## Education Committee

---

### ESB 6620

**Brief Description:** Concerning cost-effective methods for maintaining and increasing school safety.

**Sponsors:** Senators McAuliffe, Dammeier, Rolfes, Litzow, Billig, Keiser and Conway.

#### Brief Summary of Engrossed Bill

- Requires the Washington State Institute for Public Policy to complete an evaluation of how Washington and other states have addressed the funding of school safety and security programs and submit a report to the Legislature, the Governor, and the Office of the Superintendent of Public Instruction (OSPI) by December 1, 2017.
- Requires the OSPI and the school safety advisory committee to hold annual school safety summits with appointed legislators and other participants.
- Allows educational service districts to implement a regional school safety and security program that is modeled after the educational service district that has developed a regional school safety and security center.

**Hearing Date:** 2/22/16

**Staff:** Ashley Fisher (786-7296) and Ethan Moreno (786-7386).

#### **Background:**

##### Washington State Institute for Public Policy.

Created by the Legislature in 1983, the Washington State Institute for Public Policy (WSIPP) conducts nonpartisan research at the direction of the Legislature or the WSIPP Board of Directors.

##### Safe School Plans.

Current law requires that schools have a safe school plan. Safe school plans must:

- include required school safety policies and procedures;
- address emergency mitigation, preparedness, response, and recovery; and

- include provisions for assisting and communicating with students and staff, including those with special needs or disabilities.

To the extent funds are available, school districts must annually review and update safe school plans in collaboration with local emergency response agencies, conduct an inventory of all hazardous materials, and update information on the school mapping information system to reflect current staffing and updated plans. School districts must also work collaboratively with local law enforcement agencies and school security personnel to develop an emergency response system that expedites the response and arrival of law enforcement in the event of a threat or emergency.

#### School Safety Center Advisory Committee.

Located in the Office of the Superintendent of Public Instruction (OSPI), the School Safety Center provides resources to districts and schools in order to help develop high-quality emergency operations and safety plans. The School Safety Center Advisory Committee advises the Superintendent of Public Instruction on issues related to the School Safety Center, including:

- disseminating successful models of school safety plans and cooperative efforts;
- providing assistance to schools to establish a comprehensive safe schools plan;
- selecting models of cooperative efforts;
- acting as an information dissemination and resource center when an incident occurs;
- coordinating activities relating to school safety; and
- reviewing and approving manuals and curricula used for school safety models and training.

#### School Safety and Security Center.

Washington's nine educational service districts (ESDs) provide cooperative and informational services to local school districts, and assist the OSPI and the State Board of Education in the performance of their duties. The ESD 105 serves school districts in South Central Washington. The ESD 105 School Safety and Security program supports school districts in developing comprehensive approaches to safe and secure learning environments. The program helps schools develop plans that address prevention, protection, mitigation, response, and recovery.

#### **Summary of Bill:**

#### Washington State Institute for Public Policy.

The WSIPP is required to complete an evaluation of how Washington and other states have addressed the funding of school safety and security programs, and to submit a report to the Legislature, the Governor, and the OSPI by December 1, 2017.

#### Annual Safety Summits.

The OSPI and the school safety advisory committee are required to hold annual school safety summits. Each annual summit must focus on establishing and monitoring the progress of a statewide plan for funding cost-effective methods for school safety that meet local needs. The summits may also focus on the planning and implementation of school safety planning efforts, training school safety professionals, and integrating health and security measures. Summit participants must be appointed no later than August 1, 2016, and include two members from each of the relevant caucuses of the Senate, two members from each of the largest caucuses of the House of Representatives, and a representative appointed by the Governor. Other participants

may include representatives from the OSPI, the Department of Health, ESDs, educational associations, emergency management, law enforcement, fire departments, parent organizations, and student organizations.

Regional School Safety and Security Programs.

Educational service districts are permitted to implement a regional school safety and security program that is modeled after the ESD that has developed a regional school safety and security center. Program components should include:

- establishment of a network of school safety coordinators for the ESDs;
- collaboration with the ESD that developed the model for a regional school safety and security center;
- the creation of technology-based systems that enable more efficient and effective communication between schools and emergency response entities;
- ongoing prevention and response training for school personnel and emergency responders; and
- building collaborative relationships between other ESDs, the OSPI, and the school safety advisory committee.

**Appropriation:** None.

**Fiscal Note:** Available.

**Effective Date:** The bill takes effect 90 days after adjournment of the session in which the bill is passed.
