- WAC 246-440-100 Hospital reporting requirements for health careassociated infections. The purpose of this section is to establish data collection and submission requirements for health care-associated infections at hospitals. This type of data provides evidence-based information measures to reduce hospital-acquired infections.
- (1) A hospital must routinely collect and submit data related to health care-associated infections to the National Healthcare Safety Network (NHSN) of the United States Centers for Disease Control and Prevention (CDC) in compliance with RCW 43.70.056.
- (2) A hospital that is licensed under chapter 70.41 RCW and is also an acute care hospital under 42 U.S.C. 1395ww(c)(1)(A), a rehabilitation hospital under 42 U.S.C. 1395ww(d)(1)(B)(ii), a cancer hospital under 42 U.S.C. 1395ww(d)(1)(B)(v), or a critical access hospital under 42 U.S.C. 1395i-4 must collect and submit data as required by the Centers for Medicare and Medicaid Services (CMS) for quality reporting programs or projects listed in Table 1 of this section.
- (3) A hospital that is certified as a critical access hospital may also voluntarily submit optional data requirements in Table 2 of this section. Submission of optional data is voluntary and is beneficial for understanding health care-associated infection rates at these hospitals. A hospital that submits optional data under this section must submit data on all the optional reporting categories found in Table 2.
- (4) All data collected under this section must be collected and submitted in accordance with CDC NHSN's definitions, methods, requirements, and procedures found at www.cdc.gov/nhsn/.
