms for:
- Mobile crews, if the employees working there have transportation immediately available to nearby bathrooms that meet the requirements of this rule.
 - Work locations not normally attended by employees, if they have transportation immediately available to nearby bathrooms meeting the requirements of this rule.

You must:

(1) Provide bathrooms with the appropriate number of toilets for your employees at every workplace. See the chart below to determine how many toilets you need at your workplace.

Number of Employees*	Minimum Number of Toilets Required**
1 to 15	1
16 to 35	2
36 to 55	3
56 to 80	4

81 to 110	5
111 to 150	6
Over 150	One additional toilet for each additional 40 employees

- * The "number of employees" used in this table means the maximum number of employees present at any one time on a regular shift.
- ** A shared bathroom (multiple toilets without enclosures) counts as one toilet no matter how many toilets it contains. In bathrooms used only by men, urinals may be substituted for up to one-third of the required toilets.

You must:

- Have the appropriate number of toilets for each sex, based on the number of male and female employees at your workplace. For example, if you have 37 men and 17 women, you need to have three toilets for the men and two toilets for the women, based on the chart provided in this section.
 - Separate bathrooms for men and women are not required if the bathroom:
 - ◆ Will be occupied by no more than one person at a time
 - ◆ Can be locked from the inside
 - ◆ Contains at least one toilet
 - Make sure each toilet is in a separate compartment with a door and walls, or partitions to assure privacy.
- (2) Provide toilet paper with a toilet paper holder for every toilet.
- (3) Make sure the sewage disposal method does not endanger the health of employees.

NEW SECTION

WAC 296-800-23025 Provide convenient, clean washing facilities. Exemption: You do **not** have to provide washing facilities for:

- Mobile crews, if your employees working there have transportation immediately available to nearby washing facilities meeting the requirements of this rule.
- Work locations not normally attended by employees, if they have transportation immediately available to nearby accessible washing facilities meeting the requirements of this rule.

You must:

- Provide the following for your employees:
 - Convenient, clean washing facilities, including sinks or basins for personal washing
 - Hot and cold water, or lukewarm (tepid), running water in each sink and basin
 - Hand soap or similar cleaning agents
 - Near the sinks and basins provide,
 - Individual paper or cloth hand towels; or individual sections of clean continuous cloth toweling; or warm air blowers for drying hands.

NEW SECTION

WAC 296-800-23030 Keep containers used for garbage or waste in a sanitary condition. You must:

- Do the following to maintain your waste containers:

PERMANENT

- Do not allow garbage to leak out of the containers
- Be able to thoroughly clean the containers
- Make sure containers have tight fitting covers (unless you can keep them sanitary without).

Note: If you can demonstrate that you keep your waste container(s) clean, they do not have to meet the requirements.

NEW SECTION

WAC 296-800-23035 Remove garbage and waste in a way that does not create a health hazard. You must:

- Remove all sweepings, solid and liquid wastes, refuse, and garbage as often as necessary to keep the workplace in a sanitary condition.

ENVIRONMENTAL TOBACCO SMOKE IN THE OFFICE

NEW SECTION

WAC 296-800-240 Summary. Your responsibility: To control exposure to *environmental tobacco smoke* in your office work environment.

You must:

Control tobacco smoke in your building

WAC 296-800-24005.

Control tobacco smoke that comes in from the outside

WAC 296-800-24010.

Note: This rule does not preempt any federal, state, municipal, or other local authority's regulation of indoor smoking that is more protective than this section.

Definition: Office work environment is an indoor or enclosed occupied space where clerical work, administration, or business is carried out. In addition, it includes:

- Other workplace spaces controlled by the employer and used by office workers, such as cafeterias, meeting rooms, and washrooms.
- Office areas of manufacturing and production facilities, not including process areas.
- Office areas of businesses such as food and beverage establishments, agricultural operations, construction, commercial trade, services, etc.

NEW SECTION

WAC 296-800-24005 Control tobacco smoke in your building. Exemption: The minimum criteria specified in this rule do not apply to outdoor structures provided for smokers such as gazebos or lean-tos.

You must:

- Prohibit *smoking* in your office work environment or
- Restrict *smoking* inside your office work environment to designated enclosed smoking rooms that meet the following minimum criteria:

- Identify *smoking* rooms clearly with signs.

- Make sure the designated *smoking* rooms are not in common areas, such as:

- ◆ Places where nonsmoking employees are required to work or visit

- ◆ Restrooms
- ◆ Washrooms

- ◆ Hallways
- ◆ Stairways
- ◆ Cafeterias/lunchrooms
- ◆ Meeting rooms

- Make sure that no employee is required to enter a designated *smoking* room while someone is smoking there.

- Conduct cleaning and maintenance work in designated *smoking* rooms when smokers are not present.

You must:

- Ventilate designated smoking rooms at a rate of at least 60 cubic feet per minute per smoker (calculated on the basis of the maximum number of smokers expected during the course of a normal working day), which can be supplied by transfer air from adjacent areas.

- Maintain enough negative air pressure in designated *smoking* areas to prevent smoke from migrating into non-smoking areas, at all times.

- Operate a separate mechanical exhaust system in designated *smoking* rooms, to make sure exhausted air moves directly outside, and does not recirculate into nonsmoking areas.

- Prohibit use of the designated *smoking* room if the mechanical exhaust system is not working properly, until repairs are completed.

Note: This ventilation rate is recommended for occupancies of no more than seven people for every 100 square feet of net occupied space in the designated smoking room.

NEW SECTION

WAC 296-800-24010 Control tobacco smoke that comes in from the outside.

You must:

- Use *engineering or administrative controls* to minimize the amount of tobacco smoke that comes into your office(s) from outside the building.

- Make sure that outside smoking areas used by your employees are not close to doorways, air intakes, and other openings that may allow airflow directly into an office.

Note: • By changing the way workers do their job, you can reduce work exposure to potential hazards. These changes are called administrative controls and include such things as:

- Job rotation
- Wetting down dusty areas
- Having employees shower after exposure to potentially harmful substances
- Maintaining equipment properly
- Cleaning up work areas to control the effect of potential hazards

- Engineering controls let you plan or physically change the machinery or work environment to prevent employee exposure to potential hazards. This includes any modification of plant equipment, processes, or materials to reduce employees' exposure to toxic materials or harmful physical agents.

STAIRS AND STAIR RAILINGS SUMMARY

NEW SECTION

WAC 296-800-250 Summary. Your responsibility: To make sure stairs used by employees are safe

Note: The introduction has important information about building, electrical and fire codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to building, fire, and electrical codes" in the introduction section of this book.

You must:

Provide fixed stairs where required
WAC 296-800-25005

Provide stairs that minimize hazards
WAC 296-800-25010

Provide handrails and stair railings
WAC 296-800-25015.

Exemptions: This rule does **not** apply to:

- ◆ Stairs used exclusively for fire exit purposes
- ◆ Construction operations (See WAC 296-24-76503 for the specifications for the safe design and construction of fixed general industrial stairs.)
- ◆ Private buildings or residences
- ◆ Articulated stairs (for example, stairs used at a marina)
- ◆ Nonindustrial and "monumental" are excluded as they are not "industrial" stairs; however, when public and private building steps are located at loading or receiving docks, in maintenance areas, etc., or are used exclusively by employees, the requirements of this rule must apply.

- Install fixed stairs where:
 - Employees travel between different levels on a predictable and regular basis.
 - Access to platforms is required to give routine attention to equipment under operation.
 - Daily movement between elevations is required to gauge, inspect, and maintain equipment where those work assignments may expose employees to acids, caustics, gases, or other harmful substances.
 - Carrying tools or equipment by hand is a normal work requirement.
- Not use spiral stairways except as secondary exit routes.

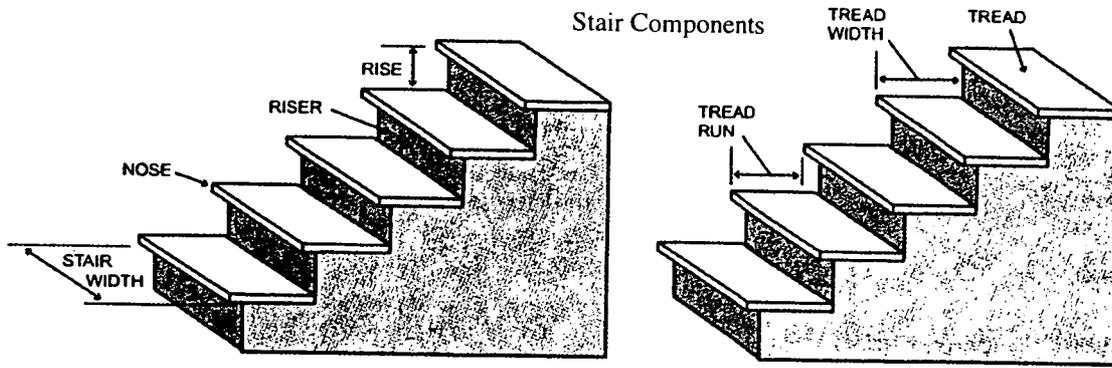

Note: • You can use fixed ladders for climbing elevated structures, such as tanks, towers, and overhead traveling cranes, when their use is common practice in your industry.
• You can use winding stairways on tanks and similar round structures if the structure's diameter is at least five feet.
• You could use a spiral stairway as an exit route in a restricted area that lacks room for a conventional stairway.

Definitions: • A stairway or fixed stairs is a series of steps and landings:
– • Leading from one level or floor to another.
– • Leading to platforms, pits, boiler rooms, crossovers, or around machinery, tanks, and other equipment.
– • Used more or less continuously or routinely by employees or only occasionally by specific individuals.
– • With three or more risers.
• A riser is the vertical part of the step at the back of a tread that rises to the front of the tread above.
• A tread is the horizontal part of the step. Tread width is the distance from the front of the tread to the back.

PERMANENT

NEW SECTION

WAC 296-800-25005 Provide fixed stairs where required. You must:

Stair railing is removed to show detail.

NEW SECTION

WAC 296-800-25010 Provide stairs that minimize hazards. You must:

- (1) Make sure stairs have slip-resistant treads.
- (2) Make sure that stairs with four or more risers have:
 - Railings on the open sides of all exposed stairways and stair platforms
 - Handrails on at least one side of closed stairways, preferably on the right side while descending
- (3) Provide a platform where doors or gates open directly on a stairway. The swing of the door must not reduce the effective width of the platform to less than 20 inches.

Note: To see all of the rules for building fixed stairs, refer to WAC 296-24-75011 and 296-24-765 of the General safety and health standard.

NEW SECTION

WAC 296-800-25015 Provide handrails and stair railings.

Exemption: Vehicle service pit stairways are exempt from the rules for stairway railing and guards, if they would prevent a vehicle from moving into a position over the pit.

Definition: • Handrail is a single bar or pipe on brackets from a wall or partition to provide a continuous handhold for persons using a stair.
• Stair railing is a vertical barrier attached to a stairway with an open side, to prevent falls. The top surface of the stair railing is used as a handrail.

You must:

- Make sure stairways less than forty-four inches wide have:
 - At least one handrail, preferably on your right side as you go down the stairs, if both sides are enclosed.
 - At least one stair railing on the open side, if one side is open.
 - One stair railing on each side, if both sides are open.
- Make sure stairways more than forty-four inches wide but less than eighty-eight inches wide have:
 - One handrail on each enclosed side.
 - One stair railing on each open side.
- Make sure stairways at least eighty-eight inches wide have:
 - One handrail on each enclosed side.
 - One stair railing on each open side.
 - One intermediate stair railing located approximately midway of the width.
- Equip winding stairs with a handrail, offset to prevent walking on all portions of the treads, less than six inches wide.

Note: To see all of the rules for building handrails and stairway railings, refer to WAC 296-24-75009 and 296-24-75011.

FLOOR OPENINGS, FLOOR HOLES AND OPEN-SIDED FLOORS

NEW SECTION

WAC 296-800-260 Summary. Your responsibility: To safely guard floor openings, floor holes, and open-sided floors in your workplace.

You must:

Guard or cover floor openings and floor holes.

WAC 296-800-26005.

Protect open-sided floors and platforms.

WAC 296-800-26010.

NEW SECTION

WAC 296-800-26005 Guard or cover floor openings and floor holes.

Definition: A **floor opening** is an opening in any floor, platform, pavement, or yard that measures at least twelve inches in its smallest dimension and through which a person can fall.

Examples of floor openings are:

- Hatchways
- Stair or ladder openings
- Pits
- Large manholes.

The following are **not** considered **floor openings**:

- Openings occupied by elevators
- Dumbwaiters
- Conveyors
- Machinery
- Containers

A **floor hole** is an opening in any floor, platform, pavement, or yard that measures at least one inch but less than twelve inches at its smallest dimension and through which materials and tools (but not people) can fall.

Examples of floor holes are:

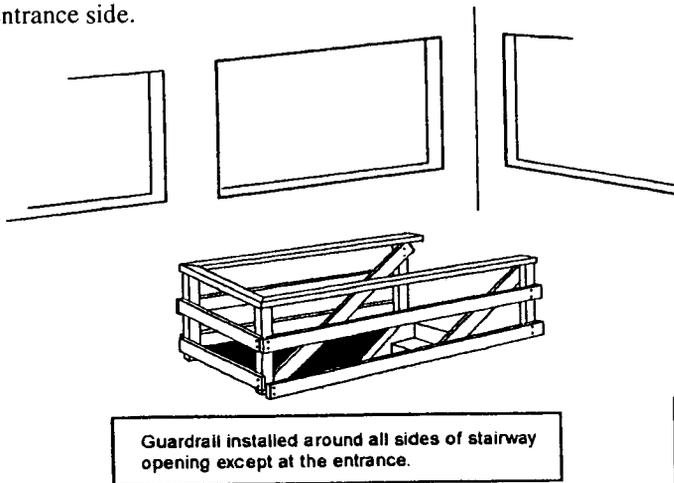

- Belt holes
- Pipe openings

• Slot openings

You must:

(1) Guard stairway floor openings, temporary floor openings and floor holes.

• Protect all stairway floor openings with a railing. The railing must protect all open sides except the stairway entrance side.

• Use a hinged cover and a removable railing where traffic across an infrequently used stairway floor opening prevents the installation of a fixed railing. This removable railing must protect all open sides except the stairway entrance side.

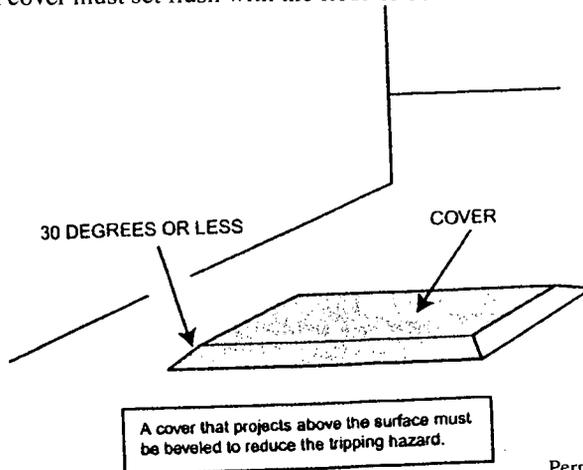

• Protect temporary floor openings by either a railing or by a person who constantly attends the opening.

• Protect exposed floor holes into which a person can accidentally walk by either:

– A railing with a toeboard on all open sides or

– A floor hole cover of standard strength and construction that can be hinged in place. When a floor hole cover is not in place, the hole must be protected by a removable railing or constantly attended by someone.

• Provide covers for floor openings. Floor opening covers may be of any material that has a safety factor of four, or is strong enough to hold up to four times the intended load. Covers that do not project more than one inch above the floor level may be used providing all edges are beveled (slanted) to prevent tripping. All hinges, handles, bolts, or other parts of a cover must set flush with the floor or cover surface.

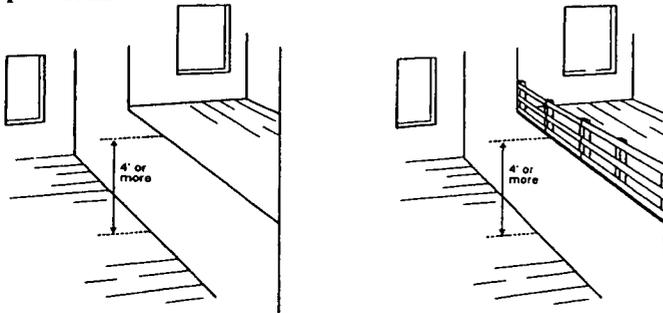

PERMANENT

(2) Prevent tools and materials from falling through a floor hole. The floor hole must be protected by a cover that leaves an opening no more than one inch wide and is securely held in place. This applies only to floor holes that persons cannot accidentally walk into on account of fixed machinery, equipment, or walls.

NEW SECTION

WAC 296-800-26010 Protect open-sided floors and platforms.

OPEN FLOOR (Unguarded)

GUARDED FLOOR

You must:

(1) Guard open-sided floors and platforms.

- Guard open-sided floors and platforms four feet or more above adjacent floor or ground level by a railing. The entrance to a ramp, stairway, or fixed ladder does not need a railing.
- Guard open-sided floors, walkways and platforms above or adjacent to dangerous equipment, pickling or galvanizing tanks, degreasing units, and other similar hazards, regardless of height with a railing and toeboard.

Note:

- Where the guarding rules above do not apply because employees exposure to falls is infrequent (not on a predictable and regular basis), you must comply with the Personal Protective Equipment (PPE) rules (WAC 296-800-160) or other effective fall protection must be provided.
- You can find the minimum requirements for standard railings of various types of construction in WAC 296-24-75011.

You must:

(2) Make sure tools and loose materials are not left on overhead platforms and scaffolds.

WORKPLACE STRUCTURAL INTEGRITY

NEW SECTION

WAC 296-800-270 Summary. Your responsibility: To make sure that the buildings, floors, and other structures in your workplace are safe, well-built, and not overloaded

You must:

Not overload floors or roofs

WAC 296-800-27005.

Make sure that floors are safe

WAC 296-800-27010.

Make sure floors can support equipment that moves or has motion

WAC 296-800-27015.

Post approved load limits (weight limits) for floors

WAC 296-800-27020.

Note: The introduction has important information about fire, building and electrical codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to fire, building and electrical codes" in the introduction section of this book.

NEW SECTION

WAC 296-800-27005 Do not overload floors or roofs.

You must:

- Prohibit overloading roofs and floors of any building or other structure with more weight than is approved by the building official.

NEW SECTION

WAC 296-800-27010 Make sure that floors are safe.

You must:

- Make sure that floors including their parts and structural members are safe.
- Make sure floors are of substantial construction and kept in good repair. This includes floors of:
 - Buildings
 - Platforms
 - Walks and driveways
 - Storage yards
 - Docks
- Make sure that structures are designed, constructed, and maintained to provide a safety factor of 4 times the imposed maximum strain.
 - If you notice bowing, cracking, or other indications of excessive strain on a structure, you must take action to make sure it is safe.

Note: This rule applies to all buildings or those that have had complete or major changes or repairs built after 5/7/74.

NEW SECTION

WAC 296-800-27015 Make sure floors can support equipment that moves or has motion. You must:

- Make sure flooring of buildings, ramps, docks, trestles and other fixed structures that supports equipment that moves or has motion such as vibration, must not be less than two and one-half inch material.

Note: Where flooring is covered by steel floor plates, 2-inch material may be used.

NEW SECTION

WAC 296-800-27020 Post approved load limits (weight limits) for floors. You must:

- Post approved load limits (weight limits) for floors used for mercantile, business, industrial or storage purposes in an obvious place.
- The owner, or owner's agent, of a building (or other part of a workplace) must post the load approved by the building official by:

PERMANENT

- Supplying and affixing a durable metal sign that is marked with the approved load.
- Placing the metal sign in an obvious spot in the space to which it applies.
- Replacing the metal sign if it is lost, defaced, damaged, or removed.

Note: This rule applies to the floor that supports shelving, but not to the shelves themselves.

BASIC ELECTRICAL RULES

NEW SECTION

WAC 296-800-280 Basic electrical rules. Summary.

You must:

Inspect all electrical equipment your employees use to make sure the equipment is safe.

WAC 296-800-28005.

Make sure all electrical equipment is used for its approved or listed purpose.

WAC 296-800-28010.

Make sure electrical equipment used or located in wet or damp locations is designed for such use.

WAC 296-800-28015.

Make sure electrical equipment that is not marked by the manufacturer cannot be used.

WAC 296-800-28020.

Identify disconnecting means.

WAC 296-800-28022.

Maintain electrical fittings, boxes, cabinets, and outlets in good condition.

WAC 296-800-28025.

Maintain all flexible cords and cables in good condition and use safely.

WAC 296-800-28030.

Guard electrical equipment to prevent your employees from electrical hazards.

WAC 296-800-28035.

Make sure electrical equipment is effectively grounded.

WAC 296-800-28040.

Make sure electrical equipment has overcurrent protection.

WAC 296-800-28045.

Your responsibility: To protect your employees from hazards when working with electrical equipment, tools, and appliances.

Note: • The introduction has important information about fire, building and electrical codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to fire, building and electrical codes" in the introduction section of this book.

• These rules guide how electrical equipment is used and maintained in your workplace. They should not be used in place of your local electrical codes if you are installing electrical wiring, electrical circuits or electrical distribution equipment.

• This rule applies to 600 volts or less. Requirements for specific equipment or special installation are found in chapter 296-24 WAC, Part L.

Exemptions: • These rules apply to all electrical equipment used in the workplace, except for:

- Electrical installations and equipment on ships, aircraft and all automotive vehicles other than mobile homes and recreational vehicles;
 - Electrical installations and equipment used to generate, transmit, transform or distribute power exclusively for operation of rolling stock;
 - Electrical installations used exclusively for signaling and communicating with rolling stock;
 - Installations underground in mines;
 - Installations of communication equipment located outdoors or inside buildings used and controlled exclusively by communication utilities;
 - Installations controlled and used exclusively by electric utilities for communication or metering; or
- For generating, controlling, transforming, transmitting and distributing electric energy in buildings used exclusively by the company located:
- ◆ Outdoors on property owned or leased by the utility; or
 - ◆ On public highways, streets and roads; or
 - ◆ Outdoors by established rights on private property.

NEW SECTION

WAC 296-800-28005 Inspect all electrical equipment your employees use to make sure the equipment is safe. You must:

• Inspect electrical equipment to make sure there are no recognized hazards likely to cause your employees' death or serious physical harm. Determine the safety of the equipment by using the following list:

– Has been approved or listed by a recognized testing laboratory, such as Underwriters Laboratories (UL) or other approving agency.

– Is approved, or listed as approved, for the purpose it is being used.

– Has strong and durable guards providing adequate protection including parts designed to enclose and protect other equipment.

– Is insulated.

– Will not overheat under conditions of use.

– Will not produce arcs during normal use.

– Is classified by:

- ◆ Type.
- ◆ Size.
- ◆ Voltage.
- ◆ Current capacity.
- ◆ Specific use.
- ◆ Other factors.

NEW SECTION

WAC 296-800-28010 Make sure all electrical equipment is used for its approved or listed purpose.

Definitions: Electrical outlets are places on an electric circuit where power is supplied to equipment through receptacles, sockets and outlets for attachment plugs.

Receptacles are outlets that accept a plug to supply electric power to equipment through a cord or cable.

You must:

• Make sure electrical outlets are rated equal or greater to the electrical load supplied.

• Make sure the proper mating configuration exists when connecting the attachment plug to a receptacle.

- Make sure when electrical outlets, cord connectors, and receptacles are joined, they accept the attachment plug with the same voltage or current rating.

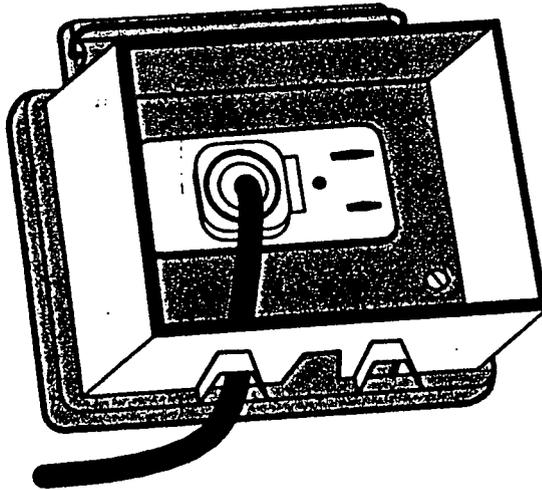

SOME COMMON ELECTRICAL OUTLET (RECEPTACLE) CONFIGURATIONS				
	15 Ampere	20 Ampere	30 Ampere	50 Ampere
Two Pole 3 - Wire Grounding 125 Volt				
Three Pole 3 - Wire 125/250 Volt				

Note: A 20-ampere "T-slot" outlet or cord connector may accept a 15-ampere attachment plug of the same voltage rating.

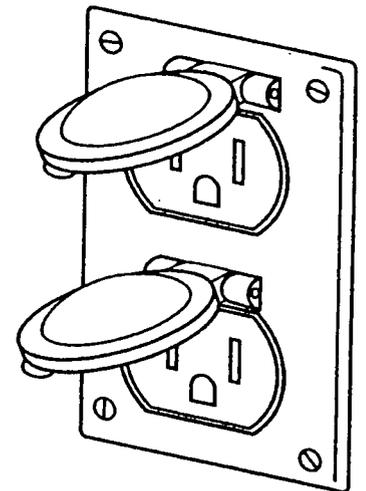

NEW SECTION

WAC 296-800-28015 Make sure electrical equipment used or located in wet or damp locations is designed for such use. You must:

- Make sure fixtures and receptacles located in wet or damp locations are approved for such use. They must be constructed or installed so that water cannot enter or accumulate in wireways, lampholders, or other electrical parts.
- Make sure cabinets, fittings, boxes, and other enclosures in wet or damp locations are installed to prevent moisture or water from entering and accumulating inside.
 - In wet locations these enclosures must be weatherproof.
 - Switches, circuit breakers, and switchboards located in wet locations must be in weatherproof enclosures.

BOX

Electrical equipment used in wet locations must be weatherproof.

NEW SECTION

WAC 296-800-28020 Make sure electrical equipment that is not marked is not used. You must:

- Make sure markings are durable and appropriate to the environment.
- Appropriate markings include:
 - The manufacturer's name.
 - or
 - Trademark.
 - or
 - The organization responsible for the product.
 - and
 - Voltage, current and wattage or other ratings as necessary.

Testing Organization Approval

Manufacturer

Electrical tools and equipment marked to show manufacturer, approvals and power requirements.

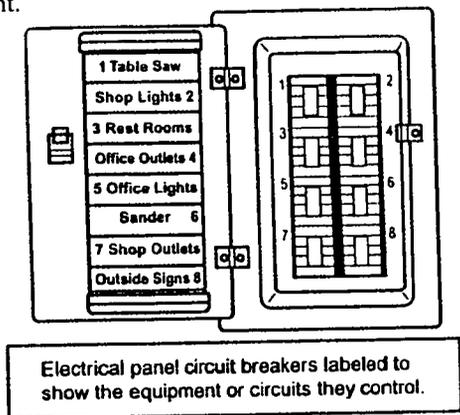

PERMANENT

NEW SECTION

WAC 296-800-28022 Identify disconnecting means.

You must:

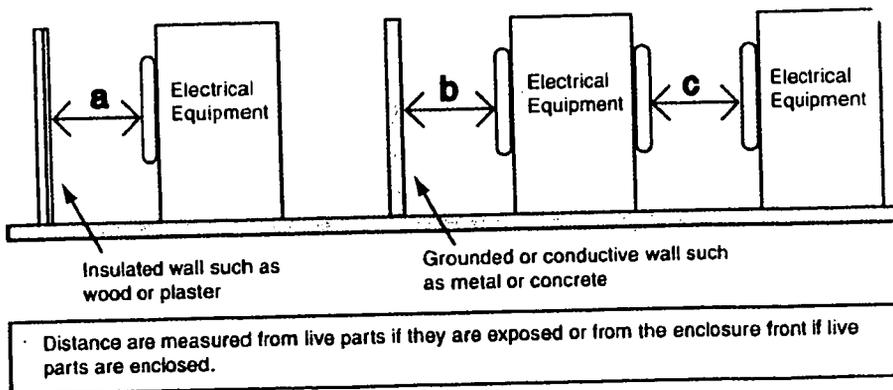

- Make sure the disconnect means (such as on/off switches and circuit breakers) is marked to show when it is open and closed and what equipment it controls, unless located and arranged so the purpose is obvious.
- Make sure each service, feeder and branch circuit is marked, at its disconnecting means or overcurrent device, to show when the circuit is open and closed and what circuit it controls, unless located and arranged so the purpose is obvious.
- Make sure markings are durable and appropriate to the environment.

NEW SECTION

WAC 296-800-28025 Maintain electrical fittings, boxes, cabinets and outlets in good condition. You must:

- (1) Do the following to covers and openings:
- Do the following when conductors enter boxes, cabinets, or fittings:
 - Protect the conductor (wires) from abrasion.
 - Effectively close the openings where conductors enter.
 - Effectively close all unused openings.
 - Provide pull boxes, junction boxes, and fittings with covers approved for the purpose.
 - Make sure each outlet box has a cover, faceplate, or fixture canopy in completed installations.

- Make sure covers for outlet boxes with openings for flexible cord pendants have bushings to protect the cord, or have a smooth and well rounded surface where the cord touches the opening.

- Ground metal covers.

(2) Make sure the area in front of electrical panels, circuit breaker boxes and similar equipment which operates at 600 volts or less:

- Has sufficient working area at least thirty inches wide for operation and maintenance of the equipment.
- Is kept clear and free of stored materials so that employees can access this equipment for servicing, adjustments or maintenance.
- Has at least one access route to provide free and unobstructed access.
- Has at least three feet of working space in front, measured from the exposed live parts or the enclosure front. (See the work clearance table below.)
- Has adequate indoor lighting. (WAC 296-800-210.)
- Has at least six feet three inches of headroom.

This table shows the area you must keep clear depending on the layout of the electrical equipment.

Work Clearance Table

Conditions*	0 - 150 volts to ground	151 - 600 volts to ground
A	3 ft.	3 ft.
B	3 ft.	3 1/2 ft.
C	3 ft.	4 ft.

- Minimum clear distances may be 2 feet 6 inches for equipment built or installed before 3/20/82.
- Conditions A, B, and C are as follows:
 - A= Exposed live parts on one side and no live or grounded parts on the other side of the working space, or exposed live parts on both sides effectively guarded by suitable wood or other insulating material. Insulated wire or insulated bus bars operating at not over 300 volts are not considered live parts.
 - B= Exposed live parts on one side and grounded parts on the other side.
 - C= Exposed live parts on both sides of the workspace (not guarded as provided in condition (a) with the operator between the panels).

PERMANENT

NEW SECTION

WAC 296-800-28030 Maintain all flexible cords and cables in good condition and use safely.

Exemption: These rules do not apply to cords and cables that are an internal part of factory assembled appliances and equipment, like the windings on motors or wiring inside electrical panels.

Note: Flexible cords and cables are typically used to connect electrical equipment to a power source. These cords can have an electrical plug to connect to a power source or can be permanently wired into the power source. The terms flexible cords, extension cord, cables and electrical cords all refer to a type of flexible cord.

You must:

(1) Perform visual inspections.

• On portable cord- and plug-connected equipment and extension cords before use on each work shift. Defects and damage to look for include:

- Loose parts.
- Deformed or missing pins.
- External defects and damage.
- Damage to the outer covering or insulation.
- Pinched or crushed covering or insulation that might indicate internal damage.

EXEMPTION: You do not need to visually inspect portable cord- and plug-connected equipment and extension cords that

stay connected once in place and are not exposed to damage until they are moved.

You must:

• And remove from service any defective or damaged cord until repaired and tested.

Make sure flexible cords and cables are used as described.

(2) Use.

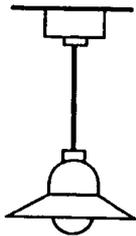

- Use flexible cords only as follows:
 - Wiring of equipment and appliances.
 - Data processing cables approved as a part of the data processing system.
 - Pendants.
 - Wiring for fixtures.
 - Connecting portable lamps or appliances to an approved outlet with an attachment plug.
 - Connecting stationary equipment that is frequently changed with an attachment plug energized from an approved outlet.
 - Preventing noise or vibration transmission.
 - Appliances that have been designed to permit removal for maintenance and repair if the appliance is equipped with an attachment plug energized from an approved outlet.
 - Elevator cables.
 - Wiring of cranes and hoists.

PERMANENT

Common Acceptable Uses of Flexible Cords

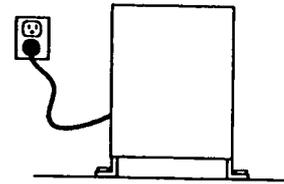

Extension Cord

Pendant Cord Lamp or Control

Portable Appliances Tools and Lamps

Fixed or Stationary Equipment For Easy Maintenance or Replacement

Note: Extension cords (flexible cord sets) may be used on a temporary basis if you follow the rules described in the temporary use section, WAC 296-800-28030(3).

You must:

- Not use flexible cords in the following ways:
 - As a substitute for fixed wiring of a structure.
 - To run through holes in walls, ceilings, or floors.
 - To run through doorways, windows, or similar openings.
 - To attach to building surfaces.
 - To conceal behind building walls, ceilings, or floors.
 - To raise or lower equipment.
- Make sure flexible cords and cables are approved and suitable for:
 - The way they will be used.
 - The location where they will be used.
- Not fasten or hang cords and equipment in any way that could cause damage to the outer jacket or insulation of the cord.
- Make sure insulation on flexible cords and cables is intact.
- Make sure flexible cords and electrical cords are:

- Connected to devices and fittings so that any pulling force on the cord is prevented from being directly transmitted to joints or terminal screws on the plug.

- Used only in continuous lengths without splice* or tap.

• Prohibit your employees from using wet hands to plug or unplug equipment or extension cords if the equipment is energized.

*Note: Hard service flexible cords No. 12 or larger may be repaired or spliced if the insulation, outer sheath properties, and use characteristics of the cord are retained.

You must:

(3) Provide the following for temporary use.

- Make sure temporary electrical power and lighting installations that operate at 600 volts or less are used only:
 - During and for remodeling, maintenance, repair or demolition of buildings and similar activities.
 - Experimental or developmental work.
 - For no more than ninety days for:
 - ◆ Christmas decorative lighting.
 - ◆ Carnivals.
 - ◆ Other similar purposes.

- Make sure flexible cords and electrical cords used on a temporary basis are protected from accidental damage:
 - By avoiding sharp corners and projections
 - If they pass through doorways or other pinchpoints.

NEW SECTION

WAC 296-800-28035 Guard electrical equipment to prevent your employees from electrical hazards. You must:

(1) Guard live parts of electric equipment operating at 50 volts or more against accidental contact by any of the following means:

- By approved cabinets or other forms of approved enclosures.

- By location in a room, vault, or similar enclosure that is accessible only to employees qualified to work on the equipment. Entrances to rooms and other guarded locations containing exposed live parts must be marked with conspicuous warning signs forbidding unqualified persons to enter.

- By permanent, substantial partitions or screens so that only employees qualified to work on the equipment will have access within reach of the live parts. Any openings must prevent accidental contact with live parts by employees or objects employees carry.

- By location on a balcony, gallery, or platform that will exclude unqualified persons.

- By being located eight feet or more above the floor or other working surface.

(2) Make sure all electrical appliances, fixtures, lampholders, lamps, rosettes, and receptacles do not have live parts normally exposed to employee contact.

- Rosettes and cleat type lampholders at least 8 feet above the ground may have exposed parts.

(3) In locations where electric equipment would be exposed to physical damage, enclosures or guards must be so arranged and of such strength as to prevent such damage.

NEW SECTION

WAC 296-800-28040 Make sure electrical equipment is effectively grounded. You must:

- Make sure the path to ground from circuits, equipment, and enclosures is permanent and continuous.

- Make sure equipment connected by cord and plug is grounded under these conditions:

- Equipment with exposed noncurrent carrying metal parts.

- Cord and plug connected equipment which may become energized.

- Equipment that operates at over 150 volts to ground.

Exemption: Except for guarded motors and metal frames of electrically heated appliances, if the appliance frames are permanently and effectively insulated from ground.

- Equipment in hazardous locations. (WAC 296-24-95613)

- Ground the following type of equipment:

- Hand-held motor-operated tools.

- Refrigerators.

- Freezers.

- Air conditioners.

- Clothes washers and dryers.

- Dishwashers.

- Electrical aquarium equipment.

- Hedge clippers.

- Electric lawn mowers.

- Electric snow blowers.

- Wet scrubbers.

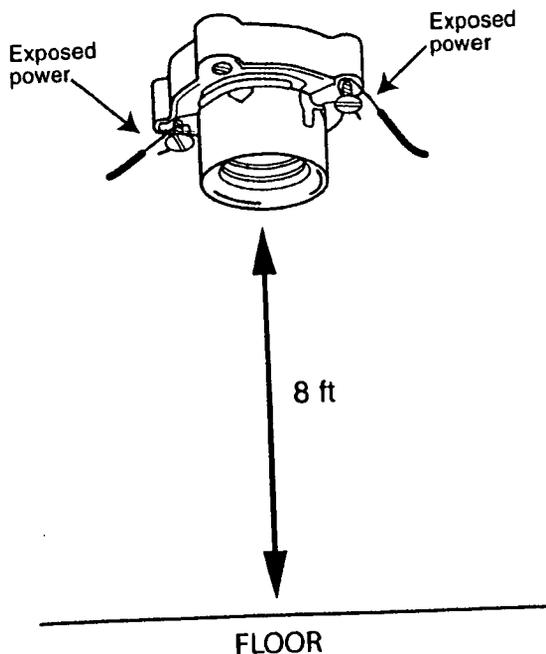

- Tools likely to be used in damp or wet locations.

- Appliances used by employees standing on the ground, on metal floors or working inside of metal tanks or boilers.

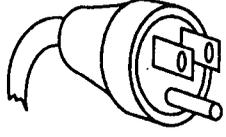

- Portable hand lamps.

Note: Grounding can be achieved by: Using tools and appliances equipped with an equipment grounding conductor (three-prong plug and grounded electrical system).

Live Parts Guarded by Distance

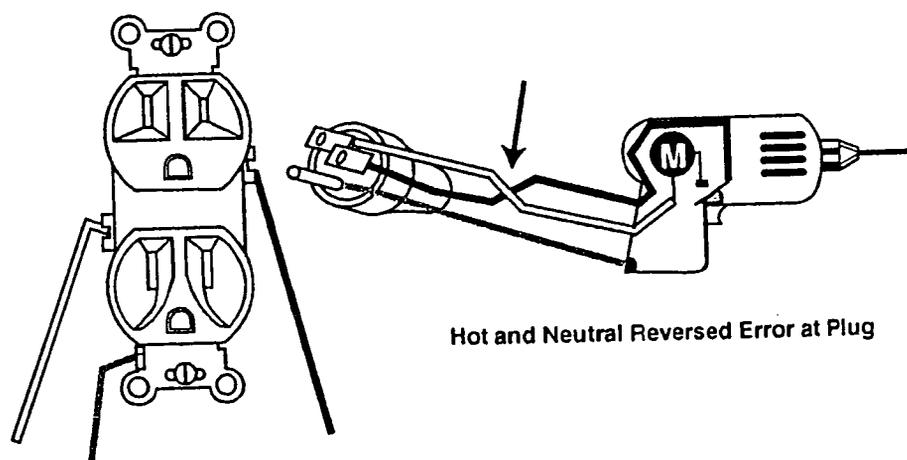

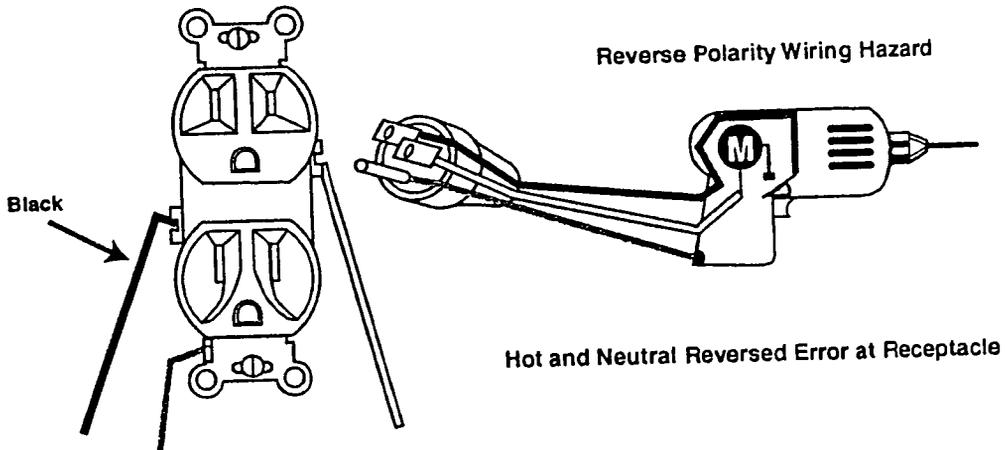

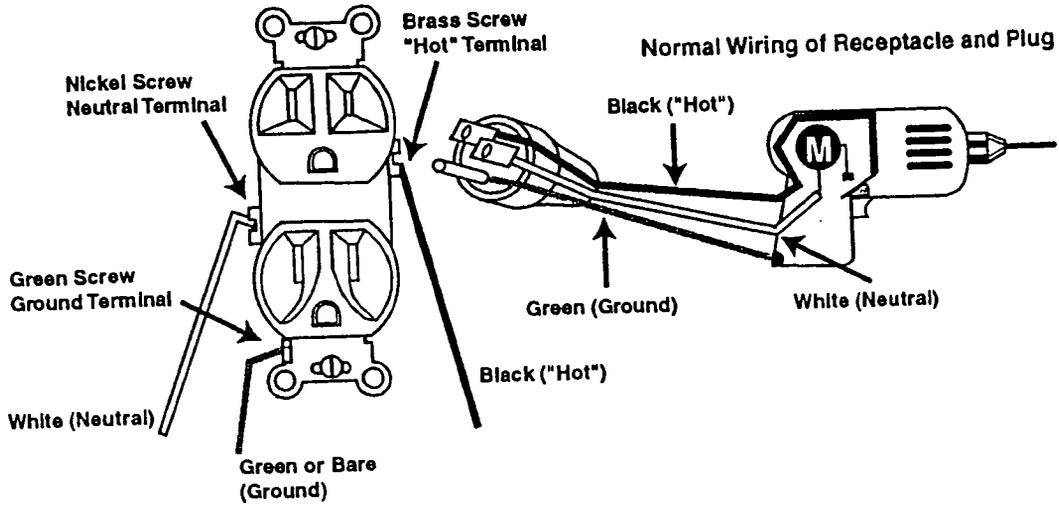

PERMANENT

Grounded Plug	Double Insulated
	<p data-bbox="694 226 910 267">Double Insulated</p> 
<p data-bbox="397 343 1187 394">Hand held tools and some other types of equipment must use a 3-wire plug or the tool label must show the tool as insulated by words or symbol.</p>	

You must:

- Make sure exposed metal parts of fixed equipment that do not conduct electricity, but may become energized, are grounded if the equipment is in a wet or damp location and is not isolated.
- Make sure ground wires are identified and look different than the other conductors (wires).
- Make sure ground wires are not attached to any terminal or lead to reverse polarity of the electrical outlet or receptacle.
- Make sure grounding terminals or grounding-type devices on receptacles, cords, connectors, or attachments plugs are not used for purposes other than grounding.

PERMANENT

Reverse polarity wiring can cause a faulty tool to start as soon as it is plugged in or not stop when the switch is released. This could cause an injury. An extremely dangerous type of reverse polarity wiring switches the hot and ground wires. This causes the body of the tool or appliance to be "hot". Touching the tool and conductive surface can result in serious or even deadly shock.

PERMANENT

NEW SECTION

WAC 296-800-28045 Make sure electrical equipment has overcurrent protection. You must:

- Make sure all electrical circuits that are rated at 600 volts or less have overcurrent protection.
- Protect conductors and equipment according to their ability to safely conduct electrical current.
- Make sure overcurrent devices do not interrupt the continuity of grounded conductors unless:
 - All conductors are opened at the same time or
 - You are using the overcurrent devices to protect from overload when running motors
 - You protect employees from electrical arcing or suddenly moving electrical parts by locating fuses and circuit breakers in safe places. If this is not possible, install shields on fuses and circuit breakers.
- Make sure the following fuses and thermo cutouts have disconnecting mechanisms:
 - All cartridge fuses accessible to nonqualified persons
 - All fuses on circuits over 150 volts to ground
 - All thermal cutouts on circuits over 150 volts to ground.
 - The disconnecting mechanisms must be installed so you can disconnect the fuses or thermal cutouts without disrupting service to equipment and circuits unrelated to those protected by the overcurrent device.
- Provide easy access to overcurrent devices for each employee or authorized building management personnel.
- Protect the overcurrent devices by locating them away from easily ignitable material.
 - They must be placed to avoid exposure to physical damage.
- Make sure circuit breakers:
 - Clearly indicate when they are open (off) and closed (on)
 - That operate vertically are installed so the handle is in the "up" position when the breaker is closed (on). See WAC 296-24-95603 (2)(c) for more information
 - Used as switches in 120-volt, fluorescent lighting circuit must be approved for that purpose and marked "SWD." See WAC 296-24-95603 (2)(c) for more information.
 - That have arcing or suddenly moving parts, are shielded or located so employees will not get burned or injured by the operation of the circuit breaker
 - ◆ Fuses must also be shielded in this way

PORTABLE LADDERS: METAL AND WOODEN

NEW SECTION

WAC 296-800-290 Summary. Your responsibility: To make sure the portable ladders in your workplace are used safely and kept in good condition.

Portable metal ladders.

You must:

Inspect your portable metal ladders periodically.

WAC 296-800-29005.

Make sure your portable metal ladders are kept in good condition.

WAC 296-800-29010.

Use your portable metal ladders safely.

WAC 296-800-29015.

Portable wooden ladders.

You must:

Inspect your portable wooden ladders frequently.

WAC 296-800-29020.

Make sure your portable wooden ladders are kept in a good condition.

WAC 296-800-29025.

Use your portable wooden ladders safely and for their intended purpose.

WAC 296-800-29030.

Safely use a portable wooden ladder when working more than 25 feet above ground.

WAC 296-800-29035.

Use wooden stepladders safely.

WAC 296-800-29040.

Exemption: These rules apply to common types of portable wooden ladders except:

- Fruit picker ladders
- Industrial tripod ladders
- Combination step and extension ladders
- Stockroom step ladders
- Aisle way step ladders
- Shelf ladders
- Library ladders
- Other special ladders

Note: • For design and construction requirements for wood and metal ladders, see WAC 296-24-780 and 296-24-79503 of the General safety and health standard.
 • There are different types of ladders. Be sure to use one that is capable of handling the combined weight of the climber and the load being carried (working load).

Type	Duty Rating	Working Load
IAA	Industrial	Special duty—375 lbs. maximum
IA	Industrial	Extra heavy—300 lbs. maximum
I	Industrial	Heavy—250 lbs. maximum
II	Commercial	Medium—225 lbs. maximum
III	Household	Light—200 lbs. maximum

PORTABLE METAL LADDERS

NEW SECTION

WAC 296-800-29005 Inspect your portable metal ladders periodically. You must:

- Immediately inspect a ladder if it:
 - Tips over.
 - Is exposed to oil or grease.
 - Is exposed to excessive heat as in the case of fire.
 - Is subjected to certain acids or alkali solutions.
- If it tips over, look at:
 - The rails for dents, bends or dented rungs.
 - All the rungs to side rail connections.
 - The hardware connections.
 - Rivets for shear damage.

PERMANENT

- Inspect the cables and ropes on portable metal ladders and replace them if they are defective
- Check hardware fittings and accessories frequently and keep them in good condition
- Mark defective ladders and take them out of service until repaired by a maintenance department or the manufacturer.

- Store your portable metal ladders on racks designed to protect them when not in use. The racks must have enough supporting points to prevent any possibility of excessive sagging.

- Properly support your ladder while transporting on vehicles. To prevent chafing and the effects of road shock, use supports that are made of material softer than the metal ladder, such as hardwood or rubber-covered iron pipe.

Note: Tying the ladder to each support point will greatly reduce damage due to road shock.

NEW SECTION

WAC 296-800-29010 Make sure your portable metal ladders are kept in good condition. You must:

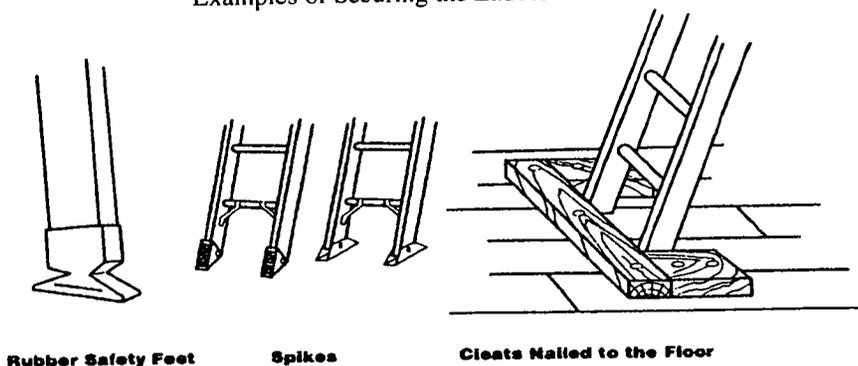

- Maintain your portable metal ladders in good, usable condition, at all times.
- Handle portable metal ladders with care and avoid dropping, jarring, or misusing them.

NEW SECTION

WAC 296-800-29015 Use your portable metal ladders safely. You must:

- (1) Use metal ladders only for their intended purpose.
- (2) Make sure the base section of the portable metal ladder has secure footing.

Examples of Securing the Ladder Base

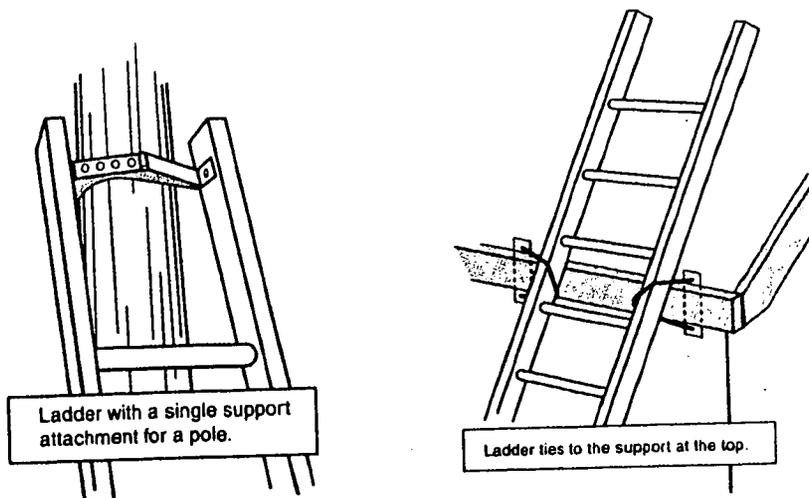

Rubber Safety Feet

Spikes

Cleats Nailed to the Floor

- (3) Make sure both rails are supported at the top, unless the ladder has a single support attachment.

Examples of Securing the Ladder at the Top

Ladder with a single support attachment for a pole.

Ladder ties to the support at the top.

