508-60-008 Exemptions.

WAC 508-60-008 Exemptions. Certain limited amounts and types of construction associated with existing residential or nonresidential structures within flood control zones is not considered to have an effect upon floodwaters. It is appropriate then that applications for flood control zone permits and flood control zone permits not be necessary in these instances.

Construction work to be performed on existing residential or nonresidential structures within either the floodway or floodway fringe areas of flood control zones is exempted from the provisions of chapter 86.16 RCW and chapter 508-60 WAC if both of the following conditions apply:

(1) Repairs, reconstruction, or improvements to a structure which do not increase the ground floor area; and

(2) Repairs, reconstruction, or improvements to a structure the cost of which does not exceed fifty percent of the market value of the structure either, (a) before the repair, reconstruction, or repair is started, or (b) if the structure has been damaged, and is being restored, before the damage occurred. Work done on structures to comply with existing health, sanitary, or safety codes or to structures identified as historic places is not included in the fifty percent determination.

WAC 508-64-010 Background and purpose of regulation. With the passage of time and issuance of an additional number of water rights in each year, competition for rights to use of our limited water resources increases. Conflicts also develop where uses presently authorized compete for water supplies which may vary on seasonal or annual bases, due to changes in hydrologic conditions. For these reasons it becomes necessary to manage our state's water resources so as to insure that those entitled to make beneficial use of water neither waste water in exercising their rights nor use waters by withdrawal or diversion thereof in amounts in excess to that which they are entitled.

One of the tolls of water management vested in the department of ecology is the power to require that those diverting and/or withdrawing waters of the state, both surface and ground, provide a measuring device so as to provide for accurate measurement of waters so utilized. See RCW 90.03.360 and 90.44.020. It has been increasingly apparent that a satisfactory water management program can be carried out only if surface and ground water withdrawals are closely monitored and accurately measured.

Under RCW 43.27A.090(11), the department of ecology is authorized to adopt such regulations as are necessary to carry out the provisions of the surface and ground water statutes of chapters 90.03 and 90.44 RCW. Acting under the authority of RCW 43.27A.090(11) and 90.03.360, the following regulation is adopted for the purpose of setting forth:

(1) The specifications for meters installed on water withdrawal facilities for pressure systems;

(2) The installation requirements for a meter;

(3) The operation and maintenance requirements for a meter; and

(4) The procedures the department of ecology will follow in determining when installation of a meter shall be required and how notification of this requirement shall be given to the water user.

[Statutory Authority: Chapters 43.21A, 43.27A and 90.44 RCW. 88-13-037 (Order 88-11), § 508-64-010, filed 6/9/88; Order DWR 69-9, § 508-64-010, filed 11/6/69.]

WAC 508-64-030 Meter installation requirements. Meters required to be installed, as provided under WAC 508-64-010, shall meet the following installation requirements:

(1) The meter shall be installed in accordance with manufacturer specifications and in such a manner that there shall be a full pipe of water at all times when water is being withdrawn.

(2) Straightening vanes shall be installed in the pipe in the manner recommended by the manufacturer of the meter, or vanes may be part of the tube furnished with tube-type meters or separate units for installation in the discharge pipe upstream of the meter.

(3) There shall be no turnouts or diversions between the source of water and the meter installation, except for faucet or other similar small outlets.

(4) The meter shall be placed in the pipe not less than five pipe diameters downstream from any valves, elbows, or other obstructions which might create turbulent flow, or as recommended by the meter manufacturer. There shall also be at least one pipe diameter of unobstructed flow on the downstream side of the meter.

(5) The meter and register shall not be enclosed in a building or structure in such a manner as to prevent access to the register. The register or meter shelter may be equipped with a lock to prevent tampering or breakage, provided that a key is made available to authorized employees of the department of ecology at the place of business during normal working hours or at the residence in case of private parties.

(6) Provisions shall be made for removal and rating of the meter in accordance with the manufacturer's specifications.

(7) In those cases where wells are authorized for the purpose of supplementing surface waters with water from combined sources not to exceed a total quantity, both sources of water shall be metered.

(8) In the case of artesian wells which flow at times, the meter shall be installed in a manner which will measure both pumped and flowing discharge.

(9) The owner shall cause the department of ecology to be notified within ten days from the installation of the meter.

(10) The meter installation shall be inspected and approved by the department of ecology.

[Statutory Authority: Chapters 43.21A, 43.27A and 90.44 RCW. 88-13-037 (Order 88-11), § 508-64-030, filed 6/9/88; Order DWR 69-9, § 508-64-030, filed 11/6/69.]

WAC 508-64-040 Meter operation and maintenance. Meters installed hereunder shall be operated and maintained in accordance with the following:

(1) No withdrawal or diversion of water shall be made unless the meter installation has been inspected and approved by the department of ecology and is in proper operating condition.

(2) Meters shall be repaired and returned to operation as soon as possible upon discovery of a malfunctioning meter. The department of ecology shall be notified immediately of such malfunctioning meter. In all cases the meter reading immediately prior to repair and the reading of the new or repaired meter shall be submitted to the department of ecology on forms provided within ten days following reinstallation of the meter and/or meter head.

