

FINAL BILL REPORT

ESHB 2450

C 31 L 16 E 1
Synopsis as Enacted

Brief Description: Allowing critical access hospitals participating in the Washington rural health access preservation pilot to resume critical access hospital payment and licensure.

Sponsors: House Committee on Health Care & Wellness (originally sponsored by Representatives Tharinger, Short, Cody, Schmick, Jinkins and Blake).

House Committee on Health Care & Wellness
House Committee on Appropriations
Senate Committee on Health Care

Background:

Critical Access Hospitals.

Prior to becoming licensed by the Department of Health and beginning operations, a hospital must receive a certificate of need and comply with the review process for any construction project related to the facility. In the case of hospitals, a certificate of need is required prior to construction, renovation, or sale of a hospital; changes in bed capacity; or the addition of specialized health services. The construction review process provides technical assistance for changes to hospitals such as new construction, replacement, alterations, additions, expansions, change of approved use, remodeling, and upgrades.

There are 39 hospitals in Washington that are certified as critical access hospitals. These are hospitals with 25 beds or fewer that are generally located in rural areas. They must deliver continuous emergency department services and they may not have an average length of stay of more than 96 hours per patient. The Critical Access Hospital Program allows hospitals under Washington's medical assistance programs to receive payment for hospital services based on allowable costs and to have more flexibility in staffing. Since 2005, there has been a moratorium on additional hospital participation in the Critical Access Hospital Program.

Healthier Washington.

The federal Patient Protection and Affordable Care Act established the Center for Medicare and Medicaid Innovation (CMMI) within the Centers for Medicare and Medicaid Services to test innovative payment and service delivery models. As part of the State Innovation Models

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not a part of the legislation nor does it constitute a statement of legislative intent.

Initiative, Washington received approximately \$1 million from the CMMI to continue work on the State Health Care Innovation Plan (Innovation Plan). In late 2014, Washington received an additional \$65 million from the federal government to implement the Innovation Plan. The Innovation Plan includes three strategies:

- Encourage value-based purchasing, beginning with state-purchased health care.
- Build healthy communities through prevention and early mitigation of disease.
- Improve chronic illness care through better integration of care and social supports, in particular for people with both physical and behavioral health issues.

The state has undertaken implementation of the Innovation Plan under an initiative known as "Healthier Washington." Among the projects is an effort to build new payment and delivery mechanisms for federally qualified health centers and rural health care clinics and critical access hospitals. For critical access hospitals, the project includes the creation of a new payment and care delivery option. The Department of Health and the Washington State Hospital Association have formed the Washington Rural Health Access Preservation project to examine different structures for payment and care delivery. The project expects to create a new facility type that would allow rural critical access hospitals to scale their services to the needs and care patterns of the communities. The project is considering a pilot of 12 to 15 critical access hospitals to test the new type of facility. Pilot sites are being considered based upon remoteness of the location, the size of the population center, and the hospital's fiscal performance.

Summary:

A rural hospital that has been certified as a critical access hospital and relinquishes its status as a critical access hospital to participate in the Washington Rural Health Access Preservation (WRHAP) pilot may discontinue its participation in the pilot and resume its participation in Medicaid payment methodologies for critical access hospitals.

A rural hospital that fails to meet critical access hospital status as a result of participation in the WRHAP pilot may renew its hospital license and resume operations as a hospital with the same number of previously approved beds without having to meet certificate of need and construction review requirements. The exemption applies as long as the hospital was in compliance with licensing rules at the time it began participation in the WRHAP pilot and the condition of the hospital's physical plant and equipment is equal to or exceeds the level of compliance required when it began participation in the WRHAP pilot. If a formerly licensed hospital that participates in the WRHAP pilot is sold, purchased, or leased during the WRHAP pilot and the new owner or lessor applies to renew the hospital's license, the sale, purchase, or lease is subject to certificate of need requirements. The Department of Health (Department) may conduct an inspection to determine compliance with hospital licensing rules.

The WRHAP pilot must meet several specific requirements. The Department, the Health Care Authority (Authority), and the Washington State Hospital Association (Association) must establish goals for the WRHAP pilot prior to any hospital's participation. Participation in the WRHAP pilot is voluntary and the Authority must inform a critical access hospital of how to terminate participation. The Department, the Authority, and the Association must report interim progress to the Legislature by December 1, 2018 and results of the WRHAP

pilot within six months of its conclusion. The reports must describe any policy changes that may support small critical access hospitals that are identified during the WRHAP pilot.

Votes on Final Passage:

House 96 0

First Special Session

House 95 0

Senate 43 0

Effective: June 28, 2016
