SENATE BILL 5473

State of Washington 60th Legislature 2007 Regular Session

By Senators Oemig, Morton, Regala and Clements; by request of Department of Ecology

Read first time 01/19/2007. Referred to Committee on Water, Energy & Telecommunications.

1 AN ACT Relating to changing the definition of floodway in the 2 shoreline management act; and amending RCW 90.58.030.

3 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

4 **Sec. 1.** RCW 90.58.030 and 2003 c 321 s 2 are each amended to read 5 as follows:

6 As used in this chapter, unless the context otherwise requires, the 7 following definitions and concepts apply:

8 (1) Administration:

9 (a) "Department" means the department of ecology;

10 (b) "Director" means the director of the department of ecology;

(c) "Local government" means any county, incorporated city, or town which contains within its boundaries any lands or waters subject to this chapter;

14 (d) "Person" means individual, partnership, corporation, an association, 15 organization, cooperative, public or municipal corporation, or agency of the state or local governmental unit however 16 17 designated;

(e) "Hearing board" means the shoreline hearings board establishedby this chapter.

- 1
- (2) Geographical:

2 (a) "Extreme low tide" means the lowest line on the land reached by a receding tide; 3

(b) "Ordinary high water mark" on all lakes, streams, and tidal 4 5 water is that mark that will be found by examining the bed and banks and ascertaining where the presence and action of waters are so common 6 7 and usual, and so long continued in all ordinary years, as to mark upon the soil a character distinct from that of the abutting upland, in 8 respect to vegetation as that condition exists on June 1, 1971, as it 9 may naturally change thereafter, or as it may change thereafter in 10 accordance with permits issued by a local government or the department: 11 PROVIDED, That in any area where the ordinary high water mark cannot be 12 found, the ordinary high water mark adjoining salt water shall be the 13 line of mean higher high tide and the ordinary high water mark 14 adjoining fresh water shall be the line of mean high water; 15

(c) "Shorelines of the state" are the total of all "shorelines" and 16 17 "shorelines of statewide significance" within the state;

(d) "Shorelines" means all of the water areas of the state, 18 including reservoirs, and their associated shorelands, together with 19 lands underlying them; except (i) shorelines of statewide 20 the 21 significance; (ii) shorelines on segments of streams upstream of a 22 point where the mean annual flow is twenty cubic feet per second or less and the wetlands associated with such upstream segments; and (iii) 23 24 shorelines on lakes less than twenty acres in size and wetlands 25 associated with such small lakes;

(e) "Shorelines of statewide significance" means the following 26 27 shorelines of the state:

(i) The area between the ordinary high water mark and the western 28 boundary of the state from Cape Disappointment on the south to Cape 29 Flattery on the north, including harbors, bays, estuaries, and inlets; 30

31 (ii) Those areas of Puget Sound and adjacent salt waters and the 32 Strait of Juan de Fuca between the ordinary high water mark and the line of extreme low tide as follows: 33

34

(A) Nisqually Delta--from DeWolf Bight to Tatsolo Point,

(B) Birch Bay--from Point Whitehorn to Birch Point, 35

(C) Hood Canal--from Tala Point to Foulweather Bluff, 36

37 (D) Skagit Bay and adjacent area--from Brown Point to Yokeko Point, 38 and

- 1
- (E) Padilla Bay--from March Point to William Point;

2 (iii) Those areas of Puget Sound and the Strait of Juan de Fuca and
3 adjacent salt waters north to the Canadian line and lying seaward from
4 the line of extreme low tide;

5 (iv) Those lakes, whether natural, artificial, or a combination 6 thereof, with a surface acreage of one thousand acres or more measured 7 at the ordinary high water mark;

8

(v) Those natural rivers or segments thereof as follows:

9 (A) Any west of the crest of the Cascade range downstream of a 10 point where the mean annual flow is measured at one thousand cubic feet 11 per second or more,

(B) Any east of the crest of the Cascade range downstream of a point where the annual flow is measured at two hundred cubic feet per second or more, or those portions of rivers east of the crest of the Cascade range downstream from the first three hundred square miles of drainage area, whichever is longer;

