*This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not part of the legislation nor does it constitute a statement of legislative intent.*

**Background:**

Community Economic Revitalization Board.

The Community Economic Revitalization Board (CERB) provides financial assistance to local governments and federally recognized tribes for public infrastructure that encourages new business development and economic growth. The Department of Commerce provides administrative support for the CERB. The CERB is authorized to make direct loans and grants to political subdivisions of the state and to federally recognized tribes to finance public facilities. Loans and grants are available for eligible broadband infrastructure projects.

Community Economic Revitalization Board Rural Broadband Program.

Since 2018 the CERB has operated a Rural Broadband Program (Program), which provides grants and loans to local governments and federally recognized tribes for the purposes of financing the cost to build infrastructure to provide high-speed, open-access broadband service to rural and underserved communities for the purposes of economic development or community development. The Program was first authorized in the 2018 Supplemental Capital Budget and most recently received additional funding in the 2021-2023 Capital Budget.

No more than 50 percent of the funds may be awarded as grants in any biennium. Local governments and federally recognized tribes located in rural counties or a rural community, as defined by the CERB, may apply for the Program.

When evaluating and prioritizing projects, the CERB must consider:

- the project's value to the community, feasibility, and readiness to proceed;
- the commitment of local matching resources and local participation;
- if the project uses a technology-neutral approach in order to expand access at the lowest cost; and
- if the project is included in a capital facilities plan, comprehensive plan, or local economic development plan consistent with applicable state planning requirements.

Before any financial assistance application is approved, the local government or the federally recognized tribe seeking the assistance must demonstrate to the CERB that no other timely source of funding is available to it at costs reasonably similar to financing available from the CERB.

---

**Summary of Bill:**

The Community Economic Revitalization Board Rural Broadband Program is codified.

---

**Appropriation:** None.

**Fiscal Note:** Available.

**Effective Date:** The bill takes effect 90 days after adjournment of the session in which the bill is passed.

**Staff Summary of Public Testimony:**

(In support) Codifying the Community Economic Revitalization Board Rural Broadband Program (Program) will help rural and tribal communities. The Community Economic Revitalization Board (CERB) has a great track record of working with communities and funding important broadband projects. Health care, education, and emergency management systems are increasingly reliant on high-speed internet. Rural and tribal communities feel the effects of having inadequate connections. Private industry has not stepped up to provide significant capital investment in broadband infrastructure in many rural areas of the state. Not every broadband project is eligible for federal funding, and not all communities can provide required matching funds for broadband grants. The CERB can help bridge important gaps in broadband funding by remaining a flexible source of funding. With the help of the CERB, port districts have made investments in broadband infrastructure across the state, which allow internet providers to provide high-speed service in new areas. Funding requirements related to project viability and feasibility can create challenges in rural areas. A lack of broadband funding often causes rural areas to have to create piecemeal networks using all available technologies. Funding from the CERB can provide wins for both urban and rural areas by creating cost-efficient uses of infrastructure. This bill will allow the Program to operate independently from separate capital appropriations. This bill is not an added cost for the Legislature.

(Opposed) None.

**Persons Testifying:** Representative Kevin Waters, prime sponsor; Jennifer Wray-Keene, Port of Woodland; Ariane Schmidt, BROADLINC Public Development Authority; Glenn Ellis, Jr., Makah Tribal Council; Steve MacDonald, City of Spokane; Mike Mason, Community Economic Revitalization Board; and Chris Herman, Washington Public Ports Association.

**Persons Signed In To Testify But Not Testifying:** None.
