EMERGENCY RULES  
DEPARTMENT OF  
FISH AND WILDLIFE

[Order 22-268—Filed November 23, 2022, 8:31 a.m., effective January 1, 2023]

Effective Date of Rule: January 1, 2023.

Purpose: The purpose of this emergency rule is to alter the number of days per week white sturgeon retention is allowed in the Bonneville and The Dalles pools.

Citation of Rules Affected by this Order: Amending WAC 220-312-060.

Statutory Authority for Adoption: RCW 77.04.012, 77.04.020, 77.12.045, and 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: This rule is needed to set the open days per week for recreational sturgeon harvest in Bonneville and The Dalles reservoirs. Without altering open periods, these populations of sturgeon are at risk of exceeding retention guidelines within January, as indicated by the last decade of data. These actions are expected extend the sport fishing seasons and to help ensure the overall sport guidelines of 675 and 190 fish in the Bonneville and The Dalles pools respectively, are not exceeded. This action is consistent with decisions made by the states of Washington and Oregon during the Columbia River compact hearing on November 9, 2022.

The duration of the retention seasons will be adjusted if catch rates and effort are much different than projected, based on pool-specific catch guidelines. The recommended days-per-week approach will allow fishery managers sufficient time to produce and monitor daily harvest estimates and recommend actions necessary to stay within the harvest guidelines.

The general public welfare is protected with the immediate and limited duration opening of recreational sturgeon fishing. This limited harvest allows for public use of the resource as well as the maintenance of a sustainable fish population. There is insufficient time to adopt permanent rules.