PERMANENT

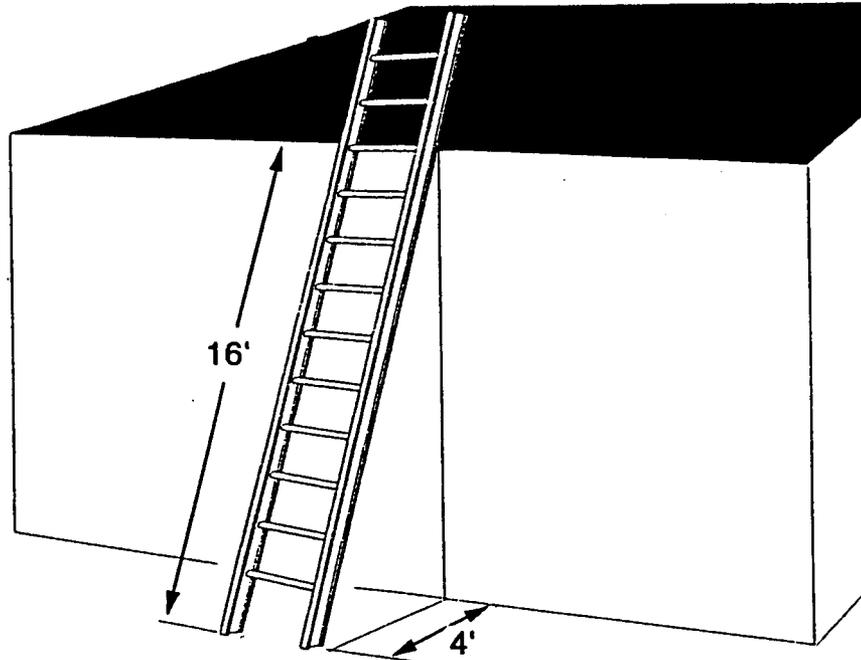

(4) Make sure while climbing portable metal ladders, you:

- Have both hands free to hold on to the ladder.
- Face the ladder when you are climbing up or down.

(5) Not tie or fasten ladder sections together to make longer ladders (unless the ladder manufacturer endorses this type of use, and you have hardware fittings specifically for this use).

(6) Make sure a nonself-supporting portable ladder is set at a safe angle. The proper angle is to place the base a distance from the vertical wall equal to one-fourth the working length of the ladder.

Note: Safe ladder angle. A simple rule for setting up a ladder at the proper angle is to place the base a distance from the wall, equal to 1/4 the working length of the ladder. For example, if your ladder is 16 feet long, set the bottom of the ladder 4 feet away from the wall.

PORTABLE WOODEN LADDERS

NEW SECTION

WAC 296-800-29020 Inspect your portable wooden ladders frequently. You must:

- Make sure ladders with defects are:
 - Withdrawn from service to be repaired or destroyed
 - Tagged as "dangerous do not use."

NEW SECTION

WAC 296-800-29025 Make sure your portable wooden ladders are kept in a good condition. You must:

- Make sure your portable wooden ladders are maintained in good condition, and:
 - Joints between the steps or rungs and side rails are tight
 - Hardware and fittings are securely attached
 - Moveable parts operate freely without binding or excessive play
 - Metal bearings are lubricated frequently
 - Frayed or badly worn ropes is replaced
 - Safety feet and other auxiliary equipment are kept in good condition
- Not use portable wooden ladders with:

- Broken or missing steps
- Broken or missing rungs or cleats
- Broken side rails
- Other faulty equipment
- Not make improvised repairs on your portable wooden ladders.
- Not store your portable wooden ladders near sources of heat, moisture, or dampness.

NEW SECTION

WAC 296-800-29030 Use your portable wooden ladders safely and for their intended purpose. You must:

- (1) Use the appropriate length of ladder.
 - Use single ladders less than or equal to 30 feet long.
 - Use 2-section extension ladders less than or equal to 60 feet long.
- (2) Make sure ladders meet the following rules:
 - Shorter sections cannot be spliced to make longer sections.
 - Ladders can be made by fastening cleats across a single rail.
- (3) Use ladders safely.
 - Make sure ladders are not used as guys, braces, or skids.

PERMANENT

- Putting ladders on boxes, barrels or other unstable bases to make the ladder taller is not allowed.
- Make sure ladders are not used in a horizontal position.
- (4) Make sure that rung and cleat ladders are set up at a safe angle. (See note and illustration on safe ladder angle in WAC 296-800-29015.)

(5) Make sure that where the top of the ladder rests is reasonably rigid and strong enough to support the load.

(6) Place the bottom of a portable wooden ladder so it will not slip, or the bottom must be tied or held in position.

(7) Not place a portable wooden ladder in front of doors that open towards the ladder, UNLESS YOU:

- Block the door open, or
 - Lock the door, or
 - Guard the door to keep it from opening into the ladder
- (8) Make sure 2-section extension ladders overlap as follows:

Length of section of extension ladders (feet)	Minimum overlap allowed (feet)
Less than 36	3
37-48	4
49-60	5

(9) Make sure ladders with metal reinforced rails are used with the reinforcement on the underside to avoid hazards such as tripping and electrocution.

(10) Not place ladders in elevator shafts and hoistways, except where used by workers assigned to that type of work.

- Employees must be protected from falling objects, when assigned to work on ladders in elevator shafts and hoistways.

(11) Not support more than one section of plank per ladder rung.

- Do not allow more than 2 persons on one section of planking at a time.

(12) Brace the ladder to reduce the spring caused by weight on the ladder.

(13) Keep shoes free and clean of greasy and slippery substances when climbing.

(14) Have both hands free to hold on to the ladder when climbing.

NEW SECTION

WAC 296-800-29035 Safely use a portable wooden ladder when working more than 25 feet above ground.

You must:

- (1) Secure the ladder at the top and bottom.
- (2) Not perform work that requires the use of both hands unless wearing a safety belt and lanyard secured to the ladder.
- (3) Not perform work requiring eye protection, respirators and/or pressure equipment if thirty feet above the ground.

NEW SECTION

WAC 296-800-29040 Use wooden stepladders safely.

You must:

- (1) Use stepladders that are less than twenty feet.

- (2) Not climb on the bracing or the back legs.
- (3) Not use as single ladders.
- (4) Not stand on a step higher than the third step from the top, if working five feet or higher from the ground.
- (5) Not use the tops of stepladders as steps.

PORTABLE FIRE EXTINGUISHERS

NEW SECTION

WAC 296-800-300 Summary—Portable fire extinguishers. Important:

The following WISHA rule applies to the placement, use, maintenance, and testing of portable fire extinguishers provided for the use of employees. Your local fire marshal also enforces fire codes which address fire safety that are more comprehensive and may go beyond WISHA rules.

Note: The introduction has important information about building, electrical and fire codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to building, fire and electrical codes" in the introduction section of this book.

Your responsibility:

To provide readily accessible, appropriate portable fire extinguishers for employees in your workplace

You must:

Provide portable fire extinguishers in your workplace
WAC 296-800-30005

Select and distribute portable fire extinguishers in your workplace
WAC 296-800-30010

Make sure that portable fire extinguishers are kept fully charged, in good operating condition, and left in their designated places
WAC 296-800-30015

Inspect and test all portable fire extinguishers
WAC 296-800-30020

Train your employees to use portable fire extinguishers
WAC 296-800-30025

Exemptions:

- You are exempt from the requirements of portable fire extinguishers if you have the following:

You have:

- A written fire safety policy that requires the immediate and total evacuation of employees from the workplace when there is a fire alarm signal,

AND

- An emergency action plan and a fire prevention plan which meet the requirements of WAC 296-24-567

AND

- Portable fire extinguishers in your workplace that are not accessible for employee use

- If another WISHA rule requires portable fire extinguishers, then you must comply with these requirements.

- Where extinguishers are provided but are not intended for employee use and you have an emergency action plan and a fire prevention plan (which meet the requirements of WAC 296-24-567), then only the requirements of WAC 296-800-30020 apply.

PERMANENT

NEW SECTION

WAC 296-800-30005 Provide portable fire extinguishers in your workplace. You must:

- (1) Provide approved portable fire extinguishers for your workplace and distribute them so they are readily accessible
 - Make sure that your portable fire extinguisher does not use extinguishing agents such as carbon tetrachloride or chlorobromomethane extinguishing agents. In addition, soda-acid foam, loaded stream, anti-freeze and water extinguishers of the inverting type shall not be recharged or placed into service.
- (2) Mount, locate, and identify portable fire extinguishers so employees can easily reach them, without being subjected to possible injury.

NEW SECTION

WAC 296-800-30010 Select and distribute portable fire extinguishers in your workplace. Exemption:

- This does not apply to the portable fire extinguishers provided for employees to use outside of workplace buildings or structures.
 - You are exempt from the distribution requirements of this rule if you have an emergency action plan (that meets requirements of WAC 296-24-567):
 - Which designates certain employees to be the only employees authorized to use the available portable fire extinguishers; and
 - Requires all other employees in the fire area to immediately evacuate the affected work area upon the sounding of the fire alarm
- You must:
- Provide the correct type of portable fire extinguishers and distribute them in your workplace, depending on the type, size, and severity of fire that could occur
 - The type of portable fire extinguishers you must have in your workplace depends on the types of fire hazards that exist in your workplace

Fire Extinguisher Distance Table

Type of fire hazard	Maximum distance from the fire hazard to a fire extinguisher
Type of fire hazard Wood, cloth, paper, rubber (Class A fire hazards)	No more than 75 feet (22.9 m) Note: You may use uniformly spaced standpipe systems or hose stations instead of Class A portable fire extinguishers, if they meet the requirements of WAC 296-24-602 or 296-24-607.

Liquids, grease, gases (Class B fire hazards)	No more than 50 feet (15.2 m) Note: You may choose to use a smaller fire extinguisher in lieu of that required for the 50 foot distance. If you do choose to have the smaller fire extinguisher, the travel distance must not be greater than 30 feet. See UFC Standard 10 Chapter 3 for the basic minimum extinguisher rating allowed.
Live electrical using equipment and circuits (Class C fire hazards)	Distribute any Class C portable fire extinguishers the same pattern that you have for any Class A or Class B fire hazards. If the electrical equipment is deenergized, you may use a Class A or Class B portable fire extinguisher.
Powder, flakes, and residue from combustible metals, like magnesium and titanium, that build up over a 2-week period (Class D fire hazards)	No more than 75 feet (22.9 m)

NEW SECTION

WAC 296-800-30015 Make sure that portable fire extinguishers are kept fully charged, in operable condition, and left in their designated places. You must:

- Make sure that fire extinguishers found with deficiencies are removed from service and replaced with a suitable fire extinguisher.

NEW SECTION

WAC 296-800-30020 Inspect and test all portable fire extinguishers. You must:

- Perform inspections:
 - Make sure that portable fire extinguishers or hose systems (used instead of fire extinguishers) are visually inspected monthly
 - Perform maintenance checks:
 - Make sure that all portable fire extinguishers are subjected to an annual maintenance check
 - Keep records of all annual maintenance checks and make available to the department upon request:
 - ◆ For 1 year after the last maintenance check;
 - OR
 - ◆ For the life of the shell, whichever is less
 - Make sure that equal protection is provided when portable fire extinguishers are removed from service for maintenance and recharging
- Exemption: Most stored pressure extinguishers do not require an internal examination. Examples of those that do require an internal examination are those containing a loaded stream agent.

PERMANENT

You must:

- Perform hydrostatic testing:

Exemption:

- Dry chemical extinguishers that have nonrefillable disposable containers are exempt from this requirement.
- Manually pressurized pumptanks are exempt from this requirement.

You must:

- Make sure that portable extinguishers are hydrostatically tested:
 - At the intervals listed in Table 1 page 300-7
 - Whenever they show evidence of corrosion or mechanical injury
- Not perform hydrostatic testing on fire extinguishers if:
 - The unit has been repaired by soldering, welding, brazing, or use of patching compounds
 - The cylinder or shell threads are damaged
 - Corrosion has caused pitting, including corrosion under removable name plate assemblies
 - The extinguisher has been burned in a fire
 - Calcium chloride extinguishing agents have been used in a stainless steel shell

Note: Specific rules regarding conducting hydrostatic tests are covered in WAC 296-24-59212.

You must:

- Maintain records showing that hydrostatic testing has been performed. Provide the following evidence to the department upon request:
 - Date of test
 - Test pressure used
 - The serial number, or other identifier of the fire extinguisher that was tested
 - Person or agency performing the test
 - Keep records until:
 - The extinguisher is retested;
- OR
- The extinguisher is taken out of service, whichever comes first
 - Empty and maintain stored-pressure dry chemical extinguishers requiring a 12-year hydrostatic test, every six years:
 - When recharging or hydrostatic testing is performed, the 6-year requirement begins from that date

Hydrostatic Test Table

Type of Extinguisher	Test Interval (Years)
Stored pressure water and/or antifreeze	5
Wetting agent	5
Foam (stainless steel shell)	5
Aqueous film forming form (AFFF)	5
Loaded stream	5
Dry chemical with stainless steel	5
Carbon dioxide	5

Dry chemical, stored pressure, with mild steel, brazed brass or aluminum shells	12
Halon 1211	12
Halon 1301	12
Dry powder, cartridge or cylinder operated, with mild steel shell	12

Note: Stored pressure water extinguishers with fiberglass shell (pre-1976) are prohibited from hydrostatic testing due to manufacturer's recall.

NEW SECTION

WAC 296-800-30025 Train your employees to use portable fire extinguishers. You must:

- Train your employees where you have provided portable fire extinguisher for their use in:
 - The hazards involved with incipient stage fire fighting (the early stage of a fire when it can be extinguished by a portable fire extinguisher)
 - The general principles of fire extinguisher use
- Provide the training when they are first hired and then annually.

EXIT ROUTES AND EMPLOYEE ALARM SYSTEMS

NEW SECTION

WAC 296-800-310 Summary. Your responsibility: To provide and maintain emergency exit routes and to install and maintain adequate employee alarm systems.

Exemption: This rule does not apply to vehicles, vessels, or other mobile structures.

Note: The introduction has important information about building, electrical and fire codes that may apply to you in addition to WISHA rules. See "How do the WISHA rules relate to building, fire, and electrical codes" in the introduction section of this book.

Exit routes:

You must:

- Provide an adequate number of exit routes. *WAC 296-800-31005.*
- Make sure that exit routes are large enough. *WAC 296-800-31010.*
- Make sure that exit routes meet their specific design and construction requirements. *WAC 296-800-31015.*
- Make sure that each exit route leads outside. *WAC 296-800-31020.*
- Provide unobstructed access to exit routes. *WAC 296-800-31025.*
- Exit doors must be readily opened from the inside. *WAC 296-800-31030.*
- Use side-hinged doors to connect rooms to exit routes. *WAC 296-800-31035.*
- Provide outdoor exit routes that meet requirements. *WAC 296-800-31040.*

PERMANENT

Minimize danger to employees while they are using emergency exit routes.

WAC 296-800-31045.

Mark exits adequately.

WAC 296-800-31050.

Provide adequate lighting for exit routes and signs.

WAC 296-800-31053.

Maintain the fire retardant properties of paints or other coatings.

WAC 296-800-31055.

Maintain emergency safeguards.

WAC 296-800-31060.

Maintain exit routes during construction and repair.

WAC 296-800-31065.

Provide doors in freezer or refrigerated rooms that open from the inside.

WAC 296-800-31067.

Employee alarm systems:

You must:

Install and maintain an appropriate employee alarm system.

WAC 296-800-31070.

Establish procedures for sounding emergency alarms.

WAC 296-800-31075.

Test the employee alarm system.

WAC 296-800-31080.

EXIT ROUTES

NEW SECTION

WAC 296-800-31005 Provide an adequate number of exit routes. You must:

- Provide a minimum of two exit routes to provide different ways for employees to leave the workplace safely during an emergency (at least two of the exit routes must be remote from one another so employees can safely exit if one exit route becomes blocked or unavailable).

- Provide an adequate number (at least two) of exit routes, considering the kind, number, location and capacity, appropriate to each building according to the following conditions:

- Number of employees
- Size of building
- Arrangement of workplace
- Building occupancy

Note: A single exit route is permitted where the number of employees, the size of the building, its occupancy, or the arrangement of the workplace indicates that a single exit will allow all employees to exit safely during an emergency. Other means of escape, such as fire exits or accessible windows, should be available where only one exit route is provided.

NEW SECTION

WAC 296-800-31010 Make sure that exit routes are large enough. You must:

- Make sure each exit route is large enough to accommodate the maximum-permitted occupant load for each floor served by the route.

- Make sure the capacity of an exit route does not decrease at any point.

- Make sure an exit route is at least 6 feet 8 inches high at all points.

- Make sure objects that stick out into the exit route, such as fans hanging from the ceilings or cabinets on walls, do not reduce the minimum height and width of the exit route.

- Make sure exit routes are at least 28 inches wide at all points between any handrails.

- If necessary, routes must be wider than 28 inches to accommodate the expected occupant load.

NEW SECTION

WAC 296-800-31015 Make sure that exit routes meet their specific design and construction requirements. You must:

- Make sure each exit is a permanent part of the workplace.

- Make sure an exit route has only those openings necessary to permit access to, or exit from, occupied areas of the workplace.

- Make sure any opening into an exit through a fire wall is protected by a self-closing fire door that remains closed.

- Make sure each fire door, its frame, and its hardware is listed or approved by a nationally recognized testing laboratory.

- Make sure construction materials, used to separate an exit route, have at least:

- One-hour fire resistance rating if the exit connects three stories or less.

- Two-hour fire resistance rating if the exit connects four stories or more.

- Make sure employees are provided with stairs or a ramp, if the exit route is not substantially level.

NEW SECTION

WAC 296-800-31020 Make sure that each exit route leads outside. You must:

- Make sure that building exit routes lead:

- Directly outside or to a street, walkway; or to an open space with access to the outside.

- To streets, walkways, or open spaces large enough to accommodate all building occupants likely to use the exit.

- Make sure the exit routes clearly show the route employees use to leave the building in an emergency.

- Install a standard safeguard with a warning sign, if a doorway or corner of a building could allow an employee to walk in front of an engine or trolley.

- Use doors, partitions, or other effective means to show employees the correct route out of the building, if the stairs in your exit route lead anywhere but out of the building.

Note: If the stairs in your exit route lead past the exit to the basement, you might install a gate at the point they lead towards that basement. The gate could help your employees stay on the exit route taking them out of the building.

NEW SECTION

WAC 296-800-31025 Provide unobstructed access to exit routes. You must:

- (1) Provide exit routes that are always free of obstructions so all employees can safely exit the building during an emergency.
- (2) Make sure employees are not required to travel to a dead end or through a room that can be locked, such as a restroom.

NEW SECTION

WAC 296-800-31030 Exit doors must be readily opened from the inside.

Exemption: An exit door may be locked or blocked from the inside in a mental, penal, or correctional institution, if supervisory personnel are continuously on duty and a plan exists to remove employees and inmates during an emergency.

You must:

- Make sure all exit doors readily open from the inside without keys, tools, or special knowledge. A device that locks only from the outside, such as a panic bar, is permitted. An exit door must be free of any device or alarm that could restrict emergency use of an exit if the device or alarm fails.

NEW SECTION

WAC 296-800-31035 Use side-hinged doors to connect rooms to exit routes. You must:

- Use a side-hinged exit door to connect any room to an exit route. The door must swing out when the room:
 - Is occupied by more than fifty persons; or
 - Contains highly flammable or explosive materials.

NEW SECTION

WAC 296-800-31040 Provide outdoor exit routes that meet these requirements. You must:

- Make sure an outdoor exit route (such as an interior balcony, porch, gallery, or roof) meets all requirements for an indoor exit route. In addition, an outdoor exit route must also:
 - Have guardrails to protect unenclosed sides.
 - Be covered if snow or ice is likely to accumulate without regular removal.
 - Be reasonably straight with smooth, solid, substantially level floors.
 - Have no dead ends more than twenty feet long that branch off of the exit route.

NEW SECTION

WAC 296-800-31045 Minimize danger to employees while they are using emergency exit routes. You must:

- Maintain each exit route to minimize danger to employees during an emergency.
- Keep each exit route free of explosive or highly flammable furnishings and decorations.

- Not require employees to travel toward areas where high hazard materials are stored, unless the route is protected by partitions or physical barriers. High hazard materials are materials that:

- Burn quickly
- Emit poisonous fumes when burned
- Are explosive

NEW SECTION

WAC 296-800-31050 Mark exits adequately. You must:

- Mark each exit with a clearly visible, distinctive sign reading "exit."
- Mark any doorway or passage that might be mistaken for an exit with "not an exit" or with an indication of its actual use.
- Make sure exit signs are a distinctive color.
- Make sure signs are posted and arranged along exit routes to adequately show how to get to the nearest exit and clearly indicate the direction of travel.
- Not obstruct or conceal exit signs in any way.
- Keep exit doors free of signs or decorations that obscure their visibility.

NEW SECTION

WAC 296-800-31053 Provide adequate lighting for exit routes and signs. You must:

- Illuminate each exit route adequately and reliably.
- Have at least five foot-candles illumination from a reliable light source.
- Make sure any exit signs illuminated by artificial lights and made of translucent material (other than internally illuminated types)
 - Have screens, discs or lens of at least twenty-five square inches in size; and
 - Show red or other designated color on the approach side of the exit.
- Make sure brightly lit signs, displays, or objects in or near the line of vision do not distract attention from the exit sign.
- Make sure exit signs that are self-lighting have a minimum luminance surface value of .06 footlamberts.

NEW SECTION

WAC 296-800-31055 Maintain the fire retardant properties of paints or other coatings. You must:

- Maintain any paints or other coatings with fire retardant properties so they retain their fire retardant properties.

NEW SECTION

WAC 296-800-31060 Maintain emergency safeguards. You must:

- Maintain each safeguard in proper working order to protect employees during an emergency. Emergency safeguards include items such as:
 - Sprinkler systems.

- Alarm systems.
- Fire doors.
- Exit lighting.

NEW SECTION

WAC 296-800-31065 Maintain exit routes during construction and repair. You must:

- Have enough exit routes that comply with these rules before letting your employees occupy a workplace under new construction.
- Make sure that employees do not occupy an existing workplace unless:
 - All exits and existing fire protection are maintained; or
 - Alternate fire protection is provided that ensures an equivalent level of safety.
- Make sure that flammable or explosive materials used during construction or repair do not expose employees to additional hazards or prevent emergency escape.

NEW SECTION

WAC 296-800-31067 Provide doors in freezer or refrigerated rooms that open from the inside. You must:

- Make sure that walk-in refrigerators or freezer rooms have doors with opening devices allowing them to be opened from the inside even when they are locked from the outside.

NEW SECTION

WAC 296-800-31070 Install and maintain an appropriate employee alarm system.

- Exemptions:
- If you have ten or fewer employees in a particular workplace, you can use direct voice communication to sound the alarm, if all employees can hear it. For this kind of workplace, you do not need a back-up system.
 - In workplaces where employees would not otherwise be able to recognize audible or visible alarms, you can use tactile devices to alert them.

You must:

- Make sure that a working employee alarm system with a distinctive signal to warn employees of fire or other emergencies is installed and maintained, unless employees can see or smell a fire or other hazard.
- Make sure that the following systems meet the requirements of this rule, if you use them as your employee alarm system:
 - Supervisory alarms
 - Discharge alarms
 - Detection systems required on fixed extinguishing systems
 - Detection systems required on fire suppression systems
- Make sure that your employee alarm systems are:
 - Providing enough warning to allow employees to safely escape from the workplace, the immediate work area, or both.
 - Noticeable above surrounding noise or light levels by all employees in the affected portions of the workplace.

- Distinctive and recognizable as a signal, to evacuate the work area.

- Restored to working order as soon as possible, after each test or alarm.

- Supervised, if installed after July 1, 1982, and if it has that capacity.

- Able to alert assigned personnel whenever a malfunction exists in the system.

- Adequately warning employees of emergencies.

- Serviced, maintained, and tested by a person trained in the alarm system's design and functions to keep the system operating reliably and safely.

- In working order, except when undergoing repairs or maintenance.

- Warning employees of fire or other emergencies with a distinctive signal, if they are not able to see or smell a fire or other hazard.

- Manual actuation devices that, if provided, are unobstructed, easy to find, and readily accessible.

- Using alarm devices, components, combinations of devices, or systems with approved construction and installation. This applies to steam whistles, air horns, strobe lights, or similar lighting devices, as well as tactile devices.

- Supplied with spare alarm devices available to restore the system promptly if a component breaks, is worn, or destroyed.

- Kept in full operating condition by maintaining and replacing power supplies as often as necessary.

- Supplied with a back-up means of alarm, such as employee runners or telephones, when regular systems are out of service.

NEW SECTION

WAC 296-800-31075 Establish procedures for sounding emergency alarms. You must:

• Explain to each employee how to sound the alert for emergencies. Methods of reporting emergencies can include:

- Manual pull box alarms.

- Public address systems.

- Radio.

- Telephones.

• Post emergency numbers near telephones, employee notice boards, or other conspicuous locations, if you use telephones to report emergencies.

• Require that all emergency messages have priority over all nonemergency messages if the communication system also serves as an employee alarm system.

NEW SECTION

WAC 296-800-31080 Test the employee alarm system. You must:

• Test the reliability and adequacy of your employee alarm system every two months.

- Use a different activation device in each test of a multiactuation device system, so the entire alarm system gets tested.

- Make sure that supervised (monitored) employee alarm systems are tested at least once a year for reliability and adequacy.

ACCIDENT REPORTING AND INVESTIGATING

NEW SECTION

WAC 296-800-320 Summary. Your responsibility:

To report and conduct an investigation of certain types of accidents.

Note: Call the nearest office of the department of labor and industries at 1-800-4BE SAFE or call OSHA (Occupational Safety and Health Administration) at 1-800-321-6742, to report the death, probable death of any employee or the in-patient hospitalization of 2 or more employees within 8 hours, after handling medical emergencies.

You must:

Report the death, or probable death, of any employee, or the in-patient hospitalization of 2 or more employees within 8 hours

WAC 296-800-32005

Make sure that any equipment involved in an accident is not moved.

WAC 296-800-32010

Assign people to assist the department of labor and industries

WAC 296-800-32015

Conduct a preliminary investigation for all serious injuries

WAC 296-800-32020

Document the investigation findings

WAC 296-800-32025

NEW SECTION

WAC 296-800-32005 Report the death, probable death of any employee, or the in-patient hospitalization of 2 or more employees within 8 hours. You must:

- Contact the nearest office of the department of labor and industries in person or by phone at 1-800-4BE SAFE to report, within 8 hours of the work-related incident or accident,

- A death

- A probable death

- 2 or more employees are admitted to the hospital, or

- Contact the Occupational Safety and Health Administration (OSHA) by calling its central number at 1-800-321-6742.

- Provide the following information within 30 days concerning any accident involving a fatality or hospitalization of 2 or more employees:

- Name of the work place

- Location of the incident

- Time and date of the incident

- Number of fatalities or hospitalized employees

- Contact person

- Phone number

- Brief description of the incident

Note: If you do not learn about the incident at the time it occurs, you must report the incident within 8 hours of the time it was reported to you, your agent, or employee.

NEW SECTION

WAC 296-800-32010 Make sure that any equipment involved in an accident is not moved. You must:

- Not move equipment involved in a work or work related accident or incident if any of the following results:

- A death

- A probable death

- 2 or more employees are sent to the hospital

- Not move the equipment until a representative of the department of labor and industries investigates the incident and releases the equipment unless:

- Moving the equipment is necessary to:

- Remove any victims

- Prevent further incidents and injuries

NEW SECTION

WAC 296-800-32015 Assign people to assist the department of labor and industries. You must:

- Assign witnesses and other employees to assist department of labor and industries personnel who arrive at the scene to investigate the incident involving:

- A death

- Probable death

- 2 or more employees are sent to the hospital.

Include:

- The immediate supervisor

- Employees who were witnesses to the incident

- Other employees the investigator feels are necessary to complete the investigation

NEW SECTION

WAC 296-800-32020 Conduct a preliminary investigation for all serious injuries. You must:

- Make sure your preliminary investigation is conducted to evaluate the facts relating to the cause of the incident by the following people:

- A person designated by the employer

- The immediate supervisor of the injured employee

- Witnesses

- An employee representative, such as a shop steward or other person chosen by the employees to represent them

- Any other person who has the experience and skills.

- If the employee representative is the business agent of the employee bargaining unit and is unavailable to participate without delaying the investigation group, you may proceed, by using one of the following:

- The shop steward

- An employee representative member of your safety committee

- A person selected by all employees to represent them

Note: A preliminary investigation includes noting information such as the following:

- Where did the accident or incident occur?

- What time did it occur?

PERMANENT

- What people were present?
- What was the employee doing at the time of the accident or incident?
- What happened during the accident or incident?

NEW SECTION

WAC 296-800-32025 Document the investigation findings. You must:

- Document the investigation findings for reference following any formal investigation.

RELEASING ACCIDENT INVESTIGATION REPORTS

NEW SECTION

WAC 296-800-330 Releasing accident investigation reports. The department must:

- Keep accident investigations and related reports confidential.
- Not freely release results of accident investigations and related reports that are confidential.
- Make available accident investigation reports, without the need of a court order, only to the following:
 - Injured workers, their legal representatives, or their labor organization representatives.
 - The legal representative or labor organization representative of a deceased worker.
 - The employer of any injured or deceased worker.
 - Any other employer or person whose actions or business operations are the subject of the report or investigation.
 - Any attorney representing a party in any pending legal action in which an investigative report constitutes material and relevant evidence.
 - Employees of governmental agencies in the performance of their official duties.
 - Any beneficiary of a deceased worker actually receiving benefits under the terms of Title 51 RCW, the Industrial Insurance Act.

Note: The records officer may provide accident investigation reports to the closest surviving member of the deceased worker's immediate family.

PROTECTING THE IDENTITY OF THE SOURCE OF CONFIDENTIAL INFORMATION

NEW SECTION

WAC 296-800-340 Protecting the identity of the source of confidential information. The department must:

- Not reveal the source of information when a promise has been made to keep the identity of the source confidential.
- Not disclose information that would reveal the source's identity, whenever a department file contains an investigative report or information from a source under a promise of confidentiality.
- The contents of an investigative report may be withheld only to the extent necessary to conceal the identity of the source.

- When information is withheld, the records officer must give a general characterization of the information withheld, but must not reveal the identity of the information's source.

WISHA APPEALS, PENALTIES AND OTHER PROCEDURAL RULES

NEW SECTION

WAC 296-800-350 Your responsibility:

This section describes actions WISHA takes during or after inspections, and your related obligation and rights. You must follow posting requirements and notify your employees of the information listed in these rules, as indicated.

You must:

WISHA INSPECTIONS AND CITATIONS

NEW SECTION

WAC 296-800-35002 Types of workplace inspections.

- WISHA conducts the following types of inspections:
 - **Programmed inspections** of hazardous workplaces. WISHA identifies hazardous workplaces using objective criteria and inspection-scheduling systems that may look at any of the following factors:
 - ◆ Type of industry
 - ◆ Available data of injuries and illnesses where an inspection might eliminate the hazards causing them
 - ◆ Employer's industrial insurance experience
 - ◆ Number, type, and toxicity of contaminants in the workplace
 - ◆ Degree of exposure to hazards
 - ◆ Number of employees exposed
 - ◆ Other factors, such as history of employee complaints
 WISHA periodically reviews the scheduling systems and may adjust the factors used and/or the weight given to each factor
 - **Routine programmed inspections** in the following high hazard industries:
 - ◆ Agriculture
 - ◆ Asbestos renovation and demolition
 - ◆ Construction
 - ◆ Electrical utilities and communications
 - ◆ Logging
 - ◆ Maritime
 - **Unprogrammed inspections** of workplaces that may be in violation of WISHA safety or health rules or chapter 49.17 RCW, the Washington Industrial Safety and Health Act. Unprogrammed inspections may result because of:
 - ◆ Complaints from employees, former employees, or employee representatives who believe they have been exposed to a hazard because of a violation
 - ◆ Referrals from anyone who reasonably believes that workers under WISHA jurisdiction are being or have been exposed to a hazard because of a violation
 - **Workplace deaths and serious injuries or illnesses investigations** to determine if they were caused by a violation of safety and health rules or chapter 49.17 RCW, the Washington Industrial Safety and Health Act. WISHA may also initiate comprehensive inspections based on such investigations
 - **Imminent danger of serious injury or death inspections** when there is a reason to believe that employees may be in imminent danger of serious injury or death
 - **Follow-up inspections** at later dates to verify that you have corrected any hazards identified in a citation

NEW SECTION

WAC 296-800-35004 Scheduling inspections.

- WISHA distributes staff performing inspections as efficiently as possible to ensure maximum protection for workers.

PERMANENT

NEW SECTION**WAC 296-800-35006 Inspection techniques.**

- During an inspection, WISHA staff may:
 - Take samples, photographs, videotapes, or audiotapes
 - Conduct tests
 - Ask employees to wear sampling devices
 - Conduct interviews
 - Privately question, on or off the worksite, any:
 - ◆ Employer
 - ◆ Employer representative
 - ◆ Owner
 - ◆ Operator
 - ◆ Employee
 - ◆ Employee representative
 - Employ any other reasonable investigative techniques

NEW SECTION**WAC 296-800-35008 Response to complaints submitted by employees or their representatives.**

- When an employee or their representative has filed a complaint, WISHA will:
 - Remove the name of the person submitting the complaint and the names of any employees identified in the complaint before giving a copy of the complaint to an employer, unless the person filing the complaint gives WISHA written permission to release the names involved
 - Give a copy of the citation and notice to the employee (or their representative) who submitted the complaint, or explain to them why an inspection was not conducted
 - Review any department decision refusing to inspect or cite violations alleged in a complaint, if requested in writing
 - Notify the person in writing of the review results. If the person requesting the review is not satisfied with the results, they may request a second review by the department

NEW SECTION

WAC 296-800-35010 Citations mailed after an inspection. • After an inspection or an investigation, WISHA will mail a citation to you within 6 months following the inspection or investigation

- The citation will include
 - A description of any violations found
 - The amount and type of assessed penalties
 - The length of time given to correct the violations
- If no violations are found, WISHA will normally send you a citation and notice indicating that no violations were found

Note: • Copies of WISHA safety and health inspection reports can be requested. The request should be mailed to:
 DEPARTMENT OF LABOR AND INDUSTRIES
 PUBLIC DISCLOSURE UNIT
 BOX 44632
 OLYMPIA WA 98504-4632
 • You can also contact your local labor and industries field office for information on requesting copies of inspection reports (see the resources section of this book).

NEW SECTION**WAC 296-800-35012 Employees (or their representatives) can request a citation and notice.**

- Employees or their representatives may request copies of citation and notices issued to the employer
 - Complete the Request for Copy of Citation and Notice form, and mail it to:

DEPARTMENT OF LABOR AND INDUSTRIES
 STANDARDS AND INFORMATION
 BOX 44638
 OLYMPIA WA 98504-4638

- Note:
- To obtain a copy of the Request for Copy of Citation and Notice form, call 360-902-5534, or contact your local labor and industries office (see the resources section for a complete list of the offices.)
 - If you submit this form, you'll receive all citation and notices issued to that employer for the next 12 months.
 - When the department approves the request for a copy of a citation and notice, WISHA will indicate the date the application is approved, and the date it expires. Once approved, your application is valid for one year. Once expired, a one-year extension may be requested.
 - You can waive the one-year period when you make your initial request.
 - If more than one employee representative requests a copy of the same citation and notice, the department may decide which person will receive the copy of the citation and notice.
 - The department can deny requests for copies of citation and notices if the person filing the request is not an employee representative.

NEW SECTION**WAC 296-800-35016 Posting a citation and notice and employee complaint information. You must:**

- Immediately notify your employees of a citation and notice by posting them and/or any correspondence related to an employee complaint on the safety bulletin board for 3 working days, or until all violations have been corrected, whichever is longer.
- Use any other appropriate means to notify employees who cannot receive notices posted on the safety bulletin board; for example, a copy to authorized employee representatives or the safety committee, or copies sent electronically.

CIVIL PENALTIES FOR VIOLATING WISHA REQUIREMENTSNEW SECTION**WAC 296-800-35018 Reasons to assess civil penalties.**

- WISHA may assess civil penalties when a citation and notice is issued for any violation of health and safety rules, or statutes found during an inspection.
 - WISHA will assess civil penalties:
 - When a citation for a serious violation is issued.
 - Under other circumstances specified by statute (such as RCW 49.17.180, 49.26.016, 49.17.177, 49.70.190).
 - Civil penalties promote compliance, encouraging employers to correct violations before an inspection takes

place and avoiding the risk of receiving a penalty assessment. Civil penalties help promote a level playing field for employers complying with the rules by assessing penalties for those who do not comply.

NEW SECTION

WAC 296-800-35020 Minimum penalties.

- The minimum penalty amounts assessed by WISHA are:
 - \$100 for any penalty
 - \$5,000 per violation for all willful violations

HOW CIVIL PENALTIES ARE CALCULATED

NEW SECTION

WAC 296-800-35022 Base penalty calculations—Severity and probability.

- Except for specific penalty amounts that are dictated by statute, WISHA calculates the base civil penalty for a violation by evaluating:
 - The severity of the injury, illness, or disease that could result from the alleged hazard
 - The probability that an injury, illness, or disease could occur as a result of the alleged hazard

NEW SECTION

WAC 296-800-35024 Severity rate determination.

- Severity describes how serious an injury, illness, or disease might be because of a hazardous condition. Severity ratings are based on the most serious injury, illness, or disease that could be reasonably expected to occur because of a hazardous condition (see Table 1).
- Severity ratings are expressed in whole numbers and range from 1 (lowest) to 6 (highest). A violation with a severity rating of 4, 5, or 6 is considered to be a serious violation.

Table 1: Severity Ratings
Most serious injury, illness, or disease likely to result in:

6	Death from injury, illness or disease; injuries involving permanent severe disability; chronic, irreversible illness.
5	Permanent disability of a limited or less severe nature, injuries or reversible illnesses resulting in hospitalization.
4	Injuries or temporary, reversible illnesses resulting in serious physical harm (but less than 5 or 6 above) and may require removal from exposure or supportive treatment without hospitalization for recovery.

Table 1: Severity Ratings

3	Injuries or illness would probably not cause death or serious physical harm, but violations have at least major impact and an indirect relationship to serious injury, illness or disease. Violations could have direct and immediate relationship to safety and health of employees. No need for medical treatment beyond first aid.
2	Nonserious or general violations of minor impact, including violations that have an indirect relationship to nonserious injury, illness or disease. No injury, illness or disease without additional violations.
1	No injury, and not likely to result in injury in the presence of other violations.

NEW SECTION

WAC 296-800-35026 Probability rate determination.

- Probability refers to the likelihood of an injury, illness or disease occurring, and is expressed in whole numbers ranging from 1 (lowest) to 6 (highest). Probability does not change severity.
 - When determining probability, WISHA considers the number of employees affected and other factors, depending on the situation. Other factors may include
 - Frequency of employee exposure
 - Instances (number of times the same violation occurs in the workplace)
 - How close an employee is to the hazard
 - Weather and other working conditions
 - Employee skill level
 - Employee awareness of the hazard
 - The pace, speed, and nature of the task or work
 - Use of personal protective equipment
 - Amount of exposure (for health violations)
 - Other mitigating or contributing circumstances

NEW SECTION

WAC 296-800-35028 Determining the gravity of a violation.

- WISHA calculates most base penalties by assigning a weight to a violation. This weight is called "gravity." Gravity is calculated by multiplying a violation's severity by its probability. Expressed as a formula, gravity is:
 Gravity = Severity x Probability
- Unless a particular rule establishes penalty amounts for specific violations, WISHA uses Table 2 to determine the dollar amount for each base penalty

Table 2: Penalty Amount Using Gravity

Gravity	Base Penalty
1	\$100
2	\$200
3	\$300
4	\$400

PERMANENT

Table 2: Penalty Amount Using Gravity

5	\$500
6	\$1000
8	\$1500
9	\$2000
10	\$2500
12	\$3000
15	\$3500
16	\$4000
18	\$4500
20	\$5000
24	\$5500
25	\$6000
30	\$6500
36	\$7000

NEW SECTION

WAC 296-800-35030 Base penalty adjustments.

• WISHA may adjust an employee's base penalty amount because of the employer's good faith effort, size, and compliance history. No adjustments are made to penalty amounts specified by statute

NEW SECTION

WAC 296-800-35032 Types of base penalty adjustments. Employer's Good Faith

• An employer's good faith effort (or lack of) may justify increasing or decreasing a base penalty. No single factor determines good faith. Good faith is a reflection of an employer's:

- Effort before an inspection to provide a safe and healthful workplace for employees
- Effort to comply with a standard they have violated
- Cooperation during an inspection that is measured by a desire to comply with the cited standard and immediately correct identified hazards

• WISHA uses Table 3 to adjust base penalty amounts because of good faith effort

Table 3: Good Faith Adjustments

Good Faith Rating	Adjustment to Base Penalty
Excellent	35% reduction
Good	20% reduction
Average	No adjustment
Poor	20% increase

Employer's Work Force Size

• WISHA may adjust base penalties due to the size of an employer's work force in the state of Washington by using Table 4:

Table 4: Size Adjustments

Number of Employees	Adjustment to Base Penalty
1-25	60% reduction
26-100	40% reduction
101-250	20% reduction
More than 250	No adjustment

Employer's Compliance History

• WISHA may adjust a base penalty based on an employer's history of safety and health violations in the state of Washington, using previous citations as well as injury and illness rates (see Table 5).

Table 5: History Adjustments

History Rating	Adjustment to Base Penalty
Good	10% reduction
Average	No adjustment
Poor	10% increase

NEW SECTION

WAC 296-800-35038 Maximum base penalty amount.

• The maximum penalty for a violation other than repeat, willful, egregious or failure-to-abate is \$7,000.

NEW SECTION

WAC 296-800-35040 Reasons for increasing civil penalty amounts.

• WISHA may increase civil penalties by applying a multiplier to an adjusted base penalty. Multipliers may be applied for the following reasons:

Repeat violations:

A repeat violation occurs when WISHA cites an employer more than once in the last 3 years for a substantially similar hazard.

- The 3-year period is measured from the date of the final order for each previous citation
- The adjusted base penalty will be multiplied by the total number of inspections with violations (including the current inspection with a violation) involving similar hazards
- The maximum penalty cannot exceed \$70,000 for each violation

Willful violations:

A willful violation is a voluntary action done either with an intentional disregard of, or plain indifference to, the requirements of the applicable WISHA rule(s):

- For all willful violations, the adjusted base penalty will be multiplied by 10
- All willful violations will receive at least the statutory minimum penalty of \$5,000

PERMANENT

– The maximum penalty cannot exceed \$70,000 for each violation

Egregious violations:

An egregious violation may be issued for exceptionally flagrant cases involving willful violations. In these cases, WISHA will issue a separate penalty for each instance of an employer failing to comply with a particular rule

Failure-to-abate violations:

A failure-to-abate violation occurs when an employer who has been cited for a WISHA violation, fails to correct the violation on time (certifying corrected violations is covered in WAC 296-800-35200 through 296-800-35270)

– The maximum penalty cannot exceed \$7,000 for every day the violation is not corrected

– For a general violation with no initial penalty, the minimum failure-to-abate penalty is \$1,000, with a possible adjustment for the employer's effort to comply

– For violations with an initial penalty, WISHA, based on the facts at the time of reinspection:

◆ Will multiply the adjusted base penalty by 5, but may possibly make adjustments for the employer's effort to comply

◆ May multiply the adjusted base penalty by the number of days past the correction date if the employer does not make an effort to comply

CERTIFY THAT VIOLATIONS HAVE BEEN ABATED

NEW SECTION

WAC 296-800-35042 Employers must certify that violations have been abated. You must:

• Certify within 10 calendar days following the correction date that you have abated each violation, unless the compliance officer indicates in your citation and notice that you have corrected the violations. Include the following:

– Your name and address

– The inspection number your written statement applies to

– The citation and item numbers your written statement applies to

– The date and method you used to abate each violation

– That you informed your affected employees and their representatives that each violation was corrected

– That the information you submitted is accurate

– Your signature or the signature of your authorized representative

NEW SECTION

WAC 296-800-35044 For willful, repeated, or serious violations, submit additional documentation. You must:

• Submit additional documentation for each willful or repeated violation supporting that abatement is completed. This documentation may include, but is not limited to:

– Evidence of the purchase, or repair, of equipment

– Photographic or video evidence of corrections

– Other written records

• Submit additional documentation for a serious violation, when required by the citation and notice.

NEW SECTION

WAC 296-800-35046 Submitting correction action plans. You must:

• Submit a correction action plan within 25 calendar days from the final order date if the Citation and Notice requires it.

Your plan must:

– Identify the violation

– List the steps you will take to correct the violation

– Include a schedule to complete the steps

– Describe how employees will be protected until the corrections are completed

Note: • The department will notify you in writing if there is anything inadequate about your plan and will work out the problems.

• When determining if required documents are submitted on time, the department looks at the postmark date for documents sent by standard mail and the date received by other means, such as personal delivery or fax.

NEW SECTION

WAC 296-800-35048 Submit progress reports to the department when required. You must:

• Submit progress reports on the abatement if the citation and notice requires it and briefly state (a single sentence is normally adequate for each violation):

– The action taken to abate each violation

– The date each action was taken

Note: If progress reports are required, the citation and notice will include:

• The items for which periodic progress reports are required,

• The date when an initial progress report must be submitted (no sooner than 30 calendar days after you submit a correction plan),

• Whether additional progress reports are required, and

• The date(s) on which additional progress reports must be submitted.

NEW SECTION

WAC 296-800-35049 WISHA determines the date by which abatement documents must be submitted.

• When determining if required documents are submitted on time, the department looks at:

– Date of postmark for documents sent by mail

– Date the department receives the documents, if transmitted by a means other than mail

NEW SECTION

WAC 296-800-35050 Inform affected employees and their representatives of abatement actions you have taken. You must:

You must:

- Post a copy of each abatement action document you submit to the department (or a summary) near the place where the violations occurred, if practical.

- Do the following if posting near the violation site is not practical, such as with a mobile work operation:

- Post each document (or a summary) in a location that is readily accessible by affected employees and their representatives

- Take other steps to fully communicate abatement actions to affected employees and their representatives

- Make sure that:

- Notice is given to your employees and their representatives on or before the date you submit abatement information to the department

- All abatement documents remain posted for at least 3 working days after they are submitted to the department

- All posted abatement documents are not altered, defaced, or covered by other materials

- Inform employees and their representatives of their right to examine and copy all abatement documents you submit to the department. If they ask to examine or copy your documents within 3 working days of receiving notice that you submitted them to the department, you have 5 days to comply with their request after receiving it.

NEW SECTION

WAC 296-800-35052 Tag cited moveable equipment to warn employees of a hazard. You must:

- Tag cited moveable equipment to warn employees of a hazard if it has not been abated.

- Attach a warning tag or a copy of the citation to the equipment's operating controls or to the cited component:

- For hand-held equipment, tag it immediately after you receive a citation

- For other equipment, tag it before moving it within the worksite or between worksites

- The tag should properly warn employees about the nature of the violation and tell them where the citation is posted (see the Helpful Tools Section for a sample tag that can be used to meet this requirement)

- Make sure that the tag or copy of the citation attached to movable equipment is not altered, defaced, or covered by other materials

- Make sure that the tag or copy of the citation attached to movable equipment remains attached until:

- You have abated the violation and submitted all abatement certification documents required by the department

- You have permanently removed the cited equipment from service

- You no longer have control over the cited equipment

- A final order sets aside the violation

Note: Chapter 296-155 WAC, Safety Standards for Construction Work and chapter 296-24 WAC, General Safety and Health Standards have information on warning tags. You can use warning tags that meet the requirements in those rules instead of the warning tags required by this rule.

REQUESTING MORE TIME TO COMPLY

NEW SECTION

WAC 296-800-35056 You can request more time to comply.

- You can request more time to comply if you:

- Have made a good faith effort to comply with a citation's abatement requirements

- Have not completed your abatement because of factors beyond your control

- Requests for more time must:

- Be submitted in writing by you or your representative, and include:

- The name of your business

- The address of the workplace(s)

- Identification of the citation and the abatement date(s) you want extended

- The new abatement date and length of abatement period you are seeking

- A description of the actions you have taken to comply with the abatement date(s) in the citation

- Identification of the factors beyond your control that are preventing you from complying with the abatement date(s)

- The means you will use to protect your employees during the time you are abating the violation.

- Be received before midnight of the date you are asking to be extended

- The department may accept late requests if they are:

- Received within 5 days following the applicable correction date.

- Accompanied by your written statement explaining the exceptional circumstances that caused the delay.

Note: The department does not accept late requests when compliance activity related to the abatement starts before the request is received.

- The department accepts requests by:

- First class mail postage prepaid. Mailed to:

Department of Labor and Industries

WISHA Appeals

P.O. Box 44604

Olympia, WA 98504-4604

- Personal delivery

- Fax: (360) 902-5581

NEW SECTION

WAC 296-800-35062 WISHA's response to your request for more time.

- Within 5 working days of receiving your request for more time to comply, the assistant director must make a decision to approve or deny it. Before making a decision, the assistant director may conduct an investigation. Once made, the decision remains in effect unless a hearing is requested.

- The assistant director must issue the following 3 notices (which can be combined into one):

- A notice verifying that your request was received, including the correction dates listed in your citation.

- A notice of your right to request a hearing on the decision and
- A notice announcing the decision.
- ◆ These notices must:
 - Be signed by the assistant director,
 - Contain the date they were issued, and
 - Include the address to which a hearing request may be sent.

NEW SECTION

WAC 296-800-35063 Post the department's response. You must:

- Post notices with the citation for which you are requesting additional abatement time immediately upon receipt. The notices must remain posted until:
 - The abatement date has passed or
 - A hearing notice is posted.

NEW SECTION

WAC 296-800-35064 A hearing can be requested about the department's response.

- You, your affected employees or their authorized representative, may request a hearing if they disagree with the department's response to a request for more time to comply.
 - All hearing requests must be sent or delivered to the assistant director and be received at the address identified in the notice of your right to request a hearing no later than 10 calendar days after the issue date of the notice.
 - Upon receiving a hearing request, the assistant director will issue a notice of hearing to the requesting party and the employer at least 20 days before the hearing date. The hearing notice will:
 - state that all interested parties can participate in the hearing
 - set the time and date, including:
 - ◆ the time, place, and nature of the proceeding
 - ◆ the legal authority and jurisdiction under which the hearing will be held
 - ◆ a reference to the particular sections of the statute and rules involved and
 - ◆ a short and clear explanation why a hearing was requested.
 - The employer must post the department's hearing notice or a complete copy until the hearing is held. This includes the:
 - Citation containing the correction date for which more time was requested.
 - Department notices issued in response to the employer's request for more time.

NEW SECTION

WAC 296-800-35065 Post the department's hearing notice. You must:

- Post the department's hearing notice or a complete copy until the hearing is held. This includes the:
 - Citation containing the correction date for which more time was requested

- Department notices issued in response to the employer's request for more time

NEW SECTION

WAC 296-800-35066 Hearing procedures.

- The assistant director for WISHA services will appoint someone from the department to act as a hearings officer.
- The hearings officer must be present at, and conduct, the hearing. An assistant attorney general may be present to give legal advice to the hearings officer.
- If the hearings officer requests, the assistant attorney general may conduct the hearing.
- The hearings officer may discuss the material to be presented to determine how the hearing will proceed.
- The hearing must be conducted according to the Administrative Procedure Act recorded. Copies of hearing transcripts will be available to the parties, at cost, upon request.

NEW SECTION

WAC 296-800-35072 Post the hearing decision.

- After the hearing, the assistant director will issue an order:
 - Affirming or modifying the correction date that caused the hearing
- AND
- Complying with the provisions of the Administrative Procedure Act, chapter 34.05 RCW and the Practice and Procedure Rules, chapter 296-08 WAC.

You must:

- Post a complete, unedited copy of this decision, along with the citation to which it applies, as soon as it is received.

REQUESTING AN APPEAL OF WISHA CITATIONS AND CORRECTIVE NOTICES

NEW SECTION

WAC 296-800-35076 Employers and employees can request an appeal of a citation and notice.

EMPLOYER REQUESTS

- Any employer cited for a violation of WISHA safety and health rules may appeal a citation or corrective notice.
- Your request must include:
 - Business name, address, telephone number; and the name, address and telephone number of any person representing you.
 - Citation number.
 - What you think is wrong with the citation or corrective notice and any related facts.
 - What you think should be changed, and why.

EMPLOYEE REQUESTS

- Any employee or employee representative who could be affected by a citation or its correction may appeal the abatement date in the citation or corrective notice.

- Your request must include:
 - Your name, address, telephone number, and the name, address and telephone number of any person representing you
 - Citation number
 - What you think is wrong with the abatement date
- All appeal requests must be in writing and submitted to the department within 15 working days after receiving the citation corrective notice. If you mail your request, the post-mark is considered the submission date.
- **All requests must be:**
 - Mailed to:

Department of Labor and Industries
WISHA Appeals
P.O. Box 44604
Olympia, WA 98504-4604
 - or
 - Faxed to: (360) 902-5581
 - or
 - Brought to any department service location

NEW SECTION**WAC 296-800-35078 Await the department's response to your appeal request.**

- When an appeal request is received, the department decides whether to reassume jurisdiction over the citation and notice being appealed or forward the appeal to the Board of Industrial Insurance Appeals. The department will notify the person who submitted the appeal when the department reassumes jurisdiction.

