Brief Description: Regulating circuit power sources that do not exceed twenty-five volts or fifty volt amps.

**SB 6111 - DIGEST**

Provides that, where circuit power sources for installation of signaling circuits, power-limited circuits, and related equipment do not exceed twenty-five volts or fifty volt amps and where the total length of all conductors does not exceed one thousand feet, no certificate is required.

Declares that such equipment includes fire protection signaling systems, intrusion alarms, nonutility owned communication systems, and similar low-energy circuits and equipment.
