WAC 220-16-015 General definitions—Trawl gear.

(1) "Otter trawl" shall be defined as a cone or funnel-shaped net which is towed or drawn through the water by one or two vessels. Otter trawl nets may be used both on and off the seabed. Otter trawl nets may be fished with or without trawl doors, and may employ warps or cables to direct fish. Otter trawl nets are restricted to the following three categories:

(a) "Bottom trawl" means an otter trawl in which the otter boards or the footrope of the net contact the seabed, and includes Danish and Scottish seine gear.

(b) "Roller trawl" or "bobbin trawl" are identical, and mean an otter trawl with footropes equipped with rollers or bobbins made of wood, steel, rubber, plastic, or other hard material which protects the net during fishing on the seabed.

(c) "Pelagic trawl" means an otter trawl in which the otter boards may be in contact with the seabed but the footrope of the net remains above the seabed. Pelagic trawl nets may not have footropes protected at the trawl mouth with rollers, bobbins, or discs.

(2) "Beam trawl" shall be defined as a bag-shaped trawl net not utilizing weighted otter frames or otter doors when operated. The minimum mesh size for beam trawl nets is four and one-half inches in a food fish fishery and one and one-half inches in a shrimp fishery, unless otherwise provided.

(3) "Shrimp trawl" shall be defined as a tapered, funnel-shaped trawl net in which the mesh size is two inches or less in the intermediate and codend sections of the trawl. Otter doors or boards are used to spread the mouth of the net horizontally as it is towed. The mouth of the net is formed on the upper edge by a line to which floats are attached (headrope) and on the lower edge by a line which is usually weighted (footrope). Additional webbing is frequently attached to the codend section to prevent the net from chafing.

(4) "Scallop dredge" shall be defined as trawl gear with interlocking metal ring meshes, which is legal gear for harvest of scallops.

(5) "Codend" shall be defined as the terminal, closed end of a trawl net.

(a) Single-walled codend is a codend constructed of a single wall of webbing knitted with single-ply mesh, or with double-ply mesh (double twine tied into a single knot).

(b) Double-walled codend is a codend constructed of two walls of webbing. The double-walled portion of the

codend must be tied knot-to-knot to the trawl net, and may not be longer than twenty-five trawl meshes or twelve feet, whichever is greater. The use of double-walled codends is unlawful in pelagic trawls, roller trawls, and bobbin trawls.

(6) "Chafing gear" shall be defined as webbing or other material attached to the bottom (underside) or around the codend of a trawl net to protect the codend from wear. Chafing gear must not be connected to the terminal (closed) end of the codend.

(7) "Trawl riblines" shall be defined as heavy ropes or lines that run down the sides, top or underside of a trawl net from the mouth of the net to the terminal end of the codend to strengthen the net during fishing.

(8) "Trawl mesh size" shall be defined as the distance between the inside of one knot and the inside of the opposite vertical knot in trawl mesh. Minimum trawl mesh size requirements are met if a wedge of legal size can be passed without undue force through sixteen of twenty sets of two meshes each of wet mesh in the codend. [Statutory Authority: RCW 75.08.080. 82-14-056 (Order 82-72), § 220-16-015, filed 7/1/82; Order 810, § 220-16-015, filed 4/17/69. Formerly WAC 220-16-010 (part).]

WAC 220-16-055 Definitions--Hook and line--Angling. "Hook and line" and "angling" shall be identical in meaning and, except as provided in WAC 220-56-115, shall be defined as the use of not more than one line with one lure in the act of fishing for personal use and not for sale or barter, to be attached to a pole held in hand while landing fish, or the use of a hand operated line without rod or reel, to which may be attached not more than one lure. When fishing for bottomfish, "angling" and "jigging" shall be identical in meaning. [Statutory Authority: RCW 75.08.080. 82-13-040 (Order 82-61), § 220-16-055, filed 6/9/82; Order 810, § 220-16-055, filed 4/17/69. Formerly WAC 220-16-010 (part).]

WAC 220-16-070 Repealed. See Disposition Table at beginning of this chapter.

WAC 220-16-090 Definitions--Set line. "Set line" shall be defined as a stationary, buoyed, and anchored ground line with hooks attached. [Statutory Authority: RCW 75.08.080. 82-14-056 (Order 82-72), § 220-16-090, filed 7/1/82; Order 810, § 220-16-090, filed 4/17/69. Formerly WAC 220-16-010 (part).]

WAC 220-16-126 Troll spread. "Troll spread" shall be defined as a readily detachable line more than 4 inches in length, which has one or more lures attached to it, and is attached to the main troll line which cannot be removed from the vessel during its operation. [Statutory Authority: RCW 75.08.080. 82-14-056 (Order 82-72), § 220-16-126, filed 7/1/82.]

WAC 220-16-130 Repealed. See Disposition Table at beginning of this chapter.

WAC 220-16-132 Repealed. See Disposition Table at beginning of this chapter.

