

WAC 296-807-14025 Make sure airhose and plastic pipe supplying compressed air to portable air tools are safe. (1) You must make sure the airhose and hose connections are suitable for the:

- (a) Air pressure;
- (b) Use.

(2) You must make sure any plastic pipe used to supply compressed air for portable air tools has been specifically identified by the manufacturer as being suitable for compressed air use.

Note: Existing unapproved pipe that is buried underground or enclosed in shatter-resistant material is acceptable only if it completely eliminates the hazards created by the brittle nature of the pipe.