(3) Water use data shall be submitted to the department of ecology on forms provided for that purpose at such times as may be required by the department.

(4) Meters shall be kept clear of debris or any other material or vegetative growth which would impede their operation. All meters shall be lubricated as specified by the manufacturer.

(5) Meters which are not properly operated and maintained shall be repaired or replaced upon order of the department of ecology within the time specified within said order.

[Statutory Authority: Chapters 43.21A, 43.27A and 90.44 RCW. 88-13-037 (Order 88-11), § 508-64-040, filed 6/9/88; Order DWR 69-9, § 508-64-040, filed 11/6/69.]

WAC 508-64-050 Meter--When required. Meters shall be installed on water diversion and/or withdrawal facilities existing prior to or constructed subsequent to the effective date hereof whenever it shall appear to the department of ecology that one of the following conditions exist:

(1) The need exists to accurately measure the instantaneous rate of diversion (withdrawal) and/or the total water use by a facility operating over a specified period of time, for purposes of determining if the quantities of

water utilized are within the limits of the established rights, or

(2) Studies, inventories and investigations of stream and/or aquifer systems are being conducted by the department of ecology for purposes of determining location, extent, depth, volume and flow of said waters for planning, utilization and management purposes; and accurate determination of existing diversion and/or withdrawals is necessary for proper conduct of such studies, inventories and investigations, or

(3) When it has been established by the department of ecology, or there is reasonable reason to believe that a mining of ground waters is taking place within a defined area and that an accurate determination as to the extent of existing use of ground waters is necessary to properly manage such use for the purpose of maintaining a reasonable or feasible pumping lift (or reasonable or feasible reduction of artesian pressure) within the defined area, or

(4) Conflict in use under established rights exist and accurate determination of the rate of diversion (withdrawal) and/or volumetric use over a given period of time is necessary for a proper resolution of the conflict.

The requirement that a meter shall be installed on an existing facility shall be given by written notice served upon the owner or person having control thereof, as appropriate, personally or by registered or certified mail. Said notice shall set forth that a meter shall be installed in compliance with the provisions of this chapter and the date by which the meter shall be installed. All meters required to be installed hereunder shall conform to the provisions of WAC 508-64-020 through 508-64-040.

[Statutory Authority: Chapters 43.21A, 43.27A and 90.44 RCW. 88-13-037 (Order 88-11), § 508-64-050, filed 6/9/88; Order DWR 69-9, § 508-64-050, filed 11/6/69.]

WAC 508-64-060 Unauthorized diversion or withdrawals--Enforcement agent. No waters shall be diverted and/or withdrawn from facilities which do not comply with orders issued pursuant to WAC 508-64-050. In enforcement of this chapter, the department of ecology may impose such sanctions as are appropriate under authorities vested in it, including but not limited to the issuance of regulatory orders under RCW 43.27A.190 and civil penalties under RCW 90.03.600.

[Statutory Authority: Chapters 43.21A, 43.27A and 90.44 RCW. 88-13-037 (Order 88-11), § 508-64-060, filed 6/9/88; Order DWR 69-9, § 508-64-060, filed 11/6/69.]

WAC 508-64-070 Appeals. All final written decisions of the department of ecology pertaining to permits, regulatory orders, and related decisions made pursuant to this chapter shall be subject to review by the pollution control hearings board in accordance with chapter 43.21B RCW.

[Statutory Authority: Chapters 43.21A, 43.27A and 90.44 RCW. 88-13-037 (Order 88-11), § 508-64-070, filed 6/9/88.]

WAC 508-64-080 Regulation review. The department of ecology shall initiate a review of the rules established in this chapter whenever new information,

changing conditions, or statutory modifications make it necessary to consider revisions.

WAC 516-12-470 Enforcement. (1) General

(a) A vehicle which is parked in a manner which endangers or potentially endangers members of the university community or their property, state property, and/or prevents a person having a valid permit from parking in their designated parking area, will be impounded on the first violation.

(b) Upon receiving a third parking citation with two previous unpaid parking citations outstanding for more than seventy-two hours, a vehicle is subject to impound.

(c) A student with unpaid parking citations may not be allowed to have a copy of his/her transcript released by the registrar's office.

(d) Parking permits will not be issued until all outstanding citations are paid.

(e) After identifying the registered owner of any vehicle without a parking permit or a permit number which has three or more unpaid citations, the parking services office will contact the owner in writing that payment is required. If payment for outstanding citations is not made by the date required, the matter will be referred to the appropriate civil court for resolution.

(f) The operator and owner(s) of a vehicle which is involved in a violation of the university's parking regulations are jointly and severally responsible for the violation. The person to whom a permit is issued is responsible for all citations issued to that permit number.

(h) The fine and penalty for illegal possession of a lost or stolen permit will be a fine equal to the original value of the highest priced period plus \$5.00 and revocation of parking privileges for a period of one year.

(2) When regulations are in effect
