

RCW 52.26.040 Planning committee—Formulation of service plan—Competition with private ambulance service. (1) A regional fire protection service authority planning committee shall adopt a regional fire protection service authority plan providing for the governance, design, financing, and development of fire protection and emergency services. The planning committee may consider the following factors in formulating its plan:

(a) Land use planning criteria; and

(b) The input of cities and counties located within, or partially within, a participating fire protection jurisdiction.

(2) The planning committee may coordinate its activities with neighboring cities, towns, and other local governments that engage in fire protection planning.

(3) The planning committee shall:

(a) Create opportunities for public input in the development of the plan;

(b) Adopt a plan proposing the creation of a regional fire protection service authority and recommending governance, design, financing, and development of fire protection and emergency service facilities and operations, including maintenance and preservation of facilities or systems. The plan may authorize the authority to establish a system of ambulance service to be operated by the authority or operated by contract after a call for bids. However, the authority shall not provide for the establishment of an ambulance service that would compete with any existing private ambulance service, unless the authority determines that the region served by the authority, or a substantial portion of the region served by the authority, is not adequately served by an existing private ambulance service. In determining the adequacy of an existing private ambulance service, the authority shall take into consideration objective generally accepted medical standards and reasonable levels of service which must be published by the authority. Following the preliminary conclusion by the authority that the existing private ambulance service is inadequate, and before establishing an ambulance service or issuing a call for bids, the authority shall allow a minimum of sixty days for the private ambulance service to meet the generally accepted medical standards and accepted levels of service. In the event of a second preliminary conclusion of inadequacy within a twenty-four-month period, the authority may immediately issue a call for bids or establish its own ambulance service and is not required to afford the private ambulance service another sixty-day period to meet the generally accepted medical standards and reasonable levels of service. A private ambulance service that is not licensed by the department of health or whose license is denied, suspended, or revoked is not entitled to a sixty-day period within which to demonstrate adequacy and the authority may immediately issue a call for bids or establish an ambulance service; and

(c) In the plan, recommend sources of revenue authorized by RCW 52.26.050, identify the portions of the plan that may be amended by the board of the authority without voter approval, consistent with RCW 52.26.050, and recommend a financing plan to fund selected fire protection and emergency services and projects.

(4) Once adopted, the plan must be forwarded to the participating fire protection jurisdictions' governing bodies to initiate the election process under RCW 52.26.060.

(5) If the ballot measure is not approved, the planning committee may redefine the selected regional fire protection service authority projects, financing plan, and the ballot measure. The fire protection jurisdictions' governing bodies may approve the new plan and ballot measure, and may then submit the revised proposition to the voters at a subsequent election or a special election. If a ballot measure is not approved by the voters by the third vote, the planning committee is dissolved. [2011 c 141 § 2; 2006 c 200 § 2; 2004 c 129 § 4.]
