Sponsor(s): Senator Morton

Brief Description: Creating a public lands advisory commission for noxious weed management.

SB 6707 - DIGEST

Declares that Washington must establish an early detection and rapid response system for noxious weeds and develop a state agency action plan to strengthen statewide coordination of weed management activities to be carried out at the local level.

Declares that the goal of this act is to encourage state agencies and private landowners to work together to alleviate the economic and habitat losses that noxious weeds are causing statewide.
