WAC 246-330-155 Coordinated quality improvement program. The purpose of this section is to ensure the establishment and on-going maintenance of a coordinated quality improvement program. The intent is to improve the quality of health care services provided to patients and to identify and prevent medical malpractice.

An ambulatory surgical facility must:

- (1) Have a facility-wide approach to process design and performance measurement, assessment, and improving patient care services according to RCW 70.230.080 including, but not limited to:
- (a) A written performance improvement plan that is periodically evaluated;
- (b) Performance improvement activities that are interdisciplinary and include at least one member of the governing authority;
 - (c) Prioritize performance improvement activities;
 - (d) Implement and monitor actions taken to improve performance;
- (e) Education programs dealing with performance improvement, patient safety, medication errors, injury prevention; and
- (f) Review serious or unanticipated patient outcomes in a timely manner.
- (2) Systematically collect, measure and assess data on processes and outcomes related to patient care and organization functions;
- (3) Collect, measure and assess data including, but not limited to:
- (a) Operative, other invasive, and noninvasive procedures that place patients at risk;
- (b) Infection rates, pathogen distributions and antimicrobial susceptibility profiles;
 - (c) Death;
- (d) Medication management or administration related to wrong medication, wrong dose, wrong time, near misses and any other medication errors and incidents;
- (e) Injuries, falls, restraint use, negative health outcomes and incidents injurious to patients in the ambulatory surgical facility;
 - (f) Adverse events according to chapter 246-302 WAC;
- (g) Discrepancies or patterns between preoperative and postoperative (including pathologic) diagnosis, including pathologic review of specimens removed during surgical or invasive procedures;
- (h) Adverse drug reactions (as defined by the ambulatory surgical facility);
 - (i) Confirmed transfusion reactions;
- (j) Patient grievances, needs, expectations, and satisfaction; and
 - (k) Quality control and risk management activities.
