

SHB 2804 - H AMD 1809

By Representative Pollet

ADOPTED 03/04/2020

1 On page 8, beginning on line 38, after "government has" strike
2 "consulted with a federally recognized Indian tribe when the project
3 may involve archeological, cultural, or natural resource sites of
4 significance to the tribe" and insert "an agreement on how formal
5 consultation will proceed, if the application is approved, with the
6 federally recognized Indian tribe or tribes with cultural or treaty
7 interests in the area when the project may involve archaeological,
8 cultural, natural resource sites of significance to the tribe, or
9 other treaty reserved rights or interests. This consultation is to
10 supplement rather than replace tribal consultation under Executive
11 Order 05-05 or subsequent executive orders issued to protect cultural
12 resources and treaty reserved rights or interests"
13

EFFECT: Requires a sponsoring local government that is applying for a state contribution toward a local revitalization project to provide documentation in its application showing that it has an agreement on how formal consultation will proceed with a federally recognized Indian tribe when the project involves an area in which the tribe may have treaty reserved rights or interests. Specifies that the consultation requirement supplements rather than replaces consultation required by an executive order.