Definition: Reassume jurisdiction means that the department has decided to hear the appeal.

- The department may reassume jurisdiction to:
 - Provide an employer and affected employees an opportunity to present relevant information, facts, and opinions during an informal conference
 - Give an employer, affected employees and the department an opportunity to resolve appeals rapidly and without further contest, especially in routine compliance cases
 - Educate employers about the citation and notice, the WISHA appeals process, and WISHA compliance
 - Review citations, penalties, and correction dates for fairness and accuracy to ensure quality work by the department
- If the department does not reassume jurisdiction, it will send the appeal to the Board of Industrial Insurance Appeals. The board will send the person submitting the appeal a notice with the time and location of any board proceedings.

NEW SECTION**WAC 296-800-35080 Department actions when reassuming jurisdiction over an appeal.**

- The department has 30 working days after receipt of the appeal to review it, gather more information and decide whether to make changes to the citation and notice. The 30 working days begin with the first working day after the appeal is received. For example, if an appeal is received on

Friday, the 30 days will begin on the following Monday unless it is a state holiday.

- The department may extend the appeal review period up to an additional 15 working days if everyone involved agrees to the extension.
- During the review period, the department will hold an informal conference about the appeal.
 - An informal conference is not an evidentiary hearing. It is an opportunity for interested parties to briefly explain their positions and provide any additional information they would like the department to consider when reviewing the citation and notice.
 - Although informal, the conference is an official conference and the department may record all or part of it. The department will tell participants when the conference will be recorded.
- After the review period, the department will issue a corrective notice reflecting any changes made to the citation and notice. This notice will be sent to the employer and any employee representatives participating in the appeal process.

NEW SECTION**WAC 296-800-35082 Appealing a corrective notice.**

- Anyone who can appeal a citation and notice may appeal a corrective notice. All corrective notice appeals must be submitted within 15 working days after the notice was received.

NEW SECTION**WAC 296-800-35084 Notify employees. You must:**

- Immediately post all correspondence from the department in a conspicuous place after submitting an appeal. This correspondence includes:
 - The notice of appeal
 - The notice explaining that the department reassumed jurisdiction over the citation and notice
 - Any extensions to the review period
 - The notice for an informal conference
 - Corrective notices
- Post all notices and information related to the appeal in the place where WISHA citations and notices are posted (see WAC 296-800-35150). These include:
 - A notice of appeal until the appeal is resolved
 - Notices about the department reassuming jurisdiction and any extension of the review period until the end of review period
 - A notice of an informal conference until after the conference is held
 - Corrective notices for as long as citations and notices must be posted
 - Requesting alternate means of compliance with WISHA rules.

Note: If you wish to develop an alternate means of compliance with WISHA rules, you may do so by following the instructions in WAC 296-350-700, Variances from WISHA rules.

- In certain circumstances, the department allows an employer to vary from a specific WISHA safety and health standard if the employer uses department-approved substitute

measures to protect employees. The substitute measure must provide at least the same protection from workplace hazards as provided by the WISHA standard.

USING STANDARDS FROM NATIONAL ORGANIZATIONS AND FEDERAL AGENCIES

NEW SECTION

WAC 296-800-360 Rule. Your responsibility: To use the safety and health standards from national organizations and federal agencies, when directed to by WISHA rules.

NEW SECTION

WAC 296-800-36005 Comply with standards national organizations or of federal agencies when referenced in WISHA rules. You must:

- Use the following to be in compliance with WISHA rules:
 - The edition of the standard specified in the WISHA rule or
 - Any edition published after the edition specified in the WISHA rule.

Note: The specific standards referenced in the WISHA rules are available:

- For review at your local department of labor and industries office.
- See <http://www.wa.gov/lni/pa/direct.htm>
- Through the local library system
- Through the issuing organization.

NEW SECTION

WAC 296-800-370 Definitions.

Note: The first time a defined word is used on a page in the Safety and Health Core Rules it is italicized and bolded.

Abatement Action Plans

Refers to your written plans for correcting a WISHA violation.

Abatement date

The date on the citation when you must comply with specific safety and health standards listed on the citation and notice of assessment or the corrective notice of redetermination.

Acceptable

As used in **Electrical**, **WAC 296-800-280** means an installation or equipment is acceptable to the director of labor and industries, and approved:

- If it is accepted, or certified, or listed, or labeled, or otherwise determined to be safe by a nationally recognized testing laboratory; or
- With respect to an installation or equipment of a kind which no nationally recognized testing laboratory accepts, certifies, lists, labels, or determines to be safe, if it is inspected or tested by another federal agency, or by a state, municipal, or other local authority responsible for enforcing occupational safety provisions of the National Electrical

Code, and found in compliance with the provisions of the National Electrical Code as applied in this section;

OR

- With respect to custom-made equipment or related installations which are designed, fabricated for, and intended for use by a particular customer, if it is determined to be safe for its intended use by its manufacturer on the basis of test data which the employer keeps and makes available for inspection to the director and his/her authorized representatives. Refer to federal regulation 29 CFR 1910.7 for definition of nationally recognized testing laboratory.

Accepted

As used in **Electrical**, **WAC 296-800-280** means an installation is accepted if it has been inspected and found by a nationally recognized testing laboratory to conform to specified plans or to procedures of applicable codes.

Access

As used in material safety data sheets (MSDSs) as Exposure Records, **WAC 296-800-180** means the right and opportunity to examine and copy exposure records.

Affected employees

Employees exposed to hazards identified as violations in a citation.

Analysis using exposure or medical records

• An analysis using exposure records or medical records can be any collection of data or a statistical study. It can be based on either:

- Partial or complete information from individual employee exposure or medical records or
- Information collected from health insurance claim records

• The analysis is not final until it has been:

- Reported to the employer or
- Completed by the person responsible for the analysis

ANSI

This is an acronym for the American National Standards Institute.

Approved means:

• Approved by the director of the department of labor and industries or their authorized representative, or by an organization that is specifically named in a rule, such as Underwriters' Laboratories (UL), Mine Safety and Health Administration (MSHA), or the National Institute for Occupational Safety and Health (NIOSH).

• As used in **Electrical**, **WAC 296-800-280** means acceptable to the authority enforcing this section. The authority enforcing this section is the director of labor and industries. The definition of acceptable indicates what is acceptable to the director and therefore approved.

Assistant director

The assistant director for the WISHA services division at the department of labor and industries.

ASTM

This is an acronym for American Society for Testing and Materials.

Attachment plug or plug

Is the attachment at the end of a flexible cord or cable that is part of a piece of electrical equipment. When it is inserted into an outlet or receptacle, it connects the conduc-

tors supplying electrical power from the outlet to the flexible cable.

Bare conductor

A conductor that does not have any covering or insulation.

Bathroom

A room maintained within or on the premises of any place of employment, contained toilets for use by employees.

Board

The board of industrial insurance appeals.

Certification

Refers to an employer's written statement describing when and how a citation violation was corrected.

CFR

This is an acronym for Code of Federal Regulations.

Chemical

Any element, chemical compound, or mixture of elements and/or compounds.

Chemical manufacturer

An employer with a workplace where one or more chemicals are produced for use or distribution.

Chemical name

The scientific designation of a chemical in accordance with one of the following:

- The nomenclature system developed by the International Union of Pure and Applied Chemistry (IUPAC)
- The Chemical Abstracts Service (CAS) rules of nomenclature

OR

- A name which will clearly identify the chemical for the purpose of conducting a hazard evaluation.

Circuit breaker

• Is a device used to manually open or close a circuit. This device will also open the circuit automatically and without damage to the breaker when a predetermined overcurrent is applied. (600 volts nominal or less)

• Is a switching device capable of making, carrying, and breaking currents under normal circuit conditions, and also making, carrying for a specified time, and breaking currents under specified abnormal circuit conditions, such as those of short circuit. (Over 600 volts nominal)

Citation

Refers to the citation and notice issued to an employer for any violation of WISHA safety and health rules. A citation and notice may be referred to as a citation and notice of assessment but is more commonly referred to as a citation.

Combustible liquid

A combustible liquid has a flashpoint of at least 100°F (37.8 °C) and below 200°F (93.3°C). Mixtures with at least 99% of their components having flashpoints of 200°F (93.3°C) or higher are not considered combustible liquids.

Commercial account

An arrangement in which a retail distributor sells hazardous chemical(s) to an employer, generally in large quantities over time, and/or at costs that are below the regular retail price.

Common name

Any designation or identification such as:

- Code name
- Code number
- Trade name
- Brand name
- Generic name used to identify a chemical other than by its chemical name.

Compressed gas

A gas or mixture of gases that, when in a container, has an absolute pressure exceeding:

- 40 psi at 70°F (21.1°C)

OR

- 104 psi at 130°F (54.4°C) regardless of the pressure at 70°F (21.1°C)

Compressed gas can also mean a liquid with a vapor pressure that exceeds 40 psi at 100°F (37.8°C)

Conductor

A wire that transfers electric power.

Container

Any container, except for pipes or piping systems, that contains a hazardous chemical. It can be any of the following:

- Bag
- Barrel
- Bottle
- Box
- Can
- Cylinder
- Drum
- Reaction vessel
- Storage tank

Correction date

The date by which a violation must be corrected. Final orders or extensions that give additional time to make corrections establish correction dates. A correction date established by an order of the board of industrial insurance appeals remains in effect during any court appeal unless the court suspends the date.

Corrective notice

Refers to a notice changing a citation and is issued by the department after a citation has been appealed.

Covered conductor

A conductor that is covered by something else besides electrical insulation.

Damp location

Partially protected areas that are exposed to moderate moisture. Outdoor examples include roofed open porches and marquees. Interior examples include basements and barns.

Department

Those portions of the department of labor and industries responsible for enforcing the Washington Industrial Safety Act (WISHA).

Designated representative

- Any individual or organization to which an employee gives written authorization.
- A recognized or certified collective bargaining agent without regard to written employee authorization.

- The legal representative of a deceased or legally incapacitated employee.

Director

The director means the director of the department of labor and industries or their designee.

Distributor

A business, other than a chemical manufacturer or importer, that supplies hazardous chemicals to other distributors or to employers. See WAC 296-62-054 for requirements dealing with Manufacturers, Distributors and Importers - Hazard Communication.

Documentation

Material that you submit to prove that a correction is completed. Documentation includes, but is not limited to, photographs, receipts for materials and/or labor.

Dry location

Areas not normally subjected to damp or wet conditions. Dry locations may become temporarily damp or wet, such as when constructing a building.

Electrical outlets

Places on an electric circuit where power is supplied to equipment through receptacles, sockets, and outlets for attachment plugs.

Employee

The term employee and other terms of like meaning, unless the context of the provision containing such term indicates otherwise, means an employee of an employer who is employed in the business of his or her employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is personal labor for an employer under this standard whether by way of manual labor or otherwise.

Employee exposure record

A record containing any of the following kinds of information:

- Environmental (workplace) monitoring or measuring of a toxic substance or harmful physical agent, including personal, area, grab, wipe, or other form of sampling, as well as related collection and analytical methodologies, calculations, and other background data relevant to interpretation of the results obtained;
 - Biological monitoring results which directly assess the absorption of a toxic substance or harmful physical agent by body systems (e.g., the level of a chemical in the blood, urine, breath, hair, fingernails, etc.) but not including results which assess the biological effect of a substance or agent or which assess an employee's use of alcohol or drugs;
 - Material safety data sheets indicating that the material may pose a hazard to human health;
- OR
- In the absence of the above, a chemical inventory or any other record which reveals where and when used and the identity (e.g., chemical, common or trade name) of a toxic substance or harmful physical agent.

Employer

An employer is any person, firm, corporation, partnership, business trust, legal representative, or other business entity which engages in any business, industry, profession, or

activity in this state and employs one or more employees or who contracts with one or more persons, the essence of which is the personal labor of such person or persons and includes the state, counties, cities, and all municipal corporations, public corporations, political subdivisions of the state, and charitable organizations: Provided, That any persons, partnership, or business entity not having employees, and who is covered by the Industrial Insurance Act must be considered both an employer and an employee.

Exit

Provides a way of travel out of the workplace.

Exit route

A continuous and unobstructed path of exit travel from any point within a workplace to safety outside.

Explosive

A chemical that causes a sudden, almost instant release of pressure, gas, and heat when exposed to a sudden shock, pressure, or high temperature.

Exposed live parts

Electrical parts that are:

- Not suitably guarded, isolated, or insulated

AND

- Capable of being accidentally touched or approached closer than a safe distance.

Exposed wiring methods

Involve working with electrical wires that are attached to surfaces or behind panels designed to allow access to the wires.

Exposure or exposed

As used in employer chemical hazard communication, WAC 296-800-170. An employee has been, or may have possibly been, subjected to a hazardous chemical, toxic substance or harmful physical agent while working. An employee could have been exposed to hazardous chemicals, toxic substances, or harmful physical agents in any of the following ways:

- Inhalation
- Ingestion
- Skin contact
- Absorption
- Related means.

The terms exposure and exposed only cover workplace exposure involving a toxic substance or harmful physical agent in the workplace different from typical nonoccupational situations in the way it is:

- Used
 - Handled
 - Stored
 - Generated
- OR
- Present

Extension ladder

A portable ladder with 2 or more sections and is not self-supporting. The 2 or more sections travel in guides or brackets that let you change the length. The size of a portable ladder is determined by adding together the length of each section.

Failure-to-abate

Any violation(s) resulting from you not complying with an abatement date.

Final order

Any of the following unless an employer or other party files a timely appeal:

- Citation and notice;
- Corrective notice;
- Decision and order from the board of industrial insurance appeals;
- Denial of petition for review from the board of industrial insurance appeals; or
- Decision from a Washington State superior court, court of appeals, or the state supreme court.

Final order date

The date a final order is issued.

First aid

The extent of treatment you would expect from a person trained in basic first aid, using supplies from a first-aid kit.

Tests, such as X rays, must not be confused with treatment. For example, an employee thought he broke his arm and went to the hospital to get X rays. If the X rays show no broken bones, they are not considered first aid. On the other hand, if they do show a broken bone, they would be considered medical treatment.

Flammable

A chemical covered by one of the following categories:

- Aerosol flammable means an aerosol that, when tested by the method described in 16 CFR 1500.45 yields either a flame projection more than 18 inches at full valve opening or a flashback (a flame extending back to the valve) at any degree of valve opening;
 - Gas, flammable means:
 - A gas that, at temperature and pressure of the surrounding area, forms a flammable mixture with air at a concentration of 13% by volume or less; or
 - A gas that, at temperature and pressure of the surrounding area, forms a range of flammable mixtures with air wider than 12% by volume, regardless of the lower limit;
 - Liquid, flammable means any liquid having a flashpoint below 100°F (37.8°C), except any mixture having components with flashpoints of 100°F (37.8°C) or higher, the total of which make up 99% or more of the total volume of the mixture.
 - Solid, flammable means a solid, other than a blasting agent or explosive as defined in WAC 296-52-417 or 29 CFR 1910.109(a), that is likely to cause fire through friction, moisture absorption, spontaneous chemical change, or retained heat from manufacturing or processing, or which can be ignited readily. Solid, inflammable also means that when the substance is ignited, it burns so powerfully and persistently that it creates a serious hazard. A chemical must be considered to be a flammable solid if, when tested by the method described in 16 CFR 1500.44, it ignites and burns with a self-sustained flame at a rate greater than one-tenth of an inch per second along its major axis.

Flashpoint

• The minimum temperature at which a liquid gives off a vapor in sufficient concentration to ignite when tested by any of the following measurement methods:

– Tagliabue closed tester: (See American National Standard Method of Test for Flash Point by Tag Closed Tester, Z11.24-1979 (ASTM D 56-79)) for liquids with a viscosity of less than 45 Saybolt Universal Seconds (SUS) at 100°F (37.8°C), that do not contain suspended solids and do not have a tendency to form a surface film under test; or

– Pensky-Martens closed tester: (See American National Standard Method of Test for Flash Point by Pensky-Martens Closed Tester, Z11.7-1979 (ASTM D 93-79)) for liquids with a viscosity equal to or greater than 45 SUS at 100°F (37.8°C), or that contain suspended solids, or that have a tendency to form a surface film under test; or

– Setaflash closed tester: (See American National Standard Method of Test for Flash Point by Setaflash Closed Tester (ASTM D 3278-78).)

Note: Organic peroxides, which undergo auto accelerating thermal decomposition, are excluded from any of the flashpoint measurement methods specified above.

Flexible cords and cables

Typically used to connect electrical equipment to an outlet or receptacle. These cords can have an attachment plug to connect to a power source or can be permanently wired into the power source. Flexible cords, extension cords, cables and electrical cords are all examples of flexible cord.

Floor hole

An opening in any floor, platform, pavement, or yard that measures at least one inch but less than 12 inches at its smallest dimension and through which materials and tools (but not people) can fall.

Examples of floor holes are:

- Belt holes
- Pipe openings
- Slot openings

Floor opening

An opening in any floor, platform, pavement, or yard that measures at least 12 inches in its smallest dimension and through which a person can fall.

Examples of floor openings are:

- Hatchways
- Stair or ladder openings
- Pits
- Large manholes

The following are NOT considered floor openings:

- Openings occupied by elevators
- Dumbwaiters
- Conveyors
- Machinery
- Containers

Foreseeable emergency

Any potential event that could result in an uncontrolled release of a hazardous chemical into the workplace. Examples of foreseeable emergencies include equipment failure, rupture of containers, or failure of control equipment.

Ground

As used in Electrical, WAC 296-800-280, a connection between an electrical circuit or equipment and the earth or other conducting body besides the earth. This connection can be intentional or accidental.

Grounded

A connection has been made between an electrical circuit or equipment and the earth or another conducting body besides the earth.

Grounded conductor

A system or circuit conductor that is intentionally grounded.

Ground-fault circuit-interrupter

A device whose function is to interrupt the electric circuit to the load when a fault current to ground exceeds some predetermined value that is less than that required to operate the overcurrent protective device of the supply circuit.

Grounding conductor

Is used to connect equipment or the grounded circuit of a wiring system to a grounding electrode or electrodes.

Grounding conductor, equipment

A conductor used to connect noncurrent-carrying metal parts of equipment, raceways, and other enclosures to the system grounded conductor and/or the grounding electrode conductor at the service equipment or at the source of a separately derived system.

Guarded

Covered, shielded, fenced, enclosed, or otherwise protected by means of suitable covers, casings, barriers, rails, screens, mats, or platforms to remove the likelihood of being accidentally touched or approached closer than a safe distance.

Handrail

A single bar or pipe supported on brackets from a wall or partition to provide a continuous handhold for persons using a stair.

Harmful physical agent

Any chemical substance, biological agent (bacteria, virus, fungus, etc.), or physical stress (noise, heat, cold, vibration, repetitive motion, ionizing and nonionizing radiation, hypo- or hyperbaric pressure, etc.) which:

- Is listed in the latest printed edition of the National Institute for Occupational Safety and Health (NIOSH) *Registry of Toxic Effects of Chemical Substances* (RTECS) (see Appendix B); or
 - Has shown positive evidence of an acute or chronic health hazard in testing conducted by, or known to, the employer;
- OR
- Is the subject of a material safety data sheet kept by or known to the employer showing that the material may pose a hazard to human health.

Hazard

Any condition, potential or inherent, which can cause injury, death, or occupational disease.

Hazard warning

Can be a combination of words, pictures, symbols, or combination appearing on a label or other appropriate form

of warning which shows the specific physical and health hazard(s), including target organ effects, of the chemical(s) in the container(s).

Note: See definition for physical hazard and health hazard to determine which hazards must be covered.

Hazardous chemical

Any chemical that is a physical or health hazard.

Health hazard

Any chemical with the potential to cause acute or chronic health effects in exposed employees. The potential must be statistically significant based on evidence from at least one study conducted under established scientific principles. Health hazards include:

- Chemicals which are carcinogens
- Toxic or highly toxic agents
- Reproductive toxins
- Irritants
- Corrosives
- Sensitizers
- Hepatotoxins
- Nephrotoxins
- Neurotoxins
- Agents which act on the hematopoietic system
- Agents which damage the lungs, skin, eyes, or mucous membranes

See WAC 296-62-054 for more definitions and explanations about the scope of health hazards covered by this part.

See WAC 296-62-054 for the criteria used for determining whether or not a chemical is considered hazardous for purposes of this rule.

Hospitalization

To be sent to, to go to, or be admitted to, a hospital or an equivalent medical facility and receive medical treatment beyond first-aid treatment, regardless of the length of stay in the hospital or medical facility.

Identity

Any chemical or common name listed on the material safety data sheet (MSDS) for the specific chemical. Each identity used must allow cross-references among the:

- Required list of hazardous chemicals
- Chemical label
- MSDSs

Imminent danger violation

Any violation(s) resulting from conditions or practices in any place of employment, which are such that a danger exists which could reasonably be expected to cause death or serious physical harm, immediately or before such danger can be eliminated through the enforcement procedures otherwise provided by the Washington Industrial Safety and Health Act.

Importer

The first business within the Customs Territory of the USA that:

- Receives hazardous chemicals produced in other countries

AND

- Supplies them to distributors or employers within the USA

See WAC 296-62-054 for requirements dealing with Manufacturers, Importer and Distributors - Hazard Communication.

Insulated

A conductor has been completely covered by a material that is recognized as electrical insulation and is thick enough based on:

- The amount of voltage involved

AND

- The type of covering material

Interim waiver

An order granted by the department allowing an employer to vary from WISHA requirements until the department decides to grant a permanent or temporary waiver.

Ladder

Consists of 2 side rails joined at regular intervals by crosspieces called steps, rungs, or cleats. These steps are used to climb up or down.

Listed

Equipment is listed if it:

- Is listed in a publication by a nationally recognized laboratory (such as UL, underwriters laboratory) that inspects the production of that type of equipment,

AND

- States the equipment meets nationally recognized standards or has been tested and found safe to use in a specific manner.

Material safety data sheet (MSDS)

Written or printed material that tells you about the chemical(s), what it can do to and how to protect yourself, others, or the environment.

For requirements for developing MSDSs see WAC 296-62-054—Manufacturers, Importers, and Distributors - Hazard Communication.

Medical treatment

Treatment provided by a physician or by registered professional personnel under the standing orders of a physician. Medical treatment does not include first-aid treatment even if provided by a physician or registered professional personnel.

Mixture

As used in Employer Chemical Hazard Communication, WAC 296-800-170, any combination of 2 or more chemicals (if that combination did not result from a chemical reaction).

Movable equipment

As used in WAC 296-800-35052, a hand-held or non-hand-held machine or device;

- That is powered or nonpowered;

AND

- Can be moved within or between worksites

Must

Must means mandatory.

NEMA

These initials stand for National Electrical Manufacturing Association.

NFPA

This is an acronym for National Fire Protection Association.

Nose

The portion of the stair tread that projects over the face of the riser below it.

Occupational Safety and Health Administration (OSHA)

Passed in 1970 by the U.S. Congress, the OSH (Occupational Safety and Health) Act provides safety on the job for working men and women. OSHA oversees states (such as Washington) that have elected to administer their own safety and health program. OSHA requires WISHA rules to be at least as effective as OSHA rules.

Office work environment

An indoor or enclosed occupied space where clerical work, administration, or business is carried out.

In addition, it includes:

- Other workplace spaces controlled by the employer and used by office workers, such as cafeterias, meeting rooms, and washrooms.

- Office areas of manufacturing and production facilities, not including process areas.

- Office areas of businesses such as food and beverage establishments, agricultural operations, construction, commercial trade, services, etc.

Open riser

A stair step with an air space between treads has an open riser.

Organic peroxide

This is an organic compound containing the bivalent-O-O-structure. It may be considered a structural derivative of hydrogen peroxide if one or both of the hydrogen atoms has been replaced by an organic radical.

Outlet

See definition for electrical outlets.

Oxidizer

A chemical other than a blasting agent or explosive as defined in WAC 296-52-417 or CFR 1910.109(a), that starts or promotes combustion in other materials, causing fire either of itself or through the release of oxygen or other gases.

Permissible exposure limits (PELs)

PELs are airborne concentrations of substances measured by their concentration in the air no matter what amount is breathed by the employee. The permissible exposure limits (PELs) must include the following four categories:

- Permissible exposure limits - Time-weighted average (PEL-TWA) is the time-weighted average airborne exposure to any 8-hour work shift of a 40-hour work week and must not be exceeded.

- Permissible exposure limits - Short-term exposure limit (PEL-STEL) is the employee's 15-minute time-weighted average exposure which must not be exceeded at any time during a work day unless another time limit is specified in a parenthetical notation below the limit. If another time period is specified, the time-weighted average exposure over that time period must not be exceeded at any time during the working day.

- Permissible exposure limits - Ceiling (PEL-C) is the employee's exposure which must not be exceeded during any part of the workday. If instantaneous monitoring is not feasible, then the ceiling must be assessed as a 15-minute time-

weighted average exposure which must not be exceeded at any time over a working day.

• Skin notation is the potential contribution to the overall employee exposure by the cutaneous route including mucous membranes and eye, either by airborne, or more particularly, by direct contact with the substance. These substances are identified as having a skin notation in the OSHA and WISHA PEL tables (29 CFR Part 1910 Subpart Z and WAC 296-62-075, respectively).

Person

One or more individuals, partnerships, associations, corporations, business trusts, legal representatives, or any organized group of persons.

Personal service room

Used for activities not directly connected with a business' production or service function such as:

- First-aid
- Medical services
- Dressing
- Showering
- Bathrooms
- Washing
- Eating

Personnel

See the definition for employees.

Physical hazard

A chemical that has scientifically valid evidence to show it is one of the following:

- Combustible liquid
- Compressed gas
- Explosive
- Flammable
- Organic peroxide
- Oxidizer
- Pyrophoric
- Unstable (reactive)
- Water reactive

Platform

Platform means an extended step or landing that breaks a continuous run of stairs.

Plug

See definition for attachment plug.

Potable water

Water that you can safely drink. It meets specific safety standards prescribed by the United States Environmental Protection Agency's National Interim Primary Drinking Water Regulations, published in 40 CFR Part 141, and 40 CFR 147.2400.

Predictable and regular basis

Employee functions such as, but not limited to, inspection, service, repair and maintenance which are performed

- at least once every 2 weeks

OR

• 4 man-hours or more during any sequential 4-week period (to calculate man-hours multiply the number of employees by the number of hours during a 4-week period).

Produce

As used in Employer Chemical Hazard Communication, WAC 296-800-170, any one of the following:

- Manufacture
- Process
- Formulate
- Blend
- Extract
- Generate
- Emit
- Repackage

Purchaser

As used in Employer Chemical Hazard Communication, WAC 296-800-170, an employer who buys one or more hazardous chemicals to use in their workplace.

Pyrophoric

A chemical is pyrophoric if it will ignite spontaneously in the air when the temperature is 130°F (54.4°C) or below.

Qualified

A person is qualified if they have one of the following:

- Extensive knowledge, training and experience about the subject matter, work or project
- A recognized degree, certificate, or professional standing
- Successfully demonstrated problem solving skills about the subject, work, or project

Railing or standard railing

A vertical barrier erected along exposed edges of a floor opening, wall opening, ramp, platform, or runway to prevent falls of persons.

Reassume jurisdiction

The department has decided to take back its control over a citation and notice being appealed.

Receptacle or receptacle outlet

Outlets that accept a plug to supply electric power to equipment through a cord or cable.

Record

A record is any item, collection, or grouping of information. Examples include:

- Paper document
- Microfiche
- Microfilm
- X-ray film
- Computer record

Repeat violation

A repeat violation occurs when WISHA cites an employer more than once in the last 3 years for a substantially similar hazard.

Responsible party

As used in employer chemical hazard communication, WAC 296-800-170. Someone who can provide appropriate information about the hazardous chemical and emergency procedures.

Rise

The vertical distance from the top of a tread to the top of the next higher tread.

Riser

The vertical part of the step at the back of a tread that rises to the front of the tread above.

Rungs

Rungs are the cross pieces on ladders that are used to climb up and down the ladder.

Runway

An elevated walkway above the surrounding floor or ground level. Examples of runways are footwalks along shafting or walkways between buildings.

Safety factor

The term safety factor means the ratio of when something will break versus the actual working stress or safe load when it is used.

Serious violation

Serious violation must be deemed to exist in a workplace if there is a substantial probability that death or serious physical harm could result from a condition which exists, or from one or more practices, means, methods, operations, or processes which have been adopted or are in use in such workplace, unless the employer did not, and could not with the exercise of reasonable diligence, know of the presence of the violation.

Should

Should means recommended.

Single ladder

A type of portable ladder with one section.

It is distinguished by all of the following:

- It has one section
- It cannot support itself
- Its length cannot be adjusted

Smoking

A person is smoking if they are:

- Lighting up
- Inhaling
- Exhaling
- Carrying a pipe, cigar or cigarette of any kind that is burning

Specific chemical identity

This term applies to chemical substances. It can mean the:

- Chemical name
- Chemical Abstracts Service (CAS) registry number
- Any other information that reveals the precise chemical designation of the substance.

Stair railing

A vertical barrier attached to a stairway with an open side to prevent falls. The top surface of the stair railing is used as a handrail

Stairs or stairway

A series of steps and landings:

- leading from one level or floor to another,
- leading to platforms, pits, boiler rooms, crossovers, or around machinery, tanks, and other equipment
- Used more or less continuously or routinely by employees, or only occasionally by specific individuals.
- With three or more risers

Standard safeguard

Safety devices that prevent hazards by their attachment to:

- Machinery

- Appliances
- Tools
- Buildings
- Equipment

These safeguards must be constructed of:

- Metal
- Wood
- Other suitable materials

The department makes the final determination about whether a safeguard is sufficient for its use.

Step ladder

A portable ladder with:

- Flat steps
- A hinge at the top allowing the ladder to fold out and support itself
- Its length that cannot be adjusted

Toeboard

A barrier at floor level along exposed edges of a floor opening, wall opening, platform, runway, or ramp, to prevent falls of materials.

Toilet

Means a fixture that flushes maintained within a bathroom for the purpose of defecation or urination or both.

Toxic substance

Any:

- Chemical substance
- Biological agent (such as bacteria, virus, or fungus)
- Physical stress (such as noise, vibration, or repetitive motion)

A substance is toxic if:

- The latest printed edition of the National Institute for Occupational Safety and Health (NIOSH) *Registry of Toxic Effects of Chemical Substances* (RTECS) lists the substance
- Testing by or known to the employer has shown positive evidence that the substance is an acute or chronic health hazard
- A material safety data sheet kept by or known to the employer shows the material may be a hazard to human health

Trade secret

Any confidential:

- Formula
- Pattern
- Process
- Device
- Information
- Collection of information

The trade secret is used in an employer's business and gives an opportunity to gain an advantage over competitors who do not know or use it.

See WAC 296-62-053 for requirements dealing with trade secrets.

Tread

The horizontal part of the stair step.

Tread run

The distance from the front of one stair tread to the front of an adjacent tread.

Tread width

The distance from front to rear of the same tread including the nose, if used.

UL (Underwriters' Laboratories, Inc.)

You will find these initials on electrical cords and equipment. The initials mean the cord or equipment meets the standards set by the Underwriters' Laboratories, Inc.

Unstable (reactive)

As used in employer chemical hazard communication, WAC 296-800-170. An unstable or reactive chemical is one that in its pure state, or as produced or transported, will vigorously polymerize, decompose, condense, or will become self-reactive under conditions of shocks, pressure or temperature.

Urinal

A toilet in a men's bathroom that is designed and intended solely for urination.

Use

As used in employer chemical hazard communication, WAC 296-800-170, means to:

- Package
- Handle
- React
- Emit
- Extract
- Generate as a by-product
- Transfer

Voltage of a circuit

The greatest effective potential difference between any two conductors or between a conductor and ground.

Voltage to ground

The voltage between a conductor and the point or conductor of the grounded circuit. For undergrounded circuits, it is the greatest voltage between the conductor and any other conductor of the circuit.

Voltage, nominal

Nominal voltage is a value assigned to a circuit or system to designate its voltage class (120/240, 480Y/277, 600, etc.). The actual circuit voltage can vary from the value if it is within a range that permits the equipment to continue operating in a satisfactory manner.

WAC

This is an acronym for **Washington Administrative Code**, which are rules developed to address state law.

Water-reactive

As used in Employer Chemical Hazard Communication, WAC 296-800-170, a water-reactive chemical reacts with water to release a gas that is either flammable or presents a health hazard.

Watertight

Constructed so that moisture will not enter the enclosure or container.

Weatherproof

Constructed or protected so that exposure to the weather will not interfere with successful operation. Rainproof, rain-tight, or watertight equipment can fulfill the requirements for weatherproof where varying weather conditions other than

wetness, such as snow, ice, dust, or temperature extremes, are not a factor.

Wet location

- Underground installations or in concrete slabs or masonry that are in direct contact with the earth
- Locations that can be saturated by water or other liquids
- Unprotected locations exposed to the weather (like vehicle washing areas)

WISHA

This is an acronym for the Washington Industrial Safety and Health Act.

Working days

A calendar day, except Saturdays, Sundays, and legal holidays as set forth in RCW 1.16.050, as now or hereafter amended, and for the purposes of the computation of time within which an act is to be done under the provisions of this chapter, shall be computed by excluding the first working day and including the last working day.

Worker

See the definition for employee.

Workplace

- The term workplace means:
 - Any plant, yard, premises, room, or other place where an employee or employees are employed for the performance of labor or service over which the employer has the right of access or control, and includes, but is not limited to, all workplaces covered by industrial insurance under Title 51 RCW, as now or hereafter amended.

– An establishment, job site, or project, at one geographical location containing one or more work areas.

- As used in Employer Chemical Hazard Communication, WAC 296-800-180, any plant, yard, premises, room, or other place where an employee or employees are employed for the performance of labor or service over which the employer has the right of access or control, and includes, but is not limited to, all workplaces covered by industrial insurance under Title 51 RCW, as now or hereafter amended.

You

See definition of employer.

Your representative

Your representative is the person selected to act in your behalf.

PART A-1

~~((GENERAL, EDUCATIONAL, MEDICAL AND FIRST AID REQUIREMENTS))~~ **PURPOSE AND SCOPE**

PART A-2

PERSONAL PROTECTIVE EQUIPMENT

RESERVE

Note: Personal protective equipment requirements have been moved to WAC 296-800-160.

Note: Electrical protective equipment requirements have been moved to WAC 296-24-980.

AMENDATORY SECTION (Amending Order 89-20, filed 1/11/90, effective 2/26/90)

WAC 296-24-10203 General requirements. (1) All employers operating late night retail establishments shall provide crime prevention training to their employees.

(2) Crime prevention training shall be a part of the accident prevention program requirements imposed pursuant to WAC ((296-24-040)) 296-800-140.

(3) The employer shall provide training to ensure that the purpose and function of robbery and violence prevention are understood by employees and that the knowledge and skills required for their safety have been provided. The employer shall:

(a) Provide training and training materials that outline security policies, safety and security procedures, and personal safety and crime avoidance techniques.

(b) Provide formal instruction through a training seminar or training video presentation and upon completion require the employee to sign off on the date, time, and place of training. The training documentation will be placed in the employee's personnel file. The following elements shall be included in the crime prevention training program:

(i) An explanation of the importance of keeping the store clean, neat, and uncluttered thereby making it as unattractive as possible to robbers.

(ii) Provide explanation of the purpose of maintaining an unobstructed view of the cash register from outside the store, provided the cash register is located in a position visible from the street.

(iii) Provide instruction on reasons for operating only minimum number of cash registers at night.

(iv) Keeping the cash register fund to a minimum.

(v) Taking extra precautions after dark, i.e., keep alert, observe lighting and dark corners, spot possible hiding places.

(vi) Violence prevention procedures in case of robbery.

(vii) Provide a refresher course on crime prevention on or near the employee's anniversary date. Videotape and crime prevention material shall be available for employee's review at their request.

(4) In addition to providing crime prevention training as defined in this section, all employers operating late night retail establishments shall:

(a) Post a conspicuous sign in the window or door which states that there is a safe on the premises and it is not accessible to the employees on the premises and that the cash register contains only the minimal amount of cash needed to conduct business: No employer shall be subject to citation and penalty for having moneys in the cash register in excess of the minimal amount needed to conduct business.

(b) All displays, and any other material posted in window(s) or door(s) should be arranged so as to provide a clear and unobstructed view of the cash register; provided the cash register is located in such a position so as to be visible from the street.

(c) Have a drop-safe, limited access safe, or comparable device on the premises.

(d) Operate the outside lights for that portion of the approach and parking area that is necessary to accommodate

customers during all night hours the late night retail establishment is open. This may be accomplished through:

(i) Surveillance lighting - to detect and observe pedestrian and vehicular entrances.

(ii) Providing adequate illuminances - adequate illuminance throughout the pedestrian and vehicular entrance areas should be a minimum of one foot candle to comply with ANSI/IES RP7-1983.

AMENDATORY SECTION (Amending WSR 95-22-015, filed 10/20/95, effective 1/16/96)

WAC 296-24-12001 Scope. This scope includes all sections of WAC 296-24-120 ((in the numbering)), 296-800-220, and 296-800-230 and applies to all permanent places of employment except where domestic, or mining work only is performed. The shower requirements in WAC ((296-24-12009(3))) 296-24-12010 are not applicable to agricultural operations. Measures for the control of toxic materials are considered to be outside the scope of this section.

NEW SECTION

WAC 296-24-12010 Showers. (1) Showers are mandatory on exit from the jobsite when residual chemicals allowed to remain on the skin between work shifts could cause a serious occupational illness.

(2) The employer is responsible for identifying such potential hazards and for insisting that the employee shower at the end of the shift.

(3) Whenever showers are required by a particular standard, the showers shall be provided, in accordance with (a) through (d) of this subsection:

(a) One shower shall be provided for each 10 employees of each sex, or numerical fraction thereof, who are required to shower during the same shift.

(b) Body soap or other appropriate cleansing agents convenient to the showers shall be provided as specified in this section.

(c) Showers shall be provided with hot and cold water feeding a common discharge line.

(d) Employees who use showers shall be provided with individual clean towels.

AMENDATORY SECTION (Amending Order 82-22, filed 6/11/82)

WAC 296-24-14007 Sign design and colors. (1) All signs shall be furnished with rounded or blunt corners and shall be free from sharp edges, burrs, splinters, or other sharp projections. The ends or heads of bolts or other fastening devices shall be located in such a way that they do not constitute a hazard.

(2) Danger signs.

(a) The colors red, black, and white shall be those of opaque glossy samples as specified in Table 1 of Fundamental Specification of Safety Colors for CIE Standard Source "C," American National Standard Z53.1-1971.

(b) Standard proportions shall be as indicated in Table J-1, and format shall be as in Fig. J-1.

(3) Radiation warning signs.

(a) Standard color of the background shall be yellow; the panel, reddish purple with yellow letters; the symbol, reddish purple; any letters used against the yellow background shall be black. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard, Z53.1-1971.

(b) The standard symbol shall be as in Figure J-3. Method of dimensioning, design, and orientation of the standard symbol (one blade pointed downward and centered on the vertical axis) shall be executed as illustrated. The symbol shall be prominently displayed, and of a size consistent with the size of the equipment or material or area to which it is attached.

(c) Format shall be as in Figure J-2. Sign proportions shall be the same as those for danger signs in Table J-1.

(4) Caution signs.

(a) Standard color of the background shall be yellow; and the panel, black with yellow letters. Any letters used against the yellow background shall be black. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard Z53.1-1971.

(b) Standard proportions shall be as indicated in Table J-2, and format shall be as in Figure J-4.

(5) Exit signs. Exit signs shall be in accordance with WAC ((296-24-5653+)) 296-800-310.

(6) Safety instruction signs.

(a) Standard color of the background shall be white; and the panel, green with white letters. Any letters used against the white background shall be black. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard, Z53.1-1971.

(b) Standard proportions shall be as indicated in Table J-3, and format shall be as in Figure J-5.

(7) Directional signs.

(a) Standard color of the background shall be white; and the panel, black with white directional symbol. Any letters used against the white background shall be black. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard Z53.1-1971.

(b) Standard proportions shall be as indicated in Table J-4, and format shall be as in Figure J-6.

(8) In-plant traffic signs. Regulatory and control signs required for the safe movement of vehicles and pedestrians on thoroughfares on plant property shall conform to the standards established in American National Standard Manual on Uniform Traffic Control Devices for Streets and Highways, D6.1-1971.

(9) Informational signs. Blue shall be the standard color for informational signs. It may be used as the background color for the complete sign or as a panel at the top of such types of "notice" signs, which have a white background. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard Z53.1-1971.

(10) Slow-moving vehicle emblem. This emblem (see Fig. J-7) consists of a fluorescent yellow-orange triangle with a dark red reflective border. The yellow-orange fluorescent triangle is a highly visible color for daylight exposure. The reflective border defines the shape of the fluorescent color in daylight and creates a hollow red triangle in the path of motor

vehicle headlights at night. The emblem is intended as a unique identification for, and it shall be used only, on vehicles which by design move slowly (25 m.p.h. or less) on the public roads. The emblem is not a clearance marker for wide machinery nor is it intended to replace required lighting or marking of slow-moving vehicles. Neither the color film pattern and its dimensions nor the backing shall be altered to permit use of advertising or other markings. The material, location, mounting, etc., of the emblem shall be in accordance with the American Society of Agricultural Engineers Emblem for Identifying Slow-Moving Vehicles, ASAE R276, 1967, or ASAE S276.2 (ANSI B114.1-1971).

(11) Symbols. Symbols used on signs shall follow recognized practices, such as in Figure J-8. For radioactive materials, see symbol in Figure J-3.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-23503 General requirements. (1) Application. This section applies to overhead and gantry cranes, including semigantry, cantilever gantry, wall cranes, storage bridge cranes, and others having the same fundamental characteristics. These cranes are grouped because they all have trolleys and similar travel characteristics.

(2) New and existing equipment. All new overhead and gantry cranes constructed and installed on or after the effective date of these standards, shall meet the design specifications of the American National Standards Institute, Safety Code for Overhead and Gantry Cranes, ANSI B30.2.0-1967. Overhead and gantry cranes constructed before the effective date of these standards, should be modified to conform to those design specifications, unless it can be shown that the crane cannot feasibly or economically be altered and that the crane substantially complies with the requirements of this section. (See WAC ((296-24-010)) 296-350-700 variance ((and procedure)) from WISHA rules.)

(3) Modifications. Cranes may be modified and rerated provided such modifications and the supporting structure are checked thoroughly for the new rated load by a qualified engineer or the equipment manufacturer. The crane shall be tested in accordance with WAC 296-24-23521(2). New rated load shall be displayed in accordance with (5) of this section.

(4) Wind indicators and rail clamps.

(a) Outdoor storage bridges shall be provided with automatic rail clamps. A wind-indicating device shall be provided which will give a visible or audible alarm to the bridge operator at a predetermined wind velocity. If the clamps act on the rail heads, any beads or weld flash on the rail heads shall be ground off.

(b) Calculations for wind pressure on outside overhead traveling cranes shall be based on not less than 30 pounds per square foot of exposed surface.

(5) Rated load marking. The rated load of the crane shall be plainly marked on each side of the crane, and if the crane has more than one hoisting unit, each hoist shall have its rated load marked on it or its load block and this marking shall be clearly legible from the ground or floor.

(6) Clearance from obstruction.

(a) Minimum clearance of 3 inches overhead and 2 inches laterally shall be provided and maintained between crane and obstructions in conformity with Specification No. 61 Crane Manufacturers Association of America, Inc., 8720 Red Oak Blvd., Suite 201, Charlotte, NC 28217.

(b) Where passageways or walkways are provided obstructions shall not be placed so that safety of personnel will be jeopardized by movements of the crane.

(7) Clearance between parallel cranes. If the runways of two cranes are parallel, and there are no intervening walls or structure, there shall be adequate clearance provided and maintained between the two bridges.

(8) Designated personnel. Only designated personnel shall be permitted to operate a crane covered by this section.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-23507 Footwalks and ladders. (1) Location of footwalks.

(a) If sufficient headroom is available on cab-operated cranes, a footwalk shall be provided on the drive side along the entire length of the bridge of all cranes having the trolley running on the top of the girders. To give sufficient access to the opposite side of the trolley, there should be provided either a footwalk mounted on the trolley, a suitable footwalk or platform in the building, or a footwalk on the opposite side of the crane at least twice the length of the trolley.

(b) Footwalks should be located to give a headroom not less than 78 inches. In no case shall less than 48 inches be provided. If 48 inches of headroom cannot be provided, footwalks should be omitted from the crane and a stationary platform or landing stage built for workers making repairs.

(2) Construction of footwalks.

(a) Footwalks shall be of rigid construction and designed to sustain a distributed load of at least 50 pounds per square foot.

(b) Footwalks shall have a walking surface of antislip type.

Note: Wood will meet this requirement.

(c) Footwalks should be continuous and permanently secured.

(d) Footwalks should have a clear passageway at least 18 inches wide except opposite the bridge motor, where they should be not less than 15 inches. The inner edge shall extend at least to the line of the outside edge of the lower cover plate or flange of the girder.

(3) Toeboards and handrails for footwalks. Toeboards and handrails shall be in compliance with WAC 296-24-750 through 296-24-75011 and WAC 296-800-260.

(4) Ladders and stairways.

(a) Gantry cranes shall be provided with ladders or stairways extending from the ground to the footwalk or cab platform.

(b) Stairways shall be equipped with rigid and substantial metal handrails. Walking surfaces shall be of an antislip type.

(c) Ladders shall be permanently and securely fastened in place and shall be constructed in compliance with WAC 296-24-810 through 296-24-81011.

AMENDATORY SECTION (Amending Order 91-07, filed 11/22/91, effective 12/24/91)

WAC 296-24-23513 Electric equipment. (1) General.

(a) Wiring and equipment shall comply with chapter 296-24 WAC Part L, and WAC 296-800-280.

(b) The control circuit voltage shall not exceed 600 volts for a.c. or d.c. current.

(c) The voltage at pendant pushbuttons shall not exceed 150 volts for a.c. and 300 volts for d.c.

(d) Where multiple conductor cable is used with a suspended pushbutton station, the station shall be supported in a manner that will protect the electrical conductors against strain.

(e) Pendant control boxes shall be constructed to prevent electrical shock and shall be clearly marked for identification of functions.

(2) Equipment.

(a) Electrical equipment shall be so located or enclosed that live parts will not be exposed to accidental contact under normal operating conditions.

(b) Electric equipment shall be protected from dirt, grease, oil, and moisture.

(c) Guards for live parts shall be substantial and so located that they cannot be accidentally deformed so as to make contact with the live parts.

(3) Controllers.

(a) Cranes not equipped with spring-return controllers or momentary contact pushbuttons shall be provided with a device which will disconnect all motors from the line on failure of power and will not permit any motor to be restarted until the controller handle is brought to the "off" position, or a reset switch or button is operated.

(b) Lever operated controllers shall be provided with a notch or latch which in the "off" position prevents the handle from being inadvertently moved to the "on" position. An "off" detent or spring return arrangement is acceptable.

(c) The controller operating handle shall be located within convenient reach of the operator.

(d) As far as practicable, the movement of each controller handle shall be in the same general directions as the resultant movements of the load.

(e) The control for the bridge and trolley travel shall be so located that the operator can readily face the direction of travel.

(f) For floor-operated cranes, the controller or controllers if rope operated, shall automatically return to the "off" position when released by the operator.

(g) Pushbuttons in pendant stations shall return to the off position when pressure is released by the crane operator.

(h) Automatic cranes shall be so designed that all motions shall fail-safe if any malfunction of operation occurs.

(i) Remote-operated cranes shall function so that if the control signal for any crane motion becomes ineffective the crane motion shall stop.

(4) Resistors.

(a) Enclosures for resistors shall have openings to provide adequate ventilation, and shall be installed to prevent the accumulation of combustible matter near hot parts.

(b) Resistor units shall be supported so as to be free as possible from vibration.

(c) Provision shall be made to prevent broken parts or molten metal falling upon the operator or from the crane.

(5) Switches.

(a) The power supply to the runway conductors shall be controlled by a switch or circuit breaker located on a fixed structure, accessible from the floor, and arranged to be locked in the open position.

(b) On cab-operated cranes a switch or circuit breaker of the enclosed type, with provision for locking in the open position shall be provided in the leads from the runway conductors. A means of opening this switch or circuit breaker shall be located within easy reach of the operator.

(c) On floor-operated cranes, a switch or circuit breaker of the enclosed type, with provision for locking in the open position, shall be provided in the leads from the runway conductors. This disconnect shall be mounted on the bridge or footwalk near the runway collectors. One of the following types of floor operated disconnects shall be provided:

(i) Nonconductive rope attached to the main disconnect switch.

(ii) An undervoltage trip for the main circuit breaker operated by an emergency stop button in the pendant push-button station.

(iii) A main line contactor operated by a switch or push-button in the pendant pushbutton station.

(d) The hoisting motion of all electric traveling cranes shall be provided with an overtravel limit switch in the hoisting direction.

(e) All cranes using a lifting magnet shall have a magnet circuit switch of the enclosed type with provision for locking in the open position. Means for discharging the inductive load of the magnet shall be provided.

(6) Runway conductors. Conductors of the open type mounted on the crane runway beams or overhead shall be so located or so guarded that persons entering or leaving the cab or crane footwalk normally could not come into contact with them.

(7) Extension lamps. If a service receptacle is provided in the cab or on the bridge of cab-operated cranes, it shall be a grounded three-prong type permanent receptacle, not exceeding 300 volts.

(8) Floor operated cranes.

(a) An unobstructed aisle not less than three feet wide shall be maintained for travel of the operator except in such cases where the control handles are hung from the trolleys of traveling cranes.

(b) The handles of control ropes shall be distinctly different in contour so that, without looking, the operator will know which is the hoisting and which is the lowering handle. The direction of all movements of the crane shall be clearly indicated in some manner so that the operator can easily become familiar with them.

(c) When repairing runways, repairpersons shall place rail stops and warning signs or signals so as to protect both ends of the section to be repaired.

(d) Repairpersons shall take care to prevent loose parts from falling or being thrown upon the floor beneath.

AMENDATORY SECTION (Amending Order 81-32, filed 12/24/81)

WAC 296-24-40513 Extinguishment. (1) Extinguishers. Areas in the vicinity of dip tanks shall be provided with manual fire extinguishers suitable for flammable and combustible liquid fires, conforming to WAC ((296-24-592)) 296-800-300.

(2) Automatic water spray extinguishing systems. Automatic water spray extinguishing systems shall conform to WAC 296-24-627 and shall be arranged to protect tanks, drainboards, and stock over drainboards.

(3) Automatic foam extinguishing systems. Automatic foam extinguishing systems shall conform to WAC 296-24-627 and;

(a) Foam producing material selected shall be suitable for intended use, taking into account characteristics of the dip tank liquid;

(b) Overflow pipe shall be arranged to prevent the floating away of foam and clogging overflow pipe. This may be accomplished by either of the following:

(i) Overflow pipe may be extended through tank wall and terminated in an ell pointing downward. The bottom of the overflow pipe at the point it pierces tank wall should not be over 2 inches above the opening or face of the ell.

(ii) Overflow pipe inlet may be provided with a removable screen of 1/4-inch mesh having an area at least twice the cross-sectional area of overflow pipe. Screens which may be clogged by dip tank ingredients shall be inspected and cleaned periodically.

(4) Automatic carbon dioxide systems. Automatic carbon dioxide systems shall conform to WAC 296-24-623 and shall be arranged to protect both dip tanks and drainboards and unless stock over drainboards is otherwise protected with automatic extinguishing facilities, shall also be arranged to protect such stock.

(5) Dry chemical extinguishing systems. Dry chemical extinguishing systems shall conform to WAC 296-24-622 and shall be arranged to protect both dip tanks and drainboards, and unless stock over drainboards is otherwise protected with automatic extinguishing facilities, shall also be arranged to protect such stock.

(6) Dip tank covers.

