

**WAC 296-806-41504 Follow these requirements for compactor controls.** You must follow these requirements for compactor controls:

- (1) Each control must have its function clearly labeled.
- (2) Controls must be designed and located to prevent them from unintentionally activating.
- (3) Electric stop buttons, including emergency stop buttons, must be red in color, distinguishable from all other controls by size, and not recessed.
- (4) Emergency stop controls must be either:
  - (a) Readily accessible to the operator; or
  - (b) Located within three feet (91.4 cm) of the point of operation or feed area **or** if chute fed, within three feet (91.4 cm) of the access door.
- (5) An electrical disconnect must be located within sight, no more than fifty feet (1,524 cm), from the operating control panel.
