

WSR 23-21-007
EMERGENCY RULES
DEPARTMENT OF
FISH AND WILDLIFE

[Order 23-222—Filed October 4, 2023, 4:20 p.m., effective October 4, 2023, 4:20 p.m.]

Effective Date of Rule: Immediately upon filing.

Purpose: The purpose of this emergency rule is to open Chinook retention seasons from Bonneville Dam to the Hwy. 395 Bridge at Pasco.

Citation of Rules Affected by this Order: Repealing WAC 220-312-06000W; and amending WAC 220-312-060.

Statutory Authority for Adoption: RCW 77.04.012, 77.04.020, 77.12.045, and 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The technical advisory committee recently updated the upriver Chinook return to the Columbia River mouth. Current in-season catch and stock composition projections indicate that sufficient Chinook Endangered Species Act (ESA) impacts remain available which allows for additional Chinook retention in this area. Staff will continue to monitor progress of ongoing fisheries, with an expectation to manage within the allowable ESA impact rate and per Washington Fish and Wildlife Policy C-3630. This rule conforms Washington state rules with Oregon state rules and is consistent with compact action on September 7, September 13, September 20, and October 4, 2023.

Washington and Oregon jointly regulate Columbia River fisheries under the congressionally ratified Columbia River Compact. Four Indian tribes have treaty fishing rights in the Columbia River. The treaties preempt state regulations that fail to allow the tribes an opportunity to take a fair share of the available fish, and the states must manage other fisheries accordingly. *Sohappy v. Smith*, 302 F. Supp. 899 (D. Or. 1969). A court order sets the current parameters. *United States v. Oregon*, Civil No. 68-513-KI (D. Or.), Order Adopting 2018-2027 *United States v. Oregon* Management Agreement (February 26, 2018) (Doc. No. 2607-1). Some salmon and steelhead stocks in the Columbia River are listed as threatened or endangered under ESA. On February 23, 2018, the National Marine Fisheries Service issued a biological opinion under 16 U.S.C. § 1536 that allows for some incidental take of these species in the fisheries as described in the 2018-2027 *U.S. v. Oregon* Management Agreement. The Washington and Oregon fish and wildlife commissions have developed policies to guide the implementation of such biological opinions in the states' regulation of nontreaty fisheries.

Columbia River nontreaty fisheries are monitored very closely to ensure compliance with federal court orders, ESA, and commission guidelines. Because conditions change rapidly, the fisheries are managed almost exclusively by emergency rule. Representatives from the Washington (WDFW) and Oregon (ODFW) departments of fish and wildlife convene public hearings and take public testimony when considering proposals for new emergency rules. WDFW and ODFW then adopt regulations reflecting agreements reached.

There is insufficient time to promulgate permanent rules.
