This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not part of the legislation nor does it constitute a statement of legislative intent.

Staff: Lily Smith (786-7175).

Background:

The Department of Health (DOH) provides services to promote and protect public health in Washington. The DOH works with local health jurisdictions, tribal partners, and state healthcare systems to provide technical assistance and strategic planning related to public health.

Summary of Amended Bill:

The DOH must develop, implement, and maintain a drug overdose prevention campaign, which must include information on dangers and harms related to drug use and provide outreach to youth and adults. In consultation with the Health Care Authority (HCA), the campaign may include additional information on addiction and overdose prevention, resources for treatment, and immunity for those seeking medical assistance. The 2024 and 2025 campaigns must include specific information regarding dangers associated with synthetic opioids.

Beginning June 30, 2025, the DOH must submit an annual report to the Legislature with information on the content, effectiveness and distribution of the campaign, including recommendations on the potential continuation of the campaign.

Appropriation: None.

Fiscal Note: Available.

Effective Date: The bill takes effect 90 days after adjournment of the session in which the bill is passed. However, the bill is null and void unless funded in the budget.

Staff Summary of Public Testimony:

(In support) It is important that the messaging in the information campaign be done correctly and not just scare people by talking about harms and consequences. The DOH should be given broad authority to determine the appropriate messaging.

(Opposed) None.

Persons Testifying: Scott Waller, Washington Association for Substance Misuse and Violence Prevention.

Persons Signed In To Testify But Not Testifying: None.
