

SSB 5452 - S AMD 26

By Senator Franklin

1           On page 2, line 19, after "HIV" delete "Employers may test for the  
2 presence of drugs or alcohol, but may not use the results of these  
3 tests to gain genetic information."

4           Renumber the sections consecutively and correct any internal  
5 references accordingly.

--- END <

**EFFECT:** A technical error is corrected to delete a reference to the employment context, which is not relevant to the subject of genetic testing as a condition of life insurance.
