STYLE AND FORMAT OF THE WASHINGTON STATE REGISTER

1. ARRANGEMENT OF THE REGISTER

The Register is arranged in the following nine sections:

- (a) **PREPROPOSAL**-includes the Preproposal Statement of Intent that will be used to solicit public comments on a general area of proposed rule making before the agency files a formal notice.
- (b) **EXPEDITED REPEAL**-includes the Preproposal Statement of Inquiry that lists rules being repealed using the expedited repeal process. Expedited repeals are not consistently filed and may not appear in every issue of the register.
- (c) **PROPOSED**-includes the full text of formal proposals, continuances, supplemental notices, and withdrawals.
- (d) **EXPEDITED ADOPTION**-includes the full text of rules being changed using the expedited adoption process. Expedited adoptions are not consistently filed and may not appear in every issue of the Register.
- (e) **PERMANENT**-includes the full text of permanently adopted rules.
- (f) **EMERGENCY**-includes the full text of emergency rules and rescissions.
- (g) **MISCELLANEOUS**-includes notice of public meetings of state agencies, rules coordinator notifications, summaries of attorney general opinions, executive orders and emergency declarations of the governor, rules of the state Supreme Court, and other miscellaneous documents filed with the code reviser's office under RCW 34.08.020 and 42.30.075.
- (h) **TABLE**-includes a cumulative table of the WAC sections that are affected in the current year.
- (i) **INDEX**-includes a cumulative index of Register Issues 01 through 24.

Documents are arranged within each section of the Register according to the order in which they are filed in the code reviser's office during the pertinent filing period. Each filing is listed under the agency name and then describes the subject matter, type of filing and the WSR number. The three part number in the heading distinctively identifies each document, and the last part of the number indicates the filing sequence with a section's material.

2. PRINTING STYLE—INDICATION OF NEW OR DELETED MATERIAL

RCW 34.05.395 requires the use of certain marks to indicate amendments to existing agency rules. This style quickly and graphically portrays the current changes to existing rules as follows:

- (a) In amendatory sections—
 - (i) underlined material is new material;
 - (ii) ~~deleted material is ((lined out between double parentheses))~~;
- (b) Complete new sections are prefaced by the heading NEW SECTION;
- (c) The repeal of an entire section is shown by listing its WAC section number and caption under the heading REPEALER.

3. MISCELLANEOUS MATERIAL NOT FILED UNDER THE ADMINISTRATIVE PROCEDURE ACT

Material contained in the Register other than rule-making actions taken under the APA (chapter 34.05 RCW) does not necessarily conform to the style and format conventions described above. The headings of these other types of material have been edited for uniformity of style; otherwise the items are shown as nearly as possible in the form submitted to the code reviser's office.

4. EFFECTIVE DATE OF RULES

- (a) Permanently adopted agency rules normally take effect thirty-one days after the rules and the agency order adopting them are filed with the code reviser's office. This effective date may be delayed or advanced and such an effective date will be noted in the promulgation statement preceding the text of the rule.
- (b) Emergency rules take effect upon filing with the code reviser's office unless a later date is provided by the agency. They remain effective for a maximum of one hundred twenty days from the date of filing.
- (c) Rules of the state Supreme Court generally contain an effective date clause in the order adopting the rules.

5. EDITORIAL CORRECTIONS

Material inserted by the code reviser's office for purposes of clarification or correction or to show the source or history of a document is enclosed in [brackets].

REGULATORY FAIRNESS ACT

The Regulatory Fairness Act, chapter 19.85 RCW, was enacted in 1982 to minimize the impact of state regulations on small business. Amended in 1994, the act requires a small business economic impact analysis of proposed rules that impose more than a minor cost on twenty percent of the businesses in all industries, or ten percent of the businesses in any one industry. The Regulatory Fairness Act defines industry as businesses within a four digit SIC classification, and for the purpose of this act, small business is defined by RCW 19.85.020 as "any business entity, including a sole proprietorship, corporation, partnership, or other legal entity, that is owned and operated independently from all other businesses, that has the purpose of making a profit, and that has fifty or fewer employees."

Small Business Economic Impact Statements (SBEIS)

A small business economic impact statement (SBEIS) must be prepared by state agencies when a proposed rule meets the above criteria. Chapter 19.85 RCW requires the Washington State Business Assistance Center (BAC) to develop guidelines for agencies to use in determining whether the impact of a rule is more than minor and to provide technical assistance to agencies in developing a SBEIS. All permanent rules adopted under the Administrative Procedure Act, chapter 34.05 RCW, must be reviewed to determine if the requirements of the Regulatory Fairness Act apply; if an SBEIS is required it must be completed before permanent rules are filed with the Office of the Code Reviser.

Mitigation

In addition to completing the economic impact analysis for proposed rules, state agencies must take reasonable, legal, and feasible steps to reduce or mitigate the impact of rules on small businesses when there is a disproportionate impact on small versus large business. State agencies are encouraged to reduce the economic impact of rules on small businesses when possible and when such steps are in keeping with the stated intent of the statute(s) being implemented by proposed rules. Since 1994, small business economic impact statements must contain a list of the mitigation steps taken, or reasonable justification for not taking steps to reduce the impact of rules on small businesses.

When is an SBEIS Required?

When:

The proposed rule has more than a minor (as defined by the BAC) economic impact on businesses in more than twenty percent of all industries or more than ten percent of any one industry.

When is an SBEIS Not Required?

When:

The rule is proposed only to comply or conform with a federal law or regulation, and the state has no discretion in how the rule is implemented;

There is less than minor economic impact on business;

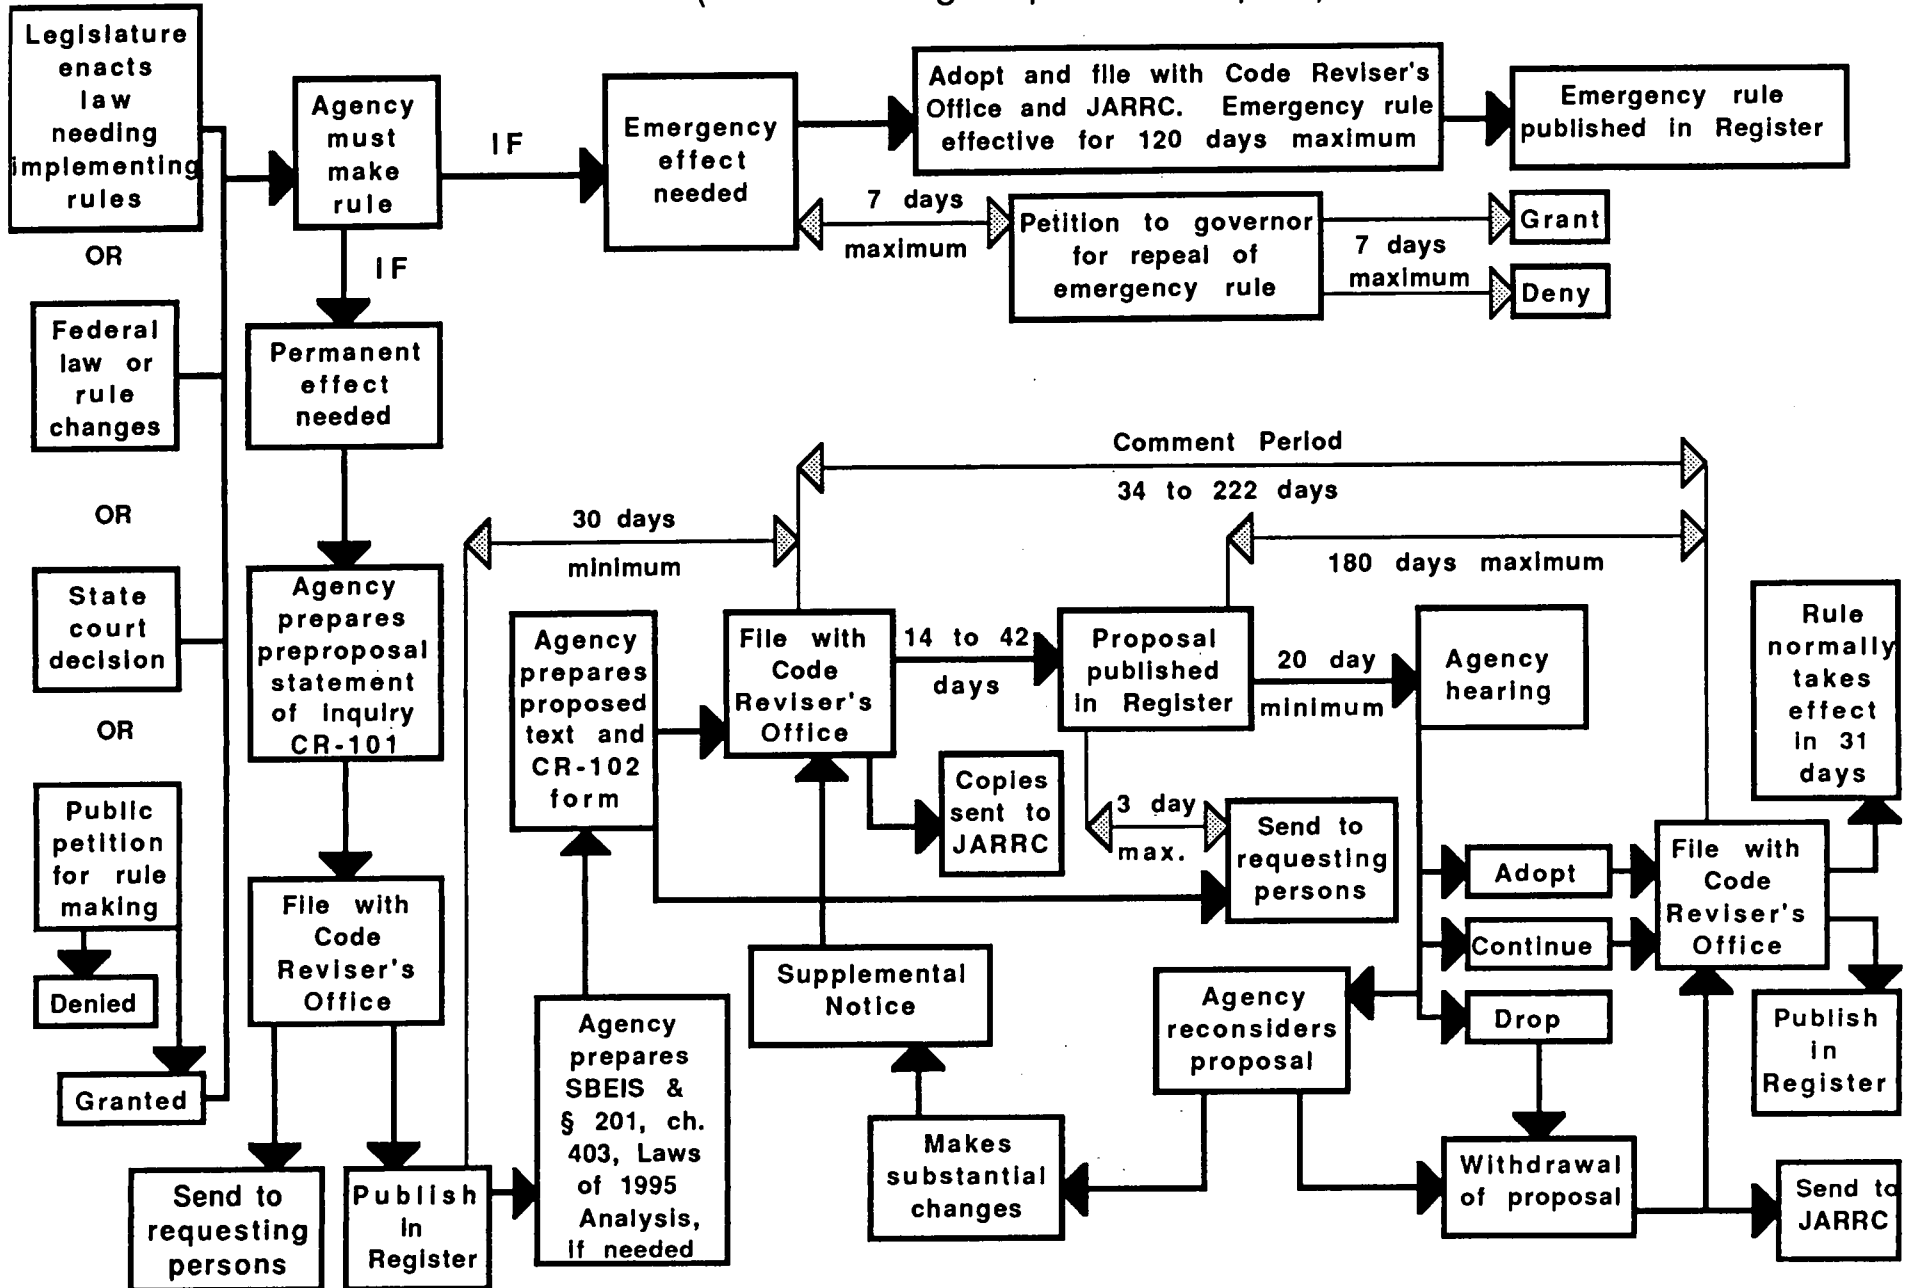

The rule **REDUCES** costs to business (although an SBEIS may be a useful tool for demonstrating this reduced impact);

The rule is adopted as an emergency rule, although an SBEIS may be required when an emergency rule is proposed for adoption as a permanent rule; or

The rule is pure restatement of state statute.

Statutes Authorizing the Agency to Adopt Rules on this Subject: RCW 15.58.040 and 17.21.030.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: New rules relating to the application of pesticides in Benton County and portions of Franklin and Walla Walla counties were adopted.  [Filed July 18, 2000, 10:20 a.m.]

The Following Sections are Proposed for Expedited Repeal: WAC 332-30-118 Tidelands, shoreland and beds of navigable water.

Rules Proposed for Expedited Repeal Meet the Following Criteria: Rule is no longer necessary because of changed circumstances.

Any person who objects to the repeal of the rule must file a written objection to the repeal within thirty days after publication of this preproposal statement of inquiry.

Address Your Objection to: Dave Dietzman, Rules Coordinator, Department of Natural Resources, P.O. Box 47015, Olympia, WA 98504-7015, dave.dietzman@wadnr.gov, (360) 902-1633.

Reason the Expedited Repeal of the Rule is Appropriate: This rule was written in 1980 to guide the overall management of state-owned aquatic lands. However, in 1984, the legislature, through the Aquatic Lands Act, set comprehensive new management guidelines for these lands. Extensive new rules were written to implement the act, but this rule was never updated nor repealed. The statements in this rule are now either redundant to the statute, vague and noncommittal on DNR, or less specific than more recently passed rules. This rule is unnecessary and provides no useful guidance to DNR or the public beyond that found in other statutes and rules.

The Following Sections are Proposed for Expedited Repeal: WAC 332-30-134 Aquatic land environmental protection.

Any person who objects to the repeal of the rule must file a written objection to the repeal within thirty days after publication of this preproposal statement of inquiry.

Reason the Expedited Repeal of the Rule is Appropriate: This rule addresses DNR's responsibility for "ensuring environmental protection" of state-owned aquatic lands, as required by RCW 79.90.455. It lists other state and federal

laws which affect aquatic lands, and indicates that DNR will normally rely on regulatory agencies to address environmental protections through their permits. However, the rule does not mention the two federal laws which now most impact aquatic lands: The Endangered Species Act, and CERCLA (the federal Superfund law, regarding pollution cleanup). Under these laws, DNR could be and has been held responsible as the landowner for damages caused by a lessee, such as harm to threatened salmon species or the discharge of hazardous pollution, even if a lessee acquires the necessary regulatory permits. With these laws now being applied to the aquatic environment, DNR can no longer ensure environmental protection and avoid undue liability to the public by limiting its own environmental protection efforts to reliance on regulatory agencies. Instead, it must address these concerns in every lease. The rule no longer provides useful guidance to DNR on how to protect the aquatic environment.

Reason the Expedited Repeal of the Rule is Appropriate: This rule was written in 1980, and updated in 1983, to guide the construction of piers on state-owned aquatic lands. However, in 1984, the legislature, through the Aquatic Lands Act, set comprehensive new management guidelines for these lands, including for uses such as piers. Also, this rule was aimed largely at the proliferation of noncommercial recreational docks on state-owned aquatic lands. However, in 1983 (after this rule was amended), RCW 79.90.105 exempted private recreational docks entirely from DNR's management authority. The statements in this rule are now either redundant to the statute, contrary to statute, or less specific than more recently passed rules. This rule is unnecessary and provides no useful guidance to DNR or the public beyond that found in other statutes and rules.

Reason the Expedited Repeal of the Rule is Appropriate: This rule was written in 1980 to set limits on the commercial and personal harvest of various kinds of marine aquatic plants (seaweed). However, RCW 79.01.805, passed in 1993, prohibited all commercial harvest of marine aquatic plants and limited personal harvest to levels below those allowed by this rule. Reason the Expedited Repeal of the Rule is Appropriate: This rule was written in 1985 to support a fledgling aquaculture industry. However, the industry has since substantially matured. DNR no longer commonly conducts research and development, permit acquisition, and site selection for aquaculture, despite what is suggested by the rule. Also, the rule differs from statute regarding fees for aquaculture leases in a way that restricts the use of production-based rents, which are now preferred by both DNR and much of the aquaculture

industry. The rule provides no useful guidance to DNR or the public beyond that found in statute.

Reason the Expedited Repeal of the Rule is Appropriate: This rule was written in 1980 to guide the construction of artificial reefs on state-owned aquatic lands, specifically encouraging the use of materials such as tires, concrete chunks, and derelict vessels. However, in 1984, the legislature, through the Aquatic Lands Act, set comprehensive new management guidelines for these lands, including setting stronger obligations on DNR for "ensuring environmental protection." Also since then, several fish species have been listed as threatened or endangered and other heightened environmental protections have been placed into law. Because of these, despite what is suggested by the rule, it is highly unlikely that artificial reefs made of tires, concrete chunks, derelict vessels, or similar materials could be approved by DNR or by other agencies. If the rule were repealed, it would still be possible to construct an artificial reef on state-owned aquatic lands if it were found to be an environmentally appropriate project to enhance aquatic habitat. The rule is unnecessary and provides no useful guidance to DNR or the public on whether or how to construct artificial reefs.

Original Notice.

Preproposal statement of inquiry was filed as WSR 99-10-010.

Title of Rule: Chapter 388-805 WAC, Certification requirements for chemical dependency service providers.

Purpose: Repeals chapter 440-22 WAC and WAC 440-44-020. Establishes the level of quality and patient care standards for chemical dependency service providers seeking certification by DSHS/DASA.

Statutory Authority for Adoption: RCW 70.96A.090.

Statute Being Implemented: Chapter 70.96A RCW.

Summary: DASA is proposing amendments to chapter 440-22 WAC. The key amendments proposed will:

- Make changes to all sections pertaining to chemical dependency counselors (CDCs), CDC interns, and probation assessment officers as a result of the implementation of chapter 18.205 RCW, Chemical dependency professionals;
- Update the agency certification fee sections by combining parts of chapter 440-44 WAC with chapter 388-805 WAC and adding procedural language;
- Add new language defining patient noncompliance and agency reporting requirements for noncompliant patients participating in court referred treatment;
- Add language to the intensive outpatient treatment section to clarify minimum treatment expectations for patients participating in treatment under deferred prosecution orders;
- Add language to define outcomes evaluation;
- Add essential requirements of chemical dependency services;
- Add certification category for treatment alternatives to street crime (TASC) providers and services;
- Eliminate application process for treatment providers offering off-site treatment services; and,
- Make minor technical revisions to several sections to eliminate unnecessary rules and clarify others.

In addition, DASA received a directive from Secretary Lyle Quasim to consolidate all DSHS WAC chapters under one Title 388 WAC number. In response to this directive, chapter 440-22 WAC is being changed to its new designated number "chapter 388-805 WAC."

Reasons Supporting Proposal: The implementation of chapter 18.205 RCW, Chemical dependency professionals, made it necessary for DASA to make amendments to all sections of chapter 388-805 WAC that pertain to chemical dependency counselors (CDCs), chemical dependency counselor interns (CIs) youth chemical dependency counselors (YCDCs), and probation assessment officers (PAOs). In addition, other sections of chapter 388-805 WAC are subject to review and amendment as required by Governor Locke's Executive Order 97-02 and Secretary Quasim's April 17, 1997, Executive Order on regulatory improvement. The criteria used included: Need for the rule; statutory authority and intent; effectiveness and efficiency; clarity; coordination with other rules; cost; and fairness.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Dennis Malmer, Division of Alcohol and Substance Abuse, P.O. Box 45331, Olympia, WA 98504-5331, (360) 438-8086.

Name of Proponent: Department of Social and Health Services, Division of Alcohol and Substance Abuse, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: See above.

Proposal Changes the Following Existing Rules: See above.

A small business economic impact statement has been prepared under chapter 19.85 RCW.

Small Business Economic Impact Statement

SUMMARY OF PROPOSED RULES: The Department of Social and Health Service (DSHS), Division of Alcohol and Substance Abuse (DASA) is proposing to replace chapter 440-22 WAC, Certification requirements for chemical dependency treatment service providers, and WAC 440-44-020 Alcohol and drug agency certification fees with chapter 388-805 WAC, Certification requirements for chemical dependency service providers.

The purpose of this chapter is to describe the standards and processes necessary for certifying chemical dependency treatment service providers.

The proposed amendments to this chapter include:

- Changing all sections pertaining to qualifications for chemical dependency counselors (CDCs), CDC interns, and probation assessment officers in accordance with chapter 18.205 RCW called "Chemical dependency professionals." Note: These requirements now fall under the Department of Health, chemical dependency professionals (CDP) program requirements.
- Adding procedures to agency certification fee sections.
- Adding definitions of patient noncompliance and agency reporting requirements for noncompliant patients participating in court-referred treatment.
- Clarifying minimum treatment expectations for patients participating in intensive outpatient treatment under deferred prosecution orders.
- Specifying outcomes evaluation requirements.

- Adding the essential requirements of chemical dependency services.

This chapter has been rewritten in plain English, using a question and answer format to make it more understandable to our customers. Unnecessary rules have been eliminated and others have been clarified.

SMALL BUSINESS ECONOMIC IMPACT STATEMENT: Chapter 19.85 RCW, the Regulatory Fairness Act, requires that the economic impact of proposed regulations be analyzed in relation to small businesses and that it outlines the information that must be included in a small business economic impact statement (SBEIS). Preparation of an SBEIS is required when a proposed rule has the potential of placing a more than minor economic impact on business. DASA has analyzed the proposed amendments to its rules and has determined that small businesses will be impacted by these changes with some costs considered "more than minor."

INDUSTRY ANALYSIS: DASA is responsible for certifying chemical dependency treatment agencies. As part of its monitoring, DASA keeps a current internal database that identifies all certified agencies. Since internal industry information can be obtained at a more accurate level than is required by chapter 19.85 RCW, it is unnecessary to conduct an industry analysis using the four-digit standard industrial classification (SIC) codes.

DASA has determined that there are one hundred twenty-six existing agencies (private and for-profit) that meet the criteria for small businesses under RCW 19.85.020.

INVOLVEMENT OF SMALL BUSINESSES: Many small businesses have been involved in writing the proposed rules and in ascertaining the costs associated with proposed rule changes. DASA engaged assistance of a writing group, which included representation from small businesses, and met and talked several times with a number of small businesses to consider costs that would impact their businesses.

COST OF COMPLIANCE: To consider costs of compliance, DASA has elected to look at cost per patient. This is because:

- Patients drive the businesses that provide chemical dependency treatment and so using the cost per patient is a more accurate depiction of costs than costs per employee;
- Business decisions and planning are based on the number of patients served; and,
- The number of patients also influences the total amount that the most significant proposed changes will cost.

Chemical dependency treatment facilities that are considered small businesses serve an average of two hundred patients per year.

Cost of Outcomes Evaluations: The major cost anticipated by small businesses for proposed rule changes is the new requirement for outcomes evaluations (WAC 388-80-350). This requirement has been added to assess and improve patient outcomes since decisions about quality patient care will be based on outcomes derived from these evaluations. Programs may be developed, improved, and managed, based on the results of these evaluations.

Outcomes measurement is required at several times during a patient's involvement in treatment. All agencies must

do an outcomes evaluation before treatment or at admission. This becomes the baseline measurement. In addition, outcomes evaluations must be conducted during at least two of the following times:

- During treatment;
- At discharge; or
- After treatment.

The chemical dependency treatment providers determine the ways to meet this requirement for outcomes evaluations, including the random sample that they use.

There are agencies that already have outcomes evaluations as part of their programs. Eight of one hundred twenty-six small businesses exceed this requirement, since they are deemed by:

- Joint Commission on Accreditation of Health Care Organizations (JCAHO);
- CARF... The Rehabilitation Accreditation Commission (CARF); or
- Council on Accreditation of Services for Families and Children, Inc. (COA).

