

SB 6575 - DIGEST

Creates a health care work group to develop an accessible, secure, internet-based system to allow citizens to view their health care records and information about providers.

Requires the work group to develop strategies to improve provider behavior, communication, and performance.

Requires the work group to be chaired jointly by the governor and attorney general and have members representing various groups, as set out in the bill.

Requires the work group to report its recommendations to the legislature annually.
