2 By Representative Sump

3 On page 6, line 2, after rules.- strike everything through
4 recovery.- on page 6, line 14, and insert the following:

5 (7) Notwithstanding the adaptive management process outlined in Appendix L of the forests
6 and fish report, the adaptive management process adopted by the forest practices board to review the
7 forest practices implemented under the forests and fish report shall be
8 conducted exclusively by the legislature. The legislature shall review
9 the success of the state's forest practices regulations at recovering
10 threatened and endangered salmon runs listed under the federal
11 endangered species act every five years. The legislative review shall
12 include, where necessary, recommendations for reductions or other
13 changes to the state's forest practices regulations based on the
14 success or failure of the current regulations to recover species listed
15 under the federal endangered species act.-

16 Effect: Changes the adaptive management process found in the
17 Forests and Fish Report by giving the Legislature the authority to
18 review the success of the new regulations on recovering listed species,
19 and to make recommendations based on the success or failure of the
20 regulations to recover listed species.
