

HB 2380 - DIGEST

Requires the utilities and transportation commission, working with the department of ecology, to develop a public outreach strategy designed to: (1) Improve consumer education regarding solid waste management; and

(2) Reduce rates of contamination in collected recyclable materials.

Requires the department of commerce to arrange for the completion of an economic analysis of solid waste and recyclable material processing, export, and disposal activities in the state.

Requires certain persons to annually report to the department of ecology the types and quantities of solid waste that are generated, stored, used, treated, processed, or disposed of by the facility.
