The inventory shall include location, age, type, and maintenance history of the tide gates and other factors as determined by the <u>appropriate</u> task force in consultation with the county and diking and drainage districts;
- (b) An assessment of the role of tide gates located on streams in the county; the role of intertidal fish habitat for various life stages of salmon; the quantity and characterization of intertidal fish habitat currently accessible to fish; the quantity and characterization of the present intertidal fish habitat created at the time the dikes and outlets were constructed; the quantity of potential intertidal fish habitat on public lands and alternatives to enhance this habitat; the effects of saltwater intrusion on agricultural land, including the effects of backfeeding of saltwater through the underground drainage system; the role of tide gates in drainage systems, including relieving excess water from saturated soil and providing reservoir functions between tides; the effect of saturated soils on production of crops; the characteristics of properly functioning intertidal fish habitat; a map of agricultural lands designated by the county as having long-term commercial significance and the effect of that designation; and the economic impacts to existing land uses for various alternatives for tide gate alteration; and
- (c) A long-term plan for intertidal salmon habitat enhancement to meet the goals of salmon recovery and protection of agricultural lands. The proposal shall consider all other means to achieve salmon recovery without converting farmland. The proposal shall include methods to increase fish passage and otherwise enhance intertidal habitat on public lands pursuant to subsection (2) of this section, voluntary methods to increase fish passage on private lands, a priority list of

- intertidal salmon enhancement projects, and recommendations for funding of high priority projects. The task force also may propose pilot projects that will be designed to test and measure the success of various proposed strategies.
- (2) In conjunction with other public landowners and the appropriate task force formed under RCW 77.85.220, the department shall develop an initial salmon intertidal habitat enhancement plan for public lands in the county. The initial plan shall include a list of public properties in the intertidal zone that could be enhanced for salmon, a description of how those properties could be altered to support salmon, a description of costs and sources of funds to enhance the property, and a strategy and schedule for prioritizing the enhancement of public lands for intertidal salmon habitat. This initial plan shall be submitted to the appropriate task force at least six months before the deadline established in subsection (3) of this section.
 - (3) The final intertidal salmon enhancement plan shall be completed within two years from the date the task force is formed <u>under RCW 77.85.220</u> and funding has been secured. A final plan shall be submitted by the <u>appropriate</u> task force to the lead entity for the geographic area established under this chapter.

- **Sec. 25.** RCW 77.85.050 and 2005 c 309 s 6 are each amended to read 22 as follows:

No project included on a habitat project list shall be considered mandatory in nature and no private landowner may be forced or coerced into participation in any respect. The lead entity may be a county, city, conservation district, special district, tribal government, regional recovery organization, or other entity.
 - (b) The lead entity shall establish a committee that consists of representative interests of counties, cities, conservation districts, tribes, environmental groups, business interests, landowners, citizens, volunteer groups, regional fish enhancement groups, and other habitat interests. The purpose of the committee is to provide a citizen-based evaluation of the projects proposed to promote salmon habitat.

(c) The committee shall compile a list of habitat projects, establish priorities for individual projects, define the sequence for project implementation, and submit these activities as the habitat project list. The committee shall also identify potential federal, state, local, and private funding sources.

- (2) The area covered by the habitat project list must be based, at a minimum, on a WRIA, combination of WRIAs, or any other area as agreed to by the counties, cities, and tribes in resolutions or in letters of support meeting the requirements of this subsection. Preference will be given to projects in an area that contain a salmon species that is listed or proposed for listing under the federal endangered species act.
- 13 (3) The lead entity shall submit the habitat project list to the 14 (([salmon recovery funding])) salmon recovery funding board in accordance with procedures adopted by the board.

 - (3) The department, in consultation with ((the ballast water work group, or similar)) a collaborative forum, shall adopt by rule standards for the discharge of ballast water into the waters of the state and their implementation timelines. The standards are intended to ensure that the discharge of ballast water poses minimal risk of introducing nonindigenous species. In developing these standards, the department shall consider the extent to which the requirement is technologically and practically feasible. Where practical and appropriate, the standards must be compatible with standards set by the United States coast guard, the federal clean water act (33 U.S.C. Sec. 1251-1387), or the international maritime organization.

(4) The master, operator, or person in charge of a vessel is not required to conduct an open sea exchange or treatment of ballast water if the master, operator, or person in charge of a vessel determines that the operation would threaten the safety of the vessel, its crew, or its passengers, because of adverse weather, vessel design limitations, equipment failure, or any other extraordinary conditions. A master, operator, or person in charge of a vessel who relies on this exemption must file documentation defined by the department, subject to: (a) Payment of a fee not to exceed five thousand dollars; (b) discharging only the minimal amount of ballast water operationally necessary; (c) ensuring that ballast water records accurately reflect any reasons for not complying with the mandatory requirements; and (d) any other requirements identified by the department by rule as provided in subsections (3) and (6) of this section.

