

2SHB 2338 - H AMD 911

By Representative Harmsworth

1 On page 4, line 7, after "program." insert "The department must
2 attribute zero associated life-cycle greenhouse gas emissions for
3 electricity generated from any fossil fuels that a utility
4 demonstrates were used in order to provide capacity firming baseload
5 power related to intermittent renewable resources."

EFFECT: Requires the department of ecology's clean fuels program rules addressing the greenhouse gas emissions associated with electricity provided by electric utilities to attribute zero associated life-cycle greenhouse gas emissions to electricity generated by fossil fuels used by the utility to provide capacity firming baseload power related to intermittent renewable resources.