(a) Covers arranged to close automatically in the event of fire shall be actuated by approved automatic devices and shall also be arranged for manual operation.

(b) Covers shall be of substantial noncombustible material or of tin-clad type with enclosing metal applied with locked joints.

(c) Chains or wire rope shall be used for cover support or operating mechanism where the burning of a cord would interfere with the action of a device.

(d) Covers shall be kept closed when tanks are not in use.

AMENDATORY SECTION (Amending WSR 99-10-071, filed 5/4/99, effective 9/1/99)

WAC 296-24-58513 Protective clothing. The following requirements apply to those employees who perform interior structural fire fighting. The requirements do not apply to employees who use fire extinguishers or standpipe systems to control or extinguish fires only in the incipient stage.

(1) General.

(a) The employer shall provide at no cost to the employee and assure the use of protective clothing which complies with the requirements of this section. The employer shall assure that protective clothing ordered or purchased after January 1, 1982, meets the requirements contained in this section. As the new equipment is provided, the employer shall assure that all fire brigade members wear the equipment when performing interior structural fire fighting. After July 1, 1985, the employer shall assure that all fire brigade members wear protective clothing meeting the requirements of this section when performing interior structural fire fighting.

(b) The employer shall assure that protective clothing protects the head, body, and extremities, and consists of at least the following components: Foot and leg protection; hand protection; body protection; eye, face and head protection.

(2) Foot and leg protection.

(a) Foot and leg protection shall meet the requirements of (b) and (c) of this subsection, and may be achieved by either of the following methods:

(i) Fully extended boots which provide protection for the legs; or

(ii) Protective shoes or boots worn in combination with protective trousers that meet the requirements of subsection (3) of this section.

(b) Protective footwear shall meet the requirements of WAC ((296-24-088)) 296-800-160 for Class 75 footwear. In addition, protective footwear shall be water-resistant for at least five inches (12.7 cm) above the bottom of the heel and shall be equipped with slip-resistant outer soles.

(c) Protective footwear shall be tested in accordance with WAC 296-24-63599(1) Appendix E, and shall provide protection against penetration of the midsole by a size 8D common nail when at least 300 pounds (1330 N) of static force is applied to the nail.

(3) Body protection.

(a) Body protection shall be coordinated with foot and leg protection to ensure full body protection for the wearer. This shall be achieved by one of the following methods:

(i) Wearing of a fire-resistive coat meeting the requirements of (b) of this subsection, in combination with fully extended boots meeting the requirements of subsection (2)(b) and (c) of this section; or

(ii) Wearing of fire-resistive coat in combination with protective trousers both of which meet the requirements of (b) of this subsection.

(b) The performance, construction, and testing of fire-resistive coats and protective trousers shall be at least equivalent to the requirements of the National Fire Protection Association (NFPA) standard NFPA No. 1971-1975, "Protective Clothing for Structural Fire Fighting," (see WAC 296-

24-63499, Appendix D) with the following permissible variations from those requirements:

(i) Tearing strength of the outer shell shall be a minimum of eight pounds (35.6 N) in any direction when tested in accordance with WAC 296-24-63599(2), Appendix E; and

(ii) The outer shell may discolor but shall not separate or melt when placed in a forced air laboratory oven at a temperature of 500°F (260°C) for a period of five minutes. After cooling to ambient temperature and using the test method specified in WAC 296-24-63599(3) Appendix E, char length shall not exceed 4.0 inches (10.2 cm) and after-flame shall not exceed 2.0 seconds.

(4) Hand protection.

(a) Hand protection shall consist of protective gloves or glove system which will provide protection against cut, puncture, and heat penetration. Gloves or glove system shall be tested in accordance with the test methods contained in the National Institute for Occupational Safety and Health (NIOSH) 1976 publication, "The Development of Criteria for Fire Fighter's Gloves; Vol. II, Part II: Test Methods," (see WAC 296-24-63499, Appendix D—Availability of publications incorporated by references in WAC 296-24-58505—Fire brigades) and shall meet the following criteria for cut, puncture, and heat penetration:

(i) Materials used for gloves shall resist surface cut by a blade with an edge having a 60 degree included angle and a .001 inch (.0025 cm.) radius, under an applied force of 16 lbf (72N) and at a slicing velocity of greater or equal to 60 in/min. (2.5 cm/sec);

(ii) Materials used for the palm and palm side of the fingers shall resist puncture by a penetrometer (simulating a 4d lath nail), under an applied force of 13.2 lbf (60N) and at a velocity greater or equal to 20 in/min. (.85 cm/sec); and

(iii) The temperature inside the palm and gripping surface of the fingers of gloves shall not exceed 135°F (57°C) when gloves or glove system are exposed to 932°F (500°C) for five seconds at 4 psi (28 kPa) pressure.

(b) Exterior materials of gloves shall be flame resistant and shall be tested in accordance with WAC 296-24-63599(3) Appendix E. Maximum allowable after-flame shall be 2.0 seconds, and the maximum char length shall be 4.0 inches (10.2 cm).

(c) When design of the fire-resistive coat does not otherwise provide protection for the wrists, protective gloves shall have wristlets of at least 4.0 inches (10.2 cm) in length to protect the wrist area when the arms are extended upward and outward from the body.

(5) Head, eye and face protection.

(a) Head protection shall consist of a protective head device with ear flaps and chin strap which meet the performance, construction, and testing requirements of the National Fire Safety and Research Office of the National Fire Prevention and Control Administration, United States Department of Commerce (now known as the United States Fire Administration), which are contained in, "Model Performance Criteria for Structural Fire Fighters' Helmets," (August 1977) (see WAC 296-24-63499, Appendix D).

(b) Protective eye and face devices which comply with WAC ((296-24-078)) 296-800-160 shall be used by fire bri-

gade members when performing operations where the hazards of flying or falling materials which may cause eye and face injuries are present. Protective eye and face devices provided as accessories to protective head devices (face shields) are permitted when such devices meet the requirements of WAC ((296-24-078)) 296-800-160.

(c) Full facepieces, helmets, or hoods of breathing apparatus which meet the requirements of chapter 296-62 WAC, Part E and WAC 296-24-58515, shall be acceptable as meeting the eye and face protection requirements of (b) of this subsection.

AMENDATORY SECTION (Amending WSR 99-10-071, filed 5/4/99, effective 9/1/99)

WAC 296-24-58517 Appendix A—Fire brigades. (1)

Scope. This section does not require an employer to organize a fire brigade. However, if an employer does decide to organize a fire brigade, the requirements of this section apply.

(2) Prefire planning. It is suggested that prefire planning be conducted by the local fire department and/or the workplace fire brigade in order for them to be familiar with the workplace and process hazards. Involvement with the local fire department or fire prevention bureau is encouraged to facilitate coordination and cooperation between members of the fire brigade and those who might be called upon for assistance during a fire emergency.

(3) Organizational statement. In addition to the information required in the organizational statement, WAC 296-24-58507(1), it is suggested that the organizational statement also contain the following information: A description of the duties that the fire brigade members are expected to perform; the line authority of each fire brigade officer; the number of the fire brigade officers and number of training instructors; and a list and description of the types of awards or recognition that brigade members may be eligible to receive.

(4) Physical capability. The physical capability requirement applies only to those fire brigade members who perform interior structural fire fighting. Employees who cannot meet the physical capability requirement may still be members of the fire brigade as long as such employees do not perform interior structural fire fighting. It is suggested that fire brigade members who are unable to perform interior structural fire fighting be assigned less stressful and physically demanding fire brigade duties, e.g., certain types of training, recordkeeping, fire prevention inspection and maintenance, and fire pump operations.

Physically capable can be defined as being able to perform those duties specified in the training requirements of WAC 296-24-58509. Physically capable can also be determined by physical performance tests or by a physical examination when the examining physician is aware of the duties that the fire brigade member is expected to perform.

It is also recommended that fire brigade members participate in a physical fitness program. There are many benefits which can be attributed to being physically fit. It is believed that physical fitness may help to reduce the number of sprain and strain injuries as well as contributing to the improvement of the cardiovascular system.

(5) Training and education. The section on training and education does not contain specific training and education requirements because the type, amount, and frequency of training and education will be as varied as are the purposes for which fire brigades are organized. However, the section does require that training and education be commensurate with those functions that the fire brigade is expected to perform; i.e., those functions specified in the organizational statement. Such a performance requirement provides the necessary flexibility to design a training program which meets the needs of individual fire brigades.

At a minimum, hands-on training is required to be conducted annually for all fire brigade members. However, for those fire brigade members who are expected to perform interior structural fire fighting, some type of training or education session must be provided at least quarterly.

In addition to the required hands-on training, it is strongly recommended that fire brigade members receive other types of training and education such as: Classroom instruction, review of emergency action procedures, prefire planning, review of special hazards in the workplace, and practice in the use of self-contained breathing apparatus.

It is not necessary for the employer to duplicate the same training or education that a fire brigade member receives as a member of a community volunteer fire department, rescue squad, or similar organization. However, such training or education must have been provided to the fire brigade member within the past year and it must be documented that the fire brigade member has received the training or education. For example: There is no need for a fire brigade member to receive another training class in the use of positive-pressure self-contained breathing apparatus if the fire brigade member has recently completed such training as a member of a community fire department. Instead, the fire brigade member should receive training or education covering other important equipment or duties of the fire brigade as they relate to the workplace hazards, facilities and processes.

It is generally recognized that the effectiveness of fire brigade training and education depends upon the expertise of those providing the training and education as well as the motivation of the fire brigade members. Fire brigade training instructors must receive a higher level of training and education than the fire brigade members they will be teaching. This includes being more knowledgeable about the functions to be performed by the fire brigade and the hazards involved. The instructors should be qualified to train fire brigade members and demonstrate skills in communication, methods of teaching, and motivation. It is important for instructors and fire brigade members alike to be motivated toward the goal of the fire brigade and be aware of the importance of the service that they are providing for the protection of other employees and the workplace.

It is suggested that publications from the International Fire Service Training Association, the National Fire Protection Association (NFPA-1041), the International Society of Fire Service Instructors and other fire training sources be consulted for recommended qualifications of fire brigade training instructors.

In order to be effective, fire brigades must have competent leadership and supervision. It is important for those who

PERMANENT

supervise the fire brigade during emergency situations, e.g., fire brigade chiefs, leaders, etc., to receive the necessary training and education for supervising fire brigade activities during these hazardous and stressful situations. These fire brigade members with leadership responsibilities should demonstrate skills in strategy and tactics, fire suppression and prevention techniques, leadership principles, prefire planning, and safety practices. It is again suggested that fire service training sources be consulted for determining the kinds of training and education which are necessary for those with fire brigade leadership responsibilities.

It is further suggested that fire brigade leaders and fire brigade instructors receive more formalized training and education on a continuing basis by attending classes provided by such training sources as universities and university fire extension services.

The following recommendations should not be considered to be all of the necessary elements of a complete comprehensive training program, but the information may be helpful as a guide in developing a fire brigade training program.

All fire brigade members should be familiar with exit facilities and their location, emergency escape routes for handicapped workers, and the workplace "emergency action plan."

In addition, fire brigade members who are expected to control and extinguish fires in the incipient stage should, at a minimum, be trained in the use of fire extinguishers, standpipes, and other fire equipment they are assigned to use. They should also be aware of first aid medical procedures and procedures for dealing with special hazards to which they may be exposed. Training and education should include both classroom instruction and actual operation of the equipment under simulated emergency conditions. Hands-on type training must be conducted at least annually but some functions should be reviewed more often.

In addition to the above training, fire brigade members who are expected to perform emergency rescue and interior structural fire fighting should, at a minimum, be familiar with the proper techniques in rescue and fire suppression procedures. Training and education should include fire protection courses, classroom training, simulated fire situations including "wet drills" and, when feasible, extinguishment of actual mock fires. Frequency of training or education must be at least quarterly, but some drills or classroom training should be conducted as often as monthly or even weekly to maintain the proficiency of fire brigade members.

There are many excellent sources of training and education that the employer may want to use in developing a training program for the workplace fire brigade. These sources include publications, seminars, and courses offered by universities.

There are also excellent fire school courses by such facilities as Texas A and M University, Delaware State Fire School, Lamar University, and Reno Fire School, that deal with those unique hazards which may be encountered by fire brigades in the oil and chemical industry. These schools, and others, also offer excellent training courses which would be beneficial to fire brigades in other types of industries. These courses should be a continuing part of the training program,

and employers are strongly encouraged to take advantage of these excellent resources.

It is also important that fire brigade members be informed about special hazards to which they may be exposed during fire and other emergencies. Such hazards as storage and use areas of flammable liquids and gases, toxic chemicals, water-reactive substances, etc., can pose difficult problems. There must be written procedures developed that describe the actions to be taken in situations involving special hazards. Fire brigade members must be trained in handling these special hazards as well as keeping abreast of any changes that occur in relation to these special hazards.

(6) Fire fighting equipment. It is important that fire fighting equipment that is in damaged or unserviceable condition be removed from service and replaced. This will prevent fire brigade members from using unsafe equipment by mistake.

Fire fighting equipment, except portable fire extinguishers and respirators, must be inspected at least annually. Portable fire extinguishers and respirators are required to be inspected at least monthly.

(7) Protective clothing.

(a) General. WAC 296-24-58513 does not require all fire brigade members to wear protective clothing. It is not the intention of these standards to require employers to provide a full ensemble of protective clothing for every fire brigade member without consideration given to the types of hazardous environments to which the fire brigade member might be exposed. It is the intention of these standards to require adequate protection for those fire brigade members who might be exposed to fires in an advanced stage, smoke, toxic gases, and high temperatures. Therefore, the protective clothing requirements only apply to those fire brigade members who perform interior structural fire fighting operations.

Additionally, the protective clothing requirements do not apply to the protective clothing worn during outside fire fighting operations (brush and forest fires, crash crew operations) or other special fire fighting activities. It is important that the protective clothing to be worn during these types of fire fighting operations reflect the hazards which are expected to be encountered by fire brigade members.

(b) Foot and leg protection. WAC 296-24-58513 permits an option to achieve foot and leg protection.

The section recognizes the interdependence of protective clothing to cover one or more parts of the body. Therefore, an option is given so that fire brigade members may meet the foot and leg requirements by either wearing long fire-resistant coats in combination with fully extended boots, or by wearing shorter fire-resistant coats in combination with protective trousers and protective shoes or shorter boots.

(c) Body protection. WAC 296-24-58513(3) provides an option for fire brigade members to achieve body protection. Fire brigade members may wear a fire-resistant coat in combination with fully extended boots, or they may wear a fire-resistant coat in combination with protective trousers.

Fire-resistant coats and protective trousers meeting all of the requirements contained in NFPA 1971-1975, "Protective Clothing for Structural Fire Fighters," are acceptable as meeting the requirements of this standard.

The lining is required to be permanently attached to the outer shell. However, it is permissible to attach the lining to

the outer shell material by stitching in one area such as at the neck. Fastener tape or snap fasteners may be used to secure the rest of the lining to the outer shell to facilitate cleaning. Reference to permanent lining does not refer to a winter liner which is a detachable extra lining used to give added protection to the wearer against the effects of cold weather and wind.

(d) Hand protection. The requirements of WAC 296-24-58513(4) on hand protection may be met by protective gloves or a glove system. A glove system consists of a combination of different gloves. The usual components of a glove system consist of a pair of gloves, which provide thermal insulation to the hand, worn in combination with a second pair of gloves which provide protection against flame, cut and puncture.

It is suggested that protective gloves provide dexterity and a sense of feel for objects. Criteria and test methods for dexterity are contained in the NIOSH publications, "The Development of Criteria for Firefighters' Gloves; Vol. I: Glove Requirements," and "Vol. II: Glove Criteria and Test Methods." These NIOSH publications also contain a permissible modified version of Federal Test Method 191, Method 5903, (WAC 296-24-63599(3) Appendix E) for flame resistance when gloves, rather than glove material, are tested for flame resistance.

(e) Head, eye and face protection. Head protective devices which meet the requirements contained in NFPA No. 1972 are acceptable as meeting the requirements of this standard for head protection.

Head protective devices are required to be provided with ear flaps so that the ear flaps will be available if needed. It is recommended that ear protection always be used while fighting interior structural fires.

Many head protective devices are equipped with face shields to protect the eyes and face. These face shields are permissible as meeting the eye and face protection requirements of this section as long as such face shields meet the requirements of WAC ((296-24-078)) 296-800-160 of the general safety and health standards.

Additionally, full facepieces, helmets or hoods of approved breathing apparatus which meet the requirements of WAC 296-62-071 and 296-24-58515 are also acceptable as meeting the eye and face protection requirements.

It is recommended that a flame resistant protective head covering such as a hood or snood, which will not adversely affect the seal of a respirator facepiece, be worn during interior structural fire fighting operations to protect the sides of the face and hair.

(8) Respiratory protective devices. Respiratory protection is required to be worn by fire brigade members while working inside buildings or confined spaces where toxic products of combustion or an oxygen deficiency is likely to be present; respirators are also to be worn during emergency situations involving toxic substances. When fire brigade members respond to emergency situations, they may be exposed to unknown contaminants in unknown concentrations. Therefore, it is imperative that fire brigade members wear proper respiratory protective devices during these situations. Additionally, there are many instances where toxic products of combustion are still present during mop-up and

overhaul operations. Therefore, fire brigade members should continue to wear respirators during these types of operations.

Self-contained breathing apparatus are not required to be equipped with either buddy-breathing device or a quick disconnect valve. However, these accessories may be very useful and are acceptable as long as such accessories do not cause damage to the apparatus, restrict the air flow of the apparatus, or obstruct the normal operation of the apparatus.

Buddy-breathing devices are useful for emergency situations where a victim or another fire brigade member can share the same air supply with the wearer of the apparatus for emergency escape purposes.

The employer is encouraged to provide fire brigade members with an alternative means of respiratory protection to be used only for emergency escape purposes if the self-contained breathing apparatus becomes inoperative. Such alternative means of respiratory protection may be either a buddy-breathing device or an escape self-contained breathing apparatus (ESCBAs). The ESCBA is a short-duration respiratory protective device which is approved for only emergency escape purposes. It is suggested that if ESCBA units are used, that they be of at least five minutes service life.

Quick disconnect valves are devices which start the flow of air by insertion of the hose (which leads to the facepiece) into the regulator of self-contained breathing apparatus, and stop the flow of air by disconnecting the hose from the regulator. These devices are particularly useful for those positive-pressure self-contained breathing apparatus which do not have the capability of being switched from the demand to the positive-pressure mode.

The use of a self-contained breathing apparatus where the apparatus can be switched from a demand to a positive-pressure mode is acceptable as long as the apparatus is in the positive-pressure mode when performing interior structural fire fighting operations. Also acceptable are approved respiratory protective devices which have been converted to the positive-pressure type when such modification is accomplished by trained and experienced persons using kits or parts approved by NIOSH and provided by the manufacturer and by following the manufacturer's instructions.

There are situations which require the use of respirators which have a duration of two hours or more. Presently, there are no approved positive-pressure apparatus with a rated service life of more than two hours. Consequently, negative-pressure self-contained breathing apparatus with a rated service life of more than two hours and which have a minimum protection factor of 5,000 as determined by an acceptable quantitative fit test performed on each individual, will be acceptable for use during situations which require long duration apparatus. Long duration apparatus may be needed in such instances as working in tunnels, subway systems, etc. Such negative-pressure breathing apparatus will continue to be acceptable for a maximum of eighteen months after a positive-pressure apparatus with the same or longer rated service life of more than two hours is certified by NIOSH/MSHA. After this eighteen-month phase-in period, all self-contained breathing apparatus used for these long duration situations will have to be of the positive-pressure type.

PERMANENT

NEW SECTION

WAC 296-24-59212 Hydrostatic testing. (1) In addition to an external visual examination, the employer shall assure that an internal examination of cylinders and shells to be tested is made prior to the hydrostatic tests.

(2) The employer shall assure that portable fire extinguishers are hydrostatically tested whenever they show new evidence of corrosion or mechanical injury.

(3) The employer shall assure that hydrostatic tests are performed on extinguisher hose assemblies which are equipped with a shut-off nozzle at the discharge end of the hose. The test interval shall be the same as specified for the extinguisher on which the hose is installed.

(4) The employer shall assure that carbon dioxide hose assemblies with a shut-off nozzle are hydrostatically tested at 1,250 psi (8,620 kPa).

(5) The employer shall assure that dry chemical and dry powder hose assemblies with a shut-off nozzle are hydrostatically tested at 300 psi (2,070 kPa).

(6) Hose assemblies passing a hydrostatic test do not require any type of recording or stamping.

(7) The employer shall assure that hose assemblies for carbon dioxide extinguishers that require a hydrostatic test are tested within a protective cage device.

(8) The employer shall assure that carbon dioxide extinguishers and nitrogen or carbon dioxide cylinders used with wheeled extinguishers are tested every five years at 5/3 of the service pressure as stamped into the cylinder. Nitrogen cylinders which comply with 29 CFR 173.34 (e)(15) may be hydrostatically tested every ten years.

(9) The employer shall assure that all stored pressure and Halon 1211 types of extinguishers are hydrostatically tested at the factory test pressure not to exceed two times the service pressure.

(10) The employer shall assure that acceptable self-generating type soda acid and foam extinguishers are tested at 350 psi (2,410 kPa).

(11) Air or gas pressure may not be used for hydrostatic testing.

(12) Extinguisher shells, cylinders, or cartridges which fail a hydrostatic pressure test, or which are not fit for testing shall be removed from service and from the workplace.

(13)(a) The equipment for testing compressed gas type cylinders shall be of the water-jacket type. The equipment shall be provided with an expansion indicator which operates with an accuracy within one percent of the total expansion or 0.1 cc (.1 mL) of liquid.

(b) The equipment for testing noncompressed gas type cylinders shall consist of the following:

(i) A hydrostatic test pump, hand or power operated, capable of producing not less than one hundred fifty percent of the test pressure, which shall include appropriate check valves and fittings;

(ii) A flexible connection for attachment to fittings to test through the extinguisher nozzle, test bonnet, or hose outlet, as is applicable; and

(iii) A protective cage or barrier for personal protection of the tester, designed to provide visual observation of the extinguisher under test.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-59215 Appendix A—Portable fire extinguishers. (1) Scope and application. The scope and application of this section is written to apply to three basic types of workplaces. First, there are those workplaces where the employer has chosen to evacuate all employees from the workplace at the time of a fire emergency. Second, there are those workplaces where the employer has chosen to permit certain employees to fight fires and to evacuate all other non-essential employees at the time of a fire emergency. Third, there are those workplaces where the employer has chosen to permit all employees in the workplace to use portable fire extinguishers to fight fires.

The section also addresses two kinds of work areas. The entire workplace can be divided into outside (exterior) work areas and inside (interior) work areas. This division of the workplace into two areas is done in recognition of the different types of hazards employees may be exposed to during fire fighting operations. Fires in interior workplaces, pose a greater hazard to employees; they can produce greater exposure to quantities of smoke, toxic gases, and heat because of the capability of a building or structure to contain or entrap these products of combustion until the building can be ventilated. Exterior work areas, normally open to the environment, are somewhat less hazardous, because the products of combustion are generally carried away by the thermal column of the fire. Employees also have a greater selection of evacuation routes if it is necessary to abandon fire fighting efforts.

In recognition of the degree of hazard present in the two types of work areas, the standards for exterior work areas are somewhat less restrictive in regards to extinguisher distribution. WAC ((296-24-59201)) 296-800-300 explains this by specifying which sections apply.

(2) Portable fire extinguisher exemptions. In recognition of the three options given to employers in regard to the amount of employee evacuation to be carried out, the standards permit certain exemptions based on the number of employees expected to use fire extinguishers.

Where the employer has chosen to totally evacuate the workplace at the time of a fire emergency and when fire extinguishers are not provided, the requirements of this section do not apply to that workplace.

Where the employer has chosen to partially evacuate the workplace or the effected area at the time of a fire emergency and has permitted certain designated employees to remain behind to operate critical plant operations or to fight fires with extinguishers, then the employer is exempt from the distribution requirements of this section. Employees who will be remaining behind to perform incipient fire fighting or members of a fire brigade must be trained in their duties. The training must result in the employees becoming familiar with the locations of fire extinguishers. Therefore, the employer must locate the extinguishers in convenient locations where the employees know they can be found. For example, they could be mounted in the fire truck or cart that the fire brigade uses when it responds to a fire emergency. They can also be distributed as set forth in the National Fire Protection Association's Standard No. 10, "Portable Fire Extinguishers."

PERMANENT

Where the employer has decided to permit all employees in the workplace to use fire extinguishers, then the entire WISHA standard applies.

(3) Portable fire extinguisher mounting. Previous standards for mounting fire extinguishers have been criticized for requiring specific mounting locations. In recognition of this criticism, the standard has been rewritten to permit as much flexibility in extinguisher mounting as is acceptable to assure that fire extinguishers are available when needed and that employees are not subjected to injury hazards when they try to obtain an extinguisher.

It is the intent of WISHA to permit the mounting of extinguishers in any location that is accessible to employees without the use of portable devices such as a ladder. This limitation is necessary because portable devices can be moved or taken from the place where they are needed and, therefore, might not be available at the time of an emergency.

Employers are given as much flexibility as possible to assure that employees can obtain extinguishers as fast as possible. For example, an acceptable method of mounting extinguishers in areas where fork lift trucks or tow-motors are used is to mount the units on retractable board which, by means of counterweighting, can be raised above the level where they could be struck by vehicular traffic. When needed, they can be lowered quickly for use. This method of mounting can also reduce vandalism and unauthorized use of extinguishers. The extinguishers may also be mounted as outlined in the National Fire Protection Association's Standard No. 10, "Portable Fire Extinguishers."

(4) Selection and distribution. The employer is responsible for the proper selection and distribution of fire extinguishers and the determination of the necessary degree of protection. The selection and distribution of fire extinguishers must reflect the type and class of fire hazards associated with a particular workplace.

Extinguishers for protecting Class A hazards may be selected from the following types: Water, foam, loaded stream, or multipurpose dry chemical. Extinguishers for protecting Class B hazards may be selected from the following types: Halon 1301, Halon 1211, carbon dioxide, dry chemicals, foam, or loaded stream. Extinguishers for Class C hazards may be selected from the following types: Halon 1301, Halon 1211, carbon dioxide, or dry chemical.

Combustible metal (Class D hazards) fires pose a different type of fire problem in the workplace. Extinguishers using water, gas, or certain dry chemicals cannot extinguish or control this type of fire. Therefore, certain metals have specific dry powder extinguishing agents which can extinguish or control this type of fire. Those agents which have been specifically approved for use on certain metal fires provide the best protection; however, there are also some "universal" type agents which can be used effectively on a variety of combustible metal fires if necessary. The "universal" type agents include: Foundry flux, Lith-X powder, TMB liquid, pyromet powder, TEC powder, dry talc, dry graphite powder, dry sand, dry sodium chloride, dry soda ash, lithium chloride, zirconium silicate, and dry dolomite.

Water is not generally accepted as an effective extinguishing agent for metal fires. When applied to hot burning metal, water will break down into its basic atoms of oxygen

and hydrogen. This chemical breakdown contributes to the combustion of the metal. However, water is also a good universal coolant and can be used on some combustible metals, but only under proper conditions and application, to reduce the temperature of the burning metal below the ignition point. For example, automatic deluge systems in magnesium plants can discharge such large quantities of water on burning magnesium that the fire will be extinguished. The National Fire Protection Association has specific standards for this type of automatic sprinkler system. Further information on the control of metal fires with water can be found in the National Fire Protection Association's *Fire Protection Handbook*.

An excellent source of selection and distribution criteria is found in the National Fire Protection Association's Standard No. 10. Other sources of information include the National Safety Council and the employer's fire insurance carrier.

(5) Substitution of standpipe systems for portable fire extinguishers. The employer is permitted to substitute acceptable standpipe systems for portable fire extinguishers under certain circumstances. It is necessary to assure that any substitution will provide the same coverage that portable units provide. This means that fire hoses, because of their limited portability, must be spaced throughout the protected area so that they can reach around obstructions such as columns, machinery, etc., and so that they can reach into closets and other enclosed areas.

(6) Inspection, maintenance and testing. The ultimate responsibility for the inspection, maintenance and testing of portable fire extinguishers lies with the employer. The actual inspection, maintenance, and testing may, however, be conducted by outside contractors with whom the employer has arranged to do the work. When contracting for such work, the employer should assure that the contractor is capable of performing the work that is needed to comply with this standard.

If the employer should elect to perform the inspection, maintenance, and testing requirements of this section in-house, then the employer must make sure that those persons doing the work have been trained to do the work and to recognize problem areas which could cause an extinguisher to be inoperable. The National Fire Protection Association provides excellent guidelines in its standard for portable fire extinguishers. The employer may also check with the manufacturer of the unit that has been purchased and obtain guidelines on inspection, maintenance, and testing. Hydrostatic testing is a process that should be left to contractors or individuals using suitable facilities and having the training necessary to perform the work.

Any time the employer has removed an extinguisher from service to be checked or repaired, alternate equivalent protection must be provided. Alternate equivalent protection could include replacing the extinguisher with one or more units having equivalent or equal ratings, posting a fire watch, restricting the unprotected area from employee exposure, or providing a hose system ready to operate.

(7) Hydrostatic testing. As stated before, the employer may contract for hydrostatic testing. However, if the employer wishes to provide the testing service, certain equipment and facilities must be available. Employees should be

made aware of the hazards associated with hydrostatic testing and the importance of using proper guards and water pressures. Severe injury can result if extinguisher shells fail violently under hydrostatic pressure.

Employers are encouraged to use contractors who can perform adequate and reliable service. Firms which have been certified by the Materials Transportation Board (MTB) of the United States Department of Transportation (DOT), or state licensed extinguisher servicing firms, or recognized by the National Association of Fire Equipment Distributors in Chicago, Illinois, are generally acceptable for performing this service.

(8) Training and education. This part of the standard is of the utmost importance to employers and employees if the risk of injury or death due to extinguisher use is to be reduced. If an employer is going to permit an employee to fight a workplace fire of any size, the employer must make sure that the employee knows everything necessary to assure the employee's safety.

Training and education can be obtained through many channels. Often, local fire departments in larger cities have fire prevention bureaus or similar organizations which can provide basic fire prevention training programs. Fire insurance companies will have data and information available. The National Fire Protection Association and the National Safety Council will provide, at a small cost, publications that can be used in a fire prevention program.

Actual fire fighting training can be obtained from various sources in the country. The Texas A and M University, the University of Maryland's Fire and Rescue Institute, West Virginia University's Fire Service Extension, Iowa State University's Fire Service Extension and other state training schools and land grant colleges have fire fighting programs directed to industrial applications. Some manufacturers of extinguishers, such as the Ansul Company and Safety First, conduct fire schools for customers in the proper use of extinguishers. Several large corporations have taken time to develop their own on-site training programs which expose employees to the actual "feeling" of fire fighting. Simulated fires for training of employees in the proper use of extinguishers are also an acceptable part of a training program.

In meeting the requirements of this section, the employer may also provide educational materials, without classroom instruction, through the use of employee notice campaigns using instruction sheets or flyers or similar types of informal programs. The employer must make sure that employees are trained and educated to recognize not only what type of fire is being fought and how to fight it, but also when it is time to get away from it and leave fire suppression to more experienced fire fighters.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-65501 Portable powered tools. (1) Portable circular saws.

(a) All portable, power-driven circular saws having a blade diameter greater than 2 in. shall be equipped with guards above and below the base plate or shoe. The upper guard shall cover the saw to the depth of the teeth, except for

the minimum arc required to permit the base to be tilted for bevel cuts. The lower guard shall cover the saw to the depth of the teeth, except for the minimum arc required to allow proper retraction and contact with the work. When the tool is withdrawn from the work, the lower guard shall automatically and instantly return to covering position.

(b) (1)(a) of this section does not apply to circular saws used in the meat industry for meat cutting purposes.

(2) Switches and controls.

(a) All hand-held powered circular saws having a blade diameter-greater than 2 inches, electric, hydraulic or pneumatic chain saws, and percussion tools without positive accessory holding means shall be equipped with a constant pressure switch or control that will shut off the power when the pressure is released. All hand-held gasoline powered chain saws shall be equipped with a constant pressure throttle control that will shut off the power to the saw chain when the pressure is released.

(b) All hand-held powered drills, tappers, fastener drivers, horizontal, vertical, and angle grinders with wheels greater than 2 inches in diameter, disc sanders with discs greater than 2 inches in diameter, belt sanders, reciprocating saws, saber, scroll, and jig saws with blade shanks greater than a nominal one-fourth inch, and other similarly operating powered tools shall be equipped with a constant pressure switch or control and may have a lock-on control provided that turnoff can be accomplished by a single motion of the same finger or fingers that turn it on.

(c) All other hand-held powered tools, such as, but not limited to, platen sanders, grinders with wheels 2 inches in diameter or less, disc sanders with discs 2 inches in diameter or less, routers, planers, laminate trimmers, nibblers, shears, saber, scroll, and jig saws with blade shanks a nominal one-fourth of an inch wide or less, may be equipped with either a positive "on-off" control, or other controls as described by (2)(a) and (b) of this section.

(i) Saber, scroll, and jig saws with nonstandard blade holders may use blades with shanks which are nonuniform in width, provided the narrowest portion of the blade shank is an integral part in mounting the blade.

(ii) Blade shank width shall be measured at the narrowest portion of the blade shank when saber, scroll, and jig saws have nonstandard blade holders.

(iii) "Nominal" in this section means +0.05 inch.

(d) The operating control on hand-held power tools shall be so located as to minimize the possibility of its accidental operation, if such accidental operation would constitute a hazard to employees.

(e) This subdivision does not apply to concrete vibrators, concrete breakers, powered tampers, jack hammers, rock drills, garden appliances, household and kitchen appliances, personal care appliances, medical or dental equipment, or to fixed machinery.

(3) Portable belt sanding machines. Belt sanding machines shall be provided with guards at each nip point where the sanding belt runs onto a pulley. These guards shall effectively prevent the hands or fingers of the operator from coming in contact with the nip points. The unused run of the sanding belt shall be guarded against accidental contact.

(4) Cracked saws. All cracked saws shall be removed from service.

(5) Grounding. Portable electric powered tools shall meet the electrical requirements of chapter 296-24 WAC Part L, and WAC 296-800-280.

AMENDATORY SECTION (Amending WSR 99-10-071, filed 5/4/99, effective 9/1/99)

WAC 296-24-67515 Personal protective equipment.

(1) Employers must use only respirators certified by NIOSH under 42 CFR part 84 for protecting employees from dusts produced during abrasive-blasting operations.

(2) Abrasive-blasting respirators. Abrasive-blasting respirators must be worn by all abrasive-blasting operators in the following situations: (a) When working inside of blast cleaning rooms, or (b) when using silica sand in manual blasting operations except where the nozzle and blast are physically separated from the operator in an exhaust ventilated enclosure, or (c) where concentrations of toxic dusts dispersed by the abrasive blasting may exceed the limits set in chapter 296-62 WAC, Part E except where the nozzle and blast are physically separated from the operator in an exhaust-ventilated enclosure.

(3) Particulate-filter respirators.

(a) Properly fitted particulate-filter respirators, commonly referred to as dust-filter respirators, may be used for short, intermittent, or occasional dust exposures such as clean-up, dumping of dust collectors, or unloading shipments of sand at a receiving point when it is not feasible to control the dust by enclosure, exhaust ventilation, or other means.

(b) Dust-filter respirators may also be used to protect the operator of outside (outdoor) abrasive-blasting operations where nonsilica abrasives are used on materials having low toxicity.

Note: The selection of a dust-filter respirator depends on the amount of dust in the breathing zone of the user. See WAC 296-62-07113 - Table 5.

(c) Dust-filter respirators used must be certified by NIOSH under 42 CFR part 84 for protection against the specific type of dust encountered.

(d) Dust-filter respirators must be properly fitted as required in chapter 296-62 WAC, Part E.

(e) Dust-filter respirators must not be used for continuous protection where silica sand is used as the blasting abrasive, or when toxic materials are blasted.

(4) A respiratory protection program as required in chapter 296-62 WAC, Part E must be established wherever it is necessary to use respirators.

(5) Personal protective clothing.

(a) Operators must be equipped with heavy canvas or leather gloves and aprons or equivalent protection to protect them from the impact of abrasives.

(b) Safety shoes must be worn where there is a hazard of foot injury.

(c) Equipment for protection of the eyes and face must be supplied to the operator and to other personnel working near abrasive blasting operations when the respirator design does not provide such protection.

(6) Personal protective clothing, equipment and their use must comply with WAC ((~~296-24-075 (Part A2)~~)) 296-800-160.

AMENDATORY SECTION (Amending Order 91-07, filed 11/22/91, effective 12/24/91)

WAC 296-24-68503 Application of arc welding equipment.

Note: Assurance of consideration of safety in design is obtainable by choosing apparatus complying with the Requirements for Electric Arc-Welding Apparatus, NEMA EW-1-1962, National Electrical Manufacturers Association or the Safety Standard for Transformer-Type Arc-Welding Machines, ANSI C33.2-1956, Underwriters' Laboratories.

(1) Environmental conditions.

(a) Standard machines for arc welding service shall be designed and constructed to carry their rated load with rated temperature rises where the temperature of the cooling air does not exceed 40°C (104°F) and where the altitude does not exceed 3,300 feet, and shall be suitable for operation in atmospheres containing gases, dust, and light rays produced by the welding arc.

(b) Unusual service conditions may exist, and in such circumstances machines shall be especially designed to safely meet the requirements of the service. Chief among these conditions are exposure to:

- (i) Unusually corrosive fumes.
- (ii) Steam or excessive humidity.
- (iii) Excessive oil vapor.
- (iv) Flammable gases.
- (v) Abnormal vibration or shock.
- (vi) Excessive dust.
- (vii) Weather.
- (viii) Unusual seacoast or shipboard conditions.

(2) Voltage. Open circuit (no load) voltages of arc welding and cutting machines should be as low as possible consistent with satisfactory welding or cutting being done. The following limits shall not be exceeded:

- (a) Alternating-current machines.
 - (i) Manual arc welding and cutting—80 volts.
 - (ii) Automatic (machine or mechanized) arc welding and cutting—100 volts.
- (b) Direct-current machines.
 - (i) Manual arc welding and cutting—100 volts.
 - (ii) Automatic (machine or mechanized) arc welding and cutting—100 volts.

(c) When special welding and cutting processes require values of open circuit voltages higher than the above, means shall be provided to prevent the operator from making accidental contact with the high voltage by adequate insulation or other means.

Note: For a.c. welding under wet conditions or warm surroundings where perspiration is a factor, the use of reliable automatic controls for reducing no load voltage is recommended to reduce the shock hazard.

(3) Design.

(a) A controller integrally mounted in an electric motor driven welder shall have capacity for carrying rated motor current, shall be capable of making and interrupting stalled

rotor current of the motor, and may serve as the running over-current device if provided with the number of over-current units as specified by chapter 296-24 WAC Part L, and WAC 296-800-280. Starters with magnetic undervoltage release should be used with machines installed more than one to a circuit to prevent circuit overload caused by simultaneously starting of several motors upon return of voltage.

(b) On all types of arc welding machines, control apparatus shall be enclosed except for the operating wheels, levers, or handles.

Note: Control handles and wheels should be large enough to be easily grasped by a gloved hand.

(c) Input power terminals, tap change devices and live metal parts connected to input circuits shall be completely enclosed and accessible only by means of tools.

(d) Terminals for welding leads should be protected from accidental electrical contact by employees or by metal objects i.e., vehicles, crane hooks, etc. Protection may be obtained by use of: Dead-front receptacles for plug connections; recessed openings with nonremovable hinged covers; heavy insulating sleeving or taping or other equivalent electrical and mechanical protection. If a welding lead terminal which is intended to be used exclusively for connection to the work is connected to the grounded enclosure, it must be done by a conductor at least two AWG sizes smaller than the grounding conductor and the terminal shall be marked to indicate that it is grounded.

(e) No connections for portable control devices such as push buttons to be carried by the operator shall be connected to an a.c. circuit of higher than 120 volts. Exposed metal parts of portable control devices operating on circuits above 50 volts shall be grounded by a grounding conductor in the control cable.

(f) Auto transformers or a.c. reactors shall not be used to draw welding current directly from any a.c. power source having a voltage exceeding 80 volts.

AMENDATORY SECTION (Amending Order 91-07, filed 11/22/91, effective 12/24/91)

WAC 296-24-68505 Installation of arc welding equipment. (1) General. Installation including power supply shall be according to the requirements of chapter 296-24 WAC Part L, and WAC 296-800-280.

(2) Grounding.

(a) The frame or case of the welding machine (except engine-driven machines) shall be grounded under the conditions and according to the methods prescribed in chapter 296-24 WAC Part L, and WAC 296-800-280.

(b) Conduits containing electrical conductors shall not be used for completing a work-lead circuit. Pipelines shall not be used as a permanent part of a work-lead circuit, but may be used during construction, extension or repair providing current is not carried through threaded joints, flanged bolted joints, or caulked joints and that special precautions are used to avoid sparking at connection of the work-lead cable.

(c) Chains, wire ropes, cranes, hoists, and elevators shall not be used to carry welding current.

(d) Where a structure, conveyor, or fixture is regularly employed as a welding current return circuit, joints shall be bonded or provided with adequate current collecting devices and appropriate periodic inspection should be conducted to ascertain that no condition of electrolysis or shock, or fire hazard exists by virtue of such use.

(e) All ground connections shall be checked to determine that they are mechanically strong and electrically adequate for the required current.

(3) Supply connections and conductors.

(a) A disconnecting switch or controller shall be provided at or near each welding machine which is not equipped with such a switch or controller mounted as an integral part of the machine. The switch shall be according to chapter 296-24 WAC Part L, and WAC 296-800-280. Overcurrent protection shall be provided as specified in chapter 296-24 WAC Part L, and WAC 296-800-280. A disconnect switch with overload protection or equivalent disconnect and protection means, permitted by chapter 296-24 WAC Part L, and WAC 296-800-280, shall be provided for each outlet intended for connection to a portable welding machine.

(b) For individual welding machines, the rated current-carrying capacity of the supply conductors shall be not less than the rated primary current of the welding machines.

(c) For groups of welding machines, the rated current-carrying capacity of conductors may be less than the sum of the rated primary currents of the welding machines supplied. The conductor rating shall be determined in each case according to the machine loading based on the use to be made of each welding machine and the allowance permissible in the event that all the welding machines supplied by the conductors will not be in use at the same time.

(d) In operations involving several welders on one structure, d.c. welding process requirements may require the use of both polarities; or supply circuit limitations for a.c. welding may require distribution of machines among the phases of the supply circuit. In such cases no load voltages between electrode holders will be 2 times normal in d.c. or 1, 1.4, 1.73, or 2 times normal on a.c. machines. Similar voltage differences will exist if both a.c. and d.c. welding are done on the same structure.

(i) All d.c. machines shall be connected with the same polarity.

(ii) All a.c. machines shall be connected to the same phase of the supply circuit and with the same instantaneous polarity.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-24-69001 General. (1) Installation. All equipment shall be installed by a qualified electrician in conformance with chapter 296-24 WAC Part L, and WAC 296-800-280. There shall be a safety-type disconnecting switch or a circuit breaker or circuit interrupter to open each power circuit to the machine, conveniently located at or near the machine, so that the power can be shut off when the machine or its controls are to be serviced.

(2) Thermal protection. Ignitron tubes used in resistance welding equipment shall be equipped with a thermal protection switch.

(3) Personnel. Workers designated to operate resistance welding equipment shall have been properly instructed and judged competent to operate such equipment.

(4) Guarding. Controls of all automatic or air and hydraulic clamps shall be arranged or guarded to prevent the operator from accidentally activating them.

AMENDATORY SECTION (Amending Order 94-16, filed 9/30/94, effective 11/20/94)

WAC 296-24-70005 Protective clothing. (1) General requirements. Employees exposed to the hazards created by welding, cutting, or brazing operations shall be protected by personal protective equipment in accordance with the requirements of chapter 296-24 WAC, Part ((A-2)) I, and WAC 296-800-160. Appropriate protective clothing required for any welding operation will vary with the size, nature and location of the work to be performed.

(2) Specified protective clothing. Protective means which may be employed are as follows:

(a) Except when engaged in light work, all welders should wear flameproof gauntlet gloves.

(b) Flameproof aprons made of leather, asbestos, or other suitable material may also be desirable as protection against radiated heat and sparks.

(c) Woolen clothing preferable to cotton because it is not so readily ignited and helps protect the welder from changes in temperature. Cotton clothing, if used, should be chemically treated to reduce its combustibility. All outer clothing such as jumpers or overalls should be reasonably free from oil or grease.

(d) Sparks may lodge in rolled-up sleeves or pockets of clothing, or cuffs of overalls or trousers. It is therefore recommended that sleeves and collars be kept buttoned and pockets be eliminated from the front of overalls and aprons. Trousers or overalls should not be turned up on the outside.

Note: For heavy work, fire-resistant leggings, high boots, or other equivalent means should be used.

(e) In production work a sheet metal screen in front of the worker's legs can provide further protection against sparks and molten metal in cutting operations.

(f) Capes or shoulder covers made of leather or other suitable materials should be worn during overhead welding or cutting operations. Leather skull caps may be worn under helmets to prevent head burns.

(g) For overhead welding and cutting, or welding and cutting in extremely confined spaces, ear protection is sometimes desirable.

(h) Where there is exposure to sharp or heavy falling objects, or a hazard of bumping in confined spaces, hard hats or head protectors shall be used.

AMENDATORY SECTION (Amending Order 91-07, filed 11/22/91, effective 12/24/91)

WAC 296-24-95607 Wiring design and protection.

(1) **Use and identification of grounded and grounding conductors.**

(a) **Identification of conductors.** A conductor used as a grounded conductor shall be identifiable and distinguishable from all other conductors. A conductor used as an equipment grounding conductor shall be identifiable and distinguishable from all other conductors.

(b) **Polarity of connections.** No grounded conductor may be attached to any terminal or lead so as to reverse designated polarity.

(c) **Use of grounding terminals and devices.** A grounding terminal or grounding-type device on a receptacle, cord connector, or attachment plug may not be used for purposes other than grounding.

(2) **Outlet devices.** Outlet devices shall have an ampere rating not less than the load to be served.

(3) **Outside conductors, 600 volts, nominal, or less.** Subdivisions (a), (b), (c) and (d) of this subsection apply to branch circuit, feeder, and service conductors rated 600 volts, nominal, or less and run outdoors as open conductors. Subdivision (e) of this subsection applies to lamps installed under such conductors.

(a) **Conductors on poles.** Conductors supported on poles shall provide a horizontal climbing space not less than the following:

(i) Power conductors below communication conductors—30 inches.

(ii) Power conductors alone or above communication conductors: 300 volts or less—24 inches; more than 300 volts—30 inches.

(iii) Communication conductors below power conductors with power conductors 300 volts or less—24 inches; more than 300 volts—30 inches.

(b) **Clearance from ground.** Open conductors shall conform to the following minimum clearances:

(i) 10 feet—above finished grade, sidewalks, or from any platform or projection from which they might be reached.

(ii) 12 feet—over areas subject to vehicular traffic other than truck traffic.

(iii) 15 feet—over areas other than those specified in item (b)(iv) of this subsection that are subject to truck traffic.

(iv) 18 feet—over public streets, alleys, roads, and drive-ways.

(c) **Clearance from building openings.** Conductors shall have a clearance of at least 3 feet from windows, doors, porches, fire escapes, or similar locations. Conductors run above the top level of a window are considered to be out of reach from that window and, therefore, do not have to be 3 feet away.

(d) **Clearance over roofs.** Conductors shall have a clearance of not less than 8 feet from the highest point of roofs over which they pass, except that:

(i) Where the voltage between conductors is 300 volts or less and the roof has a slope of not less than 4 inches in 12, the clearance from the roofs shall be at least 3 feet; or

(ii) Where the voltage between conductors is 300 volts or less and the conductors do not pass over more than 4 feet of the overhang portion of the roof and they are terminated at a through-the-roof raceway or approved support, the clearance from the roofs shall be at least 18 inches.

(e) **Location of outdoor lamps.** Lamps for outdoor lighting shall be located below all live conductors, transformers, or other electric equipment, unless such equipment is controlled by a disconnecting means that can be locked in the open position or unless adequate clearances or other safeguards are provided for relamping operations.

(4) **Services.**

(a) **Disconnecting means.**

(i) **General.** Means shall be provided to disconnect all conductors in a building or other structure from the service-entrance conductors. The disconnecting means shall plainly indicate whether it is in the open or closed position and shall be installed at a readily accessible location nearest the point of entrance of the service-entrance conductors.

(ii) **Simultaneous opening of poles.** Each service disconnecting means shall simultaneously disconnect all ungrounded conductors.

(b) **Services over 600 volts, nominal.** The following additional requirements apply to services over 600 volts, nominal.

(i) **Guarding.** Service-entrance conductors installed as open wires shall be guarded to make them accessible only to qualified persons.

(ii) **Warning signs.** Signs warning of high voltage shall be posted where other than qualified employees might come in contact with live parts.

(5) **Overcurrent protection.**

~~((a) 600 volts, nominal, or less. The following requirements apply to overcurrent protection of circuits rated 600 volts, nominal, or less.~~

~~(i) **Protection of conductors and equipment.** Conductors and equipment shall be protected from overcurrent in accordance with their ability to safely conduct current.~~

~~(ii) **Grounded conductors.** Except for motor running overload protection, overcurrent devices may not interrupt the continuity of the grounded conductor unless all conductors of the circuit are opened simultaneously.~~

~~(iii) **Disconnection of fuses and thermal cutouts.** Except for service fuses, all cartridge fuses which are accessible to other than qualified persons and all fuses and thermal cutouts on circuits over 150 volts to ground shall be provided with disconnecting means. This disconnecting means shall be installed so that the fuse or thermal cutout can be disconnected from its supply without disrupting service to equipment and circuits unrelated to those protected by the overcurrent device.~~

~~(iv) **Location in or on premises.** Overcurrent devices shall be readily accessible to each employee or authorized building management personnel. These overcurrent devices may not be located where they will be exposed to physical damage nor in the vicinity of easily ignitable material.~~

~~(v) **Arcing or suddenly moving parts.** Fuses and circuit breakers shall be so located or shielded that employees will not be burned or otherwise injured by their operation.~~

~~(vi) **Circuit breakers.**~~

~~(A) Circuit breakers shall clearly indicate whether they are in the open (off) or closed (on) position.~~

~~(B) Where circuit breaker handles on switchboards are operated vertically rather than horizontally or rotationally, the up position of the handle shall be the closed (on) position. (See WAC 296-24-95603 (2)(e).)~~

~~(C) If used as switches in 120-volt, fluorescent lighting circuits, circuit breakers shall be approved for the purpose and marked "SWD." (See WAC 296-24-95603 (2)(e).)~~

~~(b)) **Over 600 volts, nominal.** Feeders and branch circuits over 600 volts, nominal, shall have short-circuit protection.~~

(6) **Grounding.** Subdivisions (a) through (g) of this subsection contain grounding requirements for systems, circuits, and equipment.

(a) **Systems to be grounded.** The following systems which supply premises wiring shall be grounded:

(i) All 3-wire DC systems shall have their neutral conductor grounded.

(ii) Two-wire DC systems operating at over 50 volts through 300 volts between conductors shall be grounded unless:

(A) They supply only industrial equipment in limited areas and are equipped with a ground detector; or

(B) They are rectifier-derived from an AC system complying with items (a)(iii), (a)(iv), and (a)(v) of this subsection; or

(C) They are fire-protective signaling circuits having a maximum current of 0.030 amperes.

(iii) AC circuits of less than 50 volts shall be grounded if they are installed as overhead conductors outside of buildings or if they are supplied by transformers and the transformer primary supply system is ungrounded or exceeds 150 volts to ground.

(iv) AC systems of 50 volts to 1000 volts shall be grounded under any of the following conditions, unless exempted by item (a)(v) of this subsection:

(A) If the system can be so grounded that the maximum voltage to ground on the ungrounded conductors does not exceed 150 volts;

(B) If the system is nominally rated 480Y/277 volt, 3-phase, 4-wire in which the neutral is used as a circuit conductor;

(C) If the system is nominally rated 240/120 volt, 3-phase, 4-wire in which the midpoint of one phase is used as a circuit conductor; or

(D) If a service conductor is uninsulated.

