Accountability Committee**

HB 2675

Brief Description: Exempting certain Native American cultural resources information from public disclosure.

Sponsors: Representatives B. Sullivan, Buck, Dunn, McCoy, Moeller and Lantz; by request of Archaeology and Historic Preservation.

Brief Summary of Bill

- Exempts from public disclosure any information acquired during watershed analysis that identifies the location of cultural resources.

Hearing Date: 1/31/06

Staff: Stephanie Toby (786-7106).

Background:

Records, maps, or other information identifying the location of archaeological sites are exempt from public disclosure.

Watershed Analysis

In 1999, the Forest and Fish report was released to the Forest Practices Board, directing it to adopt rules for policies, including a watershed analysis system.

Watershed analysis is a biological and physical assessment of a watershed designed to address the cumulative effects of forest practices on specific public resources and on cultural resources. This process was developed by forest landowners, tribes, environmental groups and state natural resources agencies. Based on assessment results, voluntary management strategies are developed to protect and manage cultural resources. Watershed analysis is performed on Watershed Administrative Units (WAUs), which are defined by hydrology and geomorphology. There are 825 WAUs in Washington.

Summary of Bill:

Information identifying the location of cultural resources that is acquired during the watershed analysis, including records and maps, are exempt from disclosure in order to prevent the looting or depredation of such sites.

Appropriation: None.

Fiscal Note: Not requested.

Effective Date: The bill takes effect July 1, 2006.