17 (vi) Those shorelands associated with (i), (ii), (iv), and (v) of 18 this subsection (2)(e);

(f) "Shorelands" or "shoreland areas" means those lands extending 19 landward for two hundred feet in all directions as measured on a 20 21 horizontal plane from the ordinary high water mark; floodways and 22 contiguous floodplain areas landward two hundred feet from such floodways; and all wetlands and river deltas associated with the 23 24 streams, lakes, and tidal waters which are subject to the provisions of 25 this chapter; the same to be designated as to location by the department of ecology. 26

(i) Any county or city may determine that portion of a one-hundredyear-flood plain to be included in its master program as long as such portion includes, as a minimum, the floodway and the adjacent land extending landward two hundred feet therefrom.

(ii) Any city or county may also include in its master program land necessary for buffers for critical areas, as defined in chapter 36.70A RCW, that occur within shorelines of the state, provided that forest practices regulated under chapter 76.09 RCW, except conversions to nonforest land use, on lands subject to the provisions of this subsection (2)(f)(ii) are not subject to additional regulations under this chapter;

1 (g) "Floodway" means ((those portions of)) the area of a river 2 valley ((lying streamward from the outer limits of a watercourse upon which flood waters are carried during periods of flooding that occur)) 3 that conveys flood waters with reasonable regularity, although not 4 necessarily annually((, said floodway being identified, under normal 5 condition, by changes in surface soil conditions or changes in types or 6 7 quality of vegetative ground cover condition)). At a minimum, the floodway is that which has been established in federal emergency 8 management act flood insurance rate maps or federal emergency 9 management act floodway maps. Other data and information, including 10 topography, changes in soil or vegetation, and other indicators of past 11 12 flooding may be used to define and map a floodway that meets the 13 objectives of the shoreline management act, chapter 90.58 RCW. The 14 floodway shall not include those lands that can reasonably be expected to be protected from <u>one hundred-year</u> flood waters by flood control 15 devices maintained by or maintained under license from the federal 16 17 government, the state, or a political subdivision of the state;

(h) "Wetlands" means areas that are inundated or saturated by 18 surface water or ground water at a frequency and duration sufficient to 19 support, and that under normal circumstances do support, a prevalence 20 21 of vegetation typically adapted for life in saturated soil conditions. 22 Wetlands generally include swamps, marshes, bogs, and similar areas. Wetlands do not include those artificial wetlands intentionally created 23 24 from nonwetland sites, including, but not limited to, irrigation and 25 drainage ditches, grass-lined swales, canals, detention facilities, wastewater treatment facilities, farm ponds, and landscape amenities, 26 27 or those wetlands created after July 1, 1990, that were unintentionally created as a result of the construction of a road, street, or highway. 28 Wetlands may include those artificial wetlands intentionally created 29 30 from nonwetland areas to mitigate the conversion of wetlands.

31

(3) Procedural terms:

32 (a) "Guidelines" means those standards adopted to implement the 33 policy of this chapter for regulation of use of the shorelines of the 34 state prior to adoption of master programs. Such standards shall also 35 provide criteria to local governments and the department in developing 36 master programs;

(b) "Master program" shall mean the comprehensive use plan for adescribed area, and the use regulations together with maps, diagrams,

1 charts, or other descriptive material and text, a statement of desired 2 goals, and standards developed in accordance with the policies 3 enunciated in RCW 90.58.020;

4 (c) "State master program" is the cumulative total of all master 5 programs approved or adopted by the department of ecology;

6 (d) "Development" means a use consisting of the construction or 7 exterior alteration of structures; dredging; drilling; dumping; 8 filling; removal of any sand, gravel, or minerals; bulkheading; driving 9 of piling; placing of obstructions; or any project of a permanent or 10 temporary nature which interferes with the normal public use of the 11 surface of the waters overlying lands subject to this chapter at any 12 state of water level;