(v) AC systems of 50 volts to 1000 volts are not required to be grounded under any of the following conditions:

(A) If the system is used exclusively to supply industrial electric furnaces for melting, refining, tempering, and the like.

(B) If the system is separately derived and is used exclusively for rectifiers supplying only adjustable speed industrial drives.

(C) If the system is separately derived and is supplied by a transformer that has a primary voltage rating less than 1000 volts, provided all of the following conditions are met:

- (I) The system is used exclusively for control circuits;
- (II) The conditions of maintenance and supervision assure that only qualified persons will service the installation;
- (III) Continuity of control power is required; and
- (IV) Ground detectors are installed on the control system.

(D) If the system is an isolated power system that supplies circuits in health care facilities.

(b) **Conductors to be grounded.** For AC premises wiring systems the identified conductor shall be grounded.

(c) **Grounding connections.**

(i) For a grounded system, a grounding electrode conductor shall be used to connect both the equipment grounding conductor and the grounded circuit conductor to the grounding electrode. Both the equipment grounding conductor and the grounding electrode conductor shall be connected to the grounded circuit conductor on the supply side of the service disconnecting means, or on the supply side of the system disconnecting means or overcurrent devices if the system is separately derived.

(ii) For an ungrounded service-supplied system, the equipment grounding conductor shall be connected to the grounding electrode conductor at the service equipment. For an ungrounded separately derived system, the equipment grounding conductor shall be connected to the grounding electrode conductor at, or ahead of, the system disconnecting means or overcurrent devices.

(iii) On extensions of existing branch circuits which do not have an equipment grounding conductor, grounding-type receptacles may be grounded to a grounded cold water pipe near the equipment.

(d) **Grounding path.** The path to ground from circuits, equipment, and enclosures shall be permanent and continuous.

(e) **Supports, enclosures, and equipment to be grounded.**

(i) **Supports and enclosures for conductors.** Metal cable trays, metal raceways, and metal enclosures for conductors shall be grounded, except that:

(A) Metal enclosures such as sleeves that are used to protect cable assemblies from physical damage need not be grounded; or

(B) Metal enclosures for conductors added to existing installations of open wire, knob-and-tube wiring, and nonmetallic-sheathed cable need not be grounded if all of the following conditions are met:

- (I) Runs are less than 25 feet;
- (II) Enclosures are free from probable contact with ground, grounded metal, metal laths, or other conductive materials; and
- (III) Enclosures are guarded against employee contact.

(ii) **Service equipment enclosures.** Metal enclosures for service equipment shall be grounded.

(iii) **Frames of ranges and clothes dryers.** Frames of electric ranges, wall-mounted ovens, counter-mounted cooking units, clothes dryers, and metal outlet or junction boxes

which are part of the circuit for these appliances shall be grounded.

(iv) **Fixed equipment.** Exposed noncurrent-carrying metal parts of fixed equipment which may become energized shall be grounded under any of the following conditions:

(A) If within 8 feet vertically or 5 feet horizontally of ground or grounded metal objects and subject to employee contact.

(B) If located in a wet or damp location and not isolated.

(C) If in electrical contact with metal.

(D) If in a hazardous (classified) location.

(E) If supplied by a metal-clad, metal-sheathed, or grounded metal raceway wiring method.

(F) If equipment operates with any terminal at over 150 volts to the ground; however, the following need not be grounded:

(I) Enclosures for switches or circuit breakers used for other than service equipment and accessible to qualified persons only;

(II) Metal frames of electrically heated appliances which are permanently and effectively insulated from ground; and

(III) The cases of distribution apparatus such as transformers and capacitors mounted on wooden poles at a height exceeding 8 feet above ground or grade level.

(v) **Equipment connected by cord and plug.** Under any of the conditions described in subitems (e)(v)(A) through (e)(v)(C) of this subsection, exposed noncurrent-carrying metal parts of cord-connected and plug-connected equipment which may become energized shall be grounded.

(A) If in hazardous (classified) locations (see WAC 296-24-95613).

(B) If operated at over 150 volts to ground, except for guarded motors and metal frames of electrically heated appliances if the appliance frames are permanently and effectively insulated from ground.

(C) If the equipment is of the following types:

- (I) Refrigerators, freezers, and air conditioners;
- (II) Clothes-washing, clothes-drying and dishwashing machines, sump pumps, and electrical aquarium equipment;
- (III) Hand-held motor-operated tools;
- (IV) Motor-operated appliances of the following types: Hedge clippers, lawn mowers, snow blowers, and wet scrubbers;

(V) Cord-connected and plug-connected appliances used in damp or wet locations or by employees standing on the ground or on metal floors or working inside of metal tanks or boilers;

(VI) Portable and mobile x-ray and associated equipment;

(VII) Tools likely to be used in wet and conductive locations; and

(VIII) Portable hand lamps. Tools likely to be used in wet and conductive locations need not be grounded if supplied through an isolating transformer with an ungrounded secondary of not over 50 volts. Listed or labeled portable tools and appliances protected by an approved system of double insulation, or its equivalent, need not be grounded. If such a system is employed, the equipment shall be distinctively

marked to indicate that the tool or appliance utilizes an approved system of double insulation.

(vi) **Nonelectrical equipment.** The metal parts of the following nonelectrical equipment shall be grounded: Frames and tracks of electrically operated cranes; frames of nonelectrically driven elevator cars to which electric conductors are attached; hand operated metal shifting ropes or cables of electric elevators, and metal partitions, grill work, and similar metal enclosures around equipment of over 750 volts between conductors.

(f) Methods of grounding fixed equipment.

(i) Noncurrent-carrying metal parts of fixed equipment, if required to be grounded by this section, shall be grounded by an equipment grounding conductor which is contained within the same raceway, cable, or cord, or runs with or encloses the circuit conductors. For DC circuits only, the equipment grounding conductor may be run separately from the circuit conductors.

(ii) Electric equipment is considered to be effectively grounded if it is secured to, and in electrical contact with, a metal rack or structure that is provided for its support and the metal rack or structure is grounded by the method specified for the noncurrent-carrying metal parts of fixed equipment in item (f)(i) of this subsection. For installations made before May 30, 1982, only, electric equipment is also considered to be effectively grounded if it is secured to, and in metallic contact with, the grounded structural metal frame of a building. Metal car frames supported by metal hoisting cables attached to or running over metal sheaves or drums of grounded elevator machines are also considered to be effectively grounded.

(g) Grounding of systems and circuits of 1000 volts and over (high voltage).

(i) **General.** If high voltage systems are grounded, they shall comply with all applicable provisions of subdivisions (a) through (f) of this subsection as supplemented and modified by the subdivision (g) of this subsection.

(ii) **Grounding of systems supplying portable or mobile equipment.** (See WAC 296-24-95603 (2)(c) and 296-800-280.) Systems supplying portable or mobile high voltage equipment, other than substations installed on a temporary basis, shall comply with the following:

(A) Portable and mobile high voltage equipment shall be supplied from a system having its neutral grounded through an impedance. If a delta-connected high voltage system is used to supply the equipment, a system neutral shall be derived.

(B) Exposed noncurrent-carrying metal parts of portable and mobile equipment shall be connected by an equipment grounding conductor to the point at which the system neutral impedance is grounded.

(C) Ground-fault detection and relaying shall be provided to automatically deenergize any high voltage system component which has developed a ground fault. The continuity of the equipment grounding conductor shall be continuously monitored so as to deenergize automatically the high voltage feeder to the portable equipment upon loss of continuity of the equipment grounding conductor.

(D) The grounding electrode to which the portable or mobile equipment system neutral impedance is connected

shall be isolated from and separated in the ground by at least 20 feet from any other system or equipment grounding electrode, and there shall be no direct connection between the grounding electrodes, such as buried pipe, fence, etc.

(iii) **Grounding of equipment.** All noncurrent-carrying metal parts of portable equipment and fixed equipment including their associated fences, housings, enclosures, and supporting structures shall be grounded. However, equipment which is guarded by location and isolated from ground need not be grounded. Additionally, pole-mounted distribution apparatus at a height exceeding 8 feet above ground or grade level need not be grounded.

REPEALER

The following sections of the Washington Administrative Code are repealed:

AMENDATORY SECTION (Amending Order 73-5, filed 5/9/73 and Order 73-4, filed 5/7/73)

WAC 296-24-005 Purpose and scope. ((The rules included in this chapter apply throughout the state of Washington, to any and all work places under the jurisdiction of the department of labor and industries. These rules are minimum safety requirements with which all industries must comply. Special industry rules which will complement or augment rules contained in this chapter, appear as vertical standards in other chapters of Title 296 WAC. By adherence to such rules industrial accidents may be eliminated or minimized.)) The rules in this chapter are designed to protect the safety and health of employees by creating a healthy work environment by establishing requirements to control safety hazards in the workplace. Chapter 296-800 WAC, the safety and health core rules, contain safety and health rules that apply to most

workplaces. Other special industry rules complement the rules found in this chapter and in the safety and health core rules.

AMENDATORY SECTION (Amending Order 73-5, filed 5/9/73 and Order 73-4, filed 5/7/73)

WAC 296-24-70003 Eye protection. (1) Selection.

(a) Helmets or hand shields shall be used during all arc welding or arc cutting operations, excluding submerged arc welding.

Goggles should also be worn during arc welding or cutting operations to provide protection from injurious rays from adjacent work, and from flying objects. The goggles may have either clear or colored glass, depending upon the amount of exposure to adjacent welding operations. Helpers or attendants shall be provided with proper eye protection.

(b) Goggles or other suitable eye protection shall be used during all gas welding or oxygen cutting operations. Spectacles without side shields, with suitable filter lenses are permitted for use during gas welding operations on light work, for torch brazing or for inspection.

(c) All operators and attendants of resistance welding or resistance brazing equipment shall use transparent face shields or goggles, depending on the particular job, to protect their faces or eyes, as required.

(d) Eye protection in the form of suitable goggles shall be provided where needed for brazing operations not covered in (1)(a), (b) and (c) of this section.

(2) Specifications for protectors.

(a) Helmets and hand shields shall be made of a material which is an insulator for heat and electricity. Helmets, shields and goggles shall be not readily flammable and shall be capable of understanding sterilization.

(b) Helmets and hand shields shall be arranged to protect the face, neck and ears from direct radiant energy from the arc.

(c) Helmets shall be provided with filter plates and cover plates designed for easy removal.

(d) All parts shall be constructed of a material which will not readily corrode or discolor the skin.

(e) Goggles shall be ventilated to prevent fogging of the lenses as much as practicable.

(f) Cover lenses or plates should be provided to protect each helmet, hand shield or goggle filter lens or plate.

(g) All glass for lenses shall be tempered, substantially free from striae, air bubbles, waves and other flaws. Except when a lens is ground to provide proper optical correction for defective vision, the front and rear surfaces of lenses and windows shall be smooth and parallel.

(h) Lenses shall bear some permanent distinctive marking by which the source and shade may be readily identified.

(i) The following is a guide for the selection of the proper shade numbers. These recommendations may be varied to suit the individual's needs.

	Shade No.
(Welding Operation	
Shielded metal arc welding—1/16-, 3/32-, 1/8-, 5/32-inch electrodes	10
Gas shielded arc welding (nonferrous)—1/16-, 3/32-, 1/8-, 5/32-inch electrodes	11
Gas shielded arc welding (ferrous)—1/16-, 3/32-, 1/8-, 5/32-inch electrodes	12
Shielded metal arc welding—3/16-, 7/32-, 1/4-inch electrodes	12

absorbs the yellow or sodium line in the visible light of the operation.

(j) All filter lenses and plates shall meet the test for transmission of radiant energy prescribed in ANSI Z 87.1-1968—American National Standard Practice for Occupational and Educational Eye and Face Protection.

(3) Protection from arc welding rays. Where the work permits, the welder should be enclosed in an individual booth painted with a finish of low-reflectivity such as zinc oxide (an important factor for absorbing ultraviolet radiations) and lamp black; or shall be enclosed with noncombustible screens similarly painted. Booths and screens shall permit circulation of air at floor level. Workers or other persons adjacent to the welding areas shall be protected from the rays by noncombustible or flameproof screens or shields or shall be required to wear appropriate goggles.

AMENDATORY SECTION (Amending Order 91-07, filed 11/22/91, effective 12/24/91)

WAC 296-24-980 Safeguards for personnel protection. (1) Use of protective equipment.

(a) Personal protective equipment.

(i) Employees working in areas where there are potential electrical hazards shall be provided with, and shall use, electrical protective equipment that is appropriate for the specific parts of the body to be protected and for the work to be performed.

Note: Personal protective equipment requirements are contained in chapter 296-24 WAC Part ((A-2)) L, and WAC 296-800-160.

(ii) Protective equipment shall be maintained in a safe, reliable condition and shall be periodically inspected or tested, as required by chapter 296-24 WAC Part ((A-2)) L, and WAC 296-800-160.

(iii) If the insulating capability of protective equipment may be subject to damage during use, the insulating material shall be protected. (For example, an outer covering of leather is sometimes used for the protection of rubber insulating material.)

(iv) Employees shall wear nonconductive head protection wherever there is a danger of head injury from electric shock or burns due to contact with exposed energized parts.

(v) Employees shall wear protective equipment for the eyes or face wherever there is danger of injury to the eyes or face from electric arcs or flashes or from flying objects resulting from electrical explosion.

(b) General protective equipment and tools.

(i) When working near exposed energized conductors or circuit parts, each employee shall use insulated tools or handling equipment if the tools or handling equipment might make contact with such conductors or parts. If the insulating capability of insulated tools or handling equipment is subject to damage, the insulating material shall be protected.

(A) Fuse handling equipment, insulated for the circuit voltage, shall be used to remove or install fuses when the fuse terminals are energized.

(B) Ropes and handlines used near exposed energized parts shall be nonconductive.

Note: In gas welding or oxygen cutting where the torch produces a high yellow light, it is desirable to use a filter or lens that

PERMANENT

(ii) Protective shields, protective barriers, or insulating materials shall be used to protect each employee from shock, burns, or other electrically related injuries while that employee is working near exposed energized parts which might be accidentally contacted or where dangerous electric heating or arcing might occur. When normally enclosed live parts are exposed for maintenance or repair, they shall be guarded to protect unqualified persons from contact with the live parts.

(2) Alerting techniques. The following alerting techniques shall be used to warn and protect employees from hazards which could cause injury due to electric shock, burns, or failure of electric equipment parts:

(a) Safety signs and tags. Safety signs, safety symbols, or accident prevention tags shall be used where necessary to warn employees about electrical hazards which may endanger them, as required by chapter 296-24 WAC Part B-2.

(b) Barricades. Barricades shall be used in conjunction with safety signs where it is necessary to prevent or limit employee access to work areas exposing employees to uninsulated energized conductors or circuit parts. Conductive barricades may not be used where they might cause an electrical contact hazard.

(c) Attendants. If signs and barricades do not provide sufficient warning and protection from electrical hazards, an attendant shall be stationed to warn and protect employees.

(3) Design requirements. Insulating blankets, matting, covers, line hose, gloves, and sleeves made of rubber shall meet the following requirements:

(a) Manufacture and marking.

(i) Blankets, gloves, and sleeves shall be produced by a seamless process.

(ii) Each item shall be clearly marked as follows:

(A) Class 0 equipment shall be marked Class 0.

(B) Class 1 equipment shall be marked Class 1.

(C) Class 2 equipment shall be marked Class 2.

(D) Class 3 equipment shall be marked Class 3.

(E) Class 4 equipment shall be marked Class 4.

(F) Nonozone-resistant equipment other than matting shall be marked Type I.

(G) Ozone-resistant equipment other than matting shall be marked Type II.

(H) Other relevant markings, such as the manufacturer's identification and the size of the equipment, may also be provided.

(iii) Markings shall be nonconducting and shall be applied in such a manner as not to impair the insulating qualities of the equipment.

(iv) Markings on gloves shall be confined to the cuff portion of the glove.

(b) Electrical requirements.

(i) Equipment shall be capable of withstanding the a-c proof-test voltage specified in Table A-2 or the d-c proof-test voltage specified in Table A-3.

(A) The proof-test shall reliably indicate that the equipment can withstand the voltage involved.

(B) The test voltage shall be applied continuously for three minutes for equipment other than matting and shall be applied continuously for one minute for matting.

(C) Gloves shall also be capable of withstanding the a-c proof-test voltage specified in Table A-2 after a sixteen-hour water soak. (See the note following (c)(ii)(B) of this subsection.)

(ii) When the a-c proof-test is used on gloves, the 60 hertz proof-test current may not exceed the values specified in Table A-2 at any time during the test period.

(A) If the a-c proof-test is made at a frequency other than 60 hertz, the permissible proof-test current shall be computed from the direct ratio of the frequencies.

(B) For the test, gloves (right side out) shall be filled with tap water and immersed in water to a depth that is in accordance with Table A-4. Water shall be added to or removed from the glove, as necessary, so that the water level is the same inside and outside the glove.

(C) After the sixteen-hour water soak specified in (b)(i)(C) of this subsection, the 60-hertz proof-test current may exceed the values given in Table A-2 by not more than 2 milliamperes.

(iii) Equipment that has been subjected to a minimum breakdown voltage test may not be used for electrical protection. (See the note following (c)(ii)(B) of this subsection.)

(iv) Material used for Type II insulating equipment shall be capable of withstanding an ozone test, with no visible effects. The ozone test shall reliably indicate that the material will resist ozone exposure in actual use. Any visible signs of ozone deterioration of the material, such as checking, cracking, breaks, or pitting, is evidence of failure to meet the requirements for ozone-resistant material. (See the note following (c)(ii)(B) of this subsection.)

(c) Workmanship and finish.

(i) Equipment shall be free of harmful physical irregularities that can be detected by the tests or inspections required under this section.

(ii) Surface irregularities that may be present on all rubber goods because of imperfections on forms or molds or because of inherent difficulties in the manufacturing process and that may appear as indentations, protuberances, or imbedded foreign material are acceptable under the following conditions:

(A) The indentation or protuberance blends into a smooth slope when the material is stretched.

(B) Foreign material remains in place when the insulating material is folded and stretches with the insulating material surrounding it.

Note: Rubber insulating equipment meeting the following national consensus standards is deemed to be in compliance with subsection (1) of this section:

American Society for Testing and Materials (ASTM) D 120-87, Specification for Rubber Insulating Gloves.

ASTM D 178-93, Specification for Rubber Insulating Matting.

ASTM D 1048-93, Specification for Rubber Insulating Blankets.

ASTM D 1049-93, Specification for Rubber Insulating Covers.

ASTM D 1050-90, Specification for Rubber Insulating Line Hose.

ASTM D 1051-87, Specification for Rubber Insulating Sleeves.

These standards contain specifications for conducting the various tests required in subsection (1) of this section. For example, the a-c and d-c proof-tests, the breakdown test, the

water soak procedure, and the ozone test mentioned in this paragraph are described in detail in the ASTM standards.

(4) In-service care and use.

(a) Electrical protective equipment shall be maintained in a safe, reliable condition.

(b) The following specific requirements apply to insulating blankets, covers, line hose, gloves, and sleeves made of rubber:

(i) Maximum use voltages shall conform to those listed in Table A-5.

(ii) Insulating equipment shall be inspected for damage before each day's use and immediately following any incident that can reasonably be suspected of having caused damage. Insulating gloves shall be given an air test, along with the inspection.

(iii) Insulating equipment with any of the following defects may not be used:

(A) A hole, tear, puncture, or cut;

(B) Ozone cutting or ozone checking (the cutting action produced by ozone on rubber under mechanical stress into a series of interlacing cracks);

(C) An embedded foreign object;

(D) Any of the following texture changes: Swelling, softening, hardening, or becoming sticky or inelastic.

(E) Any other defect that damages the insulating properties.

(iv) Insulating equipment found to have other defects that might affect its insulating properties shall be removed from service and returned for testing under (b)(viii) and (ix) of this subsection.

(v) Insulating equipment shall be cleaned as needed to remove foreign substances.

(vi) Insulating equipment shall be stored in such a location and in such a manner as to protect it from light, temperature extremes, excessive humidity, ozone, and other injurious substances and conditions.

(vii) Protector gloves shall be worn over insulating gloves.

(viii) Electrical protective equipment shall be subjected to periodic electrical tests. Test voltages and the maximum intervals between tests shall be in accordance with Table A-5 and Table A-6.

<u>Table A-2. -A-C Proof-Test Requirements</u>	<u>Proof-test voltage rms</u>	<u>267-mm (10.5-in) glove</u>	<u>356-mm (14-in) glove</u>	<u>406-mm (16-in) glove</u>	<u>457-mm (18-in) glove</u>

<u>2</u>	<u>20,000</u>		<u>16</u>	<u>18</u>	<u>20</u>
<u>3</u>	<u>30,000</u>		<u>18</u>	<u>20</u>	<u>22</u>
<u>4</u>	<u>40,000</u>			<u>22</u>	<u>24</u>

<u>Table A-3. -D-C Proof-Test Requirements</u>	<u>Class of equipment</u>	<u>Proof-test voltage</u>
	<u>0</u>	<u>20,000</u>
	<u>1</u>	<u>40,000</u>
		<u>2</u>
		<u>3</u>
		<u>4</u>
		<u>50,000</u>
		<u>60,000</u>
		<u>70,000</u>

(ix) The test method used under (b)(viii) and (xi) of this subsection shall reliably indicate whether the insulating equipment can withstand the voltages involved.

Note: Standard electrical test methods considered as meeting this requirement are given in the following national consensus standards:
American Society for Testing and Materials (ASTM) D 120-87, Specification for Rubber Insulating Gloves.
ASTM D 1048-93, Specification for Rubber Insulating Blankets.
ASTM D 1049-93, Specification for Rubber Insulating Covers.
ASTM D 1050-90, Specification for Rubber Insulating Line Hose.
ASTM D 1051-87, Specification for Rubber Insulating Sleeves.
ASTM F 478-92, Specification for In-Service Care of Insulating Line Hose and Covers.
ASTM F 479-88a, Specification for In-Service Care of Insulating Blankets.
ASTM F 496-93b, Specification for In-Service Care of Insulating Gloves and Sleeves.

(x) Insulating equipment failing to pass inspections or electrical tests shall not be used by employees, except as follows:

(A) Rubber insulating line hose could be used in shorter lengths with the defective portion cut off.

(B) Rubber insulating blankets could be repaired using a compatible patch that results in physical and electrical properties equal to those of the blanket.

(C) Rubber insulating blankets could be salvaged by severing the defective area from the undamaged portion of the blanket. The resulting undamaged area shall not be smaller than twenty-two inches by twenty-two inches (560 mm by 560 mm) for Class 1, 2, 3, and 4 blankets.

(xi) Repaired insulating equipment shall be retested before it may be used by employees.

(xii) The employer shall certify that equipment has been tested in accordance with the requirements of (b)(viii), (ix), and (xi) of this subsection. The certification shall identify the equipment that passed the test and the date it was tested.

Note: Marking of equipment and entering the results of the tests and the dates of testing onto logs are two acceptable means of meeting this requirement.

PERMANENT

Note: The d-c voltages listed in this table are not appropriate for proof-testing rubber insulating line hose or covers. For this equipment, d-c proof-tests shall use a voltage high enough to indicate that the equipment can be safely used at the voltages listed in Table A-4. See ASTM D 1050-90 and ASTM D 1049-88 for further information on proof-tests for rubber insulating line hose and covers.

Rubber insulating sleeves Before first issue and every 12 months thereafter.¹

¹ If the insulating equipment has been electrically tested but not issued for service, it may not be placed into service unless it has been electrically tested within the previous 12 months.

<u>Table A-4. -Glove Tests-Water Level^{1,2}</u>	<u>mm.</u>	<u>A-C proof-test in.</u>	<u>mm.</u>	<u>D-C proof-test in.</u>
<u>Class of glove</u>				
0	38	1.5	38	1.5
1	38	1.5	51	2.0
2	64	2.5	76	3.0
3	89	3.5	102	4.0
4	127	5.0	153	6.0

- ¹ The water level is given as the clearance from the cuff of the glove to the water line, with a tolerance of 13 mm. (0.5 in.).
- ² If atmospheric conditions make the specified clearances impractical, the clearances may be increased by a maximum of 25 mm. (1 in.).

<u>Table A-5. -Rubber Insulating Equipment Voltage Requirements</u>	<u>Maximum use voltage¹ a-c-rms</u>	<u>Retest voltage² a-c-rms</u>	<u>Retest voltage² d-c-rms</u>
<u>Class of equipment</u>			
0	1,000	5,000	20,000
1	7,500	10,000	40,000
2	17,000	20,000	50,000
3	26,500	30,000	60,000
4	36,000	40,000	70,000

Note: Rubber gloves shall only be used on voltages of 5000 volts phase-to-phase or less.

¹The maximum use voltage is the a-c voltage (rms) classification of the protective equipment that designates the maximum nominal design/voltage of the energized system that may be safely worked. The nominal design voltage is equal to the phase-to-phase voltage on multiphase circuits. However, the phase-to-ground potential is considered to be the nominal design/voltage:

- 1. If there is no multiphase exposure in a system area and if the voltage exposure is limited to the phase-to-ground potential, or
- 2. If the electrical equipment and devices are insulated or isolated or both so that the multiphase exposure on a grounded wye circuit is removed.

²The proof-test voltage shall be applied continuously for at least one minute, but no more than three minutes.

<u>Table A-6. -Rubber Insulating Equipment Test Intervals</u>	<u>Type of equipment</u>	<u>When to test</u>
	<u>Rubber insulating line hose</u>	<u>Upon indication that insulating value is suspect.</u>
	<u>Rubber insulating covers</u>	<u>Upon indication that insulating value is suspect.</u>
	<u>Rubber insulating blankets</u>	<u>Before first issue and every 12 months thereafter.¹</u>
	<u>Rubber insulating gloves</u>	<u>Before first issue and every 6 months thereafter.¹</u>

(5) Where switches or fuses of more than 150 volts to ground are not guarded during ordinary operations, suitable insulating floors, mats or platforms shall be provided on which the operator must stand while handling the switches.

REPEALER

The following sections of the Washington Administrative Code are repealed:

- WAC 296-24-001 Foreword.
- WAC 296-24-006 Equipment approval by non-state agency or organization.
- WAC 296-24-07801 General.
- WAC 296-24-092 Electrical protective equipment.
- WAC 296-24-096 Appendix A to Part A-2—References for further information (nonmandatory).

AMENDATORY SECTION (Amending Order 89-03, filed 5/15/89, effective 6/30/89)

WAC 296-24-567 Employee emergency plans and fire prevention plans. (1) Emergency action plan.

(a) Scope and application. This subdivision applies to all emergency action plans required by a particular WISHA standard. The emergency action plan shall be in writing, and shall cover those designated actions employers and employees must take to ensure employee safety from fire and other emergencies.

(b) Elements. The following elements, at a minimum, shall be included in the plan:

- (i) Emergency escape procedures and emergency escape route assignments;
 - (ii) Procedures to be followed by employees who remain to operate critical plant operations before they evacuate;
 - (iii) Procedures to account for all employees after emergency evacuation has been completed;
 - (iv) Rescue and medical duties for those employees who are to perform them;
 - (v) The preferred means of reporting fires and other emergencies; and
 - (vi) Names or regular job titles of persons or departments who can be contacted for further information or explanation of duties under the plan.
- (c) Alarm systems.
- ~~((i) The employer shall establish an employee alarm system which complies with WAC 296-24-631.~~
- (ii) If the employee alarm system is used for alerting fire brigade members, or for other purposes, a distinctive signal

PERMANENT

~~for each purpose shall be used.)) You must establish an employee alarm system which complies with WAC 296-800-310. The employee alarm system must provide warning for necessary emergency action as called for in your emergency action plan. The employee alarm must be distinctive and recognizable as a signal to perform actions designed under the emergency action plan.~~

(d) Evacuation. The employer shall establish in the emergency action plan the types of evacuation to be used in emergency circumstances.

(e) Training.

(i) Before implementing the emergency action plan, the employer shall designate and train a sufficient number of persons to assist in the safe and orderly emergency evacuation of employees.

(ii) The employer shall review the plan with each employee covered by the plan at the following times:

(A) Initially when the plan is developed;

(B) Whenever the employee's responsibilities or designated actions under the plan change; and

(C) Whenever the plan is changed.

(iii) The employer shall review with each employee upon initial assignment those parts of the plan which the employee must know to protect the employee in the event of an emergency. The written plan shall be kept at the workplace and made available for employee review.

(2) Fire prevention plan.

(a) Scope and application. This subsection applies to all fire prevention plans required by a particular WISHA standard. The fire prevention plan shall be in writing.

(b) Elements. The following elements, at a minimum, shall be included in the fire prevention plan:

(i) A list of the major workplace fire hazards and their proper handling and storage procedures, potential ignition sources (such as welding, smoking and others) and their control procedures, and the type of fire protection equipment or systems which can control a fire involving them;

(ii) Names or regular job titles of those personnel responsible for maintenance of equipment and systems installed to prevent or control ignitions or fires; and

(iii) Names or regular job titles of those personnel responsible for control of fuel source hazards.

(c) Housekeeping. The employer shall control accumulations of flammable and combustible waste materials and residues so that they do not contribute to a fire emergency. The housekeeping procedures shall be included in the written fire prevention plan.

(d) Training.

(i) The employer shall apprise employees of the fire hazards of the materials and processes to which they are exposed.

(ii) The employer shall review with each employee upon initial assignment those parts of the fire prevention plan which the employee must know to protect the employee in the event of an emergency. The written plan shall be kept in the workplace and made available for employee review.

(e) Maintenance. The employer shall regularly and properly maintain, according to established procedures, equipment and systems installed on heat producing equipment to prevent accidental ignition of combustible materials. The

maintenance procedures shall be included in the written fire prevention plan.

AMENDATORY SECTION (Amending Order 81-32, filed 12/24/81)

WAC 296-24-59201 Scope and application. The requirements of this section apply to the ~~((placement, use, maintenance, and testing of portable fire extinguishers provided for the use of employees. WAC 296-24-59207 does not apply to extinguishers provided for employee use on the outside of workplace buildings or structures. Where extinguishers are provided but are not intended for employee use and the employer has an emergency action plan and a fire prevention plan which meet the requirements of WAC 296-24-567, then only the requirements of WAC 296-24-59209 and 296-24-59211 apply))~~ hydrostatic testing of portable fire extinguishers provided for the use of employees.

AMENDATORY SECTION (Amending Order 81-32, filed 12/24/81)

WAC 296-24-61705 Total flooding systems with potential health and safety hazards to employees. (1) The employer shall provide an emergency action plan in accordance with WAC 296-24-567 for each area within a workplace that is protected by a total flooding system which provides agent concentrations exceeding the maximum safe levels.

(2) Systems installed in areas where employees cannot enter during or after the system's operation are exempt from the requirements of this section.

(3) On all total flooding systems the employer ~~((shall))~~ must provide a predischage employee alarm which ~~((complies with WAC 296-24-631, and is capable of being perceived above ambient light or noise levels before the system discharges, which))~~ will give employees time to safely exit from the discharge area prior to system discharge.

Your predischage employee alarm systems must:

- Provide enough warning to allow employees to safely escape from the workplace or the immediate work area or both;

- Be capable of being perceived above ambient noise or light levels by all employees in the affected portions of the workplace before system discharge;

- Be distinctive and recognizable as a signal to evacuate the work area;

- Be kept in operating condition except when undergoing repairs or maintenance.

You must explain to each employee how to report emergencies in your workplace. Methods of reporting emergencies include manual pull box alarms, public address systems, radio, or telephones. Post emergency telephone numbers near telephones, or employee notice boards, or other conspicuous locations if you use telephones to report emergencies.

If you use a communication system that also serves as an employee alarm system, all emergency messages must have priority over all nonemergency messages.

(4) The employer shall provide automatic actuation of total flooding systems by means of an approved fire detection

PERMANENT

device installed and interconnected with a predischarge employee alarm system to give employees time to safely exit from the discharge area prior to system discharge.

AMENDATORY SECTION (Amending Order 81-32, filed 12/24/81)

WAC 296-24-62203 Specific requirements. (1) The employer shall assure that dry chemical agents are compatible with any foams or wetting agents with which they are used.

(2) The employer may not mix together dry chemical extinguishing agents of different compositions. The employer shall assure that dry chemical systems are refilled with the chemical stated on the approval nameplate or an equivalent compatible material.

(3) When dry chemical discharge may obscure vision, the employer ~~((shall))~~ must provide a predischarge employee alarm ~~((which complies with WAC 296-24-631, and))~~ which will give employees time to safely exit from the discharge area prior to system discharge.

Your predischarge employee alarm systems must:

• Provide enough warning to allow employees to safely escape from the workplace or the immediate work area or both.

• Be capable of being perceived above ambient noise or light levels by all employees in the affected portions of the workplace before system discharge.

• Be distinctive and recognizable as a signal to evacuate the work area.

• Be kept in operating condition except when undergoing repairs or maintenance.

You must explain to each employee how to report emergencies in your workplace. Methods of reporting emergencies include manual pull box alarms, public address systems, radio, or telephones. Post emergency telephone numbers near telephones, or employee notice boards, or other conspicuous locations if you use telephones to report emergencies.

If you use a communication system that also serves as an employee alarm system, all emergency messages must have priority over all nonemergency messages.

(4) The employer shall sample the dry chemical supply of all but stored pressure systems at least annually to assure that the dry chemical supply is free of moisture which may cause the supply to cake or form lumps.

(5) The employer shall assure that the rate of application of dry chemicals is such that the designed concentration of the system will be reached within thirty seconds of initial discharge.

AMENDATORY SECTION (Amending Order 76-38, filed 12/30/76)

WAC 296-32-200 Scope and application. (1) This chapter sets forth safety and health standards that apply to the work conditions, practices, means, methods, operations, installations and processes performed at telecommunications centers and at telecommunications field installations, which are located outdoors or in building spaces used for such field installations. "Center" work includes the installation, opera-

tion, maintenance, rearrangement, and removal of communications equipment and other associated equipment in telecommunications switching centers. "Field" work includes the installation, operation, maintenance, rearrangement, and removal of conductors and other equipment used for signal or communication service, and of their supporting or containing structures, overhead or underground, on public or private rights of way, including buildings or other structures.

(2) These standards do not apply:

(a) To construction work, as defined in chapter 296-155 WAC, nor

(b) To installations under the exclusive control of electric utilities used for the purpose of communications or metering, or for generation, control, transformation, transmission, and distribution of electric energy, which are located in buildings used exclusively by the electric utilities for such purposes, or located outdoors on property owned or leased by the electric utilities or on public highways, streets, roads, etc., or outdoors by established rights on private property.

(3) Operations or conditions not specifically covered by this chapter are subject to all the applicable standards contained in chapter 296-24 WAC, general safety and health standards, and chapter 296-800 WAC, the safety and health core rules. Operations which involve construction work, as defined in chapter 296-155 WAC are subject to all the applicable standards contained in chapter 296-155 WAC, safety standards for construction work.

(4) This standard shall augment the Washington state general safety and health standards, general occupational health standards, electrical workers safety rules, and any other standards which are applicable to all industries governed by chapter 80, Laws of 1973, Washington Industrial Safety and Health Act. In the event of any conflict between any portion of this chapter and any portion of any of the general application standards, the provisions of this chapter 296-32 WAC, shall apply.

(5) In exceptional cases where compliance with specific provisions of this chapter can only be accomplished to the serious detriment and disadvantage of an operation, variance from the requirement may be permitted by the director of the department of labor and industries after receipt of application for variance which meets the requirements of WAC ~~((296-24-010, general safety and health standards))~~ 296-350-700.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-32-220 General. (1) Buildings containing telecommunications centers.

(a) Illumination. Lighting in telecommunication centers shall be provided in an amount such that continuing work operations, routine observations, and the passage of employees can be carried out in a safe and healthful manner.

(b) Specific tasks in centers, such as splicing cable and the maintenance and repair of equipment frame lineups, the employer shall install permanent lighting or portable supplemental lighting to attain a higher level of illumination.

(c) Refer to WAC ~~((296-62-09003 (general occupational health standards))~~) 296-800-210 which shall apply as minimum standards of illumination for industrial interiors.

(d) Illumination of field work. Whenever natural light is insufficient to illuminate the worksite, artificial illumination shall be provided to enable the employee to perform the work safely.

(2) Working surfaces.

(a) Working surfaces shall be in conformance with the latest edition of the general safety and health standard WAC 296-24-735 through 296-24-76523, and chapter 296-800 WAC, the safety and health core rule book.

(b) Guard rails and toe boards may be omitted on distribution frame mezzanine platforms to permit access to equipment. This exemption applies only on the side or sides of the platform facing the frames and only on those portions of the platform adjacent to equipped frames.

(3) Working spaces.

(a) Space shall be provided for access to all medium high and high voltage equipment.

(b) Every structure, new or old, designed for human occupancy shall be provided with exits to permit the prompt escape of occupants in case of fire or other emergency. The means of egress shall be a continuous and unobstructed way of exit travel from any point in a building or structure to a public way and consist of three separate and distinct parts; the way of exit access, the exit and the way of exit discharge. A means of egress comprises the vertical and horizontal ways of travel and shall include intervening room spaces, doorways, hallways, corridors, passageways, balconies, ramps, stairs, enclosures, lobbies, escalators, horizontal exits, courts and yards.

(c) "Maintenance aisles," or "wiring aisles," between equipment frame lineups are working spaces and are not a means of egress for purposes of WAC 296-24-550 and 296-800-310.

(4) Special doors.

(a) When blastproof or power actuated doors are installed in specially designed hardsite security buildings and spaces, they shall be designed and installed so that they can be used as a means of egress in emergencies.

(b) When high voltage apparatus is isolated in a supplementary enclosure, interlocks shall be provided on all access doors. Warning signs shall be provided, which are visible both when the guard or cover is in place or removed.

(5) Equipment, machinery and machine guarding.

(a) When power plant machinery in telecommunications centers is operated with commutators and couplings uncovered, the adjacent housing shall be clearly marked to alert personnel to the rotating machinery.

(b) All power switches on power panels shall be in an open position when they are not controlling an operating circuit. Before opening any power circuit, the load shall be reduced. "Men working" signs, or similar wording shall be placed on switches associated with motors or generators under repair.

(c) When working on the brushes of a machine in operation, employees shall use care not to break a circuit. When it is necessary to remove a brush from the holder, the machine shall be shut down.

(d) Only fuse pullers specifically designed for that purpose shall be used when replacing cartridge type fuses.

(6) Battery handling.

(a) Eye protection devices which provide side as well as frontal eye protection for employees shall be provided when measuring storage battery specific gravity or handling electrolyte, and the employer shall ensure that such devices are used by the employees.

(b) The employer shall also ensure that acid resistant gloves and aprons shall be worn for protection against spattering.

(c) Facilities for quick drenching or flushing of the eyes and body shall be provided unless the storage batteries are of the enclosed type and equipped with explosion proof vents, in which case sealed water rinse or neutralizing packs may be substituted for the quick drenching or flushing facilities.

(d) Employees assigned to work with storage batteries shall be instructed in emergency procedures such as dealing with accidental acid spills.

(e) Electrolyte (acid or base, and distilled water) for battery cells shall be mixed in a well ventilated room. Acid or base shall be poured gradually, while stirring, into the water. Water shall never be poured into concentrated (greater than 75 percent) acid solutions. Electrolyte shall never be placed in metal containers nor stirred with metal objects.

(f) When taking specific gravity readings, the open end of the hydrometer shall be covered with an acid resistant material while moving it from cell to cell to avoid splashing or throwing the electrolyte.

(g) Ventilation, shall be provided to ensure diffusion of the gasses from the battery to prevent the accumulation of an explosive type mixture.

(h) Racks and trays shall be substantial and treated to be resistant to the electrolyte.

(i) Floors shall be of acid resistant construction or be protected from acid accumulation.

(7) Hazardous materials.

(a) Highway mobile vehicles and trailers stored in garages in accordance with WAC 296-24-47513 (4)(b) may be equipped to carry more than one LP-gas container, but the total capacity of LP-gas containers per work vehicle stored in garages shall not exceed 100 pounds of LP-gas.

(b) All container valves shall be closed when not in use.

(8) Compressed gas.

(a) When using or transporting nitrogen cylinders, special compartments, racks, or blocking shall be provided to prevent cylinder movement.

(b) Regulators shall be removed or guarded before a cylinder is transported.

(9) Support structures.

(a) No employee, or any material or equipment, shall be supported or permitted to be supported on any portion of a pole structure, platform, ladder, walkway or other elevated structure or aerial device unless the employer ensures that the support structure is first inspected by a competent person and it is determined to be strong, in good working condition and properly secured in place.

(b) Workers shall not throw anything from pole to ground, from pole to pole or from ground to pole.

(10) Power exposures.

(a) The employer shall ensure that no employee approaches or takes any conductive object closer to any elec-

trically energized overhead power lines and parts than prescribed in Table 1 unless:

(i) The employee is insulated or guarded from the energized parts (insulating gloves rated for the voltage involved shall be considered adequate insulation), or

(ii) The energized parts are insulated or guarded from the employee and any other conductive object at a different potential, or

(iii) The power conductors and equipment are deenergized and grounded.

(b) While handling communication wires, metal sheaths, or communication equipment, contact shall be avoided with street lamp brackets, trolley span wires, power guys, transformer cases and any other power equipment that may be energized. The safest possible working position shall be assumed before starting work.

(c) Communication employees shall never work in the pole space on jointly used poles between normal primary and secondary attachments.

(d) Where a hazard of a power contact exists, due to use of long handled tools, proper rubber equipment shall be used.

TABLE 1

APPROACH DISTANCES TO EXPOSED ENERGIZED OVERHEAD POWER LINES AND PARTS

Voltage Range (phase to phase, RMS)	Approach Distance (inches)
300 V and less	(1)
Over 300 V, not over 750 V	12
Over 750 V not over 2 kV	18
Over 2 kV, not over 15 kV	24
Over 15 kV, not over 37 kV	36
Over 37 kV, not over 87.5 kV	42
Over 87.5 kV, not over 121 kV	48
Over 121 kV, not over 140 kV	54

(1) Avoid contact.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-32-230 Training. (1) Employers shall provide training in the various precautions and safe practices described in this section and shall insure that employees do not engage in the activities to which this chapter applies until such employees have received proper training in the various precautions and safe practices required by this section. However, where the employer can demonstrate that an employee is already trained in the precautions and safe practices required by this section prior to their employment, training need not be provided to that employee in accordance with this section.

(2) Where training is required, it shall consist of on-the-job training or classroom-type training or a combination of both.

(3) The training program shall include a list of the subject courses and the types of personnel required to receive such instruction. A written description of the training program and a record of employees who have received such

training shall be maintained for the duration of the employee's employment and shall be made available upon request to the director of the department of labor and industries, or his/her authorized representative.

(4) Such training shall, where appropriate, include the following subjects:

(a) Recognition and avoidance of dangers relating to encounters with harmful substances, and animal, insect, or plant life.

(b) Procedures to be followed in emergency situations, and

(c) First aid training, including instruction in artificial respiration.

(5) It shall be the responsibility of the employer to hold monthly safety meetings at practical points throughout the operation and insist upon employees attending said meetings. Minutes shall be kept of each safety meeting and retained for a period of one year.

(6) It shall be the responsibility of management to develop and maintain a chemical hazard communication program as required by (~~chapter 296-62 WAC, Part C~~) WAC 296-800-170, which will provide information to all employees relative to hazardous chemicals or substances to which they are exposed, or may become exposed, in the course of their employment.

AMENDATORY SECTION (Amending Order 94-16, filed 9/30/94, effective 11/20/94)

WAC 296-32-250 Tools and personal protective equipment—General. (1) Personal protective equipment, protective devices and special tools needed for the work of employees shall be provided and the employer shall ensure that they are used by employees.

(a) Before each day's use the employer shall ensure that these personal protective devices, tools, and equipment are carefully inspected by a competent person to ascertain that they are in good condition.

(b) Tools found to be defective shall be taken out of service.

(2) Head protection. Class B protective helmets shall be provided whenever there is exposure to overhead hazards and/or possible high voltage electrical contact.

(a) Employees working in areas where there is a possible danger of head injury from impact, falling or flying objects, shall be protected by protective helmets.

(b) Criteria for protective helmets.

(i) Protective helmets purchased after February 20, 1995, shall comply with ANSI Z89.1-1986, "American National Standard for Personnel Protection—Protective Headwear for Industrial Workers—Requirements," which is incorporated by reference, or shall be demonstrated to be equally effective.

(ii) Protective helmets purchased before February 20, 1995, shall comply with the ANSI standard "American National Standard Safety Requirements for Industrial Head Protection," ANSI Z89.1-1969, or shall be demonstrated by the employer to be equally effective.

(3) Eye protection. Protective eye and face equipment shall be required where there is a possibility of injury that can be prevented by such equipment. In such cases, employers

PERMANENT

shall make conveniently available a type of protector suitable for the work to be performed, and employees shall use such protectors.

Note: See ((chapter 296-24 WAC, Part A-2;)) WAC 296-800-160 for additional personal protective equipment requirements.

(4) Tent heaters, torches and open flame. Open flames shall not be used within ground tents or on platforms within aerial tents unless:

(a) The tent covers are constructed of fire resistant materials, and

(b) Ventilation is provided to maintain safe oxygen levels and avoid harmful buildup of combustion products and combustible gases.

(5) Portable power equipment.

(a) All portable power equipment used in the telecommunications industry shall be grounded.

(b) Nominal 120V, or less, portable generators used for providing power at work locations do not require grounding if the output circuit is completely isolated from the frame of the unit.

(c) Grounding shall be omitted when using soldering irons, guns or wire-wrap tools on telecommunication circuits.

(6) Vehicle-mounted utility generators. Vehicle-mounted utility generators used for providing nominal 240V AC or less for powering portable tools and equipment need not be grounded to earth if all of the following conditions are met:

(a) One side of the voltage source is solidly strapped to the metallic structure of the vehicle;

(b) Grounding-type outlets are used, with a "grounding" conductor between the outlet grounding terminal and the side of the voltage source that is strapped to the vehicle;

(c) All metallic encased tools and equipment that are powered from this system are equipped with three-wire cords and grounding-type attachment plugs, except as designated in subsection (7) of this section.

(7) Portable lights, tools and appliances. When operated from commercial power such metal parts of these devices shall be grounded, unless these tools or appliances are protected by a system of double insulation, or its equivalent. Where such a system is employed, the equipment shall be distinctively marked to indicate double insulation.

(8) Lead work. When operated from commercial power the metal housing of electric solder pots shall be grounded. Electric solder pots may be used with the power equipment described in this subsection, without a grounding conductor.

The employer shall ensure that wiping gloves or cloths and eye protection are used in lead wiping operations. A drip pan to catch hot lead drippings shall also be provided and used.

(9) Fire extinguishers.

(a) Fire extinguishers shall be provided for the protection of both the building structure and the occupancy hazards contained therein.

(b) Employees shall be familiar with the location and operation of fire extinguishers.

(c) Any fire extinguishers showing defects shall be removed from service.

(d) Fire extinguishers shall be thoroughly examined and/or recharged or repaired to insure operability and safety once every year.

(e) Each fire extinguisher shall have a durable tag securely attached to show the maintenance or recharge date and the initials or signature of the person performing this service.

AMENDATORY SECTION (Amending WSR 99-17-094, filed 8/17/99, effective 12/1/99)

WAC 296-32-260 Rubber insulating equipment. (1)

Rubber insulating equipment designed for the voltage levels to be encountered shall be provided and the employer shall ensure that they are used by employees as required by this section. The requirements of WAC ((296-24-092)) 296-24-980, Electrical protective equipment, shall be followed except for Table A-6.

(2) The employer is responsible for periodic retesting of all insulating gloves, blankets, and other rubber insulating equipment. This retesting shall be electrical, visual and mechanical. The following maximum retesting intervals shall apply:

Gloves, Blankets, and Other Insulating Equipment	Natural Rubber (Months)	Synthetic Rubber (Months)
New _____	12	18
Reissued _____	9	15

(3) Protector for gloves. Approved protectors must be worn at all times over rubber gloves. Inner liners may be worn if desired.

(4) Gloves and blankets shall be marked to indicate compliance with the retest schedule and shall be marked with the date the next test date is due.

Any rubber gloves found to be defective shall be removed from service and marked as being defective.

(5) Patching rubber goods is prohibited; rubber protective equipment shall not be vulcanized or patched.

(6) Rubber gloves for workers. A pair of rubber gloves, specifically designed for the protection of workers, shall be assigned each worker when required to work on or be exposed to energized parts.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-37-510 Scope and application. (1) The requirements included in this vertical chapter shall apply throughout the state wherever diving takes place within the jurisdiction of the department of labor and industries. These requirements shall also be applicable to those diving related and supportive work activities not at the diving site but which have a direct effect on the safety of the diving operations. Examples may include but are not limited to: The supply of breathing air or gas; the supply of materials, equipment or supplies required by this chapter; the maintenance of diving equipment.

PERMANENT

(2) This standard applies to diving and related support operations conducted in connection with all types of work and employments, including general industry, construction, ship repairing, shipbuilding, shipbreaking and longshoring. However, this standard does not apply to any diving operation:

(a) Performed solely for instructional purposes, using open-circuit, compressed-air SCUBA and conducted within the no-decompression limits;

(b) Performed solely for search, rescue, or related public safety purposes by or under the control of a governmental agency; or

(c) Governed by 45 CFR Part 46 (Protection of Human Subjects, United States Department of Health and Human Services) or equivalent rules or regulations established by another federal agency, which regulate research, development, or related purposes involving human subjects.

(d) Defined as scientific diving and which is under the direction and control of a diving program containing at least the following elements:

(i) Diving safety manual which includes at a minimum: Procedures covering all diving operations specific to the program; procedures for emergency care, including recompression and evacuation; and criteria for diver training and certification.

(ii) Diving control (safety) board, with the majority of its members being active divers, which shall at a minimum have the authority to: Approve and monitor diving projects; review and revise the diving safety manual; assure compliance with the manual; certify the depths to which a diver has been trained; take disciplinary action for unsafe practices; and, assure adherence to the buddy system (a diver is accompanied by and is in continuous contact with another diver in the water) for SCUBA diving.

(3) This chapter shall augment the requirements of the general safety and health standard, chapter 296-24 WAC (~~and~~), the general occupational health standard, chapter 296-62 WAC, and safety and health core rules, chapter 296-800 WAC. In instances where this chapter is in direct conflict with the requirements of any general horizontal standard, the requirements of this chapter shall apply.

(4) Hoisting gear used in diving operations shall be inspected and certified as required by chapter 296-56 WAC, safety standards for longshore, stevedore and related waterfront operations.

(5) Application in emergencies. An employer may deviate from the requirements of this standard to the extent necessary to prevent or minimize a situation which is likely to cause death, serious physical harm, or major environmental damage, provided that the employer:

(a) Notifies the assistant director of the department of labor and industries in Olympia or the regional administrator for the region within 48 hours of the onset of the emergency situation indicating the nature of the emergency and extent of the deviation from the prescribed regulations; and

(b) Upon request from the authority notified, submits such information in writing.

(6) Employer obligation. The employer shall be responsible for compliance with:

(a) All provisions of this standard of general applicability; and

(b) All requirements pertaining to specific diving modes to the extent diving operations in such modes are conducted.

AMENDATORY SECTION (Amending Order 94-07, filed 7/20/94, effective 9/20/94)

WAC 296-37-575 Recordkeeping requirements. (1)

Recording and reporting.

(a) The employer shall comply with the requirements of chapters 296-27 (~~and~~), 296-350, and 296-800 WAC.

(b) The employer shall record the occurrence of any diving-related injury or illness which requires any dive team member to be hospitalized for 24 hours or more, specifying the circumstances of the incident and the extent of any injuries or illnesses.

(2) Availability of records.

(a) Upon the request of the director of the department of labor and industries or his duly authorized designees, the employer shall make available for inspection and copying any record or document required by this standard.

