EFFECT: Establishes an alternative reporting requirement for critical access hospitals and sole community hospitals to report line items and amounts for other non-categorized revenues or expenses that represent the greater of \$1 million or one percent or more of the total expenses or revenues, rather than reporting those that either have a value of \$1 million or more or representing one percent or more of the total expenses or revenues.

Reduces the number of community benefits and community building activities that critical access hospitals and sole community hospitals must report from 20 to 10.
