

HB 2000 - DIGEST

Recognizes that implementing a regulatory scheme for the creation of a regulated market for the legal sale of marijuana is a very complex process involving uncharted legal territory.

Makes technical changes with the intent to: (1) Make them as minimal as possible;

(2) Ensure that such changes will better enable the timely development of a practical, viable regulatory scheme that continues to reflect the will of the voters; and

(3) Facilitate the successful creation of a carefully regulated and taxed marijuana market.
