Brief Description: Mitigating the effects of the aquatic pesticide national pollutant discharge elimination system permit required as the result of a recent court decision.

HB 2867 - DIGEST

(SUBSTITUTED FOR - SEE 2ND SUB)

Finds that the recent federal court of appeals decision in *Headwaters, Inc. v. Talent Irrigation District*, 243 F.3rd 526 (9th Cir. 2001) imposes a duty to obtain a national pollutant discharge elimination system permit under the clean water act for the application of pesticides to irrigation canals. This duty is also extended to other individuals and organizations that apply pesticides to other waters, where no duty existed before the *Talent* decision.

Finds that the costs associated with the issuance of the national pollutant discharge elimination system permit now required by the department of ecology as a result of the federal decision is unfairly burdensome to the affected individuals and organizations.

Declares an intent to reduce the burden of the federal decision on those individuals and organizations.