(b) Records and documents required by this standard shall be provided upon request to employees, designated representatives, and the assistant director in accordance with WAC 296-62-05201 through 296-62-05209 and 296-62-05213 through 296-62-05217. Safe practices manuals (WAC 296-37-530), depth-time profiles (WAC 296-37-540), recording of dives (WAC 296-37-545), decompression procedure assessment evaluations (WAC 296-37-545), and records of hospitalizations (WAC 296-37-575) shall be provided in the same manner as employee exposure records or analyses using exposure or medical records. Equipment inspections and testing records which pertain to employees (WAC 296-37-570) shall also be provided upon request to employees and their designated representatives.

(c) Records and documents required by this standard shall be retained by the employer for the following period:

(i) Dive team member medical records (physician's reports) (WAC 296-37-525) - five years;

(ii) Safe practices manual (WAC 296-37-530) - current document only;

(iii) Depth-time profile (WAC 296-37-540) - until completion of the recording of dive, or until completion of decompression procedure assessment where there has been an incident of decompression sickness;

(iv) Recording dive (WAC 296-37-545) one year, except five years where there has been an incident of decompression sickness;

(v) Decompression procedure assessment evaluations (WAC 296-37-545) - five years;

(vi) Equipment inspections and testing records (WAC 296-37-570) - current entry or tag, or until equipment is withdrawn from service;

(vii) Records of hospitalizations (WAC 296-37-575) - five years.

(d) After the expiration of the retention period of any record required to be kept for five years, the employer shall forward such records to the National Institute for Occupational Safety and Health, Department of Health and Human

Services. The employer shall also comply with any additional requirements set forth in WAC 296-62-05215.

(e) In the event the employer ceases to do business:

(i) The successor employer shall receive and retain all dive and employee medical records required by this standard; or

(ii) If there is no successor employer, dive and employee medical records shall be forwarded to the National Institute for Occupational Safety and Health, Department of Health and Human Services.

AMENDATORY SECTION (Amending WSR 99-09-080, filed 4/20/99, effective 8/1/99)

WAC 296-45-015 Scope and application. (1) This chapter covers the operation and maintenance of electric power generation, control, transformation, transmission, and distribution lines and equipment. These provisions apply to:

(a) Power generation, transmission, and distribution installations, including related equipment for the purpose of communication or metering, which are accessible only to qualified employees;

Note: The types of installations covered by this chapter include the generation, transmission, and distribution installations of electric utilities, as well as equivalent installations of industrial establishments. Trolley maintenance, jumpering, and bypass is also covered by this chapter. Supplementary electric generating equipment that is used to supply a workplace for emergency, standby, or similar purposes only is covered under Part L of chapter 296-24 WAC and WAC 296-800-280.

(b) Other installations at an electric power generating station, as follows:

(i) Fuel and ash handling and processing installations, such as coal conveyors;

(ii) Water and steam installations, such as penstocks, pipelines, and tanks, providing a source of energy for electric generators; and

(iii) Chlorine and hydrogen systems.

(c) Test sites where electrical testing involving temporary measurements associated with electric power generation, transmission, and distribution is performed in laboratories, in the field, in substations, and on lines, as opposed to metering, relaying, and routine line work;

(d) Work on or directly associated with the installations covered in subsections (1)(a) through (c) of this section; and

(e) Line-clearance tree-trimming operations, as follows:

(i) This chapter except WAC 296-45-455, applies to line-clearance tree-trimming operations performed by qualified employees (those who are knowledgeable in the construction and operation of electric power generation, transmission, or distribution equipment involved, along with the associated hazards).

(ii) WAC 296-45-065, 296-45-125, 296-45-135, 296-45-255, 296-45-315, 296-45-375, and 296-45-455 through 296-45-45530 apply to line-clearance tree-trimming operations performed by line-clearance tree trimmers who are not qualified employees.

(2) Notwithstanding subsection (1) of this section, this chapter does not apply to electrical installations, electrical

safety-related work practices, or electrical maintenance considerations covered by Part L of chapter 296-24 WAC and WAC 296-800-280.

Note 1: Work practices conforming to WAC 296-24-970 through 296-24-985 are considered as complying with the electrical safety-related work practice requirements of this chapter, provided the work is being performed on a generation or distribution installation meeting WAC 296-24-95601 through 296-24-95699. This chapter also applies to work by qualified persons directly on or associated with installations of electric power generation, transmission, and distribution lines or equipment, regardless of compliance with WAC 296-24-970 through 296-24-985.

Note 2: Work practices performed by qualified persons and conforming to this chapter are considered as complying with WAC 296-24-95601 through 296-24-95699.

(3) This section applies in addition to all other applicable safety and health standards administered by the department. Specific references in this section to other standards are provided for emphasis only.

(4) Operation, conditions, work methods and other work related situations or activities not specifically covered by this chapter are subject to the rules and regulations of chapter 296-24 WAC, General safety and health standards; chapter 296-62 WAC, General occupational health standards; chapter 296-155 WAC, Safety standards for construction work; chapter 296-800 WAC, Safety and health core rules; and, insofar as applicable to employee safety and health, chapter 19.29 RCW. Additionally, operations, conditions, work methods and other work related situations or activities may be subject to additional rules and regulations depending upon the nature of the work being performed.

(5) These rules shall not apply to the use of existing electrical installations during their lifetime, provided they are maintained in good condition and in accordance with the applicable safety factor requirements and the rules in effect at the time they were installed, and provided that reconstruction shall conform to the rules as herein provided.

(6) Any rule, regulation or standard contained within this chapter, if subject to interpretation, shall be interpreted so as to achieve employee safety, which is the ultimate purpose of this chapter.

(7) Should a rule or standard contained within this chapter conflict, in any manner, with a standard or rule contained within any other chapter of Title 296 WAC the standard or rule contained herein shall apply so long as the work being done is power generation, transmission, and distribution installations, including related equipment for the purpose of communication or metering, which are accessible only to qualified employees. If there are rules within this chapter that conflict, the rule that provides the greatest employee safety will apply.

(8) Neither the promulgation of these rules, nor anything contained in these rules shall be construed as affecting the relative status or civil rights or liabilities between employers and their employees and/or the employees of others and/or the public generally; nor shall the use herein of the words "duty" and "responsibility" or either, import or imply liability other than provided for in the industrial insurance and safety laws of the state of Washington, to any person for injuries due to negligence predicated upon failure to perform or discharge

any such "duty" or "responsibility," but failure on the part of the employees, leadworker, or employer to comply with any compulsory rule may be cause for the department of labor and industries to take action in accordance with the industrial insurance and safety laws.

(9) "Shall" and "must" as used in this chapter make the provisions mandatory. "Should," "may," or "it is recommended" are used to indicate the provisions are not mandatory but are recommended.

(10) If any section, subsection, phrase, or provisions of this chapter or part thereof should be held invalid by any court for any reason, such invalidity shall not in any way affect the validity of the remainder of this chapter, unless such decision renders the remainder of the provision unintelligible, or changes the meaning of such other provision or provisions.

(11) When the language used in this chapter indicates that it is the responsibility, duty, or obligation of the leadworker or other employee, it shall also be the employer's responsibility, obligation, and duty.

Whenever this chapter refers to the provisions of another safety and health standard or statute affecting safety and health, such reference refers to the statute or code in effect at the time the work is being performed.

AMENDATORY SECTION (Amending WSR 98-07-009, filed 3/6/98, effective 5/6/98)

WAC 296-45-035 Definitions. These definitions apply to chapter 296-45 WAC.

"Aerial manlift equipment" - Equipment such as extended towers, boom-mounted cages or baskets, and truck-mounted ladders, that is primarily designed to place personnel and equipment aloft to work on elevated structures and equipment.

"Affected employee" - An employee whose job requires him or her to operate or use a machine or equipment on which servicing or maintenance is being performed under lockout or tagout, or whose job requires him or her to work in an area in which such servicing or maintenance is being performed.

"Apprentice" - An employee who is being trained to be journey level.

"Approved" - Meets or exceeds the recognized standards of safety within the industry.

"Approved protectors" - Gloves worn over rubber insulating gloves which are of such material or substance and so constructed as to protect the rubber gloves from abrasions, lacerations, or other physical damage which might otherwise occur to rubber gloves. Approved protectors must conform to the standards which are recognized by the industry.

"Attendant" - An employee assigned to remain immediately outside the entrance to an enclosed or other space to render assistance as needed to employees inside the space.

"Authorized employee" - An employee who locks out or tags out machines or equipment in order to perform servicing or maintenance on that machine or equipment. An affected employee becomes an authorized employee when

that employee's duties include performing servicing or maintenance covered under this section.

"Automatic circuit recloser" - A self-controlled device for interrupting and reclosing an alternating current circuit with a predetermined sequence of opening and reclosing followed by resetting, hold-closed, or lockout operation.

"Barricade" - A physical obstruction such as tapes, cones, or A-frame type wood or metal structures intended to provide a warning about and to limit access to a hazardous area.

"Barrier" - A physical obstruction which is intended to prevent contact with energized lines or equipment or to prevent unauthorized access to a work area.

"Bond" - The electrical interconnection of conductive parts designed to maintain a common electrical potential.

"Bus" - A conductor or a group of conductors that serve as a common connection for two or more circuits.

"Bushing" - An insulating structure, including a through conductor or providing a passageway for such a conductor, with provision for mounting on a barrier, conducting or otherwise, for the purposes of insulating the conductor from the barrier and conducting current from one side of the barrier to the other.

"Cable" - A conductor with insulation, or a stranded conductor with or without insulation and other coverings (single-conductor cable), or a combination of conductors insulated from one another (multiple-conductor cable).

"Cable sheath" - A conductive protective covering applied to cables.

Note: A cable sheath may consist of multiple layers of which one or more is conductive.

"Circuit" - A conductor or system of conductors through which an electric current is intended to flow.

"Clearance" (between objects) - The clear distance between two objects measured surface to surface.

"Clearance" (for work) - Authorization to perform specified work or permission to enter a restricted area.

"Communication lines." (See "Lines, communication.")

"Conductor" - A material, usually in the form of a wire, cable, or bus bar, used for carrying an electric current.

"Covered conductor" - A conductor covered with a dielectric having no rated insulating strength or having a rated insulating strength less than the voltage of the circuit in which the conductor is used.

"Current-carrying part" - A conducting part intended to be connected in an electric circuit to a source of voltage. Noncurrent-carrying parts are those not intended to be so connected.

"De-energized" - Free from any electrical connection to a source of potential difference and from electric charge; not having a potential difference from that of the earth.

Note: The term is used only with reference to current-carrying parts, which are sometimes energized (alive).

"Designated employee/person" - An employee/person who is designated by the employer to perform specific duties

under the terms of this section and who is knowledgeable in the construction and operation of the equipment and the hazards involved.

"Electric line truck" - Any vehicle used to transport employees, tools, and material, which serves as a traveling workshop for electric power line construction and maintenance work. It may be equipped with a boom and auxiliary equipment for setting poles, digging holes, and elevating material and/or workers.

"Electric supply equipment" - Equipment that produces, modifies, regulates, controls, or safeguards a supply of electric energy.

"Electric supply lines." (See "Lines, electric supply.")

"Electric utility" - An organization responsible for the installation, operation, or maintenance of an electric supply system.

"Emergency" - An unforeseen occurrence endangering life, limb, or property.

"Enclosed" - Surrounded by a case, cage, fence or otherwise which will protect the contained equipment and prevent accidental contact of a person with live parts.

"Enclosed space" - A working space, such as a man-hole, vault, tunnel, or shaft, that has a limited means of egress or entry, that is designed for periodic employee entry under normal operating conditions, and that under normal conditions does not contain a hazardous atmosphere, but that may contain a hazardous atmosphere under abnormal conditions.

Note: Spaces that are enclosed but not designed for employee entry under normal operating conditions are not considered to be enclosed spaces for the purposes of this section. Similarly, spaces that are enclosed and that are expected to contain a hazardous atmosphere are not considered to be enclosed spaces for the purposes of this section. Such spaces meet the definition of permit spaces in WAC 296-62-145, and entry into them must be performed in accordance with that standard.

"Energized" (alive, live) - Electrically connected to a source of potential difference, or electrically charged so as to have a potential significantly different from that of earth in the vicinity.

"Energy isolating device" - A physical device that prevents the transmission or release of energy, including, but not limited to, the following: A manually operated electric circuit breaker, a disconnect switch, a manually operated switch, a slide gate, a slip blind, a line valve, blocks, and any similar device with a visible indication of the position of the device. (Push buttons, selector switches, and other control-circuit-type devices are not energy isolating devices.)

"Energy source" - Any electrical, mechanical, hydraulic, pneumatic, chemical, nuclear, thermal, or other energy source that could cause injury to personnel.

"Equipment" (electric) - A general term including material, fittings, devices, appliances, fixtures, apparatus, and the like used as part of or in connection with an electrical installation.

"Exposed" - Not isolated or guarded.

"Fault current" - The current that flows in an electrical system because of a defect in the circuit induced accidentally or otherwise.

"Fixed ladder" - A ladder that is permanently secured to a structure.

"Ground" - A conducting connection, whether intentional or accidental, between an electric circuit or equipment and the earth, or to some conducting body that serves in place of the earth.

"Grounded" - Connected to earth or to some conducting body that serves in place of the earth.

"Grounded system" - A system of conductors in which at least one conductor or point (usually the middle wire, or neutral point of transformer or generator windings) is intentionally grounded either solidly or through a current-limiting device (not a current-interrupting device).

"Groundperson" - A member of crew working on ground under direction of a leadworker.

"Guarded" - Covered, fenced, enclosed, or otherwise protected, by means of suitable covers or casings, barrier rails or screens, mats, or platforms, designed to prevent the possibility, under normal conditions, of dangerous approach or accidental contact by persons or objects.

Note: Wires which are insulated, but not otherwise protected, are not considered as guarded.

"Hazardous atmosphere" - An atmosphere that may expose employees to the risk of death, incapacitation, impairment of ability to self-rescue (that is, escape unaided from an enclosed space), injury, or acute illness from one or more of the following causes:

- Flammable gas, vapor, or mist in excess of 10 percent of its lower flammable limit (LFL);
- Airborne combustible dust at a concentration that meets or exceeds its LFL;

Note: This concentration may be approximated as a condition in which the dust obscures vision at a distance of 5 feet (1.52 m) or less;

- Atmospheric oxygen concentration below 19.5 percent or above 23.5 percent;

- Atmospheric concentration of any substance for which a dose or a permissible exposure limit is published in chapter 296-62 WAC, Part L, or in chapter 296-62 WAC, toxic and hazardous substances, and which could result in employee exposure in excess of its dose or permissible exposure limit;

Note: An atmospheric concentration of any substance that is not capable of causing death, incapacitation, impairment of ability to self-rescue, injury, or acute illness due to its health effects is not covered by this provision.

- Any other atmospheric condition that is "immediately dangerous to life or health" (IDLH).

"IDLH" - Any condition that poses an immediate or delayed threat to life or that would cause irreversible adverse health effects or that would interfere with an individual's ability to escape unaided from a permit space.

Note: Some materials (hydrogen fluoride gas and cadmium vapor, for example) may produce immediate transient effects that, even if severe, may pass without medical attention, but are followed by sudden, possibly fatal collapse 12-72 hours after exposure. The victim "feels normal" from recovery from transient effects until collapse. Such materials in hazardous quantities are considered to be "immediately" dangerous to life or health.

Note: For air contaminants for which WISHA has not determined a dose or permissible exposure limit, other sources of information, such as Material Safety Data Sheets that comply with the Chemical Hazard Communication (~~Standard, chapter 296-62 WAC, Part C~~) Program, WAC 296-800-170, published information, and internal documents can provide guidance in establishing acceptable atmospheric conditions.

"High-power tests" - Tests in which fault currents, load currents, magnetizing currents, and line-dropping currents are used to test equipment, either at the equipment's rated voltage or at lower voltages.

"High-voltage tests" - Tests in which voltages of approximately 1000 volts are used as a practical minimum and in which the voltage source has sufficient energy to cause injury.

"High wind" - A wind of such velocity that the following hazards would be present:

- An employee would be exposed to being blown from elevated locations; or
- An employee or material handling equipment could lose control of material being handled; or
- An employee would be exposed to other hazards not controlled by the standard involved.

Note: Winds exceeding 40 miles per hour (64.4 kilometers per hour), or 30 miles per hour (48.3 kilometers per hour) if material handling is involved, are normally considered as meeting this criteria unless precautions are taken to protect employees from the hazardous effects of the wind.

"Insulated" - Separated from other conducting surfaces by a dielectric (including air space) offering a high resistance to the passage of current.

Note: When any object is said to be insulated, it is understood to be insulated for the conditions to which it is normally subjected. Otherwise, it is, within the purpose of this section, uninsulated.

"Insulation" (cable) - That which is relied upon to insulate the conductor from other conductors or conducting parts or from ground.

"Insulation shielding" - An envelope which encloses the insulation of a cable and provides an equipotential surface in contact with cable insulation.

"Isolated" - An object that is not readily accessible to persons unless special means of access are used.

"Leadworker" - The person directly in charge of workers doing the work, regardless of title.

"Line-clearance tree trimmer" - An employee who, through related training or on-the-job experience or both, is familiar with the special techniques and hazards involved in line-clearance tree trimming.

Note 1: An employee who is regularly assigned to a line-clearance tree-trimming crew and who is undergoing on-the-job training and who, in the course of such training, has demonstrated an ability to perform duties safely at his or her level of training and who is under the direct supervision of a line-clearance tree trimmer is considered to be a line-clearance tree trimmer.

Note 2: A line-clearance tree trimmer is not considered to be a "qualified employee" under this section unless he or she has the training required for a qualified employee under WAC 296-45-065. However, under the electrical safety-related work practices standard, a line-clearance tree trimmer is considered to be a "qualified employee." Tree trimming performed by

such "qualified employees" is not subject to the electrical safety-related work practice requirements contained in WAC 296-24-970. (See also the note following WAC 296-24-970 for information regarding the training an employee must have to be considered a qualified employee.)

"Line-clearance tree trimming" - The pruning, trimming, repairing, maintaining, removing, or clearing of trees or the cutting of brush that is within 10 feet (305 cm) of electric supply lines and equipment.

"Lines" -

• **"Communication lines"** - The conductors and their supporting or containing structures which are used for public or private signal or communication service, and which operate at potentials not exceeding 400 volts to ground or 750 volts between any two points of the circuit, and the transmitted power of which does not exceed 150 watts. If the lines are operating at less than 150 volts, no limit is placed on the transmitted power of the system. Under certain conditions, communication cables may include communication circuits exceeding these limitations where such circuits are also used to supply power solely to communication equipment.

Note: Telephone, telegraph, railroad signal, data, clock, fire, police alarm, cable television, and other systems conforming with this definition are included. Lines used for signaling purposes, but not included under this definition, are considered as electric supply lines of the same voltage.

• **"Electric supply lines"** - Conductors used to transmit electric energy and their necessary supporting or containing structures. Signal lines of more than 400 volts are always supply lines within this section, and those of less than 400 volts are considered as supply lines, if so run and operated throughout.

"Live-line tools and ropes" - Tools and ropes specifically designed for work on energized high voltage lines and equipment.

"Load-break elbow" - A connector designed to close and interrupt current on energized circuits within the design current and voltage rating.

"Manhole" - A subsurface enclosure which personnel may enter and which is used for the purpose of installing, operating, and maintaining submersible equipment or cable.

"Manhole steps" - A series of steps individually attached to or set into the walls of a manhole structure.

"Minimum approach distance" - The closest distance an employee is permitted to approach an energized or a grounded object.

"Neutral" - A system in which one conductor is used as the neutral for one or more circuits; one conductor may be used as the neutral for both primary and secondary circuits of a distribution system.

"Pole" - Any device used to support a power distribution or transmission line. The pole may be made of any substance including wood, concrete, metal, is usually cylindrical in shape and comparatively slender. It is the upright standard to which is affixed part of the power distribution and transmission line system as defined in this chapter.

"Power dispatcher" (load dispatcher or system operator) - A person who has been designated by the employer as

having authority over switching and clearances of high voltage lines and station equipment.

"Protective devices" - Devices such as rubber gloves, rubber blankets, line hose, rubber boots, or other insulating devices, which are specifically designed for the protection of employees.

"Public highway" - Every way, land, road, street, boulevard, and every other way or place in the state open as a matter of right to public vehicular travel, both inside and outside the limits of cities and towns, regardless of ownership.

"Qualified person or qualified employee" - A person who is familiar with the construction of, or operation of such lines and/or equipment that concerns his/her position and who is fully aware of the hazards connected therewith, or, one who has passed a journey status examination for the particular branch of the electrical trades with which he/she may be connected.

Note 1: An employee must have the training required by WAC 296-45-065(1) in order to be considered a qualified employee.

Note 2: (Apprentice) Except under WAC 296-45-25510(12), an employee who is undergoing on-the-job training and who, in the course of such training, has demonstrated an ability to perform duties safely at his or her level of training and who is under the direct supervision of a qualified person is considered to be a qualified person for the performance of those duties.

"Rubber" - Any goods, equipment, or tool made out of either natural or synthetic rubber.

"Secured ladder" - A ladder which is not capable of being dislodged from the top by lateral, or jerking motion(s).

"Sheath" - As applied to tools carried in a lineman's tool belt, a sheath that effectively covers the tool and prevents such tool from falling from the belt.

"Step bolt" - A bolt or rung attached at intervals along a structural member and used for foot placement during climbing or standing.

"Supporting structure" - The main supporting unit (usually a pole or tower).

"Switch" - A device for opening and closing or for changing the connection of a circuit. In these rules, a switch is understood to be manually operable, unless otherwise stated.

"System operator or power dispatcher" - A qualified person who has been designated by the employer and having authority over switching, clearances, and operation of the system and its parts.

"Tag" - A system or method of identifying circuits, systems, or equipment for the purpose of alerting employees and others that the circuit, system, or equipment is being worked on.

"Underground network" - An underground electrical installation fed from multiple primary sources directly associated with area-wide secondary network connected into a common grid.

"Underground residential distribution system" (URD) - An electrical installation normally fed from a single primary source which may feed one or more transformers with secondaries not connected to a common grid.

"Utility" - An organization responsible for the installation, operation, or maintenance of electric supply or communications systems.

"Vault" - An enclosure, above or below ground, which personnel may enter and which is used for the purpose of installing, operating, or maintaining equipment or cable.

"Vented vault" - A vault that has provision for air changes using exhaust flue stacks and low level air intakes operating on differentials of pressure and temperature providing for airflow which precludes a hazardous atmosphere from developing.

"Voltage" - The effective (rms) potential difference between any two conductors or between a conductor and ground. Voltages are expressed in nominal values unless otherwise indicated. The nominal voltage of a system or circuit is the value assigned to a system or circuit of a given voltage class for the purpose of convenient designation. The operating voltage of the system may vary above or below this value.

Note: Low voltage includes voltages from 50 to 600 volts. High voltage shall mean those voltages of 601 volts to 230,000. Extra high voltage means any voltage over 230,000 volts. Where the words "high voltage" are used in this chapter it shall include extra high voltage, unless otherwise specified.

AMENDATORY SECTION (Amending WSR 98-07-009, filed 3/6/98, effective 5/6/98)

WAC 296-45-055 Employer's responsibility. (1) The employer shall provide and maintain the necessary protective devices specified in these rules and require the employees to use them properly.

(2) The employer shall develop and maintain a chemical hazard communication program as required by (~~Part C, chapter 296-62~~) WAC 296-800-170, which will provide information to all employees relative to hazardous chemicals or substances to which they are exposed, or may become exposed, in the course of their employment.

(3) There shall be installed and maintained in every fixed establishment employing eight or more persons a safety bulletin board of a size to display and post safety bulletins, newsletters, posters, accident statistics and other safety educational material. It is recommended that safety bulletin boards be painted green and white.

(4) The employer shall require the leadworker to observe and enforce all safety rules and shall furnish a copy of the electrical workers' safety rules to each employee who is covered by these rules.

(5) The employer shall appoint only competent workers to supervise other employees and those appointed shall be responsible for the safety of the employees under their supervision.

AMENDATORY SECTION (Amending WSR 98-07-009, filed 3/6/98, effective 5/6/98)

WAC 296-45-125 Medical services and first aid. The employer shall provide medical services and first aid as required in (~~chapter 296-24~~) WAC 296-800-160. In addition to the requirements of (~~chapter 296-24~~) WAC 296-800-160, the following requirements also apply:

(1) Cardiopulmonary resuscitation and first-aid training. When employees are performing work on or associated with exposed lines or equipment energized at 50 volts or more, persons trained in first aid including cardiopulmonary resuscitation (CPR) shall be available as follows:

(a) For field work involving two or more employees at a work location, at least two trained persons shall be available. However, only one trained person need be available if all new employees are trained in first aid, including CPR, within 3 months of their hiring dates.

(b) For fixed work locations such as generating stations, the number of trained persons available shall be sufficient to ensure that each employee exposed to electric shock can be reached within 4 minutes by a trained person. However, where the existing number of employees is insufficient to meet this requirement (at a remote substation, for example), all employees at the work location shall be trained.

(2) First-aid supplies. First-aid supplies required by (~~chapter 296-24~~) WAC 296-800-160 shall be placed in weatherproof containers if the supplies could be exposed to the weather.

(3) First-aid kits. Each first-aid kit shall be maintained, shall be readily available for use, and shall be inspected frequently enough to ensure that expended items are replaced but at least once per year.

AMENDATORY SECTION (Amending WSR 98-07-009, filed 3/6/98, effective 5/6/98)

WAC 296-45-25505 Personal protective equipment.

(1) General. Personal protective equipment shall meet the requirements of chapter 296-24 WAC, Part ((A-2)) L and WAC 296-800-150.

(2) All protective hats shall be in accordance with the specifications of ANSI Z89.2-1971 Edition Industrial Protective Helmets for Electrical Workers, Class B, and shall be worn at the jobsite by employees who are exposed to overhead or electrical hazards.

(3) Wearing apparel. Goggles, hearing protection, respirators, rubber gloves, and other such personal protective devices shall not be interchanged among employees unless they have been sanitized.

AMENDATORY SECTION (Amending WSR 98-07-009, filed 3/6/98, effective 5/6/98)

WAC 296-45-275 Ladders, platforms, and manhole steps. (1) General. Requirements for ladders contained in chapter 296-24 WAC, Part J-1, and WAC 296-800-290 apply, except as specifically noted in subsection (2) of this section.

(2) Special ladders and platforms. Portable ladders and platforms used on structures or conductors in conjunction with overhead line work need not meet chapter 296-24 WAC, Part J-1 ((ø)), chapter 296-155 WAC, Part J or WAC 296-800-290. However, these ladders and platforms shall meet the following requirements:

(a) Ladders and platforms shall be secured to prevent their becoming accidentally dislodged.

(b) Ladders and platforms may not be loaded in excess of the working loads for which they are designed.

(c) Ladders and platforms may be used only in applications for which they were designed.

(d) In the configurations in which they are used, ladders and platforms shall be capable of supporting without failure at least 2.5 times the maximum intended load.

(e) All ladders shall be handled and stored in such a manner as to prevent damage to the ladder.

(f) When ascending or descending a ladder, the employee shall face the ladder and have free use of both hands.

(g) All defective ladders shall be taken out of service and labeled as defective.

(h) When a ladder is being used which is not fixed or otherwise secured, there shall be an attendant to hold the ladder and watch traffic when the work is being done on streets, alleys, sidewalks, or in industrial plants or other places where there exists the possibility of accidental contact with the ladder by third persons or vehicles.

(i) When working on the ladder, employees shall, where possible, tie the top of the ladder to a substantial object to prevent falling unless the ladder is equipped with approved hooks which may be used for the same purpose.

(j) Portable ladders shall not be moved with employees on the ladder.

(k) No employee shall ascend or descend a rolling ladder while it is moving.

(l) No employee shall stand on the top two steps of a step ladder.

(m) No employee shall use a step ladder as a straight ladder.

(n) Ladders shall always be placed on a secure footing with both legs resting firmly on the lower surface.

(o) Ladders made by fastening cleats or similar devices across a single rail shall not be used.

(3) Conductive ladders. Portable metal ladders and other portable conductive ladders may not be used near exposed energized lines or equipment. However, in specialized high-voltage work, conductive ladders shall be used where the employer can demonstrate that nonconductive ladders would present a greater hazard than conductive ladders.

Note: A greater electrical hazard would be static electricity such as might be found in extra high voltage substations.

(4) All conductive or metal ladders shall be prominently marked and identified as being conductive and shall be grounded when used near energized lines or equipment.

Note: See chapter 296-24 WAC for additional ladder requirements.

AMENDATORY SECTION (Amending WSR 98-07-009, filed 3/6/98, effective 5/6/98)

WAC 296-45-285 Hand, and portable powered tools.

(1) General requirements.

(a) The employer shall assure that each hand and portable powered tool, including any tool provided by an employee, is maintained in serviceable condition.

(b) The employer shall assure that each tool, including any tool provided by an employee, is inspected before initial use during each workshift. At a minimum, the inspection shall include the following:

(i) Handles and guards, to assure that they are sound, tight-fitting, properly shaped, free of splinters and sharp edges, and in place;

(ii) Controls, to assure proper function;

(iii) Heads of shock, impact-driven and driving tools, to assure that there is no mushrooming;

(iv) Cutting edges, to assure that they are sharp and properly shaped; and

(v) All other safety devices, to assure that they are in place and function properly.

(c) The employer shall assure that each tool is used only for purposes for which it has been designed.

(d) When the head of any shock, impact-driven or driving tool begins to chip, it shall be repaired or removed from service.

(e) The cutting edge of each tool shall be sharpened in accordance with manufacturer's specifications whenever it becomes dull during the workshift.

(f) Each tool shall be stored in the provided location when not being used at a work site.

(g) Racks, boxes, holsters or other means shall be provided, arranged and used for the transportation of tools so that a hazard is not created for any vehicle operator or passenger.

(2) Electric equipment connected by cord and plug must meet the following requirements:

(a) Cord- and plug-connected equipment supplied by premises wiring is covered by chapter 296-24 WAC, Part L and WAC 296-800-280.

(b) Any cord- and plug-connected equipment supplied by other than premises wiring shall comply with one of the following instead of chapter 296-24 WAC, Part L and WAC 296-800-280:

(i) It shall be equipped with a cord containing an equipment grounding conductor connected to the tool frame and to a means for grounding the other end (however, this option may not be used where the introduction of the ground into the work environment increases the hazard to an employee); or

(ii) It shall be of the double-insulated type conforming to 296-24 WAC, Part L and WAC 296-800-280; or

(iii) It shall be connected to the power supply through an isolating transformer with an ungrounded secondary.

(3) Portable and vehicle-mounted generators. Portable and vehicle-mounted generators used to supply cord- and plug-connected equipment shall meet the following requirements:

(a) The generator may only supply equipment located on the generator or the vehicle and cord- and plug-connected equipment through receptacles mounted on the generator or the vehicle.

(b) The non-current-carrying metal parts of equipment and the equipment grounding conductor terminals of the receptacles shall be bonded to the generator frame.

(c) In the case of vehicle-mounted generators, the frame of the generator shall be bonded to the vehicle frame.

(d) Any neutral conductor shall be bonded to the generator frame.

(4) Hydraulic and pneumatic tools must meet the following requirements:

(a) Safe operating pressures for hydraulic and pneumatic tools, hoses, valves, pipes, filters, and fittings may not be exceeded.

Note: If any hazardous defects are present, no operating pressure would be safe, and the hydraulic or pneumatic equipment involved may not be used. In the absence of defects, the maximum rated operating pressure is the maximum safe pressure.

(b) A hydraulic or pneumatic tool used where it may contact exposed live parts shall (use nonconductive hoses and) be designed and maintained for such use.

(c) The hydraulic system supplying a hydraulic tool used where it may contact exposed live parts shall provide protection against loss of insulating value for the voltage involved due to the formation of a partial vacuum in the hydraulic line.

Note: Hydraulic lines without check valves having a separation of more than 35 feet (10.7 m) between the oil reservoir and the upper end of the hydraulic system promote the formation of a partial vacuum.

(d) A pneumatic tool used on energized electric lines or equipment or used where it may contact exposed live parts shall provide protection against the accumulation of moisture in the air supply.

(e) Pressure shall be released before connections are broken, unless quick acting, self-closing connectors are used. Hoses may not be kinked.

(f) Employees may not use any part of their bodies to locate or attempt to stop a hydraulic leak.

AMENDATORY SECTION (Amending WSR 98-07-009, filed 3/6/98, effective 5/6/98)

WAC 296-45-45510 Sprayers and related equipment. (1) Walking and working surfaces of sprayers and related equipment shall be covered with slip-resistant material. If slipping hazards cannot be eliminated, slip-resistant footwear or handrails and stair rails meeting the requirements of chapter 296-24 WAC, Part J-1, and WAC 296-800-260 may be used instead of slip-resistant material.

(2) Equipment on which employees stand to spray while the vehicle is in motion shall be equipped with guardrails around the working area. The guardrail shall be constructed in accordance with chapter 296-24 WAC, Part J-1 and WAC 296-800-260.

AMENDATORY SECTION (Amending WSR 98-07-009, filed 3/6/98, effective 5/6/98)

WAC 296-45-48535 Chemical cleaning of boilers and pressure vessels. The following requirements apply to chemical cleaning of boilers and pressure vessels:

(1) Areas where chemical cleaning is in progress shall be cordoned off to restrict access during cleaning. If flammable liquids, gases, or vapors or combustible materials will be

used or might be produced during the cleaning process, the following requirements also apply:

(a) The area shall be posted with signs restricting entry and warning of the hazards of fire and explosion; and

(b) Smoking, welding, and other possible ignition sources are prohibited in these restricted areas.

(2) The number of personnel in the restricted area shall be limited to those necessary to accomplish the task safely.

(3) There shall be ready access to water or showers for emergency use.

Note: See chapter 296-24 WAC, Part B and WAC 296-800-230 for requirements that apply to the water supply and to washing facilities.

(4) Employees in restricted areas shall wear protective equipment meeting the requirements of this chapter and including, but not limited to, protective clothing, boots, goggles, and gloves.

AMENDATORY SECTION (Amending WSR 98-07-009, filed 3/6/98, effective 5/6/98)

WAC 296-45-075 Employer's safety program. (1)

The employer shall hold safety meetings at least once a month, which meetings shall be held at a reasonable time and place as selected by the employer. The employer shall require all employees subject to provisions of this chapter to attend said meetings: Provided, That employees whose presence is otherwise required by reason of an emergency or whose function is such that they cannot leave their station or cease their work without serious detriment to the service provided, such as dispatcher, may be excused from such meeting under those circumstances. Minutes shall be kept of each safety meeting and retained for a period of one year.

(2) The employer or a representative(s) designated shall investigate all accidents or injuries of a serious nature and, where possible, take the proper remedial steps to prevent the occurrence of similar accidents.

(3) The employer shall furnish instructions stating the proper procedure in event of an emergency, which shall include the names of those individuals to be notified and methods of contacting them.

(4) The employer shall provide and make available to all employees accident report and safety suggestion forms or other approved methods. Safety suggestion forms should, where possible, be used for suggesting the elimination of hazardous conditions and such reported suggestions shall be retained (for one year) by the employer or an authorized representative.

(5) The employer must notify the department of employee fatalities or catastrophes according to the requirements of WAC ((296-24-020)) 296-800-320.

(6) Nothing contained within this chapter shall prohibit an employer or an authorized representative from disciplining employees for failure to comply with the provisions of this or any other safety code.

(7) Existing conditions related to the safety of the work to be performed shall be determined before work on or near electric lines or equipment is started. Such conditions include, but are not limited to, the nominal voltages of lines

and equipment, the maximum switching transient voltages, the presence of hazardous induced voltages, the presence and condition of protective grounds and equipment grounding conductors, the condition of poles, environmental conditions relative to safety, and the locations of circuits and equipment, including power and communication lines and fire protective signaling circuits.

AMENDATORY SECTION (Amending WSR 95-07-014, filed 3/6/95, effective 4/20/95)

WAC 296-52-465 Storage of ammonium nitrate. (1) Scope and definitions.

(a) Except as provided in (d) of this subsection applies to the storage of ammonium nitrate in the form of crystals, flakes, grains, or prills including fertilizer grade, dynamite grade, nitrous oxide grade, technical grade, and other mixtures containing 60 percent or more ammonium nitrate by weight but does not apply to blasting agents.

(b) This section does not apply to the transportation of ammonium nitrate while such transportation is being conducted under U.S. DOT jurisdiction and in compliance with DOT regulations (see 49 CFR Part 173).

(c) This section does not apply to storage under the jurisdiction of and in compliance with the regulations of the United States Coast Guard (see 46 CFR Parts 146-149).

(d) This section shall not apply to storage of ammonium nitrate and ammonium nitrate mixtures which are more sensitive than allowed by the "Definition and Test Procedures for Ammonium Nitrate Fertilizers" from the FERTILIZER INSTITUTE. Storage of ammonium nitrate which is above the sensitivity criteria shall comply with WAC 296-52-469, Storage of Blasting Agents and Supplies.

(e) Nothing in this section shall apply to the production of ammonium nitrate or to the storage of ammonium nitrate on the premises of the producing plant, provided that no distinct undue hazard to employees or the public is created.

(f) The definition and test procedures for ammonium nitrate fertilizer are those found in the bulletin, "Definition and test procedures for ammonium nitrate fertilizer," available from the Fertilizer Institute, 501 2nd St. N.E., Washington, D.C. 20006. This definition limits the contents of organic materials, metals, sulfur, etc., in a product that may be classified ammonium nitrate fertilizer.

(g) The standards for ammonium nitrate (nitrous oxide grade) are those found in the "specifications, properties, and recommendations for packaging, transportation, storage, and use of ammonium nitrate," available from the Compressed Gas Association, Inc., 1235 Jefferson Davis Highway, Suite 1004, Arlington, VA 22202-4100.

(2) General provisions.

(a) This subsection applies to all persons storing, having, or keeping ammonium nitrate, and to the owner or lessee of any building, premises, or structure in which ammonium nitrate is stored in quantities of 1,000 pounds (454 kg) or more.

(b) Approval of large quantity storage shall be subject to due consideration of the fire and explosion hazards, including exposure to toxic vapors from burning or decomposing ammonium nitrate.

(c) Storage buildings shall not have basements unless the basements are open on at least one side. Storage buildings shall not be over one story in height.

(d) Storage buildings shall have adequate ventilation or be of a construction that will be self-ventilating in the event of fire.

(e) The wall on the exposed side of a storage building within 50 feet (15.2 m) of a combustible building, forest, piles of combustible materials and similar exposure hazards shall be of fire-resistive construction. (See NFPA Std. 220, Type 1 Construction.) In lieu of the fire-resistive wall, other suitable means of exposure protection such as a free standing wall may be used. The roof coverings shall be Class C or better, as defined in Roof Coverings, NFPA 203M-1970.

(f) All flooring in storage and handling areas, shall be of noncombustible material or protected against impregnation by ammonium nitrate and shall be without open drains, traps, tunnels, pits, or pockets into which any molten ammonium nitrate could flow and be confined in the event of fire.

(g) The continued use of an existing storage building or structure not in strict conformity with this section may be approved in cases where such continued use will not constitute a hazard to life or adjoining property.

(h) Buildings and structures shall be dry and free from water seepage through the roof, walls, and floors.

(3) Storage of ammonium nitrate in bags, drums, or other containers.

(a) Bags and containers used for ammonium nitrate must comply with specifications and standards required for use in interstate commerce (see 49 CFR Chapter I).

(b) Containers used on the premises in the actual manufacturing or processing need not comply with provisions of (a) of this subsection.

(c) Containers of ammonium nitrate shall not be accepted for storage when the temperature of the ammonium nitrate exceeds 130°F (54.4°C).

(d) Bags of ammonium nitrate shall not be stored within 30 inches (76 cm) of the storage building walls and partitions.

(e) The height of piles shall not exceed 20 feet (6.1 m). The width of piles shall not exceed 20 feet (6.1 m) and the length 50 feet (15.2 m) except that where the building is of noncombustible construction or is protected by automatic sprinklers the length of piles shall not be limited. In no case shall the ammonium nitrate be stacked closer than 36 inches (0.9 m) below the roof or supporting and spreader beams overhead.

(f) Aisles shall be provided to separate piles by a clear space of not less than 3 feet (0.9 m) in width. At least one service or main aisle in the storage area shall be not less than 4 feet (1.2 m) in width.

(4) Storage of bulk ammonium nitrate.

(a) Warehouses shall have adequate ventilation or be capable of adequate ventilation in case of fire.

(b) Unless constructed of noncombustible material or unless adequate facilities for fighting a roof fire are available, bulk storage structures shall not exceed a height of 40 feet (12.2 m).

(c) Bins shall be clean and free of materials which may contaminate ammonium nitrate.

(d) Due to the corrosive and reactive properties of ammonium nitrate, and to avoid contamination, galvanized iron, copper, lead, and zinc shall not be used in a bin construction unless suitably protected. Aluminum bins and wooden bins protected against impregnation by ammonium nitrate are permissible. The partitions dividing the ammonium nitrate storage from other products which would contaminate the ammonium nitrate shall be of tight construction.

(e) The ammonium nitrate storage bins or piles shall be clearly identified by signs reading "ammonium nitrate" with letters at least 2 inches (5 cm) high.

(f) Piles or bins shall be so sized and arranged that all material in the pile is moved out periodically in order to minimize possible caking of the stored ammonium nitrate.

(g) Height or depth of piles shall be limited by the pressure-setting tendency of the product. However, in no case shall the ammonium nitrate be piled higher at any point than 36 inches (0.9 m) below the roof or supporting and spreader beams overhead.

(h) Ammonium nitrate shall not be accepted for storage when the temperature of the product exceeds 130°F (54.4°C).

(i) Dynamite, other explosives, and blasting agents shall not be used to break up or loosen caked ammonium nitrate.

(5) Contaminants.

(a) Ammonium nitrate shall be in a separate building or shall be separated by approved type firewalls of not less than 1 hour fire-resistance rating from storage or organic chemicals, acids, or other corrosive materials, materials that may require blasting during processing or handling, compressed flammable gases, flammable and combustible materials or other contaminating substances, including but not limited to animal fats, baled cotton, baled rags, baled scrap paper, bleaching powder, burlap or cotton bags, caustic soda, coal, coke, charcoal, cork, camphor, excelsior, fibers of any kind, fish oils, fish meal, foam rubber, hay, lubricating oil, linseed oil, or other oxidizable or drying oils, naphthalene, oakum, oiled clothing, oiled paper, oiled textiles, paint, straw, sawdust, wood shavings, or vegetable oils. Walls referred to in this subsection need extend only to the underside of the roof.

(b) In lieu of separation walls, ammonium nitrate may be separated from the materials referred to in (a) of this subsection by a space of at least 30 feet (9.1 m).

(c) Flammable liquids such as gasoline, kerosene, solvents, and light fuel oils shall not be stored on the premises except when such storage conforms to WAC 296-24-330, and when walls and sills or curbs are provided in accordance with (a) or (b) of this subsection.

(d) LP-Gas shall not be stored on the premises except when such storage conforms to WAC 296-24-475.

(e) Sulfur and finely divided metals shall not be stored in the same building with ammonium nitrate except when such storage conforms to chapter 296-52 WAC and NFPA Std. 495, Explosive Materials Code.

(f) Explosives and blasting agents shall not be stored in the same building with ammonium nitrate except on the premises of makers, distributors, and user-compounders of explosives or blasting agents.

(g) Where explosives or blasting agents are stored in separate buildings, other than on the premises of makers, distrib-

utors, and user-compounders of explosives or blasting agents, they shall be separated from the ammonium nitrate by the distances and/or barricades specified in Table H-22 of WAC 296-52-481, but by not less than 50 feet (15.2 m).

(h) Storage and/or operations on the premises of makers, distributors, and user-compounders of explosives or blasting agents shall be in conformity with chapter 296-52 WAC.

(6) General precautions.

(a) Electrical installations shall conform to the requirements of chapter 296-24 WAC, Part L, and WAC 296-800-280, for ordinary locations. They shall be designed to minimize damage from corrosion.

(b) In areas where lightning storms are prevalent, lightning protection shall be provided. (See the Lightning Protection Code, NFPA 78-1992.)

(c) Provisions shall be made to prevent unauthorized personnel from entering the ammonium nitrate storage area.

(7) Fire protection.

(a) Not more than 2,500 (2270 metric) tons of bagged ammonium nitrate shall be stored in a building or structure not equipped with an automatic sprinkler system. Sprinkler systems shall be of the approved type and installed in accordance with WAC 296-24-607.

(b) Suitable fire control devices such as small hose or portable fire extinguishers shall be provided throughout the warehouse and in the loading and unloading areas. Suitable fire control devices shall comply with the requirements of WAC 296-24-592 and 296-24-602.

(c) Water supplies and fire hydrants shall be available in accordance with recognized good practices.

AMENDATORY SECTION (Amending WSR 99-17-094, filed 8/17/99, effective 12/1/99)

WAC 296-52-489 Transportation. (1) Regulations governing the transportation of explosives on public highways are adopted by the United States Department of Transportation (see 49 CFR Parts 100 through 199) and the Washington utilities and transportation commission and administered by the Washington state patrol.

(2) The regulations of this section shall be applicable in-and-on job sites and off-highway roads. The department of labor and industries shall administer these regulations in locations such as but not limited to: Construction or mining access roads and blast sites; off-highway forest roads including both publicly and privately owned logging roads, haul roads or general access roads.

Note: Examples of publicly owned off-highway roads where these regulations are applicable shall include, but are not limited to: U.S. Forest Service roads, Bureau of Land Management roads, state department of natural resources roads, but specifically not including the state or interstate highway system.

(a) No person shall be allowed to smoke, carry matches or any other flame-producing device, except guards or commissioned law enforcement officers, to carry any firearms or loaded cartridges while in or near a motor vehicle transporting explosives; or drive, load, or unload such vehicle in a careless or reckless manner.

(b) Explosives shall not be carried on any vehicle while vehicle is being used to transport workers other than driver and two persons.

(c) Explosives shall be transferred from a disabled vehicle to another, only when proper and qualified supervision is provided. Local fire and police departments shall be promptly notified in congested areas. In remote areas they shall be notified if appropriate.

(d) Other materials or supplies shall not be placed on or in the cargo space of a conveyance containing explosives, detonating cord or detonators, except carrying safety fuse, and properly secured, nonsparking equipment used expressly in the handling of such explosives will be permissible.

(3) Transportation vehicles.

(a) All vehicles used for transporting explosives shall be strong enough to carry the load without difficulty and be in good mechanical condition. The cargo compartment(s) shall have a tight floor and must not have any exposed spark producing metal on the inside which could come into contact with explosives cargo.

(b) Explosives vehicles used on any roadway which is open to public travel shall comply with WAC 296-52-550, Appendix II.

(c) Open top explosives transportation vehicles may only be used on the jobsite or on roads which are not open to public travel (while laden with explosives). In open top vehicles or trailers, explosives may only be transported in the original DOT approved shipping container(s)/box(es) or a daybox or portable magazine which complies with the requirements of this chapter. In all instances the explosive container(s), box(es), daybox or portable magazine shall be secured to the bed of the vehicle or trailer.

(i) If an explosives transportation vehicle or trailer does not have a fully enclosed cargo area with nonsparking interior, the cargo bed and all explosive cargo shall be covered with a flameproof and moisture-proof tarpaulin or other effective protection against moisture and sparks. Whenever tarpaulins are used for covering explosives, both the tarpaulin and the explosives container shall be secured to the body of the truck bed by means of rope, wire, or other equally efficient tie downs.

(ii) Packages of explosives shall not be loaded above the sides on open-sided vehicles.

(4) Vehicles shall be placarded and displayed as specified by the United States Department of Transportation, CFR 49-1981, Parts 100 through 199. Placards shall remain on the vehicle until all explosives have been removed from the vehicle.

(5)(a) Each motor vehicle used for transporting explosives shall be equipped with a minimum of two extinguishers, each having a rating of at least 2A 10BC. The driver shall be trained in the use of the extinguishers on the vehicle.

(i) Only extinguishers listed or approved by a nationally recognized testing laboratory shall be deemed suitable for use on explosives-carrying vehicles. Refer to WAC 296-24-58501(19) and 296-800-300 for definition of listed, and federal regulation 29 CFR 1910.7 for nationally recognized testing laboratory.

(ii) Extinguishers shall be filled and ready for immediate use and readily available. Extinguishers shall be examined periodically by a competent person.

(b) A motor vehicle used for transporting explosives shall be given the following inspection to determine that it is in proper condition for safe transportation of explosives:

(i) Fire extinguishers shall be filled and in working order.

(ii) All electrical wiring shall be completely protected and securely fastened to prevent short-circuiting.

(iii) Chassis, motor, pan, and underside of body shall be reasonably clean and free of excess oil and grease.

(iv) Fuel tank and feedline shall be secure and have no leaks.

(v) Brakes, lights, horn, windshield wipers, and steering apparatus shall function properly.

(vi) Tires shall be checked for proper inflation and defects.

(vii) The vehicle shall be in proper condition in every other respect and acceptable for handling explosives.

(c) Motor vehicles or conveyances carrying explosives, blasting agents, or blasting supplies, shall not be taken inside a garage or shop for repairs or servicing.

(6) Operation of transportation vehicles.

(a) Vehicles transporting explosives shall only be driven by and be in the charge of a licensed driver who is not less than twenty-one years of age, physically fit, careful, capable, reliable, able to read and write the English language, and not addicted to the use, or under the influence of intoxicants, narcotics, or other dangerous drugs. This rule does not apply to persons taking prescription drugs and/or narcotics as directed by a physician providing such use shall not endanger the worker or others. They shall be familiar with the traffic regulations, state laws, and the provisions of this section.

(i) Explosives may only be transported by a licensed manufacturer, blaster, purchaser or seller, or the designated agent or representative thereof, or a contract carrier for hire who complies with all requirements for transportation of hazardous materials.

(ii) The person in control of the explosive laden vehicle shall be made aware of the nature of the cargo and pertinent safety precautions relating to the particular explosive(s) being transported.

(b) Parking. A motor vehicle which contains Class A or Class B explosives must not be parked under any of the following circumstances:

(i) On or within 5 feet of the traveled portion of a public street or highway;

(ii) On private property (including premises of a fueling or eating facility) without the knowledge and consent of the person who is in charge of the property and who is aware of the nature of the hazardous materials the vehicle contains; or

(iii) Within 300 feet of a bridge, tunnel, dwelling, building, or place where people work, congregate, or assemble, except for brief periods when the necessities of operation require the vehicle to be parked and make it impracticable to park the vehicle in any other place.

(c) Every motor vehicle transporting any quantity of Class A or Class B explosives shall, at all times, be attended by a driver or other attendant of the motor carrier. This attendant shall have been made aware of the class of the explosive

material in the vehicle and of its inherent dangers, and shall have been instructed in the measures and procedures to be followed in order to protect the public from those dangers. The attendant shall have been made familiar with the vehicle to which assigned, and shall be trained, supplied with the necessary means, and authorized to move the vehicle when required.

(i) For the purpose of this subdivision, a motor vehicle shall be deemed "attended" only when the driver or other attendant is physically on or in the vehicle, or has the vehicle within the driver or attendants field of vision and can reach it quickly and without any kind of interference; "attended" also means that the driver or attendant is awake, alert, and not engaged in other duties or activities which may divert their attention from the vehicle.

(ii) An explosive laden vehicle may be left unattended for a period not to exceed 48 hours provided that:

(A) The vehicle is parked in a designated parking lot which complies with NFPA Std. 498 and with the appropriate clearance table of this chapter for the type and quantity of explosives carried;

(B) The designated parking lot is correctly bermed and walled or fenced and gated to prevent unauthorized entry;

(C) The designated lot is inspected and approved by the department of labor and industries and is provided with a full-time security patrol at all times when explosives are present;

(D) Trucks used for explosives delivery which contain only blasting agents (International Class 1.5 D) and no high explosives need not be attended provided the vehicle is locked to prevent movement of the vehicle, the cargo compartments are locked to prevent theft, the vehicle is parked according to all applicable storage distance requirements, and the vehicle is located in a secured area which restricts entry to the area by unauthorized personnel.

(d) No spark-producing metal, spark-producing tools, oils, matches, firearms, electric storage batteries, flammable substances, acids, oxidizing materials, or corrosive compounds shall be carried in the body of any motor truck and/or vehicle transporting explosives, unless the loading of such dangerous articles and the explosives comply with U.S. Department of Transportation regulations.

