

RCW 48.76.060 Requirements when specified methods of minimum values determination unfeasible. In the case of any plan of life insurance which provides for future premium determination, the amounts of which are to be determined by the insurance company based on their estimates of future experience, or in the case of any plan of life insurance which is of such a nature that minimum values cannot be determined by the methods described in RCW 48.76.020 through 48.76.050, then:

(1) The commissioner must be satisfied that the benefits provided under the plan are substantially as favorable to policyholders and insureds as the minimum benefits otherwise required by RCW 48.76.020 through 48.76.050;

(2) The commissioner must be satisfied that the benefits and the pattern of premiums of that plan are not such as to mislead prospective policyholders or insureds;

(3) The cash surrender values and paid-up nonforfeiture benefits provided by such plan must not be less than the minimum values and benefits required for the plan computed by a method consistent with the principles of this chapter, as determined by regulations promulgated by the commissioner. [1982 1st ex.s. c 9 § 15.]
