Brief Description: Redirecting cost savings from a highway construction project at the state route No. 2/97 interchange to a highway construction project on state route No. 28 in Douglas county.

**SB 6089 - DIGEST**

Provides that, if the transportation commission determines that the safety needs at the US2/97 Peshastin East - Interchange may be met with a design of lesser cost, then the savings from the US2/97 Peshastin East - Interchange project may be applied to the SR28/East End of the George Sellar Bridge project. If the funds to the SR28/East End of the George Sellar Bridge project under this provision are not sufficient to complete the project, then the department of transportation shall solicit additional funds from local and federal sources and may not proceed with the construction of the project until funding to complete the project is identified.
