**HOUSE BILL 2048**

---

**State of Washington**

**66th Legislature**

**2019 Regular Session**

**By** Representatives Pettigrew, Schmick, Vick, and Fey

Read first time 02/14/19. Referred to Committee on Appropriations.

1 AN ACT Relating to inflation adjustments in nursing home payment  
2 rate setting; and amending RCW 74.46.561.

3 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

4 **Sec. 1.** RCW 74.46.561 and 2017 c 286 s 2 are each amended to  
5 read as follows:

6 (1) The legislature adopts a new system for establishing nursing  
7 home payment rates beginning July 1, 2016. Any payments to nursing  
8 homes for services provided after June 30, 2016, must be based on the  
9 new system. The new system must be designed in such a manner as to  
10 decrease administrative complexity associated with the payment  
11 methodology, reward nursing homes providing care for high acuity  
12 residents, incentivize quality care for residents of nursing homes,  
13 and establish minimum staffing standards for direct care.

14 (2) The new system must be based primarily on industry-wide  
15 costs, and have three main components: Direct care, indirect care,  
16 and capital.

17 (3) The direct care component must include the direct care and  
18 therapy care components of the previous system, along with food,  
19 laundry, and dietary services. Direct care must be paid at a fixed  
20 rate, based on one hundred percent or greater of statewide case mix  
21 neutral median costs, but shall be set so that a nursing home

1 provider's direct care rate does not exceed one hundred eighteen  
2 percent of its base year's direct care allowable costs except if the  
3 provider is below the minimum staffing standard established in RCW  
4 74.42.360(2). Direct care must be performance-adjusted for acuity  
5 every six months, using case mix principles. Direct care must be  
6 regionally adjusted using county wide wage index information  
7 available through the United States department of labor's bureau of  
8 labor statistics. There is no minimum occupancy for direct care. The  
9 direct care component rate allocations calculated in accordance with  
10 this section must be adjusted to the extent necessary to comply with  
11 RCW 74.46.421.

12 (4) The indirect care component must include the elements of  
13 administrative expenses, maintenance costs, and housekeeping services  
14 from the previous system. A minimum occupancy assumption of ninety  
15 percent must be applied to indirect care. Indirect care must be paid  
16 at a fixed rate, based on ninety percent or greater of statewide  
17 median costs. The indirect care component rate allocations calculated  
18 in accordance with this section must be adjusted to the extent  
19 necessary to comply with RCW 74.46.421.

20 (5) The capital component must use a fair market rental system to  
21 set a price per bed. The capital component must be adjusted for the  
22 age of the facility, and must use a minimum occupancy assumption of  
23 ninety percent.

24 (a) Beginning July 1, 2016, the fair rental rate allocation for  
25 each facility must be determined by multiplying the allowable nursing  
26 home square footage in (c) of this subsection by the RS means rental  
27 rate in (d) of this subsection and by the number of licensed beds  
28 yielding the gross unadjusted building value. An equipment allowance  
29 of ten percent must be added to the unadjusted building value. The  
30 sum of the unadjusted building value and equipment allowance must  
31 then be reduced by the average age of the facility as determined by  
32 (e) of this subsection using a depreciation rate of one and one-half  
33 percent. The depreciated building and equipment plus land valued at  
34 ten percent of the gross unadjusted building value before  
35 depreciation must then be multiplied by the rental rate at seven and  
36 one-half percent to yield an allowable fair rental value for the  
37 land, building, and equipment.

38 (b) The fair rental value determined in (a) of this subsection  
39 must be divided by the greater of the actual total facility census

1 from the prior full calendar year or imputed census based on the  
2 number of licensed beds at ninety percent occupancy.

3 (c) For the rate year beginning July 1, 2016, all facilities must  
4 be reimbursed using four hundred square feet. For the rate year  
5 beginning July 1, 2017, allowable nursing facility square footage  
6 must be determined using the total nursing facility square footage as  
7 reported on the medicaid cost reports submitted to the department in  
8 compliance with this chapter. The maximum allowable square feet per  
9 bed may not exceed four hundred fifty.

10 (d) Each facility must be paid at eighty-three percent or greater  
11 of the median nursing facility RS means construction index value per  
12 square foot for Washington state. The department may use updated RS  
13 means construction index information when more recent square footage  
14 data becomes available. The statewide value per square foot must be  
15 indexed based on facility zip code by multiplying the statewide value  
16 per square foot times the appropriate zip code based index. For the  
17 purpose of implementing this section, the value per square foot  
18 effective July 1, 2016, must be set so that the weighted average  
19 (~~FRV~~ [~~fair rental value~~]) fair rental value rate is not less than  
20 ten dollars and eighty cents (~~ppd~~ [~~per patient day~~]) per patient  
21 day. The capital component rate allocations calculated in accordance  
22 with this section must be adjusted to the extent necessary to comply  
23 with RCW 74.46.421.