WAC 220-16-145 Definitions--Bottomfish pot. "Bottomfish pot" shall be defined as a portable, enclosed device with one or more gates or entrances and one or

more lines attached to surface floats. Bottomfish pots must have biodegradable escape panels constructed with #21 or smaller untreated cotton twine in such a manner that an opening at least eight inches in diameter results when the twine deteriorates. [Statutory Authority: RCW 75.08.080. 82-14-056 (Order 82-72), § 220-16-145, filed 7/1/82; Order 866, § 220-16-145, filed 6/12/70.]

WAC 220-16-257 Razor clam beds. "Razor clam beds" are defined as that portion of Pacific Ocean beaches westerly of a line 500 feet seaward and parallel to the base of the primary dune or cliff or any portion of Pacific Ocean beaches posted as a razor clam bed and marked with boundary markers. The detached Willapa Harbor Spits that are north of Ledbetter Channel, west of Ellen Sands and south of the Willapa Ship Channel are also defined as "razor clam beds," as are those portions of the mouths of Grays Harbor and Willapa Harbor which contain razor clams. [Statutory Authority: RCW 75.08.080. 82-07-047 (Order 82-19), § 220-16-257, filed 3/18/82; 80-13-064 (Order 80-123), § 220-16-257, filed 9/17/80.]

WAC 220-16-315 General definitions--Net mesh measurement. The size of a mesh of any net shall be defined as the distance between the inside of one knot to the outside of the opposite vertical knot of one mesh when the mesh is stretched vertically, while wet, by using a tension of ten pounds on any three consecutive meshes, then measuring the middle mesh of the three while under tension; trawl net mesh - see WAC 220-16-015. [Statutory Authority: RCW 75.08.080. 82-14-056 (Order 82-72), § 220-16-315, filed 7/1/82; 82-03-045 (Order 82-6), § 220-16-315, filed 1/19/82; Order 1105, § 220-16-315, filed 12/28/73; Order 817, § 220-16-315, filed 5/29/69. Formerly WAC 220-16-030 (part).]

during an open-application period established by the department, submitted on a departmental form and from an individual listed as a vessel owner on a license who has not accepted retraining benefits under a buy-back program administered by the department. The applicant must provide his name, address, phone number, and date of birth together with a description of the vessel, a list of licenses, and license numbers held at the time of application and a statement of whether the applicant is offering the license(s) only or the license(s) and vessel restriction pursuant to WAC 220-95-021. [Statutory Authority: RCW 75.08.080. 82-19-082 (Order 82-141), § 220-95-011, filed 9/21/82.]

WAC 220-95-012 Marginal production. (1) In order to sell license, gear and vessel to the program, a commercial salmon fisherman must document, in the form of Washington state fish receiving tickets, a cumulative average catch in the top 95 percent of their respective fleet's average annual production during the base period 1973-1977. Commercial salmon fishermen landing catches in the bottom five percent of their fleet's average annual production for the same base period will be eligible to sell only licenses to the program.

(2) In order to sell license, gear and vessel to the program, a salmon charter license holder must document, in the form of income tax records, a level of income derived from charter fishing generated by the license for sale of at least \$4,000 in Washington state in any one of the years 1978, 1979, and 1980. Charter salmon license holders with an income of less than \$4,000 for 1978, 1979, or 1980 are eligible to sell only licenses to the program. [Statutory Authority: RCW 75.08.080. 81-09-018 (Order 81-22), § 220-95-012, filed 4/10/81.]

WAC 220-95-015 Repealed. See Disposition Table at beginning of this table.

WAC 220-95-016 Ranking of applications. (1) The department shall separate applicants into one of the following license categories:

- (a) Troll and vessel delivery permit;
- (b) Purse seine;
- (c) Puget Sound gill net;
- (d) Willapa and Grays Harbor gill net;
- (e) Charter;
- (f) Reef net.

(2) The department shall establish priority rankings within each category. The department shall use license and catch records maintained by the department and may, for charters, use other license and catch records as the director finds appropriate to establish the rankings. Within a category, the department shall rank applicants beginning with applicants who have held a license the greatest cumulative number of years. For applicants other than charters with the same number of years, the department shall rank applicants beginning with the largest average poundage catch within the state for the years 1973-1977. For charters with the same number of years, the department shall rank applicants beginning with the highest average income generated by the license

for sale in 1978, 1979, and 1980. The department shall accept only federal income tax records to document income.

(3) A marginal fisherman is a fisherman having an average catch for 1973-1977 ranked in the bottom five percent of all catches in that respective license category or a charter boat owner who cannot document at least four thousand dollars of income derived in Washington state from charter fishing generated by the license for sale in 1978, 1979, or 1980. The department shall accept only federal income tax records to document required income. [Statutory Authority: RCW 75.08.080. 82-19-082 (Order 82-141), § 220-95-016, filed 9/21/82.]