The anticipated costs to conduct outcomes evaluation occur in the areas outlined in the chart below:

Outcomes Evaluation Costs

Subject	Costs per Year*	First Year	Subsequent Years
Developing policies and procedures	\$750-\$200 (The higher cost includes using a consultant to begin the program.)	Yes	No
Developing or selecting evaluation forms	\$100	Yes	No
Reproduction of evaluation tools	\$6 (Production costs for 120 two-page evaluation questionnaires)	Yes	Yes
Staff training for using evaluation tools	\$320 first year \$100 subsequent years (Staff time for all staff members involved in training by agency director)	Yes	Yes
Conducting evaluations for patients, based on 2-hour session	\$30 for 50 patients Follow-up evaluation costs	Yes	Yes
Data entry of evaluation tools	\$30 Anticipated staff time for evaluations from 50 patients	Yes	Yes

PROPOSED

Evaluating data, preparing reports, and using results	\$150 (anticipated staff time)	Yes	Yes
---	-----------------------------------	-----	-----

*Because the programs have choices in the ways they develop the outcomes evaluations program, it is difficult to determine definitive costs for these requirements. DASA has given a range of costs to cover a range of choices. The sample scenario in attachment A depicts the types of choices that agencies have in setting up and carrying out outcomes evaluation, which impact costs. Programs have the choice of what percent of their patients are considered "random sample." The first year will have greater expenses due to start-up costs, such as developing policies, developing or creating an outcome measurement tool, and a data entry system.

First Year	First Year Total per Average Number of Patients (200)	Subsequent Years	Subsequent Total per Average Number of Patients (200)
\$816-\$1,366	\$4.08-\$6.83 per patient	\$216-\$316	\$1.08-\$1.58 per patient

Disproportionate Economic Impact Analysis: When there are more than minor costs to small businesses as a result of proposed rule changes, the Regulatory Fairness Act requires an analysis to be done comparing these expenses between small businesses and 10% of the largest businesses. The costs identified with outcomes evaluations for small businesses would be considered by DASA to be "more than minor." Small businesses have expressed the most concern over this added requirement of all the other proposed rule changes submitted.

DASA looked at the possible disproportionate impact of this requirement on small businesses, as compared to 10% of the largest businesses. However, these largest businesses are deemed by DASA as already meeting or exceeding the outcomes evaluation requirement. They have met this requirement as part of their accreditation by JCAHO, CARF, or COA. Their accreditation costs average \$5,000 every three years. Consequently, it is not possible to accurately delineate and compare costs between small businesses and 10% of the largest agencies. In its desire to be fair to small businesses and to meet the intent of the law, however, DASA has outlined ways to mitigate expenses for small businesses in meeting the new outcomes evaluation requirement.

Mitigating Expenses for Outcomes Evaluations: DASA has proposed a plan to mitigate expenses for small businesses. DASA will use one or more of the following to help small businesses meet the requirement for outcomes evaluations:

- DASA will hire a consultant to develop policies, procedures, and written plans that would meet the requirements for outcomes evaluations for all chemical dependency service providers that wish to use them. This eliminates the need for individual agencies to develop policies and plans.
- DASA will develop a package of public domain standardized outcomes evaluation questionnaires agencies could choose to use. This eliminates the need for indi-

vidual agencies to develop or find evaluation questionnaires.

- DASA will provide state-wide training to all staff through routine on-site technical assistance surveys and annual conferences. This would reduce the impact of training on staff time, since these events already are scheduled as part of staff time.
- DASA will allow agencies to phase in outcomes evaluations over a two-year period.
- Agencies have latitude in deciding what kind of random sample would work best in their own programs and how often to evaluate patients. They might start the first year with a smaller, though representative sample and increase that in subsequent years; or increase the number of times the patients complete outcomes evaluations after the first year the program is launched.

CONCLUSION: DASA has given careful consideration to the impact on small businesses of proposed rules in chapter 388-805 WAC, Certification requirements for chemical dependency service providers. In accordance with the Regulatory Fairness Act, chapter 19.85 RCW, DASA has analyzed impacts on small businesses and proposed ways to mitigate those costs associated with the new outcomes evaluation requirements. Other rule changes offer cost and time savings by eliminating, reducing, or streamlining requirements.

COST AND MITIGATION ASSUMPTIONS FOR OUTCOMES EVALUATION

What are some of the considerations for implementing outcomes evaluations proposed in chapter 388-805 WAC? There are at least two distinct purposes for monitoring outcomes evaluations. One is the benefit to the community in general, especially in the area of statistics that may be used to influence public health planning and funding for treatment. The second purpose for monitoring outcomes evaluation is the benefit to the chemical dependency provider in terms of being able to measure and improve treatment services. Washington state currently has a program in place to measure the first purpose for public funded agencies, which is treatment and assessment report generation tool (TARGET).

When beginning to assess costs, individual providers should consider measurable goals and objectives for their organization. These goals range from opening a new branch site, adding a women's program, or reducing the number of days for collecting patient fees. This planning activity requires provider time and should be an integral part of existing business planning rather than additional time and expense.

Once measurable goals and objectives are formalized, the provider should select a set of indicators (questions), i.e., Who to ask, when to survey, and how the data is collected and evaluated. An important step will be to use a survey form and process that meets the needs of the provider's efforts to improve services. For example, one provider may be concerned with telephone access to services, while another is interested in measuring patients' perceptions of counselor respect for their ethnicity. Lists of indicators are available from a number of sources. Providers can elect to use surveys

PROPOSED

developed by sources in the public domain. In addition, The Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment (CSAT), and the National Institute on Drug Abuse (NIDA) have free or inexpensive resources.

Survey formats can combine efficiency, effectiveness, and patient satisfaction questions on one form. The formats can be done in a word processing program.

Time needs to be invested in the process. A protocol (procedures) needs to be written. Training would need to be offered for staff members. The survey needs to be tested on a sample of patients if an agency chooses a customized survey form rather than one from the public domain, which has already been standardized.

Costs can vary by size of the organization. A small provider might invest a day of staff time of the director and the staff involved in the process. A larger organization would need more coordination, opinions, and training.

An important consideration to the whole process is confidentiality and anonymity. Outcomes evaluation is covered under program audits as an exception to federal confidentiality regulations. Individual releases are not required, but providers should obtain a notification and acknowledgment signature during the admission process to authorized patient participation in outcomes evaluation. Patients must have some assurance of confidentiality and anonymity so that they will respond as candidly as possible. Choosing not to participate in outcomes evaluation should always be an option to the patient.

An agency staff member needs to be accountable for receiving the surveys, as well as confidential storage (some surveys might contain patient identifying information). The amount of storage space would equal the number of surveys the provider expects to receive and store. The provider should use existing document destruction procedures once the data is processed and validated (entered and checked for key entry accuracy).

Evaluation of the results can be as simple as reviewing the narrative comments on the survey forms, to using a spreadsheet program to create charts and tables. Data can be tabulated by hand for smaller samples. The result is not research, but simple histograms and trend charts.

A well thought-out utilized outcomes evaluation and patient satisfaction measurement system should result in increased operating effectiveness, efficiency, and better patient outcomes. Increased customer satisfaction should result in increased census and improved treatment compliance, both of which imply an operation that is more efficient. Providers would also have a process to discover opportunities for new services and to reach out to new populations within their communities. Increased revenue could be measured by setting goals on census and profit margins for different programs within an agency.

What are examples of a small business implementing outcomes evaluations? Agency A is a small, for-profit chemical dependency treatment provider in Washington state. Agency A has two hundred patients participating in treatment across various levels of care. About twenty to twenty-five patients are participating in intensive outpatient

treatment services, sixty to seventy-five patients are attending outpatient continuing care groups on a weekly basis, and one hundred to one hundred twenty patients are attending monthly outpatient groups.

Agency A is owned and operated by Mr. Jones. He is a chemical dependency professional (CDP) and conducts many of the agency assessments. Mr. Jones employs three full-time CDPs, a receptionist, and a part-time bookkeeper.

Mr. Jones determines that he will consult with a person about outcomes evaluations, develop his plan after consultation, train his staff members, and conduct outcomes measurement on his own. He determines that he will evaluate 10% of the patients completing intensive outpatient and outpatient treatment at his agency. He understands that this means he needs ten patients (10% of one hundred patients) to complete baseline questionnaires, i.e., one questionnaire during treatment and one questionnaire after treatment. Because Mr. Jones has decided to conduct an evaluation after treatment (which is more difficult and costly), he realizes he will need more than ten patients completing the baseline questionnaire. Mr. Jones decides to ask fifty patients to complete his questionnaire at the time of admission. He believes that of the fifty original patients completing the admission baseline measurement, about forty to forty-five will complete intensive outpatient treatment. Of that number, about thirty to thirty-five will likely complete outpatient treatment. Mr. Jones believes that of the thirty to thirty-five patients completing outpatient treatment, he should be able to mail out and receive ten questionnaires at six months post discharge.

Cost Assumptions: Plan A.

Administrative costs for retaining a consultant to work with Mr. Jones: Consultant X will charge Mr. Jones \$375 for an eight-hour day, plus expenses. The approximate cost is \$450. In addition, Mr. Jones spends eight hours of his time or about \$200 while working with his consultant.

Consultant X assists Mr. Jones in beginning to understand outcomes evaluations, develops policies and procedures for outcomes evaluation, and recommends some forms for use.

Administrative costs for Mr. Jones to ensure policy/procedure development is accurate, and that he has a documentation process: Four hours @ \$25=\$100 which is incurred when developing or updating program descriptions.

Administrative costs for Mr. Jones to determine which standardized or customized evaluation forms he will use: Four hours @ \$25=\$100.

Mr. Jones then determines that he will conduct staff orientation and training based upon new information, which is the policies and procedures developed with the help of a consultant, and he will distribute copies of the forms he has chosen to use for evaluation. Mr. Jones schedules a four hour training with the staff members. He will use a total of twelve hours of his CDPs' time @ \$12 per hour, or \$144, plus \$100 of his time, and another \$75 for reception and bookkeeping time, for a total of \$319.

The estimated total cost for hiring a consultant to provide Mr. Jones with orientation, preparing policies and procedures, selecting tools to use, and staff orientation is \$1,169.

Mr. Jones then develops his plan to administer the questionnaire he has chosen to use from the public domain. He was not required to pay for this tool since it is in the public domain. He selected a tool that will provide him with some measures of effectiveness, efficiency, and patient satisfaction.

His staff members (CDPs) will give the questionnaire to patients to complete during the patients' intake session. For that reason, there is no staff cost associated with this function. Mr. Jones will ask his receptionist to develop a manual checklist/spreadsheet so she can begin recording patient satisfaction measures concurrently. The effectiveness measures will be placed in the patient record until selected for post treatment analysis. The receptionist will enter data from fifty questionnaires (patient satisfaction information) at an estimated cost of \$25 (three hours). Questionnaires will be distributed to patients completing intensive outpatient and outpatient treatment as determined by Mr. Jones. Questionnaires will be distributed to patients during discharge interviews with their primary CDP. Therefore, costs will not increase since patients currently participate in a discharge interview.

At six months, Mr. Jones' receptionist will mail out thirty post discharge questionnaires at an estimated cost of \$30. Ten questionnaires are returned to the agency, in self-addressed stamped envelopes provided by the agency.

Total estimated costs for data tabulation of patient satisfaction measures and mailing thirty post treatment questionnaires is \$55.

Mr. Jones will then evaluate, tabulate, and develop a written summary of the outcomes evaluation questionnaires received.

Administrative costs for evaluation of data, report preparation, and utilization of results: Six hours @ \$25=\$150.

Mr. Jones determines that he will share the positive results and opportunities for improvement at his next regularly scheduled staff meeting. Since Mr. Jones conducts routine staff meetings, his costs are assumed in this model.

The final cost factor includes the cost of printing questionnaires. Since Mr. Jones selected an evaluation tool, which consisted of two sheets of paper, he can reproduce a questionnaire for about five cents. He uses one hundred twenty questionnaires per year so his estimated printing costs will be about \$6 per year.

Total estimated costs for initial implementation of outcomes evaluation at Agency A is \$1,169. Annual, on-going costs to maintain outcomes evaluation are \$211 per year.

Cost Assumptions: Plan B.

If Mr. Jones considered the initial costs of hiring a consultant to help him design questions to implement outcomes evaluation, he could recommend the Department of Social and Health Services (DSHS), Division of Alcohol and Substance Abuse (DASA) develop a plan to reduce his costs. Note: Some of these are ways that DASA can mitigate costs.

Mr. Jones could recommend that DASA hire a consultant to develop policies, procedures, and written plans that would meet the requirements for outcomes evaluations. He could request that DASA gather copies of all public domain questionnaires at the national level for consideration by certi-

fied agencies. He might recommend DASA develop policies and procedures in an electronic format that could be sent to Mr. Jones on his e-mail system.

Mr. Jones could also recommend that DASA invest in training agency administrators, clinical staff members, and other interested persons about outcomes evaluation. DASA could conduct training state-wide, begin offering technical assistance about outcomes evaluation during routine on-site technical assistance surveys, and provide training at annual conferences.

Therefore, Mr. Jones could reduce expenses significantly. He would save \$450 of consultant time, \$100 in preparing policies and procedures, and \$100 in selecting questionnaires. He would pay a small fee to attend DASA sponsored training of about \$25. His initial costs for implementing outcomes evaluation would decrease to \$571 and estimated annual costs of \$211 to maintain outcomes evaluation. Based upon the total number of patients at his agency, he could determine that it would cost about \$2.86 per patient to implement outcomes evaluation and about \$1.06 per patient per year to maintain outcomes evaluation.

To fully realize the benefits of an outcomes evaluation program at Agency A, Mr. Jones might also recommend that DASA consider a phase-in process for chapter 388-805 WAC. He could recommend that DASA provide training, policy/procedure development during the first year of implementation, while deferring data collection until the second year. Mr. Jones might also consider enrollment in the TARGET system as another method to collect data and ask DASA for computer software to implement this data collection system.

PROPOSED RULES
DEPARTMENT OF AGRICULTURE**

[Filed July 5, 2000, 1:22 p.m.]

Original Notice.

PROPOSED

Preproposal statement of inquiry was filed as WSR 00-02-077.

Title of Rule: Milk and milk products, chapter 16-101 WAC, adopts documents covering requirements for cooperative interstate milk shippers program.

Purpose: Adopts the latest 1999 editions of the *Pasteurized Milk Ordinance and Procedures Governing the Cooperative State-Public Health Service/Food and Drug Administration Program of the National Conference on Interstate Milk Shipments (NCIMS)*. It also adopts the 1997 edition of the *Methods of Making Sanitation Ratings of Milk Shippers*. This permits the department to use the most current requirements under the interstate milk shippers program to ensure free movement of Washington milk in interstate commerce.

Statutory Authority for Adoption: RCW 15.36.021(3).

Statute Being Implemented: Chapter 15.36 RCW.

Summary: See Purpose above.

Reasons Supporting Proposal: Adoption of the latest requirements under the NCIMS cooperative agreements ensures that Washington milk plants, producers and single service container plants are being held to latest standards to assist in continued acceptance of their products in interstate commerce. Allows new enforcement procedures to be implemented.

Name of Agency Personnel Responsible for Drafting and Implementation: Claudia Coles, 1111 Washington Street, Olympia, WA 98504, (360) 902-1905; and Enforcement: Mike Donovan, 1111 Washington Street, Olympia, WA 98504, (360) 902-1883.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This rule sets standards for the NCIMS voluntary program that allows milk to be freely shipped from one state to another, because of the cooperative agreement, and maintaining uniform standards for sanitation and processing. Adoption of the updated pasteurized milk ordinance and procedures (PMO) and other documents will enable the department to update its enforcement procedures to apply civil penalties and avoid dumping of good milk for penalties for violations. The new version of the PMO also includes the voluntary dairy hazard analysis critical control point (HACCP) pilot program. A Washington state plant, Safeway milk plant, has volunteered to participate in this pilot program.

Proposal Changes the Following Existing Rules: Adopts new updated versions of PMO that include voluntary dairy HACCP pilot program and allowing use of different penalties for correction of violations. The language has been improved and some redundancies have been removed.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Rule change will have no impact on small business.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. The department's rules are not covered under section 201.

Hearing Location: Room 205, Natural Resources Building, 1111 Washington Street, P.O. Box 42560, Olympia, WA 98504-2560, on August 24, 2000, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Linda Condon by August 22, 2000, TDD (360) 902-1996.

Submit Written Comments to: Claudia Coles, P.O. Box 42560, 1111 Washington Street, Olympia, WA 98504, fax (360) 902-2087, by August 24, 2000.

Date of Intended Adoption: September 7, 2000.

PROPOSED RULES

BELLEVUE COMMUNITY COLLEGE

[Filed July 11, 2000, 12:53 p.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: WAC 132H-121-010 Smoking.

Purpose: To amend the existing smoking policy for the Bellevue Community College main campus and identify specific areas where smoking may/may not occur.

Statutory Authority for Adoption: RCW 28B.15.605.

Summary: Amendment to the existing smoking policy will more clearly define areas designated for smoking on the Bellevue Community College main campus.

Reasons Supporting Proposal: The current rule is confusing and does not guide smokers to appropriate areas where smoking may occur, causing frustration for nonsmokers.

Name of Agency Personnel Responsible for Drafting and Implementation: Barbara Martin, BCC Campus, Room B202, (425) 564-2305; and Enforcement: Karl Palo, BCC Campus, Room K100, (425) 564-2400.

Name of Proponent: Barbara Martin, Vice-President, Administrative Services, Bellevue Community College, public.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The amendment to the current smoking policy will restrict smoking to the outer perimeter of campus buildings and leave walkways and courtyards smoke free. This will eliminate the current confusion about which areas are and are not acceptable for people wishing to smoke. The amendment also expands the policy to cover tobacco products as well as cigarettes, as well as guiding people to the campus operations office where they may get information and maps concerning designated smoking locations.

These changes will eliminate the dangers occurring from smoke filled corridors and the mess from cigarette butts being scattered across the campus.

Proposal Changes the Following Existing Rules: The proposal changes the designated smoking locations from being intermittently scattered throughout the campus to specific locations on the exterior perimeter created by the ring of campus buildings. It expands the current rule to cover all tobacco products rather than just cigarettes.

No small business economic impact statement has been prepared under chapter 19.85 RCW. There is no business economic impact from this rule change.

RCW 34.05.328 does not apply to this rule adoption.

WAC 132H-121-010 Smoking. PROPOSED RULES

WASHINGTON STATE PATROL

[Filed July 13, 2000, 11:42 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-11-174.

Title of Rule: WAC 204-96-010 Vehicle impounds.

Purpose: To allow employers to retrieve company vehicles when an employee has been arrested for driving with a suspended license and to require that employers and spouses show significant hardship before the vehicle can be released to them.

Statutory Authority for Adoption: RCW 46.55.113 and 46.55.120.

Summary: Unfortunately many employers inadvertently allow individuals to drive business vehicles who have criminal violations as described in WAC 204-96-010, thus causing

that business vehicle to be impounded and thus not available for business use. This creates a significant economic hardship for the employer. This amendment will allow the district commander to review releasing the business vehicle prior to the expiration of the mandated impound period if the employer establishes significant economic hardship.

Reasons Supporting Proposal: To reduce the economic impact on an unsuspecting business.

Name of Agency Personnel Responsible for Drafting: Sgt. Jim Greene, P.O. Box 42635, Olympia, WA 98504, (360) 753-0350; Implementation and Enforcement: Commander Tom Robbins, P.O. Box 42600, Olympia, WA 98504, (360) 586-2340.

Name of Proponent: State patrol, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This rule allows the department to comply with RCW 46.55.113 and 46.55.120 regarding suspended driver's vehicles. The state wishes to keep as many suspended drivers off the roadways as possible without excessive burdens to families and businesses.

Proposal Changes the Following Existing Rules: A suspended driver impounded vehicle may now also be released to an employer owner upon showing significant economic or personal hardship.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This will help ease impact on business.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption.

AMENDATORY SECTION (Amending WSR 93-20-080, filed 10/4/93, effective 11/4/93)

WAC 132N-156-300 Purpose. The parking and traffic rules and regulations contained herein provide a fair and uniform method of regulating college vehicular, nonvehicular, and pedestrian traffic and are based on the following objectives:

- (1) To protect and control vehicular, nonvehicular, and pedestrian traffic.
- (2) To assure access ((at all times)) for emergency equipment at all times.
- (3) To minimize traffic disturbances during class hours.
- (4) To facilitate the work of the college by assuring access for college vehicles and by assigning the limited parking spaces to the most efficient use.
- (5) To protect college facilities.

Permission to park or operate a vehicle on college property is governed by these regulations. The purchase of a permit for designated parking does not ensure the regular availability of a parking space.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-310 Authority. Pursuant to RCW 28B.50.140(10) the board is granted authority to establish rules and regulations for pedestrians and vehicular and nonvehicular traffic over property owned, operated, and/or maintained by the college.

The enforcement of these rules and regulations shall be the responsibility of the security/safety office.

Security officers are authorized to issue parking and traffic citations, impound and/or immobilize vehicles, and control and regulate facilities use, traffic, and parking as prescribed in these rules and regulations.

Any person interfering with a college security officer in the discharge of the provisions of these rules and regulations shall be in violation of RCW 9A.76.020, Obstructing governmental operation, and may be subject to arrest by a peace officer.

Failure by students to abide by these rules and regulations may be considered to be a violation of the code of student conduct (chapter 132N-120 WAC, as applicable).

Compliance with these rules and regulations is considered a standard part of job performance for all employees. Failure by faculty or staff of the college to abide by these rules and regulations may result in disciplinary action or other authorized sanctions.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-320 Definitions. College - Clark College, Community College District 14.

The college, the security/safety office, security officers, or other employees or agents shall not be held liable for any damages, claims, or losses occurring to or from vehicles or equipment when rendering motorist assistance, impounding vehicles, or performing any duties as described in these rules and regulations. This section also applies to nonvehicular modes of transportation.

The college provides only limited maintenance to college parking lots during periods of inclement weather. Persons using the college parking lots do so at their own risk. The college will not be responsible for any liability or damage claims arising from weather((-)) or other natural disaster-related causes or conditions.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-440 Traffic accidents. Persons involved in traffic accidents on college property are to report the accident to the security/safety office. ((An officer will be dispatched to)) Security personnel will investigate the incident and, in the case of injury, extensive property damage, apparent criminal activity, or unusual circumstances, file an accident report. In addition, RCW 46.52.030 requires that accidents on college property involving injury or property damage in excess of five hundred dollars be reported to local law enforcement agencies within twenty-four hours. Security officers are authorized to obtain and share with all parties to an accident information on the insurance coverage of the parties.

Nothing in this section should be interpreted so as to delay the immediate reporting of traffic accidents which involve injury or loss of life to appropriate noncollege authorities.

WAC 132N-156-500 Allocation of parking space. The parking spaces available on college properties shall be assigned by the office of administrative services in a manner which will best attain the objectives of these regulations. The plant services department is authorized to mark various parking areas on college property with numbers or titles or by posting signs, or marking the pavement.

Vehicles which have been parked in excess of twenty-four hours may be impounded and stored at the expense of either or both the owner or operator thereof. Notice of intent to impound will be posted on the vehicle at least twenty-four hours prior to impoundment unless a vehicle is illegally or hazardously parked. Neither the college nor college employees shall be responsible for claims, loss or damage of any kind resulting from such impounding and storage.

Vehicles under repair in the college's instructional program must be parked in a designated area and must have an approved "vehicle in repair" notice visibly posted within the vehicle. This includes vehicles upon which service has been completed and which are awaiting pick up by the owners.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-550 Illegal parking. No person shall stop, place, or park a vehicle at any place where official signs, curbs, or pavement markings prohibit parking, or within fifteen feet of a fire hydrant, or at any place for which the vehi-

cle does not have a valid parking permit. Any vehicle not parked in a parking stall shall be considered illegally parked.

Drivers who are instructed by a security officer to either move an illegally parked vehicle or not to park in violation of this section, and refuse, will have their vehicle immediately impounded or immobilized.

Security officers may issue citations resulting in fines if the vehicle is found in the commission of any of the following parking violations:

(1) Parking in a faculty/staff parking zone without a valid permit.

(2) Parking a disabled or inoperable vehicle on campus in excess of twenty-four hours without appropriate permission.

(3) ~~((Occupying more than one parking space.))~~ Parking any vehicle in such a manner as to obstruct, impede, hinder, or prevent the use of another parking space. This violation includes, but is not limited to, parking over the line, parking an oversized vehicle in a space too small, allowing part of a vehicle to protrude into another space, and parking too close to another vehicle.