24 (e) The average age is the actual facility age reduced for  
25 significant renovations. Significant renovations are defined as those  
26 renovations that exceed two thousand dollars per bed in a calendar  
27 year as reported on the annual cost report submitted in accordance  
28 with this chapter. For the rate beginning July 1, 2016, the  
29 department shall use renovation data back to 1994 as submitted on  
30 facility cost reports. Beginning July 1, 2016, facility ages must be  
31 reduced in future years if the value of the renovation completed in  
32 any year exceeds two thousand dollars times the number of licensed  
33 beds. The cost of the renovation must be divided by the accumulated  
34 depreciation per bed in the year of the renovation to determine the  
35 equivalent number of new replacement beds. The new age for the  
36 facility is a weighted average with the replacement bed equivalents  
37 reflecting an age of zero and the existing licensed beds, minus the  
38 new bed equivalents, reflecting their age in the year of the  
39 renovation. At no time may the depreciated age be less than zero or  
40 greater than forty-four years.

1 (f) A nursing facility's capital component rate allocation must  
2 be rebased annually, effective July 1, 2016, in accordance with this  
3 section and this chapter.

4 (6) A quality incentive must be offered as a rate enhancement  
5 beginning July 1, 2016.

6 (a) An enhancement no larger than five percent and no less than  
7 one percent of the statewide average daily rate must be paid to  
8 facilities that meet or exceed the standard established for the  
9 quality incentive. All providers must have the opportunity to earn  
10 the full quality incentive payment.

11 (b) The quality incentive component must be determined by  
12 calculating an overall facility quality score composed of four to six  
13 quality measures. For fiscal year 2017 there shall be four quality  
14 measures, and for fiscal year 2018 there shall be six quality  
15 measures. Initially, the quality incentive component must be based on  
16 minimum data set quality measures for the percentage of long-stay  
17 residents who self-report moderate to severe pain, the percentage of  
18 high-risk long-stay residents with pressure ulcers, the percentage of  
19 long-stay residents experiencing one or more falls with major injury,  
20 and the percentage of long-stay residents with a urinary tract  
21 infection. Quality measures must be reviewed on an annual basis by a  
22 stakeholder work group established by the department. Upon review,  
23 quality measures may be added or changed. The department may risk  
24 adjust individual quality measures as it deems appropriate.

25 (c) The facility quality score must be point based, using at a  
26 minimum the facility's most recent available three-quarter average  
27 CMS [centers for medicare and medicaid services] quality data. Point  
28 thresholds for each quality measure must be established using the  
29 corresponding statistical values for the quality measure (~~((QM))~~)  
30 point determinants of eighty (~~((QM))~~) quality measure points, sixty  
31 (~~((QM))~~) quality measure points, forty (~~((QM))~~) quality measure points,  
32 and twenty (~~((QM))~~) quality measure points, identified in the most  
33 recent available five-star quality rating system technical user's  
34 guide published by the center for medicare and medicaid services.

35 (d) Facilities meeting or exceeding the highest performance  
36 threshold (top level) for a quality measure receive twenty-five  
37 points. Facilities meeting the second highest performance threshold  
38 receive twenty points. Facilities meeting the third level of  
39 performance threshold receive fifteen points. Facilities in the  
40 bottom performance threshold level receive no points. Points from all

1 quality measures must then be summed into a single aggregate quality  
2 score for each facility.

3 (e) Facilities receiving an aggregate quality score of eighty  
4 percent of the overall available total score or higher must be placed  
5 in the highest tier (tier V), facilities receiving an aggregate score  
6 of between seventy and seventy-nine percent of the overall available  
7 total score must be placed in the second highest tier (tier IV),  
8 facilities receiving an aggregate score of between sixty and sixty-  
9 nine percent of the overall available total score must be placed in  
10 the third highest tier (tier III), facilities receiving an aggregate  
11 score of between fifty and fifty-nine percent of the overall  
12 available total score must be placed in the fourth highest tier (tier  
13 II), and facilities receiving less than fifty percent of the overall  
14 available total score must be placed in the lowest tier (tier I).

15 (f) The tier system must be used to determine the amount of each  
16 facility's per patient day quality incentive component. The per  
17 patient day quality incentive component for tier IV is seventy-five  
18 percent of the per patient day quality incentive component for tier  
19 V, the per patient day quality incentive component for tier III is  
20 fifty percent of the per patient day quality incentive component for  
21 tier V, and the per patient day quality incentive component for tier  
22 II is twenty-five percent of the per patient day quality incentive  
23 component for tier V. Facilities in tier I receive no quality  
24 incentive component.

