

WSR 24-13-018
EMERGENCY RULES
DEPARTMENT OF
FISH AND WILDLIFE

[Order 24-92—Filed June 6, 2024, 1:45 p.m., effective June 8, 2024]

Effective Date of Rule: June 8, 2024.

Purpose: The purpose of this emergency rule is to rescind rules restricting anglers from fishing for salmon and steelhead from a vessel between Beacon Rock and Hamilton Island boat ramp and reopen spring Chinook from Bonneville Dam to the Oregon/Washington (OR/WA) border. This rule also carries forward Columbia River salmon and steelhead seasons previously announced in WSR 24-12-034 and 24-12-062.

Citation of Rules Affected by this Order: Repealing WAC 220-312-06000L and 220-312-06000M; and amending WAC 220-312-060.

Statutory Authority for Adoption: RCW 77.04.012, 77.04.020, 77.12.045, and 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: This rule applies joint state action taken on June 6, 2024, to rescind the hand-cast only and no angling from a vessel restriction from Beacon Rock upstream to Hamilton boat ramp and reopen spring Chinook from Bonneville Dam to the OR/WA border. Additionally, summer fishery regulations developed through the 2024 North of Falcon season setting process are included and are consistent with comanager agreements. Endangered Species Act (ESA) impacts and allowable harvest allocations are available to recreational fisheries in order to access salmon and steelhead. The fishery is consistent with the *U.S. v. Oregon Management Agreement* and the associated biological opinion. Conforms Washington state rules with Oregon state rules. The general public welfare is protected with the immediate opening of recreational salmon fishing. This limited harvest allows for public use of the resource as well as the maintenance of a sustainable fish population.

Washington and Oregon jointly regulate Columbia River fisheries under the congressionally ratified Columbia River Compact. Four Indian tribes have treaty fishing rights in the Columbia River. The treaties preempt state regulations that fail to allow the tribes an opportunity to take a fair share of the available fish, and the states must manage other fisheries accordingly. *Sohappy v. Smith*, 302 F. Supp. 899 (D. Or. 1969). A court order sets the current parameters. *United States v. Oregon*, Civil No. 68-513-KI (D. Or.), Order Adopting 2018-2027 *United States v. Oregon Management Agreement* (February 26, 2018) (Doc. No. 2607-1). Some salmon and steelhead stocks in the Columbia River are listed as threatened or endangered under ESA. On February 23, 2018, the National Marine Fisheries Service issued a biological opinion under 16 U.S.C. § 1536 that allows for some incidental take of these species in the fisheries as described in the 2018-2027 *U.S. v. Oregon Management Agreement*.

Some Columbia River Basin salmon and steelhead stocks are listed as threatened or endangered under ESA. The Washington and Oregon fish and wildlife commissions have developed policies to guide the imple-

mentation of such biological opinions in the states' regulation of nontreaty fisheries.

Columbia River nontreaty fisheries are monitored very closely to ensure compliance with federal court orders, ESA, and commission guidelines. Because conditions change rapidly, the fisheries are managed almost exclusively by emergency rule. Representatives from the Washington (WDFW) and Oregon (ODFW) departments of fish and wildlife convene public hearings and take public testimony when considering proposals for new emergency rules. WDFW and ODFW then adopt regulations reflecting agreements reached. There is insufficient time to promulgate permanent rules.