(17) Allowing a vehicle alarm to sound, repeatedly or for an extended period of time (false alarm).

All parking citations carry a twenty-dollar fine, with the exception of physically disabled persons parking violations which carry a fifty-dollar fine.

Illegally parked vehicles which require removal will be done so at the owner's or operator's expense.

AMENDATORY SECTION (Amending WSR 93-20-080, filed 10/4/93, effective 11/4/93)

WAC 132N-156-570 Bicycle parking. Bicycles shall be parked in bicycle racks or other facilities provided for the purpose. ~~((Where such facilities are provided.))~~ At no time shall a bicycle be parked in a building, against a building, near a building exit, on a path or sidewalk, or chained or otherwise secured to trees, lamp standards, utilities, stairway railings, or sign posts. Any bicycle found in violation of this section may be cited for illegal parking and impounded by the security/safety office without warning.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-600 Faculty and staff parking permits. All college faculty, staff, and administrators using college parking facilities at any time between 7:00 a.m. and 10:00 p.m. Mondays through Fridays during fall, winter, and spring quarters are to purchase and display a valid parking permit. The fact that an employee may be eligible to park in a physically disabled persons parking zone will not relieve the employee of this requirement. A valid faculty/staff parking permit may not, by itself, constitute authority to park in other parking facilities leased or owned by the college.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-620 Fees for parking permits. The fees charged by the college for the issuance of permits shall be those established by the board of trustees. Parking permits are issued as a license to park at college facilities.

Fees collected will be utilized for parking operations including parking enforcement, parking lot maintenance, and for those transportation demand management and commute trip reduction activities and programs permitted by law.

Current faculty/staff parking permit fees are seven dollars and fifty cents per quarter for one vehicle, and an additional one dollar per quarter for each additional vehicle. ~~((Permits may be purchased on either a permanent, annual, or quarterly basis.))~~ Permits are required for fall, winter, and spring quarters. Administrators, exempt staff, permanent classified staff, and tenure-track faculty may purchase permanent permits. Adjunct faculty and temporary classified staff may purchase quarterly permits. Annual permits may be purchased by full-time temporary faculty and adjunct faculty who have received approval from the security/safety manager.

NEW SECTION

WAC 132N-156-645 Guest parking permits. College faculty or staff who have invited a guest speaker, lecturer, presenter, or other special guest to the college may apply to the security/safety office for a guest parking permit. A guest parking permit will entitle the holder to park in faculty/staff parking, and to park in visitor parking without registering, in order to facilitate their appearance at the college. Permits will be valid only for the day(s) specified on the permit. Guest parking permits will not be issued for personal guests of college employees or for staff employed by the college on a temporary basis.

Requestors will provide the security/safety office with the name of the guest and the date, time, place, and nature of appearance at the college. Permits may be picked up at the security/safety office, or security/safety can mail the permit directly to the guest. Staff should apply for guest parking permits far enough in advance of the appearance to allow for delivery of the permit.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-650 Revocations. Parking permits are licenses and the property of the college and may be revoked for any of the following reasons:

- (1) The purpose for which the permit was issued changes or no longer exists.
- (2) The permit is used on an unregistered vehicle or by an unauthorized individual.
- (3) A parking permit application form was falsified.
- (4) These parking regulations were violated.
- (5) The parking permit was counterfeited or altered or transferred without authorization.
- (6) There has been failure to comply with a specific determination, decision, or directive by college officials.

Appeals of parking permit revocations may be made within twenty days to the security/safety manager for a brief adjudicative procedure. Appeals to the ~~((dean))~~ vice-president of administrative services must be filed within twenty-one days of the date of notice of revocation. The decision of the ~~((dean))~~ vice-president is final.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-730 Appeals. Alleged violators may appeal to the security/safety manager for a brief adjudicative procedure within twenty days of the date of the citation. The security/safety manager may dismiss, suspend, impose any lesser fine, and/or grant an extension of time within which to pay the fine.

Appeals of the decision of the security/safety manager are to be submitted to the ~~((dean))~~ vice-president of administrative services without posting of fine within twenty-one days. Written notification of the ~~((dean's))~~ vice-president's decision shall be made within twenty days of the appeal and shall be final.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-740 Security/parking advisory committee. The security/parking advisory committee is responsible for advising the security/safety office on security and parking operations. Committee functions include, but are not limited to, the following:

- (1) Reviewing parking regulations and fees and recommending their adoption.
- (2) Reviewing and recommending changes to parking lot configuration and use to improve quality and quantity of parking on campus.
- (3) Reviewing provisions for security on campus and recommending practices and procedures for the enhancement of security.

The security/parking advisory committee meets as needed, when the college is in session, and consists of the following:

- (a) ~~((Dean))~~ Vice-president of administrative services, chair.

(b) Security/safety (~~(supervisor))~~ manager.

(c) Two faculty members.

(d) Two classified employees.

(e) One student.

(f) ~~((Director of veterans affairs/disabled services/sponsored programs.))~~ Disability support services manager.

AMENDATORY SECTION (Amending WSR 97-23-018, filed 11/10/97, effective 12/11/97)

WAC 132N-156-750 Unpaid fines. If any fine remains unpaid, any or all of the following actions may be taken by the security/safety office.

- (1) A hold may be placed on transcripts.
- (2) Registration for the following quarter may be delayed.
- (3) Parking privileges may be revoked.
- (4) The amount due as a result of fines due and payable may be deducted from paychecks of college employees.
- (5) Outstanding fines may be referred to a collection agency.
- (6) The vehicle may be immobilized or impounded.

If a violator has two or more unpaid fines, his/her vehicle will be impounded or immobilized and held until all outstanding fines are paid. Immobilization of a vehicle may result in an additional \$20.00 fine.

These procedures will be applicable to all students, faculty, and staff or other persons utilizing college facilities who receive fines for violations of these rules and regulations. Visitors who have received citations for parking violations may ~~((consider the citation a courtesy notice if returned))~~ return the citation to the security/safety office with name, address, and a brief explanation. The security/safety manager may void the citation as a courtesy notice.

RESERVED PARKING

NEW SECTION

WAC 132N-156-800 Policy. College faculty or staff who coordinate special events involving the participation of dignitaries from off-campus may request that parking spaces be reserved for those participants on the day of the event. All requests for reserved parking will be made in writing to the office of the president at least a week in advance. Aside from traffic revisions necessary for construction and maintenance work, the security/safety office will not reserve parking spaces without prior approval from the president's office.

NEW SECTION

WAC 132N-156-810 Process. The requesting party will forward a copy of the approved request to the security/safety manager for implementation. After receiving an approved request, the security/safety manager will contact the requesting party to confirm the details and to assign the reserved spaces. All attempts will be made to accommodate the needs of the participants and the event, but the final decision on the allocation of spaces rests with the security/safety manager.

Reserved spaces will be established only for arrival of participants to the event; no "in and out" areas will be maintained.

On the day of the event, the security/safety office will set up barricades or otherwise designate the reserved spaces. Unless other arrangements are made, it will be the responsibility of the requesting party to provide personnel to meet those individuals authorized to park in the reserved spaces and to remove the barricades to allow them to park. If the requesting party wants to have a security officer staff the parking spaces, they must make prior arrangements for staffing. Security officers will be assigned to such duty only if available, and their time will be charged to the requesting party.

PROPOSED RULES

DEPARTMENT OF AGRICULTURE

[Filed July 18, 2000, 10:33 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 99-22-005.

Title of Rule: Chapter 16-200 WAC, Feeds, fertilizers and livestock remedies.

Purpose: The proposed language allows for the exemption of biosolids from fertilizer regulation if they meet the requirements for biosolids in ecology's biosolids rules. However, if a biosolid product does not meet the exemption requirements the biosolid may be registered as a fertilizer.

Statutory Authority for Adoption: RCW 15.54.270(4) and 15.54.800.

Statute Being Implemented: Chapter 15.54 RCW.

Summary: The proposed rules adopt definitions for "biosolids," "bulk biosolids," and "packaged biosolids"; and allow for the exemption of biosolids from regulation as a fertilizer if certain biosolids criteria are met. The details of what is required for exemption appears in the biosolids permit, keeping the regulation of biosolids in one place. A reference to that permit is made in this revised rule. In addition, if a biosolid does not meet the criteria for exemption it may be regulated as a fertilizer.

Reasons Supporting Proposal: Streamlining the regulation of biosolids by placing primary responsibility for their regulation with Department of Ecology. The biosolids industry is already regulated by both the state Department of Ecology and the federal Environmental Protection Agency (EPA) that require them to meet federal standards for metals before allowing the biosolid to be applied to land. The standards that biosolids must meet are based on a risk assessment done by EPA specifically for biosolids land application. A biosolid would be regulated as a fertilizer only if the material did not comply with all requirements for biosolids regulations, including labeling requirements specified in the state-wide biosolids permit.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Ted Maxwell, 1111 Washington Street, (360) 902-2026.

Name of Proponent: Department of Agriculture, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The proposed language will exempt biosolids from the commercial fertilizer law so long as the product complies with ecology's biosolids rules and state-wide permit. This now includes specific labeling requirements and restrictions that will help differentiate biosolids as a soil enhancement rather than a fertilizer. The primary purpose of the biosolids regulation is to make beneficial use of a waste material to use biosolids to improve soils. Biosolids are regulated by ecology and the Environmental Protection Agency. The Department of Agriculture must also regulate them if they meet the definition of commercial fertilizer. However, the rule allows biosolids to be exempt from fertilizer regulation if they comply with ecology's rules and state-wide permit, which has restrictions on labeling or marketing the material as a commercial fertilizer. If a biosolid product makes claims that liken it to commercial fertilizer and thus does not comply with ecology's state-wide permit then they will be regulated as a fertilizer in addition to being regulated under the biosolids rules.

Proposal Changes the Following Existing Rules: Exempts biosolids from regulation as commercial fertilizer if it complies with ecology rules and does not claim to be a fertilizer. Allows for the regulation of biosolids as a fertilizer if the biosolid product does not comply with ecology's rules and can be defined as a commercial fertilizer. This is more likely for packaged biosolids that are marketed and sold as fertilizer. Clarifies the definition of biosolids, bulk biosolids, and packaged biosolids. Provides a reference to the appropriate regulation of biosolids in ecology's rules.

No small business economic impact statement has been prepared under chapter 19.85 RCW. There is no additional cost to businesses in the implementation of this rule. This rule should actually save money for the affected industry by exempting them from fertilizer regulation. Thus, no small business economic impact statement was necessary.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. The Washington State Department of Agriculture is not a listed agency in section 201.

Hearing Location: Via videoconference at DIS Interactive Technologies, 710 Sleater-Kinney Road S.E., Suite Q, Lacey, WA 98504 and Yesterday's Village, 15 West Yakima Avenue, Suite 220, Yakima, WA 98902, on August 22, 2000, at 4:00 p.m.

Assistance for Persons with Disabilities: Contact Laurie Mauerman by August 8, 2000, TDD (360) 902-1996.

Submit Written Comments to: Laurie Mauerman, Washington State Department of Agriculture, P.O. Box 42560, Olympia, WA 98504-2560, fax (360) 902-2093, by August 23, 2000.

Date of Intended Adoption: September 6, 2000.

NEW SECTION

WAC 16-200-600 Purpose. The following sections concerning the protection of ground water, labeling requirements and examination of fertilizers, minerals and limes (WAC 16-200-708 through 16-200-742) are established in this chapter under the authority of the Commercial Fertilizer Act, chapter 15.54 RCW.

This chapter also describes the requirements for registration of commercial fertilizers, including the information which must be submitted as part of the registration application, the sample preparation and analysis methods which must be used, the maximum application rates the department will use to determine whether a commercial fertilizer may be registered, the Washington standards for metals (in pounds per acre per year), and the acts which are unlawful under this chapter.

AMENDATORY SECTION (Amending WSR 99-08-037, filed 3/31/99, effective 5/1/99)

WAC 16-200-695 Definitions. The definitions set forth in this section shall apply throughout this chapter unless context otherwise requires:

(1) "Organic" means a material containing carbon and one or more elements (other than hydrogen and oxygen) essential for plant growth. When the term "organic" is utilized in the label or labeling of any commercial fertilizer, it shall be qualified as either "synthetic organic" or "natural organic," with the percentage of each specified.

(2) "Natural organic" means a material derived from either plant or animal products containing carbon and one or more elements (other than hydrogen and oxygen) essential for plant growth.

(3) "Synthetic organic" means a material that is manufactured chemically (by synthesis) from its elements and other chemicals, containing carbon and one or more elements (other than hydrogen and oxygen) essential for plant growth.

(4) "Unit" means one percent (by weight) of a ton.

(5) "AOAC" means the association of official analytical chemists.

(6) "Commercial fertilizer" means a substance containing one or more recognized plant nutrients and that is used for its plant nutrient content or that is designated for use or claimed to have value in promoting plant growth, and shall include limes, gypsum, and manipulated animal and vegetable manures. It does not include unmanipulated animal and vegetable manures, organic waste-derived material, and other products exempted by the department by rule.

(7) "Fertigation" means a method of applying commercial fertilizers with irrigation water to fertilize land or plants.

(8) "Fertilizer component" means a commercial fertilizer ingredient containing one or more recognized plant nutrients which is incorporated in the commercial fertilizer for its plant nutrient value.

(9) "Maximum acceptable cumulative metals additions to soil" means the amount of total metals that can be added to soil over a forty-five-year period of time without exceeding the Canadian standards which have been adopted in RCW 15.54.800(3) as Washington standards for metals.

(10) "Organic waste-derived material" means grass clippings, leaves, weeds, bark, plantings, prunings, and other vegetative wastes, uncontaminated wood waste from logging and milling operations, food wastes, food processing wastes, and materials derived from these wastes through composting. "Organic waste-derived material" does not include products that include biosolids.

(11) "Maximum application rate" means the maximum amount of commercial fertilizer expressed by weight (such as: pounds, ounces, kilograms, or milligrams) or volume (such as: gallons, quarts, fluid ounces, liters, or milliliters) to be applied to an area of a specified size (such as: acres, square feet, hectares, or square meters) in a period of time stated in years.

(12) "Biosolids" means municipal sewage sludge that is a primarily organic, semisolid product resulting from the wastewater treatment process that can be beneficially recycled, including material derived from biosolids, and septic tank sludge, also known as septage. For the purposes of this rule, semisolid products include biosolids or products derived from biosolids ranging in character from mostly liquid to fully dried solids.

(13) "Unpackaged biosolids" means biosolids distributed in a loose, unpackaged form such as, but not limited to, tote bags, tote tanks, bins, tanks, trailers, spreader trucks, railcars, and pick-up truckloads or other container provided by the final user solely for transport of the material.

(14) "Packaged biosolids" means biosolids distributed in a container provided by the distributor of the material.

NEW SECTION

WAC 16-200-701 What products are exempt from the definition of commercial fertilizer? In addition to unmanipulated animal and vegetable manures and organic waste-derived materials, the following materials are exempt from the definition of commercial fertilizer:

(a) Unpackaged biosolids if they comply with biosolids regulation under WAC 173-308, and they do not use the term "fertilizer" in the labeling of the biosolids, except to disclaim them as commercial fertilizer;

(b) Packaged biosolids if they do not meet the definition for commercial fertilizer, do not use the term "fertilizer" in the labeling of the biosolids, except to disclaim them as commercial fertilizer; and comply with biosolids regulation under WAC 173-308.

Reviser's note: The unnecessary underscoring in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

NEW SECTION

WAC 16-200-703 How are biosolids regulated under the Commercial Fertilizer Act? (1) Unpackaged biosolids and packaged biosolids that do not meet the definition for commercial fertilizer must include a legible and conspicuous disclaimer on their labeling. The disclaimer must specifically state that the product is not a commercial fertilizer, and that any nutrient claims are estimates or averages and are not guaranteed.

(2) Packaged biosolids that meet the definition for commercial fertilizer must be registered as commercial fertilizer.

AMENDATORY SECTION (Amending Regulation 1, filed 5/23/63)

WAC 224-12-010 Applicability. These regulations apply to growers, dealers, handlers, and processors of (~~Washington-grown~~) soft tree fruits, which include all varieties, subvarieties and "sport" varieties of cherries, apricots, peaches, prunes, plums and Bartlett pears. (Assessments and reporting on tart cherries and plums are suspended at present.) As to such fruit grown in 1963 and subsequent years these regulations hereby repeal and supersede all previous regulations.

AMENDATORY SECTION (Amending Regulation 3-6, filed 5/23/63)

WAC 224-12-030 Records. (1) Each dealer, handler, processor, or grower shall keep a complete and accurate record of the (~~Washington-grown~~) soft tree fruits handled, shipped, processed or produced by him. The dealer's or processor's record of fruit received shall include separate accounts for each grower or dealer who supplied fruit to him and shall show the supplier's name and mailing address, dates of purchase, kind of fruit and quantity of each delivery. There shall also be shown the amounts of any soft tree fruit assessments that were withheld from the supplier's account.

(2) There shall be kept a separate file on each fresh market shipment, with complete and accurate identification and description of the shipment.

(3) There shall be kept a separate account for each dealer, handler, or processor to whom fruit was sold for further handling or processing, and this record shall contain complete and accurate details of the transactions.

(4) The records described in subsections (1), (2), and (3), shall be maintained currently and kept as the principal place of business - subject to audit - for a period of not less than two years and shall be offered for examination at any reasonable time when official request is made by an authorized representative of the commission.

AMENDATORY SECTION (Amending Regulation 9-10, filed 5/23/63)

WAC 224-12-070 Processing fruit assessments—Reporting and payment—Growers, dealers, processors.

(1) Each processor of Washington-grown soft tree fruits shall make an annual processor report to the commission on each soft tree fruit. This report shall show each first handler separately and also in total for individual growers the number of

pounds delivered of commercial graded fruit, pounds of cull fruit, and amount of assessment payable on the commercial graded fruit. Processor reports shall also describe utilization of the fruit, showing poundage breakdowns of commercial graded fruit, and culls separately, for the quantities (a) canned, (b) brined, (c) frozen or otherwise processed, (d) resold to any other processor or dealer, and (e) dumped or destroyed.

(2) More than one commodity may be reported on a single processor report, providing time limits for reporting are observed and that the data for each commodity is kept separate and distinct. For each soft tree fruit which he did not process or handle during the current season, the processor shall report "none handled." Processor report forms will be supplied by the commission, laid out in a manner to provide convenient listing of the information desired. Each processor report shall be signed by the owner, executive officer or manager of the firm that is reporting. Washington soft tree fruit assessments shall be deducted by the processor from his growers' accounts, and this may include dealers who are primarily growers.

(3) Transmittal of the processor report and the payable assessments on each commodity shall be made by the processor to the Washington state fruit commission as soon as possible and within 21 days after each season's final delivery of raw fruit at the processor's packing or storing facilities.

(4) Each grower, broker, dealer, or handler of (~~Washington grown~~) soft tree fruits who sells fruit to a broker, commercial processor or custom processor shall file, separately for each processor or broker to whom he sold, a processor report (or adequate letter of transmittal in lieu thereof) completed in the same manner and time described above as for processors and accompanied by payment of any assessments due the commission on such report. In any case in which the processor or broker does not deduct the proper assessment from the grower's account, the grower shall remit the assessment to the commission at the time he forwards his own processor report.

AMENDATORY SECTION (Amending Regulations 11-15, filed 5/23/63)

WAC 224-12-080 General provisions. (1) The soft fruit act provides that the assessments shall be paid by growers and are due prior to shipment. This includes out of state growers whose soft tree fruit is shipped into Washington and packed as Washington soft tree fruit. Packed as Washington soft tree fruit means soft tree fruits packed or processed in the state.

(2) The manner in which assessments shall be transmitted from the growers to commission, however, is established by these regulations, it being understood that when a handler or processor remits assessments to the commission he will have deducted the proper assessments back through the line of purchase and from the growers' accounts.

~~((2))~~ (3) Soft tree fruit assessments are imposed on the net pounds of commercial graded fruit shipped fresh or delivered to the processors. Cull fruit, except cherries which are brined, is exempt from assessments and also exempted are all sales of five hundred pounds, or less, of commercial graded

soft fruit sold by the grower direct to consumer: Provided, however, That any shipment in excess of five hundred pounds shall be subject to said assessments irrespective of the ultimate disposition.

~~((3))~~ (4) On December 31 of each year, every Washington state soft tree fruit dealer, handler or processor shall file with the commission a written statement that he has—to the best of his knowledge—paid in full to the commission all soft tree fruit assessments properly due from him for the past season on both fresh market fruit and processing fruit. Or in the event that any assessments remain unpaid, such written statement shall describe the unpaid assessments, the reason for nonpayment, and make a definite commitment as to the date or dates when the assessment will be paid.

~~((4))~~ (5) These revised regulations, as provided in said act, have the force and effect of law, and any person who violates or aids in the violation of any of these regulations is in violation of Washington state law and is guilty of a misdemeanor.

~~((5))~~ (6) Ten percent per annum interest as a delinquent penalty is payable on assessments which are more than thirty days past due (to help cover extra costs of accounting and correspondence).

~~((6))~~ (7) The seal of the commission shall be circular in form and contain the following inscription: "WASHINGTON STATE FRUIT COMMISSION" around the outside of the seal and the word "SEAL" in the center thereof.

PROPOSED RULES
DEPARTMENT OF
LABOR AND INDUSTRIES
[Filed July 19, 2000, 10:32 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 99-07-015 on March 9, 1999.

Title of Rule: Chapter 296-155 WAC, Safety standards for construction work (concrete pumps and placing booms).

Purpose: The Department of Labor and Industries (L&I) established Construction Advisory Committee (CAC), consisting of labor and management representatives from the construction industry, in an effort to improve safety within the concrete pump and placing boom industry, initiated a review of the current applicable requirements. The goal was

to develop more comprehensive rules for those operations. In October 1998, the CAC submitted a proposal to the department's WISHA Services Division for rule-making consideration. The WISHA Services Division, without adding any additional requirements to the CAC proposal, reorganized and used clear rule-writing techniques to improve its clarity. At a June 1999 meeting of the Construction Advisory Council, a copy of the department's version of the proposal was distributed to each member for their review and comments. No comments or suggested changes were received from any member of the committee. In April 2000, the department further modified the operator requirements and these modifications have been reviewed and accepted by the CAC.

This is a significant legislative rule amendment because these are new requirements. During discussions with the CAC, it was determined that even though they recommended these requirements for the industry and, in some instances, they have been implemented by a number of companies, there are still some that will need to comply.

The following is a summary of the state-initiated amendments being proposed for adoption:

AMENDED SECTION: WAC 296-155-682(8) Concrete pumps and placing booms.

- To insert definitions that apply specifically to concrete pumps and placing booms.
- To add requirements that certain equipment specifications must be displayed and readable on each concrete pump.
- To add the requirement that the manufacturer's operation/safety manual must be available at each concrete pump or placing boom.

- To add the requirement that equipment controls must have their functions clearly marked.
- To add requirements for hydraulic systems to have relief valves to prevent cylinder and boom damage, holding valves in the event of uncontrolled vertical movement, and for certification after equipment failure.
- To add the requirement that a permanent, legible notice of total weight be marked on each unit.
- To add requirements for lifting a pump, availability of a clearly labeled emergency shut off switch, and inlet and outlet guarding.
- To add requirements for the use of outriggers in accordance with manufacturer's specifications and permanently marked with the maximum loading specifications.
- To add requirements to adhere to the placing booms weight of load, length and diameter of suspended hose, and the diameter and weight of mounted pipe specifications and to identify specific operations that are not safe.
- To add requirements for pipe wall thickness, pipe clamps, delivery pipe, and restraining devices.
- To add a table which recommends maximum yards per hour through a hose.
- To add requirements for equipment inspection timelines, what the inspection must include, and items the inspection report must contain.
- To add requirements for equipment repair which includes certified replacement parts and repair to the equipment.

PROPOSED

- To add requirements that provide procedures to institute when using compressed air to clean the piping system.
- To add requirements for operator and operator trainee qualification.

• To add requirements for concrete pump inspection worksheet criteria.

Small Business Economic Impact Statement

INTRODUCTION: The Department of Labor and Industries is proposing amendments to WAC 296-155-682 Requirements for concrete pumping systems. The proposal will update requirements for concrete pumping system equipment safety, inspection, certification, and operation. In addition requirements for concrete pumping system component compatibility and operator training and physical requirements are also enhanced.

SUMMARY OF PROPOSED RULE CHANGES: Some of the proposed amendments contain requirements that may have an economic impact on businesses in the concrete pumping industry. A summary of the proposed amendments is shown below:

A. Equipment safety and operation.

1. The manufacturer's name, year of manufacture, model and serial number, maximum materials pressure must be available for each piece of equipment manufactured after January 1, 1998.
2. The manufacturer's equipment manual must be with, or near the concrete pump equipment.
3. Controls must have their functions clearly marked.
4. Hydraulic systems must have pressure relief valves and hydraulic holding valves.
5. Concrete pumps and booms must have a permanent, readable notice, stating the total unit weight.
6. A concrete pump must have a clearly labeled emergency shut-off switch.
7. There must be sufficient inlet and outlet guards on the water box and the agitator.

