

SB 5508.E - DIGEST

(DIGEST AS ENACTED)

Finds that uncertainty in government processes to permit an activity by a citizen of Washington state is undesirable and erodes confidence in government.

Finds that in the case of projects that would further economic development in the state, information about the permitting process is critical for an applicant's planning and financial assessment of the proposed project. The legislature also finds that applicants have a responsibility to provide complete and accurate information.
