

RCW 43.21A.415 Marine pollution—Baseline study program—Scope of database produced. The database produced by such studies should include chemical, physical, and biological parameters of the waters, complete information on marine pollution accidents, and an economic evaluation of the marine resources and shoreline properties that may be damaged or impaired by oil pollution. Where oceanographic and water quality instrumentation is used to gather data, such instruments shall be standardized and intercalibrated. [1973 2nd ex.s. c 30 § 3.]
