Brief Description: Providing incentives for the purchase of hybrid and fuel cell vehicles.

**HB 1467 - DIGEST**

Finds that an appropriate goal would be for fifty percent of the motor vehicles sold to be hybrid and fuel cell vehicles by the year 2013. In order to encourage the citizens of Washington to pursue this goal through market incentives, the legislature shall reduce sales tax on these vehicles, and dedicate the remaining portion of the state sales tax to provide for other transportation alternatives.
