Brief Description: Requiring rates and charges to consider and be based on the served property's impacts or lack of impacts to storm water systems.

HB 2976 - DIGEST

Provides that rates and charges must take into consideration and be based on impacts or lack of impacts the property served has on receiving waters and storm water systems. Other factors such as impacts to water quality, extent of capital and operational best management practices, natural or constructed water infiltration by property served, and surrounding properties absorption characteristics, shall be taken into consideration when assessing surface water management fees.
