The SBEIS must contain a variety of information, including:

- A brief description of the reporting, recordkeeping, and other compliance requirements of the proposed rule;
- A description of the professional services that a small business is likely to need in order to comply with the requirements of the proposed rule;
- An analysis of the costs of compliance;

- A determination of whether the rule has a disproportionate impact on small businesses. The determination must compare the cost of compliance on small businesses with the cost of compliance for the 10 percent of businesses that are the largest businesses required to comply