(e) Vehicles transporting explosives shall avoid congested areas and heavy traffic.

(f) Delivery and issue of explosives shall only be made by and to authorized persons and into authorized magazines or authorized temporary storage or handling area.

(7) Transporting blasting caps and explosives in the same vehicle.

(a) Fuse type blasting caps, blasting caps with safety fuse and/or blasting caps with metal clad mild detonating fuse shall not be transported over the highways on the same vehicle or trailer with other explosives, unless packaged, segregated, and transported in accordance with the department of transportation's hazardous materials regulations.

(b) Blasting caps rated by U.S. DOT as nonmass detonating may be transported in the same vehicle or trailer with other explosives when:

(i) The caps are carried in DOT approved shipping containers:

(ii) The truck or trailer complies with Appendix 1, WAC 296-52-550.

(8) When primers are made up at a central primer house for use in high speed tunneling, the following shall apply:

(a) Only enough primers shall be made up for each round of blasting.

(b) The primers shall be placed in separate containers or bins, categorized by degree of delay in such a manner so as to prevent them from physical impact.

(c) Explosives carried in the same magazine shall be separated by 1/4-inch steel, covered on each side by four inches of hardwood planking, or equivalent.

(d) Hoist operators shall be notified before explosives or blasting agents are transported in a shaft conveyance.

(e) Explosives and blasting agents shall be hoisted, lowered, or conveyed in a powder car. No other materials, supplies, or equipment shall be transported in the same conveyance at the same time.

(f) Only a state approved powder car or conveyance shall be used underground.

(g) All explosives or blasting agents in transit underground shall be taken to the place of use or storage without delay.

(h) The quantity of explosives or blasting agents taken to an underground loading area shall not exceed the amount estimated to be necessary for the blast.

(i) The number of primers for one round will be removed from the state approved car or vehicle at the face or heading after the drilling has been completed and the holes readied for loading. After loading the charge, the powder car or vehicle will be withdrawn from the tunnel.

(j) Wires on electric caps shall be kept shunted until wired to the bus wires.

(k) The powder car or conveyance shall be inspected daily for lights, brakes and external damage to electrical circuitry. The electrical system shall be checked weekly to detect any failures that may constitute an electrical hazard and a written certification record of such inspection shall be kept on file for the duration of the job. The certification record shall contain the date of inspection, the serial number or other positive identification of the unit being inspected and the signature of the person performing the inspection.

(l) The installation of auxiliary lights on truck beds, which are powered by the truck's electrical system, shall be prohibited.

(m) No one, except the operator, the helper, and/or the powderperson, shall be permitted to ride on a conveyance transporting explosives and blasting agents.

(n) No person shall ride in any shaft conveyance transporting explosives and blasting agents.

(o) No explosives or blasting agents shall be transported on a crew-haul trip.

(p) The car or conveyance containing explosives or blasting agents shall be pulled, not pushed, whenever possible.

(q) The powder car or conveyance especially built for the purpose of transporting explosives or blasting agents shall bear a reflectorized sign on each side with the word "explosives" in letters not less than 4 inches in height; upon a background of sharply contrasting color.

(r) Compartments for transporting detonators and explosives in the same car or conveyance shall be physically separated by a distance of 24 inches or by a solid partition at least 6 inches thick.

(s) Detonators and other explosives shall not be transported at the same time in any shaft conveyance.

(t) Explosives and/or blasting agents, not in original containers, shall be placed in a suitable container when transported manually.

(u) No explosives or blasting agents shall be transported on any locomotive. At least two car lengths shall separate the locomotive from the powder car.

(9) When explosives are carried to the blasting site from the main storage magazines by the blaster or helper:

(a) Special insulated containers or original DOT shipping containers shall be used for this purpose, either boxes or bags, one container for explosives and one for detonators.

(b) Detonators or explosives shall never be carried in pockets of clothing.

AMENDATORY SECTION (Amending WSR 95-07-014, filed 3/6/95, effective 4/20/95)

WAC 296-52-497 Blasting agents. (1) General. Unless otherwise set forth in this section, blasting agents, excluding water gels, shall be transported, stored, and used in the same manner as explosives. Water gels are covered in WAC 296-52-501.

(2) Fixed location mixing.

(a) Buildings or other facilities used for mixing blasting agents shall be located, with respect to inhabited buildings, passenger railroads, and public highways, in accordance with Table H-20. In determining the distance separating highways, railroads, and inhabited buildings from potential explosions (as prescribed in Table H-20), the sum of all masses which may propagate (i.e., lie at distances less than prescribed in Table H-22) from either individual or combined donor masses are included. However, when the ammonium nitrate must be included, only fifty percent of its weight shall be used because of its reduced blast effects.

(b) Buildings used for the mixing of blasting agents shall conform to the requirements of this section.

(i) Buildings shall be of noncombustible construction or sheet metal on wood studs.

(ii) Floors in a mixing plant shall be of concrete or of other nonabsorbent materials.

(iii) All fuel oil storage facilities shall be separated from the mixing plant and located in such a manner that in case of tank rupture, the oil will drain away from the mixing plant building.

(iv) The building shall be well ventilated.

(v) Heating units which do not depend on combustion processes, when properly designed and located, may be used in the building. All direct sources of heat shall be located outside the mixing building.

(vi) All internal-combustion engines used for electric power generation shall be located outside the mixing plant building, or shall be properly ventilated and isolated by a fire-wall. The exhaust systems on all such engines shall be

located so any spark emission cannot be a hazard to any materials in or adjacent to the plant.

(c) Equipment used for mixing blasting agents shall conform to the requirements of this subsection.

(i) The design of the mixer shall minimize the possibility of frictional heating, compaction, and especially confinement. All bearings and drive assemblies shall be mounted outside the mixer and protected against the accumulation of dust. All surfaces shall be accessible for cleaning.

(ii) Mixing and packaging equipment shall be constructed of materials compatible with the fuel-ammonium nitrate composition.

(iii) Suitable means shall be provided to prevent the flow of fuel oil to the mixer in case of fire. In gravity flow systems an automatic spring-loaded shutoff valve with fusible link shall be installed.

(d) The provisions of this subsection shall be considered when determining blasting agent compositions.

(i) The sensitivity of the blasting agent shall be determined by means of a No. 8 test blasting cap at regular intervals and after every change in formulation.

(ii) Oxidizers of small particle size, such as crushed ammonium nitrate prills or fines, may be more sensitive than coarser products and shall, therefore, be handled with greater care.

(iii) No hydrocarbon liquid fuel with flashpoint lower than that of No. 2 diesel fuel oil 125°F. minimum shall be used.

(iv) Crude oil and crankcase oil shall not be used.

(v) Metal powders such as aluminum shall be kept dry and shall be stored in containers or bins which are moisture-resistant or weathertight. Solid fuels shall be used in such manner as to minimize dust explosion hazards.

(vi) Peroxides and chlorates shall not be used.

(e) All electrical switches, controls, motors, and lights located in the mixing room shall conform to the requirements in chapter 296-24 WAC, Part L, and WAC 296-800-280; otherwise they shall be located outside the mixing room. The frame of the mixer and all other equipment that may be used shall be electrically bonded and be provided with a continuous path to the ground.

(f) Safety precautions at mixing plants shall include the requirements of this subsection.

(i) Floors shall be constructed so as to eliminate floor drains and piping into which molten materials could flow and be confined in case of fire.

(ii) The floors and equipment of the mixing and packaging room shall be cleaned regularly and thoroughly to prevent accumulation of oxidizers or fuels and other sensitizers.

(iii) The entire mixing and packaging plant shall be cleaned regularly and thoroughly to prevent excessive accumulation of dust.

(iv) Smoking, matches, open flames, spark-producing devices, and firearms (except firearms carried by law enforcement bomb squad members or qualified guards) shall not be permitted inside of or within 50 feet of any building or facility used for the mixing of blasting agents.

(v) The land surrounding the mixing plant shall be kept clear of brush, dried grass, leaves, and other materials for a distance of at least 25 feet.

(vi) Empty ammonium nitrate bags shall be disposed of daily in a safe manner.

(vii) No welding shall be permitted or open flames used in or around the mixing or storage area of the plant unless the equipment or area has been completely washed down and all oxidizer material removed.

(viii) Before welding or repairs to hollow shafts, all oxidizer material shall be removed from the outside and inside of the shaft and the shaft vented with a minimum one-half inch diameter opening.

(ix) Explosives shall not be permitted inside of or within 50 feet of any building or facility used for the mixing of blasting agents.

(3) Bulk delivery and mixing vehicles.

(a) The provisions of this subsection shall apply to off-highway private operations as well as to all public highway movements.

(b) A bulk vehicle body for delivering and mixing blasting agents shall conform with the requirements of this subsection.

(i) The body shall be constructed of noncombustible materials.

(ii) Vehicles used to transport bulk premixed blasting agents on public highways shall have closed bodies.

(iii) All moving parts of the mixing system shall be designed as to prevent a heat buildup. Shafts or axles which contact the product shall have outboard bearings with 1-inch minimum clearance between the bearings and the outside of the product container. Particular attention shall be given to the clearances on all moving parts.

(iv) A bulk delivery vehicle shall be strong enough to carry the load without difficulty and be in good mechanical condition.

(c) Operation of bulk delivery vehicles shall conform to the requirements of WAC 296-52-489(2). These include the placarding requirements as specified by department of transportation.

(i) The operator shall be trained in the safe operation of the vehicle together with its mixing, conveying, and related equipment. The employer shall assure that the operator is familiar with the commodities being delivered and the general procedure for handling emergency situations.

(ii) The hauling of either blasting caps or other explosives but not both, shall be permitted on bulk trucks provided that a special wood or nonferrous-lined container is installed for the explosives. Such blasting caps or other explosives shall be in DOT-specified shipping containers: See 49 CFR Chapter I.

(iii) No person shall smoke, carry matches or any flame-producing device, or carry any firearms while in or about bulk vehicles effecting the mixing transfer or down-the-hole loading of blasting agents at or near the blasting site.

(iv) Caution shall be exercised in the movement of the vehicle in the blasting area to avoid driving the vehicle on to or dragging hoses over firing lines, cap wires, or explosive materials. The employer shall assure that the driver, in mov-

ing the vehicle, has assistance of a second person to guide the driver's movements.

(v) No intransit mixing of materials shall be performed.

(d) Pneumatic loading from bulk delivery vehicles into blastholes primed with electric blasting caps or other static-sensitive systems shall conform to the requirements of this subsection.

(i) A positive grounding device shall be used to prevent the accumulation of static electricity.

(ii) A discharge hose shall be used that has a resistance range that will prevent conducting stray currents, but that is conductive enough to bleed off static buildup.

(iii) A qualified person shall evaluate all systems to determine if they will adequately dissipate static under potential field conditions.

(e) Repairs to bulk delivery vehicles shall conform to the requirements of this section.

(i) No welding or open flames shall be used on or around any part of the delivery equipment unless it has been completely washed down and all oxidizer material removed.

(ii) Before welding or making repairs to hollow shafts, the shaft shall be thoroughly cleaned inside and out and vented with a minimum one-half-inch diameter opening.

(4) Bulk storage bins.

(a) The bin, including supports, shall be constructed of compatible materials, waterproof, and adequately supported and braced to withstand the combination of all loads including impact forces arising from product movement within the bin and accidental vehicle contact with the support legs.

(b) The bin discharge gate shall be designed to provide a closure tight enough to prevent leakage of the stored product. Provision shall also be made so that the gate can be locked.

(c) Bin loading manways or access hatches shall be hinged or otherwise attached to the bin and be designed to permit locking.

(d) Any electrically driven conveyors for loading or unloading bins shall conform to the requirements of chapter 296-24 WAC, Part L, and WAC 296-800-280. They shall be designed to minimize damage from corrosion.

(e) Bins containing blasting agent shall be located, with respect to inhabited buildings, passenger railroads, and public highways, in accordance with Table H-20 and separation from other blasting agent storage and explosives storage shall be in conformity with Table H-22.

(f) Bins containing ammonium nitrate shall be separated from blasting agent storage and explosives storage in conformity with Table H-22.

(5) Transportation of packaged blasting agents.

(a) When blasting agents are transported in the same vehicle with explosives, all of the requirements of WAC 296-52-489 shall be complied with.

(b) Vehicles transporting blasting agents shall only be driven by and in charge of a driver at least twenty-one years of age who is capable, careful, reliable, and in possession of a valid motor vehicle operator's license. Such a person shall also be familiar with the states vehicle and traffic laws.

(c) No matches, firearms, acids, or other corrosive liquids shall be carried in the bed or body of any vehicle containing blasting agents.

(d) No person shall be permitted to ride upon, drive, load, or unload a vehicle containing blasting agents while smoking or under the influence of intoxicants, narcotics, or other dangerous drugs.

(e) It is prohibited for any person to transport or carry any blasting agents upon any public vehicle carrying passengers for hire.

(f) Vehicles transporting blasting agents shall be in safe operating condition at all times.

(g) When offering blasting agents for transportation on public highways the packaging, marking, and labeling of containers of blasting agents shall comply with the requirements of DOT.

(h) Vehicles used for transporting blasting agents on public highways shall be placarded in accordance with DOT regulations.

(6) Use of blasting agents. Persons using blasting agents shall comply with all of the applicable provisions of WAC 296-52-493.

AMENDATORY SECTION (Amending WSR 95-07-014, filed 3/6/95, effective 4/20/95)

WAC 296-52-501 Water gel (slurry) explosives and blasting agents. (1) General provisions. Unless otherwise set forth in this section, water gels and emulsions shall be transported, stored and used in the same manner as explosives or blasting agents in accordance with the classification of the product.

(2) Types and classifications.

(a) Water gels and emulsion explosives containing a substance in itself classified as an explosive shall be classified as an explosive and manufactured, transported, stored, and used as specified for "explosives" in this section, except as noted in subsection (d) of this section.

(b) Water gels and emulsion explosives containing no substance in itself classified as an explosive and which are cap-sensitive as defined in WAC 296-52-417 under blasting agent shall be classified as an explosive and manufactured, transported, stored and used as specified for "explosives" in this section.

(c) Water gels and emulsion blasting agents containing no substance in itself classified as an explosive and which are not cap-sensitive as defined in WAC 296-52-417 under blasting agent shall be classified as blasting agents and manufactured, transported, stored, and used as specified for "blasting agents" in this section.

(d) When tests on specific formulations of water gels result in department of transportation classification as a Class B explosive, bullet-resistant magazines are not required, see WAC 296-52-453.

(3) Fixed location mixing.

(a)(i) Buildings or other facilities used for manufacturing emulsions and water gels shall be located with respect to inhabited buildings, passenger railroads and public highways, in accordance with Table H-21.

(ii) In determining the distances separating highways, railroads, and inhabited buildings from potential explosions (as prescribed in Table H-20), the sum of all masses that may propagate (i.e., lie at distances less than prescribed in Table

H-22) from either individual or combined donor masses are included. However, when the ammonium nitrate must be included, only fifty percent of its weight shall be used because of its reduced blast effects.

(b) Buildings used for the manufacture of emulsions of water gels shall conform to the requirements of this subsection.

(i) Buildings shall be of noncombustible construction or sheet metal on wood studs.

(ii) Floors in a mixing plant shall be of concrete or of other nonabsorbent materials.

(iii) Where fuel oil is used all fuel oil storage facilities shall be separated from the manufacturing plant and located in such a manner that in case of tank rupture, the oil will drain away from the manufacturing plant building.

(iv) The building shall be well ventilated. Heating units that do not depend on combustion processes, when properly designed and located, may be used in the building. All direct sources of heat shall be provided exclusively from units located outside of the mixing building.

(v) All internal-combustion engines used for electric power generation shall be located outside the mixing plant building, or shall be properly ventilated and isolated by a fire-wall. The exhaust systems on all such engines shall be located so any spark emission cannot be a hazard to any materials in or adjacent to the plant.

(c) Ingredients of emulsion and water gels shall conform to the requirements of this subsection.

(i) Ingredients in themselves classified as Class A or Class B explosives shall be stored in conformity with WAC 296-52-461.

(ii) Nitrate-water solutions may be stored in tank cars, tank trucks, or fixed tanks without quantity or distance limitations. Spills or leaks which may contaminate combustible materials shall be cleaned up immediately.

(iii) Metal powders such as aluminum shall be kept dry and shall be stored in containers or bins which are moisture-resistant or weathertight. Solid fuels shall be used in such manner as to minimize dust explosion hazards.

(iv) Ingredients shall not be stored with incompatible materials.

(v) Peroxides and chlorates shall not be used.

(d) Mixing equipment shall comply with the requirements of this subsection.

(i) The design of the processing equipment, including mixing and conveying equipment, shall be compatible with the relative sensitivity of the materials being handled. Equipment shall be designed to minimize the possibility of frictional heating, compaction, overloading, and confinement.

(ii) Both equipment and handling procedures shall be designed to prevent the introduction of foreign objects or materials.

(iii) Mixers, pumps, valves, and related equipment shall be designed to permit regular and periodic flushing, cleaning, dismantling, and inspection.

(iv) All electrical equipment including wiring, switches, controls, motors, and lights, shall conform to the requirements of chapter 296-24 WAC, Part L, and WAC 296-800-280.

(v) All electric motors and generators shall be provided with suitable overload protection devices. Electrical generators, motors, proportioning devices, and all other electrical enclosures shall be electrically bonded. The grounding conductor to all such electrical equipment shall be effectively bonded to the service-entrance ground connection and to all equipment ground connections in a manner so as to provide a continuous path to ground.

(e) Mixing facilities shall comply with the fire prevention requirements of this subsection.

(i) The mixing, loading, and ingredient transfer areas where residues or spilled materials may accumulate shall be cleaned periodically. A cleaning and collection system for dangerous residues shall be provided.

(ii) A daily visual inspection shall be made of the mixing, conveying, and electrical equipment to establish that such equipment is in good operating condition. A program of systematic maintenance shall be conducted on regular schedule.

(iii) Heaters which are not dependent on the combustion process within the heating unit may be used within the confines of processing buildings, or compartments, if provided with temperature and safety controls and located away from combustible materials and the finished product.

(4) Bulk delivery and mixing vehicles.

(a) The design of vehicles shall comply with the requirements of this subsection.

(i) Vehicles used over public highways for the bulk transportation of emulsion and water gels or of ingredients classified as dangerous commodities, shall meet the requirements of the department of transportation and shall meet the requirements of WAC 296-52-489 and 296-52-497 of this section.

(ii) When electric power is supplied by a self-contained motor generator located on the vehicle the generator shall be at a point separate from where the water gel is discharged.

(iii) The design of processing equipment and general requirements shall conform to subsection (3)(c) and (d) of this section.

(iv) A positive action parking brake which will set the wheel brakes on at least one axle shall be provided on vehicles when equipped with air brakes and shall be used during bulk delivery operations. Wheel chocks shall supplement parking brakes whenever conditions may require.

(b) Operation of bulk delivery and mixing vehicles shall comply with the requirements of this subsection.

(i) The placarding requirements contained in DOT regulations apply to vehicles carrying water gel explosives or blasting agents.

(ii) The operator shall be trained in the safe operation of the vehicle together with its mixing, conveying, and related equipment. The operator shall be familiar with the commodities being delivered and the general procedure for handling emergency situations.

(iii) The hauling of either blasting caps or other explosives, but not both, shall be permitted on bulk trucks provided that a special wood or nonferrous-lined container is installed for the explosives. Such blasting caps or other explosives shall be in DOT-specified shipping containers; see 49 CFR Chapter I.

(iv) No person shall be allowed to smoke, carry matches or any flame-producing device, or carry any firearms while in or about bulk vehicles effecting the mixing, transfer, or down-the-hole loading of water gels at or near the blasting site.

(v) Caution shall be exercised in the movement of the vehicle in the blasting area to avoid driving the vehicle on to or dragging hoses over firing lines, cap wires, or explosive materials. The employer shall furnish the driver the assistance of a second person to guide the driver's movements.

(vi) No intransit mixing of materials shall be performed.

(vii) The location chosen for water gel or ingredient transfer from a support vehicle into the bore hole loading vehicle shall be away from the blasthole site when the bore holes are loaded or in the process of being loaded.

AMENDATORY SECTION (Amending WSR 99-17-117, filed 8/18/99, effective 12/1/99)

WAC 296-54-501 Scope and application. This chapter establishes safety practices for all types of logging, log road construction and other forest activities using logging machinery and/or power saws regardless of the end use of the wood. This chapter does not apply to log handling at sawmills, plywood mills, pulp mills, or other manufacturing operations governed by specific safety standards. This chapter provides minimum safety requirements for the logging industry. The logging industry is also covered by the general safety standards, chapter 296-24 WAC; occupational health standards, chapter 296-62 WAC; the safety and health core rules, chapter 296-800 WAC; or others that may apply. Chapter 296-52 WAC, which covers the possession, handling and use of explosives, applies when explosives are used in logging operations.

AMENDATORY SECTION (Amending WSR 99-17-117, filed 8/18/99, effective 12/1/99)

WAC 296-54-507 Employer's responsibilities. The employer must comply with the requirements of all safety and health regulations and must:

- (1) Provide safety training for new employees.
- (2) Take additional precautions to ensure safe logging operations when extreme weather or other extreme conditions create hazards. If the logging operation cannot be made safe, the work must be discontinued until safe to resume.
- (3) Ensure that danger trees within reach of landings, rigging, buildings, or work areas are either fell before regular logging operations begin, or arrange work so that employees are not exposed to the related hazards.
- (4) Develop and maintain a chemical hazard communication program as required by (~~chapter 296-62 WAC, Part C~~) WAC 296-800-170. The program must provide information to all employees about hazardous chemicals or substances to which they are exposed, or may become exposed, in the course of their employment.

(5) Ensure that intoxicating beverages and narcotics are prohibited on or near the worksite. The employer must remove from the worksite any employee under the influence of alcohol or narcotics.

Note: Narcotics do not include prescription drugs taken under a doctor's direction if the use does not endanger any employee.

AMENDATORY SECTION (Amending WSR 99-17-117, filed 8/18/99, effective 12/1/99)

WAC 296-54-51120 Eye and face protection. The employer must provide, at no cost to the employee, and ensure that each employee wears:

(1) Eye protection meeting the requirements of (~~chapter 296-24 WAC, Part A-2~~) WAC 296-800-160, where there is potential for eye injury from falling or flying objects; and

(2) Face protection meeting the requirements of (~~chapter 296-24 WAC, Part A-2~~) WAC 296-800-160, where there is potential for facial injury such as, but not limited to, operating a chipper. An employee using a chain saw may use either eye or face protection.

Note: The employee does not have to wear separate eye protection when the face protection also covers the eyes.

AMENDATORY SECTION (Amending WSR 99-17-117, filed 8/18/99, effective 12/1/99)

WAC 296-54-51160 Leg protection. (1) The employer must provide, at no cost to the employee, and ensure that each employee who operates a chain saw wears leg protection constructed with cut-resistant material, such as ballistic nylon. The leg protection must cover the full length of the thigh to the top of the boot on each leg to protect against contact with a moving chain saw.

EXCEPTION: This requirement does not apply to an employee working aloft in trees when supported by climbing spurs and climbing belt, or when an employee is working from a vehicle-mounted elevating and rotating work platform meeting the requirements of chapter 296-24 WAC, Part (~~J-2~~) J-3, Vehicle-mounted elevating and rotating work platforms.

(2) Leg protection must be maintained in serviceable condition.

AMENDATORY SECTION (Amending WSR 99-17-117, filed 8/18/99, effective 12/1/99)

WAC 296-54-59340 Log unloading, booms, and rafting grounds—Dry land sorting and storage. (1) Unauthorized foot and vehicle traffic is prohibited in the sorting or storage area.

(2) Logs must be stored in a safe and orderly manner. Roadways and traffic lanes must be kept clear of protruding ends of logs and debris.

(3) Dry deck log storage areas must be kept orderly and maintained in a condition conducive to safe operation of mobile equipment. Roadways and walkways must have a smooth hard-packed surface wide enough to permit a safe operation. Bark, mud, and other debris must not be allowed to accumulate to the extent they constitute a hazard to the operation.

(4) The employer must implement an effective method to control dust at log dumps and in sorting and storage areas.

(5) Only an authorized person shall operate or ride any lift truck, log stacker, or log unloader.

(6) Signaling log unloader operators at dry deck areas by throwing bark or chips in the air is prohibited. Hand, horn signals or other safe, effective means must be used at all times.

(7) Unnecessary talking to the operator while operating controls of a log stacker or log unloader is prohibited.

(8) Lift forks and arms of unloading machines must be lowered to their lowest position, and all equipment brakes set before the operator leaves the machine unattended.

(9) Log unloaders or stackers must not be moved about the premises for distances greater than absolutely necessary with the lift extended above the driver's head or with loads lifted higher than is necessary for vision.

(10) When truck drivers are out of the cab, they must be in the clear, and in view of the log unloader before the lift forks are moved under the load and the lift is made.

(11) Where logs are offloaded onto a dry deck by unloading lines, a self-releasing mechanism must be used. Employees are prohibited from climbing dry decks to release unloading lines.

(12) Employees must not enter the hazardous area near or under loads of logs being lifted, moved, or suspended.

(13) When log unloaders and log stackers are designed so that logs being handled may jeopardize the safety of the operator, the employer must provide overhead protection and any other necessary safeguards.

(14) Log unloaders and log stackers must be equipped with a horn or other audible warning device. If vision is impaired or restricted to the rear, the warning device must be sounded before operating the vehicle in reverse gear and periodically while backing. The warning device must be operative at all times.

(15) A limit stop, which will prevent the lift arms from over-traveling, must be installed on electric powered log unloaders.

(16) Shear guards must be installed on unloading machines and similar equipment on which the arms pivot and move alongside the operator creating a pinch point at that location.

(17) All forklift log handling machines must be equipped with a grapple arms and the arms must be used whenever logs are being carried.

(18) When log trucks are loaded by a log stacker and the lay of any log is higher than the stakes, the log stacker must remain against the completed load, or other suitable protection provided, to prevent the logs from falling until at least two wrappers and binders have been applied.

(19) All binders and wrappers must remain on the load until an approved safeguard has been provided to prevent logs from rolling off the side of the truck or trailer when binders are released. A shear log, or equivalent means, must be provided to ensure the log truck will be stationed close enough to the wrapper rack so that a log cannot fall between the log truck and the wrapper rack when removing binders and wrappers. At least one binder must remain secured while relocating or tightening other binders. Crotch lines, forklifts, log stackers, log unloaders, or other effective means must be used for this purpose.

(20) An extra wrapper or metal band of equal strength must be placed to hold the logs when it is necessary to remove a wrapper to prevent it from being fouled by the unloading machine.

(21) Machines with arms that block the regular exit when in the up position must have an emergency exit installed.

(22) Riding on any part of a log handling machine except under the canopy guard is prohibited.

(23) Identification tags must not be applied or pulled unless logs are resting in a stationary place, such as bunks, cradles, skids, or sorting tables.

(24) Employees must not approach the immediate vicinity of a forklift-type log handling machine without first notifying the operator of the person's intention and receiving an acknowledgement from the operator.

(25) When dry land log dumps use unloading methods similar to those of water dumps, the safety standards for water dumps apply.

(26) When logs are handled between sunset and sunrise or other periods of poor visibility, the employer must provide illumination that meets the requirements of WAC ((296-62-09003)) 296-800-210 relating to illumination.

(27) Air operated stake releases must meet the following requirements:

(a) The air supply must be taken from the "wet" air reservoir or from the accessory air line to a spring loaded, normally closed control valve;

(b) The control valve must be located in the cab, positioned so that it is accessible only from the operator's position;

(c) The control valve must be fitted with a spring-loaded cover or otherwise guarded against inadvertent operation; and

(d) A separate air line must extend from the control valve to the tractor and trailer stake release chambers. The air line must be clearly identified or installed so that it cannot be mistaken for the service or emergency air line.

(28) Each deck must be constructed and located so it is stable and provides each employee with enough room to safely move and work in the area.

AMENDATORY SECTION (Amending WSR 99-02-024, filed 12/30/98, effective 3/30/99)

WAC 296-56-60001 Scope and applicability. (1) The rules included in this chapter apply throughout the state of Washington, to any and all waterfront operations under the jurisdiction of the department of labor and industries.

(2) These minimum requirements are promulgated in order to augment the general safety and health standards, and any other safety and health standards promulgated by the department of labor and industries which are applicable to all places of employment under the jurisdiction of the department of labor and industries. The rules of this chapter, and the rules of chapters 296-24 ((and)), 296-62 and 296-800 WAC are applicable to all longshore, stevedore and related waterfront operations: Provided, That such rules shall not be applicable to those operations under the exclusive safety jurisdiction of the federal government.

(3) The provisions of this chapter shall prevail in the event of a conflict with, or duplication of, provisions contained in chapters 296-24 (~~and~~), 296-62 and 296-800 WAC. Specific standards which are applicable include, but are not limited to:

(a) Electrical—Chapter 296-24 WAC Part L, and WAC 296-800-280.

(b) Toxic and hazardous substances are regulated by chapter 296-62 WAC. Where references to this chapter are given they are for informational purposes only. Where specific requirements of this chapter conflict with the provisions of chapter 296-62 WAC this chapter prevails. Chapter 296-62 WAC does not apply when a substance or cargo is contained within a manufacturer's original, sealed, intact means of packaging or containment complying with the department of transportation or International Maritime Organization requirements.

(c) Hearing conservation—Chapter 296-62 WAC Part K.

(d) Standards for commercial diving operations—Chapter 296-37 WAC.

(e) Safety requirements for scaffolding—Chapter 296-24 WAC Part ((J-1)) J-2.

(f) Safe practices of abrasive blasting operations—Chapter 296-24 WAC Part H-2.

(g) Access to employee exposure and medical records—Chapter 296-62 WAC Part B.

(h) Respiratory protection—Chapter 296-62 WAC Part E.

(i) Safety standards for grain handling facilities—Chapter 296-99 WAC.

(j) Chemical hazard communication (~~(purpose—Chapter 296-62 WAC Part C))~~ program—WAC 296-800-170.

(k) Asbestos—Chapters 296-62 Part I-1 and 296-65 WAC.

(l) Permit - required confined spaces and confined space—Chapter 296-62 WAC Part M.

(m) Servicing multi-piece and single-piece rim wheels—Chapter 296-24 WAC Part D.

(n) First-aid requirements—(~~Chapter 296-24 WAC Part A-1~~) WAC 296-800-150.

(o) Employee emergency plans and fire prevention plans—Chapter 296-24 WAC Part G-1.

(4) The provisions of this chapter do not apply to the following:

(a) Fully automated bulk coal handling facilities contiguous to electrical power generating plants.

(b) Facilities subject to the regulations of the office of pipeline safety regulation of the materials transportation bureau, department of transportation, to the extent such regulations apply.

(5) WAC 296-62-074 shall apply to the exposure of every employee to cadmium in every employment and place of employment covered by chapter 296-56 WAC in lieu of any different standard on exposures to cadmium that would otherwise be applicable by virtue of those sections.

AMENDATORY SECTION (Amending WSR 99-02-024, filed 12/30/98, effective 3/30/99)

WAC 296-56-60009 Accident prevention program.

(1) An accident prevention program, which provides equitable management-employee participation, shall be established in all establishments, industrial plants, or operations.

(2) It shall be the responsibility of the employer to initiate and maintain the accident prevention program necessary to comply with this section. The division of WISHA services may be contacted for assistance in initiating and maintaining an effective accident prevention program.

(3) All accident prevention programs shall be tailored to the needs of the particular operation.

(4) Employer and employee representatives, as elected, delegated or appointed, shall attend and actively take part in frequent and regular safety committee meetings.

(5) Accident prevention programs shall provide for employer-employee safety meetings and frequent and regular safety inspections of job sites, materials, equipment, and operating procedures.

(6) A record of safety activities, such as inspections and meetings, shall be maintained by the employer for a period covering the previous twelve months and shall be made available, upon request, to noncompliance personnel of the department of labor and industries.

(7) Employees shall individually comply with all safety rules and cooperate with management in carrying out the accident prevention program.

(8) To make effective the preceding statement and promote on-the-job accident prevention, committees shall be established in each port. These committees shall consist of an equal number of port or stevedore company and longshoremen representatives at the job level with the industry or company safety supervisor serving as secretary and coordinator. Some functions of the committee are to maintain the interest of the workers in accident prevention by providing for their actual participation in the program, to direct their attention to the real causes of accidents, and to provide a means for making practical use of their intimate knowledge of working conditions and practices.

(9) It is intended that this program will produce mutually practical and effective recommendations regarding correction of accident-producing circumstances and conditions.

Note: For first aid requirements, see (~~chapter 296-24 WAC Part A-1~~) WAC 296-800-150.

Note: For emergency plan and fire prevention plan requirements, see chapter 296-24 WAC Part G-1.

AMENDATORY SECTION (Amending WSR 95-04-007, filed 1/18/95, effective 3/1/95)

WAC 296-56-60003 Variance and procedure. Conditions may exist under which certain state standards will not have practical application. In these cases, the director of the department of labor and industries has made provisions for the issuance of variances. The director or his/her authorized representative may, pursuant to this section, RCW 49.17.080 and 49.17.090, and WAC (~~(296-350-200 through 296-350-270)~~) 296-350-700, upon receipt of application and after

investigation by the department, permit a variation from the requirements of this chapter. Any variance is limited to the particular case and application. It shall remain posted during the time which it is in effect. Variance application forms may be obtained from the department.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-001 Foreword. (1) This vertical standard is promulgated in accordance with applicable provisions of the Washington State Administrative Procedure Act, chapter 34.04 RCW, and the Washington Industrial Safety and Health Act, chapter 49.17 RCW.

(2) The requirements of this chapter shall be applied through the department of labor and industries, division of industrial safety and health, in accordance with administrative procedures provided for in chapter 49.17 RCW, and chapters 296-27, 296-350, ~~((and))~~ 296-360, and 296-800 WAC.

AMENDATORY SECTION (Amending WSR 94-16-145, filed 8/3/94, effective 9/12/94)

WAC 296-59-005 Incorporation of other standards.

(1) Lifts and tows shall be designed, installed, operated, and maintained in accordance with American National Standard Institute (ANSI) B77.1-1982, Standards for Passenger Tramways—Aerial Tramways and Lifts, Surface Lifts, and Tows—Safety Requirements.

(2) Future revised editions of ANSI B77.1-1982 may be used for new installations or major modifications of existing installations, as recommended or approved by the equipment manufacturer or a qualified design engineer, except that, where specific provisions exist, variances shall be requested from the department.

(3) Commercial explosives shall be transported, stored, and used in compliance with chapter 296-52 WAC, Safety standards for the possession and handling of explosives, and chapter 70.74 RCW, Washington State Explosives Act, except that avalanche control blasting shall comply with the special provisions of this chapter.

(4) The use of military type weapons for avalanche control shall comply with all requirements of the United States government and/or the military branch having jurisdiction. Compliance shall include qualification of employees, security requirements, and storage and handling of ammunition.

(5) The employer shall develop and maintain a chemical hazard communication program as required by ~~((chapter 296-62 WAC, Part C))~~ WAC 296-800-170, which will provide information to all employees relative to hazardous chemicals or substances to which they are exposed, or may become exposed, in the course of their employment.

(6) When employees perform activities such as construction work or logging, the WAC chapter governing the specific activity shall apply, e.g., chapter 296-155 or 296-54 WAC, et seq.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-010 Safe place standards. The safe place requirements of the ~~((general))~~ safety and health ~~((standards, WAC 296-24-073))~~ core rules, WAC 296-800-110, shall be applicable within the scope of chapter 296-59 WAC.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-020 Management's responsibility. The ~~(("management's responsibility"))~~ "safe work environment" section of the ~~((general))~~ safety and health ~~((standards))~~ core rules, WAC ((296-24-020)) 296-800-110, shall be applicable within the scope of chapter 296-59 WAC.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-025 Employee's responsibility. The ~~(("employee's responsibility"))~~ "employee responsibilities" section of the ~~((general))~~ safety and health ~~((standards, WAC 296-24-025))~~ core rules, WAC 296-800-120, shall be applicable within the scope of chapter 296-59 WAC.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-030 Safety bulletin board. The "safety bulletin board" requirements of the ~~((general))~~ safety and health ~~((standards))~~ core rules, WAC ((296-25-055)) 296-800-190, shall be applicable within the scope of chapter 296-59 WAC.

AMENDATORY SECTION (Amending WSR 00-01-038, filed 12/7/99, effective 2/1/00)

WAC 296-59-035 First-aid. The first-aid provisions of ~~((chapter 296-24 WAC, Part A-1 of))~~ the ~~((general))~~ safety and health ~~((standards))~~ core rules, WAC 296-800-150 apply within the scope of chapter 296-59 WAC.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-050 Personal protective equipment, general requirements. (1) Application.

(a) Protective equipment, including personal protective equipment for eyes, face, head, and extremities, protective clothing, respiratory devices, and protective shields and barriers, shall be provided, used, and maintained in a sanitary and reliable condition wherever it is indicated by reason of hazards of processes or environment, chemical hazards, radiological hazards, or mechanical irritants encountered in a manner capable of causing injury or impairment in the function of any part of the body through absorption, inhalation, or physical contact.

(b) Employee-owned equipment. Where employees provide their own protective equipment, the employer shall be

PERMANENT

responsible to assure its adequacy, including proper maintenance, and sanitation of such equipment.

(c) Design, construction, testing, and use of personal protective equipment shall comply with the requirements of the ((General)) safety and health ((standards, chapter 296-24)) core rules, WAC 296-800-160; the Occupational health standards—Safety standards for carcinogens, chapter 296-62 WAC; or the currently applicable ANSI standard.

(2) Eye and face protection. Eye and face protective equipment shall be provided and worn where there is exposure in the work process or environment to hazard of injury, which can be prevented by such equipment.

(3) Occupational head protection. Employees working in areas where there is a possible danger of head injury from impact, or from falling or flying objects, or from electrical shock and burns, shall be protected by protective helmets, i.e., a lift operator would not be required to use a hardhat while operating the lift. However, if that same person is assisting with maintenance operations and is working under a tower where overhead work is being done, that operator would now be required to wear an approved helmet.

(a) Helmets for the protection of employees against impact and/or penetration of falling and flying objects shall meet the specifications contained in American National Standards Institute, Z89.1-1986, Safety Requirements for Industrial Head Protection.

(b) Helmets for the head protection of employees exposed to high voltage electrical shock and burns shall meet the specifications contained in American National Standards Institute, Z89.2-1971, Safety Requirements for Industrial Protective Helmets for Electrical Workers, Class B.

(c) Approved head protection shall be worn by operators of snowmobiles and other mobile oversnow equipment which is not equipped with a rigid metal operator's cab.

(4) Occupational foot protection.

(a) Substantial footwear appropriate for the work conditions encountered shall be worn by all employees.

(b) Where the job assignment includes exposure to slipping hazards, soles and heels of footwear shall be of such material and design as to reduce the hazard of slipping.

(5) Safety belts, lifelines, lanyards, and nets.

(a) Safety belts, lifelines, and lanyards which meet the requirements of ANSI A10.14 shall be provided and used whenever employees are working in locations which expose them to a fall of more than ten feet. The particular work location and application shall dictate which type of belt or harness and length of lanyard is used.

(b) Lifelines shall be secured to an anchorage or structural member capable of supporting a minimum dead weight of five thousand four hundred pounds.

(c) Lifelines used on rock scaling applications or in areas where the lifeline may be subjected to cutting or abrasion shall be a minimum of seven-eighths inch wire core manila rope or equivalent. For all other lifeline applications, three-fourths inch manila rope or equivalent with a minimum break strength of five thousand four hundred pounds may be used.

(d) Each safety belt lanyard shall be a minimum of one-half inch nylon, or equivalent, with a minimum of five thousand four hundred pounds breaking strength.

(e) Employees will not be required to wear a safety belt and lanyard while riding on a standard lift chair while seated in the normal riding position.

(f) Safety nets meeting the requirements of ANSI A10.11 shall be used when other acceptable forms of fall protection are not useable. When used, safety nets shall extend a minimum of eight feet beyond the edge offering exposure, shall be hung with sufficient clearance to prevent user's contact with surfaces or objects below, and shall not be more than twenty-five feet below the fall exposure edge.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-065 Fire protection and ignition sources. The requirements of WAC 296-24-585 and 296-800-300, et seq., relating to fire protection requirements, shall be applicable within the scope of chapter 296-59 WAC.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-070 Illumination. (1) Sufficient illumination required. All areas shall be sufficiently illuminated in order that persons in the area can safely perform their assigned duties. The recommended levels of illumination specified in ((chapter 296-62 WAC, general occupational health standards)) the safety and health core rules, WAC 296-800-210, shall be followed. When areas are not specifically referred to in chapter ((296-62)) 296-800 WAC and the adequacy of illumination for the area or task performed is questionable, a determination of the amount of illumination needed may be made by the division of industrial safety and health.

(2) Emergency or secondary lighting system required.

(a) There shall be an emergency or secondary lighting system which can be actuated immediately upon failure of the normal power supply system. The emergency or secondary lighting system shall provide illumination in the following areas:

(i) Wherever it is necessary for workers to remain at their machine or station to shut down equipment in case of power failure;

(ii) At stairways and passageways or aiseways used by workers as an emergency exit in case of power failure;

(iii) In all plant first-aid and/or medical facilities;

(iv) In emergency power and control room, i.e., in emergency generator rooms unless arranged to start automatically in the event of power failure, or on ski lift motor drive rooms where it would be necessary for employees to switch on the emergency drive system during night skiing.

(b) Emergency lighting facilities shall be checked at least every thirty days for mechanical defects. Defective equipment shall be given priority for repair schedule.

(3) Extension cord type lights. All extension cord type lights shall be provided with proper guards.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-59-085 Scaffolds, construction, use, and maintenance. (1) Whenever work must be performed at a height which cannot be reached from the floor or permanent platform and where it would not be a safe practice to use a ladder, a properly constructed scaffold shall be provided and used.

(2) Scaffolds shall be constructed and used in compliance with WAC ((296-24-825 through 296-24-84013)) 296-24-860 through 296-24-862.

AMENDATORY SECTION (Amending Order 88-11, filed 7/6/88)

WAC 296-62-054 ~~Manufacturers, importers and distributors—Hazard communication~~ ((purpose)). ((1) The purpose of this section is to ensure that the hazards of all chemicals produced or imported are evaluated, and that information concerning their hazards is transmitted to employers and employees. This transmittal of information is to be accomplished by means of comprehensive hazard communication programs, which are to include container labeling and other forms of warning, material safety data sheets and employee training.

(2) ~~This occupational safety and health standard is intended to address comprehensively the issue of evaluating the potential hazards of chemicals, and communicating information concerning hazards and appropriate protective measures to employees. Evaluating the potential hazards of chemicals, and communicating information concerning hazards and appropriate protective measures to employees, may include, for example, but is not limited to, provisions for: Developing and maintaining a written hazard communication program for the workplace, including lists of hazardous chemicals present; labeling of containers of chemicals in the workplace, as well as of containers of chemicals being shipped to other workplaces; preparation and distribution of material safety data sheets to employees and downstream employers; and development and implementation of employee training programs regarding hazards of chemicals and protective measures.)~~ **Your responsibility:** To ensure that the hazards of all chemicals produced or imported are evaluated and that information concerning their hazards is given to employers and employees.

Note:

- If you have employees exposed to the chemicals you produce, import or distribute, you must comply with "Chemical hazard communication rule" WAC 296-800-170.
- If you are an employer who relies on a material safety data sheet from the manufacturer, importer or distributor and you distribute or produce hazardous chemicals, you do not have to comply with this rule.

You must:

- Determine whether the chemicals you produce in your workplace or import are hazardous. WAC 296-62-05402
- Use this criteria in making hazard determinations. WAC 296-62-05404
- Determine whether the chemicals you produce or import are health hazards. WAC 296-62-05406

- Obtain or develop a material safety data sheet for each hazardous chemical you produce or import. WAC 296-62-05408

- Label clearly each container of hazardous chemicals that leaves your workplace. WAC 296-62-05410

- Provide material safety data sheets. WAC 296-62-05412

Application of this standard:

The Manufacturers, Importers, and Distributors Hazardous Communication Rule DOES NOT APPLY to:

- Any hazardous waste as such term is defined by the Hazardous Waste Management Act chapter 70.105 RCW, when subject to regulations issued under that act by the department of ecology that describes specific safety, labeling, personnel training and other standards for the accumulation, handling and management of hazardous waste;

- Any hazardous waste as such term is defined by the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6901 et seq.), when subject to regulations issued under that act by the Environmental Protection Agency;

- Any hazardous substance as such term is defined by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601 et seq.), when the hazardous substance is the focus of remedial or removal action being conducted under CERCLA in accordance with Environmental Protection Agency regulations;

- Tobacco or tobacco products;

- Wood or wood products, including lumber that will not be processed, where the chemical manufacturer or importer can establish that the only hazard they pose to the employees is the potential for flammability or combustibility (wood or wood products that have been treated with hazardous chemicals covered by this standard, and wood that may be subsequently sawed or cut, generating dust, are not exempted);

- Articles are manufactured items other than a fluid or particle:

- That are formed to a specific shape or design during manufacture;

- That have end use function(s) dependent in whole or in part upon their shape or design during end use; and

- That under normal conditions of use do not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under the hazard determination section of this rule), and do not pose a physical hazard or health risk to employees.

- Food or alcoholic beverages that are sold, used, or prepared in a retail establishment (such as grocery store, restaurant, or drinking place), and foods intended for personal consumption by employees while in the workplace;

- Any drug, as that term is defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), when it is in solid, final form for direct administration to the patient (e.g., tablets or pills); drugs that are packaged by the chemical manufacturer for sale to consumers in a retail establishment (e.g., over-the-counter drugs); and drugs intended for personal consumption by employees while in the workplace (e.g., first aid supplies);

• Cosmetics that are packaged for sale to consumers in a retail establishment, and cosmetics intended for personal consumption by employees while in the workplace;

• Any consumer product or hazardous substance, as those terms are defined in the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) and Federal Hazardous Substance Act (15 U.S.C. 1261 et seq.) respectively, where the employer can show that it is used in the workplace for the purpose intended by the chemical manufacturer or importer of the product, and the use results in a duration and frequency of exposure that is not greater than the range of exposures that could reasonably be experienced by consumers when used for the purpose intended;

- Ionizing and nonionizing radiation; and
- Biological hazards.

Article means a manufactured item other than a fluid or particle:

- Which is formed to a specific shape or design during manufacture;
- Which has end use function(s) dependent in whole or in part upon its shape or design during end use; and
- Which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under WAC 296-62-05407), and does not pose a physical hazard or health risk to employees.

Director means the director of the department of labor and industries or his/her designee.

Chemical means any element, chemical compound or mixture of elements and/or compounds.

Chemical manufacturer means an employer with a workplace where chemical(s) are produced for use or distribution.

Chemical name means the scientific designation of a chemical in accordance with the nomenclature system developed by the International Union of Pure and Applied Chemistry (IUPAC) or the Chemical Abstracts Service (CAS) rules of nomenclature, or a name which will clearly identify the chemical for the purpose of conducting a hazard evaluation.

Common name means any designation or identification such as code name, code number, trade name, brand name or generic name used to identify a chemical other than by its chemical name.

Designated representative means any individual or organization to whom an employee gives written authorization to exercise such employee's rights under this section. A recognized or certified collective bargaining agent shall be treated automatically as a designated representative without regard to written employee authorization.

Employee means an employee of an employer who is employed in the business of his or her employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is personal labor for an employer under this standard whether by way of manual labor or otherwise. However, for the purposes of this part, employee shall not mean immediate family members of the officers of any corporation, partnership, sole proprietorship, or other business entity or officers of any closely held corporation engaged in agricultural production of crops or livestock. This part applies to employees who may be

exposed to hazardous chemicals under normal operating conditions or in foreseeable emergencies.

Employer means any person, firm, corporation, partnership, business trust, legal representative, or other business entity that engages in any business, industry, profession, or activity in this state and employs one or more employees or who contract with one or more persons, the essence of which is the personal labor of such person or persons and includes the state, counties, cities, and all municipal corporations, public corporations, political subdivisions of the state, and charitable organizations. This part applies to employers engaged in a business where chemicals are either used, distributed, or are produced for use or distribution, including a contractor or subcontractor.

Exposure or exposed means that an employee is/was subjected to a hazardous chemical in the course of employment through any route of entry (inhalation, ingestion, skin contact or absorption, etc.), and includes potential (e.g., accidental or possible) exposure.

Foreseeable emergency means any potential occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which could result in an uncontrolled release of a hazardous chemical into the workplace.

Hazardous chemical means any chemical which is a physical hazard or a health hazard.

Identity means any chemical or common name which is indicated on the material safety data sheet (MSDS) for the chemical. The identity used shall permit cross-references to be made among the required list of hazardous chemicals, the label and the MSDS.

Importer means the first business within the Customs Territory of the United States which receives hazardous chemicals produced in other countries, for the purpose of supplying them to distributors or employers within the United States. This definition is the same as Webster's, therefore we did not include it in the definitions.

Material safety data sheet (MSDS) means written or printed material concerning a hazardous chemical which is prepared in accordance with WAC 296-62-05408.

Mixture means any combination of two or more chemicals if the combination is not, in whole or in part, the result of a chemical reaction.

Novelty and prior art. A trade secret may be a device or process which is patentable; but it need not be that. It may be a device or process which is clearly anticipated in the prior art or one which is merely a mechanical improvement that a good mechanic can make. Novelty and invention are not requisite for a trade secret as they are for patentability. These requirements are essential to patentability because a patent protects against unlicensed use of the patented device or process even by one who discovers it properly through independent research. The patent monopoly is a reward to the inventor. But such is not the case with a trade secret. Its protection is not based on a policy of rewarding or otherwise encouraging the development of secret processes or devices. The protection is merely against breach of faith and reprehensible means of learning another's secret. For this limited protection it is not appropriate to require also the kind of novelty and

invention which is a requisite of patentability. The nature of the secret is, however, an important factor in determining the kind of relief that is appropriate against one who is subject to liability under the rule stated in this section. Thus, if the secret consists of a device or process which is a novel invention, one who acquires the secret wrongfully is ordinarily enjoined from further use of it and is required to account for the profits derived from his past use. If, on the other hand, the secret consists of mechanical improvements that a good mechanic can make without resort to the secret, the wrongdoer's liability may be limited to damages, and an injunction against future use of the improvements made with the aid of the secret may be inappropriate.

Secrecy. The subject matter of a trade secret must be secret. Matters of public knowledge or of general knowledge in an industry cannot be appropriated by one as his secret. Matters which are completely disclosed by the goods which one markets cannot be his secret. Substantially, a trade secret is known only in the particular business in which it is used. It is not requisite that only the proprietor of the business know it. He may, without losing his protection, communicate it to employees involved in its use. He may likewise communicate it to others pledged to secrecy. Others may also know of it independently, as, for example, when they have discovered the process or formula by independent invention and are keeping it secret. Nevertheless, a substantial element of secrecy must exist, so that, except by the use of improper means, there would be difficulty in acquiring the information. An exact definition of a trade secret is not possible. Some factors to be considered in determining whether given information is one's trade secret are:

The extent to which the information is known outside of his business;

The extent to which it is known by employees and others involved in his business;

The extent of measures taken by him to guard the secrecy of the information;

The value of the information to him and his competitors;

The amount of effort or money expended by him in developing the information;

The ease or difficulty with which the information could be properly acquired or duplicated by others.

Specific chemical identity means the chemical name, Chemical Abstracts Service (CAS) registry number, or any other information that reveals the precise chemical designation of the substance.

Trade secret means any confidential formula, pattern, process, device, information or compilation of information that is used in an employer's business, and that gives the employer an opportunity to obtain an advantage over competitors who do not know or use it. WAC 296-62-05225 provides a legal definition of trade secret and this rule sets out the criteria to be used in evaluating trade secrets.

Use means to package, handle, react, emit, extract, generate as a by-product, or transfer.

Workplace means an establishment, job site, or project, at one geographical location containing one or more work areas.

NEW SECTION

WAC 296-62-05402 Determine whether the chemicals you produce in your workplace or import are hazardous. Chemical manufacturers and importers must evaluate chemicals produced in their workplaces or imported by them to determine if they are hazardous.

