8 goal of the state of Washington to preserve and restore the natural  
9 resources of the state and, in particular, fish and wildlife and their  
10 habitat. It is further the policy of the state insofar as possible to  
11 utilize the volunteer organizations who have demonstrated their  
12 commitment to these goals.

13 To this end, it is the intent of the legislature to minimize the  
14 expense and delays caused by unnecessary bureaucratic process in  
15 securing permits for projects that preserve or restore native fish and  
16 wildlife habitat.

17 NEW SECTION. **Sec. 2.** Unless the context clearly requires  
18 otherwise, the definitions in this section shall apply throughout  
19 sections 1 through 7 of this act.

23 Indian tribe acting within and pursuant to its authority, a city, a  
24 county, or a conservation district, that provides a general program and  
25 implementation measures or actions for the preservation, restoration,  
26 re-creation, or enhancement of the natural resources, character, and  
27 ecology of a stream, stream segment, drainage area, or watershed, and  
28 for which agency and public review has been conducted pursuant to  
29 chapter 43.21C RCW, the state environmental policy act. If the  
30 implementation measures or actions would have a probable significant,  
31 adverse environmental impact, a detailed statement under RCW 43.21C.031  
32 must be prepared on the plan.

33 (2) "Watershed restoration project" means a public or private  
34 project authorized by the sponsor of a watershed restoration plan that  
35 implements the plan or a part of the plan and consists of one or more

3 which less than twenty-five cubic yards of sand, gravel, or soil is  
4 removed, imported, disturbed, or discharged, and in which no existing  
5 vegetation is removed except as minimally necessary to facilitate  
6 additional plantings;

7 (b) A project for the restoration of an eroded or unstable stream  
8 bank that employs the principles of bioengineering, including limited  
9 use of rock as a stabilization only at the toe of the bank, and with  
10 primary emphasis on using native vegetation to control the erosive  
11 forces of flowing water; or

12 (c) A project primarily designed to improve fish and wildlife  
13 habitat, remove or reduce impediments to migration of fish, or enhance  
14 the fishery resource available for use by all of the citizens of the  
15 state, provided that any structure other than a bridge or culvert or

25 consolidated process shall include a single permit application form for  
26 use by all responsible state and local agencies. The commission shall

17 1724). The center shall adopt a target of completing permit decisions
