PERMANENT RULES
DEPARTMENT OF
LABOR AND INDUSTRIES
[Filed November 26, 2024, 9:03 a.m., effective January 1, 2025]

Effective Date of Rule: January 1, 2025.

Purpose: This rule adoption amends the tables of classification base premium rates, experience rating plan parameters, and experience modification factor calculation limitations for the workers' compensation insurance program for calendar year 2025. Classification base rates were updated to align with expected losses. The department of labor and industries (L&I) is adopting a 3.8 percent overall average premium rate increase.

Washington law provides that rates should be adjusted annually to reflect the hazards of each industry and in accordance with recognized workers' compensation insurance principles and to ensure solvency of the accident, medical aid, and supplemental pension funds.

L&I is adopting an overall average rate increase of 3.8 percent to ensure premiums to cover most of the expected costs of 2025 workers' compensation claims. This modest increase is below the indicated break-even rate and consistent with our rate-making principle of keeping rates steady and predictable. This rate increase is required to partially account for four consecutive years of higher-than-normal increases in the state's average wage. In addition, the increase enables us to begin gradually increasing our working capital in the supplemental pension fund which pays for annual cost of living adjustments (COLAs) for pensions. L&I is able to minimize the increase for this upcoming year thanks to previous investment earnings that benefit the workers' compensation contingency reserve (surplus).

The adoption is also notice that the director intends to transfer the amount of the accident and medical aid funds combined that exceed 10 percent of funded liabilities as required by RCW 51.44.023.

<u>AMENDATORY SECTION</u> (Amending WSR 23-24-039, filed 11/30/23, effective 1/1/24)

WAC 296-17-855 Experience modification. The basis of the experience modification shall be a comparison of the actual losses charged to an employer during the experience period with the expected losses for an average employer reporting the same exposures in each classification. The comparison shall contain actuarial refinements designed to weigh the extent to which the actual experience is credible, due consideration being given to the volume of the employer's experience. Except for those employers who qualify for an adjusted experience modification as specified in WAC 296-17-860 or 296-17-865, the experience modification factor shall be calculated from the formula:

EXPERIENCE MODIFICATION FACTOR	=	(Credible Actual Primary Loss + Credible Actual Excess Loss)/ Expected Loss
Where		
Credible Actual Primary Loss	=	Actual Primary Loss x Primary Credibility
	+	Expected Primary Loss x (100% - Primary Credibility)
Credible Actual Excess Loss	=	Actual Excess Loss x Excess Credibility
	+	Expected Excess Loss x (100% - Excess Credibility)

The meaning and function of each term in the formula is specified below.

For each claim, the actual primary loss is the first dollar portion of the claim costs, which has been shown in actuarial studies, to have the greater credibility in predicting future experience. These amounts are summed over all claims. For each claim in excess of ((~~$25,170~~)) <u>$25,750</u> the actual primary loss shall be determined from the formula:

$$\text{Primary Loss} \quad = \quad \frac{((62,920)) \, \underline{64,380}}{(\text{Total Loss} + ((37,750)) \, \underline{38,630})} \quad \text{x Total Loss}$$

For each claim, less than ((~~$25,170~~)) <u>$25,750</u> the full value of the claim shall be considered a primary loss.

For each claim, the excess actual loss is the remaining portion of the claim costs, which have been shown in actuarial studies to have

less credibility in predicting future experience. The excess actual loss for each claim shall be determined by subtracting the primary loss from the total loss. These amounts are summed over all claims.

For any claim without disability benefits (time loss, partial permanent disability, total permanent disability or death) either actually paid or estimated to be paid, the total actual losses for calculating the primary loss and excess loss shall first be reduced by the lesser of ((~~$3,670~~)) $3,930 or the total cost of the claim. Here are some examples for these claims:

Total Loss	Type of Claim	Total Loss (after deduction)	Primary Loss	Excess Loss
((2,000	~~Medical Only~~	~~0~~	~~0~~	~~0~~
5,000	~~Medical Only~~	~~1,330~~	~~1,330~~	~~0~~

2,000,000	~~TPD Pension~~	~~405,520~~	~~57,562~~	~~347,958~~))
2,000	Medical Only	0	0	0
5,000	Medical Only	1,070	1,070	0
5,000	Timeloss	5,000	5,000	0
30,000	Medical Only	26,070	25,941	129
30,000	Timeloss	30,000	28,142	1,858
90,000	PPD	90,000	45,045	44,955
150,000	PPD	150,000	51,195	98,805
500,000	TPD Pension	417,090	58,923	358,167
2,000,000	TPD Pension	417,090	58,923	358,167

Note: The deduction, ((~~$3,670~~)) $3,930, is twice the average case incurred cost of these types of claims occurring during the three-year period used for experience rating. On average this results in reducing the average actual loss about 70 percent for these types of claims adjusted. This is done to help make the transition between the two different experience rating methods better by helping make the change in experience factor reasonable for small changes to the actual losses.

For each employer, the primary credibility and the excess credibility determines the percentage weight given to the corresponding actual primary losses and the actual excess losses, included in the calculation of the experience modification, based on the volume of expected losses. Primary credibility and excess credibility values are set forth in Table II.

An employer's expected losses shall be determined by summing the expected loss for each of the three years of the experience period, which are calculated by multiplying the reported exposure in each classification during the year by the corresponding classification expected loss rate and rounding the result to the nearest cent. Classification expected loss rates by year are set forth in Table III.

Expected losses in each classification shall be multiplied by the classification "Primary-Ratio" to obtain "expected primary losses" which shall be rounded to the nearest cent. Expected excess losses shall then be calculated by subtracting expected primary losses from expected total losses rounded to the nearest cent. Primary-Ratios are also set forth in Table III.

<u>AMENDATORY SECTION</u> (Amending WSR 23-24-039, filed 11/30/23, effective 1/1/24)

WAC 296-17B-540 Determining loss incurred for each claim. (1) Calculating the initial loss incurred:

For each of your claims, we will multiply the case incurred loss by the appropriate discounted loss development factors to determine the initial loss incurred.

If you have a fatality, we will use ((\$544,000)) <u>$576,200</u> as the claim's initial incurred loss for the claim, with ((\$507,800)) <u>$537,700</u> for accident fund incurred loss and ((\$36,200)) <u>$38,500</u> for the medical aid incurred loss, regardless of the case incurred loss, and before recovery factors if applicable.

(2) Applying the single loss occurrence limit:

The initial loss incurred for a claim will be the amount we use as the loss incurred unless the single loss occurrence limit applies.

The single loss occurrence limit applies when the sum of all initial losses incurred for your claims arising out of a single event is greater than your selected single loss occurrence limit. In that case, each claim's initial loss incurred will be its proportionate share of your single loss occurrence limit.

(3) Applying the expected loss ratio factors:

The preliminary loss incurred for a claim will be the amount of the initial loss incurred, after application of the single loss limit, multiplied by the appropriate expected loss ratio factor. The accident fund and medical aid fund portions of each claim will have separate expected loss ratio factors applied.
