

SHB 1365 - H AMD 86

By Representative Upthegrove

ADOPTED 02/26/2011

1 On page 2, beginning on line 11, after "megawatts" strike all
2 material through "Washington" on line 17 and insert "; or (b) solar
3 photovoltaic generation at a facility located in Washington that is
4 capable of generating not more than twenty average megawatts in a
5 calendar year and has by July 31, 2012, either: (i) A site
6 certification from the energy facility site evaluation council; or (ii)
7 a land use permit from a local government"

8 On page 4, after line 8, insert the following:

9 "NEW SECTION. Sec. 2. A new section is added to chapter 19.285
10 RCW to read as follows:

11 For a qualifying utility to count distributed generation from a
12 solar photovoltaic generation facility as defined under RCW
13 19.285.030(9)(b) at double the facility's electrical output, the
14 facility must have installed solar modules of which at least one-half
15 were manufactured in Washington.

16 NEW SECTION. Sec. 3. If any provision of this act or its
17 application to any person or circumstance is held invalid, the
18 remainder of the act or the application of the provision to other
19 persons or circumstances is not affected."

EFFECT: Modifies the definition of distributed generation to specify that a solar photovoltaic generation facility must have either a site certification from the energy facility site evaluation council or a land use permit from a local government by July 31, 2012, rather than by the effective date of this section. Specifies that in order for a qualifying utility to count distributed generation from a solar

photovoltaic generation facility at double the facility's electrical output, the facility must have installed solar modules of which at least one-half were manufactured in Washington. Adds a severability clause.
