

HB 2787 - DIGEST

Declares that Washington state recognizes the importance of protecting the confidentiality and privacy of an individual's personal information contained in identification documents such as driver's licenses.

Declares that machine-readable features found on driver's licenses and other similar identification documents are intended to facilitate verification of identity, not to facilitate collection of personal information about individuals, nor to facilitate the creation of private data bases of transactional information associated with those individuals.

Declares that easy access to the information found on driver's licenses and other similar identification documents facilitates the crime of identity theft, a crime that is a major concern in Washington.

Provides that use of machine-readable features on identification documents for purposes other than verification of identity constitutes an unreasonable infringement of privacy and is an unfair business practice.
