Regulating motorsports vehicle dealer franchises.

Finds and declares that the distribution and sale of motorsports vehicles in this state vitally affect the general economy of the state and the public interest and public welfare, that provision for warranty service to motorsports vehicles is of substantial concern to the people of this state, that the maintenance of fair competition among dealers and others is in the public interest, and that the maintenance of strong and sound dealerships is essential to provide continuing and necessary reliable services to the consuming public in this state and to provide stable employment to the citizens of this state.

Finds that there is a substantial disparity in bargaining power between motorsports vehicle manufacturers and their dealers, and that in order to promote the public interest and the public welfare, and in the exercise of its police power, it is necessary to regulate the relationship between motorsports vehicle dealers and motorsports vehicle manufacturers, importers, distributors, and their representatives doing business in this state, not only for the protection of dealers but also for the benefit for the public in assuring the continued availability and servicing of motorsports vehicles sold to the public.

HB 2105 by Representatives Kagi and Darneille

Ensuring that offender populations do not exceed prison capacity.

Declares an intent to: (1) Promote the primary purposes of the criminal justice system and focus resources on sex offenders and violent offenders who pose the greatest risk to our communities by reducing offender populations when such populations exceed the maximum operational capacity of facilities operated by the department of corrections; and

(2) Accomplish the reduction by concentrating solely on offenders convicted of certain nonviolent offenses who are close to the end of their sentences.

Requires the caseload forecast council, in consultation with the department of corrections, the sentencing guidelines commission, and the indeterminate sentence review board, to, by rule, establish a methodology for determining the maximum statewide operating capacity for correctional facilities operated by the department of corrections. The methodology must take into account methods for increasing facility capacity without making improvements or additions to infrastructure.

Provides that an offender may be released by the department under this act. An offender released under this provision shall be on community custody status for the difference between the date of release and the expiration of the offender's term of confinement imposed by the court, subject to conditions imposed by the department. For an offender released from custody imposed because of a conviction for an offense under chapter 69.50 or 69.52 RCW, the community custody must include affirmative conditions relating to drug treatment.

HB 2111 by Representatives Priest, Jarrett and Cox

Authorizing performance contracts between the state and institutions of higher education.

Finds that the intent to combine institutional flexibility and authority to make decisions at the local level with accountability for achieving statewide goals and objectives has never been fully achieved, in part because there has not been an operating mechanism through which to implement this relationship.

Declares an intent to authorize performance contracts between the state and each public four-year institution of higher education, as well as a performance contract between the state and the community and technical college system. These performance contracts will constitute a negotiated agreement between the state and the governing boards of

each institution and the community and technical college system where each party makes a multiyear commitment to operate under the terms of the agreement.

Declares that it is through these performance contracts that the legislature intends to implement a new relationship between the state and its institutions of higher education, where the state's primary interest lies not in the management and operations of an institution, but in the institution's contribution to achieving agreed-upon statewide goals and objectives for higher education.

Establishing the Washington climate action registry.

Finds that: (1) It is in the best interest of the state of Washington, the United States of America, and the earth as a whole, to encourage voluntary actions to achieve all economically beneficial reductions of greenhouse gas emissions from Washington sources.

(2) Mandatory reductions of greenhouse gas emissions may eventually be imposed on Washington sources, and, consequently, the state has a responsibility to use its best efforts to ensure that organizations that voluntarily reduce their emissions receive appropriate consideration for reductions in emissions made before mandatory programs are implemented.

(3) Past programs in the state that took early and responsible action to reduce pollution and to save energy have demonstrated political, economic, and technological leadership, have benefited the state, and have saved taxpayers, business owners, and homeowners significant amounts of money.

(4) The state's tradition of environmental and energy leadership should be recognized by establishing a registry to provide documentation of reductions in greenhouse gas emissions that are voluntarily achieved by sources within the state.

(5) Greenhouse gas emissions exchanges are being established with the ability to buy and sell the rights to emissions reduction credits. Washington sources will benefit as mature traders in these markets in the future by early participation.