B. Component compatibility.

1. The pipe diameter and weight must meet the manufacturer's specifications.

2. The pipe wall thickness and pipe clamps must be in accordance with the manufacturer's requirements and instructions.

3. No attachments must be placed on the delivery pipe and the delivery pipe must be supported to prevent excessive loading on the clamps.

4. Components of the pump and delivery systems must be compatible and meet manufacturer's specifications.

C. Equipment inspection and certification.

1. Equipment must be tested and certified annually, and after five years semiannually, by a qualified person, agency or company. The test must determine if all components are functioning according to manufacturer's specifications.

2. An up to date inspection worksheet must be kept with the equipment. The worksheet must contain information about the type of tests; test results and who performed the test.

D. Certification of safe repair.

1. In the event of equipment failure or contact with energized electric power lines the equipment must be certified safe for use by the manufacturer, representative of the manufacturer or a professional engineer.

2. Replacement parts must meet or exceed manufacturer requirements. A record of the repair must be kept as well.

3. A qualified welder must do welding repair work.

E. Physical qualification requirements for operators.

1. Vision of at least 20/30 Snellen in one eye, 20/50 in the other, corrective lenses can be used. Normal depth of perception and field of vision, and the ability to distinguish colors.

2. Adequate hearing to meet operational demands. A hearing aid may be used to achieve this requirement.

3. Sufficient strength, endurance, agility, coordination manual dexterity and speed of reaction to meet operational demands.

4. No evidence of physical defects or emotional instability which could produce a hazard to the operator or others. Evidence that the operator is subject to seizures or loss of physical control will be sufficient ground for disqualification.

5. Be of legal age to perform the duties required.

F. Operator training requirements. To be considered qualified operators must:

1. Successfully pass a physical examination, at a minimum every two years.
2. Satisfactorily complete a written exam covering safety and operational procedures.
3. Demonstrate an ability to read the pump manufacturer's operation and safety manuals.
4. Have proof of their classroom training and be able to furnish it upon request.
5. A qualified individual must conduct the operator training.
6. Have an understanding of emergency procedures including emergency stop protocols.
7. Have an understanding of pump restart procedures.
8. Have the proper class of driver's license.
9. Be familiar with safety and maintenance requirements.

SMALL BUSINESS ECONOMIC IMPACT STATEMENT: The Regulatory Fairness Act, chapter 19.85 RCW, requires that the economic impact of proposed regulations on small businesses be examined relative to their impact on large businesses. The act outlines the requirements for a small business economic impact statement (SBEIS). For the purposes of an SBEIS the term small business is defined as a business entity that has the purpose of making a profit and has fifty or fewer employees. The agency must prepare an SBEIS when a proposed rule, or rule amendments, have the potential of placing a more than minor economic impact on business. Concrete pumping units are used in several different industries: Concrete work, SIC 177 and Heavy Construction, SIC 162. The minor impact thresholds for these industries range from fifty to one hundred thirty-five dollars (1990 dollars) per business establishment. These values are calculated as 0.1% of profits for a business of fifty employees (Guide for Facilitating Regulatory Fairness, 1993). The results presented in Table 1 below reveal that the compliance costs created by the proposed changes to chapter 296-155 WAC exceed the minor cost thresholds for an SBEIS.

Cost of Compliance: To assess the financial impact of the proposed amendments to chapter 296-155 WAC, the agency conducted a mail survey in which concrete pumping businesses were asked to estimate the cost of compliance. A total of fifty-five surveys were sent to a select group of busi-

nesses that use concrete pumping systems. The survey contained a brief summary of the proposed rule change and then asked the recipient to estimate the anticipated costs for each component of the proposal: 1. Equipment safety and operation; 2. Component compatibility; 3. Inspection and certification; 4. Repair certification; and 5. Training and physical requirements. The survey also asked the employer to indicate the number of concrete pumping systems in use, total number of employees and the number of employees using concrete pumping systems. A total of sixteen surveys were returned, of which fifteen were useable, for an effective response rate of 27%. Of those responding fourteen (93.3%) were small businesses and only one (6.7%) exceeded the small business employment threshold of fifty.

Analysis of Survey Cost Data: The survey data was compiled and analyzed in an Excel spreadsheet. Costs for compliance cost under the proposed amendments were determined for small and large business entities. While response data was generally used as reported a few respondents may have misinterpreted the questions or responded in a strategic manner. Two small business survey respondents in particular reported anticipated compliance costs that were far higher than the costs others reported. The results are presented in Table 1 below as a complete data set and as a trimmed data set in which the two high outlier respondents were removed.

Table 1: Estimated compliance costs for the concrete pumping amendments.

Category or Rule Component Cost	Small Business (n=14)		Trimmed Small Business (n=12)		Large Business* (n=1)	
No. concrete pumping systems	6.6		7.1		11	
No. employees	11.1		10.8		90	
No. employees using concrete pumping systems	8.6		7.1		15	
Equipment safety and operations	\$1,275	(\$211)	\$1,275	(\$211)	\$10,000	(\$900)
Component compatibility	\$100	(\$91)	\$100	(\$91)	\$20,000	(\$1,800)
Inspection and certification	\$3,350	(\$801)	\$3,291	(\$510)	\$10,000	(\$900)
Repair and certification	\$2,944	(\$917)	\$2,688	(\$406)	\$20,000	(\$1,800)
Training	\$1,627	(\$902)	\$1,540	(\$743)	\$15,000	(\$1,400)
Total (new) costs	\$7,762	(\$3,516)	\$7,445	(\$2,210)	\$65,000	(\$6,000)

Values in parenthesis indicate cost per concrete pumping system.

*One large business responding.

As expected the compliance costs per establishment are significantly higher for large businesses: \$7,762 or \$7,445 versus \$65,000 for large businesses. When compliance cost is calculated on the basis of the number of concrete pumping systems at a particular company, the anticipated costs are lower for small business: \$3,516 or \$2,210 versus \$6,000 for the large business entity.

The Guide for Facilitating Regulatory Fairness (1993) suggests that one approach for assessing disproportionate

impact is to determine a proposed rules cost on a per employee basis. Because large businesses tend to be more diversified the survey asked the recipients to indicate not only the number of total employees, but also the number of employees that use concrete pumping systems as well. Table 2 below presents the component cost for the proposed rule amendments on the basis of total employees and on the basis of concrete pump using employees, for large, small, and trimmed small business groupings.

Table 2: Estimated per employee compliance costs.

Rule Component Cost	Small Business		Trimmed Small Business		Large Business		Small/Large	
Equipment safety and operations	\$212	(\$229)	\$160	(\$180)	\$103	(\$667)	2.1	(0.34)
Component compatibility	\$5	(\$91)	\$6	(\$111)	\$206	(\$1,333)		
Inspection and certification	\$466	(\$851)	\$431	(\$521)	\$103	(\$667)	4.5	(1.3)
Repair and certification	\$339	(\$885)	\$314	(\$314)	\$206	(\$1,333)	1.65	(0.66)
Training	\$590	(\$902)	\$146	(\$269)	\$155	(\$1,000)	3.8	(0.90)
Total	\$1,380	(\$2,495)	\$875	(\$1,222)	\$567	(\$3,667)	2.4	(0.68)

Values in parenthesis indicate cost per concrete pump using employee.

The per employee compliance cost for small businesses is \$1,380, or \$875 when using the trimmed survey data set. This is significantly higher than the per employee compliance cost of \$567 for the large business entity: Small to large business cost ratio of 2.4. A small to large cost ratio significantly above 1.0 is indicative of disproportionate impact on small business. When compliance costs are evaluated on the basis of number of employees using concrete pumping systems the costs are higher for large business: \$3,667 per employee for the one large business versus \$2,495 and \$1,222 for small businesses. The small to large cost ratio determined using costs based on the number of employees using concrete pumping systems is 0.68. This ratio is significantly below 1.0, which indicates that compliance with the proposed rule amendments will not have a disproportionate cost impact on small business.

CONCLUSIONS: A survey was conducted to determine the compliance costs for the proposed amendments to the rules pertaining to concrete pumping systems (WAC 296-155-682). The estimated new costs per establishment, presented in Table 1, indicate the proposal will have a more than a minor impact on business. A comparison of compliance costs for large and small business was made. Compliance cost for large and small business was assessed using two methods. The first method was based on the number of concrete pumping systems at a particular business. The second method was based on the number of employees using the pumping systems. Both of these methods revealed that the anticipated compliance costs are lower for small business. Based on the results of this survey, I conclude that the proposal will not have a disproportionate impact on small business.

NEW SECTION

WAC 180-51-001 Education reform vision. (1) The shift from a time and credit based system of education to a standards and performance-based education system will require a multiyear transition. In the long-term, the state board believes that certain ways of thinking about time need to shift and/or be eliminated in order to support the on-going implementation of school reform. The board's long-term vision of a performance-based education system includes:

(a) No references to grade levels or linking a student's educational progress to a particular age. Instead, learning is viewed in terms of developmental progress, academically and vocationally, so that while the curriculum may be sequential the student moves through it at her or his developmental pace, regardless of age;

(b) An understanding that in the absence of other important information, a student's grade point average and/or performance on the Washington assessment of student learning do not provide a complete picture of the student's abilities and accomplishments;

(c) An understanding that our concept of school needs to expand and take into account that education and learning are about connected learning experiences, which can and do occur inside and outside the physical boundaries of a school building; and

(d) An understanding that students do not all learn in the same way (there are multiple learning styles), that teachers do not all instruct in the same way (there are multiple teaching styles and strategies), and these facts suggest that it should be possible to assess students' performance and achievement in multiple ways while maintaining common, high expectations and standards for learning.

(2) Long-term, as the performance-based education system continues to evolve, the state board of education believes that there should be an on-going review of assessment administration issues. The state board believes it is worth envisioning a time when state assessments are not administered at a particular grade level. Instead, during one or more assessment windows annually, students are allowed to take the appropriate norm-referenced or criterion-referenced state assessment upon the collective determination by the student, the student's parent(s), teacher(s), and counselor that the student is developmentally ready to take the assessment.

NEW SECTION

WAC 180-51-003 Intent of graduation requirements.

(1) The state board of education is responsible for establishing minimum high school graduation requirements that appropriately balance:

- (a) State-wide public expectations for all graduating students;
- (b) High, meaningful, and fair requirements every student can meet;
- (c) The unique characteristics of and differing resources among the two hundred ninety-six school districts and over three hundred high schools in Washington; and
- (d) Recognition that some students' educational plans may not include college or may include application for admission to a postsecondary institution one year or more after being granted a high school diploma.

(2) In order to facilitate the transition, encourage local innovation, and realize the vision under WAC 180-51-001, it is the intent of the state board of education to enact changes to the current state minimum graduation requirements, standardized transcript, and course of study and equivalency provisions to:

- (a) Align the state-wide minimum high school graduation requirements with the goal of the basic education act under RCW 28A.150.210 and the mission of the common school system under WAC 180-40-210;
- (b) Allow districts the optional discretion to define and award high school credit based on demonstrated performance that is not tied to a state minimum number of hours of instruction or instructional activities;
- (c) Assure that all the essential academic learning requirements developed under RCW 28A.655.060 (3)(a) and 28A.655.070(2) are taught in the high school curriculum;
- (d) Assure that students are aware of the connection between their education and possible career opportunities as referenced in RCW 28A.150.210(4) and WAC 180-57-090;
- (e) Assure that students are provided the opportunity to effectively prepare for the secondary Washington assessment of student learning and earn the certificate of mastery required under RCW 28A.655.060 (3)(c), recognizing that

the certificate of mastery represents demonstrated foundation knowledge and skills that are important toward, but no sufficient for, high school graduation; and

(f) Provide greater guidance to school districts in regard to the state board's obligation under RCW 28A.305.130(8) to "...Prepare such outline of study for the common schools as the board shall deem necessary ..."

(3) It is the state board's view that the creative development and application of integrated curriculum within existing resources will significantly facilitate the implementation of the graduation requirements under WAC 180-51-061. The board strongly encourages districts to:

- (a) Implement curriculum that includes courses that incorporate the best applied, theoretical, academic or vocational features as authorized under RCW 28A.230.010;
- (b) Emphasize the integration of academic and vocational education in educational pathways as required under RCW 28A.655.060 (3)(c); and
- (c) Consider using the model curriculum integrating vocational and academic education developed by the superintendent of public instruction under RCW 28A.300.235.

(Division of Child Support)

[Filed July 10, 2000, 4:26 p.m., effective October 1, 2000]

Date of Adoption: July 10, 2000.

Purpose: The Division of Child Support seeks to revise its procedures for preparing and serving a support establishment notice under RCW 74.20A.055 or 74.20A.056. After the Division of Child Support enacted changes to the WAC regarding procedures for preparing and serving support establishment notices so as to give the physical custodian of the child full party status, DCS staff requested that the procedures be revised. DCS commissioned a quality improvement team to look at the process and the QIT has come up with suggestions on how the preparation and service of the support establishment notice can be streamlined, revised and improved. DCS believes the new method will be more efficient and easier to understand, and will result in better customer service for both custodial and noncustodial parents.

Citation of Existing Rules Affected by this Order: WAC 388-14A-3100 How does the division of child support establish a child support obligation when there is no child support order?, 388-14A-3102 When the parents have signed a paternity affidavit, which support establishment notice does the Division of Child Support serve on the noncustodial parent?, 388-14A-3105 How does the division of child support serve support establishment notices?, 388-14A-3110 When can a support establishment notice become a final order?, 388-14A-3115 The notice and finding of financial responsibility is used to set child support when paternity is not an issue, 388-14A-3120 The notice and finding of parental responsibility is used to set child support when the father's duty of support is based upon an affidavit of paternity which is not a conclusive presumption of paternity, 388-14A-3125 The notice and finding of medical responsibility is used to set a medical support obligation when the custodial parent receiving medical assistance declines full child support enforcement services, 388-14A-3130 What happens if a parent makes a timely request for hearing on a support establishment notice?, 388-14A-3131 What happens if neither parent appears for the hearing?, 388-14A-3132 What happens if only one parent appears for the hearing?, 388-14A-3133 What happens when the noncustodial parent and the custodial parent both appear for the hearing?, 388-14A-3135 Late hearings, or hearing on untimely objections to support establishment notices, 388-14A-3140 What can happen at a hearing on a support establishment notice?, 388-14A-3200 How does DCS determine my support obligation?, 388-14A-3205 How does DCS calculate my income?, amending WAC 388-11-011, 388-11-100, 388-11-120, 388-11-150, 388-11-305 and 388-11-310; and repealing WAC 388-11-285, 388-11-290, 388-11-295, 388-11-400, 388-11-415, 388-11-420, 388-11-425, 388-11-430, and 388-11-445.

AMENDATORY SECTION (Amending Order DE 86-34, filed 1/27/87)

WAC 173-245-010 Purpose and scope. This chapter establishes a procedure and criteria for implementing RCW 90.48.480, which requires "the greatest reasonable reduction of combined sewer overflows at the earliest possible date." It applies to municipalities whose sewer system includes combined sewer overflow (CSO) sites.

AMENDATORY SECTION (Amending Order DE 86-34, filed 1/27/87)

WAC 173-245-015 General requirements. (1) All CSO sites shall achieve and at least maintain the greatest reasonable reduction, and neither cause violations of applicable water quality standards, nor restrictions to the characteristic uses of the receiving water, nor accumulation of deposits which: (a) Exceed sediment criteria or standards; or (b) have an adverse biological effect.

(2) This chapter (~~shall~~) may not negate specific CSO reduction projects, programs, and schedules (~~which~~) that the department and a municipality have agreed upon (~~prior to~~) before this chapter's effective date. However, the provisions of this chapter shall still apply.

(2) "Baseline annual CSO volume and frequency" means the annual CSO volume and frequency (~~which~~) that is estimated to occur based upon the existing sewer system and the historical rainfall record.

(3) "Best management practices" means use of those practices which will best reduce the amount of pollution caused by nonpoint sources so that pollutant loadings in combined and storm sewer flows during rainfall events are minimized.

(4) "Combined sewage" means the mixture of sanitary sewage, infiltration, and inflow.

(5) "Combined sewer" means a sewer (~~which~~) that has been designed to serve as a sanitary sewer and a storm sewer, and into which inflow is allowed by local ordinance.

(6) "Combined sewer overflow (CSO)" means (a) the event during which excess combined sewage flow caused by inflow is discharged from a combined sewer, rather than conveyed to the sewage treatment plant because (~~either~~) the capacity of either the treatment plant or the combined sewer is exceeded.

(7) "CSO reduction plan" means a comprehensive plan for attaining the greatest reasonable reduction of (~~CSOs~~) CSOs at the earliest possible date. The requirements for a CSO reduction plan are as further described in this chapter.

(8) "Department" means the department of ecology.

(9) "Disinfection" means the selective destruction of disease-causing and bacterial indicator group organisms.

(10) "Domestic wastewater facilities" means any CSO treatment(~~s~~) or control facility included under the definition of domestic wastewater facilities as defined in chapter 173-240 WAC.

(11) "In-line storage" means storage of sewage within the sewer pipes through the use of regulators and gates.

(12) "Infiltration" means the addition of ground water into a sewer through joints, the sewer material, cracks, and other defects.

(13) "Inflow" means the addition of rainfall-caused surface water drainage from roof drains, yard drains, basement drains, street catch basins, etc., into a sewer.

(14) "NPDES" means the National Pollutant Discharge Elimination System.

(15) "Off-line storage" means storage of sewage adjacent to the sewer pipe in a tank or other storage device.

(17) "Sanitary sewer" means a sewer (~~which~~) that is designed to convey sanitary sewage and infiltration.

(18) "Sanitary sewage" means the mixture of domestic, commercial, and industrial wastewaters.

(19) "Secondary treatment" means any process (~~which~~) that achieves the requirements of 40 CFR Part 133 as supplemented by state (~~regulation~~) rule and guidance.

(20) "Storm sewer" means a sewer (~~(which)~~) that is designed to convey surface water drainage caused by rainfall.

(21) "Storm sewer/sanitary sewer separation" means construction of new storm sewers or new sanitary sewers so that sanitary sewage and surface drainage are conveyed in different sewers.

(22) "The greatest reasonable reduction" means control of each CSO in such a way that an average of one untreated discharge may occur per year.

AMENDATORY SECTION (Amending Order DE 86-34, filed 1/27/87)

WAC 173-245-030 Submission of plans. Municipalities shall:

(1) Obtain the approval of the department for CSO reduction plans by January 1, 1988. This deadline may be extended by the department(~~(r)~~) when that authority is granted.

(2) Submit plans to the department at least sixty days (~~(prior to)~~) before the time approval is desired.

(3) Incorporate CSO reduction plans into their respective general sewer plans and into plans for new or upgraded sewage treatment facilities.

AMENDATORY SECTION (Amending Order DE 86-34, filed 1/27/87)

WAC 173-245-040 CSO reduction plan. (1) The CSO reduction plan (~~(shall)~~) must be sufficiently complete so that plans and specifications can be developed from it for projects (~~(which)~~) that may proceed into design within two years of plan submittal. Sufficient detail of any remaining projects (~~(shall)~~) must be provided (~~(such)~~) so that detailed engineering reports can be prepared in the future.

(2) CSO reduction plans shall include the following information together with any other relevant data as requested by the department.

(a) Documentation of CSO activity. Municipalities shall complete a field assessment and mathematical modeling study to establish each CSO's location, baseline annual frequency, and baseline annual volume; to characterize each discharge; and to estimate historical impact by:

(i) Flow monitoring and sampling (~~(CSO's)~~) CSOs. Monitoring and sampling at one or more CSO sites in a group (~~(which)~~) that are in close proximity to one another (~~(shall be)~~) is sufficient if the municipality can establish a consistent hydraulic and pollutant correlation between(~~(f)~~) or among the group of CSO sites. Sampling may not be required for CSO sites (~~(which)~~) that serve residential basins; and

(ii) Developing a rainfall/stormwater runoff/CSO model to simulate each CSO site's activity; and

(iii) Verifying the model's accuracy with data collected under (a)(i) of this subsection; and

(iv) In circumstances where an historical impact may be discernible, observing and sampling the receiving water sediments adjacent to each CSO site or group of sites to establish the presence and extent of any bottom deposits; and

(v) If the sewer service area upstream of a CSO site includes sanitary sewer sources other than domestic sewage,

samples of the sediment deposits shall receive heavy metal analysis and organic pollutant screening. Pending review of results of these analyses, the department may require additional pollutant analyses. If two or more CSO sites serve the same industrial/commercial sources, sediment sampling adjacent to one representative CSO site may suffice.

(b) (~~(Analysis of control/treatment alternatives. Treatment/control alternatives.)~~) To achieve the greatest reasonable reduction at each CSO site, (~~(which)~~) control/treatment alternatives that shall receive consideration include, but are not limited to:

(i) Use of best management practices, sewer use ordinances, pretreatment programs, and sewer maintenance programs to reduce pollutants, reduce infiltration, and delay and reduce inflow; and

(ii) In-line and off-line storage with at least primary treatment and disinfection at the secondary sewage treatment facility (~~(which)~~) that is served by the combined sewer; or

(iii) Increased sewer capacity to the secondary sewage treatment facility (~~(which)~~) that shall provide at least primary treatment and disinfection; or

(iv) At-site treatment equal to at least primary treatment, and adequately offshore submerged discharge. At-site treatment may include a disinfection requirement at CSO sites (~~(which)~~) that are near or impact water supply intakes, potentially harvestable shellfish areas, and primary contact recreation areas; or

(v) Storm sewer/sanitary sewer separation.

(c) Analysis of selected treatment/control projects. Municipalities shall (~~(do)~~) conduct an assessment of the treatment/control project or combination of projects proposed for each CSO site. The assessment shall include:

(i) An estimation of the water quality and sediment impacts of any proposed treated discharge using existing background receiving water quality data, and estimated discharge quality and quantity. The department may require a similar analysis for proposed storm sewer outfalls for basins (~~(which)~~) that drain industrial and/or commercial areas; and

(ii) An estimation of the selected projects' impacts on the quality of effluent from and operation of a municipality's secondary sewage treatment facility. During wet weather flow conditions, a municipality shall maximize the rate and volume of flows transported to its secondary sewage treatment facility for treatment. However, (~~(such)~~) those flows (~~(shall)~~) must not cause the treatment facility to exceed the pollutant concentration limits in its NPDES permit; and

(iii) The estimated construction and operation and maintenance costs of the selected projects; and

(iv) The general locations, descriptions, basic design data, sizing calculations, and schematic drawings of the selected projects and descriptions of operation to demonstrate technical feasibility; and

(v) An evaluation of the practicality and benefits of phased implementation; and

(vi) A statement regarding compliance with the State Environmental Policy Act (SEPA).

(d) Priority ranking. Each municipality shall propose a ranking of its selected treatment/control projects. The rankings (~~(shall)~~) must be developed considering the following criteria:

(i) Highest priority ~~((shall))~~ must be given to reduction of ~~((CSO's which))~~ CSOs that discharge near water supply intakes, public primary contact recreation areas, and potentially harvestable shellfish areas;

(ii) A cost-effectiveness analysis of the proposed projects. This can include a determination of the monetary cost per annual mass pollutant reduction, per annual volume reduction, and/or per annual frequency reduction achieved by each project;

(iii) Documented, probable, and potential environmental impacts of the existing CSO discharges.

(e) Municipalities shall propose a schedule for achieving "the greatest reasonable reduction of combined sewer overflows at the earliest possible date." (RCW 90.48.480.) If the agreed upon schedule exceeds five years, municipalities shall propose an initial five-year program of progress towards achieving the greatest reasonable reduction. Factors ~~((which))~~ that municipalities and the department shall use to determine compliance schedules shall include but not be limited to:

(i) Total cost of compliance;

(ii) Economic capability of the municipality;

(iii) Other recent and concurrent expenditures for improving water quality; and

(iv) The severity of existing and potential environmental and beneficial use impacts.

AMENDATORY SECTION (Amending Order DE 86-34,
 filed 1/27/87)

WAC 173-245-080 Requirement for certified operator. Each owner of a domestic wastewater treatment facility is required by chapter 70.95B RCW to have an operator, certified by the state, in responsible charge of the day to day operation of the facility. This requirement does not apply to a septic tank ((~~utilizing~~) using subsurface disposal. The certification procedures are set forth in chapter 173-230 WAC. (See also, WAC 173-240-100.)

