EFFECT: Deletes 3 subsections that amend the Shoreline Management Act. These subsections exempt the following projects from need to obtain a locally issued substantial development permit: 1) Improvements to dikes and levees if the county determines the project is consistent with a local flood plan; 2) Sediment removal, sediment disposal, and streambank stabilization projects if the county determines the project has a flood control benefit; and 3) Construction of stream regulation, retention, or detention facilities if consistent with a flood control management plan.
