

**SHB 2279 - H AMD 918**

By Representative Taylor

1 Strike everything after the enacting clause and insert the  
2 following:

3 "NEW SECTION. **Sec. 1.** A new section is added to chapter 71A.10  
4 RCW to read as follows:

5 (1) When enrolling eligible clients in open home and community-  
6 based services waiver slots and for purposes of determining access to  
7 specific waiver services, to the extent consistent with federal law  
8 and federal funding requirements, the administration shall prioritize  
9 clients in the following populations in addition to any other  
10 statutorily prioritized populations:

11 (a) Persons with developmental disabilities who are age 45 and  
12 older;

13 (b) Persons with developmental disabilities who, within the  
14 previous six months, have remained in a hospital without a safe  
15 discharge plan; and

16 (c) Persons who are discharging from institutional settings  
17 including residential habilitation centers and state hospitals.

18 (2) The department shall routinely collect data on the following  
19 items related to the populations identified in subsection (1) of this  
20 section:

21 (a) Age of the client's primary caregiver, if cared for by a  
22 parent, relative, or other nonprofessional caregiver;

23 (b) Type of residence, and, if a family home, other adults living  
24 in the home who are or could potentially be appropriate caregivers;  
25 and

26 (c) Barriers identified to access services needed in order for  
27 the client to live or continue to live in a community setting."

28 Correct the title.

EFFECT: Retains the provisions of the underlying bill with the following changes:

Modifies the categories of Developmental Disabilities Administration (DDA) clients that must be prioritized for waiver

slots and access to waiver services by: (1) Indicating that the persons who are prioritized due to remaining in a hospital are those without a safe discharge plan, rather than those who have remained in that setting without medical necessity due to lack of community-based services and supports; and (2) expanding the category of those discharging from residential habilitation centers to also include those discharging from other institutional settings including state hospitals.

Requires the DDA to routinely collect specified data related to prioritized populations.