AMENDATORY SECTION (Amending Order DE 86-34,
 filed 1/27/87)

WAC 173-245-084 Ownership and operation and maintenance. (1) Except as provided in subsections (2) and (3) of this section, domestic sewage facilities will not be approved unless ownership and responsibility for operation and maintenance is by a public entity ((~~except as provided in subsections (2) and (3) of this section~~). If a waste discharge permit is required it must be issued to the public entity. Nothing herein precludes a public entity from contracting operation and maintenance of domestic sewage facilities.

(2) Ownership by nonpublic entities may be approved if the department determines ((~~such~~) the ownership is in the public interest((:)): Provided, That there is an enforceable contract, approved by the department, between the nonpublic entity and a public entity with an approved sewer general plan ((~~which~~) that will assure immediate assumption of the system under the following conditions:

(a) Treatment efficiency is unsatisfactory either as a result of plant capacity or physical operation; or

(b) If such an assumption is necessary for the implementation of a general sewer plan.

(3) The following domestic wastewater facilities would not require public entity ownership, operation, and maintenance:

(a) Those facilities existing or approved for construction as of the effective date of this section, until such a time as the facility is expanded to accommodate additional development.

(b) Those facilities ((~~that~~) which serve a single nonresidential, industrial, or commercial establishment. Commercial/industrial complexes serving multiple owners or tenants and multiple residential dwelling facilities such as mobile home parks, apartments, and condominiums are not considered commercial establishments for the purpose of this section. (See also, WAC 173-240-104.)

AMENDATORY SECTION (Amending Order DE 86-34,
 filed 1/27/87)

WAC 173-245-090 Schedule updates—Monitoring—Reporting. (1) By the anniversary date of its sewage treatment plant NPDES permit, in conjunction with its annual assessment for prevention of facilities overloading where applicable, a municipality shall submit an annual CSO report to the department for review and approval ((~~which~~) that:

(a) Details the past year's frequency and volume of combined sewage discharged from each CSO site, or group of CSO sites in close proximity. Field monitoring ((~~shall be~~) is necessary to estimate these parameters. The report shall indicate whether a CSO site or group of sites has increased over the baseline annual condition. If any increase has occurred, the municipality shall propose a project and schedule to reduce that CSO site or group of sites to or below its baseline condition;

(i) When a CSO site has been reduced to an average of one overflow per year through use of storage or separation, the department may consider reducing the monitoring requirement to frequency verification;

(ii) If the selected CSO control project is at-site treatment and discharge, the department may issue a modification to the applicable sewage treatment plant permit or issue a separate NPDES permit for that discharge. The permit or permit modification ((~~shall~~) must include effluent limits, flow capacity limits, and reporting requirements. The total treated and untreated annual discharge from an at-site treatment plant ((~~shall~~) may not increase above the baseline annual;

(b) Explains the previous year's CSO reduction accomplishments; and

(c) Lists the projects planned for the next year.

(2) In conjunction with its application for renewal of its applicable NPDES permit, the municipality shall submit an amendment to its CSO reduction plan. The amendment shall include:

(a) An assessment of the effectiveness of the CSO reduction plan to date; and

(b) A reevaluation of the CSO sites' project priority ranking; and

(c) A ((~~listing~~) list of projects to be accomplished in the next five years, based upon priorities and estimated revenues.

The department of ecology may incorporate such a schedule into an administrative order or the applicable NPDES permit.

POLLUTION PREVENTION PLANS

AMENDATORY SECTION (Amending Order 91-35, filed 10/1/91, effective 11/1/91)

WAC 173-307-010 Purpose. This chapter implements chapter 70.95C RCW, an act relating to hazardous waste reduction. The act encourages voluntary efforts to redesign industrial, commercial, production, and other processes to result in the reduction or elimination of hazardous waste by-

products and to maximize the in-process reuse or reclamation of valuable spent material. The act establishes a legislative policy to encourage reduction in the use of hazardous substances and reduction in the generation of hazardous waste whenever economically and technically practicable. It also adopts, as a policy goal for Washington state, the reduction of hazardous waste generation(;) through hazardous substance use reduction and waste reduction techniques(;) by fifty percent by 1995. Some individual facilities may have the ability to reduce the use of hazardous materials and the generation of hazardous wastes by far (~~greater~~) more than fifty percent while others may not be able to reduce by as much as fifty percent. Therefore, the fifty percent reduction goal is not applied as a regulatory requirement. The plans provided for in this chapter are intended to achieve, for each facility, the greatest reduction economically and technically practicable. The intent of the department of ecology is to provide technical assistance, to the greatest extent possible, to those required to prepare facility plans. The purpose of this chapter is to establish the specific elements (~~required to~~) that must be included in the documents required of hazardous waste generators and hazardous substance users under the act. The (~~regulation~~) rule also establishes completion dates and implements other requirements in the act. Copies of all rules(~~regulations~~) or statutes cited in this chapter are available from (~~the~~) Records Management, Department of Ecology, (~~Mailstop PV-11~~) P.O. Box 47600, Olympia, Washington 98504-(~~8711~~)7600.

AMENDATORY SECTION (Amending Order 91-35, filed 10/1/91, effective 11/1/91)

WAC 173-307-015 Applicability. (1) The requirements of WAC 173-307-010 through 173-307-140 apply to all hazardous substance users as defined in this chapter and to hazardous waste generators who generate more than two thousand six hundred forty pounds of hazardous waste per year, except for those facilities that are primarily treatment, storage, and disposal facilities or recycling facilities. Used oil to be re-refined or burned for energy or heat recovery (~~shall~~) may not be used in the calculation of hazardous wastes generated for purposes of this (~~regulation~~) rule, and is not required to be addressed by plans prepared under this (~~regulation~~) rule. ~~For purposes of this section, hazardous waste reported on the annual dangerous waste generator report as having been either recycled on-site or recycled for beneficial use off-site and/or amounts of hazardous substances introduced into a process and subsequently recycled for beneficial use, shall not be used in the calculation of hazardous waste generated~~) rule. For the purposes of this section, neither hazardous waste reported on the dangerous waste annual report as having been either recycled on-site or recycled for beneficial use off-site, nor amounts of hazardous substances introduced into a process and subsequently recycled for beneficial use may be used in the calculation of hazardous waste generated. A facility may petition the director to exclude hazardous wastes recycled for beneficial use even if they were not reported as such on the (~~annual~~) dangerous waste (~~generator~~) annual report. Documentation from the hazardous waste handling

facility that the hazardous waste was recycled for beneficial use must be submitted along with the petition.

(2) Except as noted in subsection (3) of this section, each hazardous substance user and hazardous waste generator identified above ~~((must))~~ shall prepare one plan for each facility owned or operated.

(3) A person with multiple interrelated facilities where a significant majority of the processes are substantially similar, as defined in this chapter, may prepare a single plan covering one or more of those facilities.

(a) ~~((A person desiring to submit a single plan under this provision must first submit to the director documentation that a significant majority of the processes at the facilities are substantially similar processes in order to obtain approval prior to plan development.))~~ To obtain approval, a person desiring to submit a single plan under this provision shall submit documentation to the director that a significant majority of the processes at the facilities are substantially similar before developing a plan. This documentation must be submitted by May 1 of the year ~~((prior to))~~ before the plan due date.

(b) If a single plan is being prepared for two or more interrelated facilities with substantially similar processes, the sum total of the hazardous waste generated and the hazardous substances used by these facilities must be considered when applying any of the thresholds and/or percentages required by this chapter.

(c) In instances where a person has interrelated facilities without substantially similar processes, a single document may be prepared, but it must contain separate detailed plans for each facility.

(4) Facilities required by this chapter to prepare plans are also required to pay a hazardous waste fee, as described in chapter 173-305 WAC. The requirements of WAC 173-305-010 through 173-305-050 and 173-305-210 through 173-305-240 specifically apply.

AMENDATORY SECTION (Amending Order 91-35, filed 10/1/91, effective 11/1/91)

WAC 173-307-020 Definitions. As used in this chapter, the following terms have the meanings indicated unless the context clearly requires otherwise.

(1) "Closed-loop recycling" means that the entire process through completion of any reclamation is closed by being entirely connected with pipes or other comparable enclosed means of conveyance. Recycled materials are returned to the original process or processes.

(2) "Dangerous waste" means any discarded, useless, unwanted, or abandoned nonradioactive substances ~~((s))~~ including, but not limited to, certain pesticides, or any residues or containers of ~~((such))~~ those substances which are disposed of in such a quantity or concentration ~~((as to))~~ that would pose a substantial present or potential hazard to human health, wildlife, or the environment because ~~((such))~~ those wastes or constituents or combinations of ~~((such))~~ those wastes:

(a) Have short-lived, toxic properties that may cause death, injury, or illness or have mutagenic, teratogenic, or carcinogenic properties; or

(b) Are corrosive, explosive, flammable, or may generate pressure through decomposition or other means.

Dangerous wastes ~~((shall))~~ specifically includes those wastes designated as extremely hazardous by rules adopted ~~((pursuant to))~~ under chapter 70.105 RCW.

(3) "Department" means the department of ecology.

(4) "Director" means the director of the department of ecology or the director's designee.

(6) "Extremely hazardous waste" means any dangerous waste which, if disposed of at a disposal site in quantities that would present an extreme hazard to man or the environment:

(a) Will persist in a hazardous form for several years ~~((or more))~~ at a disposal site and which, in its persistent form:

(i) Presents a significant environmental hazard and may be concentrated by living organisms through a food chain or may affect the genetic make-up of man or wildlife; and

(ii) Is highly toxic to man and wildlife ~~((; if disposed of at a disposal site in such quantities as would present an extreme hazard to man or the environment))~~.

Extremely hazardous waste ~~((shall))~~ specifically includes those wastes designated as extremely hazardous by rules adopted ~~((pursuant to))~~ under chapter 70.105 RCW.

(7) "Facility" means any geographical area that has been assigned an EPA/state dangerous waste identification number. In the case of a hazardous substance user not having an EPA/state dangerous waste identification number, facility means all buildings, equipment, structures, and other stationary items located on a single site or on contiguous or adjacent sites and owned or operated by the same person.

(8) "Fee" means the annual hazardous waste fees imposed under RCW 70.95E.020 and 70.95E.030.

(12) "Hazardous substance user" means any facility required to report under Section 313 of Title III of the Super-

fund Amendments and Reauthorization Act, except for those facilities which only distribute or use fertilizers or pesticides intended for commercial agricultural applications.

Note: This definition refers to those SARA Title III, Section 313 reporters who must prepare a plan, whereas the definition of hazardous substance refers to the substances that must be addressed in the plan.

(13) "Hazardous waste" (~~means and~~) includes all dangerous and extremely hazardous wastes, but:

(a) Does not include radioactive wastes or a substance composed of both radioactive and hazardous components; and

(b) Does not include any hazardous waste generated as a result of a remedial action under state or federal law.

(14) "Hazardous waste generator" or "generator" means any person generating hazardous waste(~~(s) which are~~) that is subject to regulation by the department.

(15) "Hazardous waste reduction" means all in-facility practices that reduce, avoid, or eliminate the generation of hazardous waste(~~(s)~~) or the toxicity of hazardous waste(~~(s; prior to generation)~~), before the hazardous waste is generated, without creating substantial new risks to human health or the environment.

(18) "Plan" means the plan provided for in RCW 70.95C.200.

(19) "Person" means an individual, trust, firm, joint stock company, partnership, association, state, public or private or municipal corporation, commission, political subdivision of a state, interstate body, the federal government, including any agency or officer thereof, and any Indian tribe or authorized tribal (~~organization~~) government.

(20) "Process" means one or a number of steps (~~which~~) that produce(~~(s)~~) an end product or service, or a component (~~which is~~) to be incorporated into an end product or service.

(21) "Product" means any hazardous substance or mixture containing hazardous substances (~~which~~) that is used by a facility in a production or service process. Metals or metal alloys used by the facility are not considered "products" if they do not become incorporated into the hazardous waste streams and have no known pathway for the release of metals to the environment, either at the facility or (~~subsequent to~~) after their use at the facility, such as from ultimate disposal by the consumer. Facilities will have to decide whether to group similar products (for example with different brand names) and list them as a single product. While some flexibility is left to the facility, products must be identified as a single product if they have a similar chemical composition and may be used interchangeably by the facility.

Note: The term "product" as defined here and used throughout this chapter is not to be confused with the term "end product," which specifically refers to the "output" of a production process.

(22) "Recycled for beneficial use" means the use of hazardous waste, either before or after reclamation, as a substi-

tute for a commercial product or raw material, but does not include:

Use constituting disposal;

Incineration; or

Use as a fuel.

(23) "Recycling" means reusing waste materials and extracting valuable materials from a waste stream. Recycling does not include burning for energy recovery.

Note: While burning for energy recovery may be preferable to disposal, burning for energy recovery does not count as recycling for the purpose of chapter 70.95C RCW.

(24) "Remedial action wastes" means hazardous wastes (~~which~~) that result from the cleanup of sites under state or federal hazardous waste laws.

(25) "Shifting of risks" means changing the character, location, or receptor of a toxic material without achieving a substantial reduction in the overall risk to health and safety or the environment.

(26) "Substantially similar processes" means processes that are essentially interchangeable, inasmuch as they use similar equipment and materials and produce similar products or services and generate similar wastes.

(27) "Treatment" means the physical, chemical, or biological processing of waste to render it completely innocuous, produce a recyclable by-product, reduce toxicity, or substantially reduce the volume of material (~~requiring~~) that requires disposal as described in the priorities established in RCW 70.105.150. Treatment does not include incineration.

(28) "Used oil" means:

(a) Lubricating fluids that have been removed from an engine crankcase, transmission, gearbox, hydraulic device, or differential of an automobile, bus, truck, vessel, plane, heavy equipment, or machinery powered by an internal combustion engine;

(b) Any oil that has been refined from crude oil, used, and as a result of use, has been contaminated with physical or chemical impurities; and

(c) Any oil that has been refined from crude oil and, as a consequence of extended storage, spillage, or contamination, is no longer useful to the original purchaser. "Used oil" does not include used oil to which hazardous wastes have been added.

AMENDATORY SECTION (Amending Order 91-35, filed 10/1/91, effective 11/1/91)

WAC 173-307-030 Plan requirements. This section establishes the specific elements required to be included in a plan. The purpose of a plan is to require serious consideration of ways in which processes and procedures may be modified to reduce dependence upon hazardous substances and/or the generation of hazardous wastes. All plans must consider opportunities based on the following priorities: Hazardous substance use reduction and hazardous waste reduction, recycling, and treatment. The plans shall consist of the following parts:

(1) Part one. Part one shall include:

(a) A written policy (~~(articulating)~~) expressing management and corporate support for the plan and a commitment to implement planned activities and achieve established goals.

(b) The plan scope and objectives.

(c) A description of the facility type, a description of product~~((s))~~~~((s))~~ made and/or services provided, and a statement or listing of the current level~~((s))~~~~((s))~~ of production or service activity in units of measure appropriate to the industry or activity;

(d) A general overview of the processes used in production or service activities (a schematic drawing may be included);

(e) A statement providing, for the last calendar year, the total pounds of extremely hazardous waste and total pounds of dangerous waste reported on Form 4, ~~((Generator Annual))~~ Dangerous Waste Annual Report, and, if applicable, the total pounds of toxic releases reported on Form R under SARA Title III, Section 313; and

(f) A description of current reduction, recycling, and treatment activities and documentation of hazardous substance use reduction and hazardous waste reduction efforts that were completed ~~((prior to))~~ before the first plan due date specified in WAC 173-307-050. Clearly separate the explanations of reduction activities from recycling and other management activities.

(2) Part two. Part two shall include an identification of hazardous substances used and hazardous wastes generated by the facility~~((s))~~; a description of the facility processes~~((s))~~; an identification of reduction, recycling, and treatment opportunities~~((s))~~; an evaluation of those opportunities~~((s))~~; a selection of proposed options~~((s))~~; a policy to prevent shifting of risks~~((s))~~; performance goals~~((s))~~; and an implementation schedule. Specifically, Part two shall include:

(a) An identification of products containing hazardous substances used and hazardous wastes generated. This ~~((is to))~~ must be based on actual usage and generation during the most recent calendar year for which records are available. This task can be accomplished by choosing one of two approaches. The approaches are identified as the "pounds approach" and the "percentage approach." Look at the following descriptions and requirements of each of these and determine which one you wish to use.

(i) "Pounds approach."

This approach requires you to identify the types and amounts, in either weight or volume, of hazardous waste generated and products containing hazardous substances used up to these threshold levels:

(A) All dangerous waste streams five hundred pounds or greater, any smaller dangerous waste streams ~~((which))~~ that individually represent~~((s))~~ ten percent or more of the total annual hazardous wastes, and all extremely hazardous waste streams subject to regulation by the department. If this combination equals less than ninety percent of the total hazardous wastes generated, then additional dangerous wastes generated at the facility ~~((shall))~~ must be included until ninety percent of the total is reached; and

(B) Each product used ~~((which))~~ that contains a total of fifty percent or more of any combination of hazardous substances if one thousand pounds or more was used; each product used ~~((which))~~ that contains a total of between twenty-

five percent and forty-nine percent of hazardous substances if four thousand pounds or more was used; and each product used ~~((which))~~ that contains a total of between ten and twenty-four percent of hazardous substances if ten thousand pounds or more was used. Any product ~~((which))~~ that contains less than ten percent of any hazardous substances ~~((need))~~ is not required be included in the list regardless of the amount of the product used.

(C) Office products and products ~~((which))~~ that are used at the facility for nonprocess routine janitorial or grounds maintenance related activities may be excluded from this list.

(D) Hazardous substances used and hazardous wastes generated in laboratory research need not be listed. Note: See ~~((Part two;))~~ (2)(k) of this subsection for discussion on this issue.

(ii) "Percentage approach."

This approach requires you to identify the types and amounts, in either weight or volume, of hazardous waste generated and products containing hazardous substances used up to these threshold levels;

(A) All extremely hazardous waste and enough additional dangerous waste to reach ninety percent of all the hazardous waste generated; and

(B) Ninety percent of all the products used ~~((which))~~ that contain hazardous substances. ~~((This selection of products))~~ The person making this list should attempt to include those ~~((that))~~ products which contain the highest concentrations of hazardous substances and the most toxic hazardous substances.

(C) Office products and products ~~((which))~~ that are used at the facility for nonprocess routine janitorial or grounds maintenance related activities may be excluded from this list.

(D) Hazardous substances used and hazardous wastes generated in laboratory research ~~((need))~~ are not required to be listed. Note: See ~~((Part two;))~~ (2)(k) of this subsection for discussion on this issue.

(iii) Determinations of whether these quantities are met or exceeded for either approach ~~((shall))~~ must be based on the best available information. This information may be included or referenced in the plan. Available information may include any or all of the following as necessary to determine quantities of hazardous substances contained in products~~((s))~~; Information available from material safety data sheets, information furnished upon request from manufacturers or suppliers of hazardous substances or products containing hazardous substances, information obtained from the department, and information otherwise known by the facility owner or operator.

An explanation of the procedures used to determine that the thresholds were met or exceeded must be included in this section of the plan.

(iv) The above thresholds ~~((shall))~~ must only be used for plans required to be completed ~~((prior to))~~ before September 2, 1996. Plans or plan updates completed from that date on ~~((must))~~ shall identify the types and amounts, in either weight or volume, of hazardous waste generated and hazardous substances used up to the following threshold levels;

(A) The "pounds approach" ~~((can))~~ may only be used for identifying hazardous waste after September 2, 1996. This approach ~~((cannot))~~ may not be used for products containing

PERMANENT

hazardous substances. The thresholds for hazardous waste are:

All dangerous waste streams five hundred pounds or greater, any smaller dangerous waste streams (~~which~~) that individually represent~~(s)~~ ten percent or more of the total annual hazardous wastes, and all extremely hazardous waste streams subject to regulation by the department. If this combination equals less than ninety-five percent of the total hazardous wastes generated, then additional dangerous wastes generated at the facility (~~shall~~) must be included until ninety-five percent of the total is reached.

(B) The "percentage approach" remains an optional approach for hazardous waste, but it is the only approach that (~~can~~) may be used for products. The thresholds for this approach are:

All extremely hazardous waste and enough additional dangerous waste to reach ninety-five percent of all the hazardous waste generated; and

Ninety-five percent of all the products used (~~which~~) that contain hazardous substances.

(C) The exemptions in (~~subitems~~) (i)(C) and (D) (~~of item (ii)~~) of this (~~subdivision~~) subsection remain in effect.

(b) A detailed description of each process in the facility that generates hazardous waste or uses products containing hazardous substances as identified in the chosen approach in (a) of this subsection. This description may include a schematic drawing.

(c) For the hazardous waste and products containing hazardous substances identified in (a) of this subsection within each of the processes identified in (b) of this subsection, an identification, based on thorough research, of all reasonable opportunities for further hazardous substance use reduction, hazardous waste reduction, recycling, and treatment. Thorough research shall include, at a minimum, a review of literature commonly available to that industry or trade. The full range of potentially feasible opportunities (~~is to~~) must be identified without regard to possible impediments to implementing the opportunities. In identifying opportunities, consideration (~~shall~~) must be given to alternative approaches which, in the judgment of the facility management, satisfy the same demand for end products or services but use substantially less hazardous substances or result in the generation of substantially less hazardous waste;

(d) An evaluation of the identified opportunities. Opportunities (~~shall~~) must be grouped by priority and evaluated according to these priorities. The priorities are, in descending order: Hazardous substance use and hazardous waste reduction; recycling; and, treatment. Opportunities of a lower priority (~~shall~~) must be given consideration only after a determination is made that the higher priority opportunities are inappropriate due to impediments to their implementation. Impediments that (~~shall be~~) are considered acceptable include, but are not limited to:

(i) Adverse impacts on product quality, legal or contractual obligations~~(:)~~;

(ii) Economic and technical practicality~~(:)~~;

(iii) Safety considerations~~(:)~~; and

(iv) The creation of substantial new risks to human health or the environment.

Except with respect to the use and distribution of fertilizers or pesticides intended for commercial agricultural applications, the evaluation of hazardous waste reduction opportunities must include an evaluation of hazardous substance use reduction opportunities for those hazardous substances which subsequently result in hazardous waste streams as well as an evaluation of other opportunities for the reduction of hazardous waste.

The evaluation required under this subsection shall include:

(A) An economic analysis~~(:)~~;

(B) A technical evaluation~~(:)~~;

(C) An identification of whether, and if so how, the identified opportunity would result in a shifting of risk~~((s))~~ from one part of a process, environmental medium, or product to another; and

(D) An identification of all impediments to implementing the opportunities.

The economic analysis shall seek to identify the total costs associated with the current hazardous substance use and hazardous waste generation, management and disposal, compared with comparable costs associated with implementing the alternatives.

Evaluation of each opportunity may be considered complete when enough information is available to select or reject the opportunity for implementation. For opportunities rejected, the reason~~((s))~~ or reasons for rejecting them (~~shall~~) must be stated.

(e) A selection of opportunities to be implemented in accordance with the evaluation conducted in (d) of this subsection. For each selected opportunity, the process~~((es))~~ it affects (~~shall~~) must be identified, and estimates of the amount, by weight, of the reduction of hazardous substances or products containing hazardous substances and hazardous waste reduction (~~which~~) that would be achieved through implementation (~~shall~~) must be stated, (~~as well as~~) and the amount of hazardous wastes recycled or treated as a result of implementation (~~shall~~) must be included;

(f) A written policy stating that in implementing the selected options whenever technically and economically practicable, risks will not be shifted from one part of a process, environmental medium, or product to another;

(g) Specific performance goals in each of the following categories, expressed in numeric terms:

(i) Hazardous substances or products containing hazardous substances to be reduced or eliminated from use;

(ii) Hazardous wastes to be reduced or eliminated through hazardous waste reduction techniques;

(iii) Materials or hazardous wastes to be recycled; and

(iv) Hazardous wastes to be treated.

If the establishment of numeric performance goals is not practicable, the performance goals shall include a clearly stated list of objectives designed to lead to the establishment of numeric goals as soon as is practicable. Goals (~~shall~~) must be set for a five-year period from the first reporting date (see (h) of this subsection regarding implementation activities that will take longer than five years);

(h) A five-year implementation schedule, which shall display planned implementation activities for each of the five calendar years following completion of the plan. Information

to be provided shall include, but is not limited to, the opportunities (or phases of opportunities) being implemented and related milestones. Where complete implementation of a selected opportunity will take longer than five years, the schedule shall contain relevant milestones within a five-year period and an estimated date of completion. The schedule may be in table form and organized by opportunities within processes, if desired.

(i) A description of how those hazardous wastes that are not recycled or treated and the residues from recycling and treatment processes are managed may be included in the plan.

(j) Documentation of any research conducted in fulfillment of any of the above subdivisions of this subsection ~~((shall))~~ must be available to the department upon request.