- (5) For treatment technologies requiring shippard modification, the department may enter into a compliance plan with the vessel owner. The compliance plan must include a timeline consistent with drydock and shippard schedules for completion of the modification. The department shall adopt rules for compliance plans under this subsection.
- (6) For an exemption claimed in subsection (4) of this section, the department shall adopt rules for defining exemption conditions, requirements, compliance plans, or alternative ballast water management strategies to meet the intent of this section.
- (7) The department shall make every effort to align ballast water standards with adopted international and federal standards while ensuring that the goals of this chapter are met.
- (8) The requirements of this section do not apply to a vessel discharging ballast water or sediments that originated solely within the waters of Washington ((state)), the Columbia river system, or the internal waters of British Columbia south of latitude fifty degrees north, including the waters of the Straits of Georgia and Juan de Fuca.
- (9) Open sea exchange is an exchange that occurs fifty or more nautical miles offshore. If the United States coast guard requires a vessel to conduct an exchange further offshore, then that distance is the required distance for purposes of compliance with this chapter.
- **Sec. 27.** RCW 77.120.110 and 2007 c 350 s 14 are each amended to read as follows:

1 (1) The ballast water management account is created in the state 2 treasury. All receipts from legislative appropriations, gifts, grants, 3 donations, penalties, and fees received under this chapter must be 4 deposited into the account.

- 2 organization must qualify for tax-exempt status under 26 U.S.C. Sec.

- 4 <u>NEW SECTION.</u> **Sec. 50.** Sections 44 through 49 of this act
- 5 constitute a new chapter in Title 77 RCW.
- 6 NEW SECTION. Sec. 51. RCW 77.12.065 (Wildlife viewing tourism)
- 7 and 2003 c 183 s 1 are each repealed.
- 8 **Sec. 52.** RCW 77.12.820 and 1997 c 422 s 5 are each amended to read 9 as follows:
- The eastern Washington pheasant enhancement account is created in
- 11 the custody of the state treasurer. All receipts under RCW 77.12.810
- 12 must be deposited in the account. Moneys in the account are subject to
- 13 legislative appropriation and shall be used for the purpose of funding
- 14 the eastern Washington pheasant enhancement program. The department
- 15 may use moneys from the account to improve pheasant habitat or to
- 16 purchase or produce pheasants. ((Not less than eighty percent of
- 17 expenditures from the account must be used to purchase or produce
- 18 pheasants.)) The department must continue to release rooster pheasants
- 19 <u>in eastern Washington</u>. The eastern Washington pheasant enhancement
- 20 account funds must not be used for the purchase of land. The account
- 21 may be used to offer grants to improve pheasant habitat on public or
- 22 private lands that are open to public hunting. The department may
- 23 enter partnerships with private landowners, nonprofit corporations,
- 24 cooperative groups, and federal or state agencies for the purposes of
- 25 pheasant habitat enhancement in areas that will be available for public
- 26 hunting. The department shall submit an annual report to the
- 27 appropriate committees of the legislature by December 1st regarding the
- department's eastern Washington pheasant activities.
- 29 <u>NEW SECTION.</u> **Sec. 53.** (1) The legislature finds that healthy
- 30 wildlife populations are a valuable and treasured public resource to
- 31 the people of the state of Washington. However, the legislature also
- 32 finds that as the human population increases and encroaches on wildlife
- 33 habitat, interactions between humans and wildlife will become more
- 34 frequent.

(2) The legislature further finds that interactions between humans and wildlife can have significant financial impacts on the affected landowner. Although the resulting wildlife damage is felt most closely by the landowner, the general public, as beneficiaries and stewards of healthy wildlife populations, should bear some responsibility, as outlined in and limited by this act, for providing a measure of restitution to the impacted landowner, provided that the landowner has exhausted all legal, practicable self-help methods available to prevent wildlife damage from occurring.

- (3) The legislature further finds that the commercial agriculture, horticulture, and livestock industries are important components of the state economy that can be negatively impacted by interactions with wildlife. However, the legislature also finds that other landowners, both commercial and residential, may be faced with wildlife interactions that result in property damage. It is the intent of the legislature to craft a solution whereby all property owners have a potential avenue to petition the state for some mitigation of the damages caused by wildlife.
- (4) The legislature further finds that it is in the best interests of the state for the department of fish and wildlife to respond quickly to wildlife damage complaints and to work with those affected to prevent and minimize negative interactions while maintaining healthy wildlife populations.
- 24 (5) The legislature further finds that negative wildlife 25 interactions can be best reduced by encouraging landowners to 26 contribute, through their land management practices, to healthy 27 wildlife populations and to provide access for related recreation.