25 (g) Tier system payments must be set in a manner that ensures  
26 that the entire biennial appropriation for the quality incentive  
27 program is allocated.

28 (h) Facilities with insufficient three-quarter average CMS  
29 [centers for medicare and medicaid services] quality data must be  
30 assigned to the tier corresponding to their five-star quality rating.  
31 Facilities with a five-star quality rating must be assigned to the  
32 highest tier (tier V) and facilities with a one-star quality rating  
33 must be assigned to the lowest tier (tier I). The use of a facility's  
34 five-star quality rating shall only occur in the case of insufficient  
35 CMS [centers for medicare and medicaid services] minimum data set  
36 information.

37 (i) The quality incentive rates must be adjusted semiannually on  
38 July 1 and January 1 of each year using, at a minimum, the most  
39 recent available three-quarter average CMS [centers for medicare and  
40 medicaid services] quality data.

1 (j) Beginning July 1, 2017, the percentage of short-stay  
2 residents who newly received an antipsychotic medication must be  
3 added as a quality measure. The department must determine the quality  
4 incentive thresholds for this quality measure in a manner consistent  
5 with those outlined in (b) through (h) of this subsection using the  
6 centers for medicare and medicaid services quality data.

7 (k) Beginning July 1, 2017, the percentage of direct care staff  
8 turnover must be added as a quality measure using the centers for  
9 medicare and medicaid services' payroll-based journal and nursing  
10 home facility payroll data. Turnover is defined as an employee  
11 departure. The department must determine the quality incentive  
12 thresholds for this quality measure using data from the centers for  
13 medicare and medicaid services' payroll-based journal, unless such  
14 data is not available, in which case the department shall use direct  
15 care staffing turnover data from the most recent medicaid cost  
16 report.

17 (7) Reimbursement of the safety net assessment imposed by chapter  
18 74.48 RCW and paid in relation to medicaid residents must be  
19 continued.

20 (8) The direct care and indirect care components must be rebased  
21 ~~((in even-numbered years))~~ annually, beginning with rates paid on  
22 July 1, ~~((2016))~~ 2019. Rates paid on July 1, ~~((2016))~~ 2019, must be  
23 based on the ~~((2014))~~ 2017 calendar year cost report. ~~((On a~~  
24 ~~percentage basis, after rebasing, the department must confirm that~~  
25 ~~the statewide average daily rate has increased at least as much as~~  
26 ~~the average rate of inflation, as determined by the skilled nursing~~  
27 ~~facility market basket index published by the centers for medicare~~  
28 ~~and medicaid services, or a comparable index. If after rebasing, the~~  
29 ~~percentage increase to the statewide average daily rate is less than~~  
30 ~~the average rate of inflation for the same time period, the~~  
31 ~~department is authorized to increase rates by the difference between~~  
32 ~~the percentage increase after rebasing and the average rate of~~  
33 ~~inflation.))~~ The cost report used for rate setting is known as the  
34 base year cost report. Cost report information must be adjusted to  
35 recognize inflation between the midpoint of the base year cost report  
36 and the beginning of the rate year. Separate inflation adjustments  
37 for the direct care and indirect care components must be based on the  
38 annual average rate of inflation as determined by the most recent  
39 twelve-month consumer price index for all urban consumers (CPI urban)  
40 as published by the United State bureau of labor statistics.

1           (9) The direct care component provided in subsection (3) of this  
2 section is subject to the reconciliation and settlement process  
3 provided in RCW 74.46.022(6). Beginning July 1, 2016, pursuant to  
4 rules established by the department, funds that are received through  
5 the reconciliation and settlement process provided in RCW  
6 74.46.022(6) must be used for technical assistance, specialized  
7 training, or an increase to the quality enhancement established in  
8 subsection (6) of this section. The legislature intends to review the  
9 utility of maintaining the reconciliation and settlement process  
10 under a price-based payment methodology, and may discontinue the  
11 reconciliation and settlement process after the 2017-2019 fiscal  
12 biennium.

13           (10) Compared to the rate in effect June 30, 2016, including all  
14 cost components and rate add-ons, no facility may receive a rate  
15 reduction of more than one percent on July 1, 2016, more than two  
16 percent on July 1, 2017, or more than five percent on July 1, 2018.  
17 To ensure that the appropriation for nursing homes remains cost  
18 neutral, the department is authorized to cap the rate increase for  
19 facilities in fiscal years 2017, 2018, and 2019.

--- END ---