(k) For research laboratories, the plan may include, in lieu of all the detailed requirements of this subsection, a description of policies and procedures to be followed by laboratory personnel regarding the use of hazardous substances and the generation of hazardous wastes through laboratory research. These policies and procedures must be consistent with the waste reduction priorities as defined in this chapter.

(3) Part three. Part three shall provide a financial description of the plan, which shall identify costs and benefits realized from implementing selected opportunities to the extent reasonably possible. Part three shall also include a description of accounting systems ~~((which))~~ that will be used to identify hazardous substance use and hazardous waste management costs. Liability, compliance, and oversight costs must be components of these accounting systems.

(4) Part four. Part four of the plan shall include a description of personnel training and employee involvement programs. Each facility required to write a plan is encouraged to advise its employees of the planning process and solicit comments or suggestions from its employees on hazardous substance use and waste reduction opportunities.

AMENDATORY SECTION (Amending Order 91-35, filed 10/1/91, effective 11/1/91)

WAC 173-307-060 Plan availability. Plans developed under chapter 173-307 WAC (~~(shall)~~) must be kept at the facility and made available for review to authorized representatives of the department. The plan is not a public record under the public disclosure laws of the state of Washington contained in chapter 42.17 RCW, unless submitted in lieu of an executive summary as provided for in WAC 173-307-040.

AMENDATORY SECTION (Amending Order 91-35, filed 10/1/91, effective 11/1/91)

WAC 173-307-070 Plan amendments and updates.

(1) A plan must be kept reasonably current and may be amended in response to changes in facility operations, substances used, or wastes generated.

(a) Users or generators shall notify the department of an amended plan and submit amendments to their plan or executive summary, whichever was originally submitted, including an identification of which sections (~~(are being)~~) have been amended. The implementation schedule of the amended plan and/or new executive summary (~~(shall)~~) must be within the original five-year timeline initiated by completion of the original plan.

(b) Even if a plan is amended, a five-year plan update will still be required five years from completion of the first plan, or from the last five-year update.

(2) Every five years, each plan (~~(shall)~~) must be updated, and the plan or a new executive summary (~~(shall)~~) must be submitted to the department. A plan update shall conform to

the requirements for preparing reduction plans as specified in this chapter.

AMENDATORY SECTION (Amending Order 91-35, filed 10/1/91, effective 11/1/91)

WAC 173-307-080 Progress reports. Progress reports (~~(shall)~~) must be submitted to the department annually on September 1 (~~(following)~~) after the due date of the plan. The purpose of the progress report is to provide information on quantities of hazardous waste and hazardous substances or products containing hazardous substances reduced in the prior twelve-month period.

(1) Progress reports shall include a discussion of:

(a) Performance goals. If numeric performance goals were listed in the plan, progress toward achieving these goals (~~(shall)~~) must be discussed. If numeric performance goals were not listed in the plan, progress made toward establishing numeric goals (~~(shall be discussed, and also progress made towards achieving the goals as stated in the plan))~~) and progress made toward achieving the goals as stated in the plan must be discussed. This discussion shall include:

(i) A description of reduction, recycling, and treatment opportunities (~~(which)~~) that were implemented.

(ii) A description of the process(~~(es))~~) or processes impacted by each opportunity.

(iii) A description of the quantities, by weight, of hazardous substances or products containing hazardous substances reduced and hazardous waste reduced by each option. Estimation techniques, and any assumptions used (~~(shall)~~) must be described. Quantities reduced must be displayed in relation to changing production levels. The description shall also include a statement of the level of production or service activity in relation to the level of production or service activity stated in the plan at the time the plan was prepared.

Note: Factors not resulting in actual reductions, such as new estimation techniques, delistings of substances or hazardous wastes, and reclassifications of waste management techniques cannot be counted or claimed as reductions.

(iv) If measurement or estimation techniques are changed from the prior reports in such a way that reductions are not additive for the five-year planning period, a methodology for converting prior reported reductions must be described and recalculations must be provided.

(b) Problems encountered in the implementation process. Problems (~~(shall)~~) must be clearly identified and must include a discussion of steps taken or proposed to resolve problems. An update on problems reported in previous progress reports (~~(shall)~~) must be included.

(2) Upon the request of two or more users or generators belonging to similar industrial classifications, the department may aggregate data contained in their annual progress reports for the purpose of developing a public record.

AMENDATORY SECTION (Amending Order 90-57, filed 4/1/91, effective 5/2/91)

WAC 173-307-090 Review process. A user or generator required to prepare a plan shall permit the director (~~(or a~~

representative of the director)) to review the plan to determine its adequacy.

(1) The department may review a plan, executive summary, or an annual progress report to determine whether the ((plan, executive summary, or annual progress report)) document is adequate and shall base its determination solely on whether the ((plan, executive summary, or annual progress report)) document is complete and prepared in accordance with the provisions of this chapter and the requirements of chapter 70.95C RCW.

(2) If a hazardous substance user or hazardous waste generator fails to complete an adequate plan, executive summary, or annual progress report, the department shall notify the user or generator of the inadequacy, identifying specific deficiencies. For the purposes of this section, a deficiency may include failure to develop a plan, failure to submit an executive summary, or failure to submit an annual progress report. The department shall specify a reasonable time frame, of not less than ninety days, within which the user or generator shall complete a modified plan, executive summary, or annual progress report addressing the specified deficiencies.

(3) If the department determines that a modified plan, executive summary, or annual progress report is inadequate, the department may, within its discretion, either require further modification or enter an order ((pursuant to)) under WAC 173-307-100.

AMENDATORY SECTION (Amending Order 90-57, filed 4/1/91, effective 5/2/91)

WAC 173-307-100 Penalties. (1) If, after having received a list of specified deficiencies from the department, a hazardous substance user or hazardous waste generator required to prepare a plan fails to complete modification of a plan, executive summary, or annual progress report within the time period specified by the department, the department may enter an order ((pursuant to)) under chapter 34.05 RCW finding the user or generator not in compliance with the requirements of RCW 70.95C.200. When the order is final, the department shall notify the department of revenue to charge a penalty fee. The penalty fee ((shall)) must be the greater of one thousand dollars or three times the amount of the user's or generator's previous year's fee, in addition to the current year's fee. If no fee was assessed the previous year, the penalty ((shall)) must be the greater of one thousand dollars or three times the amount of the current year's fee. The penalty assessed under this subsection ((shall)) must be collected each year after the year for which the penalty was assessed until an adequate plan, executive summary, or annual progress report is completed.

(2) If a hazardous substance user or hazardous waste generator required to prepare a plan fails to complete an adequate plan, executive summary, or annual progress report after the department has levied against the user or generator the penalty provided for in subsection (1) of this section, the user or generator ((shall)) must be required to pay a surcharge to the department whenever the user or generator disposes of a hazardous waste at any hazardous waste incinerator or hazardous waste landfill facility located in Washington state, until ((a plan, executive summary, or annual progress report))

the required document is completed and determined to be adequate by the department. The surcharge ((shall)) must be equal to three times the fee charged for disposal. The department shall furnish the incinerator and landfill facilities in Washington state with a list of Environmental Protection Agency/state identification numbers of the hazardous waste generators that are not in compliance with the requirements of RCW 70.95C.200.

AMENDATORY SECTION (Amending Order 90-57, filed 4/1/91, effective 5/2/91)

WAC 173-307-110 Appeals. A user or generator may appeal ((from)) a department order or a surcharge under RCW 70.95C.220 to the pollution control hearings board ((pursuant to)) under chapter 43.21B RCW.

AMENDATORY SECTION (Amending Order 90-57, filed 4/1/91, effective 5/2/91)

WAC 173-307-130 Public disclosure. (1) The department shall make available for public inspection any executive summary or annual progress report submitted to the department. Any hazardous substance user or hazardous waste generator required to prepare an executive summary or annual progress report, who believes that disclosure of any information contained in the executive summary or annual progress report may adversely affect the competitive position of the user or generator, may request the department ((pursuant to)) under RCW 43.21A.160 to delete from the public record those portions of the executive summary or annual progress report that may affect the user's or generator's competitive position. The department ((shall)) may not disclose any information contained in an executive summary or annual progress report pending a determination of whether the department will delete any information contained in the report from the public record. This determination will be made within sixty days following a request for public inspection.

(2) Any ten persons residing within ten miles of a hazardous substance user or hazardous waste generator required to prepare a plan may file with the department a petition requesting the department to examine a plan to determine its adequacy. The department shall report its determination of adequacy to the petitioners and to the user or generator within a reasonable time. The department may deny a petition if the department has, within the previous year, determined the plan of the user or generator named in the petition to be adequate.

AMENDATORY SECTION (Amending Order 90-57, filed 4/1/91, effective 5/2/91)

WAC 173-307-140 Records. The department shall maintain a record of each plan, executive summary, or annual progress report it reviews, and a list of all plans, executive summaries, or annual progress reports the department has determined to be inadequate, including descriptions of corrective actions taken. This information ((shall)) must be made available to the public.

AMENDATORY SECTION (Amending Order DE 83-30, filed 11/16/83)

WAC 173-240-020 Definitions. (1) "Approval" means written approval.

(2) "Construction quality assurance plan" means a plan describing the methods by which the professional engineer in responsible charge of inspection of the project will determine that the facilities were constructed without significant change from the department approved plans and specifications.

(3) "Department" means the Washington state department of ecology.

(4) "Domestic wastewater" means water carrying human wastes, including kitchen, bath, and laundry wastes from residences, buildings, industrial establishments or other places, together with ~~((such))~~ the groundwater infiltration or surface waters ~~((as))~~ that may be present.

(5) "Domestic wastewater facility" means all structures, equipment, or processes required to collect, carry away, treat,

reclaim or dispose of domestic wastewater together with ~~((such))~~ the industrial waste ~~((as))~~ that may be present. In the case of subsurface sewage treatment and disposal, the term is restricted to mean those facilities treating and disposing of domestic wastewater only from:

(a) A septic tank system with subsurface sewage treatment and disposal and an ultimate design capacity exceeding fourteen thousand five hundred gallons per day at any common point; or

(b) A mechanical treatment system or lagoon followed by subsurface disposal with an ultimate design capacity exceeding three thousand five hundred gallons per day at any common point.

Where the proposed system ~~((utilizing))~~ using subsurface disposal has received a state construction grant or a federal construction grant under the Federal Water Pollution Control Act as amended, such a system is a "domestic wastewater facility" regardless of size.

(6) "Engineering report" means a document ~~((which))~~ that thoroughly examines the engineering and administrative aspects of a particular domestic or industrial wastewater facility. The report shall contain the appropriate information required in WAC 173-240-060 or 173-240-130. In the case of a domestic wastewater facility project, the report describes the recommended financing method.

The facility plan described in federal regulation 40 CFR 35 is an "engineering report." This federal regulation describes the Environmental Protection Agency's municipal wastewater construction grants program.

(7) "General sewer plan" means the:

(a) Sewerage general plan adopted by counties under chapter 36.94 RCW; or

(b) Comprehensive plan for a system of sewers adopted by sewer districts under chapter 56.08 RCW; or

(c) Plan for a system of sewerage adopted by cities under chapter 35.67 RCW; or

(d) Comprehensive plan for a system of sewers adopted by water districts under chapter 57.08 RCW; or

(e) Plan for sewer systems adopted by public utility districts under chapter 54.16 RCW and by port districts under chapter 53.08 RCW.

(f) The "general sewer plan" is a comprehensive plan for a system of sewers adopted by a local government entity. The plan includes the items specified in each respective statute. It includes the general location and description of treatment and disposal facilities, trunk and interceptor sewers, pumping stations, monitoring and control facilities, local service areas and a general description of the collection system to serve those areas. The plan also includes preliminary engineering in adequate detail to assure technical feasibility, provides for the method of distributing the cost and expense of the sewer system, and indicates the financial feasibility of plan implementation.

(8) "Industrial wastewater" means the water or liquid ~~((carried))~~ that carries waste from industrial or commercial processes, as distinct from domestic wastewater. These wastes may result from any process or activity of industry, manufacture, trade or business, from the development of any natural resource, or from animal operations such as feedlots,

poultry houses, or dairies. The term includes contaminated stormwater and also leachate from solid waste facilities.

(9) "Industrial wastewater facility" means all structures, equipment, or processes required to collect, carry away, treat, reclaim or dispose of industrial wastewater.

(10) "Owner" means the state, county, city, town, federal agency, corporation, firm, company, institution, person or persons, or any other entity owning a domestic or industrial wastewater facility.

(11) "Plans and specifications" means the detailed drawings and specifications used in the construction or modification of domestic or industrial wastewater facilities. Except as otherwise allowed, plans and specifications are preceded by an approved engineering report. For some industrial facilities final conceptual drawings for all or parts of the system may be substituted for plans and specifications with the permission of the department.

(12) "Sewerage system" means a system of sewers and appurtenances for the collection, transportation, pumping, treatment and disposal of domestic wastewater together with ~~((such))~~ industrial waste ~~((as))~~ that may be present. By definition a sewerage system is a "domestic wastewater facility."

(13) "Sewer line extension" ~~((shall))~~ means any pipe added or connected to an existing sewerage system, together with any pump stations: Provided, That the term does not include gravity side sewers ~~((which))~~ that connect individual building or dwelling units to the sewer system when these side sewers are less than one hundred fifty feet in length and not over six inches in diameter.

(14) "Subsurface sewage treatment and disposal" means the physical, chemical, or bacteriological treatment and disposal of domestic wastewater within the soil profile by placement beneath the soil surface in trenches, beds, seepage pits, mounds, or fills.

(15) "Waters of the state" means all lakes, rivers, ponds, streams, inland waters, ground waters, salt waters, and all other waters and watercourses within the jurisdiction of the state of Washington.

AMENDATORY SECTION (Amending Order DE 83-30, filed 11/16/83)

(1) ~~((Prior to the construction or modification of))~~ Before constructing or modifying domestic wastewater facilities, engineering reports and plans and specifications for the project ~~((shall))~~ must be submitted to and approved by the department, except as noted in WAC 173-240-030(5).

(2) All reports and plans and specifications ~~((shall))~~ must be submitted by the owner or ~~((his))~~ the owner's authorized representative consistent with a compliance schedule issued by the department or at least sixty days ~~((prior to))~~ before the time approval is desired.

(3) Construction or modification of domestic wastewater facilities shall conform to the following schedule of tasks unless otherwise modified by these ~~((regulations))~~ rules:

- (a) Submission and approval of engineering report;

(5) If the local government entity has received department approval of a general sewer plan and standard design criteria, engineering reports and plans and specifications for sewer line extensions, including pump stations, ~~((need))~~ are not required to be submitted for approval. In this case the entity need only provide a description of the project and written assurance that the extension is in conformance with the general sewer plan. However, in the following situations specific department approval is necessary for sewer line extensions ~~((prior to))~~ before construction:

(a) The proposed sewers, or pump stations involve installation of overflows or bypasses; or

(b) The proposed sewers, pump or lift stations discharge to an overloaded treatment, collection, or disposal facility.

AMENDATORY SECTION (Amending Order DE 83-30, filed 11/16/83)

AMENDATORY SECTION (Amending Order DE 83-30, filed 11/16/83)

WAC 173-240-100 Requirement for certified operator. Each owner of a domestic wastewater treatment facility is required by chapter 70.95B RCW to have an operator, certified by the state, in responsible charge of the day to day operation of the facility. This requirement does not apply to a septic tank ((utilizing)) using subsurface disposal. The certification procedures are set forth in chapter 173-230 WAC.

AMENDATORY SECTION (Amending Order DE 83-30, filed 11/16/83)

WAC 173-240-104 Ownership and operation and maintenance. (1) ((Domestic sewage facilities will not be approved unless ownership and responsibility for operation and maintenance is by a public entity except as provided in subsections (2) and (3) of this section.)) Except as provided in subsections (2) and (3) of this section, domestic sewage facilities will not be approved unless ownership and responsibility for operation and maintenance is by a public entity. If a waste discharge permit is required it must be issued to the public entity. Nothing ((herein)) in this rule precludes a pub-

PERMANENT

lic entity from contracting operation and maintenance of domestic sewage facilities.

(2) Ownership by nonpublic entities may be approved if the department determines ~~((such))~~ the ownership is in the public interest~~((:))~~: Provided, That there is an enforceable contract, approved by the department, between the nonpublic entity and a public entity with an approved sewer general plan ~~((which))~~ that will assure immediate assumption of the system under the following conditions:

(a) Treatment efficiency is unsatisfactory either as a result of plant capacity or physical operation; or

(b) If such an assumption is necessary for the implementation of a general sewer plan.

(3) The following domestic wastewater facilities would not require public entity ownership, operation, and maintenance:

(a) Those facilities existing or approved for construction as of the effective date of this section, until such a time ~~((as))~~ the facility is expanded to accommodate additional development.

(b) Those facilities ~~((that))~~ which serve a single nonresidential, industrial, or commercial establishment. Commercial/industrial complexes serving multiple owners or tenants and multiple residential dwelling facilities such as mobile home parks, apartments, and condominiums are not considered commercial establishments for the purpose of this section.

AMENDATORY SECTION (Amending Order DE 83-30, filed 11/16/83)

WAC 173-240-110 Submission of plans and reports.

(1) ~~((Prior to the construction or modification of))~~ Before constructing or modifying industrial wastewater facilities, engineering reports and plans and specifications for the project ~~((shall))~~ must be submitted to and approved by the department.

(2) All engineering reports and plans and specifications should be submitted by the owner consistent with a compliance schedule issued by the department or at least thirty days ~~((prior to))~~ before the time approval is desired. The department will generally review and either approve (or conditionally approve), comment on, or disapprove ~~((such))~~ those plans and reports within the thirty-day period unless circumstances prevent, in which case the owner will be notified and informed of the reason for the delay.

(3) Construction or modification of industrial wastewater facilities shall conform to the following schedule of tasks unless waived in accordance with subsection (5).

(a) Submission and approval of an engineering report;

(b) Submission and approval of plans and specifications;

(c) Submission of an operation and maintenance manual.

(4) Where two or more years has elapsed since approval of the engineering report or plans and specifications, it may be necessary to update that document to reflect changed water quality conditions, regulatory requirements, or engineering technology.

(5) Upon request by the owner, the department may waive the requirement for a three step submission of documents for industrial facilities. In such a case the department

will require instead conceptual plans ~~((which))~~ that also include the appropriate (as determined by the department) information from the engineering report and an operation and maintenance manual.

AMENDATORY SECTION (Amending Order DE 83-30, filed 11/16/83)

WAC 173-240-120 Review standards. The department will review engineering reports, plans and specifications, and operation and maintenance manuals for industrial wastewater facilities to ~~((ascertain that))~~:

(1) Determine whether the proposed facilities will be designed, constructed, operated and maintained to meet effluent limitations and other requirements of an NPDES or state waste discharge permit, if applicable~~((:))~~; and

(2) To meet the policies and requirements of chapters 90.48 and 90.54 RCW pertaining to prevention and control of pollution of waters of the state~~((:))~~; and ~~((will be))~~

(3) To determine whether the facility will be designed, constructed, and operated consistent with good engineering practices.

AMENDATORY SECTION (Amending Order DE 83-30, filed 11/16/83)

WAC 173-240-130 Engineering report. (1) The engineering report for an industrial wastewater facility ~~((shall))~~ must be sufficiently complete so that plans and specifications can be developed from it without substantial changes. Two copies of the report ~~((shall))~~ must be submitted to the department for approval.

(2) The engineering report shall include the following information together with any other relevant data as requested by the department:

(a) Type of industry or business~~((:))~~;

(b) The kind and quantity of finished product~~((:))~~;

NEW SECTION

WAC 296-155-526 Crane attached personnel platforms. (1) Scope, application, and definitions.

(a) **Scope and application.** This standard applies to the design, construction, testing, use and maintenance of personnel platforms, and the hoisting of personnel platforms attached to the boom of cranes. Crane attached personnel platforms must meet the applicable requirements for design, inspection, construction, testing, maintenance, and operation as prescribed in the ASME B30.23-1998 safety code for Personnel Lifting Systems.

(b) **Definitions.** For the purposes of this section, the following definitions apply:

"**Failure**" means load refusal, breakage, or separation of components.

"**Lift**" (or lifting) refers to all crane functions such as hoisting, lowering, swinging, booming in and out or up and down, or moving an attached personnel platform.

"**Load refusal**" means the point where the ultimate strength is exceeded.

"**Runway**" means a firm, level surface, designed, prepared, and designated as a path of travel for the weight and configuration of the crane being used to lift and travel with the attached crane platform. An existing surface may be used as long as it meets these criteria.

(2) **General requirements.** The use of a crane to hoist employees on a personnel platform is prohibited, except when the erection, use, and dismantling of conventional means of reaching the worksite, such as a personnel hoist, ladder, stairway, aerial lift, elevating work platform or scaffold, would be more hazardous, or is not possible because of structural design or worksite conditions.

(3) **Cranes requirements.**

(a) All lifting operations must be performed in accordance with the manufacturer's requirements.

(b) Hoist lines must be removed and stowed or an anti two-block device installed.

(c) Lifting of the personnel platform must be performed in a slow, controlled manner with no sudden movements of the crane or the platform.

(d) Load and boom hoist drum brakes, swing brakes, and locking devices, such as pawls or dogs, must be engaged when the personnel platform is occupied in a stationary working position.

(e) The crane must be uniformly level within one percent of level grade and located on firm footing. Cranes equipped with outriggers must follow manufacturer's requirements for use.

(f) The total weight of the loaded personnel platform must not exceed fifty percent of the rated capacity for the radius and configuration of the crane as required by load chart specifications.

(g) The use of machines having live booms (booms in which lowering is controlled by a brake without aid from other devices which slow the lowering speeds) is prohibited.

(4) **Instruments and components.**

(a) Cranes with variable angle booms must be equipped with a boom angle indicator, readily visible to the operator.

(b) Cranes with telescoping booms must be equipped with a device that at all times clearly indicates the boom's extended length to the operator. An accurate determination of the load radius, to be used during the lift, must be made before hoisting personnel.

(5) **Personnel platforms - design criteria.**

(a) A qualified engineer must design the personnel platform and attachment system.

(b) The attachment system must be designed to minimize tipping of the platform to no more than ten degrees from horizontal.

(c) The platform design must incorporate a motion control device that stabilizes the platform while being held in a working position.

(d) The personnel platform, excluding the guardrail system and body harness anchorages, must be capable of supporting, without failure, its own weight and at least five times the maximum intended load—based on a minimum allowance of five hundred pounds for the first person with light tools, and an additional two hundred fifty pounds for each additional person.

(e) Criteria for guardrail systems contained in chapter 296-155 WAC, Part K and body harness anchorages are contained in chapter 296-155 WAC, Part C will be followed.

(f) A plate or other permanent marking which indicates the weight of the platform and its rated load capacity or maximum intended load, must be conspicuously posted on the personnel platform.

(6) **Platform specifications.**

(a) Each personnel platform must be equipped with a guardrail system which meets the requirements of chapter 296-155 WAC, Part K. The personnel platform must also be enclosed at least from the toeboard to mid-rail with either

solid construction or expanded metal having openings no greater than one-half inch (1.27 cm).

(b) A grab rail must be installed inside the entire perimeter of the personnel platform.

(c) Access gates, if installed, must not swing outward during hoisting.

(d) Access gates, including sliding or folding gates, must be equipped with a restraining device to prevent accidental opening.

(e) Employees must have sufficient headroom to stand upright on the platform.

(f) All rough edges exposed to contact by employees must be surfaced or smoothed in order to prevent injury to employees from punctures or lacerations.

(g) A qualified welder familiar with the weld grades and types must perform all welding of the personnel platform and its components, with material specified in the platform design.

(7) Personnel platform loading.

(a) The personnel platform must not be loaded in excess of its rated load capacity.

(b) The number of employees on the personnel platform must not exceed the number required for the work to be performed.

(c) Personnel platforms must be used only for employees, tools, and materials necessary to do the work. Personnel platforms will not be used to hoist materials or tools without an employee on the platform (except to perform a trial lift or proof test as described in subsection (8) of this section).

(d) Materials and tools must be secured to prevent displacement.

(e) Materials and tools must be evenly distributed, within the confines of the platform, while work is being performed.

(f) Employees must keep their feet in contact with the floor of the platform at all times.

(8) Prelift meeting.

(a) A meeting attended by the crane operator, signal person(s) (if necessary for the lift), employee(s) to be lifted, and the person responsible for the task to be performed must be held to review the appropriate requirements of this section and the procedures to be followed.

(b) This meeting must be held before the trial lift at each new work location, and must be repeated for any employees newly assigned to the operation.

(9) Trial lift, inspection, and proof testing.

(a) A trial lift with an unoccupied personnel platform loaded at least to the anticipated lift weight must be made from ground level, or any other location where employees will enter the platform, to each location at which the personnel platform is to be hoisted and positioned. This trial lift must be performed immediately prior to allowing employees on the platform. The operator must determine that:

- All systems, controls, and safety devices are activated and functioning properly;
- No interferences exist; and
- All configurations necessary to reach work locations will allow the operator to remain under the fifty percent limit of the crane's rated capacity.

