The COVID-19 pandemic continues to require more rapid transfers and discharges than the rule permits. This emergency rule waives the requirement for nursing homes to suspend transfers and discharges pending the outcome of a resident appeal hearing, and improves resident safety by allowing faster grouping of COVID-19 positive residents in one facility, or grouping asymptomatic residents together. This helps expedite infection control processes, and maximizes the availability of nursing home beds. 	388-107-0080, 388-76-10350, 388-78A-2100	Because of the ongoing COVID-19 public health emergency, on January 18, 2022, home and community services (HCS) temporarily suspended conducting ongoing assessments for HCS clients living in adult family homes, assisted living facilities, and enhanced services facilities. The intent of this suspension is to allow HCS staff to focus on conducting assessments in hospitals, which will facilitate their discharge to long-term care facilities and improve the current surge capacity in hospitals. This emergency rule suspends the regulatory requirement for these facilities to complete assessments for HCS clients while the HCS assessors are not available. The Centers for Medicare and Medicaid Services (CMS) approved this flexibility for medicaid beneficiaries needing specific long-term care services and supports whose assessments meet the requirements under 42 C.F.R. 441.720. The emergency rule will be effective retroactively to match the suspension effective date by HCS.	WSR 22-13-121 Filed 6/17/2022		WSR 22-13-185 Filed 6/22/2022 WSR 22-06-042 Filed 2/24/2022

	388-76-10455	The department is amending to allow adult family home providers the authority to administer epinephrine to residents in their care who have an assessed condition requiring administration of epinephrine. When individuals with severe allergies causing anaphylaxis are prescribed epinephrine, the adult family home must be able to administer the medication to residents who require assistance. Current rule requires medication administration be performed by a "practitioner," by nurse delegation or by a family member or legally appointed resident representative. Adult family home providers do not meet the definition of "practitioner" and the task cannot be nurse-delegated. Due to the emergency nature of the medication, family, or others outside the adult family home cannot administer the medication timely.	WSR 22-11-023 Filed 5/10/2022		WSR 22-11-020 Filed 5/10/2022

DEPARTMENT OF ECOLOGY

[Filed August 11, 2022, 9:16 a.m.]

Ecology invites public comment for identification of overburdened communities highly impacted by air pollution.

Ecology has begun work to implement the improving air quality in overburdened communities initiative (section 3, Climate Commitment Act). The first step required is to identify the overburdened communities highly impacted by air pollution in Washington.

Ecology held an initial public engagement period earlier this year to hear from community members on their lived experiences with air quality. Ecology staff used these comments with existing data and studies to create draft indicators, or categories to represent air quality, or other disparities within the community.

Ecology is inviting public comment on these draft indicators. Ecology is interested in hearing if community members feel their experiences with air quality are represented and if there are concerns missing in the draft process. Ecology will consider input and anticipate revising the draft indicators based on public comments.

Once communities are identified as highly impacted by air pollution, ecology will expand air monitoring in the identified communities and in future processes, and develop standards and strategies to address the criteria air pollution in these communities.

Submitting Written Comments: Ecology will accept written comments on the draft indicators, draft factors, data sources, and draft processes to identify overburdened communities highly impacted by air pollution from September 19 through November 4, 2022.

Written comments must be **postmarked by November 4, 2022**. Comments should reference a specific text when possible. Comments may address the following:

- Draft indicators for identifying overburdened communities highly impacted by poor air quality.
- Draft factors for boundaries.
- Data sources.

Please submit written comments to Erin Torrone, Washington State Department of Ecology, P.O. Box 47600, Olympia, WA 98504-7600.

Assistance for Persons with Disabilities: To request ADA accommodations for disabilities, call ecology at 360-407-7285 or visit <https://ecology.wa.gov/accessibility>. People with impaired hearing may call Washington relay service at 711. People with speech disabilities may call TTY at 877-833-6341.

Please visit www.eComments.com to provide online comments between September 19 and November 4, 2022. The department will be holding virtual hearings on the draft process to identify overburdened communities highly impacted by air pollution on the following dates:

This policy also provides a method for calculating the percentage of full-time for faculty teaching these non-traditional class sessions and a method for determining when the employer contribution toward PEBB benefits begins and ends for faculty teaching these nontraditional class sessions.

Policy 17-2: Determining faculty eligibility after a layoff. This policy applies the criteria for maintaining the employer contribution toward PEBB benefits for faculty following a layoff, as described in WAC 182-12-129, to: (1) Faculty who move from one position to another due to a layoff; and (2) employees who move from any type of position to a faculty position after a layoff.