Chemical manufacturers, importers or employers evaluating chemicals must identify and consider the available scientific evidence concerning physical and health hazards. For health hazards, evidence that is statistically significant and that is based on at least one positive study conducted in accordance with established scientific principles is considered to be sufficient to establish a hazardous effect if the results of the study meet the definitions of health hazards in this part. WAC 296-62-05406 must be consulted for the scope of health hazards covered, and WAC 296-62-05404 must be consulted for the criteria to be followed with respect to the completeness of the evaluation, and the data to be reported.

The chemical manufacturer, importer or employer evaluating chemicals must treat the following sources as establishing that the chemicals listed in them are hazardous:

- Chapter 296-62 WAC, General occupational health standards;
- 29 C.F.R. Part 1910, Subpart Z, Toxic and Hazardous Substances, Occupational Safety and Health Administration (OSHA); or
- *Threshold Limit Values for Chemical Substances and Physical Agents in the Work Environment*, American Conference of Governmental Industrial Hygienists (ACGIH) (latest edition).
- The chemical manufacturer, importer, or employer is responsible for evaluating the hazards associated with the chemicals in these source lists in accordance with this requirement of the standard.

Chemical manufacturers, importers and employers evaluating chemicals must treat the following sources as establishing that a chemical is a carcinogen or potential carcinogen for hazard communication purposes:

- National Toxicology Program (NTP), Annual Report on Carcinogens (latest edition);
- International Agency for Research on Cancer (IARC) Monographs (latest editions);
- Chapter 296-62 WAC, General occupational health standards; or
- 29 C.F.R. Part 1910, Subpart Z, Toxic and Hazardous Substances, Occupational Safety and Health Administration.

Note: *The Registry of Toxic Effects of Chemical Substances* published by the National Institute for Occupational Safety and Health indicates whether a chemical has been found by NTP or IARC to be a potential carcinogen.

The chemical manufacturer, importer or employer must determine the hazards of mixtures of chemicals as follows:

- If a mixture has been tested as a whole to determine its hazards, the results of such testing must be used to determine whether the mixture is hazardous;
- If a mixture has not been tested as a whole to determine whether the mixture is a health hazard, the mixture must be assumed to present the same health hazards as do the compo-

nents that comprise one percent (by weight or volume) or greater of the mixture, except that the mixture must be assumed to present a carcinogenic hazard if it contains a component in concentrations of 0.1 percent or greater that is considered to be a carcinogen;

- If a mixture has not been tested as a whole to determine whether the mixture is a physical hazard, the chemical manufacturer, importer, or employer may use whatever scientifically valid data is available to evaluate the physical hazard potential of the mixture; and

- If the chemical manufacturer, importer, or employer has evidence to indicate that a component present in the mixture in concentrations of less than one percent (or in the case of carcinogens, less than 0.1 percent) could be released in concentrations that would exceed an established WISHA or OSHA permissible exposure limit or ACGIH threshold limit value, or could present a health risk to employees in those concentrations, the mixture must be assumed to present the same hazard.

Chemical manufacturers, importers, or employers evaluating chemicals must describe in writing the procedures they use to determine the hazards of the chemical they evaluate. The written procedures are to be made available, upon request, to employees, their designated representatives, the director or his/her designee and the National Institute of Occupational Safety and Health (NIOSH). The written description may be incorporated into the written hazard communication program required under WAC 296-800-17005.

NEW SECTION

WAC 296-62-05404 Use these criteria in making hazard determinations. The hazard determination requirement of this standard is performance-oriented. Chemical manufacturers, importers, and employers evaluating chemicals are not required to follow any specific methods for determining hazards, but they must be able to demonstrate that they have adequately ascertained the hazards of the chemicals produced or imported in accordance with the criteria set forth in this rule.

Hazard evaluation is a process that relies heavily on the professional judgment of the evaluator, particularly in the area of chronic hazards. The performance-orientation of the hazard determination does not diminish the duty of the chemical manufacturer, importer or employer to conduct a thorough evaluation, examining all relevant data and producing a scientifically defensible evaluation. For purposes of this standard, the following criteria shall be used in making hazard determinations that meet the requirements of this rule.

- **Carcinogenicity:** A determination by the National Toxicology Program, the International Agency for Research on Cancer, WISHA or OSHA that a chemical is a carcinogen or potential carcinogen will be considered conclusive evidence for purposes of this part. In addition, however, all available scientific data on carcinogenicity must be evaluated in accordance with the provisions of the requirements of this rule.

- **Human data:** Where available, epidemiological studies and case reports of adverse health effects shall be considered in the evaluation.

- **Animal data:** Human evidence of health effects in exposed populations is generally not available for the major-

ity of chemicals produced or used in the workplace. Therefore, the available results of toxicological testing in animal populations shall be used to predict the health effects that may be experienced by exposed workers. In particular, the definitions of certain acute hazards refer to specific animal testing results.

- **Adequacy and reporting of data.** The results of any studies that are designed and conducted according to established scientific principles, and that report statistically significant conclusions regarding the health effects of a chemical, shall be a sufficient basis for a hazard determination and reported on any material safety data sheet. In vitro studies alone generally do not form the basis for a definitive finding of a hazard under the hazard communication standard since they have a positive or negative result rather than a statistically significant finding.

The chemical manufacturer, importer, or employer may also report the results of other scientifically valid studies that tend to refute the findings of hazard.

NEW SECTION

WAC 296-62-05406 Determine whether the chemicals you produce or import are health hazards. Although safety hazards related to the physical characteristics of a chemical can be objectively defined in terms of testing requirements (e.g., flammability), health hazard definitions are less precise and more subjective. Health hazards may cause measurable changes in the body — such as decreased pulmonary function. These changes are generally indicated by the occurrence of signs and symptoms in the exposed employees — such as shortness of breath, a nonmeasurable, subjective feeling. Employees exposed to such hazards must be apprised of both the change in body function and the signs and symptoms that may occur to signal that change.

The determination of occupational health hazards is complicated by the fact that many of the effects or signs and symptoms occur commonly in nonoccupationally exposed populations, so that effects of exposure are difficult to separate from normally occurring illnesses. Occasionally, a substance causes an effect that is rarely seen in the population at large, such as angiosarcomas caused by vinyl chloride exposure, thus making it easier to ascertain that the occupational exposure was the primary causative factor. More often, however, the effects are common, such as lung cancer. The situation is further complicated by the fact that most chemicals have not been adequately tested to determine their health hazard potential, and data do not exist to substantiate these effects.

There have been many attempts to categorize effects and to define them in various ways. Generally, the terms "acute" and "chronic" are used to delineate between effects on the basis of severity or duration. "Acute" effects usually occur rapidly as a result of short-term exposures, and are of short duration. "Chronic" effects generally occur as a result of long-term exposure, and are of long duration.

The acute effects referred to most frequently are those defined by the American National Standards Institute (ANSI) standard for Precautionary Labeling of Hazardous Industrial Chemicals (Z129.1-1988) — irritation, corrosivity, sensitiza-

tion and lethal dose. Although these are important health effects, they do not adequately cover the considerable range of acute effects that may occur as a result of occupational exposure, such as, for example, narcosis.

Similarly, the term chronic effect is often used to cover only carcinogenicity, teratogenicity, and mutagenicity. These effects are obviously a concern in the workplace, but again, do not adequately cover the area of chronic effects, excluding, for example, blood dyscrasias (such as anemia), chronic bronchitis and liver atrophy.

The goal of defining precisely, in measurable terms, every possible health effect that may occur in the workplace as a result of chemical exposures cannot realistically be accomplished. This does not negate the need for employees to be informed of such effects and protected from them.

WAC 296-62-05404 outlines the principles and procedures of hazard assessment.

For purposes of this part, any chemicals that meet any of the following definitions, as determined by the criteria set forth in WAC 296-62-05404, are health hazards. However, this is not intended to be an exclusive categorization scheme. If there are available scientific data that involve other animal species or test methods, they must also be evaluated to determine the applicability of the hazard communication rule.

- **Carcinogen:** A chemical is considered to be a carcinogen if:

- ◆ It has been evaluated by the International Agency for Research on Cancer (IARC), and found to be a carcinogen or potential carcinogen; or

- ◆ It is listed as a carcinogen or potential carcinogen in the Annual Report on Carcinogens published by the National Toxicology Program (NTP) (latest edition); or

- ◆ It is regulated by WISHA as a carcinogen.

- **Corrosive:** A chemical that causes visible destruction of, or irreversible alterations in, living tissue by chemical action at the site of contact. For example, a chemical is considered to be corrosive if, when tested on the intact skin of albino rabbits by the method described by the U.S. Department of Transportation in Appendix A to 49 C.F.R. Part 173, it destroys or changes irreversibly the structure of the tissue at the site of contact following an exposure period of four hours. This term must not refer to action on inanimate surfaces.

- **Highly toxic:** A chemical falling within any of the following categories:

- ◆ A chemical that has a median lethal dose (LD₅₀) of 50 milligrams or less per kilogram of body weight when administered orally to albino rats weighing between 200 and 300 grams each.

- ◆ A chemical that has a median lethal dose (LD₅₀) of 200 milligrams or less per kilogram of body weight when administered by continuous contact for 24 hours (or less if death occurs within 24 hours) with the bare skin of albino rabbits weighing between two and three kilograms each.

- ◆ A chemical that has a median lethal concentration (LC₅₀) in air of 200 parts per million by volume or less of gas or vapor, or 2 milligrams per liter or less of mist, fume, or dust, when administered by continuous inhalation for one hour (or less if death occurs within one hour) to albino rats weighing between 200 and 300 grams each.

- **Irritant:** A chemical, which is not corrosive, but that causes a reversible inflammatory effect on living tissue by chemical action at the site of contact. A chemical is a skin irritant if, when tested on the intact skin of albino rabbits by the methods of 16 C.F.R. 1500.41 for four hours exposure or by other appropriate techniques, it results in an empirical score of five or more. A chemical is an eye irritant if so determined under the procedure listed in 16 C.F.R. 1500.42 or other appropriate techniques.

- **Sensitizer:** A chemical that causes a substantial proportion of exposed people or animals to develop an allergic reaction in normal tissue after repeated exposure to the chemical.

- **Toxic:** A chemical falling within any of the following categories:

- ◆ A chemical that has a median lethal dose (LD₅₀) of more than 50 milligrams per kilogram but not more than 500 milligrams per kilogram of body weight when administered orally to albino rats weighing between 200 and 300 grams each.

- ◆ A chemical that has a median lethal dose (LD₅₀) of more than 200 milligrams per kilogram but not more than 1,000 milligrams per kilogram of body weight when administered by continuous contact for 24 hours (or less if death occurs within 24 hours) with the bare skin of albino rabbits weighing between two and three kilograms each.

- ◆ A chemical that has a median lethal concentration (LC₅₀) in air of more than 200 parts per million but not more than 2,000 parts per million by volume of gas or vapor, or more than two milligrams per liter but not more than 20 milligrams per liter of mist, fume, or dust, when administered by continuous inhalation for one hour (or less if death occurs within one hour) to albino rats weighing between 200 and 300 grams each.

- **Target organ effects:** The following is a target organ categorization of effects that may occur, including examples of signs and symptoms and chemicals that have been found to cause such effects. These examples are presented to illustrate the range and diversity of effects and hazards found in the workplace, and the broad scope employers must consider in this area, but are not intended to be all-inclusive.

- | | | |
|-----|-------------------|---|
| (a) | Hepatotoxins: | Chemicals that produce liver damage. |
| | Signs & symptoms: | Jaundice, liver enlargement. |
| | Chemicals: | Carbon tetrachloride, nitrosamines. |
| (b) | Nephrotoxins: | Chemicals that produce kidney damage. |
| | Signs & symptoms: | Edema; proteinuria. |
| | Chemicals: | Halogenated hydrocarbons; uranium. |
| (c) | Neurotoxins: | Chemicals that produce their primary toxic effects on the nervous system. |

PERMANENT

PERMANENT

- Signs & symptoms: Narcosis; behavioral changes; decrease in motor functions.
- Chemicals: Mercury, carbon disulfide.
- (d) Agents that act on the blood or hemato-poietic system: Decrease hemoglobin function; deprive the body of oxygen.
- Signs & symptoms: Cyanosis; loss of consciousness.
- Chemicals: Carbon monoxide; cyanides.
- (e) Agents that damage the lung: Chemicals that irritate or damage the pulmonary tissue.
- Signs & symptoms: Cough; tightness in chest; shortness of breath.
- Chemicals: Silica; asbestos.
- (f) Reproductive toxins: Chemicals that affect the reproductive capabilities including chromosomal damage (mutations) and effects on fetuses (teratogenesis).
- Signs & symptoms: Birth defects; sterility.
- Chemicals: Lead; DBCP.
- (g) Cutaneous hazards: Chemicals that affect the dermal layer of the body.
- Signs & symptoms: Defatting of the skin; rashes; irritation.
- Chemicals: Ketones; chlorinated compounds.
- (h) Eye hazards: Chemicals that affect the eye or visual capacity.
- Signs & symptoms: Conjunctivitis; corneal damage.
- Chemicals: Organic solvents; acids.

NEW SECTION

WAC 296-62-05408 Obtain or develop a material safety data sheet for each hazardous chemical you produce or import. Chemical manufacturers and importers must obtain or develop a material safety data sheet (MSDS) for each hazardous chemical they produce or import.

Each material safety data sheet must be in English (although the employer may maintain copies in other languages) and must contain at least the following information:

- The identity used on the label, and, except as provided for in the trade secrets rule, WAC 296-62-053:
- ◆ If the hazardous chemical is a single substance, its chemical and common name(s);
- ◆ If the hazardous chemical is a mixture that has been tested as a whole to determine its hazards, the chemical and

common name(s) of the ingredients that contribute to these known hazards, and the common name(s) of the mixture itself; or

◆ If the hazardous chemical is a mixture that has not been tested as a whole:

(A) The chemical and common name(s) of all ingredients that have been determined to be health hazards, and that comprise 1% or greater of the composition, except that chemicals identified as carcinogens under "*Determine whether the chemicals you produce in your workplace or import are hazardous.*" section in "Manufactures, importers and distributors, chemical hazard communication," WAC 296-62-05401, shall be listed if the concentrations are 0.1% or greater; and

(B) The chemical and common name(s) of all ingredients that have been determined to be health hazards, and that comprise less than one percent (0.1% for carcinogens) of the mixture, if there is evidence that the ingredient(s) could be released from the mixture in concentrations that would exceed an established WISHA or OSHA permissible exposure limit or ACGIH threshold limit value, or could present a health risk to employees; and

(C) The chemical and common name(s) of all ingredients that have been determined to present a physical hazard when present in the mixture;

- Physical and chemical characteristics of the hazardous chemical (such as vapor pressure, flash point);
- The physical hazards of the hazardous chemical, including the potential for fire, explosion, and reactivity;
- The acute and chronic health hazards of the hazardous chemical, including signs and symptoms of exposure, and any medical conditions that are generally recognized as being aggravated by exposure to the chemical;
- The primary route(s) of entry;
- The WISHA or OSHA permissible exposure limit, ACGIH threshold limit value, and any other exposure limit used or recommended by the chemical manufacturer, importer, or employer preparing the material safety data sheet (the PELs and TLVs include the 8-hour TWA, STEL, ceiling value and skin notation where available);
- Whether the hazardous chemical is listed in the National Toxicology Program (NTP) Annual Report on Carcinogens (latest edition) or has been found to be a potential carcinogen in the International Agency for Research on Cancer (IARC) Monographs (latest editions), or by WISHA or OSHA;
- Any generally applicable precautions for safe handling and use that are known to the chemical manufacturer, importer or employer preparing the material safety data sheet, including appropriate hygienic practices, protective measures during repair and maintenance of contaminated equipment, and procedures for clean-up of spills and leaks;
- Any generally applicable control measures that are known to the chemical manufacturer, importer or employer preparing the material safety data sheet, such as appropriate engineering controls, work practices, or personal protective equipment;
- Emergency and first aid procedures;
- The date of preparation of the material safety data sheet or the last change to it; and

• The name, address and telephone number of the chemical manufacturer, importer, employer or other responsible party preparing or distributing the material safety data sheet, who can provide additional information on the hazardous chemical and appropriate emergency procedures, if necessary.

If no relevant information is found for any given category on the material safety data sheet, the chemical manufacturer, importer or employer preparing the material safety data sheet must mark it to indicate that no applicable information was found.

Where complex mixtures have similar hazards and contents (i.e., the chemical ingredients are essentially the same, but the specific composition varies from mixture to mixture), the chemical manufacturer, importer or employer may prepare one material safety data sheet to apply to all of these similar mixtures.

The chemical manufacturer, importer or employer preparing the material safety data sheet must ensure that the information recorded accurately reflects the scientific evidence used in making the hazard determination. If the chemical manufacturer, importer or employer preparing the material safety data sheet becomes newly aware of any significant information regarding the hazards of a chemical, or ways to protect against the hazards, this new information must be added to the material safety data sheet within three months. If the chemical is not currently being produced or imported, the chemical manufacturer or importer must add the information to the material safety data sheet before the chemical is introduced into the workplace again.

NEW SECTION

WAC 296-62-05410 Label clearly each container of hazardous chemicals that leaves your workplace. The chemical manufacturer, importer, or distributor must ensure that each container of hazardous chemicals leaving the workplace is labeled, tagged or marked with the following information:

- Identity of the hazardous chemical(s);
- Appropriate hazard warnings; and
- Name and address of the chemical manufacturer, importer, or other responsible party.

For solid metal (such as a steel beam or a metal casting), solid wood, or plastic items that are not exempted as articles due to their downstream use, or shipments of whole grain, the required label may be:

- Transmitted to the customer at the time of the initial shipment, and need not be included with subsequent shipments to the same employer unless the information on the label changes;
- Transmitted with the initial shipment itself, or with the material safety data sheet that is to be provided prior to or at the time of the first shipment; and
- This exception to requiring labels on every container of hazardous chemicals is only for the solid material itself and does not apply to hazardous chemicals used in conjunction with, or known to be present with, the material and to that which employees handling the items in transit may be exposed (for example, cutting fluids or pesticides in grain).

Chemical manufacturers, importers, or distributors must ensure that each container of hazardous chemicals leaving the workplace is labeled, tagged, or marked in accordance with this part in a manner that does not conflict with the requirements of the Hazardous Materials Transportation Act (49 U.S.C. 1801 et seq.) and regulations issued under that act by the department of transportation.

If the hazardous chemical is regulated by WISHA or OSHA in a substance-specific health standard, the chemical manufacturer, importer, distributor or employer must ensure that the labels or other forms of warning used are in accordance with the requirements of that standard.

The chemical manufacturer, importer, distributor or employer need not affix new labels to comply with this part if existing labels already convey the required information.

Chemical manufacturers, importers, distributors, or employers who become newly aware of any significant information regarding the hazards of a chemical must revise the labels for the chemical within three months of becoming aware of the new information. Labels on containers of hazardous chemicals shipped after that time must contain the new information. If the chemical is not currently produced or imported, the chemical manufacturer, importer, distributor, or employer must add the information to the label before the chemical is shipped or introduced into the workplace again.

Retention of DOT markings, placards and labels.

■ Any employer who receives a package of hazardous material that is required to be marked, labeled or placarded in accordance with the U.S. Department of Transportation's Hazardous Materials Regulations (49 C.F.R. Parts 171 through 180) must retain those markings, labels and placards on the package until the packaging is sufficiently cleaned of residue and purged of vapors to remove any potential hazards.

■ Any employer who receives a freight container, rail freight car, motor vehicle, or transport vehicle that is required to be marked or placarded in accordance with the Hazardous Materials Regulations must retain those markings and placards on the freight container, rail freight car, motor vehicle or transport vehicle until the hazardous materials that require the marking or placarding are sufficiently removed to prevent any potential hazards.

■ Markings, placards and labels must be maintained in a manner that ensures that they are readily visible.

■ For nonbulk packages that will not be reshipped, the provisions of this section are met if a label or other acceptable marking is affixed in accordance with this rule.

■ For the purposes of this section, the term "hazardous material" and any other terms not defined in this section have the same definition as in the Hazardous Materials Regulations (49 C.F.R. Parts 171 through 180).

The hazard communication rule does not require labeling of the following chemicals:

- Any pesticide as such term is defined in the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.), when subject to the labeling requirements of that act and labeling regulations issued under that act by the Environmental Protection Agency;

PERMANENT

- Any chemical substance or mixture as such terms are defined in the Toxic Substance Control Act (15 U.S.C. 2601 et seq.), when subject to the labeling requirements of that act and labeling requirements issued under that act by the Environmental Protection Agency;

- Any food, food additive, color additive, drug, cosmetic, or medical or veterinary device or product, including materials intended for use as ingredients in such products (e.g., flavors and fragrances), as such terms are defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) or the Virus-Serum Toxin Act of 1913 (21 U.S.C. 151 et seq.) and regulations issued under those acts, when they are subject to the labeling requirements under those acts by either the Food and Drug Administration or the department of agriculture;

- Any distilled spirits (beverage alcohols), wine, or malt beverage intended for nonindustrial use, as such terms are defined in the Federal Alcohol Administration Act (27 U.S.C. 201 et seq.) and regulations issued under that act, when subject to the labeling requirements of that act and labeling regulations issued under that act by the Bureau of Alcohol, Tobacco, and Firearms;

- Any consumer product or hazardous substance as those terms are defined in the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) and Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) respectively, when subject to a consumer product safety standard or labeling requirement of those acts, or regulations issued under those acts by the Consumer Product Safety Commission; and

- Agricultural or vegetable seed treated with pesticides and labeled in accordance with the Federal Seed Act (7 U.S.C. 1551 et seq.) and the labeling requirements issued under that act by the department of agriculture.

NEW SECTION

WAC 296-62-05412 Provide material safety data sheets. Chemical manufacturers or importers must:

- Ensure that distributors and employers are provided an appropriate material safety data sheet with their initial shipment, and with the first shipment after a material safety data sheet is updated;

- Either provide material safety data sheets with the shipped containers or send them to the distributor or employer prior to or at the time of the shipment;

- If the material safety data sheet is not provided with a shipment that has been labeled as a hazardous chemical, the distributor or employer must obtain one from the chemical manufacturer or importer as soon as possible; and

- Also, provide distributors or employers with a material safety data sheet upon request.

• Distributors must:

- Ensure that material safety data sheets, and updated information, are provided to other distributors and employers with their initial shipment and with the first shipment after a material safety data sheet is updated;

- Either provide material safety data sheets with the shipped containers, or send them to the other distributor or employer prior to or at the time of the shipment;

- If the material safety data sheet is not provided with a shipment that has been labeled as a hazardous chemical, the

distributor must obtain one from the chemical manufacturer or importer as soon as possible.

Retailers selling hazardous chemicals to employers having a commercial account must provide a material safety data sheet to such employers upon request, and must post a sign or otherwise inform them that a material safety data sheet is available.

Wholesale distributors selling hazardous chemicals to employers over-the-counter may also provide material safety data sheets upon request of the employer at the time of the over-the-counter purchase, and must post a sign or otherwise inform such employers that a material safety data sheet is available.

If an employer without a commercial account purchases a hazardous chemical from a retail distributor not required to have material safety data sheets on file (i.e., the retail distributor does not have a commercial account and does not use the materials), the retail distributor must provide the employer, upon request, with the name, address, and telephone number of the chemical manufacturer, importer, or distributor from which a material safety data sheet can be obtained.

Wholesale distributors must also provide material safety data sheets to employers or other distributors upon request.

Chemical manufacturers, importers, and distributors need not provide material safety data sheets to retail distributors that have informed them that the retail distributor does not sell the product to commercial accounts or open the sealed container to use it in their own workplaces.

REPEALER

The following sections of the Washington Administrative Code are repealed:

WAC 296-62-05403	Scope and application.
WAC 296-62-05405	Definitions applicable to this part.
WAC 296-62-05407	Hazard determination.
WAC 296-62-05409	Written hazard communication program.
WAC 296-62-05411	Labels and other forms of warning.
WAC 296-62-05413	Material safety data sheets.
WAC 296-62-05415	Employee information and training.
WAC 296-62-05417	Trade secrets.
WAC 296-62-05419	Effective dates.
WAC 296-62-05421	Appendix A—Health hazard definitions (mandatory).
WAC 296-62-05423	Appendix B—Hazard determination (mandatory).
WAC 296-62-05425	Appendix C—Information sources (advisory).
WAC 296-62-05427	Appendix D.

WAC 296-62-05429

Appendix E—Guidelines for employer compliance (advisory).

PART B-1
TRADE SECRETSAMENDATORY SECTION (Amending Order 89-03, filed 5/15/89, effective 6/30/89)

WAC 296-62-05207 Preservation of records. (1) Unless a specific occupational safety and health standard provides a different period of time, each employer shall assure the preservation and retention of records as follows:

(a) Employee medical records. The medical record for each employee shall be preserved and maintained for at least the duration of employment plus thirty years, except that the following types of records need not be retained for any specific period:

(i) Health insurance claims records maintained separately from the employer's medical program and its records;

(ii) First-aid records (not including medical histories) of one-time treatment and subsequent observation of minor scratches, cuts, burns, splinters, and the like which do not involve medical treatment, loss of consciousness, restriction of work or motion, or transfer to another job, if made on-site by a nonphysician and if maintained separately from the employer's medical program and its records; and

(iii) The medical records of employees who have worked for less than one year for the employer need not be retained beyond the term of employment if they are provided to the employee upon the termination of employment.

(b) Employee exposure records. Each employee exposure record shall be preserved and maintained for at least thirty years, except that:

(i) Background data to environmental (workplace) monitoring or measuring, such as laboratory reports and worksheets, need only be retained for one year as long as the sampling results, the collection methodology (sampling plan), a description of the analytical and mathematical methods used, and a summary of other background data relevant to interpretation of the results obtained, are retained for at least thirty years; and

(ii) ~~(Material safety data sheets and WAC 296-62-05205(5))~~ Employee exposure records concerning the identity of a substance or agent need not be retained for any specified period as long as some record of the identity (chemical name if known) of the substance or agent, where it was used, and when it was used is retained for at least thirty years; and

(iii) Biological monitoring results designated as exposure records by specific occupational safety and health standards shall be preserved and maintained as required by the specific standard.

(c) Analyses using exposure or medical records. Each analysis using exposure or medical records shall be preserved and maintained for at least thirty years.

(2) Nothing in this section is intended to mandate the form, manner, or process by which an employer preserves a record as long as the information contained in the record is preserved and retrievable, except that chest x-ray films shall be preserved in their original state.

NEW SECTION

WAC 296-62-05301 Definitions. Understand a trade secret.

The following is a reprint of the Restatement of Torts section 757, comment b (1939):

Definition of trade secret. A trade secret may consist of any formula, pattern, device or compilation of information which is used in one's business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it. It may be a formula for a chemical compound, a process of manufacturing, treating or preserving materials, a pattern for a machine or other device, or a list of customers. It differs from other secret information in a business (see § 759 of the Restatement of Torts which is not included in this Appendix) in that it is not simply information as to single or ephemeral events in the conduct of the business, as, for example, the amount or other terms of a secret bid for a contract or the salary of certain employees, or the security investments made or contemplated, or the date fixed for the announcement of a new policy or for bringing out a new model or the like. A trade secret is a process or device for continuous use in the operations of the business. Generally, it relates to the production of goods, as, for example, a machine or formula for the production of an article. It may, however, relate to the sale of goods or to other operations in the business, such as a code for determining discounts, rebates or other concessions in a price list or catalogue, or a list of specialized customers, or a method of bookkeeping or other office management.

Director means the director of the department of labor and industries or his/her designee.

Chemical means any element, chemical compound or mixture of elements and/or compounds.

Chemical manufacturer means an employer with a workplace where chemical(s) are produced for use or distribution.

Chemical name means the scientific designation of a chemical in accordance with the nomenclature system developed by the International Union of Pure and Applied Chemistry (IUPAC) or the Chemical Abstracts Service (CAS) rules of nomenclature, or a name which will clearly identify the chemical for the purpose of conducting a hazard evaluation.

Combustible liquid means any liquid having a flashpoint at or above 100°F (37.8°C), but below 200°F (93.3°C), except any mixture having components with flashpoints of 200°F (93.3°C), or higher, the total volume of which make up ninety-nine percent or more of the total volume of the mixture.

Commercial account means an arrangement whereby a retail distributor sells hazardous chemical(s) to an employer, generally in large quantities over time and/or at costs that are below the regular retail price.

Common name means any designation or identification such as code name, code number, trade name, brand name or generic name used to identify a chemical other than by its chemical name.

PERMANENT

Compressed gas means:

- A gas or mixture of gases having, in a container, an absolute pressure exceeding 40 psi at 70°F (21.1°C); or
- A gas or mixture of gases having, in a container, an absolute pressure exceeding 104 psi at 130°F (54.4°C) regardless of the pressure at 70°F (21.1°C); or
- A liquid having a vapor pressure exceeding 40 psi at 100°F (37.8°C) as determined by ASTM D-323-72.

Container means any bag, barrel, bottle, box, can, cylinder, drum, reaction vessel, storage tank, or the like that contains a hazardous chemical. For purposes of this part, pipes or piping systems are not considered to be containers.

Designated representative means any individual or organization to whom an employee gives written authorization to exercise such employee's rights under this section. A recognized or certified collective bargaining agent shall be treated automatically as a designated representative without regard to written employee authorization.

Definitions applicable to this rule:

Distributor means a business, other than a chemical manufacturer or importer, which supplies hazardous chemicals to other distributors or to employers.

Employee means an employee of an employer who is employed in the business of his or her employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is personal labor for an employer under this standard whether by way of manual labor or otherwise. However, for the purposes of this part, employee shall not mean immediate family members of the officers of any corporation, partnership, sole proprietorship, or other business entity or officers of any closely held corporation engaged in agricultural production of crops or livestock. This part applies to employees who may be exposed to hazardous chemicals under normal operating conditions or in foreseeable emergencies.

Employer means any person, firm, corporation, partnership, business trust, legal representative, or other business entity that engages in any business, industry, profession, or activity in this state and employs one or more employees or who contract with one or more persons, the essence of which is the personal labor of such person or persons and includes the state, counties, cities, and all municipal corporations, public corporations, political subdivisions of the state, and charitable organizations. This part applies to employers engaged in a business where chemicals are either used, distributed, or are produced for use or distribution, including a contractor or subcontractor.

Explosive means a chemical that causes a sudden, almost instantaneous release of pressure, gas, and heat when subjected to sudden shock, pressure, or high temperature.

Exposure or exposed means that an employee is/was subjected to a hazardous chemical in the course of employment through any route of entry (inhalation, ingestion, skin contact or absorption, etc.), and includes potential (e.g., accidental or possible) exposure.

Flammable means a chemical that falls into one of the following categories:

- Aerosol flammable means an aerosol that, when tested by the method described in 16 CFR 1500.45 yields a flame

projection exceeding eighteen inches at full valve opening, or a flashback (a flame extending back to the valve) at any degree of valve opening;

- Gas, flammable means:

- A gas that, at ambient temperature and pressure, forms a flammable mixture with air at a concentration of thirteen percent by volume or less; or

- A gas that, at ambient temperature and pressure, forms a range of flammable mixtures with air wider than twelve percent by volume, regardless of the lower limit;

- Liquid, flammable means any liquid having a flashpoint below 100°F (37.8°C), except any mixture having components with flashpoints of 100°F (37.8°C) or higher, the total of which make up ninety-nine percent or more of the total volume of the mixture.

- Solid, flammable means a solid, other than a blasting agent or explosive as defined in WAC 296-52-417 or 29 CFR 1910.109(a), that is liable to cause fire through friction, absorption of moisture, spontaneous chemical change, or retained heat from manufacturing or processing, or which can be ignited readily and when ignited burns so vigorously and persistently as to create a serious hazard. A chemical shall be considered to be a flammable solid if, when tested by the method described in 16 CFR 1500.44, it ignites and burns with a self-sustained flame at a rate greater than one-tenth of an inch per second along its major axis.

Flashpoint means the minimum temperature at which a liquid gives off a vapor in sufficient concentration to ignite when tested as follows:

- Tagliabue closed tester: (See American National Standard Method of Test for Flash Point by Tag Closed Tester, Z11.24-1979 (ASTM D 56-79)) for liquids with a viscosity of less than 45 Saybolt Universal Seconds (SUS) at 100°F (37.8°C), that do not contain suspended solids and do not have a tendency to form a surface film under test; or

- Pensky-Martens closed tester: (See American National Standard Method of Test for Flash Point by Pensky-Martens Closed Tester, Z11.7-1979 (ASTM D 93-79)) for liquids with a viscosity equal to or greater than 45 SUS at 100°F (37.8°C), or that contain suspended solids, or that have a tendency to form a surface film under test; or

- Setaflash closed tester: (See American National Standard Method of Test for Flash Point by Setaflash Closed Tester (ASTM D 3278-78)).

Note: Organic peroxides, which undergo autoaccelerating thermal decomposition, are excluded from any of the flashpoint determination methods specified above.

Foreseeable emergency means any potential occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which could result in an uncontrolled release of a hazardous chemical into the workplace.

Hazardous chemical means any chemical which is a physical hazard or a health hazard.

Hazard warning means any words, pictures, symbols, or combination thereof appearing on a label or other appropriate form of warning which convey the specific physical and health hazard(s), including target organ effects, of the chemical(s) in the container(s). (See definition for "physical haz-

ard" and "health hazard" to determine the hazards which must be covered.)

Health hazard means a chemical for which there is statistically significant evidence based on at least one study conducted in accordance with established scientific principles that acute or chronic health effects may occur in exposed employees. The term "health hazard" includes chemicals which are carcinogens, toxic or highly toxic agents, reproductive toxins, irritants, corrosives, sensitizers, hepatotoxins, nephrotoxins, neurotoxins, agents which act on the hematopoietic system, and agents which damage the lungs, skin, eyes, or mucous membranes. Appendix A provides further definitions and explanations of the scope of health hazards covered by this part, and Appendix B describes the criteria to be used to determine whether or not a chemical is to be considered hazardous for purposes of this standard.

Identity means any chemical or common name which is indicated on the material safety data sheet (MSDS) for the chemical. The identity used shall permit cross-references to be made among the required list of hazardous chemicals, the label and the MSDS.

Importer means the first business within the Customs Territory of the United States which receives hazardous chemicals produced in other countries, for the purpose of supplying them to distributors or employers within the United States. This definition is the same as Webster's, therefore we did not include it in the definitions.

Material safety data sheet (MSDS) means written or printed material concerning a hazardous chemical which is prepared in accordance with WAC 296-62-05408.

Mixture means any combination of two or more chemicals if the combination is not, in whole or in part, the result of a chemical reaction.

Organic peroxide means an organic compound that contains the bivalent-O-O-structure and which may be considered to be a structural derivative of hydrogen peroxide where one or both of the hydrogen atoms has been replaced by an organic radical.

Oxidizer means a chemical other than a blasting agent or explosive as defined in WAC 296-52-417 or CFR 1910.109(a), that initiates or promotes combustion in other materials, thereby causing fire either of itself or through the release of oxygen or other gases.

Permissible exposure limits (PELs) refer to airborne concentrations of substances without regard to the use of respiratory protection and represent conditions under which it is believed that nearly all workers may be repeatedly exposed day after day without adverse effect. The permissible exposure limits (PELs) shall include the following four categories:

- Permissible exposure limits - Time-weighted average (PEL-TWA) is the time weighted average airborne exposure to any 8-hour work shift of a 40-hour work week which shall not be exceeded.
- Permissible exposure limits - Short-term exposure limit (PEL-STEL) is the employee's 15-minute time weighted average exposure which shall not be exceeded at any time during a work day unless another time limit is specified in a parenthetical notation below the limit. If another time period is specified, the time weighted average exposure over that

time period shall not be exceeded at any time during the working day.

- Permissible exposure limits - Ceiling (PEL-C) is the employee's exposure which shall not be exceeded during any part of the work day. If instantaneous monitoring is not feasible, then the ceiling shall be assessed as a 15-minute time weighted average exposure which shall not be exceeded at any time over a working day.

- "Skin" notation is the potential contribution to the overall employee exposure by the cutaneous route including mucous membranes and eye, either by airborne, or more particularly, by direct contact with the substance. These substances are identified as having a "skin" notation in the OSHA and WISHA PEL tables (29 CFR Part 1910 Subpart Z and WAC 296-62-075, respectively).

Physical hazard means a chemical for which there is scientifically valid evidence that it is a combustible liquid, a compressed gas, explosive, flammable, an organic peroxide, an oxidizer, pyrophoric, unstable (reactive) or water-reactive.

Produce means to manufacture, process, formulate, blend, extract, generate, emit, or repackage.

Purchaser means an employer with a workplace who purchases a hazardous chemical for use within that workplace.

Pyrophoric means a chemical that will ignite spontaneously in air at a temperature of 130°F (54.4°C) or below.

Responsible party means someone who can provide additional information on the hazardous chemical and appropriate emergency procedures, if necessary.

Specific chemical identity means the chemical name, Chemical Abstracts Service (CAS) registry number, or any other information that reveals the precise chemical designation of the substance.

Threshold limit values (TLVs) refer to airborne concentrations of substances without regard to the use of respiratory protection and represent conditions under which it is believed that nearly all workers may be repeatedly exposed day after day without adverse effect. The TLV includes the TLV-Time weighted average (TLV-TWA), TLV-Short term exposure limit (TLV-STEL), TLV-Ceiling (TLV-Ceiling) and "skin" notation as stated in the most recent edition of the 'Threshold Limit Values for Chemical Substances and Physical Agents and Biological Exposure Indices' from the American Conference of Governmental Industrial Hygienists (ACGIH).

Trade secret means any confidential formula, pattern, process, device, information or compilation of information that is used in an employer's business, and that gives the employer an opportunity to obtain an advantage over competitors who do not know or use it. WAC 296-62-05427, Appendix D, provides a legal definition of trade secret and WAC 296-62-05417 sets out the criteria to be used in evaluating trade secrets.

Unstable (reactive) means a chemical which in the pure state, or as produced or transported, will vigorously polymerize, decompose, condense, or will become self-reactive under conditions of shocks, pressure or temperature.

Use means to package, handle, react, emit, extract, generate as a by-product, or transfer.

Water-reactive means a chemical that reacts with water to release a gas that is either flammable or presents a health hazard.

Workplace means an establishment, job site, or project, at one geographical location containing one or more work areas.

NEW SECTION

WAC 296-62-05305 Meet certain conditions if you withhold trade secret information. You may withhold the specific chemical identity, including the chemical name and other specific identification of a toxic substance or hazardous chemical, from a disclosable record or a material safety data sheet if you meet each of the following conditions:

You:

- Can support the claim that the information withheld is a trade secret.
- Disclose all other available information about the properties and effects of the toxic substance.
- Disclose the information in the material safety data sheet about the properties and effects of the hazardous chemical.
- Inform the person requesting the information, or the material safety data sheet states that the specific chemical identity is being withheld as a trade secret.
- Make available the specific chemical identity to health professionals, employees, and their designated representatives according to the provisions of this rule.

Nothing in this rule hinders an employer from deleting from records requested by a health professional, employee, or designated representative any trade secret data which discloses manufacturing processes, or discloses the percentage of a chemical substance in a mixture.

You must notify the health professional, employee, or designated representative requesting records that information about the trade has been deleted from the records.

If deleting trade secret information from a record substantially impairs evaluation of the location or the time when exposure to a toxic substance occurred, you must provide alternative information that enables the requesting party to identify where and when the exposure occurred.

NEW SECTION

WAC 296-62-05310 Reveal trade secret information when it is needed in order to treat a medical or first-aid emergency. When a physician or nurse treating a patient determines that a medical emergency exists and the specific chemical identity of a toxic substance or hazardous chemical is necessary for emergency or first-aid treatment, you must immediately disclose the specific chemical identity of a trade secret chemical to the treating physician or nurse.

You must do this even if you do not have a written statement of need or a confidentiality agreement from the physician or nurse who is handling the medical emergency.

You may require a written statement of need and confidentiality agreement, in accordance with the provisions of nonemergency situations and confidentiality agreement of

this rule (see WAC 296-62-05315), as soon as the circumstances of the medical emergency permit.

NEW SECTION

WAC 296-62-05315 Reveal trade secret information in nonemergency situations when requested by a health professional, employee, or designated representative.

The request by the health professional, employee, or designated representative must:

- Be in writing.
 - Describe with reasonable detail one or more of the reasons the information is needed. The reason(s) must be related to occupational health needs, such as to:
 - Assess the hazards of the chemicals to which employees will be exposed.
 - Conduct or assess sampling of the workplace atmosphere to determine employee exposure levels.
 - Conduct preassignment or periodic medical surveillance of exposed employees.
 - Provide medical treatment to exposed employees.
 - Select or assess appropriate personal protective equipment for exposed employees.
 - Design or assess engineering controls or other protective measures for exposed employees.
 - Conduct studies to determine the health effects of exposure.
 - Explain in detail why the disclosure of the specific chemical identity is essential.
 - Explain why disclosing the:
 - Properties and effects of the chemical.
 - Measures for controlling workers' exposure to the chemical.
 - Methods of monitoring and analyzing worker exposure to the chemical.
 - Methods of diagnosing and treating harmful exposures to the chemical
- in lieu of trade secret information would prevent the health professional, employee, or designated representative from providing the occupational health services described in the occupational health needs description.
- Describe procedures to be used to maintain the confidentiality of the disclosed information. The health professional, employee, or designated representative and the employer or contractor of the services of the health professional or designated representative agree in a written confidentiality agreement that the health professional, employee, or designated representative:
 - Will not use the trade secret information for any purpose other than the health need(s) described; and
 - Agree not to release the information under any circumstances other than to WISHA, except as authorized by the terms of the agreement or by the employer.
- This confidentiality agreement may:**
- Restrict the use of the information to the health purposes indicated in the written statement of need.
 - Provide for appropriate legal remedies in the event of a breach of the agreement, including a reasonable preestimate of likely damages.

- Not include requirements for the posting of a penalty bond.

If the health professional, employee, or designated representative receiving the trade secret information decides that there is a need to disclose it to WISHA, he or she must inform the employer who provided the information prior to, or at the same time as disclosing it to WISHA.

Nothing in this section is meant to preclude the parties from pursuing noncontractual remedies to the extent permitted by law.

NEW SECTION

WAC 296-62-05320 Deny a written request for disclosure of a specific chemical identity in the manner specified in this rule. If you choose to deny a written request for disclosure of information about a specific chemical identity, your denial must:

- Be given to the health professional, employee, or designated representative within thirty days of the request.
- Be in writing.
- Include evidence to support the claim that the specific chemical identity is a trade secret.
- State the specific reasons why the request is being denied.
- Explain in detail how alternative information may satisfy the specific medical or occupational health need without revealing the specific chemical identity.
- If a request for information is denied under the non-emergency section of this rule, the request may then be referred with the written denial of the request to WISHA for consideration.
 - When a denial is referred to WISHA, WISHA must consider the evidence to determine if the:
 - Chemical manufacturer, importer or employer has supported the claim that the specific chemical identity is a trade secret.
 - Health professional, employee, or designated representative has supported the claim that there is a medical or occupational health need for the information.
 - Health professional, employee, or designated representative has demonstrated adequate means to protect the confidentiality of the trade secret information.

Potential outcomes of denying a written request for trade secret information:

- If WISHA determines that the specific chemical identity requested under the nonemergency situations section is not a bona fide trade secret, or that it is a trade secret but the requesting health professional, employee, or designated representative has a legitimate medical or occupational health need for the information, has executed a written confidentiality agreement, and has shown adequate means for complying with the terms of such agreement, the chemical manufacturer, importer or employer will be subject to a citation by WISHA.
- If a chemical manufacturer, importer or employer demonstrates to WISHA that the execution of a confidentiality agreement would not provide sufficient protection against potential harm from the unauthorized disclosure of a trade secret specific chemical identity, the director may issue such

orders or impose such additional limitations or conditions upon the disclosure of the requested chemical information as may be appropriate to assure that the occupational health needs are met without an undue risk of harm to the chemical manufacturer, importer or employer.

- In spite of the existence of a trade secret claim, a chemical manufacturer, importer or employer must upon request, disclose to the director or his representative, any information that this section requires the chemical manufacturer, importer or employer to make available. Where there is a trade secret claim, such claim shall be made no later than at the time the information is provided to the director so that suitable determinations of trade secret status can be made and the necessary protections can be implemented.

NEW SECTION

WAC 296-62-05325 Understand what is a trade secret. The following is a reprint of the *Restatement of Torts* section 757, comment *b* (1939):

b. **Definition of trade secret.** A trade secret may consist of any formula, pattern, device or compilation of information which is used in one's business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it. It may be a formula for a chemical compound, a process of manufacturing, treating or preserving materials, a pattern for a machine or other device, or a list of customers. It differs from other secret information in a business (see § 759 of the *Restatement of Torts* which is not included in this Appendix) in that it is not simply information as to single or ephemeral events in the conduct of the business, as, for example, the amount or other terms of a secret bid for a contract or the salary of certain employees, or the security investments made or contemplated, or the date fixed for the announcement of a new policy or for bringing out a new model or the like. A trade secret is a process or device for continuous use in the operations of the business. Generally it relates to the production of goods, as, for example, a machine or formula for the production of an article. It may, however, relate to the sale of goods or to other operations in the business, such as a code for determining discounts, rebates or other concessions in a price list or catalogue, or a list of specialized customers, or a method of bookkeeping or other office management.

Secrecy. The subject matter of a trade secret must be secret. Matters of public knowledge or of general knowledge in an industry cannot be appropriated by one as his secret. Matters which are completely disclosed by the goods which one markets cannot be his secret. Substantially, a trade secret is known only in the particular business in which it is used. It is not requisite that only the proprietor of the business know it. He may, without losing his protection, communicate it to employees involved in its use. He may likewise communicate it to others pledged to secrecy. Others may also know of it independently, as, for example, when they have discovered the process or formula by independent invention and are

keeping it secret. Nevertheless, a substantial element of secrecy must exist, so that, except by the use of improper means, there would be difficulty in acquiring the information. An exact definition of a trade secret is not possible. Some factors to be considered in determining whether given information is one's trade secret are:

(1) The extent to which the information is known outside of his business;

(2) The extent to which it is known by employees and others involved in his business;

(3) The extent of measures taken by him to guard the secrecy of the information;

(4) The value of the information to him and his competitors;

(5) The amount of effort or money expended by him in developing the information;

(6) The ease or difficulty with which the information could be properly acquired or duplicated by others.

Novelty and prior art. A trade secret may be a device or process which is patentable; but it need not be that. It may be a device or process which is clearly anticipated in the prior art or one which is merely a mechanical improvement that a good mechanic can make. Novelty and invention are not requisite for a trade secret as they are for patentability. These requirements are essential to patentability because a patent protects against unlicensed use of the patented device or process even by one who discovers it properly through independent research. The patent monopoly is a reward to the inventor. But such is not the case with a trade secret. Its protection is not based on a policy of rewarding or otherwise encouraging the development of secret processes or devices. The protection is merely against breach of faith and reprehensible means of learning another's secret. For this limited protection it is not appropriate to require also the kind of novelty and invention which is a requisite of patentability. The nature of the secret is, however, an important factor in determining the kind of relief that is appropriate against one who is subject to liability under the rule stated in this section. Thus, if the secret consists of a device or process which is a novel invention, one who acquires the secret wrongfully is ordinarily enjoined from further use of it and is required to account for the profits derived from his past use. If, on the other hand, the secret consists of mechanical improvements that a good mechanic can make without resort to the secret, the wrongdoer's liability may be limited to damages, and an injunction against future use of the improvements made with the aid of the secret may be inappropriate.

AMENDATORY SECTION (Amending Order 73-3, filed 5/7/73)

WAC 296-62-010 Purpose and scope. ~~((1) Purpose.~~ The purpose of this chapter is:

(a) ~~To protect the health of workmen by prescribing minimum requirements for the prevention or control of conditions in industry hazardous to health.~~

(b) ~~Assist in the provision of a healthful working environment.~~

(2) ~~Scope. This chapter shall apply to all industry coming under the jurisdiction of the department of labor and indus-~~

~~tries.)~~ The rules in this chapter are designed to protect the health of employees and help to create a healthy work place by establishing requirements to control health hazards. Requirements for chemical hazard communication programs, workplace lighting levels and exposure records are in chapter 296-800 WAC, the safety and health core rules.

AMENDATORY SECTION (Amending Order 73-3, filed 5/7/73)

WAC 296-62-050 Application for waiver or variances. See WAC ~~((296-24-010))~~ 296-350-700 Variance ((and procedure)) from WISHA rules.

AMENDATORY SECTION (Amending WSR 99-10-071, filed 5/4/99, effective 9/1/99)

WAC 296-62-07101 To whom does chapter 296-62 WAC, Part E apply? Chapter 296-62 WAC, Part E applies to all employers covered by WISHA. Other requirements for personal protective equipment (PPE) are found in ~~((chapter 296-24 WAC, Part A-2))~~ WAC 296-800-160.

AMENDATORY SECTION (Amending WSR 99-10-071, filed 5/4/99, effective 9/1/99)

WAC 296-62-07306 Requirements for areas containing carcinogens listed in WAC 296-62-07302. (1) A regulated area shall be established by an employer where listed carcinogens are manufactured, processed, used, repackaged, released, handled or stored.

(2) All such areas shall be controlled in accordance with the requirements for the following category or categories describing the operation involved:

(a) Isolated systems. Employees working with carcinogens within an isolated system such as a "glove box" shall wash their hands and arms upon completion of the assigned task and before engaging in other activities not associated with the isolated system.

(b) Closed system operation. Within regulated areas where carcinogens are stored in sealed containers, or contained in a closed system including piping systems with any sample ports or openings closed while carcinogens are contained within:

(i) Access shall be restricted to authorized employees only;

(ii) Employees shall be required to wash hands, forearms, face and neck upon each exit from the regulated areas, close to the point of exit and before engaging in other activities.

(c) Open vessel system operations. Open vessel system operations as defined in WAC 296-62-07304(12) are prohibited.

(d) Transfer from a closed system. Charging or discharging point operations, or otherwise opening a closed system. In operations involving "laboratory-type hoods," or in locations where a carcinogen is contained in an otherwise "closed system," but is transferred, charged, or discharged into other

normally closed containers, the provisions of this section shall apply.

(i) Access shall be restricted to authorized employees only;

(ii) Each operation shall be provided with continuous local exhaust ventilation so that air movement is always from ordinary work areas to the operation. Exhaust air shall not be discharged to regulated areas, nonregulated areas or the external environment unless decontaminated. Clean makeup air shall be introduced in sufficient volume to maintain the correct operation of the local exhaust system.

(iii) Employees shall be provided with, and required to wear, clean, full body protective clothing (smocks, coveralls, or long-sleeved shirt and pants), shoe covers and gloves prior to entering the regulated area.

(iv) Employees engaged in handling operations involving the following carcinogens must be provided with and required to wear and use a full-face, supplied-air respirator, of the continuous flow or pressure-demand type as required in chapter 296-62 WAC, Part E:

- Methyl Chloromethyl Ether;
- bis-Chloromethyl Ether;
- Ethylenemine;
- beta-Propiolactone;
- 4-Amino Diphenyl.

(v) Employees engaged in handling operations involving:

- 4-nitrobiphenyl;
- alpha-naphthylamine;
- 4-4'methylene bis(2-chloroaniline);
- 3-3'dichlorobenzidine (and its salts);
- beta-naphthylamine;
- benzidine;
- 2-acetylamino fluorene;
- 4-dimethylaminobenzene;
- n-nitrosodimethylamine

must be provided with, and required to wear and use, a half-face, filter-type respirator certified for solid or liquid particulates with minimum efficiency rating of 95% as required in chapter 296-62 WAC, Part E. A respirator affording higher levels of protection than this respirator may be substituted.

(vi) Prior to each exit from a regulated area, employees shall be required to remove and leave protective clothing and equipment at the point of exit and at the last exit of the day, to place used clothing and equipment in impervious containers at the point of exit for purposes of decontamination or disposal. The contents of such impervious containers shall be identified, as required under WAC 296-62-07310 (2), (3) and (4).

(vii) Employees shall be required to wash hands, forearms, face and neck on each exit from the regulated area, close to the point of exit, and before engaging in other activities.

(viii) Employees shall be required to shower after the last exit of the day.

(ix) Drinking fountains are prohibited in the regulated area.