- Materials and tools to be used during the actual lift must be loaded in the platform, as provided in subsection (7) of this section, for the trial lift.

Note: A single trial lift may be performed for all locations that are to be reached from a single set-up position.

(b) The trial lift must be repeated:

- Prior to hoisting employees whenever the crane is moved and set up in a new location, or returned to a previously used location.

- A meeting attended by the crane operator, signal person(s) (if necessary for the lift), employee(s) to be lifted, and the person responsible for the task to be performed must be held to review the appropriate requirements of this section and the procedures to be followed.

(c) After the trial lift:

- But prior to hoisting personnel, the platform must be hoisted a few inches and inspected to ensure that it is secure and properly balanced.

- A visual inspection of the crane, personnel platform, and the crane base support or ground must be conducted by a competent person to determine whether the testing has exposed any defect or produced any adverse effect upon any component or structure.

(d) Deficiencies found during inspection, or operation, which create a safety hazard, must be corrected before hoisting personnel.

(e) The platform must be proof tested:

- At each job site;
- Prior to hoisting employees on the personnel platform; and
- After any repair or modification.

(i) For the proof test, one hundred twenty-five percent of the platform's rated capacity will be hoisted and held in a suspended position for five minutes. The proof test load must be evenly distributed on the platform.

(ii) After each proof test a competent person must inspect the platform and rigging.

(iii) Deficiencies found during proof testing must be corrected, and another proof test conducted. Employees must not be hoisted until a deficiency free proof test has been achieved.

Note: Proof testing may be done concurrently with the required trial lift.

(10) Work practices.

(a) Employees must keep all parts of the body inside the platform during raising, lowering, and positioning, except when performing the duties of a signal person.

(b) Before entering or exiting a personnel platform that is not landed, the platform must be secured to the structure where the work is to be performed, unless securing to the structure creates an unsafe situation.

(c) The crane operator must remain at the controls at all times when the platform is occupied.

(d) Employee lifting must be promptly discontinued upon indication of any dangerous weather conditions.

(e) Employees being lifted must remain in continuous sight of and in direct communication with the operator or signal person. Any disruption in communications will cause operations to be immediately discontinued. Signals to the

operator will be in accordance with section 5-3.3, ASME B30.5 1994 and this section.

(f) In situations where direct visual contact with the operator is not possible, or the use of a signal person may be hazardous for that person, direct communication alone, such as by radio, may be used. If a secure radio frequency is not available, hard-wired voice communication will be used. When using voice commands, there will be a continuous pause between commands of one-second duration per ten feet to the desired lift height or any contact point.

(g) The following voice commands are recommended for use:

- Boom up.
- Boom down.
- Swing left.
- Swing Right.
- Extend out.
- Retract in.
- Stop.

Note: If special voice commands are required to perform the lift safely, they must be mutually agreed upon between the designated signal person and the crane operator before the lift procedure starts.

(h) Employees on a personnel platform must use a full body harness system with lanyard appropriately attached to a structural member within the personnel platform capable of supporting a fall impact for employees using the anchorage as specified in chapter 296-155 WAC, Part C.

(i) Lifts must not be made on the crane's load lines while personnel are working from an attached platform.

(11) **Traveling.**

(a) Lifting of employees while the crane is traveling is prohibited, except for portal, tower and locomotive cranes, or where the employer demonstrates that there is no less hazardous way to perform the work.

(b) Under any circumstances where a crane would travel while lifting personnel, the employer must implement the following procedures to safeguard employees:

(i) Crane travel must be restricted to a fixed track or runway;

(ii) Travel must be limited to the load radius of the boom used during the lift; and

(iii) The boom must be parallel to the direction of travel.

(c) A complete trial run must be performed before employees are allowed to occupy the platform.

Note: This trial run can be performed concurrent with the trial lift required by subsection (8) of this section.

(d) If travel is done with a rubber tired-carrier, the condition and air pressure of the tires must be checked. The chart capacity for lifts on rubber must be used for application of the fifty percent reduction of rated capacity. Notwithstanding the requirements of subsection (3) of this section, outriggers may be partially retracted as necessary for travel.

(12) **Communication.** When using verbal signals, clarity and precision are essential for safe operation. Operators must be able to communicate with others at the worksite sufficiently to understand the signs, notices, operation instructions, and the signal code to be used.

(4) When we determine ongoing additional requirement benefits are needed, we:

WSR 00-15-077
PERMANENT RULES
DEPARTMENT OF
LABOR AND INDUSTRIES

[Filed July 19, 2000, 10:35 a.m., effective July 19, 2000]

Date of Adoption: July 19, 2000.

Purpose: Chapter 296-127 WAC, Prevailing wage (scope of work descriptions). The purpose of this rule making is to permanently adopt the scope of work rules that are currently in effect as emergency rules under the authority of RCW 34.05.350. In order for the Department of Labor and Industries (L&I) to continue to administer and enforce the Prevailing Wage Act, chapter 39.12 RCW, the scope of work descriptions must be permanently converted into rules. For many years, L&I has used the scope of work descriptions, which detail the specific tasks required of fifty-five construction trades, to enforce the statutory mandate that "the prevailing rate of wage shall be the rate of hourly wage, usual benefits and overtime paid in the locality ... to the majority of

workers, laborers or mechanics, in the same trade or occupation" (RCW 39.12.010). The prevailing wage rates for particular trades correspond with the scope of work descriptions. This rule-making order will convert the scope of work descriptions into permanent rules (WAC 296-127-01301 through 296-127-01391) to address an emergent need and as directed by Governor's Executive Order 97-02 on regulatory improvement (by incorporating necessary policy into rule). This rule-making will also amend WAC 296-127-013 to eliminate unnecessary or redundant requirements and reflect the addition of the new scope of work rules.

These rules arise from a prevailing wage enforcement action entitled *In re Anderson & Wood*, in which a contractor asserted that the scope of work descriptions were not properly promulgated as rules and, therefore, could not be used to require contractors to pay the corresponding prevailing wage rates. On December 15, 1999, the director of L&I agreed that the scope of work policies should be adopted as rules under the Administrative Procedure Act, chapter 34.05 RCW. Without the use of these scope of work descriptions to define the statutory terms "the same trade or occupation" and to therefore assure that the correct prevailing rate is paid for particular types of tasks, L&I is unable to enforce the prevailing wage laws. To address this L&I adopted the scope of work descriptions as emergency rules on March 21, 2000, in order to protect contractors, workers, and the public from economic harm.

The Prevailing Wage Act requires contractors working on government projects to pay employees the prevailing or "market" rate. Using surveys to gather information, L&I establishes prevailing wages county by county for each trade or occupation employed on public works projects. State agencies, counties, municipalities and all political subdivisions of the state award public works contracts.

Contractors rely upon the scope of work descriptions to properly assign prevailing wage rates to the work required to complete their contract with the awarding agency. Prevailing wage disputes are frequently resolved informally simply by bringing the correct scope of work descriptions to the contractor's attention. If the perception exists that the scope of work descriptions are mere suggestions or guidance, rather than binding rules, contractors will lack certainty in bidding on projects and in the wages that they pay their workers.

Without firm scope of work descriptions, uninformed or out of area contractors may be tempted to use the uncertainty to their advantage, by submitting bids based on lower wage rates. Because public agencies are required to award contracts to the lowest bidder, responsible local contractors will lose work to contractors planning to pay incorrect prevailing wages. The result will undermine an important purpose of the Prevailing Wage Act, to stabilize and protect local wage standards. *See e.g. Everett Concrete v. Department of Labor & Industries*, 109 Wn.2d 819 (1988) (Washington State Supreme Court holds that the purpose behind Washington's prevailing wage law is to protect employees of contractors who bid on government work from substandard earnings and to preserve local wage standards).

The harm done to local contractors is real and irreparable. Once a contract is awarded to an out of state contractor,

who has gained an unfair bidding advantage by deciding to pay a lower prevailing wage than appropriate for the actual work performed on the project, a local firm's opportunity is lost. These outcomes are unfortunate and costly. Enforceable prevailing wages, through use of the scope of work descriptions, are necessary to preserve stability in public work bidding, and to protect Washington contractors from unfair competition.

Washington workers' earnings and opportunities are also harmed by the lack of firm scope of work descriptions. Contractors who ignore prevailing wage requirements can use out of area workers willing to work for less than the prevailing wage for their craft, unfairly displacing local tradespeople. Even if local workers are used, the uncertainty presently surrounding the scope of work descriptions may result in pay to workers that is less than prevailing wages. Such workers may file a complaint with the department and proceed through the adjudicative process; however, without firm scope of work descriptions, there is a real chance that the workers' claims will not prevail. Even those disputes resolved in the workers' favor will mean the workers will wait years for proper wage payments and will not receive interest.

Prevailing wage surveys and resulting wage calculations are based on the department's classification plan, which is detailed in the scope of work descriptions. If the wage data reported to the department is based on incorrect worker classifications, the same incorrect information will be used in prevailing wage calculations. The result will be an artificial depression of the prevailing wage levels and a harmful erosion of local wage standards.

Erosion of local wage standards is an economic harm to the general public, as is the unfair competition for general contractors by providing an opportunity for certain contractors to submit low bids, which will supplant local contractors on large government projects. These harms will be avoided by adopting the scope of work descriptions as permanent rules.

In order to avoid the harms associated with not adopting the scope of work descriptions as permanent rules the department intends to adopt and simultaneously put these rules into effect on July 19, 2000 (coinciding with the expiration date of the emergency rules that are currently in effect). The immediate effective date of these rules will ensure that these rules continue to stay in effect.

Amended section: WAC 296-127-013 Scope of work definitions is being amended to reflect the inclusion of the new scope of work descriptions. Changes include:

(1) Amended this subsection to reflect that the director or his/her designee (currently the industrial statistician) will issue scope of work descriptions. The issuance of these descriptions will be done through the rule as defined in chapter 34.05 RCW, the Administrative Procedure Act.

(2) Eliminated the wording, "industrial statistician may issue" referring to the issuance of scope of work descriptions because now the descriptions will be done through rule. Also, the wording, "shall be created" was added to clarify that the scope of work descriptions will be created using authoritative sources available to the department.

(4) Eliminated this subsection because the schedule for issuing scope of work descriptions will be done according to

the rule-making procedures defined in chapter 34.05 RCW, the Administrative Procedure Act.

(5) Eliminated this subsection because chapter 34.05 RCW establishes the legal requirements for the effective date of rules.

(7) Eliminated this subsection because, as rule, the scope of work descriptions are made available by the Washington State Code Reviser. However, the department also provides copies of the rules upon request and they can be obtained via the Internet.

(8) Eliminated this subsection because affected parties must be notified as required by chapter 34.05 RCW, the Administrative Procedure Act.

New sections: The following scope of work descriptions are being adopted into chapter 296-127 WAC: WAC 296-127-01301 Certified asbestos abatement workers, 296-127-01303 Heat and frost insulators and asbestos workers, 296-127-01305 Boilermakers, 296-127-01306 Brick masons, 296-127-01308 Building service employees (janitors, waxers, and window washers), 296-127-01309 Cabinet makers, 296-127-01310 Carpenters, 296-127-01312 Carpenter tenders, 296-127-01313 Carpet and resilient floor layers, 296-127-01315 Cement masons, 296-127-01317 Drywall applicators (drywall nailers and sheetrock installers), 296-127-01318 Drywall finishers (tapers), 296-127-01320 Power line construction electricians, 296-127-01322 Electronic technicians, 296-127-01323 Inside wireman electrician, 296-127-01325 Electrical fixture maintenance workers, 296-127-01327 Elevator constructors, 296-127-01328 Fence erectors and fence laborers, 296-127-01329 Flaggers, 296-127-01331 Glaziers, 296-127-01332 Hod carriers, mason tenders, and mormarmen, 296-127-01333 Heating equipment mechanics, 296-127-01335 Inland boatmen, 296-127-01337 Insulation applicators, 296-127-01339 Ironworkers, 296-127-01340 Laborers in utilities construction, 296-127-01342 Clean-up laborers, 296-127-01344 Laborers, 296-127-01346 Landscape construction, 296-127-01347 Lathers, 296-127-01349 Marble setters, 296-127-01351 Millwrights, 296-127-01352 Metal fabricators, 296-127-01354 Operating engineers (equipment operators), 296-127-01356 Painters, 296-127-01358 Pile drivers, 296-127-01360 Plasterers, 296-127-01362 Playground and park equipment installers, 296-127-01364 Plumbers, pipefitters, and steamfitters, 296-127-01367 Refrigeration mechanic, 296-127-01369 Remote controlled cleaning, inspection and sealing of underground sewer and water systems, 296-127-01370 Roofers, 296-127-01372 Sheet metal workers, 296-127-01374 Sign makers and sign installers, 296-127-01375 Sprinkler fitters, 296-127-01376 Stone masons, 296-127-01377 Outside telephone line construction, 296-127-01378 Telecommunication technicians, 296-127-01379 Terrazzo (artificial marble) workers, 296-127-01382 Terrazzo workers' helpers, tile and marble setters' helpers (finishers), 296-127-01384 Tile setters, 296-127-01386 Traffic control stripers, 296-127-01387 Power line clearance tree trimming, 296-127-01389 Utilities construction (underground sewers and water lines), and 296-127-01391 Water well drillers, exploration drillers, water well pump installers, and equipment oilers.

WAC 296-127-013 Scope of work ((definitions) descriptions. (1) In order to determine applicable prevailing wage rates, the ~~((industrial statistician))~~ director or his/her designee will issue scope of work descriptions for each trade and occupation recognized as being involved in public work.

(2) The ~~((industrial statistician may issue))~~ scope of work descriptions~~((;))~~ shall be created using authoritative sources available to the department, such as:

(a) Washington state apprenticeship and training council approved apprenticeship standards;

(b) Collective bargaining agreements;

(c) Dictionaries of occupational titles;

(d) Experts from organized labor, licensed contractors, and contractors' associations;

(e) Recognized labor and management industry practice.

(3) The applicable prevailing wage rates for workers employed on public works projects shall be determined by the scopes of work performed by those workers, and not by their specific job titles.

~~((Scope of work descriptions may be established or revised:~~

~~((a) On the first business day of February and the first business day of August each year along with the prevailing wage publication; or~~

~~((b) In response to an administrative or judicial finding, or at any time necessary to correct an error.~~

(5) In the event a dispute arises regarding a scope of work description following the award of a public works contract, the aggrieved party may request an arbitration hearing pursuant to the provisions of RCW 39.12.060, WAC 296-127-060, 296-127-061, and 296-127-062.

NEW SECTION

WAC 296-127-01301 Certified asbestos abatement workers. For the purpose of the Washington state public works law, chapter 39.12 RCW, the department of labor and industries has established the work classification of certified asbestos abatement workers.

Asbestos abatement work may be performed by any worker who is certified as an asbestos remover and encapsulator, except when the work performed is incidental to the normal scope of work of another trade or occupation. Incidental asbestos work includes only that work of short duration which is indistinguishable from the work of another established classification.

This classification does not include work falling within the scope of work for asbestos workers. That work is primarily related to the installation of insulation material around mechanical systems.

Certified asbestos abatement workers perform all of the work, including any cleanup required in connection with the abatement of asbestos, coming within the purpose and scope of chapter 49.26 RCW and chapter 296-65 WAC. WAC 296-65-003 provides definitions which establish the scope of this work.

NEW SECTION

WAC 296-127-01303 Heat and frost insulators and asbestos workers. For the purpose of the Washington state public works law, chapter 39.12 RCW, heat and frost insulators and asbestos workers apply insulation materials to mechanical systems to reduce loss or absorption of heat, prevent moisture condensation and to deaden sound and prevent vibration.

The work includes, but is not limited to:

- The preparation and physical distribution on the job site of asbestos, cork, plastic, magnesia or similar insulation materials.

- Insulation of mechanical systems, plumbing, heating systems, any insulation connected with air handling systems,

refrigeration piping and related vessels, boilers, tanks, flues breechings, evaporators, turbines, fittings, valves, ducts, flues, vats and all insulation connected with steam, condensate, feedwater and/or chilled water, or insulation of any mechanical system for sound control.

- All cleanup required in connection with heat and frost insulators and asbestos worker's work.

NEW SECTION

PART 7. REPORTING

Subpart B - Consumer Confidence Reports

NEW SECTION

WAC 246-290-72001 Purpose and applicability of the consumer confidence report requirements. WAC 246-290-72001 through 246-290-72012 establishes minimum requirements for the content of annual reports that community water systems must deliver to their customers. These reports must contain information on the quality of the water delivered by the systems and characterize the risks (if any) from exposure to contaminants detected in the drinking water in an accurate and understandable manner.

(1) Notwithstanding the provisions of WAC 246-290-020, this section applies only to community water systems.

(2) For the purpose of WAC 246-290-72001 through 246-290-72012:

(a) "Customers" means billing units or service connections to which water is delivered by a community water system.

(b) "Detected" means at or above the levels prescribed by WAC 246-290-300(4) for inorganic contaminants, at or above the levels prescribed by WAC 246-290-300(7) for organic contaminants, and at or above the levels prescribed by 40 CFR 141.25(c) for radioactive contaminants.

NEW SECTION

WAC 246-290-72002 Reporting dates. (1) Each existing community water system must deliver its report by July 1 annually. Each annual report must contain data collected during, or prior to, the previous calendar year as required by WAC 246-290-72005(3).

(2) A new community water system must deliver its first report by July 1 of the year after its first full calendar year in operation and annually thereafter.

(3) A community water system that sells water to another community water system must deliver the applicable information required in WAC 246-290-72003 through 246-290-72009 to the buyer system:

(a) No later than April 1 annually; or

(b) On a date mutually agreed upon by the seller and the purchaser, and specifically included in a contract between the parties.

NEW SECTION

WAC 246-290-72003 Report contents—Source water. Information on the source of the water delivered:

(1) Each report must identify the source(s) of the water delivered by the community water system by providing information on:

(a) The type of the water, for example, surface water, ground water, spring water, or purchased water; and

(b) The commonly used name (if any) and location of the body (or bodies) of water.

(2) If a source water assessment has been completed, the report must notify consumers of the availability of this information and the means to obtain it. In addition, systems are encouraged to highlight in the report significant sources of contamination in the source water area if they have readily available information.

(3) Where a system has received a source water assessment from the department, the report must include a brief summary of the system's susceptibility to potential sources of contamination, using language provided by the department or written by the purveyor.

NEW SECTION

WAC 246-290-72004 Report contents—Definitions.

(1) Each report must include the following definitions:

(a) Maximum contaminant level goal or MCLG: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

(b) Maximum contaminant level or MCL: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

(2) A report for a community water system operating under a variance or an exemption issued under WAC 246-290-060 must include the following definition: Variances and exemptions: State or EPA permission not to meet an MCL or a treatment technique under certain conditions.

(3) A report that contains data on contaminants that the Environmental Protection Agency regulates using any of the following terms must include the applicable definitions:

(a) Treatment technique: A required process intended to reduce the level of a contaminant in drinking water.

(b) Action level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

(c) Maximum residual disinfectant level goal or MRDLG: The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

(d) Maximum residual disinfectant level or MRDL: The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

NEW SECTION

WAC 246-290-72005 Report contents—Information on detected contaminants. (1) This section specifies the requirements for information to be included in each report for contaminants subject to mandatory monitoring. It applies to:

(a) Contaminants subject to an MCL, action level, maximum residual disinfectant level or treatment technique (regulated contaminants);

(b) Contaminants for which monitoring is required by WAC 246-290-300(8); and

(c) Disinfection by-products for which monitoring is required by WAC 246-290-300(6) and 40 CFR 141.142 or microbial contaminants for which monitoring is required by WAC 246-290-300(3) and 40 CFR 141.143, except as provided under WAC 246-290-72006(1), and which are detected in the finished water.

(2) The data relating to these contaminants must be displayed in one table or in several adjacent tables. Any additional monitoring results which a community water system chooses to include in its report must be displayed separately.

(3) The data must be derived from data collected to comply with the Environmental Protection Agency and state monitoring and analytical requirements during the previous calendar year except that:

(a) Where a system is allowed to monitor for regulated contaminants less than once a year, the table(s) must include the date and results of the most recent sampling and the report must include a brief statement indicating that the data pre-

sented in the report are from the most recent testing done in accordance with the regulations. No data older than five years need be included.

(b) Results of monitoring in compliance with 40 CFR 141.142 and 40 CFR 141.143 need only be included for five years from the date of last sample or until any of the detected contaminants becomes regulated and subject to routine monitoring requirements, whichever comes first.

(4) For detected regulated contaminants listed in WAC 246-290-72012, the table(s) must contain:

(a) The MCL for that contaminant expressed as a number equal to or greater than 1.0 (as provided in WAC 246-290-72012);

(b) The MCLG for that contaminant expressed in the same units as the MCL;

(c) If there is no MCL for a detected contaminant, the table must indicate that there is a treatment technique, or specify the action level, applicable to that contaminant, and the report must include the definitions for treatment technique and/or action level, as appropriate, specified in WAC 246-290-72004;

(d) For contaminants subject to an MCL, except turbidity and total coliforms, the highest contaminant level used to determine compliance with a National Primary Drinking Water Regulation and the range of detected levels, as follows:

(i) When compliance with the MCL is determined annually or less frequently: The highest detected level at any sampling point and the range of detected levels expressed in the same units as the MCL.

(ii) When compliance with the MCL is determined by calculating a running annual average of all samples taken at a sampling point: The highest average of any of the sampling points and the range of all sampling points expressed in the same units as the MCL.

(iii) When compliance with the MCL is determined on a system-wide basis by calculating a running annual average of all samples at all sampling points: The average and range of detection expressed in the same units as the MCL.

(iv) Note to WAC 246-290-72005 (4)(d): When rounding of results to determine compliance with the MCL is allowed by the regulations, rounding should be done prior to multiplying the results by the factor listed in WAC 246-290-72012;

(e) For turbidity.

(i) When it is reported pursuant to chapter 246-290 WAC Part 6, Subpart C: The highest average monthly value.

(ii) When it is reported pursuant to the requirements of chapter 246-290 WAC Part 6, Subpart D: The highest monthly value. The report should include an explanation of the reasons for measuring turbidity.

(iii) When it is reported pursuant to chapter 246-290 WAC Part 6, Subpart B: The highest single measurement and the lowest monthly percentage of samples meeting the turbidity limits specified in chapter 246-290 WAC Part 6, Subpart B for the filtration technology being used. The report should include an explanation of the reasons for measuring turbidity;

(f) For lead and copper: The 90th percentile value of the most recent round of sampling and the number of sampling sites exceeding the action level;

(g) For total coliform:

(i) The highest monthly number of positive samples for systems collecting fewer than 40 samples per month; or

(ii) The highest monthly percentage of positive samples for systems collecting at least 40 samples per month;

(h) For fecal coliform: The total number of positive samples; and

(i) The likely source(s) of detected contaminants to the best of the purveyor's knowledge. Specific information regarding contaminants may be available in sanitary surveys and source water assessments, and should be used when available to the purveyor. If the purveyor lacks specific information on the likely source, the report must include one or more of the typical sources for that contaminant listed in WAC 246-290-72012 which are most applicable to the system.

(5) If a community water system distributes water to its customers from multiple hydraulically independent distribution systems that are fed by different raw water sources, the table should contain a separate column for each service area and the report should identify each separate distribution system. Alternatively, systems could produce separate reports tailored to include data for each service area.

(6) The table(s) must clearly identify any data indicating violations of MCLs, MRDLs, or treatment techniques and the report must contain a clear and readily understandable explanation of the violation including: The length of the violation, the potential adverse health effects, and actions taken by the system to address the violation. To describe the potential health effects, the system must use the relevant language of WAC 246-290-72012.

(7) For detected unregulated contaminants for which monitoring is required, the table(s) must contain the average and range at which the contaminant was detected. The report may include a brief explanation of the reasons for monitoring for unregulated contaminants.

NEW SECTION

WAC 246-290-72006 Report contents—Information on Cryptosporidium, radon, and other contaminants. (1) If the system has performed any monitoring for Cryptosporidium, including monitoring performed to satisfy the requirements of 40 CFR 141.143 which indicates that Cryptosporidium may be present in the source water or the finished water, the report must include:

(a) A summary of the results of the monitoring; and

(b) An explanation of the significance of the results.

(2) If the system has performed any monitoring for radon which indicates that radon may be present in the finished water, the report must include:

(a) The results of the monitoring; and

(b) An explanation of the significance of the results.