WAC 220-95-020 Repealed. See Disposition Table at beginning of this table.

WAC 220-95-021 Program options. (1) The department may purchase either an applicant's license(s) or an applicant's license(s) and a restriction on the vessel prohibiting the vessel's use as a commercial or charter salmon fishing vessel or salmon delivery vessel.

(2) The department may purchase license(s) or vessel restriction if the applicant's vessel is currently licensed to fish for or deliver salmon within the state and the applicant is qualified pursuant to RCW 75.28.510.

(3) Each vessel use restriction shall be purchased for thirty percent of the fair market value of the vessel. Purchase offers will be made in order of priority ranking established for each category of applicants pursuant to WAC 220-95-016.

(4) The department shall not purchase vessel use restrictions from marginal applicants as defined in WAC 220-95-016.

(5) License and vessel values shall be established as provided in WAC 220-95-026. After the value of the vessel has been established and the applicant has provided paid receipts for the first two surveys, the department may communicate a purchase offer to the applicant. If the applicant accepts the offer, the applicant shall sign and return the offer within ten calendar days of the date of the offer.

(6) The department may not purchase more than one vessel restriction or license from an applicant until all applicants have had an opportunity to sell.

(7) A person who previously sold either a vessel or license to the program may sell only other licenses and restrictions on other vessels owned at the time the person first sold to the program. [Statutory Authority: RCW 75.08.080. 82-19-082 (Order 82-141), § 220-95-021, filed 9/21/82.]

WAC 220-95-026 Surveys--Vessels--License--Permit values. (1) The department shall conduct a yearly market survey in consultation with the advisory board established pursuant to RCW 75.28.530 in order to determine the fair market value of licenses in each license category.

(2) The department shall establish fair market value for vessels using the following method:

(a) Each vessel shall be surveyed by two marine surveyors chosen by the applicant from a list provided by the department.

(b) A third survey shall be done if the value of the lower survey is less than fifty thousand dollars and the difference between the surveys is more than twenty percent of the lower survey, or the value of the lower survey is more than fifty thousand dollars and the difference between the surveys is more than ten percent of the lower survey value. The department shall randomly select the third surveyor from the same list supplied to the applicant. The department shall not conduct a third survey until the applicant provides the department with paid receipts for the first two surveys.

(c) The applicant and program manager or their representatives shall be in attendance during each survey.

(d) Each surveyor shall send copies of the survey to the applicant and to the department.

(e) The cost of the first two surveys shall be borne by the applicant. The department shall reimburse this cost if the applicant accepts the purchase offer. The cost of the third survey shall be borne by the department.

(f) The fair market value of the vessel shall be computed by the department averaging the two closest survey values.

(g) The department shall maintain confidentiality of the surveys prior to completion of the purchase by the department. [Statutory Authority: RCW 75.08.080. 82-19-082 (Order 82-141), § 220-95-026, filed 9/21/82.]

(b) Use the vessel as a commercial or charter salmon fishing vessel or as a salmon delivery vessel other than as a vessel used for angling or other personal use in waters outside the three mile limit off the Washington coast in an area from the southern jetty at the mouth of the Columbia River north to the United States/Canadian border.

(c) Use the vessel as a commercial or charter salmon fishing vessel or as a salmon delivery vessel with the intent to deliver fish in another state, in waters outside the three mile limit off the Washington coast in an area from the southern jetty at the mouth of the Columbia river north to the United States/Canadian border.

(2) Failure to comply with the provisions of subsection (1) of this section will cause the state substantial damage and the amount of damage will be difficult to ascertain precisely. The vessel owner will pay to the

department of fisheries as liquidated damages, in addition to all other sums payable hereunder, two hundred dollars for each day or portion thereof on which the vessel is used by any person or entity in violation of the provisions of subsection (1) of this section.

(3) The department shall have relief by injunction to prevent the operation of the vessel for the purposes prohibited in subsection (1) of this section, together with any other relief provided by law. If the vessel is used for any purpose in violation of subsection (1) of this section, in addition to any other penalties provided by law, said vessel's fish, equipment, gear and personal property on board will be subject to immediate confiscation by, and forfeiture to, the state without notice to any owner or user of the vessel. If catches of the vessel prohibited by subsection (1) of this section have been sold or transferred, the owner or user of the vessel is liable to the department in the amount thereof and all Washington state commercial fishing licenses and/or permits issued to the owner or user shall be immediately revoked without notice by the department.

(4) The vessel owner and any subsequent transferee assigns to the department any and all rights to enforce the provisions of subsection (1) of this section. At any time the department may inspect the vessel for the limited purpose of ascertaining whether the vessel is being used for any purpose or use in violation of subsection (1) of this section. If any subsequent transferee is a treaty Indian, the department will require proof of treaty status prior to approving a transfer of vessel ownership or use. Nonapplicability of use restrictions to treaty Indians will not affect imposition of use restrictions to non-Indian transferees, owners or users of any vessel.