(e) "Substantial development" shall mean any development of which 13 14 the total cost or fair market value exceeds five thousand dollars, or any development which materially interferes with the normal public use 15 of the water or shorelines of the state. 16 The dollar threshold 17 established in this subsection (3)(e) must be adjusted for inflation by the office of financial management every five years, beginning July 1, 18 19 2007, based upon changes in the consumer price index during that time period. "Consumer price index" means, for any calendar year, that 20 21 year's annual average consumer price index, Seattle, Washington area, 22 for urban wage earners and clerical workers, all items, compiled by the bureau of labor and statistics, United States department of labor. The 23 24 office of financial management must calculate the new dollar threshold and transmit it to the office of the code reviser for publication in 25 the Washington State Register at least one month before the new dollar 26 27 threshold is to take effect. The following shall not be considered substantial developments for the purpose of this chapter: 28

(i) Normal maintenance or repair of existing structures ordevelopments, including damage by accident, fire, or elements;

31 (ii) Construction of the normal protective bulkhead common to 32 single family residences;

33 (iii) Emergency construction necessary to protect property from 34 damage by the elements;

(iv) Construction and practices normal or necessary for farming, irrigation, and ranching activities, including agricultural service roads and utilities on shorelands, and the construction and maintenance of irrigation structures including but not limited to head gates,

pumping facilities, and irrigation channels. A feedlot of any size, 1 2 all processing plants, other activities of a commercial nature, alteration of the contour of the shorelands by leveling or filling 3 other than that which results from normal cultivation, shall not be 4 5 considered normal or necessary farming or ranching activities. А feedlot shall be an enclosure or facility used or capable of being used б 7 for feeding livestock hay, grain, silage, or other livestock feed, but shall not include land for growing crops or vegetation for livestock 8 9 feeding and/or grazing, nor shall it include normal livestock wintering 10 operations;

(v) Construction or modification of navigational aids such as channel markers and anchor buoys;

(vi) Construction on shorelands by an owner, lessee, or contract purchaser of a single family residence for his own use or for the use of his or her family, which residence does not exceed a height of thirty-five feet above average grade level and which meets all requirements of the state agency or local government having jurisdiction thereof, other than requirements imposed pursuant to this chapter;

(vii) Construction of a dock, including a community dock, designed 20 21 for pleasure craft only, for the private noncommercial use of the 22 owner, lessee, or contract purchaser of single and multiple family residences. This exception applies if either: (A) In salt waters, the 23 24 fair market value of the dock does not exceed two thousand five hundred dollars; or (B) in fresh waters, the fair market value of the dock does 25 not exceed ten thousand dollars, but if subsequent construction having 26 27 a fair market value exceeding two thousand five hundred dollars occurs within five years of completion of the prior construction, the 28 subsequent construction shall be considered a substantial development 29 for the purpose of this chapter; 30

(viii) Operation, maintenance, or construction of canals, waterways, drains, reservoirs, or other facilities that now exist or are hereafter created or developed as a part of an irrigation system for the primary purpose of making use of system waters, including return flow and artificially stored ground water for the irrigation of lands;

37 (ix) The marking of property lines or corners on state owned lands,

when such marking does not significantly interfere with normal public use of the surface of the water;

3 (x) Operation and maintenance of any system of dikes, ditches, 4 drains, or other facilities existing on September 8, 1975, which were 5 created, developed, or utilized primarily as a part of an agricultural 6 drainage or diking system;

7 (xi) Site exploration and investigation activities that are 8 prerequisite to preparation of an application for development 9 authorization under this chapter, if:

10 (A) The activity does not interfere with the normal public use of11 the surface waters;

12 (B) The activity will have no significant adverse impact on the 13 environment including, but not limited to, fish, wildlife, fish or 14 wildlife habitat, water quality, and aesthetic values;

15 (C) The activity does not involve the installation of a structure, 16 and upon completion of the activity the vegetation and land 17 configuration of the site are restored to conditions existing before 18 the activity;

(D) A private entity seeking development authorization under this section first posts a performance bond or provides other evidence of financial responsibility to the local jurisdiction to ensure that the site is restored to preexisting conditions; and

(E) The activity is not subject to the permit requirements of RCW90.58.550;

(xii) The process of removing or controlling an aquatic noxious weed, as defined in RCW 17.26.020, through the use of an herbicide or other treatment methods applicable to weed control that are recommended by a final environmental impact statement published by the department of agriculture or the department jointly with other state agencies under chapter 43.21C RCW.

--- END ---