(3) If the system has performed additional monitoring which indicates the presence of other contaminants in the finished water, the department strongly encourages systems to report any results which may indicate a health concern. To

determine if results may indicate a health concern, the department recommends that systems find out if the Environmental Protection Agency has proposed a National Primary Drinking Water Regulation or issued a health advisory for that contaminant by calling the Safe Drinking Water Hotline (800-426-4791). The Environmental Protection Agency considers detects above a proposed MCL or health advisory level to indicate possible health concerns. For such contaminants, the department recommends that the report include:

- (a) The results of the monitoring; and
- (b) An explanation of the significance of the results noting the existence of a health advisory or a proposed regulation.

NEW SECTION

WAC 246-290-72007 Report contents—Compliance with National Primary Drinking Water Regulations. In addition to the requirements of WAC 246-290-72005(6), the report must note any violation that occurred during the year covered by the report of a requirement listed below, and include a clear and readily understandable explanation of the violation, any potential adverse health effects, and the steps the system has taken to correct the violation.

- (1) Monitoring and reporting of compliance data;
- (2) Filtration and disinfection prescribed by chapter 246-290 WAC, Part 6. For systems which have failed to install adequate filtration or disinfection equipment or processes, or have had a failure of such equipment or processes which constitutes a violation, the report must include the following language as part of the explanation of potential adverse health effects: Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.
- (3) Lead and copper control requirements prescribed by WAC 246-290-025, specifically CFR 141.80 through 141.91: For systems which fail to take one or more actions prescribed by WAC 246-290-025, specifically CFR 141.80 through 141.84, the report must include the applicable language of WAC 246-290-72012 for lead, copper, or both.
- (4) Treatment techniques for Acrylamide and Epichlorohydrin prescribed by 40 CFR, Subpart K. For systems which violate the requirements of 40 CFR, Subpart K, the report must include the relevant language from WAC 246-290-72012.
- (5) Recordkeeping of compliance data.
- (6) Special monitoring requirements prescribed by WAC 246-290-300(8) (unregulated contaminants) and 246-290-310(3) (sodium); and
- (7) Violation of the terms of a variance, an exemption, or an administrative or judicial order.

NEW SECTION

WAC 246-290-72008 Report contents—Variances and exemptions. If a system is operating under the terms of a variance or an exemption issued under WAC 246-290-060, the report must contain:

- (1) An explanation of the reasons for the variance or exemption;
- (2) The date on which the variance or exemption was issued;
- (3) A brief status report on the steps the system is taking to install treatment, find alternative sources of water, or otherwise comply with the terms and schedules of the variance or exemption; and
- (4) A notice of any opportunity for public input in the review, or renewal, of the variance or exemption.

NEW SECTION

WAC 246-290-72009 Report contents—Additional information. (1) The report must contain a brief explanation regarding contaminants which may reasonably be expected to be found in drinking water including bottled water. This explanation may include the language of (a) through (c) of this subsection or systems may use their own comparable language. The report also must include the language of (d) of this subsection.

(a) The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

(b) Contaminants that may be present in source water include:

(i) Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

(ii) Inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

(iii) Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.

(iv) Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.

(v) Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

(c) In order to ensure that tap water is safe to drink, the Environmental Protection Agency and/or the Washington state board of health prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration and/or the Washington state department of agriculture regulations establish limits for contaminants in bottled water that must provide the same protection for public health.

(d) Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More informa-

tion about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

(2) The report must include the telephone number of the owner, operator, or designee of the community water system as a source of additional information concerning the report.

(3) In communities with a large proportion of non-English speaking residents, the report must contain information in the appropriate language(s) regarding the importance of the report or contain a telephone number or address where such residents may contact the system to obtain a translated copy of the report or assistance in the appropriate language.

(4) The report must include information about opportunities for public participation in decisions that may affect the quality of the water, such as the time and place of meetings.

(5) The systems may include such additional information as they deem necessary for public education consistent with, and not detracting from, the purpose of the report.

NEW SECTION

WAC 246-290-72010 Report contents—Required additional health information. All reports must prominently display the following language: Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. Environmental Protection Agency/Centers for Disease Control guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

(1) A system which detects arsenic at levels above 25 micrograms per liter, but below the MCL:

(a) Must include in its report a short informational statement about arsenic, using language such as: EPA is reviewing the drinking water standard for arsenic because of special concerns that it may not be stringent enough. Arsenic is a naturally occurring mineral known to cause cancer in humans at high concentrations.

(b) May write its own educational statement, but only in consultation with the department.

(2) A system which detects nitrate at levels above 5 mg/l, but below the MCL:

(a) Must include a short informational statement about the impacts of nitrate on children using language such as: Nitrate in drinking water at levels above 10 ppm is a health risk for infants of less than six months of age. High nitrate levels in drinking water can cause blue-baby syndrome. Nitrate levels may rise quickly for short periods of time because of rainfall or agricultural activity. If you are caring for an infant, you should ask for advice from your health care provider.

(b) May write its own educational statement, but only in consultation with the department.

(3) Systems which detect lead above the action level in more than five percent, and up to and including ten percent, of homes sampled:

(a) Must include a short informational statement about the special impact of lead on children using language such as: Infants and young children are typically more vulnerable to lead in drinking water than the general population. It is possible that lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. If you are concerned about elevated lead levels in your home's water, you may wish to have your water tested and flush your tap for thirty seconds to two minutes before using tap water. Additional information is available from the Safe Drinking Water Hotline (800-426-4791).

(b) May write its own educational statement, but only in consultation with the department.

(4) Community water systems that detect TTHM above 0.080 mg/l, but below the MCL in WAC 246-290-310(4), as an annual average, monitored and calculated under the provisions of WAC 246-290-300(6), must include health effects language prescribed by WAC 246-290-72012.

NEW SECTION

WAC 246-290-72011 Report delivery and record-keeping. Each community water system must mail or otherwise directly deliver one copy of the report to each customer.

(1) The system must make a good faith effort to reach consumers who do not get water bills. The department expects that an adequate good faith effort will be tailored to the consumers who are served by the system but are not bill-paying customers, such as renters or workers. A good faith effort to reach consumers would include a mix of methods appropriate to the particular system such as: Posting the reports on the internet; mailing to postal patrons in metropolitan areas; advertising the availability of the report in the news media; publication in a local newspaper; posting in public places such as cafeterias or lunch rooms of public buildings; delivery of multiple copies for distribution by single-biller customers such as apartment buildings or large private employers; delivery to community organizations.

(2) No later than the date the system is required to distribute the report to its customers, each community water system must mail a copy of the report to the department, followed within three months by a certification that the report has been distributed to customers, and that the information is correct and consistent with the compliance monitoring data previously submitted to the department.

(3) No later than the date the system is required to distribute the report to its customers, each community water system must deliver the report to any other agency or clearing-house identified by the department.

(4) Each community water system must make its reports available to the public upon request.

(5) Each community water system serving one hundred thousand or more persons must post its current year's report to a publicly accessible site on the internet.

(6) Any system subject to WAC 246-290-72001 through 246-290-72012 must retain copies of its consumer confidence report for no less than three years.

REGULATED CONTAMINANTS

Microbiological Contaminants						
Total Coliform Bacteria	MCL: (systems that collect ≥ 40 samples/month) 5% of monthly samples are positive; (systems that collect < 40 samples/month) 1 positive monthly sample		MCL: (systems that collect ≥ 40 samples/month) 5% of monthly samples are positive; (systems that collect < 40 samples/month) 1 positive monthly sample	0	Naturally present in the environment	Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present. They may pose a special health risk for infants, young children, and people with severely-compromised immune systems.
Total organic carbon (ppm)	TT	-	TT	n/a	Naturally present in the environment	Total organic carbon (TOC) has no health effects. However, total organic carbon provides a medium for the formation of disinfection by products. These byproducts include trihalomethanes (THMs) and haloacetic acids (HAAs). Drinking water containing these byproducts may lead to adverse health effects, liver or kidney problems, or nervous system effects, and may lead to an increased risk of getting cancer.
Turbidity (NTU)	TT	-	TT	n/a	Soil runoff	Turbidity has no health effects. However, turbidity can interfere with disinfection and provide a medium for microbial growth. Turbidity may indicate the presence of disease-causing organisms. These organisms include bacteria, viruses, and parasites that can cause symptoms such as nausea, cramps, diarrhea and associated headaches.

(10) "Sponsorship" means a request by the department on behalf of a health care facility to federal immigration authorities to grant a visa waiver for the purpose of recruiting and retaining physicians.

AMENDATORY SECTION (Amending WSR 98-20-067, filed 10/2/98, effective 11/2/98)

WAC 246-562-020 Authority to sponsor visa waivers. (1) The department of health may assist communities to recruit and retain physicians, or other health care professionals, as directed in chapter 70.185 RCW, by exercising an option provided in federal law, 8 U.S.C. Sec. 1184(l) and 22 C.F.R. 514.44(e). This option allows the department of

health to sponsor a limited number of visa waivers each federal fiscal year if certain conditions are met.

(2) The department may ~~((also concur in))~~ acknowledge sponsorship proposed by federal agencies, including the United States Department of Agriculture. ~~((The department will apply the same criteria to concurrence requests as it applies to applications for state sponsorship.))~~

(3) The department may carry out a visa waiver program, or, in the event of resource limitations or other considerations, may discontinue the program. Purposes of the program are:

(a) To increase the availability of physician services in existing federally designated shortage areas for health care facilities that have long standing vacancies;

(b) To improve access to physician services for communities and specific under-served populations that are having difficulty finding ~~((primary care))~~ physician services;

(c) To serve Washington communities ~~((who))~~ which have identified a physician currently holding a J-1 visa as an ideal candidate to meet the community's need for primary health care services or specialist services as allowed by WAC 246-562-080.

(4) The department may only sponsor ~~((or concur in))~~ a visa waiver request when:

(a) The application contains all of the required information and documentation;

(b) The application meets the criteria contained in chapter 246-562 WAC.

(5) The department will limit its activities:

(a) Prior to submission of an application, the department may provide information on preparing a complete application;

(b) For applicants that have benefited from department sponsorship previously, the applicant's history of compliance will be a consideration in future sponsorship decisions;

(c) Because the number of sponsorships the department may provide is limited, and because the number of shortage areas is great, sponsorship will be limited. In any single program year, a health care facility ~~((will not be granted more than two sponsorships in any one designated shortage area served))~~ in any one designated health professional shortage area or medically underserved area:

(i) Will not be allotted more than two sponsorships; and

(ii) Will not be allotted more than one specialist sponsorship as allowed by WAC 246-562-080(4);

(d) In any given program year seventy-five percent of federally allocated sponsorships will be allotted for primary care physicians. Twenty-five percent of federally allocated sponsorships will be allotted for specialists.

NEW SECTION

WAC 246-562-160 Implementation. (1) Notwithstanding any other provision of this chapter, this rule governs the allocation of departmental J-1 visa waiver sponsorships of specialists and primary care physicians during the federal fiscal year which ends September 30, 2000.

(2) Ten working days after the effective date of this rule, the department will determine:

(a) The number of J-1 visa waiver sponsorships already approved during the federal fiscal year which ends September 30, 2000;

(b) The number of pending primary care applications which the department has determined to be complete.

The department will subtract the sum of these two numbers from twenty which is the total number of J-1 visa waiver sponsorships the federal government has allocated to the state of Washington for the federal fiscal year ending September 30, 2000. The department will multiply the difference between these two numbers by .25. In the event the product of this operation is a whole number, the department will allocate that number of J-1 visa waiver sponsorships to specialists for the federal fiscal year ending September 30, 2000. In the event the product of this operation is not a whole number, the department will determine the larger of the two whole numbers between which the product falls, and will allocate that number of J-1 visa waiver sponsorships to specialists for the federal fiscal year ending September 30, 2000. All other J-1 visa waiver sponsorships available during the federal fiscal year ending September 30, 2000, will be allocated to primary care physicians.

(3) The department will not accept J-1 visa waiver sponsorship applications from specialists until ten days after the effective date of the amendments of which this rule is a part, but may advise specialists with respect to any proposed application.

(4) The department will prioritize among specialists applying for J-1 visa waiver sponsorships for the federal fiscal year ending September 30, 2000, using criteria generally applicable to the selection of specialists under this chapter.

Purpose: Amend commercial fishing rules.

Citation of Existing Rules Affected by this Order: Repealing WAC 220-52-05100C; and amending WAC 220-52-051.

Reasons for this Finding: A weekly landing limit for spot shrimp is necessary to reduce risk of overharvest. The additional catch reporting rules are necessary to maintain an orderly fishery, provide the ability to enforce the 2000 state/tribal Puget Sound shrimp harvest management plan requirements, and to ensure conservation. Area, time, and depth closures for shellfish pot and shrimp beam trawl fishing were inadvertently omitted from permanent rules during recent housekeeping revisions. The state's quota share of spot shrimp in Crustacean Management Area 1A is projected to be taken by July 9, 2000. The state's share of shrimp in Marine Fish-Shellfish Management and Catch Reporting Area 23A with shrimp trawl gear has been taken. There is insufficient time to promulgate permanent rules.

EMERGENCY RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
(Medical Assistance Administration)
[Filed July 14, 2000, 3:47 p.m.]**

Date of Adoption: July 14, 2000.

Purpose: To continue the federal income standard increases that took effect with the April 1, 2000, emergency adoption of WSR 00-07-089 until the rule can be permanently adopted. The rule has been proposed for permanent adoption under WSR 00-14-044, but WSR 00-07-089 is due to expire before the public hearing will be held. These amendments change income standards to reflect the new federal poverty level (FPL). These changes will increase the number of people eligible for the medical programs based on the FPL, pregnant women, children and those eligible for Medicare cost sharing programs.

Citation of Existing Rules Affected by this Order: Amending WAC 388-478-0075 and 388-478-0085.

Statutory Authority for Adoption: RCW 74.08.090, 74.04.050, 74.04.057, 74.09.530 and the poverty guidelines updated annually in the Federal Register by the United States Department of Health and Human Services under authority of Section 673(2) of the Omnibus Budget Reconciliation Act (42 U.S.C. 9902(2)).

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest; and that state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.

Reasons for this Finding: The increase in FPL went into effect April 1, 2000, and the state must continue to comply with these federal requirements.

Date of Adoption: July 14, 2000.

Purpose: To correct the categorical eligibility rule that is scheduled to be effective August 1, 2000. Food assistance units do not need to continue to meet the resource standard once TANF ends as long as they receive or are authorized to receive post employment services.

Citation of Existing Rules Affected by this Order: Amending WAC 388-414-0001.

Statutory Authority for Adoption: RCW 74.08.090, 74.04.510.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: If this rule is not amended, some applicants and recipients leaving TANF will be incorrectly denied or terminated from food assistance and the state will incur quality control payment errors.

NEW SECTION

WAC 388-466-0007 Refugee medical assistance. (1) Who can apply for refugee medical assistance (RMA)?

Any individual can apply for refugee medical assistance and have eligibility determined by department of social and health services (DSHS).

(2) Who is eligible for refugee medical assistance?

You are eligible for RMA:

(a) If you meet all of the following:

- (i) Meet the immigration status requirements of WAC 388-466-0005; and
- (ii) Meet the income and resource requirements of WAC 388-466-0010; and
- (iii) Meet the monthly income standards as follows:

Family size	200% Federal Poverty Level
1	\$1,374
2	\$1,844
3	\$2,314
4	\$2,784
5	\$3,254
6	\$3,724
7	\$4,194
8	\$4,664
9	\$5,134
10	\$5,604

Add \$470 to the ten persons standard for each person over ten.

If your income exceeds the standard for your family, you may be able to deduct some or all of your medical expenses to help meet the income requirements. This is called spend-down. See WAC 388-519-0110. Spenddown is available for applicants for RMA only.

(iv) Provide the name of the voluntary agency (VOLAG) which resettled you, so that DSHS can promptly notify the agency (or sponsor) about your application for RMA.

(b) Or you meet one of the following:

(i) Receive refugee cash assistance (RCA) and are not eligible for Medicaid or children's health insurance program (CHIP); or

(ii) Choose not to apply for or receive RCA and are not eligible for Medicaid or CHIP, but still meet RMA eligibility requirements.

(3) Who is not eligible for refugee medical assistance?

You are not eligible to receive RMA if you:

(a) Are already eligible for Medicaid or CHIP;

(b) Are a full-time student in institutions of higher education unless the educational activity is part of a department-approved employability plan; or

(c) Are a nonrefugee spouse of a refugee.

(4) If I have already received a cash assistance grant from another agency (VOLAG), will it affect my eligibility for RMA?

No. A cash assistance payment provided to you by VOLAG is not counted in determining eligibility for RMA.

(5) If I get a job after I have applied but before I have been approved for RMA, will my new income be counted in determining my eligibility?

No. Your RMA eligibility is determined on the basis of your income and resources on the date of the application.

(6) Will my sponsor's income be considered in determining my eligibility for RMA?

No, if your sponsor is not a member of your assistance unit.

(7) How do I find out if I am eligible for refugee medical assistance?

We will send you a letter in both English and your primary language informing you about your eligibility. We will

also let you know in writing every time there are any changes or actions taken on your case.

(8) When does my medical assistance start?

Your medical coverage begins on the first day of the month of your entry date into the U.S. or ninety days prior to the first day of the month of your application, whichever is later.

(9) If I am an asylee, what date will be used as an entry date?

If you are an asylee, your entry date will be the date that your asylum status is granted. For example, if you entered the United States on December 1, 2000 as a tourist, then applied for asylum on April 1, 2000, had an interview with the asylum office on July 1, 2000 and had your asylum granted on September 1, 2000, your date of entry is September 1, 2000. On September 1, 2000 you will be eligible to access refugee medical assistance.

(10) When does my medical assistance end?

Your medical assistance will end on the last day of the eighth month from the month of your entry into the United States. Start counting the eight months from the first day of the month of your entry into the U.S.

(11) What happens if my income goes above the income standards?

(a) If you are getting RMA, your medical eligibility will not be effected by the amount of your earnings;

(b) If you had Medicaid, and it was terminated because of your earnings, we will transfer you to RMA for the rest of your RMA eligibility period without eligibility re-determination.

(12) Will my spouse also be eligible for RMA, if he/she arrives into the U.S. after me?

Every newly arriving refugee has their own eight months time limit for RMA, provided that they meet the eligibility requirements. Eligibility for other medical programs will be determined prior to determining eligibility for RMA.

(13) What do I do if I disagree with a decision or action that has been taken by DSHS on my case?

If you disagree with the decision or action taken on your case by DSHS you have the right to request a review of your case by the leadworker/supervisor or request a fair hearing (see WAC 388-08-413). Your request must be made within ninety days of the decision or action).

(14) What happens to my medical coverage after my eligibility period is over?

We will determine your eligibility for other medical programs and you will be asked to complete an application, if appropriate.

Reviser's note: The spelling error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

EMERGENCY RULES

STATE BOARD OF EDUCATION

[Filed July 19, 2000, 11:58 a.m., effective August 25, 2000]

Date of Adoption: August 25, 2000.

Purpose: Amendments to WAC 180-79A-257 (see below).

Citation of Existing Rules Affected by this Order: Amending WAC 180-79A-257 Out-of-state candidates.

Statutory Authority for Adoption: RCW 28A.410.010.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: This amendment would allow an individual to apply for a Washington certificate based on a certificate and three years experience only if that individual has not completed an approved program. This would provide more accurate data for future policy consideration.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

EMERGENCY

work requirement as described in WAC 180-79A-206 (3)(b) and if one of the following conditions is met:

(a) The candidate has completed an advanced level certification procedure approved by the state board of education as equivalent to the approved program procedure required in Washington; or

(b) The candidate holds a valid teaching certificate issued by the National Board for Professional Teaching Standards; or

(c) A Washington state college or university with an approved professional certificate program verifies that the candidate has met all the requirements of that institution's approved program. The college/university shall evaluate the candidate's background to determine whether or not course work or certification activities are equivalent to that college/university's approved program.

Reviser's note: The typographical errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

PUBLIC NOTICE

Public Hearings and Informational Workshops on the Draft Construction Stormwater General Permit and the Draft Industrial Stormwater General Permit

Introduction: The Washington State Department of Ecology (ecology) is hosting two public workshops and hearings on its proposal to reissue the general permit for stormwater discharges associated with construction activities and the general permit for stormwater discharges associated with industrial activities. These permits are proposed for reissue without any changes to current permit requirements. The proposed construction general permit provides coverage for construction activities located in Washington state that disturb five acres or more of land and discharge stormwater to surface water or a storm drain. The proposed industrial general permit provides coverage for industrial facilities located in Washington state that discharge stormwater to surface water or a storm drain. Under federal and state water quality law (Federal Clean Water Act and State Water Pollution Control Act), a permit is required for these discharges of stormwater.

The proposed general permits address these legal requirements and control the discharge of pollutants to protect the water quality of surface water and ground water in our state. A general permit is like an individual discharge permit except that it addresses a group of facilities as a whole. A single permit is developed that implements standard dis-

charge treatment, monitoring, and reporting requirements for all permit holders covered under the general permit. Interested persons are encouraged to obtain a copy of the proposed permit and fact sheet and/or attend a workshop and hearing described below.

The proposed industrial stormwater general permit and construction stormwater general permit contain no new requirements. These permits require industrial activities and construction activities to manage their site to minimize the exposure of rainfall to pollutants. Each permittee must have a stormwater pollution prevention plan that documents how best management practices will be used to protect stormwater from pollutants. Since there are no new requirements the cost to small businesses will not significantly increase under the proposed permits. Most industrial activities are included for coverage under this stormwater general permit (please review the permit for a complete listing). The construction stormwater general permit provides coverage for construction activities that disturb five or more acres.

General Permit Issuance: Ecology expects to issue the revised general permits on October 4, 2000. The reissued permit will become effective on November 18, 2000. The final permit may, however, be modified based on the comments received. If changes represent a substantial departure from the scope or conditions in the original draft permit, another public notice of draft and comment period may be necessary. When issued, a copy of the notice of issuance and ecology's responses to the comments will be sent to all persons who submitted written comment or gave public testimony.

How to Request Copies of the Proposed Permit: Contact Keith Johnson to request copies of the construction or industrial stormwater general permit and fact sheet:

- Through the address noted below
- By telephone - (360) 407-6442, fax - (360) 407-6426
- By e-mail at kjoh461@ecy.wa.gov

The permits and fact sheets may also be downloaded from the Internet at http://www.wa.gov/ecology/wq/stormwater/renew_gp.html.

Where to Submit Written Comments: Ecology is seeking public comment on the construction stormwater and industrial stormwater proposed general permits and fact sheets. Comments should reference specific text followed by proposed modification or concern when possible. Comments may address technical issues, accuracy and completeness of information, the scope of facilities proposed for coverage, adequacy of environmental protection and permit conditions, or any other concern that would result from issuance of these permits. If you wish to comment on either of the proposed permits, send your written comments to Keith Johnson, Washington State Department of Ecology, P.O. Box 47696, Olympia, WA 98504-7696.

Written comments must be postmarked by midnight, **Thursday, September 14, 2000**. Comments may also be made by attending and testifying at the public hearing.

Public Workshop/Hearing: Two public workshops and hearings on the proposed permits are scheduled. The purpose of the workshop is to explain the general permits, answer questions, and discuss your ideas and concerns before

formal testimony begins. The purpose of the hearing is to provide interested parties an opportunity to state for the record their opinions and comments on the proposed general permits. The informational workshops will all begin at 1:30 p.m. and last until 2:30 p.m. The formal public hearing will begin at 2:30 p.m. The workshops and hearings will be held at the following dates and locations: On **September 7, 2000, at the Department of Ecology, Eastern Regional Office, North 4601 Monroe, Suite 202, Spokane, WA; and on September 12, 2000, at the Department of Ecology, Northwest Regional Office, 3190 160th Avenue S.E., Bellevue, WA.**

Ecology is an equal opportunity agency. If you have special accommodation needs, desire directions for meeting

locations, or require the fact sheet and proposed permit in an alternative format, please contact Keith Johnson at (360) 407-6442 or TDD (only) (360) 407-6006.

NAME _____

ADDRESS _____

THE WASHINGTON STATE REGISTER, published under RCW 34.08.020, is distributed on the first and third Wednesdays of each month. The Register contains the full text of proposed, emergency, and permanently adopted rules of state agencies, executive orders of the governor, notices of public meetings of state agencies, rules of the state supreme court, summaries of attorney general opinions, and juvenile disposition standards that have been filed in the code reviser's office before the closing date for that issue of the Register. A cumulative table of existing sections of the Washington Administrative Code (WAC) affected by a particular agency action guides the user to the proper issue of the Register.

The code reviser's office has established an annual subscription price of \$195 for a Register subscription, and single copies cost \$8.00. Sales tax of 8.0% applies to all sales other than to state agencies. State law requires payment in advance. To subscribe to the Register, please complete the order form above and forward it to the address indicated, accompanied by your check or money order in the amount of \$210.60 (\$195 for state agencies) payable to the code reviser's office.
